Fabrication and testing of a brazed multipiece beryllium support structure for tactical sensors [AIAA PAPER 85-0679] p 522 A85-30280

Design, ancillary testing, analysis and fabrication data for the advanced composite stabilizer for Boeing 737 aircraft, volume 2 [NASA-CR-166011] p 179 N85-13914

Fabrication and quality assurance processes for superhybrid composite fan blades [NASA-TM-83354] p 180 N85-14882

Advances in composites technology [NASA-TM-86353] p 284 N85-17048

Investigation on experimental techniques to detect, locate and quantify gear noise in helicopter transmissions [NASA-CR-3847] p 305 N85-17667

**FABRICS**

Metallised fabrics, their properties and technical applications p 118 A85-15166

The use of carbon weaves and tapes - Technical and economic surveys p 520 A85-33242

Properties of glass and carbon fiber fabrics used in helicopter rotors [MBB-UD-424-84-OE] p 541 A85-35254

Finger materials for air cushion vehicles. Volume 2: Base fabrics for finger materials [AD-A149701] p 448 N85-21408

Removable cleanable antireflection shield [AD-D011735] p 863 N85-33810

**FACTORIZATION**

Approximate factorization schemes for three-dimensional nonlinear supersonic potential flow p 145 A85-18678

Recent improvements in efficiency, accuracy, and convergence for implicit approximate factorization algorithms — computational fluid dynamics [AIAA PAPER 85-0360] p 230 A85-20866

Research on implicit approximate-factorization finite-difference method for the Euler equation p 873 A85-49706

Analysis of inviscid transonic flow around an airfoil by diagonal form of IAF scheme [NAL-TR-831] p 328 N85-18955

**FAIL-SAFE SYSTEMS**

Inspection intervals for fail-safe structure p 124 A85-14899

A user's view of CARE III — computer aided reliability estimation p 918 A85-49570

Automatic flight control modes for the AFTI/F-111 mission adaptive wing aircraft p 680 N85-27909

**FAILURE ANALYSIS**

Critical analysis of flaw acceptance methods p 50 A85-11754

New results in fault latency modelling — in redundant flight control system p 107 A85-14457

Inspection intervals for fail-safe structure p 124 A85-14899

Sensor failure detection for jet engines using analytical redundancy [AIAA PAPER 84-1452] p 167 A85-16097

Structural failure, product liability and technical insurance; Proceedings of the First International Conference, Technische Universitaet Wien, Vienna, Austria, September 26-29, 1983 p 181 A85-16251

Failure analysis of aircraft parts p 182 A85-16252

Two examples of failure-analyses in metal structures p 182 A85-16253

Avionics hardware design for testability [AIAA PAPER 84-2708] p 152 A85-17876

Utilization of analytical equipment in design and process problems solution and failure analysis of composites p 281 A85-21390

Importance of phase measurements in mechanical fault diagnosis of rotating machinery p 442 A85-27980

Fault Detection/Location System (FD/LS) - How much, how little and how to implement p 466 A85-31992

Contingency power concepts for helicopter turboshaft engine p 506 A85-32005

System-theoretical solution of the failure diagnosis problem using the example of a flight engine — German thesis p 580 A85-33404

Application of laboratory test data to engineering design — stress corrosion threshold data applied to structural failure p 599 A85-33630

Recent materials problems relating to catastrophic balloon failures p 647 A85-38303
Static test techniques for composite airframe structures developed on the U.S. Army/Sikorsky ACAP p 759 A85-43222
Combining quantitative and qualitative reasoning in aircraft failure diagnosis [AIAA PAPER 85-1905] p 811 A85-45917
Squadron Maintenance and Repair Techniques (SMART) validation test report p 866 A85-49584
Review of aircraft accident data: US General Aviation [PB84-230960] p 14 N85-10027
Airfoil deposition model p 32 N85-10979
Effect of stress concentrations in composite structures [NASA-CR-173976] p 44 N85-11140
Composite fracture toughness and impact characterization p 120 N85-12963
Analytical redundancy management mechanization and flight data analysis for the F-8 digital fly-by-wire aircraft flight control sensors [NASA-CR-170396] p 173 N85-14844
Built-in-test for first line testing p 202 N85-16739
Advances in composites technology [NASA-TM-86353] p 284 N85-17046
Advanced life analysis methods. Volume 1: Cracking data survey and NDI (nondestructive inspection) assessment for attachment lugs [AD-A150419] p 528 N85-23108
Condition monitoring of helicopter gearboxes using automatic vibration analysis techniques p 510 N85-23790
How to handle failures in advanced flight control systems of future transport aircraft p 591 N85-26752
ACT applied to helicopter flight control p 678 N85-27891
Fault detection and accommodation testing on an F100 engine in an F-15 airplane [NASA-TM-86735] p 773 N85-29962
A preliminary evaluation of a failure detection filter for detecting and identifying control element failures in a transport aircraft [NASA-TM-87576] p 896 N85-35204

**FAILURE MODES**
Crash energy absorption properties of composite structural elements p 362 A85-24815
Techniques for the early detection of gear and bearing failures in helicopter drive trains p 525 A85-31967
Reliability assessment from small sample inspection data for gas turbine engine components [SAE PAPER 841599] p 659 A85-39069
Combining quantitative and qualitative reasoning in aircraft failure diagnosis [AIAA PAPER 85-1905] p 811 A85-45917

**FAIRINGS**
Passive control effects on flow separation around a protuberance at high subsonic speed — for optical propagation quality enhancement to and from airborne platforms [AIAA PAPER 85-0351] p 220 A85-19690
UH-60A external stores support system fixed provision fairings drag determination [AD-A147186] p 256 N85-15719
Automating the study of error in discrete aerodynamic fairing design p 504 N85-24176
An automated technique for encasing specific payloads with low-drag fairings p 886 N85-35183

**FAN BLADES**
A straight cascade wind-tunnel study of fan blade flutter in started supersonic flow [ONERA, TP NO. 1984-117] p 125 A85-15837
Study of delta wing characteristics as a fan blade model. I - Visualization of three-dimensional flow by smoke wire method p 144 A85-18527
Flutter of swept fan blades [ASME PAPER 84-GT-138] p 526 A85-32962
Design and performance comparison of three high-speed fans p 768 A85-41807
Measurements of flow field within an axial flow fan rotor using a Laser Two Focus velocimeter p 727 A85-41809
Purely three-dimensional analysis of a flow in an axial rotor by panel method p 728 A85-41817
Noncontact measurement of rotating blade vibrations p 770 A85-41853
Impact bending of a rotating, rigid-plastic fan blade p 836 A85-45860
Energy efficient engine. Volume 2. Appendix A: Component development and integration program [NASA-CR-173085] p 34 N85-10991
Basic study of bladed disk structural response [AD-A146226] p 112 N85-12061
Fabrication and quality assurance processes for superhybrid composite fan blades [NASA-TM-83354] p 180 N85-14882
Strength analysis of fan-shaped wing considering temperature deformation and creep deformations p 163 N85-14963
Fluctuating pressures on fan blades of a turbofan engine, flight test investigation [NASA-TP-2381] p 378 N85-19790
Numerical analyses in aerodynamic design of aero-engine fan p 582 N85-26618
Energy Efficient Engine Program technology benefit/cost study, volume 1 [NASA-CR-174766-VOL-1] p 892 N85-35197

**FAN IN WING AIRCRAFT**
Strength analysis of fan-shaped wing considering temperature deformation and creep deformations p 163 N85-14963

**FANS**
UDF - GE dares to differ — UnDucted Fan p 167 A85-16270
Determination of surging line of two-spool axial flow compressor with cropped fan stages at low speed by use of parallel compressor theory p 264 A85-20242
Configuration of a shock wave interacting with a centered compression fan p 544 A85-34379
Sources, paths, and concepts for reduction of noise in the test section of the NASA Langley 4x7m wind tunnel [NASA-CR-172446-VOL-1] p 197 N85-14666
Comparison of options for reduction of noise in the test section of the NASA Langley 4x7m wind tunnel, including reduction of nozzle area [NASA-CR-172446-VOL-2] p 197 N85-14667

**FAR FIELDS**
Large-scale coherent structure and far-field jet noise p 78 A85-14390
A mapped, factored-implicit scheme for the computation of duct and far-field acoustics p 460 A85-29097
Coupling linearized far-field boundary conditions with non-linear near-field solutions in transonic flow [AIAA PAPER 85-0599] p 469 A85-30328
Far-field noise of a subsonic jet under controlled excitation p 537 A85-30669
Transonic wing and far field test data on a high aspect ratio transport wing for three dimensional computational method evaluation p 19 N85-10021
Characteristic boundary conditions for three-dimensional transonic unsteady aerodynamics [NASA-TM-86292] p 12 N85-10915
A conformal mapping suitable for problems involving interaction between given geometries and known far fields [AD-A149050] p 376 N85-19744
Notes on unsteady transonic cascade flows [AD-A154829] p 817 N85-32096

**FAR ULTRAVIOLET RADIATION**
Radiation/catalytic augmented combustion [AD-A148758] p 384 N85-18101

**FASTENERS**
Inspecting fastener holes electronically - The capacitance hole probe system p 52 A85-12592
Permanent fasteners for light-weight structures — Book p 443 A85-28479
Stochastic crack propagation in fastener holes [AIAA PAPER 85-0666] p 522 A85-30251
Fasteners for composite structures examined p 692 A85-37074
Stochastic crack propagation in fastener holes p 855 A85-45845
The influence of fastener flexibility on load transfer and fatigue life predictions for multirow bolted and riveted joints — aircraft structures [LBF-FB-172/84] p 296 N85-16219
Finite element analysis of problems associated with life enhancement techniques [ARL/STRUC-R-404] p 451 N85-21676
Low-profile fastener [AD-D011667] p 796 N85-30343

**FATIGUE (BIOLOGY)**
Electrooculographic measurement, fatigue and variability of performance in simulated aircraft flight p 760 N85-29948

**FATIGUE (MATERIALS)**
Failure prevention and reliability - 1983; Proceedings of the Fifth Conference, Dearborn, MI, September 11-14, 1983 p 49 A85-11666
Fatigue crack growth analysis under random spectrum loading using the generalized Willenborg model p 49 A85-11668
Crack growth in aluminium alloy sheet material under flight-simulation loading p 853 A85-46489
Review of aeronautical fatigue investigations in France during the period 1983-1985 [ONERA, TP NO. 1985-42] p 880 A85-47256
Estimation of the threshold in fatigue crack initiation models: A Bayesian approach [AD-A144847] p 54 N85-10410
Turbine Engine Hot Section Technology (HOST) [NASA-TM-83022] p 28 N85-10951
Benchmark notch test for life prediction p 28 N85-10953
Life prediction and constitutive models for anisotropic materials p 31 N85-10976
The TA6Zr5D (IMI 685) characterization in strain controlled tests. (Specimens obtained from a forged spinning wheel) no. M4-45870 [M4-45870] p 128 N85-12384
Composite structural materials [NASA-CR-174077] p 121 N85-12966
Operational Loads Data [AGARD-CP-375] p 201 N85-15664
Operational loads measurement: A philosophy and its implementation p 253 N85-15665
The F-15 flight loads tracking program p 253 N85-15666
Structural load measurements on a Northrop NF-5A p 253 N85-15667
Operational loads data evaluation for individual aircraft fatigue monitoring p 253 N85-15669
Monitoring engine thermal stresses p 266 N85-15735
Finger materials for air cushion vehicles. Volume 2: Base fabrics for finger materials [AD-A149701] p 448 N85-21408
Fatigue Crack Topography [AGARD-CP-376] p 531 N85-24321
Generation of marker lines on fatigue fracture surfaces p 532 N85-24328
Periodic loading sequences for the systematic marking of fatigue crack fracture surfaces p 532 N85-24329
Modifications of flight by flight load sequences to provide for good fracture surface readability p 532 N85-24330
Mechanisms of corrosion fatigue in high strength I/M (Ingot Metallurgy) and P/M (Powder Metallurgy) aluminum alloys [AD-A151177] p 597 N85-25478
Crack closure characteristics considering center cracked and compact tension specimens [AD-A151702] p 605 N85-25907
Hold-time effects in elevated temperature fatigue crack propagation [AD-A154146] p 797 N85-30376

**FATIGUE LIFE**
Fatigue life prediction - Metals and composites p 42 A85-11752
Critical analysis of flaw acceptance methods p 50 A85-11754
A study of fatigue damage mechanisms in Waspaloy from 25 to 800 C p 42 A85-12098
An experimental study on effect of overload on fatigue life p 51 A85-12364
Acoustic fatigue life of adhesive bonded structures subjected to acoustic loads p 51 A85-12472
Fatigue evaluation of helicopter dynamic components used in logging operations [AIAA PAPER 84-2482] p 100 A85-13558
A statistical analysis of the fatigue strength characteristics of turbomachine blades p 110 A85-14801
Design and development of a pultruded FRP laminate to replace aluminum shape in a high stress high fatigue application p 119 A85-15629
Repair of Mirage III aircraft using the BFRP crack-patching technique p 137 A85-16244
Considerations for damage analysis of gas turbine hot section components [ASME PAPER 84-PVP-77] p 169 A85-18792
Loading characteristics of VTOL aircraft and their effect on the remaining life of the aircraft p 250 A85-20469
Evaluation of cumulative damage models for fatigue crack growth in an aircraft engine alloy p 433 A85-27095
The effect of mercury on the load-bearing capacity of the structural elements of aircraft p 435 A85-28994
The effect of acoustic/thermal environments on advanced composite fuselage panels p 445 A85-29251
A new approach to durability prediction for fuel tank skins [AIAA PAPER 85-0602] p 505 A85-30331
Fatigue reliability of gas turbine engine components under scheduled inspection maintenance p 507 A85-32589
Influence of fighter aircraft load spectrum variations on fatigue crack initiation and growth p 693 A85-37181
Fatigue life evaluation program for the Kfir aircraft p 645 A85-37182
Reducing the effects of rivet holes on fatigue life by adhesive bonding p 683 A85-37472
Probabilistic prediction of the fatigue life of the compressor blades of gas-turbine engines under two-level programmed loading p 658 A85-37567
The effect of coatings on the thermomechanical fatigue life of a single crystal turbine blade material [AIAA PAPER 85-1366] p 689 A85-39744

Life prediction methodology for aircraft gas turbine engine disks
[AIAA PAPER 85-1141] p 792 A85-41418

Life prediction and constitutive models for engine hot section anisotropic materials
[AIAA PAPER 85-1421] p 852 A85-43980

Damage tolerance design for aircraft hubs made of cast magnesium alloy p 852 A85-44250

An analogue method for crack propagation life prediction p 856 A85-46825

Effect of temperature on the fatigue and fracture properties of 7475-T761 aluminum p 900 A85-47973

Recent advances in fatigue crack growth predictions p 910 A85-50065

Distributions of fatigue life and fatigue strength in notched specimens of a carbon 8-harness-satin laminate
[NAL-TR-809T] p 54 N85-10407

Life prediction and constitutive behavior: Overview p 31 N85-10973

The in-flight estimation and indication of cumulative fatigue damage to helicopter gears
[ARL/AERO-R-164] p 104 N85-12050

Turbine blade damping study, introduction p 113 N85-12891

Operational loads measurement: A philosophy and its implementation p 253 N85-15665

The F-15 flight loads tracking program p 253 N85-15666

Navy operational loads data sources and systems p 253 N85-15668

Structural flight load measurement demonstration of structural integrity p 254 N85-15670

Advanced fatigue monitoring on service aircraft p 292 N85-15671

Flight parameters recording for structure fatigue life monitoring p 292 N85-15682

Disc fatigue life predictions for gas turbine engines p 287 N85-15743

Experiences with the material bevaviour and high temperature low cycle fatigue life prediction of the IN 738 blading alloy p 292 N85-15746

The influence of fastener flexibility on load transfer and fatigue life predictions for multirow bolted and riveted joints — aircraft structures
[LBF-FB-172/84] p 298 N85-16219

A comparison of fatigue lives under a complex and a much simplified flight-by-flight testing sequence — Mirage 3 aircraft
[ARL/STRUC-TM-388] p 344 N85-18052

Fatigue crack propagation in mirage 1110 wing main spar specimens and the effects of spectrum truncation on life
[ARL/STRUC-R-405] p 417 N85-21152

Finite element analysis of problems associated with life enhancement techniques
[ARL/STRUC-R-404] p 451 N85-21676

Fatigue life analysis of a turboprop reduction gearbox
[NASA-TM-87014] p 608 N85-27228

Further investigations to improve the fatigue life of the Mirage 1110 wing main span
[ARL/STRUC-TM-397] p 654 N85-28938

Creep fatigue life prediction for engine hot section materials (isotropic)
[NASA-CR-168228] p 774 N85-31057

Development of a mathematical model for predicting the percentage fatigue life increase resulting from shot peened components
[AD-A155774] p 912 N85-35425

**FATIGUE TESTS**

A biaxial fatigue test for dovetail joints — turbojet engines p 26 A85-11617

An experimental study on effect of overload on fatigue life p 51 A85-12384

Dynamic response and acoustic fatigue of stiffened composite structure p 52 A85-12473

Fatigue substantiation of the SH-60B stabilator by test
[AIAA PAPER 84-2452] p 98 A85-13541

Effect of residual stresses on crack growth from a hole p 124 A85-15339

Design and development of a pultruded FRP laminate to replace aluminum shape in a high stress high fatigue application p 119 A85-15629

Fatigue strength of aluminized bolted joints
[MBB-VFW-53-84-OE] p 181 A85-16112

Development of a fatigue crack propagation model of Incoloy 901 p 280 A85-20758

Fatigue crack growth behavior of 7XXX aluminum alloys under simple variable amplitude loading p 280 A85-20759

Interpretation of fatigue crack growth in aluminum alloys under programmed block loading p 281 A85-20790

Statistical treatment of multiply censored samples in fatigue testing p 367 A85-25119

The effect of acoustic/thermal environments on advanced composite fuselage panels p 445 A85-29251

A description of Helix and Felix, standard fatigue loading sequences for helicopters, and of related fatigue tests used to assess them p 570 A85-33470

Assessment of damage tolerance in composites p 688 A85-39598

Fatigue crack growth due to periodic underloads and overloads p 784 A85-41464

Slipping behavior and fretting fatigue in the disk/blade dovetail region p 770 A85-41852

Preliminary investigation of the strength and durability of superplastic formed aluminum p 785 A85-42934

Review of aeronautical fatigue investigations in France during the period 1983-1985
[ONERA, TP NO. 1985-42] p 880 A85-47256

Effect of penetrant on fatigue of aluminum alloy lap joints
[NLR-TR-82104-U] p 53 N85-10373

Flight simulation fatigue crack propagation in metal/carbon-epoxy laminates
[NLR-TR-83006-U] p 54 N85-10416

Cyclic endurance testing of the RB211-22B cast HP turbine blade — high pressure (HP)
[PNR-90210] p 113 N85-12083

The TA6Zr5D (IMI 685) characterization in strain controlled tests. (Specimens obtained from a forged spinning wheel) no. M4-45870
[M4-45870] p 128 N85-12384

Advanced fatigue monitoring on service aircraft p 292 N85-15671

Design and test requirements for development of today's engines p 286 N85-15737

Engine cyclic durability by analysis and material testing p 287 N85-15744

Airbus fatigue tests p 416 N85-20186

Deflection model of a CT4-A undercarriage
[AD-A149778] p 417 N85-21150

Advanced life analysis methods. Volume 1: Cracking data survey and NDI (nondestructive inspection) assessment for attachment lugs
[AD-A150419] p 528 N85-23108

Durability calculation of wing panel element p 503 N85-24159

Two recent cases of marker load applications on cargo/fighter aircraft fatigue tests p 532 N85-24325

Initial quality of advanced joining concepts
[AD-A152241] p 606 N85-27027

Influence of the molding joint plane on the fatigue resistance of the alloys 7010 and 7050. Test Report No. M1-631600
[PV-M1-631600] p 799 N85-31562

Fatigue lives of specimens representing critical locations in Mirage 3 spars under Australian and Swiss test spectra
[ARL-STRUC-R-415] p 887 N85-35187

**FAULT TOLERANCE**

A reconfigurable redundancy management strategy for a triplex DFBW system p 35 A85-12361

Flight critical system design guidelines and validation methods
[AIAA PAPER 84-2461] p 113 A85-13548

Developing safe software for critical airborne applications
[AIAA PAPER 84-2596] p 192 A85-17802

Architectural solutions to safety problems of digital flight Critical systems for commercial transports
[AIAA PAPER 84-2603] p 193 A85-17806

A validation methodology for fault-tolerant clock synchronization
[AIAA PAPER 84-2648] p 193 A85-17835

Test experience on an ultrareliable computer communication network
[AIAA PAPER 84-2649] p 194 A85-17836

Ultrareliable fault-tolerant control systems
[AIAA PAPER 84-2650] p 194 A85-17837

Integrated avionics for advanced Army rotorcraft
[AIAA PAPER 84-2672] p 151 A85-17855

Avionics hardware design for testability
[AIAA PAPER 84-2708] p 152 A85-17876

A fault-tolerant approach to helicopter swashplate control p 172 A85-18335

Optimal maintenance center inventories for fault-tolerant repairable systems p 301 A85-21548

Aircraft control systems - A projection to the year 2000 p 424 A85-29125

Fault tolerant computer system for the A129 helicopter p 504 A85-31271

The use of residue arithmetic for fault detection in a digital flight control system p 841 A85-45063

An advanced signal selection algorithm — for redundancy management of flight control sensors p 841 A85-45064

Reliability analysis of the A129 Integrated Multiplex System — in flight control in helicopters p 834 A85-45142

A reliability and survivability assessment tool for fault-tolerant integrated radio systems p 824 A85-45143

Flight test of a helicopter fly-by-wire/light actuation control system p 842 A85-45155

Advanced Information Processing System - Fault detection and error handling
[AIAA PAPER 85-1952] p 859 A85-45938

Generic fault-tolerance techniques for critical avionics systems
[AIAA PAPER 85-1980] p 860 A85-45973

Validation of fault-free behavior of a reliable multiprocessor system - FTMP: A case study — Fault-Tolerant Multi-Processor avionics p 888 A85-47757

A fault and damage tolerant network for an advanced transport aircraft p 888 A85-47760

Control system reconfiguration p 917 A85-47793

A user's view of CARE III — computer aided reliability estimation p 916 A85-49570

R&M analysis techniques for fault-tolerant systems p 909 A85-49588

Will advanced fighter avionics operate when needed? p 889 A85-49949

USAF damage tolerance methods applied to general aviation aircraft design and analysis
[SAE PAPER 850915] p 885 A85-50126

cost and benefits optimization model for fault-tolerant aircraft electronic systems
[NASA-CR-166043] p 293 N85-15993

Investigating version dependence in fault-tolerant software p 302 N85-16749

Research on optimal control, stabilization and computational algorithms for aerospace applications
[NASA-CR-174318] p 303 N85-17603

AIRLAB: A laboratory for flight-crucial-electronics system research p 499 N85-22362

An experiment in software reliability
[NASA-CR-172553] p 536 N85-24613

Evaluation of a fault tolerant system for an integrated avionics sensor configuration with TSRV flight data
[NASA-CR-172589] p 657 N85-28941

Research on optimal control, stabilization and computational algorithms for aerospace applications
[NASA-CR-172528] p 776 N85-29970

Development and evaluation of a Fault-Tolerant Multiprocessor (FTMP) computer. Volume 2: FTMP software
[NASA-CR-166072] p 804 N85-30706

**FAULT TREES**

Avionics fault tree analysis and artifical intelligence for future aircraft maintenance p 203 N85-16755

**FEASIBILITY**

Initial feasibility ground test of a proposed photogrammetric system for measuring the shapes of ice accretions on helicopter rotor blades during forward flight
[NASA-TM-87391] p 106 N85-12887

**FEASIBILITY ANALYSIS**

Joined-wing research airplane feasibility study
[AIAA PAPER 84-2471] p 99 A85-13553

A feasibility study of a VLF radio compass for Arctic navigation p 94 A85-14833

Modular simulators, their feasibility, design, and procurement
[AIAA PAPER 85-0312] p 274 A85-19659

Remotely Piloted Aircraft for small format aerial photography p 497 A85-32110

Feasibility studies of 'Polar Patrol Balloon' p 647 A85-38321

North warning system airship feasibility study
[AIAA PAPER 85-0858] p 640 A85-38777

Feasibility study of the welding of SiC p 688 A85-39339

A standard aircraft diffusion flame: Spectral characteristics and a feasibility study for developing an alternate calibration source for aircraft optical fire detection systems
[AD-A150231] p 520 N85-22768

Application of infrared radiometers for airborne detection of clear air turbulence and low level wind shear, airborne infrared low level wind shear detection test
[NASA-CR-175725] p 609 N85-25965

**FEATHERING**

Study to eliminate ground resonance using active controls
[NASA-CR-166609] p 255 N85-15715

Optimally designed propellers constrained by noise p 892 N85-35196

**FEEDBACK**

Feedback in separated flows over symmetric airfoils
[AIAA PAPER 84-2297] p 390 A85-28899

Total energy-rate feedback for automatic glide-slope tracking during wind-shear penetration
[NASA-TP-2412] p 515 N85-23801

**FEEDBACK CONTROL**

Multi-rate digital flight control systems p 35 A85-12360

Identification of multivariable high-performance turbofan engine dynamics from closed-loop data p 109 A85-13630

YF16-CCV multivariable flight control design with uncertain parameters p 114 A85-13681

Validation of zero-order feedback strategies for medium-range air-to-air interception in a horizontal plane p 70 A85-13702

A problem concerning the incomplete-feedback control of linear Markovian systems with random parameters p 192 A85-17055

Application of model-following control synthesis techniques to design of hydraulic velocity flight simulation table with one axis p 195 A85-18285

Zeroth-order feedback strategies for medium-range interception in a horizontal plane p 157 A85-18327

Decoupling of high-gain multivariable tracking systems p 172 A85-18332

Pilot modeling and closed-loop analysis of flexible aircraft in the pitch tracking task p 172 A85-18334

Nonconservative evaluation of uniform stability margins of multivariable feedback systems p 455 A85-26427

Information approach to fixed-gain design p 455 A85-26606

Criteria for low-speed longitudinal handling qualities of transport aircraft with closed-loop flight control systems — Thesis p 423 A85-28477

Application of modern control to bank-to-turn guidance using digital simulation p 423 A85-28606

Nonlinear state feedback control of uncertain linear systems and application to control of aircraft p 513 A85-33294

Shortcomings of modern control as applied to fighter flight control design p 513 A85-33300

Output feedback design for aircraft with ill-conditioned dynamics p 536 A85-33303

The closed-loop air-cycle option for equipment cooling on aircraft [SAE PAPER 840940] p 570 A85-33752

The design, development, and flight testing of a modern-control-designed autoland system p 584 A85-35961

First-order feedback strategies for variable speed planar pursuit-evasion games p 703 A85-37196

New concepts in control theory, 1959-1984 (Dryden Lectureship in Research) — for aerospace flight control p 703 A85-39551

A multiloop robust controller design study using singular value gradients p 703 A85-39564

'Smart' engine components - A micro in every blade? [AIAA PAPER 85-1296] p 668 A85-39707

On the controllability limit of a human operator when using a Bang-Bang type controller p 804 A85-42689

Robustness enhancement for LQG digital flight controller design p 840 A85-45048

A control law for the self-repairing/digital flight control system p 841 A85-45057

Closed-loop, pilot/vehicle analysis of the approach and landing task [AIAA PAPER 85-1851] p 842 A85-45880

Quantitative feedback design approach to robust flying qualities [AIAA PAPER 85-1902] p 844 A85-45916

Reduced conservatism in time domain stability robustness bounds by state transformation - Application to aircraft control [AIAA PAPER 85-1926] p 859 A85-45927

Stability robustness improvement using constrained optimization techniques [AIAA PAPER 85-1931] p 859 A85-45930

Improved feedback algorithms for optimal maneuvers in vertical plane [AIAA PAPER 85-1976] p 845 A85-45956

Parameter space design of control systems using interactive computer graphics p 916 A85-47661

Feedback control for fuel-optimal descents using singular perturbation techniques p 893 A85-47688

Design of optimal low-sensitivity controllers with prespecified eigenvalues - Application to aircraft lateral motion p 893 A85-47696

Modal insensitivity with optimality — in feedback control p 917 A85-47735

Control system reconfiguration p 917 A85-47793

Interactive aircraft flight control and aeroelastic stabilization [NASA-CR-174025] p 36 N85-11003

Flutter control with unsteady aerodynamic models [AD-A147858] p 270 N85-15753

Multivariable flight control with time-scale separation [NASA-CR-174320] p 268 N85-16873

Time series analysis of closed-loop pilot vehicle dynamics p 271 N85-16876

Research on optimal control, stabilization and computational algorithms for aerospace applications [NASA-CR-174318] p 303 N85-17603

Analytically redundant output feedback scheme for reduction of structural loads of a flexible transport aircraft [TT-8303] p 417 N85-21154

Testing of the digital flight control system of the German CCV fighter experimental aircraft p 514 N85-22361

Control of cascaded induction generator systems [AD-A150429] p 527 N85-22897

Design of multivariable feedback control systems via spectral assignment using reduced-order models and reduced-order observers [NASA-CR-3889] p 514 N85-23800

Flight control system reconfiguration design using quantitative feedback theory [AD-A151771] p 587 N85-26722

Application of linear optimal control theory to the design of the elevator control system of the DHC-2 Beaver experimental aircraft [VTH-LR-411] p 588 N85-26729

Flight testing and development of the F/A-18A digital flight control system p 590 N85-26743

OLGA: An open loop gust alleviation p 590 N85-26744

Research on optimal control, stabilization and computational algorithms for aerospace applications [NASA-CR-172528] p 776 N85-29970

Flight test experience and controlled impact of a large, four-engine, remotely piloted airplane [NASA-TM-86738] p 847 N85-33123

**FEEDFORWARD CONTROL**

Aircraft automatic digital flight control system with inversion of the model in the feed-forward path [AIAA PAPER 84-2627] p 171 A85-17823

**FEET (ANATOMY)**

Translating rudder pedal system [AD-D011510] p 425 N85-21172

**FENCES (BARRIERS)**

Effects of a central fence on upwash flows p 817 A85-45839

Reducing gull use of some attractions near airports [AD-P004195] p 423 N85-19962

Effectiveness of an overhead wire barrier in deterring gulls from feeding at a sanitary landfill [AD-P004199] p 453 N85-19966

**FERROGRAPHY**

Condition monitoring of jet engines p 835 A85-43649

**FERROMAGNETIC RESONANCE**

Development of active microwave ferromagnetic resonance eddy current probes and associated signal processing methods p 906 A85-47473

**FEVER**

China report: Science and technology [JPRS-CST-84-008] p 500 N85-22384

**FIBER COMPOSITES**

Principal tests for the automated production of the airbus fin assembly with fiber composite materials p 137 A85-16066

A thermoplastic polyimidesulfone — synthesis of processable and solvent resistant system p 282 A85-21483

The composite technology of a main rotor blade p 865 A85-48567

Lightning-safe carbon fiber composite for Airbus tail unit p 692 N85-29100

**FIBER OPTICS**

Digital optical transducers for helicopter flight control systems p 368 A85-25331

Operational considerations for the design of military fiber optic test equipment p 440 A85-26813

Design of airborne fiber-optic data bus system p 750 A85-43245

Applications of wavelength division multiplexing (WDM) and time division multiplexing (TDM) to aircraft data links p 853 A85-44365

Evolution of a 100 Mbps fiber optic serial data bus for aerospace applications p 862 A85-44996

Peripheral vision displays: The future p 24 N85-10058

The applications of fibre optics in gas turbine engine instrumentation [PNR-90209] p 135 N85-12667

High-temperature optically activated GaAs power switching for aircraft digital electronic control [NASA-CR-174711] p 116 N85-12901

Fiber optic data bus using Frequency Division Multiplexing (FDM) and an asymmetric coupler [NASA-TM-86015] p 129 N85-13139

Helicopter Guidance and Control Systems for Battlefield Support [AGARD-CP-359] p 204 N85-16797

The fiber-optic helmet-mounted display [AD-P004330] p 348 N85-17984

Binocular overlap in a fiber optic helmet mounted display [AD-P004331] p 348 N85-17985

Report of the Technology and Test Panel p 448 N85-20370

Fiber optics applications for MIL-STD-1760 [AD-A151113] p 575 N85-25251

R and D activities of the Systems Engineering Division p 808 N85-32027

**FIBER ORIENTATION**

Experimental study on transonic flutter characteristics of sweptback wing with core composite plates having different fiber orientations [NAL-TR-827] p 173 N85-14842

**FIBER REINFORCED COMPOSITES**

Metallised fabrics, their properties and technical applications p 118 A85-15166

Structural uses of aramid fibers as a plastic reinforcement in aircraft and missiles p 119 A85-15631

Magnaweave shapes for aircraft - Integrally woven wing sections, stiffened shear panels, and others p 71 A85-15959

Repair of Mirage III aircraft using the BFRP crack-patching technique p 137 A85-16244

Bonded repairs to surface flaws — by adhesive BFRP patching p 137 A85-16245

Impact of MIL-STD-1290 crashworthiness requirements on design of helicopter composite structures [SAWE PAPER 1567] p 160 A85-18819

Kevlar aramid fibers vs other fibers for reinforcement of composite structures p 282 A85-21392

Continuous filament wound composite concepts for aircraft fuselage structures [AIAA PAPER 84-0869] p 411 A85-26764

Effects of moisture on high performance laminates p 435 A85-29929

The use of carbon weaves and tapes - Technical and economic surveys p 520 A85-33242

Dissipative properties of inhomogeneous materials and systems — Russian book p 687 A85-38874

The static aeroelasticity of the anisotropic wing [DGLR PAPER 84-158] p 752 A85-40287

The use of nonmetallic fiber-reinforced composites in the construction of civilian aircraft - The case of the Do 228 [DGLR PAPER 84-103] p 783 A85-40321

Advanced composites - Present status and future trend p 784 A85-41005

The state of the art of reinforced plastics p 852 A85-45739

Fibre reinforced composites '84; Proceedings of the International Conference, University of Liverpool, England, April 3-5, 1984 p 900 A85-48562

Continuous fibre reinforced thermoplastics in new generation radomes p 900 A85-48572

Bonded repair of damage p 910 A85-50063

Noise transmission characteristics of aircraft-type composite panels [SAE PAPER 850878] p 919 A85-50110

Composite structural materials [NASA-CR-174077] p 121 N85-12966

Prefabricated panels for rapidly runway repair and expedient airfield surfacing [AD-D011277] p 177 N85-13804

System for rapid repair of damaged airfield runways [AD-D011325] p 276 N85-15754

Aerostructure nondestructive evaluation by thermal field detection. Phase 2: Technique refinement and quantitative determination of flaw detection capabilities [AD-A149622] p 417 N85-21155

Nonlinear analysis for high-temperature multilayered fiber composite structures — turbine blades [NASA-TM-83754] p 437 N85-21273

NASA/aircraft industry standard specification for graphite fiber toughened thermoset resin composite material [NASA-RP-1142] p 597 N85-26923

Reaction-bonded and fiber-reinforced SiC static and dynamic gas turbine components [BMFT-FB-T-84-302] p 672 N85-27874

DFVLR research in aluminum-lithium alloys p 692 N85-29105

A research program to reduce the interior noise in general aviation aircraft, index and summary [NASA-CR-176178] p 919 N85-35695

**FIBER STRENGTH**

Kevlar aramid fibers vs other fibers for reinforcement of composite structures p 282 A85-21392

Fibers for structurally reliable metal and ceramic composites p 687 A85-37484

New carbon fibers and the aircraft of the future p 852 A85-45738

High performance fibers for structurally reliable metal and ceramic composites — advanced gas turbine engine materials
[NASA-TM-86878] p 119 N85-12095

**FIELD EFFECT TRANSISTORS**

High-temperature optically activated GaAs power switching for aircraft digital electronic control
[NASA-CR-174711] p 116 N85-12901

**FIELD OF VIEW**

Investigation of outside visual cues required for low speed and hover
[AIAA PAPER 85-1808] p 657 A85-43857

Binocular overlap in a fiber optic helmet mounted display
[AD-P004331] p 348 N85-17985

The effect of modified spectacles on the field of view of the helmet display unit of the integrated helmet and display sighting system
[AD-A148693] p 348 N85-18055

**FIGHTER AIRCRAFT**

The average $100,000,000 design engineer
p 49 A85-11660

Supermaneuverability
[AIAA PAPER 84-2386] p 69 A85-13501

Techniques to reduce exhaust gas ingestion for vectored-thrust V/STOVL aircraft
[AIAA PAPER 84-2398] p 97 A85-13508

Canard/tail comparison for an advanced variable-sweep-wing fighter
[AIAA PAPER 84-2401] p 97 A85-13510

Wind tunnel evaluation of advanced exhaust nozzles for STOL tactical aircraft
[AIAA PAPER 84-2457] p 106 A85-13545

Advanced concepts in combat automation
[AIAA PAPER 84-2458] p 99 A85-13546

Future requirements for integrated flight controls
[AIAA PAPER 84-2494] p 114 A85-13567

Some fighter aircraft trends
[AIAA PAPER 84-2503] p 100 A85-13573

Validation of zero-order feedback strategies for medium-range air-to-air interception in a horizontal plane
p 70 A85-13702

Advanced tactical fighter p 102 A85-13919

Projected advantage of an oblique wing design on a fighter mission
[AIAA PAPER 84-2474] p 102 A85-13965

The advanced tactical fighter - Design goals and technical challenges p 103 A85-14016

Artificial intelligence applied to the inertial navigation system performance and maintenance improvement
p 94 A85-14830

Design and fabrication of crashworthy composite external fuel tanks p 104 A85-15630

Initial experience with a three plenum cell air cushion equipment transporter p 196 A85-17231

The F110 engine monitoring system
[AIAA PAPER 84-2754] p 166 A85-17902

Zeroth-order feedback strategies for medium-range interception in a horizontal plane p 157 A85-18327

Interception in three dimensions - An energy formulation p 158 A85-18329

Decoupling of high-gain multivariable tracking systems
p 172 A85-18332

Bomb rack technology - Keeping up with advanced weapons p 246 A85-19274

New generation military tactical airborne communications systems - The interoperability challenge
p 244 A85-19275

Combat aircraft: Flight vehicles, power plants, and their maintenance — Russian book p 199 A85-19812

Forward sweep - The pros and cons
p 250 A85-20146

Modern military engines. II p 264 A85-20822

STOL technology for conventional flight enhancement
[AIAA PAPER 84-2397] p 250 A85-20875

A global technique for aircraft stability and control analysis p 270 A85-21681

Burbank's Blackbirds — encompassing SR-71 reconnaissance aircraft and YA-12/12-A interceptors
p 252 A85-22081

Israel - New details on the future 'Lavi'
p 340 A85-23923

Development of advanced fighter flight controls using flight simulators
[AIAA PAPER 84-2441] p 356 A85-26323

Electromagnetic shielding by a CFC aircraft fuselage — Carbon Fiber Composite p 412 A85-27625

Fighter aircraft dynamic performance
p 414 A85-28647

Supernormal flight may change battle flight concepts into the indefinite future p 424 A85-29195

Flowfield investigation of a supercruise fighter model
p 392 A85-29256

New fighter engines - A review. I p 420 A85-29342

Impact of fuselage incidence on the supersonic aerodynamics of two fighter configurations
p 473 A85-32590

Eccentric two-target model for qualitative air combat game analysis
[AIAA PAPER 83-2122] p 535 A85-32782

Shortcomings of modern control as applied to fighter flight control design p 513 A85-33300

Japanese aerospace advances with XT-4 military trainer p 571 A85-33871

Versatile F/A-18 Hornet performs fighter and attack missions p 571 A85-34199

Large CYBER 205 model of the Euler equations for vortex-stretched turbulent flow around delta wings
p 553 A85-36675

Invincible aircraft may be a step closer to reality
p 585 A85-36723

Influence of fighter aircraft load spectrum variations on fatigue crack initiation and growth p 693 A85-37181

Mirage 2000 fighter combines acceleration, low-speed stability p 646 A85-38243

Airplane mounted accessory gearbox design
[SAE PAPER 841605] p 696 A85-39165

Usage monitoring - A milestone in engine life management
[AIAA PAPER 85-1206] p 665 A85-39656

Military engine durability improvements through innovative advancements in turbine design and materials
[AIAA PAPER 85-1221] p 666 A85-39664

Secondary power unit options for advanced fighter aircraft
[AIAA PAPER 85-1280] p 666 A85-39696

The investigation of inlet/nozzle flowfield coupling using compact propulsion simulators
[AIAA PAPER 85-1284] p 651 A85-39698

Combustion technology - A Navy perspective
[AIAA PAPER 85-1400] p 690 A85-39763

Propulsion influences on air combat
[AIAA PAPER 85-1457] p 651 A85-39789

Advanced tactical fighter - Holding for launch
p 752 A85-40069

The modern fighter aircraft - Comparative configurational considerations
[DGLR PAPER 84-110] p 753 A85-40327

The representation of aircraft-external store-interferences under supersonic conditions
[DGLR PAPER 84-112] p 709 A85-40328

Dynamics of helicopter air combat
[DGLR PAPER 84-124] p 801 A85-40337

Simulating the works - From crew input to system response — integrated airborne weapon systems
[AIAA PAPER 85-1738] p 779 A85-40555

A flexible design for a general purpose simulation facility
[AIAA PAPER 85-1752] p 779 A85-40563

A summary of an AGARD assessment of testing techniques for aircraft afterbody flows
[AIAA PAPER 85-1465] p 779 A85-40844

Lockheed devoting key resources to Advanced Tactical Fighter p 755 A85-40907

Pilots wary of tactical information systems
p 763 A85-41058

Pursuit-evasion game analysis in a line of sight coordinate system p 803 A85-41339

A modern air combat dome visual system
[AIAA PAPER 85-1747] p 780 A85-42665

Avionics unreliability turns fighters into shop queens
p 764 A85-42896

Supercruise for a STOL dogfighter
p 756 A85-42897

Requirements and design method for matching aircraft guns with their supporting structure p 759 A85-43241

Minimum time turning — of fighter aircraft
[AIAA PAPER 85-1780] p 837 A85-43840

Energy management of three-dimensional minimum-time intercept — for aircraft flight optimization
[AIAA PAPER 85-1781] p 838 A85-43841

Low-speed experimental study of the vortex flow effects of a fighter forebody having unconventional cross-section
[AIAA PAPER 85-1796] p 813 A85-43851

Wind-tunnel investigation of the aerodynamic characteristics of the Standard Dynamics Model in coning motion at Mach 0.6
[AIAA PAPER 85-1828] p 814 A85-43869

Supersonic jump jets p 825 A85-43941

Advanced technology to blossom in next-generation fighter p 809 A85-44071

Organization of the cockpit in future aircraft
p 825 A85-44239

Pave Pillar avionics - An architecture for the future
p 832 A85-45000

Integrated flight/propulsion control - HIDEC modes
p 839 A85-45042

An advanced signal selection algorithm — for redundancy management of flight control sensors
p 841 A85-45064

Flight test evaluation of active ride control system for tactical aircraft
[AIAA PAPER 85-1860] p 843 A85-45889

Optimal fuselage aiming — of fighter aircraft-mounted guns
[AIAA PAPER 85-1981] p 811 A85-45945

JA-37 Digital Automatic Flight Control System (DAFCS) operational maintenance experience
[AIAA PAPER 85-1913] p 849 A85-45972

An investigation of flying qualities requirements for a STOL fighter in approach and landing
[AIAA PAPER 85-1807] p 846 A85-47031

Further application of output predictive algorithmic control to terrain following p 894 A85-47734

Fast-jet aircrew safety p 916 A85-48099

Meeting the challenge of ESM/ECM integration
p 869 A85-49091

INEWS ignites technology trade-offs and competition
p 879 A85-49096

Handling qualities related to stall/spin accidents of supersonic fighter aircraft p 894 A85-49132

Project advantage of an oblique wing design on a fleet air defense mission p 881 A85-49135

DoD/industry - R&M technology study analysis
p 909 A85-49538

Will advanced fighter avionics operate when needed?
p 889 A85-49949

Prediction of aerodynamic characteristics of fighter wings at high angles of attack
[AD-A145107] p 10 N85-10017

Shock capturing finite difference algorithms for supersonic flow past fighter and missile type configurations
[NASA-CR-174051] p 11 N85-10913

Avionics Integrity Program (Avip). Volume 2: Hardware case studies
[AD-A145689] p 25 N85-10944

Status and prospects of computational fluid dynamics for unsteady transonic viscous flows

Robustness of discrete-time dynamical systems: Application to the multivariable digital control of combat aircraft
[ONERA-NT-1984-2] p 425 N85-19986

Potential impact of Navstar GPS on NATO tactical operations p 459 N85-20763

Development of the F-20 nose radome
[AD-P004374] p 449 N85-21468

Laser clock
[AD-D011513] p 450 N85-21634

Low-speed stability and control wind-tunnel investigations of effects of spanwise blowing on fighter flight characteristics at high angles of attack — Langley 12-ft low-speed tunnel and 30- by 60-ft tunnel
[NASA-TP-2431] p 479 N85-23708

Status and prospects of computational fluid dynamics for unsteady transonic flow p 555 N85-25180
West Europe report: Science and technology
[JPRS-WST-84-012] p 601 N85-25552
Low-resolution target classification from a staring infrared sensor
[AD-A151690] p 612 N85-26358
Some aspects of how to design cost-effective flight control systems p 586 N85-26639
Application of AFTI/F-16 task-tailored control modes in advanced multirole fighters p 589 N85-26735
The STOL and maneuver technology program integrated control system p 591 N85-26757
Some aspects of how to design cost-effective flight control systems
[MBB-LKE-32/S/PUB/143] p 591 N85-27729
Operational and developmental experience with the F/A-18A digital flight control system
p 678 N85-27895
Flight testing and development of the F/A-18A digital flight control system p 678 N85-27896
The flight control system for the Experimental Aircraft Programme (EAP) demonstration aircraft
p 680 N85-27906
Design and implementation of input signals for identification of pilot/aircraft models
[ESA-TT-880] p 762 N85-31055
Modifications of flight-by-flight load sequences to provide for good fracture surface readability
[NLR-MP-84012-U] p 799 N85-31577
Fatigue lives of specimens representing critical locations in Mirage 3 spars under Australian and Swiss test spectra
[ARL-STRUC-R-415] p 887 N85-35187
RAFTS: A T-38 replacement for the 21st century
[AD-A156103] p 887 N85-35191

**FILAMENT WINDING**
Development of a filament wound composite shaft for an aircraft generator p 126 A85-15962
Evaluation of Kevlar 29 for filament-wound structural applications in helicopter p 178 A85-16033
Filament winding of aircraft engine nacelle components p 178 A85-16050
Continuous filament wound composite concepts for aircraft fuselage structures
[AIAA PAPER 84-0669] p 411 A85-26784

**FILLERS**
Initial investigation of cryogenic wind tunnel model filler materials
[NASA-TM-86363] p 380 N85-18069
Results of tests of weathered K5NA closeout material in the MSFC Hot Gas Facility
[NASA-CR-170893] p 902 N85-35239

**FILM COOLING**
The effect of vibration on film cooling over a gas turbine blade p 166 A85-16576
Influence of blowing rate and injection angle on the performance of a film-cooled blade p 255 A85-22231
Analytical prediction of the thermal state of flight vehicle engine chambers with internal film cooling under conditions of pulsed operation p 350 A85-23966
Calculation of the disturbance to combustion chamber film cooling due to air injection through a row of jets
p 420 A85-29046
Advanced liner-cooling techniques for gas turbine combustors
[AIAA PAPER 85-1290] p 667 A85-39703
An investigation of film cooling on a hypersonic vehicle using a PNS flow analysis code
[AIAA PAPER 85-1591] p 712 A85-40707
Experimental study of temperature effect on turbine vane cooling performance with multi-row ejection
p 768 A85-41788
Vortex-generating coolant-flow-passage design for increased film-cooling effectiveness and surface coverage
[NASA-TP-2388] p 127 N85-12314
Heat transfer results and operational characteristics of the NASA Lewis Research Center Hot Section Cascade Test Facility
[NASA-TM-86890] p 189 N85-15133
Advanced liner-cooling techniques for gas turbine combustors
[NASA-TM-86952] p 397 N85-21115
Optimization of combined convective and film cooling of perforated baffle blades in gas turbines
p 529 N85-24067
The effect of injection-stream turbulence on film cooling effectiveness and heat transfer coefficients
p 797 N85-31424

**FILTRATION**
Laboratory simulation of smoke reduction from aircraft engine test cell exhaust using a fluidized bed filter
[AD-A148600] p 278 N85-16886
Fine filtration: An attractive route towards lower helicopter operating costs p 503 N85-23774

**FINANCIAL MANAGEMENT**
The congressional authorization process as it applies to aeronautical research and technology
p 462 A85-29555
Obtaining title and financing transport category aircraft National and international implications
p 863 A85-44097
Digest of the Deutsche Lufthansa report, 1983
[ISSN-0415-603X] p 379 N85-18948
FRG journal analyzes state, prospects of airbus programs: General analysis p 542 N85-25638

**FINGERS**
Finger materials for air cushion vehicles. Volume 1: Flexible coatings for finger materials
[AD-A151438] p 601 N85-25545

**FINITE DIFFERENCE THEORY**
A time-split finite-volume algorithm for three-dimensional flowfield simulation p 73 A85-12708
Two-dimensional unsteady flow in Comprex rotor
p 123 A85-13995
A general perturbation approach for computational fluid dynamics p 80 A85-15334
Application of the implicit MacCormack scheme to the parabolized Navier-Stokes equations p 80 A85-15335
Approximate factorization schemes for three-dimensional nonlinear supersonic potential flow
p 145 A85-18678
Full two-dimensional transient solutions of electrothermal aircraft blade deicing
[AIAA PAPER 85-0413] p 246 A85-19734
Evaluation of vortex wake predictions in the SWINT code
[AIAA PAPER 85-0450] p 224 A85-19759
A stream function relaxation method for solving transonic S1 stream surface with respect to non-orthogonal curvilinear coordinates p 228 A85-20240
Recent improvements in efficiency, accuracy, and convergence for implicit approximate factorization algorithms — computational fluid dynamics
[AIAA PAPER 85-0360] p 230 A85-20868
Implicit upwind methods for the compressible Navier-Stokes equations p 317 A85-25134
Finite difference computations of flow about supersonic lifting bodies p 319 A85-25479
The numerical analysis of transonic flow around a circular airfoil using hybrid difference scheme
p 386 A85-27825
Monotone switches in implicit algorithms for potential equations applied to transonic flows
p 391 A85-29078
A field panel/finite difference method for potential unsteady transonic flow p 391 A85-29084
Unsteady laminar boundary-layer separation on oscillating configurations p 391 A85-29089
Viscous effects on transonic airfoil stability and response
[AIAA PAPER 85-0586] p 469 A85-30321
Coupling linearized far-field boundary conditions with non-linear near-field solutions in transonic flow
[AIAA PAPER 85-0599] p 469 A85-30328
The prediction of transonic flows on advancing rotors
p 472 A85-31986
Comparison of various numerical techniques in gas dynamics p 475 A85-33354
Computation of steady supersonic flows by a flux-difference/splitting method p 545 A85-34735
Computation of forced laminar convection in rotating cavities p 600 A85-35592
A fast algorithm of the finite difference method for computation of the transonic flow past an arbitrary airfoil with the conservative full-potential equation
p 548 A85-35742
A mixed finite difference analysis of the internal and external transonic flow fields of inlets with centerbody
p 548 A85-35743
Finite difference computation of the flow around airfoils in two-dimensional transonic slotted wall wind tunnel
p 549 A85-35764
The split-coefficient matrix method for supersonic three dimensional flow p 550 A85-35771
Determination of the discrepancy vector components using nonlinear functions in solving certain boundary value elasticity problems p 600 A85-35900
Numerical methods for the time dependent compressible Navier-Stokes equations p 553 A85-36415
Simplified implicit block-bidiagonal finite difference method for solving the Navier-Stokes equations
p 695 A85-39003
External compression supersonic inlet analysis using a finite difference two-dimensional Navier-Stokes code
p 629 A85-39581
A further assessment of numerical annular dump diffuser flow calculations
[AIAA PAPER 85-1440] p 633 A85-39779
On the accuracy of the pseudocompressibility method in solving the incompressible Navier-Stokes equations
[AIAA PAPER 85-1689] p 717 A85-40772
Computational study of unsteady compressible flow around an airfoil by a block pentadiagnoal matrix scheme
[AIAA PAPER 85-1692] p 718 A85-40774
Developments in the simulation of separated flows using finite difference methods p 732 A85-42953
A quasi-simultaneous finite difference approach for strongly interacting flow p 732 A85-42956
Numerical analysis of transonic flow around a two-dimensional airfoil by solving full Navier-Stokes equations p 869 A85-48875
A finite difference model for flows around an air intake
[AAAF PAPER NT 84-11] p 870 A85-48991
A simple and effective difference scheme in aerodynamics p 872 A85-49702
Research on implicit approximate-factorization finite-difference method for the Euler equation
p 873 A85-49706
Development and applications of algorithms for calculating the transonic flow about harmonically oscillating wings
[NASA-CR-172376] p 9 N85-10007
Shock capturing finite difference algorithms for supersonic flow past fighter and missile type configurations
[NASA-CR-174051] p 11 N85-10913
Simulation of separated transonic airfoil flow by finite-difference viscous-inviscid interaction
p 146 N85-13768
An exploratory study of finite difference grids for transonic unsteady aerodynamics
[NASA-TM-84583] p 235 N85-15696
A finite difference method for inverse mode calculations of a three-dimensional boundary layer
[ESA-TT-863] p 327 N85-18007
A fast algorithm of the finite difference method for computation of the transonic flow past an arbitrary airfoil with the conservative full-potential equation
p 395 N85-20191
A mixed finite difference analysis of the internal and external transonic flow fields of inlets with centerbody
p 446 N85-20192
Finite difference computation of the flow around airfoils in two-dimensional transonic slotted wall wind tunnel
p 396 N85-20216
Some numerical analyses of flows with separation
p 605 N85-26616
Finite-difference computations of rotor loads
[NASA-TM-86682] p 580 N85-26669
Error reduction program — combustor performance evaluation codes
[NASA-CR-174776] p 610 N85-27584
A study of aerodynamic control in stalled flight long laminar separation bubble analysis
[AD-A153850] p 638 N85-28930
Floating shock-fitting in transonic potential flow calculations p 742 N85-31007
Selecting step sizes in sensitivity analysis by finite differences
[NASA-TM-86382] p 856 N85-33538
Use of a hyperbolic grid generation scheme in simulating supersonic viscous flow about three-dimensional winged configuration
[NASA-TM-85344] p 874 N85-34116

**FINITE ELEMENT METHOD**
Finite element modelling of acoustic singularities with application to near and far field propeller noise
[AIAA PAPER 84-2286] p 59 A85-10842
Applications of finite element and wave envelope element approximations to turbofan engine noise radiation including flight effects
[AIAA PAPER 84-2333] p 62 A85-10877
Application and test verification of finite element analysis for gas turbine extended reaction exhaust muffler systems
[AIAA PAPER 84-2334] p 26 A85-10878
An effective interface between computer-stored design descriptions and analysis tools p 58 A85-11661
State-of-art and future of aicraft structure design and strength analysis p 19 A85-12351
Finite element calculation of potential flow around wings
[ONERA, TP NO. 1984-68] p 7 A85-12603
MAGNA analysis of the T-38 aircraft student canopy - Response to in-flight aerodynamic pressure loads
[AIAA PAPER 84-2390] p 97 A85-13503
Wave envelope and infinite element schemes for fan noise radiation from turbofan inlets p 134 A85-15330
Application of the finite element technique to aerodynamic problems of aircraft p 104 A85-15862
A finite element penalty algorithm for the parabolic Navier-Stokes equations for turbulent three-dimensional flow p 182 A85-16286

Strength analysis of aircraft structures using a mixed superelement method p 183 A85-17070
Algorithmic mass-factoring of finite element model analyses An update: Grid-density sensitivity
[SAWE PAPER 1524] p 186 A85-18810
A subdomain finite element method for solving the conservative full potential equation for transonic profile flows — German thesis p 227 A85-19854
Finite element solutions of Euler equations for lifting airfoils
[AIAA PAPER 85-0294] p 230 A85-20864
The development of a finite element model of an aircraft vertical stabilizer for vibration analyses
p 290 A85-21683
Computation of choked and supersonic turbomachinery flows by a modified potential method
p 232 A85-21859
Universal matrices to obtain thermal load vectors for the family of anisotropic plane triangular finite elements
p 291 A85-22232
Two-dimensional deforming finite element methods for surface ablation p 368 A85-25147
The solution of variational finite element method for the inverse problem on S2 relative stream surface in turbines p 318 A85-25215
The addition of quasi-three-dimensional terms into a finite element method for transonic turbomachinery blade-to-blade flows p 386 A85-26920
A finite element method for the solution of two-dimensional transonic flows in cascades
p 386 A85-26921
Transonic flow calculations using triangular finite elements p 391 A85-29086
Modelling turbulent recirculating flows in complex geometries p 445 A85-29967
Vibration analysis of a rotating blade using dynamic discretization p 446 A85-29968
Finite element methods for first-order hyperbolic systems with particular emphasis on the compressible Euler equations p 446 A85-30218
Finite element analysis of an ultralight aircraft
[AIAA PAPER 85-0816] p 490 A85-30234
An iterative procedure for nonlinear flutter analysis
[AIAA PAPER 85-0688] p 523 A85-30356
Three dimensional nonlinear dynamic finite element analysis for the response of a thick laminated shell to impact loads
[AIAA PAPER 85-0713] p 491 A85-30381
An implementation of the modular approach in solving elasticity problems p 524 A85-31455
Aeroelastic stability analysis of a composite rotor blade p 498 A85-32847
Contributions to the finite element solution of the fan noise radiation problem
[ASME PAPER 84-WA/NCA-1] p 537 A85-32954
A compatible mixed design and analysis finite element method for the design of turbomachinery blades
p 599 A85-34706
Triangular finite element methods for the Euler equations p 601 A85-36414
The finite element formulation of airflow around a deformable wing by using the incremental finite element method p 621 A85-37879
Explicit formulation for a high precision triangular laminated anisotropic thin plate finite element
p 696 A85-39170
Two-dimensional turbulent flow analysis in turbomachinery by the finite element method
[ASME PAPER 84-WA/FM-2] p 633 A85-39874
2-D and 3-D Euler flow calculations with a second-order accurate Galerkin finite element method
[AIAA PAPER 85-1706] p 718 A85-40779
Finite element methods for high speed flows
[AIAA PAPER 85-1533] p 791 A85-40963
A new finite element approach for prediction of aerothermal loads - Progress in inviscid flow computations
[AIAA PAPER 85-1533] p 722 A85-40964
3-D finite element solution of steady Euler transonic flow by stream vector correction
[AIAA PAPER 85-1532] p 722 A85-40967
Stress analysis of a SPF/DB composite sandwich panel p 792 A85-41121
A discrete model for the analysis of natural vibrations of a deformable aeroplane p 757 A85-41605
Numerical analysis of the dynamic characteristics of a helicopter rotor blade with various boundary conditions
p 757 A85-41607
Finite element analysis for 3-D compressible potential flow in turbomachinery p 728 A85-41818
Dynamic analysis of rotor-bearing systems by finite element method p 795 A85-43238
A surface finite element method for elasto-acoustic coupling p 881 A85-44038
A three-dimensional, block-structured finite element grid generation scheme — for flow around aircraft modeling
p 869 A85-45530
Finite element simulation of transonic flows by modified potential and stream function methods
p 871 A85-49149
Contour assessment of formed wing panels
[SAE PAPER 850884] p 886 A85-50131
Stress-derivative control of keystoning deformation in finite element codes p 54 N85-10385
Crashworthiness of light aircraft fuselage structures: A numerical and experimental investigation
p 20 N85-10399
Constitutive model development for isotropic materials
p 31 N85-10875
A finite element method for the solution of two-dimensional transonic flows in cascades
[PNR-90216] p 86 N85-12045
A comparative study of the finite element and boundary element methods as applied to a boundary value problem of a harmonic function
[AD-A146018] p 132 N85-12527
Applications of finite and wave envelope element approximations to acoustic radiation from turbofan engine inlets in flight p 197 N85-14864
A study of crashworthiness of light aircraft fuselage structures: A numerical and experimental investigation
[UTIAS-286] p 149 N85-14903
Iterative method of calculating strength of airframe members using finite element method
p 162 N85-14955
Verification of a computer program for vibration analysis of composite wing cores
[NAL-TR-825] p 190 N85-15187
Alternative shock characterizations for consistent shock test specifications p 372 N85-18396
Advanced stress analysis methods applicable to turbine engine structures
[NASA-CR-175573] p 422 N85-21165
Nonlinear analyses for high-temperature multilayered fiber composite structures — turbine blades
[NASA-TM-83754] p 437 N85-21273
Finite element analyses of problems associated with life enhancement techniques
[ARL/STRUC-R-404] p 451 N85-21676
Finite Element Methods in South Africa 1983 — conference
[S-332] p 536 N85-24863
Design, fabrication and test of composite curved frames for helicopter fuselage structure
[NASA-CR-172438] p 574 N85-25247
Learjet Model 55 wing analysis with landing loads
p 604 N85-25883
The structural finite element model of the C-5A
p 604 N85-25885
Crack closure characteristics considering center cracked and compact tension specimens
[AD-A151702] p 605 N85-25907
Structural Analyses
[DFVLR-MITT-84-21] p 701 N85-29313
A new finite element approach: Progress in inviscid flow computations
[NASA-TM-86434] p 796 N85-31450
Application of finite element method to the sizing of mechanical parts — helicopter design
[SNIAS-851-210-105] p 798 N85-31515
DYNA3D, INGRID, and TAURUS: An integrated, interactive software system for crashworthiness engineering
[DE85-010928] p 880 N85-32846
Selecting step sizes in sensitivity analysis by finite differences
[NASA-TM-86382] p 858 N85-33538
Elevated temperature crack growth
[NASA-CR-174957] p 856 N85-33540
Analysis of incompressible cascade flows using state-of-the-art computer programs
[AD-A155850] p 876 N85-35173
FINITE VOLUME METHOD
Computation of vortex flow around a canard/delta combination p 6 A85-11980
A time-split finite-volume algorithm for three-dimensional flowfield simulation p 73 A85-12708
The hopscotch finite volume method for solving the Euler equations p 143 A85-18282
A multistage time-stepping scheme for the Navier-Stokes equations
[AIAA PAPER 85-0035] p 207 A85-19472
A comparison of finite volume flux vector splittings for the Euler equations
[AIAA PAPER 85-0122] p 211 A85-19533
Euler calculations for multielement airfoils using Cartesian grids
[AIAA PAPER 85-0291] p 218 A85-19641
Split-flux-vector solutions of the Euler equations for three-dimensional configurations
[AIAA PAPER 85-0434] p 223 A85-19747
Finite volume solution of the two-dimensional Euler equations on a regular triangular mesh
[AIAA PAPER 85-0435] p 223 A85-19748
Thin turbomachinery blade design using a finite-volume method p 314 A85-23957
Computer-aided analysis of the convergence to steady state of discrete approximations to the Euler equations
p 318 A85-24449
Spurious entropy production and very accurate solutions to the Euler equations p 471 A85-30996
Accelerated convergence of Jameson's finite-volume Euler scheme using van der Houwen integrators
p 610 A85-35175
Multigrid acceleration of an iterative method with application to transonic potential flow
p 553 A85-35404
Finite-volume scheme for transonic potential flow about airfoils and bodies in an arbitrarily-shaped channel
p 734 A85-42967
Numerical simulation of shock/boundary-layer interaction using a finite-volume Runge-Kutta time-stepping scheme p 736 A85-42982
Theoretical contributions to transonic flow analyses for transport aircraft
[BMFT-FB-W-84-036] p 239 N85-16838
Unsteady flow in multistage turbines
p 686 N85-27946
Calculation of flow around the SF 310 airplane using a full potential equation method
[FFA-TN-1984-63] p 744 N85-31022
FINLAND
Finnair, LOT, SAS reps in USSR on present operations, plans p 333 N85-18035
FINNED BODIES
Drag prediction for projectiles and finned bodies in incompressible flow
[AIAA PAPER 85-0104] p 230 A85-20854
The roll motion of a wraparound fin configuration at subsonic and transonic Mach numbers
[AIAA PAPER 85-1777] p 837 A85-43838
FINS
A case study - Integrated design/analysis of an advanced composite fin assembly
[AIAA PAPER 84-2394] p 122 A85-13505
Subsonic pressure distributions near a wing-fin juncture on a supersonic arrow-wing configuration with wing-mounted vertical fins
[AIAA PAPER 85-0276] p 217 A85-19628
Flowfield scaling in sharp fin-induced shock wave/turbulent boundary-layer interaction
p 232 A85-21857
Studies in fin-line antenna design for imaging array applications p 526 A85-33245
Aerodynamics of a new aerostat design with inverted-Y fins
[AIAA PAPER 85-0867] p 624 A85-36783
Conical similarity of shock/boundary-layer interactions generated by swept and unswept fins
p 626 A85-38984
Vertical plate fin with conjugated forced convection-conduction turbulent flow
[ASME PAPER 84-WA/HT-8] p 698 A85-39878
The Airbus A 310-300 as an example of the construction of an FRP vertical tail fin
[MBB-UT-52-85-OE] p 758 A85-42677
Combined analysis and optimization of extended heat transfer surfaces p 858 A85-45482
The effect of channel convergence on heat transfer in a passage with short pin fins
[NASA-TM-83801] p 53 N85-10303
An experimental study on the induced normal force on tail-fins due to wing-tail interference
[NAL-TR-814] p 104 N85-12061
Finlet injector
[AD-D011245] p 180 N85-14891
Repair of composites p 284 N85-17056
Optimization of a ground coupled heat pump
[DE85-000273] p 374 N85-19380
An exploratory investigation of sharp fin-induced shock wave/turbulent boundary layer interactions at high shock strengths
[AD-A151571] p 602 N85-25772
Subsonic and transonic aerodynamics of a wraparound fin configuration
[AD-A153646] p 637 N85-28827
FIR FILTERS
Adaptivity and design criteria of a latest-generation MTD processor p 336 A85-25105
FIRE CONTROL
Integrated flight/fire/propulsion controls
[AIAA PAPER 84-2493] p 114 A85-13586
Sensor control and data annotation gets on the bus
p 347 A85-24261

Medium PRF for the AN/APG-66 radar — Pulse Repetition Frequency for Pulse Doppler Radar
p 406 A85-27834
Voice command weapons launching system
[AD-D011378] p 293 N85-15940
Acta Electronica Sinica (selected articles)
[AD-A148829] p 447 N85-20252
Ground evaluation of helicopter air-to-air warfare
p 499 N85-22360
Research Flight Simulator for Helicopters (RFSH): Description and application to fire control system design
[SNIAS-851-210-106] p 761 N85-31050

**FIRE DAMAGE**
The Cincinnati DC-9 experience - Lessons in aircraft and airport safety p 746 A85-42075
The role of aircraft panel materials in cabin fires and their properties
[FAA-CT-84-30] p 820 N85-32104

**FIRE EXTINGUISHERS**
Flow of nitrogen-pressurized Halon 1301 in fire extinguishing systems
[NASA-CR-174271] p 242 N85-15701
Aircraft skin penetrator and agent applicator. Volume 1: Working model development and construction
[AD-A150498] p 483 N85-22374

**FIRE FIGHTING**
Suppression and control of Class C cargo compartment fires
[FAA-CT-84-21] p 405 N85-21133
Aircraft skin penetrator and agent applicator. Volume 2: Test and evaluation
[AD-A151509] p 564 N85-25225

**FIRE PREVENTION**
The AH-64A nitrogen inerting system
[AIAA PAPER 84-2480] p 108 A85-13557
Numerical simulations of the effect of ventilation control on fire and smoke spread in aircraft cabins
[ASME PAPER 84-HT-104] p 149 A85-18843
Evaluation of aircraft interior panels under full-scale cabin fire test conditions
[AIAA PAPER 85-0393] p 240 A85-19719
Examination of fire safety of commercial aircraft cabins p 629 A85-37693
Did safe jet fuel flunk its final exam?
p 745 A85-41053
Legislation to improve airline safety
[GPO-39-222] p 405 N85-21132
Fiscal year 1986 technical objective document
[AD-A151039] p 539 N85-25000
Investigation of experimental lightweight firewall materials for A/C engine bay applications
[AD-A155765] p 878 N85-35175

**FIREPROOFING**
Aviation safety (aircraft passenger survivability and cabin safety)
[GPO-39-847] p 878 N85-34130
Investigation of experimental lightweight firewall materials for A/C engine bay applications
[AD-A155765] p 878 N85-35175

**FIRES**
Modeling of turbulent buoyant flows in aircraft cabins
p 90 A85-15867
Measurements of the response of transport aircraft ceiling panels to fuel pool fires
[AIAA PAPER 85-0394] p 240 A85-19720
The thermal response of aircraft cabin ceiling materials during a post-crash, external fuel-spill, fire scenario
[AIAA PAPER 85-0395] p 241 A85-19721
Fire safety in transport category aircraft - Litigating a post-crash or in-flight aircraft fire p 378 A85-24710
Pool fire-ventilation crossflow experiments in a simulated aircraft cabin interior p 877 A85-49130
The pyrolysis toxic gas analysis of aircraft interior materials
[AD-A146295] p 119 N85-12115
Modeling of aircraft cabin fires
[PB85-137585/GAR] p 333 N85-18031
Suppression and control of Class C cargo compartment fires
[FAA-CT-84-21] p 405 N85-21133
A study of intumescent reaction mechanisms
[AD-A149605] p 437 N85-21385
Aircraft skin penetrator and agent applicator. Volume 1: Working model development and construction
[AD-A150498] p 483 N85-22374
Thermal response of aircraft cabin ceiling materials during a post-crash, external fuel-spill, fire scenario
[PB85-145647] p 502 N85-23764
Safety recommendation(s), A-84-78 through -79
[REPT-3751E] p 564 N85-25224
Numerical simulations of the effect of floor and ceiling venting on fire and smoke spread in aircraft cabins
[PB85-178333] p 747 N85-29939
Aviation safety (aircraft passenger survivability and cabin safety)
[GPO-39-847] p 878 N85-34130

**FIXED WINGS**
EH.101 - Europe's 'fixed-wing' helicopter
p 104 A85-15642
Solution of the unsteady Euler equations for fixed and rotor wing configurations
[AIAA PAPER 85-0120] p 211 A85-19531
Analysis and testing of the Diamond One wing anti-icing system
[AIAA PAPER 85-0414] p 286 A85-19735
Joined wing - Child of the computer
p 393 A85-29672
JVX LCC reduction through front-end logistics
p 465 A85-31982
Dynamics of helicopter air combat
[DGLR PAPER 84-124] p 601 A85-40337
Flight testing the fixed-wing configuration of the Rotor Systems Research Aircraft (RSRA)
[NASA-TM-86762] p 886 N85-34135

**FIXTURES**
An alignment fixture for a 2-Degree-of-Freedom (TDF) gyroscope
[AD-A148885] p 339 N85-18969

**FLAME HOLDERS**
Flameholder with integrated air mixer
[AD-D011549] p 421 N85-21161

**FLAME PROPAGATION**
Computation of the aerothermodynamic field of laminar diffusion flames p 41 A85-10557
A study of the structure of the primary zone of cylindrical combustion chambers p 351 A85-24004
A experiment method to determine the air distribution of the holes along the flametube of gas turbine combustor p 351 A85-25223
Pool fire-ventilation crossflow experiments in a simulated aircraft cabin interior p 877 A85-49130
Radiation/catalytic augmented combustion
[AD-A148758] p 364 N85-18101

**FLAME RETARDANTS**
A study of intumescent reaction mechanisms
[AD-A149605] p 437 N85-21385
Investigation of experimental lightweight firewall materials for A/C engine bay applications
[AD-A155765] p 878 N85-35175

**FLAME SPECTROSCOPY**
Flame radiation and linear heat transfer in a tubular-can combustor p 663 A85-39560

**FLAME SPRAYING**
Thermal barrier coating system
[NASA-CASE-LEW-14057-1] p 902 N85-35233

**FLAME STABILITY**
Aerodynamics of premixed flames in flat plate boundary layers p 41 A85-10374
Reheat buzz - An acoustically driven combustion instability
[AIAA PAPER 84-2321] p 41 A85-10868
SFRJ simulator results - Experiment and analysis in cold flow — Solid Fuel RamJet
[AIAA PAPER 85-0329] p 263 A85-19671
The effect of the operating parameters on the temperature field of gas flow behind a system of radial stabilizers p 350 A85-23995
Effects of an S-inlet on the flow in a dump combustor
p 392 A85-29323

**FLAME TEMPERATURE**
The influence of fuel quality upon flame-tube temperature and flame radiation in a model gas-turbine primary zone
[K233] p 508 N85-22396
The influence of fuel molecular composition upon flame-tube temperature and flame radiation in a model gas-turbine primary zone
[K234] p 520 N85-22646

**FLAMES**
The fuel property/flame radiation relationship for gas turbine combustors p 111 A85-15350

**FLAMMABILITY**
Model tests of aircraft interior panel flammability
p 852 A85-44125
Quasi-steady analysis of aircraft panel flammability
[AD-A145461] p 22 N85-10938
Modeling of aircraft cabin fires
[NBS-GCR-84-473] p 91 N85-12880
Preliminary evaluation of an improved flammability test method for aircraft materials
[FAA-CT-84-22] p 242 N85-16840
The role of aircraft panel materials in cabin fires and their properties
[FAA-CT-84-30] p 820 N85-32104

**FLANGE WRINKLING**
Design, fabrication and test of composite curved frames for helicopter fuselage structure
[NASA-CR-172435] p 574 N85-25247

**FLANGES**
The flange elevation angle during the drawing of axisymmetric parts p 183 A85-17053

**FLAPERONS**
Active control of buffeting on a modern transport-aircraft wing configuration in a wind tunnel
[ONERA, TP NO. 1984-131] p 116 A85-15847
Wing buffeting active control testing on a transport aircraft configuration in a large sonic windtunnel
p 679 N85-27903

**FLAPPING**
Further investigation of the coupled flapping and torsion dynamics of helicopter rotor blades p 102 A85-13680
Pitch-flap-lag instability of elastic modes of an articulated rotor blade p 496 A85-32003
Active control of helicopter blade flapping
[AIAA PAPER 85-1963] p 827 A85-45947
Stochastic motor blade dynamics
[AD-A146312] p 105 N85-12054

**FLAPS (CONTROL SURFACES)**
An experimental investigation of flap turbulent heat transfer and pressure characteristics in hypersonic flow
p 550 A85-35773
Experimental investigation of heat transfer distribution inside the gap of a flat plate-flap combination in a shock tunnel p 695 A85-38973
Study of an asymmetric flap nozzle as a thrust-vectoring device p 629 A85-39582
Vector control of two-dimensional turbulent free jet by both-side flaps p 789 A85-40358
Wind-tunnel experimental investigation on flap spanwise blowing p 738 A85-43226
An experimental investigation of flap turbulent heat transfer and pressure characteristics in hypersonic flow
p 400 N85-21426
Flow over a biconic configuration with an afterbody compression flap
[AD-A151882] p 603 N85-25778
Additional flow field studies of the GA(W)-1 airfoil with 30-percent chord Fowler flap including slot-gap variations and cove shape modifications
[NASA-CR-3687] p 739 N85-29919

**FLARED BODIES**
A numerical investigation of the aerodynamics of biconic and non-circular flared configurations
[AIAA PAPER 85-1814] p 814 A85-43862

**FLASH LAMPS**
Flares and photoflash items
[AD-A145442] p 45 N85-11253
An evaluation of flashtube signal characteristics
[AD-A149569] p 339 N85-18974

**FLAT PLATES**
Resonance in flows with vortex sheets and edges
p 3 A85-10357
Interaction between a weak oblique shock wave and a turbulent boundary layer in purely supersonic flow
p 6 A85-12035
Turbulent boundary layer-wake interaction
p 77 A85-14345
A study of separated flow behind two- and three-dimensional bodies exposed to a spherical shock wave p 78 A85-14590
Wake flow past a plate with spoiler
p 140 A85-16147
Development of artificially induced perturbations in a supersonic boundary layer p 140 A85-16177
Theoretical study of blockage effect of wind-tunnel wall on wake of two-dimensional flat plate normal to plane wall p 272 A85-19402
Experimental investigation of blockage effect of upper wall of wind-tunnel of wake of two-dimensional flat plate normal to plane boundary p 272 A85-19403
Critical layer concept relative to hypersonic boundary layer stability
[AIAA PAPER 85-0303] p 219 A85-19652
Vortex path in the supersonic wake of a rough even plate — German thesis p 226 A85-19821
Experiments on the stability of crossflow vortices in swept-wing flows
[AIAA PAPER 85-0493] p 231 A85-20873
Vortices in wakes induced by shock waves
p 319 A85-25474
Measurements of density and velocity profiles in non-equilibrium laminar hypersonic boundary layers in air
p 320 A85-25483
Airfoil large-eddy breakup devices for turbulent drag reduction
[AIAA PAPER 85-0520] p 320 A85-25926
More detailed measurements behind turbulence manipulators including tandem devices using servo-controlled balances
[AIAA PAPER 85-0521] p 320 A85-25927
Lock-on and instability in a flat plate wake
[AIAA PAPER 85-0571] p 322 A85-25952
Control plate for shock-boundary layer interaction
[AIAA PAPER 85-0523] p 387 A85-27877
Vortex induced lift on a flat plate with a curved forward-facing flap p 394 A85-30175

A supersonic panel method based on the triplet singularity p 617 A85-37191

Critical flutter parameters of orthotropic rectangular flat panels with in-plane loads p 693 A85-37192

Experimental investigation of heat transfer distribution inside the gap of a flat plate-flap combination in a shock tunnel p 695 A85-38973

Heat transfer investigation in the junction region of circular cylinder normal to a flat plate at 90 deg location [ASME PAPER 84-WA/HT-70] p 698 A85-39898

A multistage time-stepping scheme for the Navier-Stokes equations [NASA-CR-172527] p 373 N85-19365

LOVEL-84: A LOw-VELocity aerodynamic heating code for flat plates, wedges, and cones [DE85-002604] p 395 N85-19933

Flow past a flat plat with a vortex/sink combination [JIAA-TR-58] p 558 N85-25215

Vortex boundary-layer interactions [NASA-CR-176192] p 911 N85-35373

**FLAT SURFACES**

Aerodynamic sound generation induced by flow over small, cylindrical cavities [AIAA PAPER 84-2258] p 58 A85-10827

Approximate solution of a nonlinear problem of flow past a thin airfoil profile near a support surface p 233 A85-22368

Flow-field matrix solution for flow along arbitrarily twisted S1 surface employing non-orthogonal curvilinear coordinates p 622 A85-37327

**FLEXIBILITY**

Vibration and flutter of mistuned bladed-disk assemblies [AIAA PAPER 84-0991] p 181 A85-16095

Pretwist and shear flexibility in the vibrations of turbine blades p 657 A85-37233

Two- and three-dimensional model and wall data from a flexible-walled transonic test section p 82 N85-12015

Random vibrations of aircraft engine blades p 170 N85-14967

The influence of fastener flexibility on load transfer and fatigue life predictions for multirow bolted and riveted joints — aircraft structures [LBF-FB-172/84] p 296 N85-16219

Finger materials for air cushion vehicles. Volume 2: Base fabrics for finger materials [AD-A149701] p 448 N85-21408

A research program in active control/aeroelasticity [NASA-CR-175674] p 501 N85-23752

Removable cleanable antireflection shield [AD-D011735] p 863 N85-33810

**FLEXIBLE BODIES**

Pilot modeling and closed-loop analysis of flexible aircraft in the pitch tracking task p 172 A85-18334

Stability of squeeze film damped multi-mass flexible rotor bearing systems [ASME PAPER 84-TRIB-45] p 289 A85-21296

Modal analysis of flexible aircraft dynamics with handling qualities implications p 423 A85-26431

Development of a microprocessor-controlled laser system for automated precision balancing p 443 A85-28828

Dynamic loads analyses of flexible airplanes - New and existing techniques [AIAA PAPER 85-0808] p 492 A85-30394

Flight control law synthesis for an elastic vehicle by eigenspace assignment [AIAA PAPER 85-1898] p 846 A85-45970

Measurement of the inertial constants of a rigid or flexible structure of arbitrary share through a vibration test [NASA-TM-77557] p 55 N85-11381

Addition of flexible body option to the TOLA computer program, part 1 [NASA-CR-132732-1] p 652 N85-27855

Addition of flexible body option to the TOLA computer program. Part 2: User and programmer documentation [NASA-CR-132732-2] p 652 N85-27856

Analysis of flexible aircraft longitudinal dynamics and handling qualities. Volume 1: Analysis methods [NASA-CR-177943-VOL-1] p 896 N85-35202

Analysis of flexible aircraft longitudinal dynamics and handling qualities. Volume 2: Data [NASA-CR-177943-VOL-2] p 896 N85-35203

**FLEXIBLE SPACECRAFT**

Optimal simultaneous structural and control design of maneuvering flexible spacecraft p 177 A85-18338

**FLEXIBLE WINGS**

The theory of oscillating thick wings in subsonic flow Lifting line theory p 393 A85-29992

Motion of a flexible wing at supersonic velocity under the effect of a random gust p 393 A85-30108

Transonic test of a forward swept wing configuration exhibiting Body Freedom Flutter [AIAA PAPER 85-068[illegible] p 491 A85-30356

Transonic calculations for a flexible supercritical wing and comparison with experiment [AIAA PAPER 85-0665] p 470 A85-30407

Aerodynamic properties of some flexible profiles p 473 A85-32506

Transonic pressure distribution computations of a flexible wing p 549 A85-35756

The finite element formulation of airflow around a deformable wing by using the incremental finite element method p 621 A85-37879

Mission adaptive wing p 828 A85-46499

Unsteady lifting-line theory as a singular-perturbation problem p 871 A85-49353

Transonic pressure distribution computations of a flexible wing p 396 N85-20213

Analytically redundant output feedback scheme for reduction of structural loads of a flexible transport aircraft [TT-8303] p 417 N85-21154

Transonic calculations for a flexible supercritical wing and comparison with experiment [NASA-TM-86439] p 742 N85-31012

**FLICKER**

An evaluation of flashtube signal characteristics [AD-A149569] p 339 N85-18974

**FLIGHT ALTITUDE**

Effects of measurement errors in estimating the probability of vertical overlap — in air traffic p 567 A85-36510

Safety recommendation(s), A-84-82 through -84 [REPT-3957] p 489 N85-23748

**FLIGHT CHARACTERISTICS**

Correlation of global and local aerodynamic properties in flight p 102 A85-13697

SAAB-Fairchild 340 - Operator's analysis p 102 A85-13899

Canadair 601 - Challenger in name and in performance p 157 A85-18117

Robust flight control for CCV aircraft p 172 A85-18715

Modal analysis of flexible aircraft dynamics with handling qualities implications p 423 A85-26431

Status and concerns for bank-to-turn control of tactical missiles p 423 A85-26442

Improving the flying qualities of your aeroplane p 412 A85-27449

A robust and efficient technique for dealing with time-varying instrumental bias in linear filtering p 458 A85-29370

Optimization methods applied to the aerodynamic design of helicopter rotor blades [AIAA PAPER 85-0644] p 490 A85-30245

Equilibrium conditions for aircraft steady spin p 584 A85-36484

Fundamentals of the flight operations of helicopters: Aerodynamics — Russian book p 649 A85-38875

The application of cryogenics to high Reynolds number testing in wind tunnels. I - Evolution, theory, and advantages p 780 A85-41328

Performance degradation of helicopter rotor in forward flight due to ice p 746 A85-42937

Cross coupling in pilot/vehicle systems [AIAA PAPER 85-1787] p 838 A85-43845

Loop Separation Parameter for landing flying qualities [AIAA PAPER 85-1788] p 838 A85-43846

Development of time response criteria for rotorcraft at hover and low speed [AIAA PAPER 85-1790] p 838 A85-43848

Interaction between display dynamics and handling qualities in manual control tasks [AIAA PAPER 85-1805] p 838 A85-43855

Experimental investigation of the short period response requirements of MIL-F-8785C — flying qualities of piloted aircraft [AIAA PAPER 85-1806] p 839 A85-43856

Flying qualities in the time domain [AIAA PAPER 85-1849] p 842 A85-45878

An investigation of flying qualities requirements for a STOL fighter in approach and landing [AIAA PAPER 85-1807] p 846 A85-47031

Airworthiness and flight characteristics test of the JOH-6A light combat helicopter configured with a wire strike protection system [AD-A144880] p 20 N85-10038

Airworthiness and Flight Characteristics (A and FC) test of the EH - 1X/EH - 1H helicopter configurations [AD-A144881] p 20 N85-10039

Active control technology experience with the Space Shuttle in the landing regime [NASA-TM-85910] p 36 N85-10071

YO-3A acoustics research aircraft systems manual [NASA-TM-85968] p 37 N85-10074

Simulator study of flight characteristics of several large, dissimilar, cargo transport airplanes during approach and landing [NASA-TP-2357] p 36 N85-11002

Aircrew-aircraft integration: A summary of US Army research programs and plans [NASA-TM-85091] p 36 N85-11004

Flying qualities and control system characteristics for superaugmented aircraft [NASA-CR-170419] p 173 N85-13800

An in-flight investigation of a twin fuselage configuration in approach and landing [NASA-CR-172366] p 173 N85-13801

Effects of aircraft and flight parameters on energy-efficient profile descents in time-based metered traffic [NASA-CR-172338-ADD] p 245 N85-15706

Airworthiness and flight characteristics test of the RC-12D Guardrail V [AD-A148046] p 258 N85-16864

Realization and testing of an experimental color display system for general aviation helicopters and aircraft [BMFT-FB-W-84-042] p 262 N85-16872

Time series analysis of closed-loop pilot vehicle dynamics p 271 N85-16876

The design of sport and touring aircraft [NASA-TM-77783] p 344 N85-18075

In-flight investigation of the effects of time delay in control system on flying qualities in landing approach [DFVLR-FB-84-35] p 425 N85-19989

Technical evaluation report on the FDP Symposium on Flight Test Techniques [AGARD-AR-208] p 417 N85-21157

Low-speed stability and control wind-tunnel investigations of effects of spanwise blowing on fighter flight characteristics at high angles of attack — Langley 12-ft low-speed tunnel and 30- by 60-ft tunnel [NASA-TP-2431] p 479 N85-23708

The design of high-performance gliders [NASA-TM-77772] p 500 N85-23750

Simulation of aircraft behaviour on and close to the ground [NASA-TM-87460] p 501 N85-23754

Preliminary helicopter design decision making based on flight performance factors [AD-A151488] p 575 N85-25254

Study of longitudinal landing flying qualities evaluation using pilot model theory [AD-A152194] p 577 N85-26702

Technical evaluation report on the Flight Mechanics Symposium on Active Control Systems: Review, Evaluation and Projections [AGARD-AR-220] p 588 N85-26730

The state-of-the-art and future of flight control systems p 588 N85-26732

In-flight investigation of the influence of pitch damping and pitch control effectiveness on landing approach flying qualities of statically unstable transport aircraft [DFVLR-FB-84-12] p 676 N85-27880

Helicopter Aeromechanics [AGARD-LS-139] p 617 N85-28913

Helicopter aeromechanics: Introduction and historical review p 653 N85-28914

In-flight evaluation of pure time delays in pitch and roll [NASA-TM-86744] p 847 N85-32123

Ground-based and in-flight simulator studies of flight characteristics of a twin-fuselage passenger transport airplane during approach and landing [NASA-TP-2451] p 895 N85-34144

Estimation of flight mechanical variables by means of Kalman filters p 878 N85-35171

**FLIGHT CONDITIONS**

Seventh Annual Workshop on Meteorological and Environmental Inputs to Aviation Systems 26-28 October 1983, Tullahoma, Tennessee p 191 A85-18324

Dynamics of a helicopter rotor in abnormal operating conditions p 159 A85-18773

Clear turbulence forecasting - Towards a union of art and science [AIAA PAPER 85-0014] p 298 A85-19458

Automated visibility measurements for airports [AIAA PAPER 85-0191] p 274 A85-19577

Scaling laws for testing of high lift airfoils under heavy rainfall [AIAA PAPER 85-0257] p 216 A85-19617

Selecting design parameters for an engine from the totality of flight conditions p 659 A85-39103

Model of the wind field in a downburst p 701 A85-39218

The flight planning - flight management connection p 877 A85-47684

Time-controlled aircraft guidance in uncertain winds and temperatures p 879 A85-47687

TAF verification (airport weather forecasts) [GEOPHYSBDBW-FM-205] p 191 N85-14420

The Altitude Wind Tunnel (AWT): A unique facility for propulsion system and adverse weather testing [NASA-TM-86921] p 360 N85-18067

Direct-strike lightning photographs, swept-flash attachment patterns, and flight conditions for storm hazards 1982
[NASA-TM-86347] p 454 N85-21877
Safety recommendation(s), A84-111 through -115
[REPT-4011C/27] p 484 N85-23744
Extraction of aerodynamic parameters for aircraft at extreme flight conditions
[NASA-TM-86730] p 704 N85-29686

**FLIGHT CONTROL**
Wright Brothers Lectureship in Aeronautics - Handling qualities and pilot evaluation
[AIAA PAPER 84-2442] p 113 A85-13534
Flight critical system design guidelines and validation methods
[AIAA PAPER 84-2461] p 113 A85-13548
A system approach to flight control reliability and maintainability
[AIAA PAPER 84-2463] p 114 A85-13549
Flight control technology for current/future transport aircraft
[AIAA PAPER 84-2491] p 114 A85-13565
Integrated flight/fire/propulsion controls
[AIAA PAPER 84-2493] p 114 A85-13566
Future requirements for integrated flight controls
[AIAA PAPER 84-2494] p 114 A85-13567
Nonlinear model simplification in flight control system design p 114 A85-13631
Multi-input/multi-output controller design for longitudinal decoupled aircraft motion p 114 A85-13633
YF16-CCV multivariable flight control design with uncertain parameters p 114 A85-13681
New results in fault latency modelling — in redundant flight control system p 107 A85-14457
The problem of determining the optimum flight control law for an aircraft p 170 A85-17064
Third generation digital flight controls
p 170 A85-17230
Developing safe software for critical airborne applications
[AIAA PAPER 84-2596] p 192 A85-17802
Backup modes for the F/A-18 digital flight control system
[AIAA PAPER 84-2622] p 171 A85-17819
Integrated flight control/navigation sensors
[AIAA PAPER 84-2623] p 171 A85-17820
A highly monitored digital flight control system for the AV-8B Harrier II
[AIAA PAPER 84-2624] p 171 A85-17821
Automated benchmark generation based upon a specification language
[AIAA PAPER 84-2667] p 194 A85-17849
Robust flight control for CCV aircraft
p 172 A85-18715
The avionics flight test system p 154 A85-18718
Writing executable assertions to test flight software
[SU-CRC-TR-84-14] p 301 A85-21973
Digital optical transducers for helicopter flight control systems p 368 A85-25331
The importance of aircraft center-of-gravity position for flight control p 356 A85-25521
Development of advanced fighter flight controls using flight simulators
[AIAA PAPER 84-2441] p 356 A85-26323
A design methodology for pitch pointing flight control systems p 423 A85-26429
Design and flight testing of digital direct side-force control laws p 423 A85-26430
A new era in commercial aircraft flight management
p 382 A85-27448
Structural and algorithmic aspects of the design of a mathematical-modeling system for problems of ballistics, control, and navigation p 432 A85-28391
Criteria for low-speed longitudinal handling qualities of transport aircraft with closed-loop flight control systems — Thesis p 423 A85-28477
Investigation of modern flight-control problems with regard to minimal fuel consumption, with consideration of arrival-time limitations, air-traffic density, and onboard real-time computation — German thesis
p 409 A85-28794
A unified method for evaluating real-time computer controllers and its application p 458 A85-29408
Multistep terminal guidance of linear systems under conditions of parametric and constant perturbations
p 534 A85-31453
A piloted simulator investigation of decoupling helicopters by using a model following control system
p 511 A85-31955
Flight test of the 4-valve fly-by-wire/fly-by-optics control system p 511 A85-31964
A nonlinear pilot model for hover p 513 A85-32783
Systems for the Airbus A320 - Innovation in all directions p 571 A85-33869
On the identification of a highly augmented airplane
p 584 A85-35979
Flight systems of future commercial aircraft
p 567 A85-36426
Design of digital flight control systems for helicopters
p 673 A85-37195
Minimum-time path through wind fields
p 647 A85-38358
Description and test methods for a frequency output accelerometer p 694 A85-38536
Development and evaluation of an integrated flight and propulsion control system
[AIAA PAPER 85-1423] p 669 A85-39771
Integrated flight/propulsion control - Adaptive engine control system mode
[AIAA PAPER 85-1425] p 669 A85-39772
Flight control system technology in the civil transport aircraft (Airbus-Program) - Status and key points of new development requirements
[DGLR PAPER 84-089] p 775 A85-40308
Multiple sensor — for digital flight control systems
p 763 A85-41017
The flight control revolution p 776 A85-41529
Flight control dynamics of the 1903 Wright Flyer
[AIAA PAPER 85-1804] p 809 A85-43877
Robustness enhancement for LQG digital flight controller design p 840 A85-45048
A robust flight control design for the C-135 aircraft Horowitz's method p 840 A85-45049
Real-time analysis of a digital multiloop flight control system p 840 A85-45050
Design and microprocessor implementation of an integrated load alleviation-pitch manoeuvre flight controller for relaxed stability aircraft p 840 A85-45052
Multivariable digital flight control design of the X-29A using output feedback p 840 A85-45053
Quantitative synthesis of highly uncertain, multiple input-output, flight control system for the forward swept wing X-29 aircraft p 841 A85-45055
Self-Repairing Flight Control System Reliabity & Maintainability Program executive overview
p 810 A85-45056
A control law for the self-repairing/digital flight control system p 841 A85-45057
An advanced signal selection algorithm — for redundancy management of flight control sensors
p 841 A85-45064
Triplex bus-connected inter-unit selected FCS configuration — flight control system
p 841 A85-45065
A review of foreign technology in aircraft flight controls
p 841 A85-45066
Digital flight control and avionics integration techniques p 834 A85-45156
Asymmetric aeroservoelastic modeling for Active Control Simulation
[AIAA PAPER 85-1861] p 843 A85-45890
Design of the robust flight control system by realizable linear compensator
[AIAA PAPER 85-1897] p 844 A85-45913
Use of the pseudo-inverse for design of a reconfigurable flight control system
[AIAA PAPER 85-1900] p 844 A85-45915
Combining quantitative and qualitative reasoning in aircraft failure diagnosis
[AIAA PAPER 85-1905] p 811 A85-45917
An adaptive guidance algorithm for aerospace vehicles
[AIAA PAPER 85-1917] p 850 A85-45921
The use of Ada in digital flight control systems
[AIAA PAPER 85-1953] p 834 A85-45939
Design for an Ada-based architecture for critical flight controls
[AIAA PAPER 85-1954] p 859 A85-45940
Totally robust control - A new concept for design of flight control systems
[AIAA PAPER 85-1974] p 845 A85-45955
Improved feedback algorithms for optimal maneuvers in vertical plane
[AIAA PAPER 85-1976] p 845 A85-45956
Generic faults - The first word — flight control system errors
[AIAA PAPER 85-1979] p 856 A85-45957
Stability of adaptive control algorithms - Theoretical examination and simulation for F-4 flight control
[AIAA PAPER 85-1966] p 845 A85-45965
Singular value analysis of competitive multi-input/multi-output manual control systems
[AIAA PAPER 85-1943] p 860 A85-45966
Flight control law synthesis for an elastic vehicle by eigenspace assignment
[AIAA PAPER 85-1898] p 846 A85-45970
Design of fast non-interacting digital flight-mode control systems for high-performance aircraft
[AIAA PAPER 85-1903] p 846 A85-45974
Application of a new multivariable model-following method to decoupled flight control p 846 A85-46339
Parameter space design of control systems using interactive computer graphics p 916 A85-47681
Design of decoupled longitudinal flight control laws utilizing eigensystem assignment p 893 A85-47697
How autopilot requirements constrain the aerodynamic design of homing missiles p 894 A85-47717
Further application of output predictive algorithmic control to terrain following p 894 A85-47734
Model insensitivity with optimality — in feedback control p 917 A85-47735
A fluidic flight control system demonstrator
p 894 A85-47788
Control system reconfiguration p 917 A85-47793
One-Eleven trailblazers p 866 A85-49657
LED multifunction keyboard engineering study
[AD-A145199] p 24 N85-10061
Model simplification of flight control systems
p 36 N85-11000
Interactive aircraft flight control and aeroelastic stabilization
[NASA-CR-174025] p 36 N85-11003
Aircrew-aircraft integration: A summary of US Army research programs and plans
[NASA-TM-85891] p 36 N85-11004
Definition of acceptable levels of mismatch for equivalent systems of augmented CTOL (Conventional Take-Off and Landing) aircraft
[AD-A145819] p 37 N85-11007
Expert systems in maintenance diagnostics for self-repair of digital flight control systems
[AD-P003933] p 58 N85-11613
A unified method for evaluating real-time computer controllers: A case study — aircraft control
[NASA-CR-174168] p 132 N85-13478
Flying qualities and control system characteristics for superaugmented aircraft
[NASA-CR-170419] p 173 N85-13800
Terminal control of gliding in atmosphere
p 174 N85-14968
Aircraft thrust control scheme for terrain following system
[AD-D011387] p 255 N85-15711
Effect of aerodynamic and angle-of-attack uncertainties on the May 1979 entry flight control system of the Space Shuttle from Mach 6 to 1.5
[NASA-TP-2365] p 280 N85-15778
Literature review of voice recognition and generation technology for Army helicopter applications
[AD-A146878] p 293 N85-15954
cost and benefits optimization model for fault-tolerant aircraft electronic systems
[NASA-CR-166043] p 293 N85-15993
Experience of one UK electronic equipment supplier with bite on engine/flight control systems over the past ten years p 296 N85-16738
Helicopter Guidance and Control Systems for Battlefield Support
[AGARD-CP-359] p 204 N85-16797
Integrated digital/electric aircraft concepts study
[NASA-CR-3841] p 257 N85-16861
Reference energy-altitude descent guidance: Simulator evaluation — aircraft descent and fuel conservation
[NASA-TP-2383] p 261 N85-16868
Multivariable flight control with time-scale separation
[NASA-CR-174320] p 268 N85-16873
Design and test of a four channel motor for electromechanical flight control actuation
[NASA-CR-171838] p 297 N85-17294
Interactive Graphics Simulator: Design, development and effectiveness/cost evaluation
[AD-A149417] p 376 N85-19712
Robustness of discrete-time dynamical systems: Application to the multivariable digital control of combat aircraft
[ONERA-NT-1984-2] p 425 N85-19986
Robustness of continuous multivariable flight controls
[ONERA-RT-12/7224-SY] p 425 N85-19987
Robustness of continuous multivariable flight controls
[ONERA-RT-11/7224-SY] p 425 N85-19988
Translating rudder pedal system
[AD-D011510] p 425 N85-21172
Analytical and flight investigation of the influence of rotor and other high-order dynamics on helicopter flight-control system bandwidth
[NASA-TM-86696] p 425 N85-21174
Optimal symmetric flight studies
[NASA-CR-172508] p 426 N85-21176
Integrated control system engineering support
[AD-A149742] p 426 N85-21177
Activities in flight mechanics and flight control
[ISSN-0720-7808] p 515 N85-23803
On-orbit systems identification of flexible spacecraft Technol., 1984, Pt. 2 p 465-481 p 518 N85-23841
High specific power aircraft turn maneuvers: Tradeoff of time-to-turn versus change in specific energy
[AD-A151701] p 575 N85-25257

Effects of side-stick controllers on rotorcraft handling qualities for terrain flight
[NASA-TM-86688] p 585 N85-25267

Hamer p 576 N85-26595

Cost Effective and Affordable Guidance and Control Systems
[AGARD-CP-360] p 543 N85-26638

Some aspects of how to design cost-effective flight control systems p 586 N85-26639

Navigation: Accounting for copy p 568 N85-26641

A cost-efficient control procedure for the benefit of all airspace users p 613 N85-26651

Study of longitudinal landing flying qualities evaluation using pilot model theory
[AD-A152194] p 577 N85-26702

Flight control system reconfiguration design using quantitative feedback theory
[AD-A151771] p 587 N85-26722

A modern control design methodology with application to the CH-47 helicopter
[AD-A151946] p 587 N85-26723

The state-of-the-art and future of flight control systems p 588 N85-26732

A perspective on superaugmented flight control advantages and problems p 588 N85-26733

Aspects of application of ACT systems for pilot workload alleviation p 588 N85-26734

Application of AFTI/F-16 task-tailored control modes in advanced multirole fighters p 589 N85-26735

X-29A digital flight control system design
p 589 N85-26736

ACT applied to helicopter flight control
p 589 N85-26738

Some flight test results with redundant digital flight control systems p 589 N85-26739

An update on experience on the fly by wire Jaguar equipped with a full-time digital flight control system
p 589 N85-26740

ACT flight research experience p 589 N85-26741

Operational and developmental experience with the F/A-18A digital flight control system
p 589 N85-26742

Flight testing and development of the F/A-18A digital flight control system p 590 N85-26743

Active control technology experience with the Space Shuttle in the landing regime p 590 N85-26747

How to handle failures in advanced flight control systems of future transport aircraft p 591 N85-26752

Interactive design of specifications for airborne software set (GISELE) p 610 N85-26753

The flight control system for the Experimental Aircraft Programme (EAP) demonstrator aircraft
p 591 N85-26755

Automatic flight control modes for the AFTI/F-111 mission adaptive wing aircraft p 591 N85-26756

The STOL and maneuver technology program integrated control system p 591 N85-26757

The evolution of active control technology systems for the 1990's helicopter p 591 N85-26758

Some aspects of how to design cost-effective flight control systems
[MBB-LKE-32/S/PUB/143] p 591 N85-27729

Analysis of control system from a viewpoint of desired pole placement and desired degree of robustness
[AD-A152627] p 675 N85-27876

Design of robust controllers for a multiple input-multiple output control system with uncertain parameters application to the lateral and longitudinal modes of the KC-135 transport aircraft
[AD-A153100] p 675 N85-27877

Controller requirements for uncoupled aircraft motion, volume 1
[AD-A153173] p 675 N85-27878

Active Control Systems: Review, Evaluation and Projections
[AGARD-CP-384] p 676 N85-27883

The state-of-the-art and future of flight control systems p 677 N85-27885

A perspective on superaugmented flight control advantages and problems p 677 N85-27886

ACT applied to helicopter flight control
p 678 N85-27891

Some flight test results with redundant digital flight control systems p 678 N85-27892

The aerodynamics of control p 679 N85-27901

The STOL and maneuver technology program integrated control system development p 680 N85-27910

The evolution of active control technology systems for the 1990's helicopter p 680 N85-27911

Advanced secondary power system for transport aircraft
[NASA-TP-2463] p 673 N85-28944

Piloted simulation of an algorithm for onboard control of time-optimal intercept
[NASA-TP-2445] p 681 N85-28949

Extraction of aerodynamic parameters for aircraft at extreme flight conditions
[NASA-TM-86730] p 704 N85-29686

Development and evaluation of a Fault-Tolerant Multiprocessor (FTMP) computer. Volume 2: FTMP software
[NASA-CR-166072] p 804 N85-30706

Interactive aircraft flight control and aeroelastic stabilization
[NASA-CR-176035] p 776 N85-31064

Flight control system for a computer controlled aircraft with limited sensors
[AD-A155107] p 830 N85-32115

Flutter clearance of the Schweizer 1-36 deep-stall sailplane
[NASA-TM-85917] p 830 N85-33118

Flight test experience and controlled impact of a large, four-engine, remotely piloted airplane
[NASA-TM-86738] p 847 N85-33123

The interpretation of flying qualities requirements for flight control system design
[NASA-CR-177942] p 848 N85-33125

Intelligent redundant actuation system requirements and preliminary system design
[NASA-CR-177366] p 886 N85-34136

**FLIGHT CREWS**

SAFE Association, Annual Symposium, 21st, San Antonio, TX, November 5-8, 1983, Proceedings
p 330 A85-22751

ACES II R&D upgrade program p 330 A85-22757

Selectable thrust rocket motor for crew escape systems p 340 A85-22758

A brief review of the performance of the Canadian aircrew life preservers over the last twenty years
p 330 A85-22760

New performance requirements for MIL-T-25959 tiedown adjusters p 330 A85-22762

Problems in the quantification of aircrew automated escape systems (AAES) in-service reliability
p 331 A85-22766

U.S. Navy aircrew automated escape systems (AAES) and aircrew life support systems (ALSS) in-service usage data analysis program - A progress report and report of longer term plans p 331 A85-22767

Are two always better than one? — aircraft systems redundancy in number of engines, pilots, and crew protection p 496 A85-31997

Analyses of on-board CIG (Computer Image Generator) applications for aircrew training
[AD-A145214] p 38 N85-10079

System status display information
[NASA-CR-172347] p 107 N85-12889

Personnel protection concepts for advance escape system design p 334 N85-19658

Torso restraint system
[AD-D011609] p 564 N85-26684

Human factors in cockpit automation: A field study of flight crew transition
[NASA-CR-177333] p 747 N85-29937

U.S. Civil airmen statistics for calendar year 1984
[AD-A156326] p 866 N85-35153

Introduction to European air traffic control
[AD-A156328] p 878 N85-35176

**FLIGHT HAZARDS**

The hazard of lightning p 89 A85-15165

Bird strike prevention at airports p 90 A85-15167

Icing flight tests p 90 A85-15595

A spatial model of wind shear and turbulence
[AIAA PAPER 84-0277] p 190 A85-16236

A user-operated model to study strategy in aircraft evacuation p 148 A85-16240

Use of Doppler radar to detect weather hazards such as turbulence, wind shear, and gust fronts
p 191 A85-17485

Status of warm fog dispersal research
[AIAA PAPER 85-0010] p 272 A85-19456

The Federal Aviation Administration's Engineering and Development Aircraft Icing Program
[AIAA PAPER 85-0015] p 247 A85-19459

Safety - Meteorological data vital for simulator training
[AIAA PAPER 85-0091] p 240 A85-19513

Radar for storm forecasting and weather hazard warning
[AIAA PAPER 85-0092] p 299 A85-19514

The development of mathematical modelling techniques for helicopter rotor icing
[AIAA PAPER 85-0336] p 240 A85-19679

Experimental aerodynamic characteristics of an NACA 0012 airfoil with simulated ice p 252 A85-21844

Cockpit requirements for weather information and data link messages p 401 A85-27529

Development of a terminal sensor for hazardous weather and wake turbulence detection p 441 A85-27532

Enhanced collision avoidance system cuts unneeded alerts p 578 A85-35450

Taming the deadly spin p 584 A85-36148

Icing on aircraft - Again a topic of interest
p 745 A85-41065

Windshear escape p 776 A85-41530

Food poisoning as an in-flight safety hazard
p 746 A85-42089

Optimal disturbance suppression with application to wind shear — for digital flight control of small commercial jet
[AIAA PAPER 85-1886] p 844 A85-45909

The structural dynamics of Electro-impulse De-icing on the Lear Fan Kevlar Composite leading edge
[SAE PAPER 850917] p 885 A85-50127

Study of effects of lightning on aircraft systems stressed p 90 N85-12005

Don't fowl out
[AD-P004179] p 402 N85-19941

Analysis of bird strikes reported by European airlines, 1976 - 1980
[AD-P004181] p 402 N85-19943

Birds and aircraft engine strike rates
[AD-P004184] p 403 N85-19946

The use of falconry as mean to persuade the birds to stay out of the airport vicinity p 404 N85-19956

Airport bird hazards associated with solid waste disposal facilities
[AD-P004197] p 428 N85-19964

Evaluation of effectiveness of bird scaring operations at a sanitary landfill site near CFB Trenton, Ontario, Canada
[AD-P004201] p 454 N85-19968

Development of bird hazard reduction for airport operational safety
[AD-P004202] p 428 N85-19969

The bird strike situation and its ecological background in the Copenhagen Airport, Kastrup
[AD-P004203] p 404 N85-19970

Bird control program Orlando International Airport
[AD-P004204] p 404 N85-19971

Staff assistance to bases for bird hazards
[AD-P004205] p 405 N85-19972

Bird strike avoidance system for Dover AFB, Delaware
[AD-P004206] p 405 N85-19973

The potential of the NEXRAD radar system for warning of bird hazards
[AD-P004210] p 405 N85-19977

First stage of equipping a Do 28 as a research aircraft for icing, and first research results
[ESA-TT-855] p 416 N85-19982

An analysis of the impacts of the Airport Radar Service Area (ARSA)
[AD-A150954] p 489 N85-23749

Helicopter user survey: Traffic alert and collision avoidance system (TCAS)
[FAA-PM-85-6] p 567 N85-25236

The impact of weather on aviation safety
[GPO-35-520] p 565 N85-26685

Aircraft accident report: United Airlines Flight 663, Boeing 727-222, N7647U, Denver, Colorado, May 31, 1984
[PB85-910408] p 565 N85-26686

Flying in spite of the weather
[NLR-MP-84021-U] p 644 N85-27847

Contributions on the subject of longitudinal movements of aircraft in wind shears
[NASA-TM-77837] p 702 N85-29432

System safety study of minimum TCAS 2 for instrument weather conditions
[FAA-PM-85-12] p 820 N85-33113

**FLIGHT INSTRUMENTS**

Fundamentals of the general structural-physical theory of flight instruments — Russian book
p 131 A85-13750

Optoelectronic guidance instruments for flight vehicles (4th revised and enlarged edition) — Russian book
p 125 A85-15815

A range for all needs — Airbus A310/A320 development p 156 A85-17325

Current and future general aviation EFIS developments — electronic flight instrumentation systems
[AIAA PAPER 84-2642] p 164 A85-17831

Flight instrumentation p 578 A85-34585

Predictor laws for pictorial flight displays
p 824 A85-46326

The Malcolm horizon: History and future
p 23 N85-10046

A comparative evaluation of EMADS (Engine Monitoring and Display System) and conventional engine instruments
[AD-A145901] p 112 N85-12060

LPI-radar for helicopter obstacle warning
p 297 N85-16810

Air Force Academy Aeronautics Digest
[AD-A149614] p 384 N85-21104

A preliminary investigation of handling qualities requirements for helicopter instrument flight during decelerating approach maneuvers and overshoot
[NRC-24173] p 652 N85-27857

A guide to USAF helicopter instrument flight procedures
[AD-A156102] p 880 N85-35182
Accuracy and error analysis — airborne instruments
p 916 N85-35557

**FLIGHT LOAD RECORDERS**
Operational Loads Data
[AGARD-CP-375] p 201 N85-15664
Operational loads measurement: A philosophy and its implementation p 253 N85-15665
The F-15 flight loads tracking program
p 253 N85-15666
Operational loads data evaluation for individual aircraft fatigue monitoring p 253 N85-15669
US Army helicopter operational flight loads
p 254 N85-15675
Flight parameters recording for structure fatigue life monitoring p 292 N85-15682
USAF approach to airborne structural data recording: Airborne Data Acquisition Multifunction System (ADAMS)
p 292 N85-15683

**FLIGHT MANAGEMENT SYSTEMS**
Navigation processing of the Flight Management Computer System for the Boeing 737-300
p 93 A85-14827
Artificial intelligence applied to the inertial navigation system performance and maintenance improvement
p 94 A85-14830
Developing safe software for critical airborne applications
[AIAA PAPER 84-2598] p 192 A85-17802
The use of structured methods in the development of large software-based avionics systems
[AIAA PAPER 84-2595] p 192 A85-17803
Architectural solutions to safety problems of digital flight Critical systems for commercial transports
[AIAA PAPER 84-2603] p 193 A85-17806
Time flies - An in-service evaluation of a 4-D flight management system
[AIAA PAPER 84-2607] p 171 A85-17810
Development tools - Case study for large systems — of digital avionics
[AIAA PAPER 84-2635] p 193 A85-17826
A method for testing a digital flight control system without the use of ground support equipment
[AIAA PAPER 84-2664] p 172 A85-17851
Maintenance Assist Functions embedded within the 737-300 Flight Management System
[AIAA PAPER 84-2706] p 165 A85-17874
Integrated on-board monitoring and test concepts
[AIAA PAPER 84-2709] p 166 A85-17875
A terrain data/digital map system for LHX — Light Helicopter
[AIAA PAPER 84-2723] p 152 A85-17885
The de-ja vu of all electric/all digital aircraft — future integrated system technology of commercial and military aircraft
[AIAA PAPER 84-2739] p 157 A85-17893
Speech recognition making progress - Direct voice input is a promising infant p 244 A85-19183
The Mission Oriented Terminal Area Simulation (MOTAS)
[AIAA PAPER 85-0308] p 274 A85-19655
Designing a priority driven multi-frame rate flight executive
[AIAA PAPER 85-0309] p 268 A85-19656
Software design methods — for civil and military aircraft avionics systems p 301 A85-21457
A design methodology for integrated avionic systems
p 301 A85-21458
Trends in digital flight control systems
p 269 A85-21465
Trends in digital engine control - Integration of propulsion control with flight control and avionic systems in future military and commercial aircraft p 264 A85-21466
Flight-management systems p 355 A85-25520
An intelligent flight-management aid for procedure execution p 332 A85-25793
A new era in commercial aircraft flight management
p 382 A85-27448
Fuel economies effected by the use of FMS in an advanced TMA p 412 A85-27604
Integration of advanced displays, FMS, speech recognition and data link p 407 A85-27605
FMS airline experience to date p 408 A85-27606
Flight testing today: Innovative management and technology; Proceedings of the Fourteenth Annual Symposium, Newport Beach, CA, August 15-19, 1983
p 383 A85-28632
Impacts of automation - Automation and flight test engineering p 413 A85-28633
Flight testing the Digital Electronic Engine Control (DEEC) A unique management experience
p 420 A85-28636
Flight management systems - Their role is steadily increasing p 512 A85-32487
New performance management system being tested on an A300 p 504 A85-32488
Systems for the Airbus A320 - Innovation in all directions p 571 A85-33889
Flight systems of future commercial aircraft
p 567 A85-36426
Design of digital flight control systems for helicopters
p 673 A85-37195
Advanced avionics management system prevents pilots from being swamped by information overload
p 655 A85-38401
Integrated flight/propulsion control - Adaptive engine control system mode
[AIAA PAPER 85-1425] p 669 A85-39772
Flight control technology in transport
p 775 A85-41015
Multiple sensor — for digital flight control systems
p 763 A85-41017
Multiplexed data bus for aircraft and its role
p 763 A85-41018
Triplex bus-connected inter-unit selected FCS configuration — flight control system
p 841 A85-45065
A concept for more test time on flight software
p 858 A85-45076
Real-time management of strategic penetrator missions p 810 A85-45153
Design of an expert-system flight status monitor
[AIAA PAPER 85-1908] p 834 A85-45975
Airborne optical information systems (Handbook) — in Russian p 835 A85-46119
Concepts and algorithms for terminal-area traffic management p 878 A85-47683
The flight planning - flight management connection
p 877 A85-47684
Flight Management Systems create new crew training needs p 916 A85-48860
Ground and flight testing for aircraft guidance and control
[AGARD-AG-262] p 467 N85-22350
Civil avionics flight testing with the RAE(B) BAC1-11
p 504 N85-22354
A flight management algorithm and guidance for fuel-conservative descents in a time-based metered air traffic environment: Development and flight test results
p 498 N85-22356
Planning fuel-conservative descents in an airline environmental using a small programmable calculator: Algorithm development and flight test results
[NASA-TP-2393] p 579 N85-26705

**FLIGHT MECHANICS**
Wind shear terms in the equations of aircraft motion
p 35 A85-11981
The dynamics of takeoff and landing of aircraft — Russian book p 115 A85-14636
Dynamics of non-autonomous spatial motion of an aeroplane with fixed control systems
p 116 A85-15720
Interception in three dimensions - An energy formulation p 158 A85-18329
In-flight simulation in flight mechanics
p 159 A85-18713
The need for system identification in flight mechanics, taking into account the benefits of such an identification
p 175 A85-18714
Experimental methods for wind-tunnel flight-mechanics investigations using dynamically similar aircraft models — German thesis p 249 A85-19836
Separation of time scales in aircraft trajectory optimization p 411 A85-26444
Analytic solution for a cruising plane change maneuver p 432 A85-29306
A method for determining the flight trajectory of an ejection seat p 493 A85-31778
Discussions on the regular behavior of the longitudinal dynamic response of aircraft during variable sweep flights p 674 A85-38974
Slow and fast state variables for three-dimensional flight dynamics p 675 A85-39567
Atmospheric Flight Mechanics Conference, 12th, Snowmass, CO, August 19-21, 1985, Technical Papers
p 837 A85-43826
AGARD bulletin technical programme, 1985
[AGARD-BUL-84-2] p 67 N85-11971
Flight test of the Open Loop Gust Alleviation (OLGA) system
[BMFT-FB-W-84-038] p 271 N85-16881
Flight mechanics analysis of dynamic derivatives of the Dornier variable wind tunnel model
[ESA-TT-854] p 395 N85-19937
Technical evaluation report on the FDP Symposium on Flight Test Techniques
[AGARD-AR-208] p 417 N85-21157
Optimal symmetric flight studies
[NASA-CR-172508] p 426 N85-21176
Dynamic wind tunnel testing for active control research p 514 N85-22352
Activities in flight mechanics and flight control
[ISSN-0720-7808] p 515 N85-23803
Use of quaternions in flight mechanics
[AD-A152616] p 675 N85-27875
Active Control Systems: Review, Evaluation and Projections
[AGARD-CP-384] p 676 N85-27883
Flight-mechanics test with a restricted flying aircraft model in a wind tunnel
[ESA-TT-885] p 761 N85-31053
The contribution made by flight mechanics to civil aviation p 878 N85-35169
Estimation of flight mechanical variables by means of Kalman filters p 876 N85-35171
Control variables in vertical wind determination using simple flight-mechanical equations p 914 N85-35546

**FLIGHT OPERATIONS**
Integrating aeronautical information for flight operations p 745 A85-41727
New ICAO procedures on instrument departures and noise abatement p 746 A85-41733
New runway enables IL-76 flights to Tenkeli in far north p 430 N85-21108
Ministry officials on improving aircraft technical servicing p 468 N85-23697
Disturbance to the population due to flight operations at landing fields. Questionnaire on community reaction to non-commercial and sporting aviation
[NASA-TM-76531] p 534 N85-24537

**FLIGHT OPTIMIZATION**
The determination of optimum flight profiles for short haul routes
[AIAA PAPER 84-2408] p 89 A85-13515
Computer optimized TACAN navigation for high performance aircraft
[AIAA PAPER 84-2436] p 92 A85-13531
Four-dimensional fuel-optimal guidance in the presence of winds p 158 A85-18328
Maximum final energy chandelle
[AIAA PAPER 85-0200] p 247 A85-19584
The AFA computerized mission planning system
p 347 A85-25853
Investigation of modern flight-control problems with regard to minimal fuel consumption, with consideration of arrival-time limitations, air-traffic density, and onboard real-time computation — German thesis
p 409 A85-28794
Flight time enhancement on the basis of a cyclically controlled dynamic duration flight p 424 A85-29049
On-line determination of optimal flight paths for helicopters p 495 A85-31994
Optimal symmetric flight with an intermediate vehicle model p 497 A85-32780
An evading path against 3 D obstacles
p 674 A85-38357
Minimum-time path through wind fields
p 647 A85-38358
Classical and neo-classical cruise-dash optimization
p 650 A85-39212
The reduction of fuel consumption on the basis of periodic optimal flight paths
[DGLR PAPER 84-090] p 753 A85-40309
Descending flight and its optimization
p 756 A85-41398
The determination of optimum flight profiles for short-haul routes p 758 A85-42930
Energy management of three-dimensional minimum-time intercept — for aircraft flight optimization
[AIAA PAPER 85-1781] p 838 A85-43841
Performance and optimization analyses of flight vehicle from low to very high angles of attack
[AIAA PAPER 85-1784] p 824 A85-43844
Optimal flight paths through microburst wind profiles
[AIAA PAPER 85-1833] p 839 A85-43872
Real-time management of strategic penetrator missions p 810 A85-45153
Minimum-fuel, three-dimensional flight paths for jet transports p 828 A85-46341
The flight planning - flight management connection
p 877 A85-47684
Feedback control for fuel-optimal descents using singular perturbation techniques p 893 A85-47686
The Delco Performance Management System
p 895 A85-49172
On-board near-optimal climb-dash energy management p 21 N85-10931
Computer assisted flight schedule optimization
[AD-A151689] p 611 N85-27623

**FLIGHT PATHS**
Investigation of the semiautomatic control of an aircraft using timer redundancy in onboard digital computers of the flight-path control system p 35 A85-10470

Estimating the trajectory of an accelerationless aircraft by means of a stationary acoustic sensor p 64 A85-12300

Development of a 3-D interactive graphics flight path analysis program for the T-38 aircraft [AIAA PAPER 84-2439] p 113 A85-13533

Periodic optimal cruise of an atmospheric vehicle p 102 A85-13701

Improvements in computing flight paths and flight times for air traffic control p 95 A85-15169

A three-dimensional Kalman filter for short observation times to extrapolate flight trajectories — German thesis p 301 A85-19835

NASA-FAA helicopter Microwave Landing System curved path flight test p 485 A85-31993

On-line determination of optimal flight paths for helicopters p 495 A85-31994

Optimal symmetric flight with an intermediate vehicle model p 497 A85-32780

Onboard near-optimal climb-dash energy management p 497 A85-32781

Instationary dolphin flight - The optimal energy exchange between a sailplane and vertical currents in the atmosphere p 646 A85-37488

Numerical solution of the minimum-time flight of a glider through a thermal by use of multiple shooting methods p 638 A85-37489

Observation of birds in the flight path of aircraft - An important stage in the prevention of bird strikes p 639 A85-37544

An evading path against 3 D obstacles p 674 A85-38357

Minimum-time path through wind fields p 647 A85-38358

The Command Flight Path Display - All weather, all missions p 656 A85-38959

The reduction of fuel consumption on the basis of periodic optimal flight paths [DGLR PAPER 84-090] p 753 A85-40309

The determination of optimum flight profiles for short-haul routes p 758 A85-42930

Aircraft intercept vectoring in a known wind field [AIAA PAPER 85-1782] p 824 A85-43842

Optimal flight paths through microburst wind profiles [AIAA PAPER 85-1833] p 839 A85-43872

Analysis of aircraft control strategies for microburst encounter — low altitude wind shear p 846 A85-46327

Minimum-fuel, three-dimensional flight paths for jet transports p 828 A85-46341

The extended range operation of twin-engined public transport aircraft. I p 881 A85-49173

The extended range operation of twin-engined public transport aircraft. III p 882 A85-49175

On-board near-optimal climb-dash energy management p 21 N85-10931

Command flight path display. Phase I and II: Appendix F [AD-A145858] p 107 N85-12056

Effects of aircraft and flight parameters on energy-efficient profile descents in time-based metered traffic [NASA-CR-172338-ADD] p 245 N85-15706

Predicted performance benefits of an adaptive digital engine control system of an F-15 airplane [NASA-TM-85916] p 265 N85-15729

Investigation of semiautomatic aircraft control processes employing time redundancy in on-board digital trajectory control computers p 270 N85-16048

Minimum time turns using vectored thrust [AD-A151693] p 575 N85-25256

High specific power aircraft turn maneuvers: Tradeoff of time-to-turn versus change in specific energy [AD-A151701] p 575 N85-25257

A user's manual for AMEER flight path trajectory simulation code [DE85-006580] p 576 N85-25260

A method of estimating aircraft attitude from fly by wire flight control system data p 586 N85-26653

Terrain following without use of forward looking sensors p 569 N85-26659

Generation of flight paths using heuristic search [AD-A151949] p 569 N85-26694

Planning fuel-conservative descents in an airline environmental using a small programmable calculator: Algorithm development and flight test results [NASA-TP-2393] p 579 N85-26705

Aspects of application of ACT systems for pilot workload alleviation p 588 N85-26734

Probabilistic computer model of optimal runway turnoffs [NASA-CR-172549] p 594 N85-26760

Status of air traffic control system [S-HRG-98-1197] p 750 N85-31036

Guidelines for the evaluation of visual approach slope indicators [ARL/SYS-R-32] p 880 N85-34132

Determination of instrument errors by compatibility checking: Results from dynamic flight test data [ARL/AERO-R-162] p 869 N85-34137

International flight planning handbook [AD-A156330] p 878 N85-35177

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 2 [NASA-CR-167863] p 913 N85-35535

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 3 [NASA-CR-167864] p 913 N85-35536

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 4 [NASA-CR-167865] p 913 N85-35537

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning: Summary report [NASA-CR-167866] p 913 N85-35538

**FLIGHT PLANS**

767 flight test program overview p 413 A85-28637

The flight planning - flight management connection p 877 A85-47684

International flight planning handbook [AD-A156330] p 878 N85-35177

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 1 [NASA-CR-167862] p 913 N85-35534

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 2 [NASA-CR-167863] p 913 N85-35535

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning: Summary report [NASA-CR-167866] p 913 N85-35538

**FLIGHT RECORDERS**

General aviation data bus update [AIAA PAPER 84-2637] p 164 A85-17828

Crash-survivable flight data recorder [AIAA PAPER 84-2705] p 166 A85-17878

Identification of vortex-induced clear air turbulence using airline flight records p 299 A85-21843

Maintenance computer for Tornado p 348 A85-25854

Aircraft flight recorder system p 762 A85-40979

Analysis of flight-recorded data as a contribution to safety in air operations p 745 A85-41726

**FLIGHT SAFETY**

Extended range operation of twin-engined transport aircraft (ETOPS) [AIAA PAPER 84-2512] p 89 A85-13578

The risks of research and development flying p 103 A85-14750

Metallised ,fabrics, their properties and technical applications p 118 A85-15166

Improvements in computing flight paths and flight times for air traffic control p 95 A85-15169

A simple and safe takeoff or landing procedure with wing surface contaminations p 155 A85-16239

Shall safety be maintained? — by detailed maintenance and aircraft damage repair reporting p 148 A85-16538

1984 SAE aerospace handbook: Air transport cabin and flight deck safety provisions p 156 A85-17244

Method for calculation of ATC-facility capacity utilization in preplanning air-traffic movements p 150 A85-17450

Scan rates of Next Generation Weather Radar p 191 A85-17466

Enhanced TCAS II signal processor development — Traffic alert and Collision Avoidance System [AIAA PAPER 84-2656] p 150 A85-17843

Safety-of-flight and qualification testing for avionic systems [AIAA PAPER 84-2670] p 175 A85-17853

Evolution of the Collision Avoidance System in the cockpit [AIAA PAPER 84-2734] p 152 A85-17888

Seventh Annual Workshop on Meteorological and Environmental Inputs to Aviation Systems 26-28 October 1983, Tullahoma, Tennessee p 191 A85-18324

A summary of NASA's research on the fluid ice protection system [AIAA PAPER 85-0467] p 241 A85-19768

SAFE Association, Annual Symposium, 21st, San Antonio, TX, November 5-8, 1983, Proceedings p 330 A85-22751

New performance requirements for MIL-T-25959 tiedown adjusters p 330 A85-22762

A look at 'chair-chutes' - Parachute industry's answer to airline safety in the 1940s p 331 A85-22765

Navstar [IAF PAPER 83-265] p 335 A85-23812

Pulsed Doppler radars for weather observation and flight safety enhancement p 374 A85-24903

Development of an energy absorbing passenger seat for the B-720 test aircraft p 332 A85-26306

Cockpit requirements for weather information and data link messages p 401 A85-27529

Microbursts in JAWS depicted by Doppler radars, PAM, and aerial photographs p 453 A85-28777

Enhanced collision avoidance system cuts unneeded alerts p 578 A85-35450

Stall warning - Catching it early p 578 A85-36144

Advanced techniques for health and usage monitoring of helicopter transmissions [AIAA PAPER-85-1142] p 617 A85-39621

The experience of an airport with flight safety - Its effect on airport infrastructure and traffic situation p 777 A85-40291

Analysis of flight-recorded data as a contribution to safety in air operations p 745 A85-41726

Integrating aeronautical information for flight operations p 745 A85-41727

Preventing infringements of restricted airspace p 746 A85-41732

Optimal flight paths through microburst wind profiles [AIAA PAPER 85-1833] p 839 A85-43872

Preventing collisions in air traffic - A system analysis with special emphasis on transponder-assisted on-board systems with selective addressing — German thesis p 834 A85-45524

Fundamentals of flight operations, maintenance, and flight safety — Russian book p 811 A85-46566

Flight phase status monitor study. Phase 1: Systems concepts [DOT/FAA/PM-84/18] p 90 N85-12046

Aircraft navigation and landing technology: Status of implementation [GPO-38-615] p 97 N85-12883

Flight Training Technology for Regional/Commuter Airline Operations: Regional Airline Association/NASA Workshop Proceedings [NASA-CP-2346] p 332 N85-18009

Safety awareness, pilot education, and incident reporting programs p 332 N85-18020

The aviation safety reporting system p 332 N85-18021

Pilot education and safety awareness programs p 333 N85-18026

Legislation to improve airline safety [GPO-38-222] p 405 N85-21132

Aerospace Safety Advisory Panel [NASA-TM-87428] p 406 N85-21135

Improvements in personnel needed for better flight safety p 483 N85-23693

Safety recommendation(s), A84-111 through -115 [REPT-4011C/27] p 484 N85-23744

An analysis of the impacts of the Airport Radar Service Area (ARSA) [AD-A150954] p 489 N85-23749

Official on Soviet research in deicing techniques p 563 N85-25191

Safety recommendation(s), A-84-96 [REPT-3983A/217] p 563 N85-25223

Safety recommendation(s), A-84-76 through -78 [REPT-3751E] p 564 N85-25224

The impact of weather on aviation safety [GPO-35-520] p 565 N85-26685

Aircraft accident report: United Airlines Flight 663, Boeing 727-222, N7647U, Denver, Colorado, May 31, 1984 [PB85-910405] p 565 N85-26686

Lightning-safe carbon fiber composite for Airbus tail unit p 692 N85-29100

**FLIGHT SIMULATION**

Scaling laws for jet mixing noise in simulated flight and the prediction scheme associated [AIAA PAPER 84-2360] p 63 A85-10894

Influence of sampling rate on the calculated fidelity of an aircraft simulation p 57 A85-11083

Development of a 3-D interactive graphics flight path analysis program for the T-38 aircraft [AIAA PAPER 84-2439] p 113 A85-13533

ACAP crashworthiness analysis by KRASH p 103 A85-14048

Visual simulation takes flight — Computer-generated imagery for improving realism of aircraft landing p 116 A85-15581

Modular programming structure applied to the simulation of non-linear aircraft models p 132 A85-15661

A spatial model of wind shear and turbulence [AIAA PAPER 84-0277] p 190 A85-16236

Evaluation of a real-time predictive guidance law for landing VTOL aircraft at sea
[AIAA PAPER 84-2673] p 151 A85-17856

Digital avionics and flight path director functions of the HH-60 helicopter
[AIAA PAPER 84-2674] p 151 A85-17857

Application of model-following control synthesis techniques to design of hydraulic velocity flight simulation table with one axis p 195 A85-18285

Pilot modeling and closed-loop analysis of flexible aircraft in the pitch tracking task p 172 A85-18334

In-flight simulation in flight mechanics
p 159 A85-18713

MISI - A general, modular, and interactive flight vehicle simulation program p 195 A85-18716

Dynamics of a helicopter rotor in abnormal operating conditions p 159 A85-18773

Calculation of the exchange ratio for the Adaptive Maneuvering Logic program
[AIAA PAPER 85-0311] p 199 A85-19658

Characteristic motions for simulation of post-stall manoeuvres and flight instabilities p 269 A85-21679

Nonlinear simulation of flight along wind compensating curved glidepaths p 245 A85-21838

Future helicopter developments p 311 A85-24512

Validation of flight-body system simulations
[MBB-UA-837-84-OE] p 457 A85-27989

Simulation validation of the XV-15 tilt-rotor research aircraft p 497 A85-32016

Identification of power analysis models for ETS-III operation p 595 A85-34426

Transitional, hypervelocity aerodynamic simulation and scaling in light of recent flight data
[AIAA PAPER 85-1028] p 621 A85-37661

An alternate approach to very long duration ballooning in the northern hemisphere p 640 A85-38316

Twin tilt nacelle V/STOL aircraft
[SAE PAPER 841556] p 650 A85-39208

Dynamic engine behavior during post surge operation of a turbofan engine
[AIAA PAPER 85-1430] p 669 A85-39774

Flight Simulation Technologies Conference, St. Louis, MO, July 22-24, 1985, Technical Papers
p 778 A85-40551

Simulating the works - From crew input to system response — integrated airborne weapon systems
[AIAA PAPER 85-1738] p 779 A85-40555

Flight simulation fidelity in a total g-force environment
[AIAA PAPER 85-1741] p 779 A85-40557

A ring-vortex downburst model for real-time flight simulation of severe wind shears
[AIAA PAPER 85-1749] p 799 A85-40561

Composite statistical method for modeling wind gusts for aircraft simulation
[AIAA PAPER 85-1750] p 799 A85-40562

Rotor dynamics simulation - A new approach
[AIAA PAPER 85-1739] p 754 A85-40565

Aircraft control integration - Methodology and performance impact
[AIAA PAPER 85-1424] p 775 A85-40839

Ariane 4 has already 'flown' in wind-tunnels and off a simulated launch pad p 782 A85-40913

Experimental investigation of the short period response requirements of MIL-F-8785C — flying qualities of piloted aircraft
[AIAA PAPER 85-1806] p 839 A85-43856

Advances in computer-generated imagery for flight simulation p 850 A85-44124

Evaluation of Defense Mapping Agency Level V high resolution data for training simulator applications
p 849 A85-45119

Handling-qualities investigation of conventional helicopter directional control characteristics
[AIAA PAPER 85-1947] p 845 A85-45936

Crack growth in aluminium alloy sheet material under flight-simulation loading p 853 A85-46469

Improving engine testing thru automation using a minicomputer p 829 A85-46623

An investigation of flying qualities requirements for a STOL fighter in approach and landing
[AIAA PAPER 85-1807] p 846 A85-47031

Aerospace simulation; Proceedings of the Conference, San Diego, CA, February 2-4, 1984 p 897 A85-49001

Flight testing of avionic systems on the ground
p 897 A85-49002

Rotorcraft simulation at Ames p 897 A85-49006

Structural mode real-time simulation
p 881 A85-49007

Evaluation of the AFTI/F-16 on the LAMARS (large amplitude multi-mode aerospace research simulator)
p 881 A85-49008

Some real-time simulation applications to Space Shuttle approach and landing design and test
p 899 A85-49016

Advances in flight simulators p 898 A85-49019

Pressure distribution on a swept wing aircraft in flight
p 11 N85-10025

A mathematical simulation model of the CH-47B helicopter, volume 1
[NASA-TM-84351-VOL-1] p 19 N85-10033

The Malcolm horizon: History and future
p 23 N85-10046

Active control technology experience with the Space Shuttle in the landing regime
[NASA-TM-85910] p 36 N85-10071

Effect of penetrant on fatigue of aluminum alloy lap joints
[NLR-TR-82104-U] p 53 N85-10373

Flight simulation fatigue crack propagation in metal/carbon-epoxy laminates
[NLR-TR-83006-U] p 54 N85-10416

Cyclic endurance testing of the RB211-22B cast HP turbine blade — high pressure (HP)
[PNR-90210] p 113 N85-12063

A spatial model of wind shear and turbulence for flight simulation p 130 N85-12518

An in-flight investigation of a twin fuselage configuration in approach and landing
[NASA-CR-172366] p 173 N85-13801

Fractographic observation and estimation of crack growth curve of aluminum alloy under ramdom flight simulation loading
[NAL-TR-824] p 180 N85-14913

NyKINM, a further development of KINM 22 — simulation of a robot attack on an aircraft
[FOA-C-20559-D8(E3)] p 256 N85-15720

Advanced flight simulation for helicopter development
p 277 N85-16815

Assessment of simulation fidelity using measurements of piloting technique in flight p 278 N85-16817

The IMAGE 3 Conference Proceedings
[AD-A148636] p 313 N85-17962

Visual perceptual aspects of low level high speed flight and flight simulation
[AD-P004310] p 358 N85-17964

Low altitude high speed flight simulation using video disc technology
[AD-P004312] p 358 N85-17966

SODERN Visualization System (SVS) for flight simulation
[AD-P004320] p 358 N85-17974

CIG (Computer Image Generator) goes to war: The tactical illusion
[AD-P004336] p 376 N85-17990

AVTS (Advanced Visual Technology System): A high fidelity visual simulator
[AD-P004338] p 359 N85-17992

Initiative uses of aircraft for flight training
p 333 N85-18027

In-flight investigation of the effects of time delay in control system on flying qualities in landing approach
[DFVLR-FB-84-35] p 425 N85-19989

Crack growth geometry in aluminum alloy sheet material under flight simulation loading. 1: A comparison between TWIST and miniTWIST FALSTAFF and short FALSTAFF. 2: Effect of truncating high loads
[VTH-LR-441] p 436 N85-20119

Simulation of aircraft behaviour on and close to the ground
[NASA-TM-87460] p 501 N85-23754

Flight simulation for inertial navigation system
p 490 N85-24081

YAV-8B Harrier p 576 N85-26605

Piloted simulation of one-on-one helicopter air combat at NOE flight levels
[NASA-TM-86686] p 586 N85-26720

The effect of load factor on aircraft handling qualities
[AD-A152118] p 587 N85-26724

Design and specification of a local area network architecture for use in real-time flight simulation
[AD-A152242] p 594 N85-26762

Research and development. Technical and scientific reports 1984 p 613 N85-27724

Advanced flight simulation for helicopter development
[MBB-UD-416/84-O] p 594 N85-27731

Adding computationally efficient realism to Monte Carlo turbulence simulation
[NASA-TP-2469] p 704 N85-28708

Helicopter Aeromechanics
[AGARD-LS-139] p 617 N85-28913

Electrooculographic measurement, fatigue and variability of performance in simulated aircraft flight
p 760 N85-29948

Crew systems and flight station concepts for a 1995 transport aircraft
[NASA-CR-166068] p 781 N85-29973

Modifications of flight-by-flight load sequences to provide for good fracture surface readability
[NLR-MP-84012-U] p 799 N85-31577

A preliminary investigation of handling qualities requirements for helicopter instrument flight during decelerating approach maneuvers and overshoot
[AD-A154650] p 847 N85-32125

The interpretation of flying qualities requirements for flight control system design
[NASA-CR-177942] p 848 N85-33125

Energy management of three-dimensional minimum-time intercept
[NASA-CR-176174] p 887 N85-35186

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 2
[NASA-CR-167863] p 913 N85-35535

FLIGHT SIMULATORS

Looking around at visuals — for flight simulation
p 123 A85-13898

Meeting tomorrow's standards with yesterday's simulators - The problems of upgrading
p 174 A85-17228

Third generation digital flight controls
p 170 A85-17230

Simulators/training devices for commuter airlines
p 174 A85-17232

A simulator application of a 'hands-on throttle and stick' concept to a transport pilot/autopilot interface
[AIAA PAPER 84-2687] p 165 A85-17866

Micro-based control and display research — using flight simulators
[AIAA PAPER 84-2688] p 165 A85-17867

Safety - Meteorological data vital for simulator training
[AIAA PAPER 85-0091] p 240 A85-19513

Modular simulators, their feasibility, design, and procurement
[AIAA PAPER 85-0312] p 274 A85-19659

History of the development and manufacture of flight simulators in Czechoslovakia and the rest of the world
p 275 A85-19878

The hydraulic and electrohydraulic elements used in flight simulators p 287 A85-19886

Aircraft cockpit work station as exemplified by a flight simulator p 357 A85-25513

Simulating 'the right stuff' p 369 A85-26249

Development of advanced fighter flight controls using flight simulators
[AIAA PAPER 84-2441] p 356 A85-26323

Radio frequency test facility for evaluation of missile hardware p 432 A85-28621

The use of engineering simulation to support aircraft flight testing at the U.S. Air Force Flight Test Center
p 413 A85-28634

Simulation of aircraft control systems on flight simulators p 415 A85-29861

Television systems for flight simulators
p 427 A85-29862

Current trends in the development of flight simulators
p 427 A85-29866

Prospects for the development of flight simulation equipment p 427 A85-29867

A piloted simulator investigation of decoupling helicopters by using a model following control system
p 511 A85-31955

Naval Center seeks new uses for centrifuge-based simulator p 591 A85-33800

Flight Simulation Technologies Conference, St. Louis, MO, July 22-24, 1985, Technical Papers
p 778 A85-40551

Simulator evaluation of F/A-18 ski jump
[AIAA PAPER 85-1730] p 754 A85-40553

Controlling the human centrifuge as a force and motion platform for the dynamic flight simulator
[AIAA PAPER 85-1742] p 779 A85-40558

A simulated infrared model board
[AIAA PAPER 85-1748] p 789 A85-40560

A flexible design for a general purpose simulation facility
[AIAA PAPER 85-1752] p 779 A85-40563

A real time executive for the control of a multicomputer simulation complex
[AIAA PAPER 85-1754] p 802 A85-40564

Windshear escape p 776 A85-41530

Development of a simulator facility for helicopter air-to-air combat
[AIAA PAPER 85-1733] p 780 A85-42662

Boeing Flight Simulator Approval Process
[AIAA PAPER 85-1736] p 780 A85-42663

A modern air combat dome visual system
[AIAA PAPER 85-1747] p 780 A85-42665

Developing an off-line environment for testing real time aerodynamics simulation
[AIAA PAPER 85-1751] p 803 A85-42666

A digital interface for flight simulator cockpits
[AIAA PAPER 85-1755] p 780 A85-42667

Investigation of the dynamics of the limit maneuvers of a helicopter by means of a flight simulator
p 781 A85-43051

Advances in computer-generated imagery for flight simulation p 850 A85-44124
Why not have a simulator type for commuter operators? p 897 A85-48856
Advanced flight training offered to corporate aviators p 897 A85-48858
General aviation needs cost-effective flight simulators p 897 A85-48859
Flight Management Systems create new crew training needs p 916 A85-48860

**FLIGHT STABILITY TESTS**
Aircraft flight stability testing: Dynamic loading — Russian book p 573 A85-35818
An experimental determination of the longitudinal stability properties of the LTA 20-1 airship
[AIAA PAPER 85-0879] p 674 A85-38794
Flight control dynamics of the 1903 Wright Flyer
[AIAA PAPER 85-1804] p 809 A85-43877
Flight test of the Open Loop Gust Alleviation (OLGA) system
[BMFT-FB-W-84-038] p 271 N85-16881
Identification of gust input and gust response characteristics from Do 28 TNT flight test data
[DFVLR-FB-84-48] p 676 N85-27881
Proposals for the determination of necessary elevator handling characteristics of sailplanes in high speed range
[DFVLR-FB-84-52] p 676 N85-27882
Real scale test of the Petit Canard aircraft in the number 3 section, 47 sqm, of the SIMA wind tunnel, May 1984
[ONERA-PV-1/0772-GY] p 743 N85-31018

**FLIGHT TEST INSTRUMENTS**
767 flight test program overview p 413 A85-28637
767/757 instrumentation system p 418 A85-28653
Flight test support aircraft Advanced Technologies Testing Aircraft System (ATTAS) for the DFVLR
[MBB-FE-732/S/PUB/154] p 578 N85-27730

**FLIGHT TEST VEHICLES**
Future technologies using the Lockheed HTB aircraft — High Technology Test Bed
[AIAA PAPER 84-2486] p 70 A85-13552
The X-29 flight-research program p 102 A85-13895
Impact of CAD/CAM on modification of flight test vehicles p 383 A85-26658
Active flutter suppression using eigenspace and linear quadratic design techniques p 512 A85-32779
Flight test support aircraft Advanced Technologies Testing Aircraft System (ATTAS) for the DFVLR
[MBB-FE-732/S/PUB/154] p 578 N85-27730
B-52B/DTV (Drop Test Vehicle) flight test results: Drop test missions
[NASA-CR-171530] p 741 N85-29934

**FLIGHT TESTS**
The prediction of buffeting response in flight from wind-tunnel measurements on models of conventional construction p 18 A85-11475
Flight tests of a sweptback parabolic tip on a Dauphin 365N
[ONERA, TP NO. 1984-84] p 7 A85-12613
Flight trial results of a hybrid strapdown attitude and heading reference system p 91 A85-13446
Boeing 737-300 flight test progress report
[AIAA PAPER 84-2464] p 99 A85-13550
Rotor systems research aircraft airplane configuration flight-test results
[AIAA PAPER 84-2465] p 99 A85-13551
Fatigue evaluation of helicopter dynamic components used in logging operations
[AIAA PAPER 84-2482] p 100 A85-13558
Flight test configuration for verifying inertial sensor redundancy management techniques
[AIAA PAPER 84-2496] p 92 A85-13568
Flight test techniques for validating simulated nuclear electromagnetic pulse aircraft responses
[AIAA PAPER 84-2498] p 100 A85-13569
The risks of research and development flying p 103 A85-14750
Icing flight tests p 90 A85-15595
Flight tests of special powerplant equipment and systems for fixed-wing aircraft and helicopters — Russian book p 111 A85-15822
Practical flight test method for determining reciprocating engine cooling requirements p 167 A85-16237
Turbulent roughness drag due to surface waviness at low roughness Reynolds numbers p 181 A85-16243
Canadair 601 - Challenger in name and in performance p 157 A85-18117
Determination of subcritical damping in CF-5 flight flutter tests p 158 A85-18520
Modifying and testing a canard on a Swiss Mirage III - Flight test status report p 158 A85-18610
The avionics flight test system p 154 A85-18718
A comparison of flight test and analytical techniques for boundary layer transition on a sailplane
[AIAA PAPER 85-0075] p 210 A85-19501
The design and testing of several joined wing RPV's
[AIAA PAPER 85-0275] p 248 A85-19627
Ground-effect analysis of a jet transport airplane
[AIAA PAPER 85-0307] p 248 A85-19677
Analysis and testing of the Diamond One wing anti-icing system

Fighter aircraft dynamic performance p 414 A85-28647
The microcomputer in flight test data reduction p 458 A85-28649
Continued development of distance measuring equipment for real-time spatial positioning in military aircraft testing p 419 A85-28656
Time-space position information at Edwards Air Force Base, California p 427 A85-28657
The UH-1H helicopter icing flight test program - An overview
[AIAA PAPER 85-0338] p 401 A85-28898
Multimode instability prediction method
[AIAA PAPER 85-0737] p 523 A85-30370
Pressure distributions on a helicopter swept tip from flight tests and from calculations p 470 A85-30942
ATR42 achieves flight-test goals p 482 A85-31000
Flight test of the 4-valve fly-by-wire/fly-by-optics control system p 511 A85-31964
Development of an on-board computer for flight test data analysis p 504 A85-31965
Development flight test of the full authority digital fuel control in the HH-65A helicopter p 506 A85-31966
NASA-FAA helicopter Microwave Landing System curved path flight test p 485 A85-31993
Advanced AFCS developments on the XV-15 tilt rotor research aircraft — Automatic Flight Control System p 512 A85-32013
New airborne systems developed for navaids test and calibration p 488 A85-32489
Development of the F/A-18A automatic carrier landing system p 512 A85-32777
Flight test planning from the bottom up - An alternate approach to flight testing p 571 A85-34262
The role of testing in qualification and certification of aircraft p 571 A85-34263
Test flying the 146 p 571 A85-34581
Aero-optical turbulent boundary layer/shear layer experiment on the KC-135 aircraft revisited p 546 A85-35202
BK 117 for dual pilot IFR operation
[MBB-UD-422-84-OE] p 572 A85-35253
The design, development, and flight testing of a modern-control-designed autoland system p 584 A85-35981
MLS exists - We have tested it p 587 A85-36430
A comparison of several digital map-aided navigation techniques p 642 A85-37829
Evaluation of radionavigation systems p 643 A85-37831
Natural frequencies and flight loads of composite main rotor blade for helicopter p 647 A85-38361

Study on the comfortability of helicopter - Flight test of acoustic noise level p 647 A85-38385

Helicopter flight test of a ring laser gyro Attitude and Heading Reference System p 643 A85-38529

The Command Flight Path Display - All weather, all missions p 656 A85-38959

Dynamic pressure fluctuations in the internozzle region of a twin-jet nacelle
[SAE PAPER 841540] p 627 A85-39064

Results of a wind tunnel/flight test program to compare afterbody/nozzle pressures on a 1/12 scale model and an F-15 aircraft
[SAE PAPER 841543.] p 649 A85-39066

Applications of state estimation in aircraft flight-data analysis p 650 A85-39211

The DFVLR flight-test vehicle ATTAS
[DGLR PAPER 84-093] p 753 A85-40312

Flight test of the gust-alleviation system OLGA
[DGLR PAPER 84-094] p 775 A85-40313

ATR 42 - The definitive configuration certification program begun p 755 A85-40911

MU-300 flight test data system p 762 A85-40977

The status of flutter suppression technology using active controls p 775 A85-40995

Developing an off-line environment for testing real time aerodynamics simulation
[AIAA PAPER 85-1751] p 803 A85-42666

Flight evaluation of longitudinal flying qualities parameters
[AIAA PAPER 85-1789] p 838 A85-43847

A graphical approach to understanding and preventing the phenomenon of aliasing p 858 A85-45041

Satellite orbit determination from an airborne platform p 850 A85-45126

Flight test of a helicopter fly-by-wire/light actuation control system p 842 A85-45155

In-flight evaluation of pure time delays in pitch and roll
[AIAA PAPER 85-1852] p 843 A85-45881

Development of control laws for a flight test maneuver autopilot for an F-15 aircraft
[AIAA PAPER 85-1859] p 843 A85-45888

Flight test evaluation of active ride control system for tactical aircraft
[AIAA PAPER 85-1860] p 843 A85-45889

Qualification needs for advanced integrated aircraft
[AIAA PAPER 85-1865] p 827 A85-45894

Flight evaluation of highly augmented controls and electronic displays for precision approach and landing of powered-lift aircraft
[AIAA PAPER 85-1944] p 827 A85-45934

Identification of pilot dynamics from in-flight tracking data
[AIAA PAPER 85-1945] p 845 A85-45935

Flow Cones for airplane flight test flow visualization p 903 A85-47085

The MCA method of determining thrust of jet aircraft in flight — Mass Consumption-Acceleration p 881 A85-49134

Flight evaluation of an insect contamination protection system for laminar flow wings
[SAE PAPER 850860] p 884 A85-50102

Propulsive efficiency and aircraft drag determined from steady state flight test data
[SAE PAPER 850872] p 885 A85-50107

Flight testing a liquid ice protection system on a single-engine airplane
[SAE PAPER 850923] p 885 A85-50129

Pressure distribution on a swept wing aircraft in flight p 11 N85-10025

Airworthiness and flight characteristics test of the JOH-6A light combat helicopter configured with a wire strike protection system
[AD-A144880] p 20 N85-10038

Airworthiness and Flight Characteristics (A and FC) test of the EH - 1X/EH - 1H helicopter configurations
[AD-A144881] p 20 N85-10039

A preliminary flight evaluation of the peripheral vision display using the NT-33A aircraft
[AD-A145123] p 24 N85-10060

YO-3A acoustics research aircraft systems manual
[NASA-TM-85968] p 37 N85-10074

Nonlinear system identification methodology development based on F-4S flight test data analysis
[AD-A146289] p 105 N85-12053

Flight and wind-tunnel comparisons of the inlet-airframe interaction of the F-15 airplane
[NASA-TP-2374] p 105 N85-12884

Flight tests of the Digital Integrated Automatic Landing System (DIALS)
[NASA-CR-3859] p 116 N85-12900

The DG400 propulsed glider
[CEV/IS/SE/AV/84] p 161 N85-13795

Flight test technique for evaluation of gust load alleviation analysis methodology
[NASA-TM-86344] p 161 N85-14833

Flight test results on stall characteristics of a large jet transport
[NAL-TR-817] p 162 N85-14835

Structural flight load measurement demonstration of structural integrity p 254 N85-15670

Ground-effect analysis of a jet transport airplane
[NASA-TM-85920] p 234 N85-15687

The UH-1H helicopter icing flight test program: An overview
[NASA-TM-86925] p 242 N85-15702

Flight testing of Litton laser gyro strapdown system LTN-90 for general aviation
[DFVLR-MITT-84-16] p 245 N85-15709

Noise measurement flight test: Data-analyses aerospatiale AS-355F TwinStar helicopter
[AD-A147497] p 305 N85-16595

Built-in-test for first line testing p 202 N85-16739

Flight tests with a new helicopter "orce Feel System (FFS) p 257 N85-16818

Development and flight test of a helicopter compact, portable, precision landing system concept p 261 N85-16821

Airworthiness and flight characteristics test of the RC-12D Guardrail V
[AD-A148046] p 258 N85-16864

Preliminary airworthiness evaluation AH-1S (MC) helicopter with external fuel tanks installed
[AD-A148091] p 258 N85-16865

Noise measurement flight test for Boeing Vertol 234/CH 47-d helicopter: Data/analyses
[AD-A148172] p 306 N85-17670

Noise measurement flight test: Data-analyses Aerospatiale AS 350D AStar helicopter
[AD-A148496] p 306 N85-17672

Noise measurement flight test: Data-analyses, Sikorsky S-76A helicopter
[AD-A148525] p 306 N85-17673

Activities at Mil Experimental Design Bureau p 343 N85-18036

Modeling of aircraft performance from flight test results using quasi steady-state test techniques p 343 N85-18047

A comparison of fatigue lives under a complex and a much simplified flight-by-flight testing sequence — Mirage 3 aircraft
[ARL/STRUC-TM-388] p 344 N85-18052

Collision avoidance for Naval training aircraft
[FAA-PM-84-4] p 410 N85-21136

On the application of compatibility checking techniques to dynamic flight test data
[ARL/AERO-R-161] p 416 N85-21151

Technical evaluation report on the FDP Symposium on Flight Test Techniques
[AGARD-AR-208] p 417 N85-21157

Civil avionics flight testing with the RAE(B) BAC1-11 p 504 N85-22354

Guidance and control research flight testing with HFB 320 test aircraft p 514 N85-22355

A flight management algorithm and guidance for fuel-conservative descents in a time-based metered air traffic environment: Development and flight test results p 498 N85-22356

Avionics Flight Evaluation System (AFES) p 505 N85-22357

Improved Y-11 general-purpose transport designated Y-12 p 500 N85-22385

Operational loads measurement: A philosophy and its implementation — aircraft structures
[AD-A149445] p 536 N85-23308

Glider Nimbus 3-24.5. Partial certification test results for importation in the U category
[REPT-CEV/IS/SE/AV/84] p 502 N85-23763

US Army Aviation Engineering Flight Activity (USAAEFA) report bibliography update 1983 - 1984
[AD-A151381] p 541 N85-25168

Trajectory measurements for take-off and landing tests and other short-range applications, volume 16
[AGARD-AG-160-VOL-16] p 604 N85-25801

Navigation and flight director guidance for the NASA/FAA helicopter MLS curved approach flight test program
[NASA-CR-177350] p 569 N85-26691

Planning fuel-conservative descents in an airline environmental using a small programmable calculator: Algorithm development and flight test results
[NASA-TP-2393] p 579 N85-26705

Development and flight test of a helicopter, X-band, portable precision landing system concept
[NASA-TM-86710] p 586 N85-26721

A modern control design methodology with application to the CH-47 helicopter
[AD-A151946] p 587 N85-26723

The effect of load factor on aircraft handling qualities
[AD-A152118] p 587 N85-26724

Some flight test results with redundant digital flight control systems p 589 N85-26739

Flight testing and development of the F/A-18A digital flight control system p 590 N85-26743

OLGA: An open loop gust alleviation p 590 N85-26744

USSR report: Transportation
[JPRS-UTR-84-025] p 641 N85-27841

Test flight of IL-76TD long-range transport variant p 641 N85-27842

A preliminary investigation of handling qualities requirements for helicopter instrument flight during decelerating approach maneuvers and overshoot
[NRC-24173] p 652 N85-27857

Flight trials of a modified gulfstream commander carrying external stores
[AD-A153376] p 653 N85-27859

Parameter identification results of tests in nonsteady symmetric flight with the Hawker Hunter Mk 7
[NLR-TR-83042-U] p 653 N85-27860

The Avionics Flight Evaluation System (AFES) of DFVLR
[DFVLR-MITT-85-01] p 657 N85-27864

In-flight investigation of the influence of pitch damping and pitch control effectiveness on landing approach flying qualities of statically unstable transport aircraft
[DFVLR-FB-84-12] p 676 N85-27880

Some flight test results with redundant digital flight control systems p 678 N85-27892

ACT flight research experience p 678 N85-27894

Flight testing and development of the F/A-18A digital flight control system p 678 N85-27896

OLGA: An open loop gust alleviation system p 678 N85-27897

Flight testing for performance and flying qualities p 654 N85-28920

DC-10 winglet flight evaluation
[NASA-CR-3704] p 760 N85-29949

Design and implementation of input signals for identification of pilot/aircraft models
[ESA-TT-880] p 762 N85-31055

Artificial and natural icing tests YEH-60A quick fix helicopter
[AD-A155147] p 830 N85-32116

Design of an expert-system flight status monitor
[NASA-TM-86739] p 860 N85-32794

Qualification needs for advanced integrated aircraft
[NASA-TM-86731] p 831 N85-33119

Development of a temperature-compensated hot-film anemometer system for boundary-layer transition detection on high-performance aircraft
[NASA-TM-86732] p 835 N85-33121

Development of control laws for a flight test maneuver autopilot for an F-15 aircraft
[NASA-TM-86736] p 847 N85-33122

Flight test experience and controlled impact of a large, four-engine, remotely piloted airplane
[NASA-TM-86738] p 847 N85-33123

The interpretation of flying qualities requirements for flight control system design
[NASA-CR-177942] p 848 N85-33125

Flight testing the fixed-wing configuration of the Rotor Systems Research Aircraft (RSRA)
[NASA-TM-86762] p 886 N85-34135

Determination of instrument errors by compatibility checking: Results from dynamic flight test data
[ARL/AERO-R-162] p 889 N85-34137

A comparison between Falcon data and motor glider data p 914 N85-35547

**FLIGHT TIME**

Extended range operations with two-engine airplanes - A regulatory view
[AIAA PAPER 84-2513] p 89 A85-13579

Improvements in computing flight paths and flight times for air traffic control p 95 A85-15169

Aircraft delay impact on a central terminal hall - A simulation model p 174 A85-16269

Calculation of the minimum-time loop maneuver for jet aircraft p 269 A85-19876

Flight time enhancement on the basis of a cyclically controlled dynamic duration flight p 424 A85-29049

Numerical solution of the minimum-time flight of a glider through a thermal by use of multiple shooting methods p 638 A85-37489

Minimum-time path through wind fields p 647 A85-38358

The extended range operation of twin-engined public transport aircraft. II p 881 A85-49174

The extended range operation of twin-engined public transport aircraft. III p 882 A85-49175

General aviation activity and avionics survey
[AD-A149572] p 384 N85-21103

**FLIGHT TRAINING**

25,000 flight hours in the Alpha jet by the 8th chase squadron. I p 159 A85-18725

Why not have a simulator type for commuter operators? p 897 A85-48856

Advanced flight training offered to corporate aviators p 897 A85-48658
Analysis of on-board CIG (Computer Image Generator) applications for aircrew training
[AD-A145214] p 38 N85-10079
Directions of the West German Ministry of Transport for education and control of airline personnel (section 3, chapters 2 and 12) p 243 N85-16848
Directions of the West German Ministry of Transport for education and control of airline personnel, Report 6: chapters 3/A and 3/B p 244 N85-16849
Flight Training Technology for Regional/Commuter Airline Operations: Regional Airline Association/NASA Workshop Proceedings
[NASA-CP-2348] p 332 N85-18009
Initiative uses of aircraft for flight training p 333 N85-18027
Interactive Graphics Simulator: Design, development and effectiveness/cost evaluation
[AD-A149417] p 376 N85-19712
Inflight IFR procedures simulator
[NASA-CASE-KSC-11218-1] p 429 N85-19990
New flight simulators at Vnukovo permit less in-flight training p 429 N85-21107
Roundtable on effective use of flight simulators p 583 N85-25190
The use of flight simulators in measuring and improving training effectiveness
[AD-A153817] p 684 N85-28954

FLIGHT VEHICLES
A parallel quasi-linearization algorithm for air vehicle trajectory optimization
[AIAA PAPER 85-0498] p 279 A85-19792
Structural and algorithmic aspects of the design of a mathematical-modeling system for problems of ballistics, control, and navigation p 432 A85-28391
Algorithms for diagnosing thermal loads of flight vehicles -- Russian book p 517 A85-31574
Design of flight vehicles and their systems p 854 A85-44832

FLIR DETECTORS
An approach to automatic FLIR video assessment p 182 A85-16630
Portable automatic eye-safe laser and FLIR test set p 440 A85-26810
Some thoughts on the implementation of pilot night vision devices for helicopters p 166 N85-14814
Application of infrared radiometers for airborne detection of clear air turbulence and low level wind shear, airborne infrared low level wind shear detection test
[NASA-CR-175725] p 609 N85-25985

FLOATS
Air carrier overwater emergency equipment and procedures
[PB85-917006] p 620 N85-32105

FLOORS
Full-scale crash-test evaluation of two load-limiting subfloors for general aviation airframes
[NASA-TP-2380] p 129 N85-13267

FLOQUET THEOREM
Application of Floquet theory to helicopter blade flapping stability
[AD-A154460] p 760 N85-29952

FLOW CHARACTERISTICS
Influence of viscosity on aerodynamic sound emission in free space p 132 A85-12880
Turbulence characteristics of the noise producing region of an excited round jet. I - Time-average flow properties
[AIAA PAPER 84-2343] p 133 A85-13962
Wake flow past a plate with spoiler p 140 A85-16147
Some features of two-dimensional turbulent separated flows
[AIAA PAPER 85-0178] p 214 A85-19570
Measurements of water film characteristics on airfoil surfaces from wind-tunnel tests with simulated heavy rain
[AIAA PAPER 85-0259] p 274 A85-19618
The distortion of a supersonic turbulent boundary layer by bulk compression and surface curvature
[AIAA PAPER 85-0299] p 218 A85-19648
Effect of inlet and outlet flow conditions on the flow and performance of subsonic two-dimensional diffuser p 228 A85-20241
Scaling of airfoil self-noise using measured flow parameters p 304 A85-21858
Three-dimensional unsteady flow in an axial flow turbine p 314 A85-23386
Flow parameters in a chamber during the mixing of wakes p 349 A85-23983
An experimental study of the hydraulic characteristics of air flow in the cooling slots of the nozzle guide vanes of gas turbine engines p 350 A85-24001
Analytical modeling of circuit aerodynamics in the new NASA Lewis Altitude Wind Tunnel
[AIAA PAPER 85-0380] p 323 A85-26389
Structure and characteristics of turbulent separated flow in a cavity p 445 A85-29919
Investigations of the influence of taper on the characteristic values of rotating annular turbine cascades in the transonic flow regime p 394 A85-30170
Procedure for the calculation of the characteristics of axial, respectively radial, one or multistage thermal flow machines, taking into consideration also the effect of adjustable guide devices — German thesis p 598 A85-33402
Scale-model tests of airfoils in simulated heavy rain p 548 A85-35590
The separation criteria and flow behavior for three-dimensional steady separated flow p 551 A85-35783
Fuel injection characterization and design methodology to improve lean stability
[AIAA PAPER 85-1183] p 684 A85-39644
Studies on the flow in supersonic axial-flow compressor rotor. VI - A possibility of two-dimensional supersonic section having quasi-axisymmetric flows which satisfy simplified radial equilibrium p 723 A85-41007
Characteristics of a trailing-edge flow with turbulent boundary-layer separation p 872 A85-49366
Vortex-generating coolant-flow-passage design for increased film-cooling effectiveness and surface coverage
[NASA-TP-2388] p 127 N85-12314
Analytical modeling of circuit aerodynamics in the new NASA Lewis wind tunnel
[NASA-TM-86912] p 234 N85-15686
Flow of nitrogen-pressurized Halon 1301 in fire extinguishing systems
[NASA-CR-174271] p 242 N85-15701
Turbulent bouyant flow and pressure variations around a circular cylinder in a cross uniform flow near the ground p 371 N85-18287
Calibration of wind tunnel flow quality p 516 N85-22399
Design of piping for oil drain from turbine bearings p 529 N85-24073
Analysis of selected problems involving vortical flows
[NASA-CR-177347] p 557 N85-25212
Flow past a flat plat with a vortex/sink combination
[JIAA-TR-58] p 558 N85-25215
New flow physical aspects in aerodynamics
[MBB-FE-122/S/PUB/133] p 562 N85-27725
Flow modeling at the base region of missiles
[SNIAS-851-320-101] p 782 N85-31228
Detailed studies of aviation fuel flowability
[NASA-CR-174038] p 788 N85-31308
A comparison of two bench scale tests of fuel low temperature flow properties
[AD-A154477] p 788 N85-31311

FLOW CHARTS
Using flowcharts to map ATLAS route p 456 A85-26831

FLOW COEFFICIENTS
Generation of instability waves in flows separating from smooth surfaces p 3 A85-10352
Effect of the arrangement of apertures on the gain coefficient during asymmetric gas injection into a Laval nozzle p 229 A85-20562
Measurement of the development of the boundary layer in the annulus walls of a fourstage compressor
[CUED/A-TURBO-TR-121] p 52 N85-10299

FLOW DEFLECTION
Aerodynamic sound generation induced by flow over small, cylindrical cavities
[AIAA PAPER 84-2258] p 58 A85-10827
Finite element calculation of potential flow around wings
[ONERA, TP NO. 1984-68] p 7 A85-12603
Aerodynamic visualization techniques
[ONERA, TP NO. 1984-80] p 52 A85-12609
Mass flux boundary conditions in linear theory p 73 A85-12726
A study of separated flow behind two- and three-dimensional bodies exposed to a spherical shock wave p 78 A85-14590
Hypersonic flow past a wing at large angles of attack p 78 A85-14591
Exact solution of compressible potential flow past a body of revolution at zero incidence - Especially for high subsonic flow p 144 A85-18526
Conical flow near external axial corners as a bifurcation problem p 145 A85-18676
A comparison between theoretical and experimental flow fields of an airfoil with deflected spoiler
[AIAA PAPER 85-0269] p 216 A85-19622
Approximate solution of a nonlinear problem of flow past a thin airfoil profile near a support surface p 233 A85-22368
Base pressure of a projectile within the transonic flight regime p 317 A85-25136
General features characterizing separated flows arising in supersonic and hypersonic flows past blunt bodies p 388 A85-28380
Supersonic flow past blunt porous screens p 389 A85-28442
Investigation of the induction of subsonic wind tunnels with an axisymmetric working part p 389 A85-28443
Flow past V-wings with a break in the leading edge p 389 A85-28445
Cavitation models of separated flow of a low-viscosity fluid past wing profiles p 390 A85-29004
An experimental study of pressure fluctuations in flow around a sphere p 460 A85-29005
Equation associated with the theory of local interaction in a rarefied gas p 394 A85-30110
An experimental and numerical study of flow past a wedge of finite width at angles of sideslip p 471 A85-31476
The effect of the Mach number on the aerodynamic characteristics of a deformable body during its nonstationary motion p 472 A85-31491
Nonlinear conical flow — Book p 544 A85-34273
Aerodynamic hysteresis in stationary separated flow past elongated bodies p 552 A85-35881
A system of shock and rarefaction waves in flows past bodies with complex shapes p 610 A85-37330
A numerical investigation of a viscous hypersonic air flow around elongated blunted bodies at large angles of attack p 619 A85-37333
A supersonic inhomogeneous flow of an ideal gas around blunted bodies p 619 A85-37335
Investigation of three-dimensional separated flows p 619 A85-37338
The separation of a turbulent boundary layer within a two-face angle before an obstruction p 619 A85-37340
Simulation of wake passing in a stationary turbine rotor cascade p 629 A85-39589
Refined numerical solution of the transonic flow past a wedge
[AIAA PAPER 85-1593] p 713 A85-40709
Transonic flow calculations around isolated inlet configurations
[AIAA PAPER 85-1596] p 713 A85-40712
Transonic turbulent flow computations for axisymmetric afterbodies
[AIAA PAPER 85-1639] p 715 A85-40741
Computation of unsteady transonic aerodynamics with steady state fixed by truncation error injection
[AIAA PAPER 85-1644] p 715 A85-40744
Unsteady transonic flow over oscillating slender bodies
[AIAA PAPER 85-1709] p 718 A85-40781
Unsteady transonic full potential solutions for airfoils encountering vortices and gusts
[AIAA PAPER 85-1710] p 719 A85-40782
Nonstationary aerodynamic characteristics of a profile in separated flow near an undulated wall p 730 A85-42120
Numerical analysis of turbulent flow past a plate using equations for fluctuations p 794 A85-42121
Boundary layers on oscillating airfoils p 735 A85-42973
Analysis of two-dimensional incompressible flow past airfoils using unsteady Navier-Stokes equations p 735 A85-42975
Hypersonic flow past a wing at large angles of attack with a detached shock wave p 815 A85-44788
Use of titanium tetrachloride for visualization of accelerating flow around airfoils p 903 A85-47090
Some contributions to the modelling of discontinuous flows p 907 A85-48224

FLOW DIRECTION INDICATORS
Photographic surveying of flow speed and direction adjacent to a surface p 441 A85-27846
Determination of corrections to flow direction measurements obtained with a wing-tip mounted sensor
[NASA-CR-174412] p 329 N85-18962
Miniature electrooptical air flow sensor
[NASA-CASE-LAR-13065-1] p 447 N85-20295

FLOW DISTORTION
Calculation of unsteady fan rotor response caused by downstream flow distortions
[AIAA PAPER 84-2282] p 76 A85-13960
Development of artificially induced perturbations in a supersonic boundary layer p 140 A85-16177
An integral aproach to the determination of the asymptotic behavior of supersonic flow p 141 A85-16918
A sensor for detection of unsteady distortion maxima in air intakes
[ONERA, TP NO. 1984-148] p 205 A85-19262
Determination of surging line of two-spool axial flow compressor with cropped fan stages at low speed by use of parallel compressor theory p 264 A85-20242

Effect of the arrangement of apertures on the gain coefficient during asymmetric gas injection into a Laval nozzle p 229 A85-20562
Flowfield analysis of low bypass ratio test cells p 265 A85-21839
Inlet flow distortions in centrifugal fans
[ASME PAPER 84-JPGC-GT-4] p 314 A85-23193
Using the discrete vortex method for calculating potential flow past a high-lift wing in the presence of a screen p 471 A85-31456
Aerodynamics of swept wings of medium and small aspect ratios. I p 473 A85-32517
The Dynamic Data Analyzer (DDA), an aircraft aero-propulsion digital analysis tool
[AIAA PAPER 85-1212] p 779 A85-40821
Example of transonic gas flow past an asymmetric profile p 814 A85-44130
On vortex bursting
[NASA-TM-77587] p 9 N85-10008
Experimental and analytical investigation of fan flow interaction with downstream struts
[NASA-CR-175756] p 556 N85-25201
FLOW DISTRIBUTION
Method for calculating separated subsonic gas flow past wings p 2 A85-10114
Experimental research in Poland on turbulence and high-speed aerodynamics p 3 A85-10322
Unsteady loading of leading-edges in unstable flows - An overview
[AIAA PAPER 84-2306] p 4 A85-10857
Flow field and acoustics of two-dimensional transonic blade-vortex interactions
[AIAA PAPER 84-2309] p 51 A85-10860
Mechanism of broadband jet noise amplification and suppression under controlled excitation
[AIAA PAPER 84-2319] p 61 A85-10866
Influence of viscosity on the vortex sound
[AIAA PAPER 84-2339] p 62 A85-10880
The rule of forbidden signals and apparent Mach number in transonic compressor cascades p 5 A85-11632
Analysis of the flow field in an engine inlet particle separator p 5 A85-11633
Lifting rotor analysis at subsonic and transonic flow p 75 A85-13869
Numerical simulation of the transonic flowfield for wing/nacelle configurations
[AIAA PAPER 84-2430] p 76 A85-13964
Flow over double-delta wing and wing body at high alpha p 144 A85-18516
Economical influence function calibrations using the distributed loads code — for prediction of store loads in aircraft interference flowfield
[AD-A158490] p 158 A85-18518
An analysis of the flow past an S-shaped rotor by discrete vortex model p 206 A85-19405
An experimental investigation of stator/rotor interaction influence on multistage compressor rotor flow
[AIAA PAPER 85-0009] p 206 A85-19455
Aerodynamics of an airfoil in ground effect with a jet issuing from its undersurface
[AIAA PAPER 85-0019] p 207 A85-19461
Turbulent flow around a wing-fuselage type juncture
[AIAA PAPER 85-0040] p 208 A85-19475
Variable-temperature water tunnel for high Reynolds numbers
[AIAA PAPER 85-0051] p 273 A85-19483
Three-dimensional Euler solutions with grid embedding
[AIAA PAPER 85-0121] p 211 A85-19532
Interrelated effects of pitch rate and pivot point on airfoil dynamic stall
[AIAA PAPER 85-0130] p 212 A85-19541
Three-dimensionality in unsteady flow about a wing
[AIAA PAPER 85-0132] p 212 A85-19543
Numerical computation of viscous flowfields about multiple component airfoils
[AIAA PAPER 85-0167] p 213 A85-19563
Generalized adaptive-wall wind tunnels
[AIAA PAPER 85-0225] p 274 A85-19601
Improvements in low Reynolds number testing in the NSWC hypervelocity wind tunnel No. 9
[AIAA PAPER 85-0226] p 274 A85-19602
Application of axisymmetric analogue for calculating heating in three-dimensional flows
[AIAA PAPER 85-0245] p 216 A85-19611
A comparison between theoretical and experimental flow fields of an airfoil with deflected spoiler
[AIAA PAPER 85-0269] p 216 A85-19622
Euler calculations for multielement airfoils using Cartesian grids
[AIAA PAPER 85-0291] p 218 A85-19641
Recent advances in computational transonic aerodynamics
[AIAA PAPER 85-0366] p 221 A85-19699
Body flow field simulation and force/moment prediction at transonic speeds
[AIAA PAPER 85-0423] p 222 A85-19736
Numerical optimization design of advanced transonic wing configurations
[AIAA PAPER 85-0424] p 248 A85-19739
Computational aerodynamic design of the Gulfstream IV wing
[AIAA PAPER 85-0427] p 223 A85-19742
A stream function relaxation method for solving transonic S1 stream surface with respect to non-orthogonal curvilinear coordinates p 228 A85-20240
Hypersonic chemically nonequilibrium viscous shock layer on wings with a catalytic surface p 229 A85-20561
Application of digital interferogram evaluation techniques to the measurement of three-dimensional flow fields
[AIAA PAPER 85-0037] p 286 A85-20852
Drag prediction for projectiles and finned bodies in incompressible flow
[AIAA PAPER 85-0104] p 230 A85-20854
A numerical simulation of the NFAC (National Full-scale Aerodynamics Complex) open-return wind tunnel inlet flow
[AIAA PAPER 85-0437] p 230 A85-20869
Real-gas flowfields about three-dimensional configurations p 231 A85-21830
Shock-fitting solution of the supersonic flowfield in a rounded internal corner p 232 A85-21856
Flowfield scaling in sharp fin-induced shock wave/turbulent boundary-layer interaction p 232 A85-21857
The problem of gradual opening in wave rotor passages p 365 A85-23387
Determination of the angles of flow incident on the rotating cascade of a reversing device p 366 A85-24002
Laser-three-slice (L3S) velocimeter and applications in aerodynamics flow field measurements p 368 A85-25224
Flow field studies on a biconic model in high enthalpy non-equilibrium flow p 320 A85-25480
Flow fields near bodies placed in rarefied subsonic and supersonic jets p 322 A85-26016
Experimental study of flows in a two-dimensional inlet model p 386 A85-27092
Streamtube expansion effects on the Dameus wind turbine p 451 A85-27098
Aerodynamic characteristics and flow patterns for a number of bluff bodies in subsonic gas flow p 389 A85-28389
A comparison of different calculation methods for axisymmetric fields in convergent-divergent nozzles p 390 A85-29047
Numerical study of a ramjet dump combustor flowfield p 392 A85-29093
Flowfield investigation of a supercruise fighter model p 392 A85-29256
Effects of an S-inlet on the flow in a dump combustor p 392 A85-29323
Spurious entropy production and very accurate solutions to the Euler equations p 471 A85-30996
Computation of hydraulic losses in a plane profile cascade p 525 A85-32503
Viscous shock-layer flowfield analysis by an explicit-implicit method p 474 A85-32612
Experimental investigation of a simulated compressor airfoil trailing-edge flowfield p 474 A85-32618
Acoustic shocks in a variable area duct containing near sonic flows p 474 A85-32632
Assessment of three-dimensional inviscid codes and loss calculations for turbine aerodynamic computations
[ASME PAPER 84-GT-187] p 475 A85-32961
A mixed finite difference analysis of the internal and external transonic flow fields of inlets with centerbody p 548 A85-35743
An implicit technique for computation of base flowfield p 551 A85-35778
The finite element formulation of airflow around a deformable wing by using the incremental finite element method p 621 A85-37879
Flow-field matrix solution for flow along arbitrarily twisted S1 surface employing non-orthogonal curvilinear coordinates p 622 A85-37927
The computation of transonic nozzle flow-field by a time-dependent method p 625 A85-38963
Estimation of hot gas reingestion for a VTOL aircraft at the conceptual design stage
[SAE PAPER 841555] p 663 A85-39207
Modelling vortex flowfields by supercomputers with super-size memory p 628 A85-39242
Similarity properties in the problem of flow from a supersonic source past a spherical bluntness p 629 A85-39445
Calculation of the flow in a dump combustor
[AIAA PAPER 85-1309] p 668 A85-39716
Numerical investigation of internal high-speed viscous flows using a parabolic technique
[AIAA PAPER 85-1409] p 632 A85-39768
Flowfield and performance measurements in a vaned radial diffuser
[ASME PAPER 84-WA/FM-7] p 634 A85-39876
Measurement and prediction of model-rotor flow fields
[AIAA PAPER 85-1558] p 710 A85-40683
Aerodynamics of two-dimensional blade-vortex interaction
[AIAA PAPER 85-1560] p 710 A85-40685
An investigation of film cooling on a hypersonic vehicle using a PNS flow analysis code
[AIAA PAPER 85-1591] p 712 A85-40707
Comparison of experiment and computation for a missile base region flowfield with a centered propulsive jet
[AIAA PAPER 85-1618] p 714 A85-40725
Boundary layer effects on the flowfield about flow-through nacelles
[AIAA PAPER 85-1623] p 714 A85-40729
Numerical solution of transonic wing flows using an Euler/Navier-Stokes zonal approach
[AIAA PAPER 85-1640] p 715 A85-40742
Inviscid flow field analysis of maneuvering hypersonic vehicles using the SCM formulation and parabolic grid generation — Split-Coefficient Matrix
[AIAA PAPER 85-1682] p 716 A85-40767
Time-dependent Navier-Stokes computations of separated flows over airfoils
[AIAA PAPER 85-1684] p 717 A85-40769
Computational study of unsteady compressible flow around an airfoil by a block pentadiagnoal matrix scheme
[AIAA PAPER 85-1692] p 718 A85-40774
Simulation of wing, fuselage, and wing/fuselage flowfields using a three-dimensional Euler/Navier-Stokes algorithm
[AIAA PAPER 85-1693] p 718 A85-40775
Simulation of Nacelle-afterbody/exhaust-jet flowfields using a three-dimensional Navier-Stokes algorithm
[AIAA PAPER 85-1283] p 720 A85-40829
Navier-Stokes solution of the flow field around a complete aircraft
[AIAA PAPER 85-1509] p 721 A85-40944
Inviscid hypersonic flow around a conical flat-top wing-body combination p 723 A85-41011
A numerical method for duct flow with boundary layer separation
[AIAA PAPER 85-1410] p 726 A85-41422
Numerical computation of hypersonic laminar near-wake flow via Navier-Stokes solver
[AIAA PAPER 85-1672] p 731 A85-42673
Studies of the flow field near an NACA 4412 aerofoil at nearly maximum lift p 736 A85-42978
Computation of three-dimensional shock-wave/turbulent boundary-layer interaction flows p 736 A85-42980
Application of the method of quasi-continuous vorticity distribution over the skeleton surface for aeroplane wing design p 738 A85-43053
Inviscid analysis of advanced turboprop propeller flow fields
[AIAA PAPER 85-1263] p 814 A85-43977
Modeling of turbulent flowfields through a cascade of airfoils at stall conditions p 816 A85-45716
A computational study of complex three-dimensional compressible turbulent flowfields p 869 A85-48526
Calculation of three-dimensional flowfields by the unsteady method of characteristics p 869 A85-48532
Inviscid and viscous flows in cascades with an explicit multiple-grid algorithm p 869 A85-48539
A wind tunnel inlet flow simulation p 871 A85-49141
Variational principle families for hybrid problems of blade-to-blade flow along axisymmetric stream-sheet - A unified variable-domain approach p 872 A85-49703
On rolling resonance and small asymmetrical aerodynamic force of re-entry body p 873 A85-49708
Computational methods for complex flowfields
[AD-A145219] p 11 N85-10019
Measurement of the development of the boundary layer in the annulus walls of a fourstage compressor
[CUED/A-TURBO-TR-121] p 52 N85-10299
Experimental trim drag values and flow-field measurements for a wide-body transport model with conventional and supercritical wings
[NASA-TP-2071] p 12 N85-10920
Hot section laser anemometry p 30 N85-10962
Jet array impingement flow distributions and heat transfer characteristics: Effects of initial crossflow and nonuniform array geometry p 30 N85-10967
Energy efficient engine high pressure turbine test hardware detailed design report
[NASA-CR-167955] p 34 N85-10995
Problem of reduction to ideal wind tunnel in experimental aerodynamics p 13 N85-11702

Wind Tunnel Wall Interference Assessment and Correction, 1983
[NASA-CP-2319] p 82 N85-12011

Wall interference measurements for three-dimensional models in transonic wind tunnels: Experimental difficulties p 82 N85-12012

Survey of ONERA activities on adaptive-wall applications and computation of residual corrections
p 82 N85-12013

Investigations of flow field perturbations induced on slotted transonic-tunnel walls p 83 N85-12018

Interaction between an airfoil and a streamwise vortex
[AD-A145823] p 86 N85-12041

An inviscid computational method for supersonic inlets
[AD-A145997] p 86 N85-12042

A study of flow past an airfoil with a jet issuing from its lower surface
[NASA-CR-166610] p 86 N85-12860

Development of computational fluid dynamics at NASA Ames Research Center
[NASA-TM-86021] p 87 N85-12866

The preliminary checkout, evaluation and calibration of a 3-component force measurement system for calibrating propulsion simulators for wind tunnel models
[NASA-CR-174113] p 118 N85-12903

Effect of two inner-ring oil-flow distribution schemes on the operating characteristics of a 35 millimeter bore ball bearing to 2.5 million DN
[NASA-TP-2404] p 129 N85-13233

Experimental studies of transonic airfoil trailing edge and wake flowfield properties p 146 N85-13773

A three-dimensional axisymmetric calculation procedure for turbulent flows in a radial vaneless diffuser
[NASA-TM-86903] p 147 N85-14798

An exploratory study of finite difference grids for transonic unsteady aerodynamics
[NASA-TM-84583] p 235 N85-15896

Analysis of the flow field about a T-45 using PANAIR
[AD-A146811] p 236 N85-15899

Aero-optics experimental techniques
[AD-A146755] p 294 N85-16067

Contamination and distortion of steady flow field induced by discrete frequency in aircraft gas turbines
[AD-A147092] p 294 N85-16073

Calculation of the velocity field generated by a helicopter main and tail rotors in hover
[AD-A147731] p 239 N85-16833

Genesis of unsteady separation
[AD-P004173] p 370 N85-17958

Corrections for attached sidewall boundary-layer effects in 2-dimensional airfoil testing
[NASA-CR-3873] p 326 N85-17997

Effect of jet exit vanes on flow pulsations in an open-jet wind tunnel
[NASA-TM-86299] p 326 N85-17999

Theory of wing rock p 357 N85-18064

Flow quality of NAL 2-dimensional transonic wind tunnel. Part 2: Extensive and systematic pressure fluctuations study in the settling chamber, test section and second throat of the NAL 2-D transonic wind tunnel
[NAL-TR-836-PT2] p 360 N85-18066

Analysis of sudden expansion flow in a two-dimensional duct with and without side-wall injection using the k-epsilon turbulence model p 371 N85-18282

The boundary layer on compressor cascade blades
[NASA-CR-174369] p 372 N85-18292

Aerodynamic improvements by discrete wing tip jets
[AD-A148981] p 330 N85-18964

Optimization of a ground coupled heat pump
[DE85-000273] p 374 N85-19380

A mixed finite difference analysis of the internal and external transonic flow fields of inlets with centerbody
p 446 N85-20192

Reconstruction of a 3-dimensional transonic rotor flow field from holographic interferogram data
[NASA-TM-86690] p 397 N85-21112

An investigation of turbulence mechanisms in V/STOL upwash flow fields
[AD-A149786] p 398 N85-21123

Unsteady flows around 3-dimensional wings
[AD-A149993] p 399 N85-21124

Aerodynamic behavior of ventilated wind tunnel walls
p 476 N85-22363

On the solution of the three-dimensional flowfield about a flow-through nacelle
[NASA-TM-87448] p 477 N85-22371

Estimating unsteady aerodynamic forces on a cascade in a three-dimensional turbulence field
[NASA-TM-86701] p 478 N85-23704

Measurements in the flow field of a cylinder with a laser transit anemometer and a drag rake in the Langley 0.3 m transonic cryogenic tunnel
[NASA-TM-86399] p 531 N85-24270

A new implicit plus minus splitting method for the solution of the Euler equations in the transonic flow regime
p 556 N85-25200

Flow over a biconic configuration with an afterbody compression flap
[AD-A151882] p 603 N85-25778

Navier-Stokes solution of hypersonic blunt-nosed body flowfields p 558 N85-26624

The role of computational fluid dynamics in aeronautical engineering p 605 N85-26629

A method for simulating 3-D aircraft flow fields with jet plume effects
[NASA-CR-175802] p 559 N85-26664

Application of CFD techniques toward the validation of nonlinear aerodynamic models
[NASA-TM-86715] p 560 N85-26671

Static and dynamic pressure measurements on a NACA 0012 airfoil in the Ames High Reynolds Number Facility
[NASA-TP-2485] p 634 N85-27823

User's manual for airfoil flow field computer code SRAIR
[NASA-CR-172585] p 634 N85-27825

Predictions and measurements of isothermal flowfields in axisymmetric combustor geometries
[NASA-CR-174916] p 671 N85-27867

The gust simulation apparatus of the 3m x 3m low speed wind tunnel of the DFVLR in Goettingen, West Germany
[DFVLR-FB-85-04] p 684 N85-27920

Unsteady flow in multistage turbines
p 696 N85-27946

Proceedings of the 9th US Air Force and the Federal Republic of Germany Data Exchange Agreement Meeting. Viscous and Interacting Flow Field Effects
[AD-A153020] p 699 N85-28286

Additional flow field studies of the GA(W)-1 airfoil with 30-percent chord Fowler flap including slot-gap variations and cove shape modifications
[NASA-CR-3687] p 739 N85-29919

Vapor-screen technique for flow visualization in the Langley Unitary Plan Wind Tunnel
[NASA-TM-86384] p 740 N85-29929

Turbine blade-tip clearance excitation forces
[NASA-CR-171534] p 773 N85-29963

SANDRAG: A computer code for predicting drag of bodies of revolution at zero angle of attack in incompressible flow
[DE85-011170] p 804 N85-30684

A theory of quasi-conical solutions of noninteger degree — flow fields on supersonic wings
[UTH-LR-420] p 744 N85-31024

Calculation of steady and unsteady airfoil flow fields via the Navier-Stokes equations
[NASA-CR-3899] p 818 N85-33105

A three-dimensional viscous flow analysis for the helicopter tip vortex generation problem
[NASA-CR-3906] p 874 N85-34114

A comparison of laser Doppler anemometry and probe measurements within the boundary layer of an airfoil at subsonic flow
[ISL-CO-219/84] p 875 N85-34127

Calculation of compressible flow about three-dimensional inlets with auxiliary inlets, slats and vanes by means of a panel method
[NASA-CR-174975] p 876 N85-35162

**FLOW EQUATIONS**

Exact solutions of singular equations for viscous transonic flows p 142 A85-16939

Computation of flow around wings based on the Euler equations p 142 A85-18066

Transonic solutions for a multielement airfoil using the full-potential equations p 144 A85-18512

Breakdown of the conservative potential equation — for study of transonic flow
[AIAA PAPER 85-0367] p 221 A85-19700

A subdomain finite element method for solving the conservative full potential equation for transonic profile flows — German thesis p 227 A85-19854

Numerical solutions for transonic stream equations of flow along S1 relative stream surface employing non-orthogonal curvilinear coordinates and corresponding velocity components p 315 A85-24093

Spectral multigrid methods with applications to transonic potential flow p 316 A85-24448

Computer-aided analysis of the convergence to steady state of discrete approximations to the Euler equations
p 316 A85-24449

On the use of parametric differentiation to predict weak shock waves p 319 A85-25465

Entropy condition satisfying approximations for the full potential equation of transonic flow p 385 A85-26916

Monotone switches in implicit algorithms for potential equations applied to transonic flows
p 391 A85-29078

Newton-like minimal residual methods applied to transonic flow calculations p 458 A85-29081

Automatic adaptive grid refinement for the Euler equations p 391 A85-29087

A new stream function formulation for the steady Euler equations p 474 A85-32609

Application of the single-cycle optimization approach to aerodynamic design p 548 A85-35586

Example of transonic gas flow past an asymmetric profile p 814 A85-44130

Numerical approach for the aerodynamic analysis of airfoils with laminar separation
[NASA-CR-172496] p 326 N85-18001

Calculation of harmonic aerodynamic forces of aerofoils and wings from the Euler equations p 554 N85-25177

Mathematical modeling of the AEDC (Arnold Engineering Development Center) propulsion wind tunnel (16T)
[AD-A151293] p 593 N85-25275

**FLOW GEOMETRY**

Passive control of jets with indeterminate origins
[AIAA PAPER 84-2299] p 4 A85-10852

The influence of a spoiler on the development of a highly curved turbulent wall jet p 123 A85-14348

Measurements in a turbulent rectangular free jet
p 77 A85-14355

On a forced elliptic jet p 78 A85-14357

Calculation of streamlines from wall pressures on a fusiform body p 79 A85-14894

Conical flow near external axial corners as a bifurcation problem p 145 A85-18676

The effect of phase-difference on the spreading rate of a laminar circular jet under bi-modal excitation
[AIAA PAPER 85-0045] p 208 A85-19479

The distortion of a supersonic turbulent boundary layer by bulk compression and surface curvature
[AIAA PAPER 85-0299] p 218 A85-19648

Complete three-dimensional flow solution of a cascade incorporating splitter vanes of arbitrary geometry
p 228 A85-20230

Flow behind an attached shock wave in a radiating gas p 233 A85-22308

The effectiveness of the initial twist of the air in the blade cooling systems of gas turbines
p 349 A85-23979

Shaped optimization of the subsonic profiles of axial-flow turbine cascades p 315 A85-24028

Flow control in a diffusing S-Duct
[AIAA PAPER 85-0524] p 321 A85-25928

Fluid motion in the regions of abrupt expansion of the channels of rotor-cooling systems of energy-converting machines p 442 A85-28473

In-flight flow visualization - A fluid approach
p 414 A85-28644

Structure and characteristics of turbulent separated flow in a cavity p 445 A85-29919

Modelling turbulent recirculating flows in complex geometries p 445 A85-29967

Interaction of twin turbulent circular jet
p 617 A85-37049

A supersonic inhomogeneous flow of an ideal gas around blunted bodies p 619 A85-37335

Gas flow in nozzles and jets p 619 A85-37337

Investigation of three-dimensional separated flows
p 619 A85-37338

A study of the critical flow rate through cascades of thin slightly bent airfoils using the large-particle method
p 624 A85-38562

Dynamic overshoot of the static stall angle
p 628 A85-39225

A computational study of the unsteady shock-wave structure in a two-dimensional transonic rotor
p 629 A85-39578

Numerical calculation of subsonic jets in crossflow with reduced numerical diffusion
[AIAA PAPER 85-1441] p 697 A85-39780

Transonic flow calculations around isolated inlet configurations
[AIAA PAPER 85-1596] p 713 A85-40712

Experimental and numerical investigation of supersonic flow through a square duct
[AIAA PAPER 85-1622] p 714 A85-40728

Adaptive mesh solution for supersonic conical flow in a rectilinear inlet
[AIAA PAPER 85-1626] p 714 A85-40732

Measurements of turbulent correlations in supersonic flows with longitudinal surface curvature
[AIAA PAPER 85-1656] p 715 A85-40754

External compression inlet predictions using an implicit, upwind, multiple zone approach
[AIAA PAPER 85-1521] p 722 A85-40966

Flow structure capturing on overset patched meshes
[AIAA PAPER 85-1690] p 731 A85-42690

Finite-volume scheme for transonic potential flow about airfoils and bodies in an arbitrarily-shaped channel
p 734 A85-42967

The use of flow visualization for vortex trajectory mapping p 867 A85-47132

Approximate calculation of flow field in an inlet with arbitrary cross sections and curved axis
p 872 A85-49652

An improved computer model for prediction of axial gas turbine performance losses
[NASA-CR-174246] p 265 N85-15724

Numerical calculation of subsonic jets in crossflow with reduced numerical diffusion
[NASA-TM-87003] p 581 N85-25263

Computational aerodynamics in designing aircraft
p 576 N85-26622

**FLOW MEASUREMENT**

Airfoil trailing edge flow measurements and comparison with theory, incorporating open wind tunnel corrections
[AIAA PAPER 84-2266] p 4 A85-10831

Experimental investigation of the sweep effects on a helicopter blade tip
[ONERA, TP NO. 1984-81] p 7 A85-12610

Certain features characterizing the development of coherent flow structures in the initial region of three-dimensional turbulent jets p 76 A85-13795

Turbulence characteristics of the noise producing region of an excited round jet. II - Large scale structure characteristics
[AIAA PAPER 84-2342] p 133 A85-13961

Reynolds-stress measurements in a turbulent trailing vortex p 77 A85-14244

The influence of a spoiler on the development of a highly curved turbulent wall jet p 123 A85-14348

Measurements in a turbulent rectangular free jet
p 77 A85-14355

On a forced elliptic jet p 78 A85-14357

The influence of leading-edge load alleviation on supersonic wing design p 144 A85-18515

Examining the validity of a combustor flow model with LDV
[AIAA PAPER 85-0055] p 209 A85-19487

Detailed measurements of the flowfield in the vicinity of an airfoil with glaze ice
[AIAA PAPER 85-0409] p 222 A85-19730

An experimental investigation of the mixing of co-annular swirling flows
[AIAA PAPER 85-0186] p 230 A85-20862

Investigations of the longitudinal flow in corner configurations in the hypersonic regime. II - Corners between swept wedges p 232 A85-22146

Unsteady flow at the outlet of the high specific speed centrifugal compressor impeller
[ASME PAPER 84-JPGC-GT-10] p 365 A85-23194

Measurements of density and velocity profiles in non-equilibrium laminar hypersonic boundary layers in air
p 320 A85-25463

Flow control in a diffusing S-Duct
[AIAA PAPER 85-0524] p 321 A85-25928

Rotating stall cells in a low-speed axial flow compressor p 385 A85-26753

Rotor wake measurements for a rotor in forward flight
[ONERA, TP NO. 1985-12] p 387 A85-27891

Structure and characteristics of turbulent separated flow in a cavity p 445 A85-29919

Mean velocity and static pressure distributions in a three-dimensional turbulent free jet p 546 A85-35155

An experimental investigation of the aerodynamics of nozzle flow in a rectangular passage
p 547 A85-35500

An experimental study of the behavior of 3D-turbulent boundary layer in and out of the separation region at wing-plate junction p 551 A85-35787

A study of the critical flow rate through cascades of thin slightly bent airfoils using the large-particle method
p 624 A85-38562

Measurement and prediction of model-rotor flow fields
[AIAA PAPER 85-1558] p 710 A85-40683

An experimental study of three-dimensional shock wave/turbulent boundary layer interactions in a supersonic flow
[AIAA PAPER 85-1566] p 711 A85-40691

Experimental and numerical investigation of supersonic flow through a square duct
[AIAA PAPER 85-1622] p 714 A85-40728

Juncture flow measurements using laser velocimetry
[AIAA PAPER 85-1612] p 719 A85-40804

Fan and compressor technology p 724 A85-41026

Measurement of the three-dimensional unsteady flow inside a rotor blade passage of an axial-flow fan
p 729 A85-41827

Development of high specific speed centrifugal compressors for turbochargers p 793 A85-41831

Measurement of the radial flow along a low speed compressor blading during unstalled and stalled operation p 729 A85-41834

Unsteady airfoil boundary layers - Experiment and computation p 735 A85-42972

Experimental study on the behavior of three-dimensional turbulent boundary layer induced by a straight wing erected on a flat plate p 738 A85-43227

Experimental study on air jet vortex generator
p 738 A85-43234

On the accuracy of boundary layer measurements in cascades at high subsonic speeds p 867 A85-47163

Comparison of a computed transonic flow and interferometric measurements around the leading edge of a two dimensional aerofoil asymmetrically mounted in a wind tunnel p 868 A85-47164

Experimental results on edge-tone oscillations in high-speed subsonic jets p 916 A85-48527

Experimental method for the study of corner flows
[AAAF PAPER NT 84-06] p 870 A85-48968

Laser velocimeter measurements of the flow fields around single- and counter-rotation propeller models
[SAE PAPER 850870] p 873 A85-50105

Pressure distribution on a swept wing aircraft in flight
p 11 N85-10025

Measurement of the development of the boundary layer in the annulus walls of a fourstage compressor
[CUED/A-TURBO-TR-121] p 52 N85-10299

Turbulence measurement interferometer apparatus
[AD-D011377] p 295 N85-16156

Experimental study of aerodynamic shielding of turbojet engine air intake against exhaust gases
p 355 N85-18210

Miniature electrooptical air flow sensor
[NASA-CASE-LAR-13065-1] p 447 N85-20295

Experimental and analytical investigation of fan flow interaction with downstream struts
[NASA-CR-175756] p 556 N85-25201

**FLOW REGULATORS**

A cryogenic high-Reynolds number transonic wind tunnel with pre-cooled and restricted flow p 592 A85-35752

Development of an active laminar flow nacelle
[AIAA PAPER 85-1116] p 629 A85-39613

Research and development for semi-spherical inflow control device
[NAL-TR-833] p 353 N85-18056

**FLOW RESISTANCE**

Unsteady turbulent boundary layers and friction; Proceedings of the Energy Sources Technology Conference, New Orleans, LA, February 12-15, 1984
p 46 A85-11626

An experimental study of the hydraulic characteristics of air flow in the cooling slots of the nozzle guide vanes of gas turbine engines p 350 A85-24001

An analysis of the resistance of two disks in turbulent flow of an incompressible fluid p 390 A85-28468

**FLOW STABILITY**

Supersonic flow past a blunt wedge p 2 A85-10113

Flow stability in the wake of a three-dimensional body
p 2 A85-10116

Generation of instability waves in flows separating from smooth surfaces p 3 A85-10352

A note on the instability of columnar vortices
p 46 A85-10380

Instability and transition in supersonic boundary layers
p 5 A85-11625

Wavelength selection and growth of Goertler vortices
p 73 A85-12703

Free perturbations of a laminar hypersonic flow behind an airfoil p 141 A85-16218

The effect of phase-difference on the spreading rate of a laminar circular jet under bi-modal excitation
[AIAA PAPER 85-0045] p 208 A85-19479

Investigation of nonlinear effects in the instabilities and noise radiation of supersonic jets
[AIAA PAPER 85-0081] p 304 A85-19507

Survey on jet instability theory p 227 A85-20074

Experiments on the stability of crossflow vortices in swept-wing flows
[AIAA PAPER 85-0493] p 231 A85-20873

Modes of shock-wave oscillations on spike-tipped bodies p 232 A85-21855

Lock-on and instability in a flat plate wake
[AIAA PAPER 85-0571] p 322 A85-25952

Stability experiments in the flow over a rotating disk
p 444 A85-29091

The effect of the Mach number on the aerodynamic characteristics of a deformable body during its nonstationary motion p 472 A85-31491

Unsteady flow about a Joukowski airfoil in the presence of moving vortices p 473 A85-32603

Some problems in discrete vortex numerical modelling on vortex motion behind a circular cylinder
p 550 A85-35786

The stability of symmetrical vortices in the wake of elliptical cylinders in confined flow p 618 A85-37194

Interaction between acoustics and subsonic ducted flow in a ramjet configuration p 704 A85-37209

A nonstationary transition process caused by injection of a gas into the near wake of a body in a supersonic flow p 619 A85-37336

Determination of aerodynamic characteristics of bodies in weakly perturbed gas flows p 619 A85-37341

Local instability characteristics and frequency determination of self-excited wake flows
p 623 A85-38430

Instability of plane-parallel supersonic gas flows in the linear approximation p 623 A85-38551

Stability of the thin-jet model of the unsteady jet flap
p 626 A85-38997

A summary of an AGARD assessment of testing techniques for aircraft afterbody flows
[AIAA PAPER 85-1465] p 779 A85-40844

Some contributions to the modelling of discontinuous flows p 907 A85-48224

Flow instabilities in transonic small-disturbance theory
p 869 A85-48531

On vortex bursting
[NASA-TM-77587] p 9 N85-10008

Experiences with nonsynchronous forced vibration in centrifugal compressors p 187 N85-14119

Preliminary investigation of labyrinth packing pressure drops at onset of swirl-induced rotor instability
p 187 N85-14132

Flow instabilities in transonic small disturbance theory
[NASA-TM-86251] p 326 N85-18000

**FLOW THEORY**

The conditions of physical validity for a supersonic flow around a conical obstacle with a small aperture
p 3 A85-10413

Periodic internal flows — in gas turbines
p 5 A85-11643

Method of fundamental solutions - A novel theory of lifting surface in a subsonic flow p 79 A85-15077

A theory for a three-dimensional hypersonic viscous shock layer in the vicinity of a plane of symmetry
p 141 A85-16217

A theory for the core of a three-dimensional leading-edge vortex
[AIAA PAPER 85-0108] p 210 A85-19524

The full-approximation method in the theory of transonic flows p 233 A85-22367

Theoretical principles of turbulence and a simple example of turbulent flow p 460 A85-26742

Cryptosteady modes of energy exchange
p 439 A85-26769

Theory of hypersonic jets p 389 A85-28394

Transonic shock interaction with a tangentially injected turbulent boundary layer p 548 A85-35584

Nonlinear waves theories in vortex flow
p 550 A85-35767

On the modelling of a fully-relaxed propeller slipstream
[AIAA PAPER 85-1262] p 630 A85-39685

A numerical method for second order thin airfoil theory p 815 A85-44626

Contribution to theory of similitude of subsonic flow
p 868 A85-48189

Supplements to 'Theory of secondary flow in cascades' p 869 A85-48874

Computational aerodynamics in designing aircraft
p 576 N85-26622

Conical stagnation points in the flow around an external corner — delta wings
[VTH-LR-396] p 561 N85-26680

New flow physical aspects in aerodynamics
[MBB-FE-122/S/PUB/133] p 562 N85-27725

**FLOW VELOCITY**

A comparison of triple-moment temperature-velocity correlations in the asymmetric heated jet with alternative closure models p 124 A85-14378

An experimental investigation of an airfoil undergoing large amplitude pitching motions
[AIAA PAPER 85-0039] p 207 A85-19474

A Fourier Transform method for calculating velocity profiles on airfoils
[AIAA PAPER 85-0208] p 215 A85-19592

Survey on jet instability theory p 227 A85-20074

A fast algorithm for solving the conservative transonic S1 full potential equation employing non-orthogonal curvilinear coordinates and non-orthogonal velocity components p 228 A85-20239

The universal nature of zero-crossing time and velocity scales in turbulent shear flows p 232 A85-21851

Optimal control of flow of a viscous incompressible fluid p 290 A85-22105

Numerical solutions for transonic stream equations of flow along S1 relative stream surface employing non-orthogonal curvilinear coordinates and corresponding velocity components p 315 A85-24093

Study of a bounded jet flow considering the initial turbulence - Experiments with a nozzle having aspect ratio of 3 p 367 A85-24565

Photographic surveying of flow speed and direction adjacent to a surface p 441 A85-27646

Measurements of a zero-pressure-gradient boundary layer blown by an asymmetric jet p 390 A85-29077

Noise testing of an advanced design propeller in the Boeing anechoic test chamber with a relative velocity free jet
[AIAA PAPER 84-2262] p 421 A85-30193

An integral method for calculating the effects on turbulent boundary-layer development of sweep and taper p 470 A85-30994
Mean velocity and static pressure distributions in a three-dimensional turbulent free jet p 546 A85-35155
An experimental investigation of the aerodynamics of nozzle flow in a rectangular passage
p 547 A85-35500
Density and velocity profiles in non-equilibrium laminar boundary layers in air
[AIAA PAPER 85-0976] p 620 A85-37626
Experiment of turbulent round jet parallel to ground plane p 622 A85-38367
Velocity characteristics of the wakes of in-cylinder projectiles
[AIAA PAPER 85-1676] p 716 A85-40794
Finite element methods for high speed flows
[AIAA PAPER 85-1533] p 791 A85-40963
A comment on controlled diffusion airfoil
p 723 A85-40996
Velocity measurements in the near wake of a hovering rotor
[AIAA PAPER 85-1675] p 725 A85-41408
Slip Factor dependence on flow coefficient in centrifugal compressors p 793 A85-41823
An experimental investigation of an airfoil undergoing large-amplitude pitching motions p 730 A85-42351
Advanced design propeller noise testing in an anechoic chamber p 836 A85-45889
Use of titanium tetrachloride for visualization of accelerating flow around airfoils p 903 A85-47090
Laser anemometer optimization p 30 N85-10963
Preliminary analysis of tone-excited two-stream jet velocity decay
[NASA-TM-86951] p 397 N85-21114
Aerodynamic forces developing in channels between vases in turbine drive wheels p 606 N85-27062
Supersonic flow around blunt wedge
p 636 N85-28158
Flow quality of National Aerospace Laboratory two-dimensional transonic wind tunnel. Part 3: Flow turbulence level and measuring method
[NAL-TR-842-PT-3] p 684 N85-28952
A comparison of laser Doppler anemometry and probe measurements within the boundary layer of an airfoil at subsonic flow
[ISL-CO-219/84] p 875 N85-34127
Flow modifying device
[NASA-CASE-LEW-13562-2] p 892 N85-35195

**FLOW VISUALIZATION**

Two dimensional blade-vortex interaction flow visualization study
[AIAA PAPER 84-2307] p 4 A85-10858
Optical tomography for flow visualization of the density field around a revolving helicopter rotor blade
p 48 A85-11264
Aerodynamic visualization techniques
[ONERA, TP NO. 1984-80] p 52 A85-12809
Techniques to reduce exhaust gas ingestion for vectored-thrust V/STOVL aircraft
[AIAA PAPER 84-2398] p 97 A85-13508
Some effects of sweep direction and strakes for wings with sharp leading edges p 78 A85-14851
Computational-experimental study of a Laval nozzle with a cylindrical throat p 141 A85-16189
Study of delta wing characteristics as a fan blade model. I - Visualization of three-dimensional flow by smoke wire method p 144 A85-18527
An experimental investigation of an airfoil undergoing large amplitude pitching motions
[AIAA PAPER 85-0039] p 207 A85-19474
Flow visualization of lateral jet injection into swirling crossflow
[AIAA PAPER 85-0059] p 209 A85-19490
A study of the flow recirculation problems within an anechoic hover chamber
[AIAA PAPER 85-0071] p 273 A85-19497
A comparison of flight test and analytical techniques for boundary layer transition on a sailplane
[AIAA PAPER 85-0075] p 210 A85-19501
Flow visualization of high angle of attack vortex wake structures
[AIAA PAPER 85-0102] p 296 A85-19520
Interrelated effects of pitch rate and pivot point on airfoil dynamic stall
[AIAA PAPER 85-0130] p 212 A85-19541
Three-dimensionality in unsteady flow about a wing
[AIAA PAPER 85-0132] p 212 A85-19543
Improvements in low Reynolds number testing in the NSWC hypervelocity wind tunnel No. 9
[AIAA PAPER 85-0226] p 274 A85-19602
Aerodynamics of an aspect ratio 8 wing at low Reynolds numbers
[AIAA PAPER 85-0278] p 217 A85-19630
Passive control effects on flow separation around a protuberance at high subsonic speed — for optical propagation quality enhancement to and from airborne platforms
[AIAA PAPER 85-0351] p 220 A85-19690
Visualization of the spanwise vortex structure in the starting flow behind an airfoil
[AIAA PAPER 85-0447] p 224 A85-19756
Correlation and analyses of oil flow data for an air-breathing missile model
[AIAA PAPER 85-0452] p 224 A85-19761
Leading-edge separations and cross-flow shocks on delta wings p 317 A85-25126
A combined visualization-anemometry study of the turbulent drag reducing mechanisms of triangular micro-groove surface modifications
[AIAA PAPER 85-0548] p 369 A85-25841
Photographic surveying of flow speed and direction adjacent to a surface p 441 A85-27646
The optics of aircraft shear flows — laser beam propagation through atmospheric turbulence
[AIAA PAPER 85-0557] p 460 A85-27660
Quantitative exploitation of tracer visualization obtained in the hydrodynamic tunnels of ONERA
[ONERA, TP NO. 1985-10] p 442 A85-27889
Applications of a photomultiplier to visualization of aerodynamic flows by laser tomography
[ONERA, TP NO. 1985-11] p 442 A85-27890
In-flight flow visualization - A fluid approach
p 414 A85-28644
Reynolds number dependence of vortex patterns in accelerated flow around airfoils p 470 A85-30525
Further experimental evidence of vortex splitting
p 470 A85-30673
The interaction of a wake with a turbulent boundary layer p 471 A85-30997
Optical interferometry in fluid dynamics research
p 599 A85-35203
Separated flows p 600 A85-38302
Experiment of turbulent round jet parallel to ground plane p 622 A85-38367
Aerodynamics of an aspect ratio 8 wing at low Reynolds numbers p 628 A85-39223
Simulation of wake passing in a stationary turbine rotor cascade p 629 A85-39589
Cantilevered stator vane tip leakage studies
[AIAA PAPER 85-1136] p 664 A85-39620
Application of 3-D aerothermal model and flow visualization technique to the combustor exit gas temperature study
[AIAA PAPER 85-1313] p 668 A85-39718
Wide-field shadowgraph flow visualization of tip vortices generated by a helicopter rotor
[AIAA PAPER 85-1557] p 710 A85-40682
A holographic interferometric study of an axisymmetric shock-wave/boundary-layer strong interaction flow
[AIAA PAPER 85-1564] p 711 A85-40689
An experimental investigation of an airfoil undergoing large-amplitude pitching motions p 730 A85-42351
Flow visualization in water channels by means of a procedure for the generation of very small air bubbles
p 853 A85-44270
Use of a radiance amplifier for visualizing seeded aerodynamic flows p 855 A85-45671
A new single filament smoke tube injection device
p 903 A85-47082
Flow Cones for airplane flight test flow visualization
p 903 A85-47085
Use of titanium tetrachloride for visualization of accelerating flow around airfoils p 903 A85-47090
Flow visualization using computer-generated color video displays of flow field survey data p 903 A85-47099
The use of visualization as a guide in the numerical determination of the flow around an abruptly accelerated elliptic cylinder or airfoil p 904 A85-47127
A flow visualization study of the effect of wing-tip jets on wake vortex development p 867 A85-47129
Vortex flow visualization studies of a strake-wing in water tunnel p 904 A85-47131
The use of flow visualization for vortex trajectory mapping p 867 A85-47132
Quantification of downwash and ground vortex of a lifting rotor model by flow visualization technique
p 867 A85-47134
Visualization studies of jet impingement flows at McDonnell Douglas Research Laboratories
p 867 A85-47144
Visualization of the vortex flow over delta and double-delta wings p 867 A85-47149
Determination of leading-edge vortex trajectories by schlieren photography p 904 A85-47150
Digital fringe reduction techniques applied to the measurement of three-dimensional transonic flow fields
p 907 A85-48521
On vortex bursting
[NASA-TM-77587] p 9 N85-10008
Pressure distributions measured on research wing M86 mounted on an axisymmetric body p 11 N85-10024
Preliminary results using a rapid photographic wake traverse system — in a wind tunnel
[RAE-TM-AERO-1987] p 55 N85-11332
Flow visualization study of a vortex-wing interaction
[NASA-TM-86656] p 86 N85-12040
The role of freestream turbulence scale in subsonic flow separation
[NASA-CR-174172] p 87 N85-12870
An experimental investigation of the parallel blade-vortex interaction
[NASA-TM-86005] p 146 N85-13777
A collection of flow visualization techniques used in the Aerodynamic Research Branch
[NASA-TM-85998] p 189 N85-15135
Investigation of light source and scattering medium related to vapor-screen flow visualization in a supersonic wind tunnel
[NASA-TM-86290] p 190 N85-15144
Unsteady pressure measurements on a biconvex airfoil in a transonic oscillating cascade
[NASA-TM-86914] p 234 N85-15689
Simultaneous flow visualization and unsteady lift measurement on an oscillating lifting surface
[AD-P004157] p 323 N85-17942
A visual study of a delta wing in steady and unsteady motion
[AD-P004158] p 324 N85-17943
Unsteady separated flows: Generation and use by insects
[AD-P004168] p 324 N85-17953
Aerodynamic improvements by discrete wing tip jets
[AD-A148981] p 330 N85-18964
Unsteady flows around 3-dimensional wings
[AD-A149993] p 399 N85-21124
Experimental studies of Quasi-Two-Dimensional and three-dimensional viscous interaction regions induced by skewed-shock and swept-shock boundary layer interactions
[AD-A150080] p 449 N85-21587
An experimental investigation of the chopping of helicopter main rotor tip vortices by the tail rotor
[NASA-CR-177338] p 538 N85-23376
Stability of vortex structures during separation flow past array of wings p 481 N85-24110
Multi-ducted inlet combustor research and development
[AD-A153753] p 673 N85-28846
Lee-side flow over delta wings at supersonic speeds
[NASA-TP-2430] p 739 N85-29921
Vapor-screen technique for flow visualization in the Langley Unitary Plan Wind Tunnel
[NASA-TM-86384] p 740 N85-29929
Circulation control lift generation experiment: Hardware development p 856 N85-33535
The influence of helicopter tail shape on drag: An aerodynamic study using a low speed wind tunnel
[AD-A156304] p 876 N85-35174

**FLOWMETERS**

Flow measurement device
[AD-D011432] p 298 N85-17369
Miniature electrooptical air flow sensor
[NASA-CASE-LAR-13065-1] p 447 N85-20235

**FLUID DYNAMICS**

Experimental research in Poland on turbulence and high-speed aerodynamics p 3 A85-10322
Analyses and testing for rotordynamic coefficients of turbulent annular seals with different, directionally-homogeneous surface-roughness treatment for rotor and stator elements
[ASME PAPER 84-TRIB-31] p 289 A85-21293
Problems of contemporary mechanics. Parts 1 & 2
p 442 A85-28376
Conference on Fluid Machinery, 7th, Budapest, Hungary, September 13-16, 1983, Proceedings. Volumes 1 & 2
p 524 A85-30775
A new look at sound generation by blade/vortex interaction
[ASME PAPER 84-WA/NCA-2] p 538 A85-32955
Design and performance of a fixed, nonaccelerating guide vane cascade that operates over an inlet flow angle range of 60 deg
[ASME PAPER 84-GT-75] p 475 A85-32964
Separated flows p 600 A85-38302
The working group on detached flows - New impulses for flow research and aerodynamics
[DGLR PAPER 84-097] p 709 A85-40316
Further development of a transonic cascade analysis
[AD-A145410] p 54 N85-11319
AGARD bulletin technical programme, 1985
[AGARD-BUL-84-2] p 67 N85-11971
Report of the Department of Aerospace Engineering
p 71 N85-11977

Research Reports: 1984 NASA/ASEE Summer Faculty Fellowship Program
[NASA-CR-171317] p 482 N85-22210
Current problems in turbomachinery fluid dynamics
[AD-A150533] p 508 N85-22397
Gasdynamic evaluation of choking cascade turns
[AD-A151854] p 603 N85-25776
Fluid-dynamic model of a downburst
[UTIAS-271] p 609 N85-27441
Activities of the Department of Aerospace Engineering
p 706 N85-29844
Notes on unsteady transonic cascade flows
[AD-A154629] p 817 N85-32096

FLUID FILMS
Measurements of water film characteristics on airfoil surfaces from wind-tunnel tests with simulated heavy rain
[AIAA PAPER 85-0259] p 274 A85-19618
Effects of turbulence and viscosity variation on the dynamic coefficients of fluid film journal bearings
[ASME PAPER 84-TRIB-6] p 289 A85-21283
Scale-model tests of airfoils in simulated heavy rain
p 548 A85-35590

FLUID FILTERS
Laboratory simulation of smoke reduction from aircraft engine test cell exhaust using a fluidized bed filter
[AD-A148600] p 278 N85-16886

FLUID FLOW
In-flight flow visualization - A fluid approach
p 414 A85-28644
Computational Fluid Dynamics Conference, 7th, Cincinnati, OH, July 15-17, 1985, Technical Papers
[ONERA, TP NO. 1985-75] p 790 A85-40926
Implementation of the supersonic triplet singularity into the USTORE computer code
[CSIR-NIAST-83/47] p 8 N85-10006
New discovery in supersonic flight research
p 314 N85-18041
Multi-ducted inlet combustor research and development
[AD-A153753] p 673 N85-28946
Observations of the use of the setapoint detector
[AD-A154533] p 853 N85-32208
Flow modifying device
[NASA-CASE-LEW-13582-2] p 892 N85-35195

FLUID INJECTION
Supersonic flow over a cone with power-law injection through the cone surface p 3 A85-10465
A study of heat transfer during the injection of water into the cooling air of a turbine blade
p 348 A85-23984
Cooling of a turbine profile in the case of air injection through porous areas p 352 A85-25622
Characteristics of a two-dimensional turbulent jet in a bounded slipstream p 685 A85-39131
The transpired turbulent boundary layer in various pressure gradients and the blow-off condition
[ASME PAPER 84-WA/HT-71] p 698 A85-39899

FLUID JETS
Transverse jet breakup and atomization with rapid vaporization along the trajectory p 444 A85-29092
A method for the estimation of jet interferences
p 549 A85-35751
Fluid-dynamic model of a downburst
[UTIAS-271] p 609 N85-27441

FLUID MECHANICS
On the stability of an infinite swept attachment line boundary layer p 75 A85-13723
Grid generation for fluid mechanics computations
p 524 A85-31185
Parabolic aircraft flights - An effective tool in preparing microgravity experiments p 782 A85-42697
USSR report: Engineering and equipment
[JPRS-UEO-84-007] p 188 N85-14954
An update of the Canada/USA augmentor-wing project p 257 N85-16781
USSR report: Engineering and equipment
[JPRS-UEO-85-001] p 370 N85-18200
USSR report: Engineering and equipment
[JPRS-UEO-85-003] p 526 N85-22782
USSR report: Engineering and equipment
[JPRS-UEO-84-005] p 530 N85-24157
Adaptive grid generation for numerical solution of Burger's equation
[AD-A152217] p 611 N85-27606
R and D activities of the Aerodynamics Division
p 745 N85-32023

FLUID POWER
Rotordynamic Instability Problems in High-Performance Turbomachinery
[NASA-CP-2338] p 186 N85-14116
Lateral fluid forces acting on a whirling centrifugal impeller in vaneless and vaned diffuser
p 187 N85-14123

FLUID PRESSURE
Computation of unsteady aerodynamic pressure coefficients in a transonic straight cascade. II
[ONERA, TP NO. 1984-118] p 80 A85-15836
Factors influencing heat transfer to the pressure surfaces of gas turbine blades p 421 A85-29345
Experiment of turbulent round jet parallel to ground plane p 622 A85-38367

FLUID-SOLID INTERACTIONS
Calculation of the hydrodynamic characteristics of polyplanes p 290 A85-22113
Aero/hydrodynamic stability of elastically supported plates in narrow channels with upstream barriers preventing flow redistribution p 794 A85-42564
A surface finite element method for elasto-acoustic coupling p 861 A85-44038

FLUIDIC CIRCUITS
A fluidic flight control system demonstrator
p 894 A85-47788
Performance evaluation of an electrofluidic flight control actuator p 894 A85-47789
The design of a fluidic low-airspeed sensor
p 888 A85-47791

FLUIDICS
Fluidics - A reliable alternative for aircraft control
p 894 A85-47790

FLUIDIZED BED PROCESSORS
Laboratory simulation of smoke reduction from aircraft engine test cell exhaust using a fluidized bed filter
[AD-A148600] p 278 N85-16886

FLUORESCENCE
A proposed method for remote thermometry in turbine engines
[AIAA PAPER 85-1468] p 792 A85-41425

FLUTTER
Measurement of transonic dips in the flutter boundaries of a supercritical wing in a wind tunnel
p 18 A35-11986
Vibration and flutter of mistuned bladed-disk assemblies
[AIAA PAPER 84-0991] p 181 A85-16095
Flutter and divergence boundary prediction from nonstationary random responses at increasing flow speeds
[AIAA PAPER 85-0691] p 523 A85-30357
Active vibration suppression of a cantilever wing
p 497 A85-32344
Design of a flutter suppression system for an experimental drone aircraft p 497 A85-32584
Active flutter suppression using eigenspace and linear quadratic design techniques p 512 A85-32779
Flutter of swept fan blades
[ASME PAPER 84-GT-138] p 526 A85-32962
The perfection and application of the flutter subcritical response analytical method p 573 A85-35748
Winglet effects on the flutter of a twin-engine transport-type wing p 650 A85-39217
Vibration and flutter of mistuned bladed-disk assemblies p 836 A85-45854
A second order adaptive controller for wing flutter control
[AIAA PAPER 85-1965] p 828 A85-45949
Unsteady aerodynamic forces induced by aeroelastic vibrations of a turbojet engine in a nacelle
[ONERA, TP NO. 1985-56] p 880 A85-47302
Results of winglet development studies for DC-10 derivatives
[NASA-CR-3677] p 22 N85-10936
Interactive aircraft flight control and aeroelastic stabilization
[NASA-CR-174025] p 36 N85-11003
Status and prospects of computational fluid dynamics for unsteady transonic viscous flows
[NASA-TM-86018] p 65 N85-12037
Flutter parametric studies of cantilevered twin-engine-transport type wing with and without winglet. Volume 1: Low-speed investigations
[NASA-CR-172410-VOL-1] p 129 N85-13269
Flutter parametric studies of cantilevered twin-engine transport type wing with and without winglet. Volume 2: Transonic and density effect investigations
[NASA-CR-172410-VOL-2] p 130 N85-13270
Flutter control with unsteady aerodynamic models
[AD-A147858] p 270 N85-15753
Remote pivot decoupler pylon: Wing/store suppression
[NASA-CASE-LAR-13173-1] p 416 N85-19961
Flutter taming: A new tool for the aeroelastic designer

The development of a finite element model of an aircraft vertical stabilizer for vibration analysis
p 290 A85-21683
Vibration tailoring of advanced composite lifting surfaces p 290 A85-21846
Subsonic wing rock of slender delta wings
p 385 A85-26760
The evolution of flutter excitation at McDonnell Aircraft
p 414 A85-28648
Motion of a flexible wing at supersonic velocity under the effect of a random gust p 393 A85-30108
Karman vortex shedding - Friend or foe of the structural dynamicist? — application to Space Shuttle cable tray flutter
[AIAA PAPER 85-0661] p 470 A85-30349
An iterative procedure for nonlinear flutter analysis
[AIAA PAPER 85-0688] p 523 A85-30355
Exploratory flutter test in a cryogenic wind tunnel
IAA PAPER 85-0736] p 515 A85-30369
Multimode instability prediction method
[AIAA PAPER 85-0737] p 523 A85-30370
Computer-aided frequency domain synthesis of a robust active flutter suppression control law
[AIAA PAPER 85-0754] p 511 A85-30373
Probabilistic characteristics of the frequency spectrum of the natural vibrations of turbocompressor blades
p 526 A85-32759
Flutter of swept fan blades
[ASME PAPER 84-GT-138] p 526 A85-32962
Flutter analysis of cantilevered quadrilateral plates
p 600 A85-35296
Critical flutter parameters of orthotropic rectangular flat panels with in-plane loads p 693 A85-37192
Characteristics of the oscillations of a tail unit in a flow of an incompressible gas p 649 A85-39125
The status of flutter suppression technology using active controls p 775 A85-40995
Analyses of cascade flutter as a multi-eigenvalue problem (on cascade composed of two groups of blades having different natural frequencies)
p 769 A85-41836
Aerodynamic characteristics of an airfoil oscillating in transonic flow between parallel walls
p 729 A85-41837

Experimental aeroelastic behavior of unswept and forward-swept cantilever graphite/epoxy wings
p 758 A85-42932
On the theory of oscillating airfoils in supersonic and sonic flow p 814 A85-43925
Equations of motion of a quasisteady flight vehicle utilizing restrained static aeroelastic characteristics
p 827 A85-45844
Probabilistic combination of vehicle dynamic vibration and acoustically induced random accelerations
p 855 A85-45847
Subcritical damping ratios of a two-dimensional airfoil in transonic flow p 817 A85-45849
An aeroelastic testing technique in a straight cascade wind-tunnel p 896 A85-47161
Verification of calculation methods for unsteady airloads in the prediction of transonic flutter
[AIAA PAPER 84-0871] p 871 A85-49126
Analysis of asymmetric natural vibrations of an aeroplane with moving deformable control surfaces
p 883 A85-49672
Analysis of natural vibrations of a deformable aeroplane with fixed control systems p 883 A85-49673
Flutter parametric studies of cantilevered twin-engine-transport type wing with and without winglet. Volume 1: Low-speed investigations
[NASA-CR-172410-VOL-1] p 129 N85-13269
Viscous effects on transonic airfoil stability and response
[NASA-TM-86374] p 329 N85-18961
Exploratory flutter test in a cryogenic wind tunnel
[NASA-TM-86380] p 451 N85-21689
Dynamic wind-tunnel testing of active controls by the NASA Langley Research Center p 514 N85-22353
Experience with transonic unsteady aerodynamic calculations p 554 N85-25176
A semi-empirical unsteady transonic method with supersonic free stream p 555 N85-25179
A study of transonic flutter of a two-dimensional airfoil using the U-g and p-k methods
[AD-A151463] p 585 N85-25268
Verification of calculation methods for unsteady airloads in the precipitation of transonic flutter
[NLR-MP-84016-U] p 744 N85-31027
Flutter clearance of the Schweizer 1-36 deep-stall sailplane
[NASA-TM-85917] p 830 N85-33116

**FLUX (RATE)**
A search for solar neutrons on a long duration balloon flight
[SH-1.4-6] p 920 N85-34766

**FLY BY TUBE CONTROL**
Fluidics - A reliable alternative for aircraft control
p 894 A85-47790

**FLY BY WIRE CONTROL**
A reconfigurable redundancy management strategy for a triplex DFBW system p 35 A85-12381
Backup modes for the F/A-18 digital flight control system
[AIAA PAPER 84-2622] p 171 A85-17819
An assessment of the 1990 digital/electric airplane
[AIAA PAPER 84-2740] p 157 A85-17894
Aircraft control systems - A projection to the year 2000 p 424 A85-29125
Flight test of the 4-valve fly-by-wire/fly-by-optics control system p 511 A85-31964
A control law for the self-repairing/digital flight control system p 841 A85-45057
A compact electromechanical actuator — for Boeing 727 upper rudder p 854 A85-45058
Flight test of a helicopter fly-by-wire/light actuation control system p 842 A85-45155
Investigation of limb-sidestick dynamic interaction with roll control
[AIAA PAPER 85-1853] p 843 A85-45882
Digital computer architecture as applied to an advanced flight control system
[AIAA PAPER 85-1949] p 846 A85-45967
Performance evaluation of an electrofluidic flight control actuator p 394 A85-47789
Role of research aircraft in technology development
[NASA-TM-85913] p 21 N85-10932
Integrated digital/electric aircraft concepts study
[NASA-CR-3841] p 257 N85-16861
Some aspects of the design of a fly-by-wire flying control system for a supersonic V/STOL fighter aircraft
[COLL-AERON-8413] p 425 N85-21175
Guidance and control research flight testing with HFB 320 test aircraft p 514 N85-22355
Multivariable control law design for the X-29 aircraft
[AD-A151828] p 576 N85-25259
A method of estimating aircraft attitude from fly by wire flight control system data p 586 N85-26653
An update on experience on the fly by wire Jaguar equipped with a full-time digital flight control system
p 589 N85-26740
Application of AFTI/F-16 task-tailored control modes in advanced multirole fighters p 677 N85-27888
X-29 digital flight control system design
p 677 N85-27889
An update of experience on the fly by wire Jaguar equipped with a full-time digital flight control system
p 678 N85-27893
Operational and developmental experience with the F/A-18A digital flight control system
p 678 N85-27895
How to handle failures in advanced flight control systems of future transport aircraft p 679 N85-27905
The flight control system for the Experimental Aircraft Programme (EAP) demonstration aircraft
p 680 N85-27908
Crew systems and flight station concepts for a 1995 transport aircraft
[NASA-CR-166068] p 781 N85-29973

**FLYING PLATFORMS**
Detection of moving vehicles in thermal imagery obtained from a moving platform p 367 A85-24284
Phase III GPS integration options for aircraft platforms
p 337 A85-25196

**FOAMS**
Results of variable enthalpy tests of CPR-488 TIP panels in MSFC Hot Gas Facility
[NASA-CR-170689] p 902 N85-35237

**FOG DISPERSAL**
Status of warm fog dispersal research
[AIAA PAPER 85-0010] p 272 A85-19456

**FOIL BEARINGS**
Experimental research on the design bases for aerodynamic spring bearings — German thesis
p 50 A85-11722

**FOKKER AIRCRAFT**
Major Fokker 50 upgrade grows out of F-27 reengining program p 829 A85-47049
Fokker improves transport design based on launch customer demand p 882 A85-49199

**FOOD**
Food poisoning as an in-flight safety hazard
p 746 A85-42089

**FORCE DISTRIBUTION**
On a forced elliptic jet p 78 A85-14357
Perturbed motion of airplane and safe store separation p 674 A85-38168
A nonlinear solution for parachute suspension line deformation p 877 A85-49140
Flight and wind-tunnel comparisons of the inlet-airframe interaction of the F-15 airplane
[NASA-TP-2374] p 105 N85-12884
Experimental and theoretical determination of the wing-induced lateral wind on the tail surfaces in oscillating rolling motion. Part 1: Application of the Mobile Oscillating Derivatives (MOD) on an experimental part
[IFD-1/84-PT-1] p 654 N85-28939
Application of two-dimensional unsteady aerodynamic to a free-tip rotor response analyses
[NASA-CR-177348] p 741 N85-29933
Turbine blade-tip clearance excitation forces
[NASA-CR-171534] p 773 N85-29963

**FORCED CONVECTION**
Computation of forced laminar convection in rotating cavities p 600 A85-35592
Heat transfer from rectangular plates inclined at different angles of attack and yaw to an air stream
p 600 A85-35593
Heat transfer in aeropropulsion systems
[NASA-TM-87066] p 798 N85-31444

**FORCED VIBRATION**
Forced oscillations of transonic channel and inlet flows with shock waves p 73 A85-12711
Flutter and forced response of mistuned rotors using standing wave analysis p 122 A85-12721
Vibration and flutter of mistuned bladed-disk assemblies
[AIAA PAPER 84-0991] p 181 A85-16095
Zeroth-order feedback strategies for medium-range interception in a horizontal plane p 157 A85-18327
Effects of mistuning on the forced vibration of bladed disks in subsonic flow
[AIAA PAPER 85-0760] p 505 A85-30377
A preliminary investigation of the dynamic force-calibration of a magnetic suspension and balance system
[NASA-CR-172580] p 517 N85-23808
A study of internal and distributed damping for vibrating turbomachinery blades
[NASA-CR-175901] p 671 N85-27868

**FOREBODIES**
Dynamics of forebody flow separation and associated vortices p 392 A85-29262
Low-speed experimental study of the vortex flow effects of a fighter forebody having unconventional cross-section
[AIAA PAPER 85-1798] p 813 A85-43851

**FORECASTING**
Outline of a new emissions model for military and civilian aircraft facilities
[DE84-016455] p 131 N85-13394
The Air Force can improve its forecasts of aircraft spare parts requirements
[AD-A147911] p 308 N85-16682

**FORESTS**
Test plan for the forest-echo experiment
[DE84-017175] p 375 N85-18447

**FORGING**
Engineering property comparisons of PM and IM aluminum alloy forgings
[AD-B088146L] p 296 N85-17398
Correction of engraving stamp for forming blanks of gas turbine engine blades p 371 N85-18213
Precision die forging of blades or gas turbines
p 672 N85-28148
Influence of the molding joint plane on the fatigue resistance of the alloys 7010 and 7050. Test Report No. M1-631600
[PV-M1-631600] p 799 N85-31562

**FORMALDEHYDE**
Long term durability of urea formaldehyde glued joints removed from Vampire aircraft
[AD-A149053] p 346 N85-18985

**FORMAT**
Pictorial format program - Past, present, and future
p 656 A85-38958
Pictorial format display evaluation
[AD-A149252] p 348 N85-18986
Multiple resources and display formatting: The implications of task integration in a simulated air traffic control task
[AD-A150713] p 530 N85-24205
A method to calculate the parameters of wings of arbitrary planform
[AD-A152689] p 635 N85-27831
Airport and airway system cost allocation model. Volume 7: User's manual
[AD-A152877] p 683 N85-27917

**FORMING TECHNIQUES**
Technical and economical aspects in manufacturing aviation and space components by using superplastic forming (SPF) and/or superplastic forming/diffusion bonding (SPF/DB)
[MBB-BB-572-84-OE] p 181 A85-16087
Experiments in superplastic forming of helicopter components p 598 A85-33474
Modern forming procedures for integral structural components which are strengthened by stringers or ribs
[DGLR PAPER 84-086] p 789 A85-40306
Age forming technology expanded in an autoclave
[SAE PAPER 850885] p 910 A85-50113

**FORTRAN**
A FORTRAN subroutine for the solution of periodic block-tridiagonal systems p 457 A85-27506
Development and validation of a general purpose linearization program for rigid aircraft models
[AIAA PAPER 85-1891] p 846 A85-45976
A generalized computer code for developing dynamic gas turbine engine models (DIGTEM)
p 890 A85-49021
Three degree of freedom steady state point performance program: Updated version 1
[CSIR-NIAST-83/48] p 8 N85-10005
NOISEMAP 4.4 computer program update, operator's manual, addendum 1
[AD-A147091] p 302 N85-16503
Using the control system design environment in the design of a data link receiver unit for the Coast Guard HH-65A helicopter
[AD-A148624] p 271 N85-16880
Pulsewidth modulated speed control of brushless dc motors
[AD-A151966] p 607 N85-27148

**FORWARD SCATTERING**
Evaluation of the forward scattering spectrometer probe. I - Electronic and optical studies p 291 A85-22168

**FOULING**
Study of deposition control using transpiration
[DE85-002339] p 373 N85-19378

**FOUNDRIES**
Theoretical and experimental investigations of dust loaded flow fields in industrial halls
[BMFT-FB-HA-84-044] p 449 N85-21411

**FOURIER ANALYSIS**
Spectral methods for the Euler equations. I - Fourier methods and shock capturing p 185 A85-18684

**FOURIER TRANSFORMATION**
A Fourier Transform method for calculating velocity profiles on airfoils
[AIAA PAPER 85-0208] p 215 A85-19592
GC-FTIR (Fourier Transform Infrared Spectrometry) of jet fuels
[AD-A148272] p 285 N85-17155

**FRACTOGRAPHY**

Laboratory studies related to in-flight acoustic emission monitoring p 905 A85-47428

Fractographic observation and estimation of crack growth curve of aluminum alloy under ramdom flight simulation loading
[NAL-TR-824] p 180 N85-14913

Fatigue Crack Topography
[AGARD-CP-376] p 531 N85-24321

Two recent cases of marker load applications on cargo/fighter aircraft fatigue tests p 532 N85-24325

Generation of marker lines on fatigue fracture surfaces p 532 N85-24328

Application of optical and electron microscopic techniques in the fractographic determination of fatigue crack growth rates p 532 N85-24334

**FRACTURE MECHANICS**

Fatigue crack growth analysis under random spectrum loading using the generalized Willenborg model
p 49 A85-11668

Crack arrest in structural ceramics p 41 A85-11671

Fracture mechanics methodology: Evaluation of structural components integrity p 50 A85-11751

Fatigue life prediction - Metals and composites
p 42 A85-11752

Partial alpha-colony fractures and their protrusions during cyclic loading of a titanium alloy
p 42 A85-11907

A study of fatigue damage mechanisms in Waspaloy from 25 to 800 C p 42 A85-12098

Damage tolerance of metallic structures: Analysis methods and applications p 125 A85-15859

Fracture analysis of stiffened structure
p 126 A85-15864

Fatigue crack growth under variable amplitude loading
p 366 A85-23711

Stress intensity factors for an arc crack in a rotating disc p 599 A85-34974

Reducing the effects of rivet holes on fatigue life by adhesive bonding p 683 A85-37472

Low temperature creep and fracture of near alpha titanium alloys p 687 A85-38748

Fracture behavior of glass-cloth/polyester composite laminate at low temperature p 688 A85-39228

Preliminary investigation of the strength and durability of superplastic formed aluminum p 785 A85-42934

Recent advances in fatigue crack growth predictions
p 910 A85-50065

Composite fracture toughness and impact characterization p 120 N85-12963

Constitutive modeling of engine materials
[AD-A146630] p 190 N85-15189

Engine Cyclic Durability by Analysis and Testing
[AGARD-CP-368] p 286 N85-15733

Crack closure characteristics considering center cracked and compact tension specimens
[AD-A151702] p 605 N85-25907

Multiaxial and thermomechanical fatigue considerations in damage tolerant design
[NASA-TM-87022] p 597 N85-26964

Elevated temperature crack growth
[NASA-CR-174957] p 856 N85-33540

**FRACTURE STRENGTH**

Fatigue strength of aluminized bolted joints
[MBB-VFW-53-84-OE] p 181 A85-16112

Test loading of airfield pavements
p 426 A85-27721

A design methodology for a compliant matrix composite bearingless main rotor p 496 A85-31996

Concepts and application of aircraft damage tolerance analysis p 645 A85-37206

Fracture behavior of glass-cloth/polyester composite laminate at low temperature p 688 A85-39228

Fracture toughness of adhesively bonded joints
p 688 A85-39492

Damage tolerance of composite cylinders
p 688 A85-39600

Effect of temperature on the fatigue and fracture properties of 7475-T761 aluminum p 900 A85-47973

Low temperature and loading frequency effects on crack growth and fracture toughness of 2024 and 7475 aluminum p 900 A85-47974

Development of powder metallurgy 2XXX series Al alloys for high temperature aircraft structural applications
[NASA-CR-172408] p 44 N85-11220

Strength analysis of fan-shaped wing considering temperature deformation and creep deformations
p 163 N85-14983

Engineering property comparisons of PM and IM aluminum alloy forgings
[AD-B088146L] p 298 N85-17398

Fatigue crack propagation in mirage 1110 wing main spar specimens and the effects of spectrum truncation on life
[ARL/STRUC-R-405] p 417 N85-21152

Tensile and fracture toughness properties of Mirage III spars
[AR-003-019] p 606 N85-25899

Reaction-bonded and fiber-reinforced SiC static and dynamic gas turbine components
[BMFT-FB-T-84-302] p 672 N85-27874

**FRACTURES (MATERIALS)**

Turbine Engine Hot Section Technology (HOST)
[NASA-TM-83022] p 28 N85-10951

Durability calculation of wing panel element
p 503 N85-24159

Generation of marker lines on fatigue fracture surfaces p 532 N85-24328

Periodic loading sequences for the systematic marking of fatigue crack fracture surfaces p 532 N85-24329

Modifications of flight by flight load sequences to provide for good fracture surface readability p 532 N85-24330

**FRAGMENTATION**

Frangibility of obstacles at airports
[NLR-MP-84002-U] p 700 N85-28431

**FRAMES**

Composite curved frames for helicopter fuselage structure p 252 A85-21396

A study on a medium-sized rocket with Burnout frame
[NAL-TR-821] p 361 N85-18082

**FRAMES (DATA PROCESSING)**

Low-resolution target classification from a staring infrared sensor
[AD-A151690] p 612 N85-26358

**FREE FLIGHT**

Is the free flight/wind tunnel equivalence concept valid for unsteady viscous flow?
[AIAA PAPER 85-0378] p 222 A85-19708

Characteristic motions for simulation of post-stall manoeuvres and flight instabilities p 269 A85-21679

Is any free flight/wind tunnel equivalence concept valid for unsteady viscous flow? p 871 A85-49138

**FREE FLOW**

A study of compressible turbulent free shear layers using laser Doppler velocimetry
[AIAA PAPER 85-0177] p 213 A85-19569

A simple analytical method for predicting axisymmetric turbulent jet flowfields in a freestream
[AIAA PAPER 85-0251] p 216 A85-19614

Turbulence suppression in free turbulent shear flows under controlled excitation. II - Jet-noise reduction
p 366 A85-23844

Non-equilibrium high enthalpy airflows in a free piston shock tunnel p 320 A85-25484

Relative effects of Reynolds number and freestream turbulence in transonic flow p 391 A85-29065

The effect of freestream turbulence on pressure fluctuations in transonic flow p 545 A85-34998

An analytical investigation of the ground and ambient head flow influence on the free inlet flow into a turbojet engine p 726 A85-41608

Large-angle cone-shaped bodies in supersonic three-dimensional stream p 730 A85-42040

The effect of boattailing of a projectile in transonic flow
[AD-A157758] p 736 A85-42983

On the wake of a pitching airfoil
[AIAA PAPER 85-1621] p 737 A85-43050

Analyses of orderly structures in jets and the relationship with emitted noise
[ISL-R-117/83] p 612 N85-27646

Nozzle wall roughness effects on free-stream noise and transition in the pilot low-disturbance tunnel
[NASA-TM-86389] p 910 N85-34355

**FREE JETS**

Measurements in a turbulent rectangular free jet
p 77 A85-14355

Ultra light wall wind tunnel
[ONERA, TP NO. 1984-129] p 117 A85-15846

Application of laser interferometry to density measurements in free jets p 206 A85-19406

Noise testing of an advanced design propeller in the Boeing anechoic test chamber with a relative velocity free jet
[AIAA PAPER 84-2262] p 421 A85-30193

Mean velocity and static pressure distributions in a three-dimensional turbulent free jet p 546 A85-35155

Vector control of two-dimensional turbulent free jet by both-side flaps p 789 A85-40358

Advanced design propeller noise testing in an anechoic chamber p 836 A85-45869

Computation of noise radiation from a free jet perpendicular to its axis via laser anemometry measurements
[ESA-TT-870] p 378 N85-18662

Application of laser anemometry to jets in combustion chambers
[ISL-CO-210/83] p 531 N85-24253

**FREE MOLECULAR FLOW**

Shading and interference effects during the rotation of a plate — in aerodynamics p 624 A85-38559

**FREE VIBRATION**

Free vibration characteristics of periodically stiffened panels with damped stringers p 182 A85-16763

Flutter analysis of cantilevered quadrilateral plates
p 600 A85-35296

A study of internal and distributed damping for vibrating turbomachiner blades
[NASA-CR-175901] p 671 N85-27868

**FREEZING**

Jet fuel property changes and their effect on producibility and cost in the U.S., Canada, and Europe
[NASA-CR-174840] p 596 N85-27012

Fuel freeze point investigations
[AD-A152801] p 690 N85-28129

The distribution of higher n-alkanes in partially frozen middle distillate fuels
[AD-A153940] p 692 N85-29074

**FRENCH SPACE PROGRAMS**

Activities in French aerospace p 432 N85-19995

**FREON**

Characteristics of controlled-oscillating annular cascade test facility with Freon gas
[NAL-TR-812] p 10 N85-10014

**FREQUENCIES**

Vibration and flutter of mistuned bladed-disk assemblies
[AIAA PAPER 84-0991] p 181 A85-16095

An evaluation of flashtube signal characteristics
[AD-A149569] p 339 N85-18974

Spectrum resource assessment of the Aeronautical Mobile Service between 400 MHz and 17.7 GHz
[PB85-125995] p 447 N85-20241

**FREQUENCY CONTROL**

Experimental cascaded doubly fed variable speed constant frequency generator system
p 854 A85-45038

**FREQUENCY CONVERTERS**

Translated GPS real-time tracking
p 487 A85-32209

Experimental cascaded doubly fed variable speed constant frequency generator system
p 854 A85-45038

A graphical approach to understanding and preventing the phenomenon of aliasing p 858 A85-45041

**FREQUENCY DISTRIBUTION**

A method of estimating the probability of vertical overlap using observed height data p 749 A85-40986

**FREQUENCY DIVISION MULTIPLEXING**

Fiber optic data bus using Frequency Division Multiplexing (FDM) and an asymmetric coupler
[NASA-TM-86015] p 129 N85-13139

**FREQUENCY MULTIPLIERS**

A wideband X100 low noise microwave frequency multiplier p 903 A85-47060

A phase-locked frequency multiplier for the signal averaging of the vibration of the Wessex helicopter input spiral bevel pinion
[AD-A154914] p 829 N85-32113

**FREQUENCY RESPONSE**

Optimal frequency response shaping by appendant structures — for helicopter model p 46 A85-10403

A method for high order linear system reduction and nonlinear system simplification p 457 A85-27514

Quantifying AFTI/F-16 gust alleviation characteristics using frequency response analysis p 424 A85-28641

Computer-aided frequency domain synthesis of a robust active flutter suppression control law
[AIAA PAPER 85-0754] p 511 A85-30373

Dynamic loads analyses of flexible airplanes - New and existing techniques
[AIAA PAPER 85-0808] p 492 A85-30394

Application of frequency domain and time domain analysis tools to the analysis of nonrecoverable stall
[AIAA PAPER 85-1350] p 765 A85-40836

A robust flight control design for the C-135 aircraft Horowitz's method p 840 A85-45049

**FREQUENCY SHIFT**

Doppler frequency shift for aircraft noise in a refractive atmosphere
[AIAA PAPER 84-2354] p 63 A85-10890

**FREQUENCY SYNTHESIZERS**

Transdigitizer for relaying signals from Global Positioning System (GPS) satellites
[AD-D011442] p 339 N85-18970

**FRESNEL LENSES**

A second generation WAVIDS (Wide Angle Virtual Image Display System)
[AD-P004328] p 359 N85-17982

**FRETTING**

Slipping behavior and fretting fatigue in the disk/blade dovetail region p 770 A85-41852

**FRICTION**

Evaluation of abradable turbine seal by friction-wear test and engine performance test p 770 A85-41842

Laminar flow heat exchangers. Viscosity induced non-uniform flow
[AD-A144777] p 53 N85-10307

Alternatives for runway rubber removal from porous friction surfaces
[DOT/FAA/PM-84/28] p 176 N85-13803

Analysis for leakage and rotordynamic coefficients of surface roughened tapered annular gas seals
p 188 N85-14135

Techniques to analyze vehicle coastdown data
[DE85-005159] p 399 N85-21127

Tribological systems as applied to aircraft engines
[NASA-TM-86965] p 450 N85-21657

Friction and wear behavior of aluminum and composite I-beam stiffened airplane skins
[NASA-TM-86418] p 652 N85-27852

**FRICTION DRAG**

Emmons spot forcing for turbulent drag reduction
p 145 A85-16698

Design of apparatus for the determination of aerodynamic drag coefficients of automobiles
[AD-A151842] p 558 N85-25219

**FRICTION FACTOR**

Calculation of friction and heat transfer in turbulent flow of a compressible gas in a plane duct
p 291 A85-22114

Fixed step friction model p 443 A85-28809

Experimental study of heat transfer from shaft in cooled radial bearing of GNT-25 gas turbine
p 529 N85-24068

**FRICTION MEASUREMENT**

A study of friction in high-speed face seals
p 46 A85-10381

Skin friction measurements for 2 relatively thick airfoil sections at high Reynolds number
[AD-A150021] p 399 N85-21125

**FRICTION REDUCTION**

Effects of friction dampers on aerodynamically unstable rotor stages p 265 A85-21866

More detailed measurements behind turbulence manipulators including tandem devices using servo-controlled balances
[AIAA PAPER 85-0521] p 320 A85-25927

**FRONTS (METEOROLOGY)**

Characteristics of gust front and downdrafts from single Doppler radar data p 453 A85-28779

**FUEL COMBUSTION**

Fuel effects on gas turbine combustion-liner temperature, pattern factor, and pollutant emissions
p 26 A85-11984

The fuel property/flame radiation relationship for gas turbine combustors p 111 A85-15350

Liquid-fueled ramjets
[ONERA, TP NO. 1984-112] p 111 A85-15832

A study of the stability of combustion in a small straight-flow combustion chamber p 350 A85-24000

A study of the structure of the primary zone of cylindrical combustion chambers p 351 A85-24004

Combustion studies of metallized fuels for solid fuel ramjets
[AIAA PAPER 85-1177] p 689 A85-39640

Propellant options for long duration, high altitude unmanned aircraft
[AIAA PAPER 85-1326] p 689 A85-39727

Internal combustion engine combustion chamber process studies at NASA Lewis Research Center
p 855 A85-45856

Combustion gas properties I-ASTM jet A fuel and dry air
[NASA-TP-2359] p 27 N85-10064

Radiation/catalytic augmented combustion
[AD-A148758] p 364 N85-18101

The influence of fuel quality upon flame-tube temperature and flame radiation in a model gas-turbine primary zone
[K233] p 508 N85-22396

The influence of fuel molecular composition upon flame-tube temperature and flame radiation in a model gas-turbine primary zone
[K234] p 520 N85-22646

Influence of fuel properties on gas turbine combustion performance
[AD-A151464] p 596 N85-25448

Analytical fuel property effects--small combustors
[NASA-CR-174738] p 582 N85-26709

Research test facility for evaporation and combustion of alternative jet fuels at high air temperatures
[AD-A153830] p 691 N85-29073

An experimental investigation of fuel regression rate control in solid fuel ramjets
[AD-A154251] p 782 N85-30008

**FUEL CONSUMPTION**

Periodic optimal cruise of an atmospheric vehicle
p 102 A85-13701

UDF - GE dares to differ — UnDucted Fan
p 167 A85-16270

Four-dimensional fuel-optimal guidance in the presence of winds p 158 A85-18328

Periodic optical cruise of an atmospheric vehicle
p 158 A85-18330

Computer geometric simulation of cruise missile center of gravity versus fuel consumption
[SAWE PAPER 1511] p 159 A85-18804

Mi-28 - The Soviets create Havoc p 250 A85-20147

Electroimpulse deicing nears operation
p 400 A85-27364

Fuel economies effected by the use of FMS in an advanced TMA p 412 A85-27604

Investigation of modern flight-control problems with regard to minimal fuel consumption, with consideration of arrival-time limitations, air-traffic density, and onboard real-time computation — German thesis
p 409 A85-28794

The search for fuel efficiency p 492 A85-31225

On-line determination of optimal flight paths for helicopters p 495 A85-31994

Definition of requirements for 5000 horsepower class demonstrator engine p 506 A85-32006

Helicopter cooling, air cycle/vapor cycle trade-offs
[SAE PAPER A840942] p 570 A85-33753

Aerodynamic test results for a wing-mounted turboprop propulsion installation
[SAE PAPER 841480] p 627 A85-39060

The reduction of fuel consumption on the basis of periodic optimal flight paths
[DGLR PAPER 84-090] p 753 A85-40309

Fuel conservative guidance for shipboard landing of powered-lift STOL aircraft
[AIAA PAPER 85-1869] p 827 A85-45911

Minimum-fuel, three-dimensional flight paths for jet transports . p 828 A85-46341

Feedback control for fuel-optimal descents using singular perturbation techniques p 893 A85-47566

Simulation's role in the development of the fuel efficient Boeing 757 and 767 airplanes p 881 A85-49012

The MCA method of determining thrust of jet aircraft in flight — Mass Consumption-Acceleration
p 881 A85-49134

The Delco Performance Management System
p 895 A85-49172

ACEE program rationale and implementation
[NASA-TM-84549] p 2 N85-10908

Fuel efficiency through new airframe technology
[NASA-TM-84548] p 2 N85-10909

Hybrid laminar flow control study
[NASA-CR-165930] p 21 N85-10933

Energy efficient engine flight propulsion system preliminary analysis and design report
[NASA-CR-174701] p 28 N85-10947

Energy efficient engine. Volume 1: Component development and integration program
[NASA-CR-173084] p 34 N85-10992

Combined cycle ramjet engine
[AD-D011247] p 178 N85-14859

Reference energy-altitude descent guidance: Simulator evaluation — aircraft descent and fuel conservation
[NASA-TP-2383] p 261 N85-16866

Collegium on aviation fuel conservation efforts
p 343 N85-18034

Effect of water injection into air for turbine cooling on economy of operation of gas turbine engine with afterburning p 509 N85-22830

Deputy minister on civil aviation fuel conservation efforts p 500 N85-23891

Safety recommendation(s), A-84-103
[REPT-3909B/101B] p 484 N85-23745

Aviation workers plenum reviews fuel conservation progress p 542 N85-25197

Ilyushin bureau designer on fuel conservation research
p 584 N85-25231

Planning fuel-conservative descents in an airline environmental using a small programmable calculator: Algorithm development and flight test results
[NASA-TP-2393] p 579 N85-26705

Energy efficient engine high-pressure turbine component rig performance test report
[NASA-CR-168189] p 772 N85-29955

Energy efficient engine integrated core/low spool test hardware design report
[NASA-CR-168137] p 772 N85-29956

Energy Efficient Engine (E3) controls and accessories detail design report
[NASA-CR-168017] p 772 N85-29957

FAA requirements for model to support capacity, delay, noise and energy programs
[AD-A155815] p 880 N85-35179

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 1
[NASA-CR-167862] p 913 N85-35534

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 2
[NASA-CR-167863] p 913 N85-35535

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 3
[NASA-CR-167864] p 913 N85-35536

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 4
[NASA-CR-167865] p 913 N85-35537

**FUEL CONTAMINATION**

The determination of biological impurities in fuels
p 179 A85-16949

**FUEL CONTROL**

Adaptive fuel control for helicopter applications
p 110 A85-14049

Development flight test of the full authority digital fuel control in the HH-65A helicopter p 506 A85-31966

Control of fuel during starting of a gas turbine
[SAE PAPER 841511] p 661 A85-39155

Development of low cost digital control system for small gas turbine engine p 769 A85-41839

A new era of fuel controls p 869 A85-48073

An electronic limiter for aircraft engines
[SAE PAPER 850910] p 890 A85-50122

Energy Efficient Engine (E3) controls and accessories detail design report
[NASA-CR-168017] p 772 N85-29957

An experimental investigation of fuel regression rate control in solid fuel ramjets
[AD-A154251] p 782 N85-30008

**FUEL FLOW**

The effect of the operating parameters on the temperature field of gas flow behind a system of radial stabilizers p 350 A85-23995

Analysis of unsteady inviscid diffuser flow with a shock wave p 580 A85-34010

Energy efficient engine high-pressure turbine component rig performance test report
[NASA-CR-168189] p 772 N85-29955

Detailed studies of aviation fuel flowability
[NASA-CR-174938] p 788 N85-31306

A comparison of two bench scale tests of fuel low temperature flow properties
[AD-A154477] p 788 N85-31311

**FUEL FLOW REGULATORS**

Pipeline control system with high safety reliability — for transportation of aviation fuels p 778 A85-40543

**FUEL GAGES**

Digital fuel quantity indicating system for aircraft
[AIAA PAPER 84-2602] p 163 A85-17805

**FUEL INJECTION**

Liquid-fueled ramjets
[ONERA, TP NO. 1984-112] p 111 A85-15832

Transverse jet breakup and atomization with rapid vaporization along the trajectory p 444 A85-29092

Fuel droplet size measurements with a laser Doppler interferometer
[AIAA PAPER 85-1182] p 697 A85-39643

Fuel injection characterization and design methodology to improve lean stability
[AIAA PAPER 85-1183] p 664 A85-39644

Small gas turbine combustor study - Fuel injector performance in a transpiration-cooled liner
[AIAA PAPER 85-1312] p 668 A85-39717

Influence of downstream distance on simplex atomizer spray characteristics
[ASME PAPER 84-WA/HT-25] p 698 A85-39888

Recent advances in vaporiser fuel injection technology
p 768 A85-41794

Finlet injector
[AD-D011245] p 180 N85-14891

Segmented zoned fuel injection system for use with a combustor
[AD-D011640] p 670 N85-27865

Research test facility for evaporation and combustion of alternative jet fuels at high air temperatures
[AD-A153830] p 691 N85-29073

**FUEL PRODUCTION**

Jet fuel property changes and their effect on producibility and cost in the U.S., Canada, and Europe
[NASA-CR-174840] p 598 N85-27012

**FUEL PUMPS**

Hydrodynamic simulation of transient processes in injection system of aircraft engines during pump unswerling p 509 N85-22829

**FUEL SPRAYS**

Determination of liquid-fuel prevaporization and premixing in gas-turbine combustion chambers — German thesis p 443 A85-28796

Transverse jet breakup and atomization with rapid vaporization along the trajectory p 444 A85-29092

Fuel droplet size measurements with a laser Doppler interferometer
[AIAA PAPER 85-1162] p 697 A85-39643

Influence of downstream distance on simplex atomizer spray characteristics
[ASME PAPER 84-WA/HT-25] p 698 A85-39665

Research test facility for evaporation and combustion of alternative jet fuels at high air temperatures
[AD-A153830] p 691 N85-29073

**FUEL SYSTEMS**

Gas turbine airblast atomizers - A review. I
p 420 A85-29343

Heat management system for aircraft
[AD-D011658] p 654 N85-28936

Energy Efficient Engine (E3) controls and accessories detail design report
[NASA-CR-168017] p 772 N85-29957

**FUEL TANKS**

Design and fabrication of crashworthy composite external fuel tanks p 104 A85-15630

New high temperature and fuel resistant sealants based on Permapol P-3, polythioether polymers
p 178 A85-16052

Computer geometric simulation of cruise missile center of gravity versus fuel consumption
[SAWE PAPER 1511] p 159 A85-18804

A new approach to durability prediction for fuel tank skins
[AIAA PAPER 85-0602] p 505 A85-30331

Adhesive sealing for integral fuel tanks
[SAWE PAPER 1573] p 901 A85-49901

Aircraft wing fuel tank environmental simulator tests for evaluation of antimisting fuels
[FAA-CT-84-15] p 283 N85-15920

Distribution and storage of aviation turbine fuel for military operations in northern Australia
[AD-A147180] p 283 N85-15921

Preliminary airworthiness evaluation AH-1S (MC) helicopter with external fuel tanks installed
[AD-A148091] p 258 N85-16865

BI-PAC F-15 external fuel tank container modification
[AD-A148836] p 344 N85-18053

Interactions between F-111 fuselage fuel tank sealants. Part 2: Variation in performance properties of polysulfides after contact with polyester degradation products
[AD-A149777] p 438 N85-21368

Fuel freeze point investigations
[AD-A152801] p 690 N85-28129

Fuel containment and damage tolerance in large composite primary aircraft structures
[NASA-CR-166083] p 787 N85-30032

Fuel containment and damage tolerance for large composite primary aircraft structures. Phase 1: Testing
[NASA-CR-166091] p 902 N85-35241

**FUEL TESTS**

Fuel effects on gas turbine combustion-liner temperature, pattern factor, and pollutant emissions
p 26 A85-11984

Handbook of aviation fuel properties
[CRC-530] p 43 A85-12651

The fuel property/flame radiation relationship for gas turbine combustors p 111 A85-15350

The effect of esters on 'antiwear' properties of jet engine fuel obtained by hydrofining p 179 A85-16950

Fuel effects on the TF30 engine (Alternate Test Procedure)
[ASME PAPER 84-JPGC-GT-1] p 349 A85-23191

A method for the evaluation of the boundary lubricating properties of aviation turbine fuels p 687 A85-37495

Fuel injection characterization and design methodology to improve lean stability
[AIAA PAPER 85-1183] p 664 A85-39644

Combustion efficiency of a hydrogen-kerosene fuel in a straight-through channel p 836 A85-46221

Observations of the use of the setapoint detector
[AD-A154533] p 853 N85-32208

**FUEL VALVES**

Man-vehicle systems research facility advanced aircraft flight simulator throttle mechanism p 856 N85-33527

**FUEL-AIR RATIO**

delta function and generalized tables of thermodynamic properties for CnHm-air system combustion products
p 43 A85-12358

Control of fuel during starting of a gas turbine
[SAE PAPER 841511] p 661 A85-39155

Technology for the design of high temperature rise combustors
[AIAA PAPER 85-1292] p 668 A85-39705

Critical assessment of thermophysical properties data of combustion gases for calculating the performance of gas turbine p 805 A85-41803

Finlet injector
[AD-D011245] p 180 N85-14891

Flow modifying device
[NASA-CASE-LEW-13562-2] p 892 N85-35195

**FUELS**

External fuel vaporization study, phase 2
[NASA-CR-174079] p 45 N85-11252

**FULL SCALE TESTS**

Comparison of scaled model data to full size energy efficient engine test results
[AIAA PAPER 84-2281] p 110 A85-13953

Full-scale testing, production and cost analysis data for the advanced composite stabilizer for Boeing 737 aircraft. Volume 1: Technical summary
[NASA-CR-3649] p 179 N85-13912

Full-scale testing, production and cost analysis data for the advanced composite stabilizer for Boeing 737 aircraft, volume 2
[NASA-CR-166012] p 179 N85-13915

**FUNCTIONAL DESIGN SPECIFICATIONS**

Design study of technology requirements for high performance single-propeller-driven business airplanes
[NASA-CR-3863] p 235 N85-15692

A digital piloting system for the combat helicopter
p 260 N85-16806

Possible technological answers to new design requirements for power transmission systems
p 510 N85-23779

**FUNCTIONALS**

The use of local functionals to construct a circumvention maneuver in game problems of evasion
p 302 A85-22374

Altimetric-gravimetric functional boundary value problem p 799 A85-41177

Analytical construction of flight vehicle surfaces
p 162 N85-14957

**FUNCTIONS (MATHEMATICS)**

Implementation of the supersonic triplet singularity into the USTORE computer code
[CSIR-NIAST-83/47] p 8 N85-10006

**FUSELAGES**

Noise transmission through an acoustically treated and honeycomb stiffened aircraft sidewall
[AIAA PAPER 84-2329] p 62 A85-10873

Laboratory tests on an aircraft fuselage to determine the insertion loss of various acoustic add-on treatments
[AIAA PAPER 84-2330] p 16 A85-10874

A rivet hole sensor for measuring airplane fuselage acoustic pressures
[AIAA PAPER 84-2350] p 47 A85-10886

Propeller noise measurements in DNW on the fuselage of a twin engine aircraft model — German-Dutch wind tunnel
[AIAA PAPER 84-2367] p 17 A85-10897

Alternate approach to aircraft interior noise control. II Self-supporting damped interior shell
[AIAA PAPER 84-2372] p 18 A85-10901

Air flow and particle trajectories around aircraft fuselages. I - Theory p 74 A85-13651

Air flow and particle trajectories around aircraft fuselages. II - Measurements p 106 A85-13652

Optimization of the parameters of transport aircraft with a lift-generating fuselage p 155 A85-17069

Propagation of propeller tone noise through a fuselage boundary layer p 197 A85-18514

Turbulent flow around a wing-fuselage type juncture
[AIAA PAPER 85-0040] p 208 A85-19475

Environmental effects and durability evaluation of advanced composite fuselage structures
p 251 A85-21388

Fabrication and assembly of composite rear fuselage (CRF) tooling and manufacturing for the UH-60 helicopter p 200 A85-21394

Composite curved frames for helicopter fuselage structure p 252 A85-21396

Field-incidence noise transmission loss of general aviation aircraft double-wall configurations
p 304 A85-21842

Continuous filament wound composite concepts for aircraft fuselage structures
[AIAA PAPER 84-0869] p 411 A85-26764

Electromagnetic shielding by a CFC aircraft fuselage — Carbon Fiber Composite p 412 A85-27625

The effect of acoustic/thermal environments on advanced composite fuselage panels
p 445 A85-29251

The effect of source location on the structural-acoustic interaction of an infinite elastic shell
[AIAA PAPER 85-0788] p 523 A85-30390

Designing for a crashworthy all-composite helicopter fuselage p 493 A85-31960

Noise transmission through an acoustically treated and honeycomb-stiffened aircraft sidewall
p 537 A85-32592

Grid generation for wing-tail-fuselage configurations
p 547 A85-35579

Wing optimization and fuselage integration for future generation of supersonic aircraft p 618 A85-37212

Multigrid calculation of transonic flow past wing-tail-fuselage combinations p 628 A85-39216

Simulation of wing, fuselage, and wing/fuselage flowfields using a three-dimensional Euler/Navier-Stokes algorithm
[AIAA PAPER 85-1693] p 718 A85-40775

Strength analysis of aircraft — Russian book
p 757 A85-42124

Approach to interior noise control. II - Self-supporting damped interior shell p 759 A85-42939

The use of active controls to augment rotor/fuselage stability p 776 A85-43220

Crashworthiness of light aircraft fuselage structures: A numerical and experimental investigation
p 20 N85-10399

Analysis of a transport fuselage section drop test
p 21 N85-10400

Modeling of aircraft cabin fires
[NBS-GCR-84-473] p 91 N85-12880

Second sailplane project: The RP-2
p 129 N85-12977

An in-flight investigation of a twin fuselage configuration in approach and landing
[NASA-CR-172366] p 173 N85-13801

A study of crashworthiness of light aircraft fuselage structures: A numerical and experimental investigation
[UTIAS-286] p 149 N85-14803

Turbulent drag reduction research
p 237 N85-16788

Forced corrosion tests of construction components of passenger aircraft fuselages p 436 N85-20062

Study for prediction of rotor/wake/fuselage interference, part 1
[NASA-CR-177340-VOL-1] p 466 N85-22346

Study for prediction of rotor/wake/fuselage interference. Part 2: Program users guide
[NASA-CR-177340-VOL-2] p 467 N85-22347

Redesign of fuselage compartments by method of special contours p 500 N85-22784

Normal mode calculations for fuselage type intricate structures by regarding them as systems with superposed constraints p 500 N85-22817

Development of a fuselage forward section in Carbon Fiber Reinforced Plastic (CFRP) type of construction
[MBB/LFA34/CFK/PUB/008] p 651 N85-27851

A survey of recent development in helicopter aerodynamics p 653 N85-28915

Impact dynamics research on composite transport structures
[NASA-TM-86391] p 797 N85-30367

Fuselage upwash effects on RSRA rotor systems
[NASA-CR-177349] p 743 N85-31013

Estimation of dynamic rotor loads for the rotor systems research aircraft: Methodology development and validation
[NASA-CR-177362] p 760 N85-31045

Simulation and analysis of airborne antenna radiation patterns p 797 N85-31342

Wind tunnel drag evaluations of helicopter nose sections
[AD-A155489] p 818 N85-32100

Aerodynamic characteristics of a distinct wing-body configuration at Mach 6: Experiment, theory, and the hypersonic isolation principle
[NASA-TP-2467] p 818 N85-33107

Ground-based and in-flight simulator studies of flight characteristics of a twin-fuselage passenger transport airplane during approach and landing
[NASA-TP-2451] p 895 N85-34144

## G

**GALERKIN METHOD**

Finite element methods for first-order hyperbolic systems with particular emphasis on the compressible Euler equations p 446 A85-30218

2-D and 3-D Euler flow calculations with a second-order accurate Galerkin finite element method
[AIAA PAPER 85-1706] p 718 A85-40779

A study of internal and distributed damping for vibrating turbomachiner blades
[NASA-CR-175901] p 671 N85-27868

**GALILEO PROJECT**

A high energy stage for the National Space Transportation System
[IAF PAPER 84-15] p 361 A85-23200

**GALLIUM ARSENIDES**

High-temperature optically activated GaAs power switching for aircraft digital electronic control
[NASA-CR-174711] p 116 N85-12901

**GAME THEORY**

Pursuit-evasion between two realistic aircraft
p 131 A85-13632

Validation of zero-order feedback strategies for medium-range air-to-air interception in a horizontal plane
p 70 A85-13702

Zeroth-order feedback strategies for medium-range interception in a horizontal plane p 157 A85-18327
The use of local functionals to construct a circumvention maneuver in game problems of evasion
p 302 A85-22374
To pursue or to evade - That is the question — differential game theory application to air combat
p 381 A85-26426
Eccentric two-target model for qualitative air combat game analysis
[AIAA PAPER 83-2122] p 535 A85-32782
A realistic aerial combat duel as a differential game study p 535 A85-33287
A missile duel between two aircraft
p 703 A85-39563

**GAMMA RAY BURSTS**
Ultra high energy events in ECHOS series and primary energy spectrum
[HE-3.7-9] p 920 N85-35966

**GARBAGE**
Effectiveness of an overhead wire barrier in deterring gulls from feeding at a sanitary landfill
[AD-P004199] p 453 N85-19966

**GAS ANALYSIS**
The pyrolysis toxic gas analysis of aircraft interior materials
[AD-A146285] p 119 N85-12115
Integrated exhaust gas analysis system for aircraft turbine engine component testing
[NASA-TP-2424] p 295 N85-16100

**GAS ATOMIZATION**
Effects of heterogeneity of mixtures on gaseous emissions in premixed/prevaporized combustion
p 793 A85-41800

**GAS BEARINGS**
Experimental research on the design bases for aerodynamic spring bearings — German thesis
p 50 A85-11722
Characteristics of gas-lubricated spherical spiral groove bearings p 365 A85-23628
Innovative eddy current probe coupling method
p 906 A85-47472

**GAS CHROMATOGRAPHY**
The pyrolysis toxic gas analysis of aircraft interior materials
[AD-A146285] p 119 N85-12115
GC-FTIR (Fourier Transform Infrared Spectrometry) of jet fuels
[AD-A148272] p 285 N85-17155
Aspects of high-resolution gas chromatography as applied to the analysis of hydrocarbon fuels and other complex organic mixtures. Volume 1
[AD-A156154] p 902 N85-35257

**GAS COMPOSITION**
Combustion gas properties I-ASTM jet A fuel and dry air
[NASA-TP-2359] p 27 N85-10064
Instrumentation for Application Number 1: Mass spectrometric analysis of the boundary layer associated with the tethered satellite p 433 N85-20372

**GAS COOLING**
Some improvements on an annular combustor of AI type turbojet engine p 264 A85-20235
Kinetics of a gas adsorption compressor
p 436 A85-26504

**GAS DENSITY**
Application of laser interferometry to density measurements in free jets p 206 A85-19406
Density and velocity profiles in non-equilibrium laminar boundary layers in air
[AIAA PAPER 85-0976] p 620 A85-37626

**GAS DYNAMICS**
Supersonic flow over a cone with power-law injection through the cone surface p 3 A85-10465
Calculation of friction and heat transfer in turbulent flow of a compressible gas in a plane duct
p 291 A85-22114
Gasdynamic model and similarity relations for the starting process in supersonic nozzles and jets
p 384 A85-26494
Theoretical principles of turbulence and a simple example of turbulent flow p 460 A85-26742
Implicit Total Variation Diminishing (TVD) schemes for steady-state calculations — in gas dynamics
p 388 A85-28209
The effect of quality of gas jet mixing in the mixing chamber of a subsonic jet pump on the diffuser performance p 442 A85-28374
Problems of contemporary mechanics. Parts 1 & 2
p 442 A85-28376
Variational problems of gas dynamics - Formulations, methods of solution, and the relationship between exact and approximate approaches p 388 A85-28382
Optimal aerodynamic configurations in a twisted hypersonic gas flow p 389 A85-28390
Theory of hypersonic jets p 389 A85-28394
Modeling of gas flows with shock waves — Russian book p 472 A85-31889
Comparison of various numerical techniques in gas dynamics p 475 A85-33354
Transonic small-disturbance theory for dusty gases
p 546 A85-35149
Dynamic gas temperature measurement system
p 694 A85-37706
Instability of plane-parallel supersonic gas flows in the linear approximation p 623 A85-38551
The software pack GRAD for the analysis of gas-turbine engines p 660 A85-39119
Optimum thermogasdynamic design of gas turbine engines by characteristics of element prototypes
p 170 N85-14965
On limits of applicability of linear models to dynamics of gas channels in aircraft engines p 355 N85-18219
Hypersonic flow about triangular airfoil at large angles of attack p 477 N85-22792
Automating the study of error in discrete aerodynamic fairing design p 504 N85-24176
Gasdynamic evaluation of choking cascade turns
[AD-A151854] p 603 N85-25776
R and D activities of the Propulsion Division
p 799 N85-32025

**GAS EXPANSION**
Study of stresses on surface of flat barrier immersed in under expanded jet of rarefied gas
p 562 N85-27061

**GAS FLOW**
Two-dimensional unsteady flow in Comprex rotor
p 123 A85-13995
The buckling of a stiffened cylindrical shell heated by an internal gas flow with varying thermodynamic parameters p 168 A85-16916
Euler solution of axisymmetric flows about bodies of revolution using a multigrid method
[AIAA PAPER 85-0017] p 206 A85-19460
The fundamental equations of 3-dimensional two-phase particulate gas flow and a twofold stream surfaces model of solution for particulate gas flow in turbomachines
p 228 A85-20233
An extremum problem concerning the shape of a body of revolution in supersonic gas flow p 234 A85-22371
The problem of gradual opening in wave rotor passages p 365 A85-23387
A full Navier-Stokes solution of viscous gas flow through profile cascade on S1 stream surface of revolution employing nonorthogonal curvilinear coordinate system
p 385 A85-26699
An assessment of numerical solutions of the compressible Navier-Stokes equations
p 526 A85-32582
Design and testing of axisymmetric nozzles for ion-molecule reaction studies between 20 K and 160 K
p 596 A85-33537
Experimental investigation of heat transfer to bluff cylinders and cones in hypersonic rarefied gas flow
p 548 A85-35747
Gas flow in nozzles and jets p 619 A85-37337
Determination of aerodynamic characteristics of bodies in weakly perturbed gas flows p 619 A85-37341
Low density aerothermodynamics
[AIAA PAPER 85-0994] p 620 A85-37640
Similarity properties in the problem of flow from a supersonic source past a spherical bluntness
p 629 A85-39445
Application of 3-D flow computations to gas turbine aerodynamic design
[AIAA PAPER 85-1216] p 630 A85-39659
Preliminary mechanical redesign of an existing gas-turbine engine to incorporate a high-efficiency, low-pressure-ratio, highly regenerative cycle for marine applications
[AD-A144808] p 28 N85-10070
Efficiency of algorithms for gas-air channel diagnostics in gas turbine engines based on gas thermodynamic parameters p 508 N85-22823
Solid state compressor
[AD-A150790] p 531 N85-24302
Aerodynamic forces developing in channels between vases in turbine drive wheels p 606 N85-27062
Hypersonic nonequilibrium gas flow past zero-aspect wing p 562 N85-27063
Flow characteristics of a partially submerged liquid pickup
[DE85-008744] p 699 N85-28276
Unsteady transonic heat transfer in a transient facility
[NASA-CR-176145] p 910 N85-34354

**GAS GENERATORS**
Design for military aircraft on-board inert gas generation systems
[AIAA PAPER 84-2518] p 109 A85-13581
Secondary power unit options for advanced fighter aircraft
[AIAA PAPER 85-1280] p 666 A85-39696

**GAS GUNS**
An assessment of the effect of the use of conventional weapons on the operation of a jet engine
p 383 A85-27720

**GAS INJECTION**
The effect of vibration on film cooling over a gas turbine blade p 168 A85-16576
Effect of the arrangement of apertures on the gain coefficient during asymmetric gas injection into a Laval nozzle p 229 A85-20562
A nonstationary transition process caused by injection of a gas into the near wake of a body in a supersonic flow p 619 A85-37336
An experimental investigation of fuel regression rate control in solid fuel ramjets
[AD-A154251] p 782 N85-30008

**GAS JETS**
Hypersonic multicycle gas jet with a strongly underexpanded stream at the nozzle section
p 229 A85-20554

**GAS LASERS**
Peripheral vision displays: The future
p 24 N85-10058

**GAS MIXTURES**
An approximate method for calculating flow in the mixing chambers of bypass engines under conditions of incomplete mixing of gas flows p 350 A85-23959
Effects of heterogeneity of mixtures on gaseous emissions in premixed/prevaporized combustion
p 793 A85-41800
Hypersonic flow of mixture around blunt body
p 148 N85-14979

**GAS PRESSURE**
Newton iteration formulas for correcting temperature and pressure in thermodynamic calculation of rocket engines
p 279 A85-20226
A linearly correcting method of deviation function for considering the influence of pressure on the thermodynamic properties of combustion gas
p 304 A85-20236

**GAS STREAMS**
Method of calculating separation flow of subsonic gas stream around wings p 636 N85-28161

**GAS TEMPERATURE**
Newton iteration formulas for correcting temperature and pressure in thermodynamic calculation of rocket engines
p 279 A85-20226
Analysis of the transient and steady-state heat transfer in rotary regenerative heat exchanger
p 366 A85-24098
Dynamic gas temperature measurement system
p 694 A85-37706
Application of 3-D aerothermal model and flow visualization technique to the combustor exit gas temperature study
[AIAA PAPER 85-1313] p 668 A85-39718
Experimental study of temperature effect on turbine vane cooling performance with multi-row ejection
p 768 A85-41788
HOST instrumentation R and D program overview
p 29 N85-10957
Dynamic gas temperature measurement system
p 29 N85-10958

**GAS TURBINE ENGINES**
Application and test verification of finite element analysis for gas turbine extended reaction exhaust muffler systems
[AIAA PAPER 84-2334] p 26 A85-10878
Internal flows of relevance to gas-turbines
p 49 A85-11635
Periodic internal flows — in gas turbines
p 5 A85-11643
Crack arrest in structural ceramics p 41 A85-11671
Energy characteristics of the combustion chambers of an aircraft engine when operating on natural gas
p 26 A85-11839
Aerodynamic improvement of the reducer of a gas turbine p 6 A85-11840
An experimental study of the start-up of a gas turbine engine by means of compressed air and an electric starter p 51 A85-11842
Reactions of NaCl with gaseous SO3, SO2, and O2
p 42 A85-11897
Fuel effects on gas turbine combustion-liner temperature, pattern factor, and pollutant emissions
p 26 A85-11984
The fuel property/flame radiation relationship for gas turbine combustors p 111 A85-15350
Flight tests of special powerplant equipment and systems for fixed-wing aircraft and helicopters — Russian book p 111 A85-15822
Sensor failure detection for jet engines using analytical redundancy
[AIAA PAPER 84-1452] p 167 A85-16097

Solving the inverse problem of determining the thermodynamic properties of the working medium of gas turbine engines p 168 A85-17077

Aeronautical gas turbines - I p 168 A85-18721

Aeronautical gas turbines. II p 169 A85-18722

Considerations for damage analysis of gas turbine hot section components
[ASME PAPER 84-PVP-77] p 169 A85-18792

Computational thermo-fluid dynamics contributions to advanced gas turbine engine design
[AIAA PAPER 85-0083] p 262 A85-19509

A procedure for the optimization of the aerothermodynamic design of multistage axial compressors — German thesis p 227 A85-19851

The challenge from ceramics to metals in the gas turbine and related areas p 280 A85-20150

A linearly correcting method of deviation function for considering the influence of pressure on the thermodynamic properties of combustion gas p 304 A85-20236

Off-design point characteristics of the precooled gas turbine cycle with liquefied hydrogen as fuel p 289 A85-20884

Aeronautical gas turbines. III p 264 A85-21420

Prediction of performance of aircraft gas turbines p 264 A85-21682

Analysis of a split-flow inertial particle separator by finite elements — for helicopter gas turbine engine p 231 A85-21845

Swirling flow in a research combustor p 283 A85-21863

Effects of friction dampers on aerodynamically unstable rotor stages p 265 A85-21866

Influence of blowing rate and injection angle on the performance of a film-cooled blade p 265 A85-22231

A study of characteristics of the 'long' hydrodynamic dampers of gas turbine engine rotors with allowance for lubricant turbulization and cavitation in the damper clearance p 349 A85-23978

An experimental study of the rotating stall structure in an axial-flow compressor p 350 A85-23987

Elements of the functional decomposition of aircraft turbomachines during their synthesis using a computer-aided blade design system p 350 A85-23993

The effect of the operating parameters on the temperature field of gas flow behind a system of radial stabilizers p 350 A85-23995

The use of grooves in the housings of axial-flow compressors with increased radial clearances p 350 A85-23999

An experimental study of the hydraulic characteristics of air flow in the cooling slots of the nozzle guide vanes of gas turbine engines p 350 A85-24001

Multilevel methods in the dynamics of the rotors of aircraft engines p 351 A85-24020

Analysis of starting performance of the single shaft gas turbines by theory of similarity p 351 A85-25211

Calculation and analysis of the off-design performance of split shaft gas turbine p 351 A85-25212

The solution of variational finite element method for the inverse problem on S2 relative stream surface in turbines p 318 A85-25215

A experiment method to determine the air distribution of the holes along the flametube of gas turbine combustor p 351 A85-25223

International perspective on ceramic heat engines
[ACS PAPER 1-J111-84] p 363 A85-25268

Evolution in the U.S. of ceramic technology for turbine engines
[ACS PAPER 3-JIII-84] p 363 A85-25269

Corrosion-inhibiting gas-turbine engine lubricant. I Accelerated test development and validation
[ASLE PREPRINT 84-AM-5D-3] p 363 A85-25961

Corrosion-inhibiting gas-turbine engine lubricant. II - Fluid formulation and evaluation
[ASLE PREPRINT 84-AM-5D-4] p 363 A85-25962

The evolution of high-thrust turbojet engine technology p 353 A85-26017

Determination of the service life of oils in aircraft gas turbine engines p 364 A85-26280

Reduction gears of gas-turbine engines for aircraft and helicopters p 441 A85-27719

Determination of liquid-fuel prevaporization and premixing in gas-turbine combustion chambers — German thesis p 443 A85-28796

Advanced research instrumentation for aircraft turbomachinery
[SAE PAPER 841502] p 444 A85-28900

Calculation of the disturbance to combustion chamber film cooling due to air injection through a row of jets p 420 A85-29048

Natural mode analysis of N blades disc coupled system - Modal synthesis of symmetric structure with Cnv group p 445 A85-29147

Gas turbine airblast atomizers - A review. I p 420 A85-29343

Factors influencing heat transfer to the pressure surfaces of gas turbine blades p 421 A85-29345

Design and experimental investigation of a high-loaded transonic axial model turbine p 421 A85-29695

Inspection of gas-turbine engine blades under operating conditions p 421 A85-29775

Condition monitoring of helicopter gearboxes using automatic vibration analysis techniques
p 510 N85-23790
Transmission error measurements in gearbox development p 529 N85-23794
An analytical investigation of dynamic coupling in nonlinear, geared rotor systems p 607 N85-27218
Fatigue life analysis of a turboprop reduction gearbox
[NASA-TM-87014] p 608 N85-27228
A phase-locked frequency multiplier for the signal averaging of the vibration of the Wessex helicopter input spiral bevel pinion
[AD-A154914] p 829 N85-32113
Proposal for modifications to the Wessex helicopter main rotor gearbox vibration monitoring program
[AD-A155196] p 830 N85-32117
Some problems in high speed gears and gearing
p 910 N85-34312
Planetary-gear-support bearing test rig design
[NASA-CR-174927] p 886 N85-35185

**GENERAL AVIATION AIRCRAFT**

Design parameters for flow energizers — highly swept strakes mounted above lifting surfaces
[AIAA PAPER 84-2499] p 74 A85-13570
Designing a personal aircraft - The Mooney 201
p 103 A85-14015
A computer program for assisting in the preliminary design of twin-engined propeller-driven general aviation aircraft p 156 A85-17227
Effect of precipitation static on general aviation digital avionics
[AIAA PAPER 84-2641] p 157 A85-17830
Current and future general aviation EFIS developments — electronic flight instrumentation systems
[AIAA PAPER 84-2642] p 164 A85-17831
Glasswind Gemini - The next step — in homebuilt general aviation aircraft design
[SAWE PAPER 1528] p 159 A85-18813
Analysis and testing of the Diamond One wing anti-icing system
[AIAA PAPER 85-0414] p 286 A85-19735
A summary of NASA's research on the fluid ice protection system
[AIAA PAPER 85-0467] p 241 A85-19768
Analysis of fatal accidents involving light aircraft weighing up to two tons and their causes in the context of flight medicine — German thesis p 241 A85-19846
Field-incidence noise transmission loss of general aviation aircraft double-wall configurations
p 304 A85-21842
Aircraft noise annoyance at three joint air carrier and general aviation airports p 452 A85-27359
Discontinuous wing leading edge to enhance spin resistance p 424 A85-29255
General aviation avionics - An overview
p 410 A85-29873
Autogas in airplanes? p 435 A85-29875
Aerodynamic canard/wing parametric analysis for general-aviation applications p 473 A85-32587
Porsche's new light-aircraft engine
p 581 A85-35354
Design parameters for flow energizers — of general aviation aircraft p 547 A85-35582
Taming the deadly spin p 584 A85-36146
Ultralights break the rules p 615 A85-38439
Status and development trends of navigation systems for general aviation p 746 A85-40292
MU-300 flight test data system p 762 A85-40977
Radio Technical Commission for Aeronautics, Annual Assembly Meeting and Technical Symposium, Washington, DC, November 13-15, 1984, Proceedings
p 809 A85-44303
The coming impact of general aviation aeroplane and rotorcraft on the world's aviation systems
p 810 A85-44304

Flight management and other aircraft systems development p 810 A85-44305
The coming mix of helicopters and general aviation operations p 819 A85-44306
Structural plastics in sporting and general aviation aircraft p 865 A85-48571
Advanced flight training offered to corporate aviators p 897 A85-48858
The growing impact of general aviation on the world's aviation system p 877 A85-48861
Advanced technologies promise sales boost for general aviation aircraft p 885 A85-49089
Star in the making — Astra business aircraft with swept supercritical wing p 882 A85-49656
Crashworthy design considerations for general aviation seats
[SAE PAPER 850855] p 884 A85-50101
Single-engine propulsion improvement through intercooling
[SAE PAPER 850894] p 890 A85-50114
Porsche aircraft engine P F M 3200
[SAE PAPER 850895] p 890 A85-50115
Air-cycle air conditioning of turbine-powered general aviation and commuter aircraft
[SAE PAPER 850901] p 885 A85-50118
Head-up displays for general aviation
[SAE PAPER 850902] p 889 A85-50119
Conversion of small aircraft to Allison turbine power
[SAE PAPER 850906] p 890 A85-50120
Improved capabilities of the new general aviation digital autopilots
[SAE PAPER 850914] p 895 A85-50125
USAF damage tolerance methods applied to general aviation aircraft design and analysis
[SAE PAPER 850915] p 885 A85-50126
Flight testing a liquid ice protection system on a single-engine airplane
[SAE PAPER 850923] p 865 A85-50129
Sport aircraft design trends - Shaping the future of general aviation
[SAE PAPER 850881] p 886 A85-50130
Review of aircraft accident data: US General Aviation
[PB84-230960] p 14 N85-10027
Full-scale crash-test evaluation of two load-limiting subfloors for general aviation airframes
[NASA-TP-2380] p 129 N85-13267
Annual review of aircraft accident data: US general aviation, calendar year, 1981
[PB84-230960] p 150 N85-14805
Design study of technology requirements for high performance single-propeller-driven business airplanes
[NASA-CR-3863] p 235 N85-15692
Some characteristics of automotive gasolines and their performance in a light aircraft engine
[FAA-CT-84-12] p 283 N85-15919
Aerodynamic-structural study of canard wing, dual wing, and conventional wing systems for general aviation applications
[NASA-CR-172529] p 238 N85-16829
The design of sport and touring aircraft
[NASA-TM-77783] p 344 N85-18975
Wind-tunnel investigation of a full-scale canard-configured general aviation airplane
[NASA-TP-2382] p 395 N85-19925
Circulation control propellers for general aviation, including a BASIC computer program
[NASA-CR-165968] p 773 N85-29959
FAA regulation of 9-seat and under passenger aircraft
[GPO-42-703] p 747 N85-31032
Quest for performance: The evolution of modern aircraft
[NASA-SP-468] p 811 N85-32089

**GENERAL DYNAMICS AIRCRAFT**
Modernization in aerospace — productivity and quality improvement p 709 A85-43190
Adhesive sealing for integral fuel tanks
[SAWE PAPER 1573] p 901 A85-49901

**GEOCHRONOLOGY**
Thermoluminescence studies on Jilin meteorite p 463 A85-28043

**GEODESY**
A numerical experiment in the altimetry-gravimetry problem II p 800 A85-41395
Program INNAVSAT: Global Positioning System (GPS): Test and demonstration program

**GEOMAGNETISM**
Geopotential Research Mission - Status report p 800 A85-42469

**GEOMETRIC ACCURACY**
OMEGA navigation system position-fix accuracy assessment p 93 A85-14828

**GEOMETRIC DILUTION OF PRECISION**
Geometric deterioration of precision - The case of Navstar (GPS) and multilateral systems p 821 A85-44054

**GEOMETRIC RECTIFICATION (IMAGERY)**
An algorithm for radiometric and geometric correction of digital SLAR data p 56 A85-11216
Evaluation of aircraft MSS analytical block adjustment p 439 A85-26641

**GEOMETRICAL ACOUSTICS**
Penetration of aircraft noise into an open configuration airport terminal building p 37 A85-10408

**GEOMETRICAL THEORY OF DIFFRACTION**
On aircraft antennas and basic scattering studies
[AD-A146017] p 127 N85-12282

**GEOMETRY**
A conformal mapping suitable for problems involving interaction between given geometries and known far fields
[AD-A149050] p 376 N85-19744
Experimental study of main rotor tip geometry and tail rotor interactions in hover. Volume 1. Text and figures
[NASA-CR-177336-VOL-1] p 466 N85-22344
Experimental study of main rotor tip geometry and tail rotor interactions in hover. Volume 2: Run log and tabulated data
[NASA-CR-177336-VOL-2] p 466 N85-22345
A study of aerodynamic control in stalled flight leading-edge vortex formation analysis
[AD-A153758] p 638 N85-28928

**GEOPHYSICS**
Use of gravitational stabilization in performance of experiments p 40 N85-11084

**GEOPOTENTIAL**
Radial variations of a satellite orbit due to gravitational errors - Implications for satellite altimetry p 452 A85-28140
Altimetric-gravimetric functional boundary value problem p 799 A85-41177
Geopotential Research Mission - Status report p 800 A85-42469

**GEOSYNCHRONOUS ORBITS**
Orbit control of a synchronous satellite — Russian book p 899 A85-49448

**GEOTHERMAL RESOURCES**
Navy geothermal plan
[AD-A152478] p 702 N85-28450

**GERT**
A Q-GERT network simulation model for examining pipeline time in the Navy's J-52 intermediate level jet engine repair cycle
[AD-A147289] p 201 N85-15663

**GIMBALS**
The modelling and control of RC helicopter — Radio Control p 115 A85-15657

**GLARE**
Removable cleanable antireflection shield
[AD-D011735] p 663 N85-33810

**GLASS**
Impact fracture of thermally tempered glass helicopter windshields
[ACS PAPER 41-G-83F] p 363 A85-25084

**GLASS COATINGS**
Effect of variable surface catalysis on heating near the stagnation point of a blunt body
[AIAA PAPER 85-0248] p 323 A85-26366

**GLASS FIBER REINFORCED PLASTICS**
The application of endless-fiber reinforced polymers p 119 A85-15580
Design and development of a pultruded FRP laminate to replace aluminum shape in a high stress high fatigue application p 119 A85-15629
Development of a filament wound composite shaft for an aircraft generator p 126 A85-15962
Energy absorbing qualities of fiber reinforced plastic tubes p 282 A85-21393
Properties of glass and carbon fiber fabrics used in helicopter rotors
[MBB-UD-424-84-OE] p 541 A85-35254
Fracture behavior of glass-cloth/polyester composite laminate at low temperature p 688 A85-39228
Prefabricated panels for rapidly runway repair and expedient airfield surfacing
[AD-D011277] p 177 N85-13804
System for rapid repair of damaged airfield runways
[AD-D011325] p 276 N85-15754
Expedient runway surfacing with post tensioning system for expeditionary airfields
[AD-D011677] p 781 N85-29976

**GLASS FIBERS**
Preliminary evaluation of an improved flammability test method for aircraft materials
[FAA-CT-84-22] p 242 N85-16840

**GLIDE LANDINGS**
Glideslope descent-rate cuing to aid carrier landings p 409 A85-29124
Terminal control of gliding in atmosphere p 174 N85-14968

**GLIDE PATHS**
Isochrones for maximum endurance horizontal gliding flight p 158 A85-18348
Nonlinear simulation of flight along wind compensating curved glidepaths p 245 A85-21838
Investigation of the use of radar data for the measurement of parachute rate of descent and glide ratio p 331 A85-22764
Glideslope descent-rate cuing to aid carrier landings p 409 A85-29124
Realistic localizer courses for aircraft instrument landing simulators
[NASA-CR-172333] p 105 N85-12885
A cockpit-display concept for executing a multiple glide-slope approach for wake-vortex avoidance
[NASA-TP-2386] p 261 N85-16869
Total energy-rate feedback for automatic glide-slope tracking during wind-shear penetration
[NASA-TP-2412] p 515 N85-23801
Theoretical investigation of single-frequency 8-element localizer signal scattering for critical area determination
[FAA-PM-85-4] p 751 N85-31037

**GLIDERS**
The design of airfoils at low Reynolds numbers
[AIAA PAPER 85-0074] p 209 A85-19500
A comparison of flight test and analytical techniques for boundary layer transition on a sailplane
[AIAA PAPER 85-0075] p 210 A85-19501

Helicopter ground resonance - A spatial model analysis p 18 A85-11473
Aerodynamics of an airfoil in ground effect with a jet issuing from its undersurface
[AIAA PAPER 85-0019] p 207 A85-19461
A novel experimental facility for conducting jet impingement studies related to VTOL aircraft
[AIAA PAPER 85-0052] p 209 A85-19484
Ground-effect analysis of a jet transport airplane
[AIAA PAPER 85-0307] p 248 A85-19677
Ground interference effects on subsonic dynamic stall in pitch and plunge p 231 A85-21841
Parameters affecting helicopter interactional aerodynamics in ground effect p 314 A85-23147
Wing-in-ground effect aerodynamic predictions using PANAIR
[AIAA PAPER 84-2429] p 322 A85-26321
The effect of design parameters on the ground resonance of helicopters p 493 A85-31780
A method for computing the drag rise Mach number for any aerofoil section p 472 A85-31781
Wall lift interference corrections in ground effect testing p 592 A85-35781
Dynamic ground effects on a two-dimensional flat plate p 628 A85-39226
Effects of a central fence on upwash flows
p 817 A85-45839
Quantification of downwash and ground vortex of a lifting rotor model by flow visualization technique
p 867 A85-47134
Ground-effect analysis of a jet transport airplane
[NASA-TM-85920] p 234 N85-15687
Hover test results of a small-scale twin-tilt nacelle model
[NASA-TM-86665] p 478 N85-23706
Structures and Dynamics Division research and technology plans for FY 1985 and accomplishments for FY 1984
[NASA-TM-86417] p 605 N85-25895
Effect of ground and/or ceiling planes on thrust of rotors in hover
[NASA-TM-86754] p 743 N85-31014
Aerodynamic measurement of the wind flow in the number two section of the SIMA wind tunnel
[ONERA-PV-1/8138-GY] p 743 N85-31019
Ground effect on helicopter aerodynamics and stability
p 776 N85-31063
**GROUND EFFECT (COMMUNICATIONS)**
Effect of counterpoise on VOR antenna radiation patterns p 566 A85-33999
**GROUND EFFECT MACHINES**
Computer simulation of hovercraft heave dynamics and control p 66 A85-11685
Initial experience with a three plenum cell air cushion equipment transporter p 198 A85-17231
Skirt material effects on air cushion dynamic heave stability p 307 A85-21840
The effect of the fan characteristic on the dynamics of a stand supported by excess pressure — for air cushion devices p 315 A85-23998
International Conference on Air Cushion Technology, Vancouver, Canada, September 25-27, 1984, Preprints
p 462 A85-28476
Hovercraft skirt design and manufacture
p 694 A85-38233
Dynamic characteristics of peripheral jet ACV. I - Heaving motion p 791 A85-40965
Dynamic characteristics of peripheral jet ACV. II - Pitching motion p 791 A85-41001
Dynamic characteristics of peripheral jet ACV. III - Coupling motion of heaving and pitching
p 791 A85-41006
Finger materials for air cushion vehicles. Volume 2: Base fabrics for finger materials
[AD-A149701] p 448 N85-21408
Impact studies of a 1/3-scale model of an air cushion vehicle
[NASA-TM-86360] p 501 N85-23757
Finger materials for air cushion vehicles. Volume 1: Flexible coatings for finger materials
[AD-A151438] p 601 N85-25545
Operational noise data for the LACV-30 air cushion vehicle
[AD-A154083] p 806 N85-30773
**GROUND HANDLING**
Advanced baggage/cargo handling
[SAE PAPER 840711] p 332 A85-26315
Thrust vectored take-off, landing and ground handling of an airship
[AIAA PAPER 85-0877] p 641 A85-38792
**GROUND RESONANCE**
Study to eliminate ground resonance using active controls
[NASA-CR-166609] p 255 N85-15715
Aerodynamic performance of a wing in ground effect using the PANAIR program
[AD-A153303] p 635 N85-27832
**GROUND SPEED**
Geomagnetic velocimeter
[AD-D011672] p 764 N85-29953
**GROUND STATIONS**
The Geostar Satellite Navigation and Communications System p 94 A85-14629
The structure of a microburst - As observed by ground-based and airborne Doppler radar
p 452 A85-28772
**GROUND SUPPORT EQUIPMENT**
Real time data processing for avionics testing on the A-6E
[AIAA PAPER 84-2666] p 175 A85-17852
The Western Aeronautical Test Range of NASA Ames Research Center
[AIAA PAPER 85-0316] p 275 A85-19678
Aquila, the next-generation RPV - Advanced capability, at a price p 341 A85-25921
Analysis of KC-10 loading alternatives
[SAE PAPER 840701] p 332 A85-26313
Principles of the design of ground support facilities for air transport p 426 A85-27723
Airport surface detection equipment
p 408 A85-27833
Ground support facilities - The way to effective avionics flight testing p 427 A85-28639
New airport ground traffic control system planned
p 96 N85-12006
Equipment for preflight test of an Electronic Countermeasures (ECM) avionic system
p 293 N85-15949
Airport ground equipment under development at Riga
p 380 N85-18038
Improvements in Kazan airport equipment, facilities
p 380 N85-18039
Ministry officials on improving aircraft technical servicing p 468 N85-23697
**GROUND SUPPORT SYSTEMS**
MU-300 flight test data system p 762 A85-40977
**GROUND TESTS**
Ground test experience with large composite structures for commercial transports p 251 A85-21383
A review of complete weapon vibration testing techniques p 426 A85-26555
Uncertainty of turbine engine performance measurements in altitude ground test facilities
p 421 A85-29566
Experimental research on the effect of separation flow on ablation in supersonic turbulent flow
[AIAA PAPER 85-0975] p 694 A85-37625
From measurement uncertainty to measurement communications, credibility, and cost control in propulsion ground test facilities p 682 A85-39243
Efficiencies of multiple-input techniques for aircraft ground vibration testing
[SAE PAPER 841575] p 682 A85-39274
The effect of direct heating on combustion efficiency of the chamber of jet engine in the simulation test on the ground p 835 A85-43699
Flight testing of avionic systems on the ground
p 897 A85-49002
**GROUND WATER**
Installation restoration program. Phase 2: Stage 1 problem confirmation study, Duluth International Airport Duluth, Minnesota
[AD-A148318] p 278 N85-16885
**GROUND WIND**
Wind shear detection technology
[GPO-38-820] p 455 N85-21879
Application of infrared radiometers for airborne detection of clear air turbulence and low level wind shear, airborne infrared low level wind shear detection test
[NASA-CR-175725] p 609 N85-25985
The determination of lee circulation during the foehn wind p 915 N85-35554
**GROUND-AIR-GROUND COMMUNICATION**
An experimental aeronautical satellite data link
[AIAA PAPER 84-2691] p 151 A85-17869
**GRUMMAN AIRCRAFT**
The forward swept wing and the Grumman X-29A
p 4 A85-10546
The X-29 - Is it coming or going? p 572 A85-34699
Twin tilt nacelle V/STOL aircraft
[SAE PAPER 841556] p 650 A85-39208
Gulfstream - Versatility through concentration
p 756 A85-41539
**GUIDANCE (MOTION)**
Dual control guidance for simultaneous identification and interception
[AD-A154607] p 407 A85-27510
A new guidance law for homing missiles
p 488 A85-32793
Guidance, Navigation and Control Conference, Snowmass, CO, August 19-21, 1985, Technical Papers
p 842 A85-45876
On-board near-optimal climb-dash energy management p 21 N85-10931
Certification of advanced systems
p 167 N85-14829
USSR report: Engineering and equipment
[JPRS-UEQ-85-001] p 370 N85-18200
A cost-efficient control procedure for the benefit of all airspace users p 613 N85-26651
**GUIDANCE SENSORS**
Conformal EO sensor development for the AFTI/F-16 — Advance Fighter Technology Integrator
[AIAA PAPER 84-2478] p 92 A85-13556
Optoelectronic guidance instruments for flight vehicles (4th revised and enlarged edition) — Russian book
p 125 A85-15815
Millimeter wave guidance applications - An overview
p 336 A85-24936
Passive millimeter wave imaging for guidance applications p 347 A85-24937
Digital optical transducers for helicopter flight control systems p 368 A85-25331
The first intelligent aircraft p 757 A85-41917
Evaluation of nose, roof, and mast mounted sensor platforms for piloting and sighting, integrated in future combat helicopters p 260 N85-16806

The impact of VLSI on guidance and control system design p 595 N85-26654

**GUIDE VANES**

Calculation of the full cooling efficiency of the perforated wall of a gas turbine nozzle guide vane p 352 A85-25623

Design and performance of a fixed, nonaccelerating guide vane cascade that operates over an inlet flow angle range of 60 deg [ASME PAPER 84-GT-75] p 475 A85-32964

The influence of blade wakes on the performance of outwardly curved combustor pre-diffusers [AIAA PAPER 85-1291] p 667 A85-39704

Repair and rejuvenation procedures for aero gas-turbine hot-section components p 855 A85-45801

Variable inlet vane assembly for a gas turbine combustion [AD-D011220] p 27 N85-10063

Mounting construction for turbine vane assembly [AD-D011395] p 265 N85-15723

Influence of normalized frequency on time-dependent aerodynamic characteristics of vane blading profiles p 370 N85-18204

Gasdynamic evaluation of choking cascade turns [AD-A151854] p 603 N85-25776

Spacer structure [AD-D011641] p 670 N85-27866

**GUNFIRE**

M61A1 gunfire environmental effects on F-14 aircraft structure and equipment p 411 A85-26552

**GUNS (ORDNANCE)**

Microcomputer for aircraft gun-sight p 764 A85-42447

Requirements and design method for matching aircraft guns with their supporting structure p 759 A85-42241

Next generation gunship [AD-A156361] p 887 N85-35193

**GUST ALLEVIATORS**

Application of an adaptive blade control algorithm to a gust alleviation system p 269 A85-20143

Quantifying AFTI/F-16 gust alleviation characteristics using frequency response analysis p 424 A85-28641

Flight test of the gust-alleviation system OLGA [DGLR PAPER 84-094] p 775 A85-40313

Flight test evaluation of active ride control system for tactical aircraft [AIAA PAPER 85-1860] p 843 A85-45889

Flight test technique for evaluation of gust load alleviation analysis methodology [NASA-TM-86344] p 161 N85-14833

Helicopter active control with rotor blades relaxation p 270 N85-16819

Flight test of the Open Loop Gust Alleviation (OLGA) system [BMFT-FB-W-84-038] p 271 N85-16881

OLGA: An open loop gust alleviation p 590 N85-26744

OLGA: An open loop gust alleviation system p 678 N85-27897

Gust load alleviation of a cantilevered rectangular elastic wing. Wind tunnel experiment and analysis [NAK-TR-86] p 681 N85-28950

**GUST LOADS**

Effect of airfoil mean loading on convected gust interaction noise [AIAA PAPER 84-2324] p 133 A85-13955

Motion of a flexible wing at supersonic velocity under the effect of a random gust p 393 A85-30108

Effect of active control system nonlinearities on the L-1011-3(ACS) design gust loads [AIAA PAPER 85-0755] p 511 A85-30374

Unsteady transonic full potential solutions for airfoils encountering vortices and gusts [AIAA PAPER 85-1710] p 719 A85-40782

Aerodynamic responses of turbine rotor blade to sinusoidal gust of large vorticity p 729 A85-41835

Estimation of stochastic gust loads, taking into consideration unsteady air forces p 815 A85-44268

Flight test technique for evaluation of gust load alleviation analysis methodology [NASA-TM-86344] p 161 N85-14833

Evaluating wind flow around buildings on heliport placement [FAA-PM-84-25] p 455 N85-21881

Dynamic wind tunnel testing for active control research p 514 N85-22352

Identification of gust input and gust response characteristics from Do 28 TNT flight test data [DFVLR-FB-84-48] p 676 N85-27881

OLGA: An open loop gust alleviation system p 678 N85-27897

Gust load alleviation of a cantilevered rectangular elastic wing. Wind tunnel experiment and analysis [NAK-TR-86] p 681 N85-28950

**GUSTS**

The effects of gusts on the fluctuating airloads of airfoils in transonic flow p 385 A85-26762

Characteristics of gust front and downdrafts from single Doppler radar data p 453 A85-28779

Composite statistical method for modeling wind gusts for aircraft simulation [AIAA PAPER 85-1750] p 799 A85-40562

Transonic interactions of unsteady vortical flows p 734 A85-42969

Aerodynamics of airfoils subject to 3-dimensional periodic gusts [AD-A145149] p 10 N85-10018

Altitude control using action-demanding interactive displays: Toward an active psychophysics [AD-P004311] p 356 N85-17965

Unsteady aerodynamic characterization of a military aircraft in vertical gusts [NASA-TM-77810] p 396 N85-21110

Transonic interactions of unsteady vortical flows [NASA-TM-86658] p 397 N85-21113

Synthesis study: Validation of a gust generator in the presence of a model in a wind tunnel [ONERA-RT-16/5108-RY-051] p 561 N85-26676

The gust simulation apparatus of the 3m x 3m low speed wind tunnel of the DFVLR in Goettingen, West Germany [DFVLR-FB-85-04] p 684 N85-27920

**GUY WIRES**

Dynamic and aeroelastic action of guy cables [VTT-18] p 608 N85-27276

**GYROSCOPES**

An alignment fixture for a 2-Degree-of-Freedom (TDF) gyroscope [AD-A148885] p 339 N85-18969

Superconducting gyroscope research [NASA-CR-171406] p 604 N85-25795

Low cost two gimbal inertial platform and its system integration p 569 N85-26661

**GYROSCOPIC PENDULUMS**

Description and test methods for a frequency output accelerometer p 694 A85-38536

**GYROSCOPIC STABILITY**

The effect of the force structure on motion stability p 611 A85-35870

Spectral analysis of optimal and suboptimal gyro monitoring filters p 696 A85-39459

Flight dynamics of axisymmetrical rotating bodies in air medium p 477 N85-22791

**H**

**H-53 HELICOPTER**

Improved auxiliary clutch for CH-53 helicopters p 123 A85-13699

**H-60 HELICOPTER**

Fabrication and assembly of composite rear fuselage (CRF) tooling and manufacturing for the UH-60 helicopter p 200 A85-21394

The N/rev phenomenon in simulating a blade-element rotor system p 413 A85-28605

Acoustic vibration characteristics of high contact ratio planetary gears p 524 A85-31954

**HABITATS**

Birds on airports: The reason for their presence p 404 N85-19955

**HALF PLANES**

Experimental investigation of the partial impingement of a jet on a half-plate p 316 A85-24202

**HALOCARBONS**

Flow of nitrogen-pressurized Halon 1301 in fire extinguishing systems [NASA-CR-174271] p 242 N85-15701

**HANDBOOKS**

Antenna engineering handbook /2nd edition/ p 180 A85-16081

The battle against noise in industry p 705 A85-39349

Airborne optical information systems (Handbook) — in Russian p 835 A85-46119

Weight design and efficiency of passenger aircraft. Handbook (2nd revised and enlarged edition) — in Russian p 828 A85-46564

An overview of the MIL-HDBK-5 program [AD-A147788] p 521 N85-23970

International flight planning handbook [AD-A156330] p 878 N85-35177

**HANDLING EQUIPMENT**

Depot modernization at the Defense Logistics Agency [AD-P004008] p 126 N85-11988

**HANG GLIDERS**

FAA regulation of ultralight vehicles p 66 A85-11938

An assessment of the suitability of the BHGA structural test rig for aerodynamic testing of hang gliders [CA-8505] p 652 N85-27853

**HANGARS**

AIRMEC 83 - International Aircraft Maintenance Engineering Exhibition and Conference, 3rd, Duesseldorf, West Germany, April 12-15, 1983, Conference Reports p 311 A85-25225

Hangar destratification investigation [AD-A145049] p 38 N85-10076

Hangar heating and energy conservation manual [AD-A147893] p 277 N85-15762

**HARBORS**

USSR report: Transportation [JPRS-UTR-84-009] p 468 N85-23694

**HARDENING (MATERIALS)**

Metallurgical and mechanical phenomena due to rubbing of titanium against sintered powder Nichrome p 291 A85-22281

Heat resistant Carbon Fiber Reinforced Plastics (CFRP) hardening equipment [MBB/LFA33/CFK/PUB/007] p 690 N85-27976

**HARDNESS**

Case depth on flanks of gears for helicopter gearboxes p 528 N85-23780

**HARDWARE**

Avionics hardware design for testability [AIAA PAPER 84-2708] p 152 A85-17876

ATE user's view on design for maintainability p 202 N85-16737

Energy efficient engine integrated core/low spool test hardware design report [NASA-CR-168137] p 772 N85-29956

**HARMONIC ANALYSIS**

Stochastic motor blade dynamics [AD-A146312] p 105 N85-12054

A study for calculating rotor loads using free vortex concept p 395 N85-20194

**HARMONIC CONTROL**

Higher harmonic control for rotary wing aircraft [AIAA PAPER 84-2484] p 100 A85-13559

Data processing on the rotor test stand at DFVLR in Brunswick: Microprogrammable interfaces and array processor as key components in a PDP 11 real time data acquisition and processing system [DFVLR-MITT-85-03] p 684 N85-27921

Fixed gain and adaptive techniques for rotorcraft vibration control [NASA-CR-177344] p 619 N85-33111

**HARMONIC GENERATORS**

The N/rev phenomenon in simulating a blade-element rotor system p 413 A85-28605

**HARMONIC OSCILLATION**

Harmonic oscillations of a rectangular wing with a circulation variable over the span p 231 A85-21656

Unsteady aerodynamics of oscillating airfoils with inplane motions p 314 A85-23148

Flow instabilities in transonic small-disturbance theory p 869 A85-48531

Flow instabilities in transonic small disturbance theory [NASA-TM-86251] p 326 N85-18000

Analysis of unsteady pressure measurements on a supercritical airfoil with a harmonically oscillating trailing edge flap at subsonic and transonic speeds [DFVLR-FB-84-49] p 636 N85-27837

**HARMONIC RADIATION**

Measurement of RF fields associated with ISM equipment as it relates to aeronautical services [FAA-ES-84-2] p 795 N85-30180

**HARMONICS**

Higher harmonic control for rotary wing aircraft [AIAA PAPER 84-2484] p 100 A85-13559

**HARNESSES**

Impact tests of automatic lap belt configurations [AD-A148034] p 243 N85-16844

Torso restraint system [AD-D011609] p 564 N85-26684

Improving inflight negative Gz restraint for aircrewmen [AD-A151909] p 565 N85-26688

**HARRIER AIRCRAFT**

Development of the AV-8B propulsion system [AIAA PAPER 84-2426] p 108 A85-13527

A highly monitored digital flight control system for the AV-8B Harrier II [AIAA PAPER 84-2624] p 171 A85-17821

From AV-8B to the ASTOVL p 246 A85-19184

Designing a V/STOL fighter - McDonnell's AV-8B Harrier II p 570 A85-33437

Harrier GR5, second-generation jump jet - Easier ride, greater punch p 571 A85-33870

AV-8B-mean Marine V/STOL machine p 648 A85-38437

Computer study of a jet flap ASTVOL 'Harrier' [SAE PAPER 841457] p 650 A85-39202

AV-8B Harrier II training capabilities [AIAA PAPER 85-1734] p 778 A85-40554

AV-8B/GR Mk5 Engine Monitoring System [AIAA PAPER 85-1295] p 762 A85-40831

Snatching Harrier from the air with Skyhook p 781 A85-42880
Getting hooked --- ship deck aircraft capture and hangar packaging p 848 A85-44750
First operational Marine Corps AV-8B squadron begins service p 882 A85-49200
Multivariable flight control with time-scale separation
[NASA-CR-174320] p 268 N85-16873
Harrier p 576 N85-26595
YAV-8B Harrier p 576 N85-26605

**HAULING**
A Lagrange-D'Alembert formulation of the equations of motion of a helicopter carrying an externally suspended load
[NASA-TM-85864] p 416 N85-21148

**HAZARDS**
The use of synthetic aperture radar imagery to detect hazards to navigation
[AD-A149324] p 339 N85-18971
Successful control of gulls and other birds at a sanitary landfill
[AD-P004198] p 453 N85-19985

**HAZE**
Method for measuring haze in transparencies
[AD-D011233] p 65 N85-10823
The measurement of aircraft windscreen haze and its effect on visual performance
[AD-A154949] p 829 N85-32114

**HEAD (ANATOMY)**
Powered articulated headrest system
[AD-D011353] p 254 N85-15710

**HEAD FLOW**
An analytical investigation of the ground and ambient head flow influence on the free inlet flow into a turbojet engine p 728 A85-41608

**HEAD-UP DISPLAYS**
The approach to optical system designs for aircraft head up displays p 22 A85-10628
Volume phase holograms and their application to avionic displays p 47 A85-10634
Certification of a holographic head-up display system for low visibility landings
[AIAA PAPER 84-2689] p 165 A85-17868
Contrast sensitivity performance assessment of HUD display systems p 259 A85-21593
Head-up displays for general aviation
[SAE PAPER 850902] p 889 A85-50119
A safety evaluation of the relocation of the ACM (Air Combat Maneuver) panel in the F-14 ( )/AIP (Avionics Integration Program)
[AD-A149596] p 419 N85-21158
Crew systems and flight station concepts for a 1995 transport aircraft
[NASA-CR-166068] p 781 N85-29973

**HEAT BALANCE**
Heating parameter estimation using coaxial thermocouple gages in wind tunnel test articles
[AD-A153039] p 699 N85-28328

**HEAT EXCHANGERS**
The AH-64A nitrogen inerting system
[AIAA PAPER 84-2480] p 108 A85-13557
Thermal design of rotatable cryogenic heat pipe joints — for heat exchangers in space applications
[AIAA PAPER 85-0068] p 279 A85-19495
Analysis of the transient and steady-state heat transfer in rotary regenerative heat exchanger p 366 A85-24098
Electroforming of complex parts and heat exchanger systems
[MBB-Z-42-85-OE] p 599 A85-35256
Ceramic heat exchangers for gas turbines or turbojets
[ONERA, TP NO. 1985-35] p 904 A85-47288
Single-engine propulsion improvement through intercooling
[SAE PAPER 850894] p 890 A85-50114
Laminar flow heat exchangers. Viscosity induced non-uniform flow
[AD-A144777] p 53 N85-10307
Effect of inclination, transverse interfin spacing, and longitudinal pitch on crossflow heat transfer from an array of finned tubes p 373 N85-19359
Heat management system for aircraft
[AD-D011658] p 654 N85-26936
Research test facility for evaporation and combustion of alternative jet fuels at high air temperatures
[AD-A153830] p 691 N85-29073

**HEAT FLUX**
Vertical plate fin with conjugated forced convection-conduction turbulent flow
[ASME PAPER 84-WA/HT-8] p 698 A85-39878
Heat transfer investigation in the junction region of circular cylinder normal to a flat plate at 90 deg location
[ASME PAPER 84-WA/HT-70] p 698 A85-39898
Temperature fluctuations and heat flux in grid-generated isotropic turbulence with streamwise and transverse mean-temperature gradients p 908 A85-49359
High temperature thermocouple and heat flux gauge using a unique thin film-hardware hot juncture
[NASA-TM-86898] p 295 N85-16086
Development of advanced high-temperature heat flux sensors. Phase 2: Verification testing
[NASA-CR-174973] p 911 N85-35391
Case studies for flux measurements along a low-flying route to the south of Munich p 915 N85-35548

**HEAT GENERATION**
An experimental investigation and numerical prediction of thermomechanical phenomena in high speed rotor tip rubbing p 351 A85-25442

**HEAT MEASUREMENT**
Transient technique for measuring heat transfer coefficients on stator airfoils in a jet engine environment
[AIAA PAPER 85-1471] p 697 A85-39796
Transient technique for measuring heat transfer coefficients on stator airfoils in a jet engine environment
[NASA-TM-87005] p 604 N85-25794

**HEAT PIPES**
Thermal design of rotatable cryogenic heat pipe joints — for heat exchangers in space applications
[AIAA PAPER 85-0068] p 279 A85-19495

**HEAT PUMPS**
Development of a Braun linear engine-driven, heat-actuated heat pump
[DE84-016847] p 129 N85-13188
Open-cycle vapor compression heat pump
[PB85-101475/GAR] p 188 N85-14951
Open-cycle centrifugal vapor-compression heat pump
[PB85-113405/GAR] p 372 N85-18346
Optimization of a ground coupled heat pump
[DE85-000273] p 374 N85-19380

**HEAT RESISTANT ALLOYS**
Statistical fatigue crack propagation of IN100 at elevated temperatures p 41 A85-11614
Creep life predictions in nickel-based superalloys p 42 A85-12100
Strengthening the study on the usability of aircraft materials p 42 A85-12354
Microstructural development of protective Al2O3 scales p 283 A85-21650
Evaluation of cumulative damage models for fatigue crack growth in an aircraft engine alloy p 433 A85-27095
Chemical reactions involved in the initiation of hot corrosion of IN-738 p 519 A85-31888
Polycrystalline grain controlled castings for rotating compressor and turbine components p 519 A85-32380
A history of superalloy metallurgy for superalloy metallurgists p 519 A85-32409
Development of coatings for the protection of gas turbine blades against high temperature oxidation and corrosion p 519 A85-32433
Performance assessment of exothermic compounds for directional solidification p 596 A85-34201
Coating composition and the formation of protective oxide layers at high temperatures p 596 A85-36234
Titanium alloys for high temperature applications - A review p 783 A85-40922
Heat resistant alloys for jet engines and high strength steels for landing gears p 784 A85-41004
Engine materials p 784 A85-41033
Effect of inclusions on tensile ductility of a nickel-base oxide dispersion strengthened superalloy p 785 A85-42753
Some recent Belgian research works on PM superalloys p 786 A85-43133
Microstructures and properties of HIP, HIP plus forged and extruded P/M superalloy FGH95 p 786 A85-43137
High strength and elevated temperature PM alloy forgings for aerospace applications p 786 A85-43141
Dispersion strengthened aluminum extrusions p 786 A85-43143
Modern processes for superclean metal powder production p 795 A85-43154
Repair and rejuvenation procedures for aero gas-turbine hot-section components p 855 A85-45801
Refurbishing superalloy components for gas turbines p 855 A85-45802
Superalloy microstructural variations induced by gravity level during directional solidification p 900 A85-48274
High temperature static strain sensor development program p 29 N85-10959
Studies on the hot corrosion of a nickel-base superalloy, Udimet 700
[NASA-TM-86882] p 45 N85-11224
Materials for advanced turbine engines. Project 2: Rene 150 directionally solidified superalloy turbine blades, volume 2
[NASA-CR-167993] p 112 N85-12058
Effects of MAR-M247 substrate (modified) composition on coating oxidation coating/substrate interdiffusion --- protective coatings for hot section components of gas turbine engines
[NASA-CR-174851] p 384 N85-19073
On thermomechanical testing in support of constitutive equation development for high temperature alloys
[NASA-CR-174879] p 605 N85-25894
Crack closure characteristics considering center cracked and compact tension specimens
[AD-A151702] p 605 N85-25907
Precision die forging of blades or gas turbines p 672 N85-28148
Directionally solidified gas turbine alloys
[PNR-90264] p 901 N85-34279

**HEAT SHIELDING**
Improvements in low Reynolds number testing in the NSWC hypervelocity wind tunnel No. 9
[AIAA PAPER 85-0226] p 274 A85-19602
The problems arising in testing of carbon-based materials for structural components of airframes p 686 A85-37339
Results of tests of the SRB aft skirt heat shield curtain in the MSFC Hot Gas Facility
[NASA-CR-170888] p 899 N85-35223

**HEAT TRANSFER**
On the stability of an infinite swept attachment line boundary layer p 75 A85-13723
Development of a procedure for calculating two-dimensional boundary layers at gas turbine blades — German thesis p 81 A85-15873
Heat transfer effects of longitudinal vortices embedded in a turbulent boundary layer
[ASME PAPER 84-HT-21] p 186 A85-18827
Advances in heat transfer. Volume 16 p 288 A85-20501
A study of heat transfer during the injection of water into the cooling air of a turbine blade p 349 A85-23984
Analysis of the transient and steady-state heat transfer in rotary regenerative heat exchanger p 366 A85-24098
Factors influencing heat transfer to the pressure surfaces of gas turbine blades p 421 A85-29345
Experimental investigation of heat transfer to bluff cylinders and cones in hypersonic rarefied gas flow p 548 A85-35747
A method for the prediction of Coriolis induced secondary flows and their influence on heat transfer in rotating ducts p 601 A85-36672
Shock tunnel measurements of heat transfer in a model scramjet
[AIAA PAPER 85-0908] p 668 A85-[illegible]582
Hypersonic gas dynamics
[AIAA PAPER 85-0999] p 621 A85-37643
Instrumentation for gas turbine research in short-duration facilities
[SAE PAPER 841504] p 685 A85-39062
A generalization of experimental data on heat transfer from the working medium to the housing components of the compressor of a gas-turbine engine p 680 A85-39112
Similarity properties in the problem of flow from a supersonic source past a spherical bluntness p 629 A85-39445
Flame radiation and linear heat transfer in a tubular-can combustor p 663 A85-39580
Advanced Floatwall combustor liner technology eliminates TF30-P-100 transition duct fatigue cracking
[AIAA PAPER 85-1288] p 667 A85-39701
Advanced liner-cooling techniques for gas turbine combustors
[AIAA PAPER 85-1290] p 667 A85-39703
Transient technique for measuring heat transfer coefficients on stator airfoils in a jet engine environment
[AIAA PAPER 85-1471] p 697 A85-39796
Heat transfer investigation in the junction region of circular cylinder normal to a flat plate at 90 deg location
[ASME PAPER 84-WA/HT-70] p 698 A85-39898
1983 Tokyo International Gas Turbine Congress, Tokyo, Japan, October 23-29, 1983, Proceedings. Volumes 1, 2 & 3 p 787 A85-41776
Influence of heat transfer between turbine and compressor on the performance of small turbochargers p 793 A85-41833
Future fundamental combustion research for aeropropulsion systems
[AIAA PAPER 85-1398] p 771 A85-42871
Ceramic heat exchangers for gas turbines or turbojets
[ONERA, TP NO. 1985-35] p 904 A85-47288
Theoretical and experimental study of nonadiabatic transonic shock/boundary-layer interaction p 889 A85-48529
Turbulent boundary layers over rough surfaces hypersonic flow
[AD-A145040] p 10 N85-10016

The effect of channel convergence on heat transfer in a passage with short pin fins [NASA-TM-83801] p 53 N85-10303
A review and analysis of boundary layer transition data for turbine application [NASA-TM-86880] p 53 N85-10306
Turbine Engine Hot Section Technology (HOST) [NASA-TM-83022] p 28 N85-10951
Turbine heat transfer p 30 N85-10964
Gas side heat transfer: 2-D flow p 30 N85-10965
Jet array impingement flow distributions and heat transfer characteristics: Effects of initial crossflow and nonuniform array geometry p 30 N85-10967
Burner liner thermal/structural load modelling p 30 N85-10970
Heat transfer and pressure drop in blade cooling channels with turbulence promoters [NASA-CR-3837] p 128 N85-12315
Heat transfer results and operational characteristics of the NASA Lewis Research Center Hot Section Cascade Test Facility [NASA-TM-86890] p 189 N85-15133
Engine Cyclic Durability by Analysis and Testing [AGARD-CP-368] p 286 N85-15733
Monitoring engine thermal stresses p 286 N85-15735
High temperature thermocouple and heat flux gauge using a unique thin film-hardware hot juncture [NASA-TM-86898] p 295 N85-16096
Effect of inclination, transverse interfin spacing, and logitudinal pitch on crossflow heat transfer from an array of finned tubes p 373 N85-19359
Experimental study of ceramic coated tip seals for turbojet engines [NASA-TM-86939] p 373 N85-19363
LOVEL-84: A LOw-VELocity aerodynamic heating code for flat plates, wedges, and cones [DE85-002604] p 395 N85-19933
Advanced liner-cooling techniques for gas turbine combustors [NASA-TM-86952] p 397 N85-21115
Aerostructure nondestructive evaluation by thermal field detection. Phase 2: Technique refinement and quantitative determination of flaw detection capabilities [AD-A149622] p 417 N85-21155
Pressure drop and coefficients of internal heat transfer necessary for transpiration cooling p 527 N85-22831
effect of gas stream sweeping past the effluent of a perforated plate on heat transfer inside the perforations p 527 N85-22836
Experimental study of heat transfer from shaft in cooled radial bearing of GNT-25 gas turbine p 529 N85-24068
Flow over a biconic configuration with an afterbody compression flap [AD-A151882] p 603 N85-25778
Transient technique for measuring heat transfer coefficients on stator airfoils in a jet engine environment [NASA-TM-87005] p 604 N85-25794
Adaptive grid generation for numerical solution of Burger's equation [AD-A152217] p 611 N85-27606
Future fundamental combustion research for aeropropulsion systems [NASA-TM-87049] p 671 N85-27870
Investigation of heat transfer to a [illegible] blade cascade using a shock tube [AD-A153090] [illegible] N85-27871
Fuel freeze point investigations [AD-A152901] [illegible] N85-28129
Heating parameter estimation using coaxial thermocouple gages in wind tunnel test articles [AD-A153039] p 699 N85-28328
Heat management system for aircraft [AD-D011658] p 654 N85-28936
Flat-plate transition p 798 N85-31438
A review and analysis of boundary layer transition data for turbine application p 798 N85-31440
Heat transfer in aeropropulsion systems [NASA-TM-87088] p 798 N85-31444
R and D activities of the Propulsion Division p 799 N85-32025
Component-specific modeling [NASA-CR-174765] p 881 N85-34140
Heat transfer characteristics for two-dimensional arrays of impinging jets with initial crossflow p 911 N85-35365

**HEAT TRANSFER COEFFICIENTS**
Heat transfer in the case of jet flow past an arbitrarily nonisothermal surface p 388 A85-25621
Calculation of the full cooling efficiency of the perforated wall of a gas turbine nozzle guide vane p 352 A85-25623
Heat transfer from rectangular plates inclined at different angles of attack and yaw to an air stream p 600 A85-35593
Acquisition of detailed heat transfer behavior in complex internal flow passages [SAE PAPER 841503] p 695 A85-39061
Time resolved measurements of a turbine rotor stationary tip casing pressure and heat transfer field [AIAA PAPER 85-1220] p 666 A85-39663
Quantitative evaluation of transient heat transfer on axial flow compressor stability [AIAA PAPER 85-1352] p 697 A85-39742
Vertical plate fin with conjugated forced convection-conduction turbulent flow [ASME PAPER 84-WA/HT-8] p 698 A85-39878
Application of boundary element method to heat transfer coefficient measurements around a gas turbine blade [ASME PAPER 84-WA/HT-69] p 698 A85-39897
Unsteady heat transfer of oscillating wake flows p 726 A85-41781
Cooling characteristics of air cooled radial turbine blades p 792 A85-41784
Impingement cooling of gas turbine components p 767 A85-41785
Inpingement cooling of turbine airfoils by multiple two-dimensional jets p 768 A85-41786
Determination of the local heat transfer coefficients of three simulated smooth ice formation characteristics on a cylinder [AIAA PAPER 85-1836] p 819 A85-43873
Laminar flow heat exchangers. Viscosity induced non-uniform flow [AD-A144777] p 53 N85-10307
Calculating heat transfer coefficients for turbine profiles taking surface curvature and elevated flow turbulence into account p 371 N85-18212
Transport processes in the upper atmosphere p 454 N85-20375
The effect of injection-stream turbulence on film cooling effectiveness and heat transfer coefficients p 797 N85-31424

**HEAT TRANSMISSION**
Procedural aspects of testing aerodynamic models with combustion in high-enthalpy transient-mode installations p 188 N85-14658

**HEAT TREATMENT**
Problems and possibilities for life extension in gas turbine components p 267 N85-15742
Chemical and photographic evaluation of rigid explosive transfer lines [AD-A149303] p 437 N85-20145
Case depth on flanks of gears for helicopter gearboxes p 528 N85-23780

**HEATERS**
Heater block assembly for use in thermal oxidation testing of jet fuel [AD-D011430] p 285 N85-17077

**HEATING**
Active transition fixing and control of the boundary layer in air [AIAA PAPER 85-0564] p 369 A85-25950
Heat generation in aircraft tires p 756 A85-41133
The effect of direct heating on combustion efficiency of the chamber of jet engine in the simulation test on the ground p 835 A85-43699

**HEAVING**
Computer simulation of hovercraft heave dynamics and control p 66 A85-11665
Dynamic characteristics of peripheral jet ACV. I - Heaving motion p 791 A85-40985
Dynamic characteristics of peripheral jet ACV. III - Coupling motion of heaving and pitching p 791 A85-41006

**HEAVY LIFT AIRSHIPS**
Comment on 'Effects of atmospheric turbulence on a quadrotor heavy-lift airship' p 144 A85-18522
An aerodynamic performance model for hybrid heavy lift systems [AIAA PAPER 85-0865] p 648 A85-38781
The Cyclo-Crane - A new concept to heavy vertical lift [AIAA PAPER 85-0871] p 648 A85-38786
An investigation into the hovering behaviour of the LTA 20-1 airship in calm and turbulent air [AIAA PAPER 85-0878] p 641 A85-38793
An experimental determination of the longitudinal stability properties of the LTA 20-1 airship [AIAA PAPER 85-0879] p 674 A85-38794
A new concept of hybrid airship [AIAA PAPER 85-0868] p 649 A85-38798

**HEAVY LIFT HELICOPTERS**
Helicopter cargo - New opportunities through technology transfer [SAE PAPER 840703] p 342 A85-26314
A new concept of hybrid airship [AIAA PAPER 85-0868] p 649 A85-38798

**HELICAL FLOW**
Investigation of the axial velocities induced along rotating blades by trailing helical vortices p 75 A85-13678

**HELICOPTER CONTROL**
The modelling and control of RC helicopter — Radio Control p 115 A85-15657
Ultrareliable fault-tolerant control systems [AIAA PAPER 84-2650] p 194 A85-17837
Digital avionics and flight path director functions of the HH-60 helicopter [AIAA PAPER 84-2674] p 151 A85-17857
Application of differential GPS to civil helicopter terminal guidance [AIAA PAPER 84-2676] p 151 A85-17858
Pilot command interfaces for discrete control of automated nap-of-earth flight [AIAA PAPER 84-2621] p 172 A85-17859
A fault-tolerant approach to helicopter swashplate control p 172 A85-18335
Future helicopter developments p 311 A85-24512
Digital optical transducers for helicopter flight control systems p 368 A85-25331
Active control of helicopter vibrations through multicyclic controls p 356 A85-26018
Development and qualification testing of S-76 helicopter takeoff and landing procedures for reduced field length p 414 A85-28643
Fault tolerant computer system for the A129 helicopter p 504 A85-31271
Tachistoscopic studies of powerplant instruments p 504 A85-31779
A piloted simulator investigation of decoupling helicopters by using a model following control system p 511 A85-31955
Insights into helicopter air combat maneuverability p 493 A85-31957
Flight test of the 4-valve fly-by-wire/fly-by-optics control system p 511 A85-31964
Analytic and experimental verification of the NOTAR circulation control tail boom p 495 A85-31990
The AH-64 Back-Up Control System p 512 A85-32000
Development and evaluation of a generic active helicopter vibration controller p 496 A85-32004
Development of piloting techniques to reduce helicopter approach noise p 512 A85-32015
Flight instrumentation p 578 A85-34585
BK 117 for dual pilot IFR operation [MBB-UD-422-84-OE] p 572 A85-35253
Design of digital flight control systems for helicopters p 673 A85-37195
Terrain/wire and wirelike obstacles warning system for helicopters p 655 A85-38363
Automatic flight control system (AFCS) of helicopter using an optical control algorithm p 674 A85-38364
Radio navigation and landing devices for IFR navigation with helicopters p 748 A85-40243
Identification of linear dynamic control plants by means of signal expansion on the basis of the Walsh function p 803 A85-42675
The use of active controls to augment rotor/fuselage stability p 776 A85-43220
Reliability analysis of the A129 Integrated Multiplex System — in flight control in helicopters p 834 A85-45142
Flight test of a helicopter fly-by-wire/light actuation control system p 842 A85-45155
Periodic control of the individual-blade-control helicopter rotor p 842 A85-45795
Multi-input multi-output automatic design synthesis for performance and robustness [AIAA PAPER 85-1929] p 859 A85-45929
Handling-qualities investigation of conventional helicopter directional control characteristics [AIAA PAPER 85-1947] p 845 A85-45936
Active control of helicopter blade flapping [AIAA PAPER 85-1963] p 827 A85-45947
The design and development of an integrated core system for battlefield helicopters p 260 N85-16811
A review of US Army aircrew-aircraft integration research programs p 270 N85-16814
Flight tests with a new helicopter Force Feel System (FFS) p 257 N85-16818
Helicopter active control with rotor blades relaxation p 270 N85-16819
Flight research on visual aids and navigation equipment for helicopter low-level flight at night p 261 N85-16820
A preliminary investigation of handling qualities requirements for helicopter instrument flight during decelerating approach maneuvers and overshoot [NRC-24173] p 652 N85-27857
The evolution of ACS for helicopters: Conceptual simulation studies to preliminary design p 677 N85-27890
ACT applied to helicopter flight control p 678 N85-27891
The evolution of active control technology systems for the 1990's helicopter p 680 N85-27911

Data processing on the rotor test stand at DFVLR in Brunswick: Microprogrammable interfaces and array processor as key components in a PDP 11 real time data acquisition and processing system
[DFVLR-MITT-85-03] p 684 N85-27921
Helicopter Aeromechanics
[AGARD-LS-139] p 617 N85-28913
The role of simulation p 684 N85-28919

**HELICOPTER DESIGN**
Optimal frequency response shaping by appendant structures — for helicopter model p 46 A85-10403
Helicopter stability — Russian book
p 18 A85-11249
Composite flexbeam tail rotor practical
p 1 A85-12082
Hughes' new attackers p 18 A85-12175
A system approach for designing a crashworthy helicopter using program KRASH
[AIAA PAPER 84-2448] p 98 A85-13538
Helicopter airframe variable tune vibration absorber
[AIAA PAPER 84-2531] p 101 A85-13590
Design and development of a dynamically scaled model AH-64 main rotor
[AIAA PAPER 84-2532] p 101 A85-13591
Further investigation of the coupled flapping and torsion dynamics of helicopter rotor blades p 102 A85-13680
Improved auxiliary clutch for CH-53 helicopters
p 123 A85-13699
Helicopter vibrations - A technological perspective

Experimental aerodynamic characteristics of an NACA 0012 airfoil with simulated ice p 252 A85-21844
Parameters affecting helicopter interactional aerodynamics in ground effect p 314 A85-23147
Optimization methods applied to the aerodynamic design of helicopter rotor blades
[AIAA PAPER 85-0644] p 490 A85-30245

Rotorcraft air resonance in forward flight with various dynamic inflow models and aeroelastic couplings
p 492 A85-30943

American Helicopter Society, Annual Forum, 40th, Arlington, VA, May 16-18, 1984, Proceedings
p 465 A85-31951

Acoustic vibration characteristics of high contact ratio planetary gears p 524 A85-31954

Development of an on-board computer for flight test data analysis p 504 A85-31965

Technology impact on helicopter, tilt rotor, and tilt fold rotor concepts p 494 A85-31971

The development of maintenance and supply support of multi-mission helicopters operating from multiple locations p 466 A85-31984

Fault Detection/Location System (FD/LS) - How much, how little and how to implement p 466 A85-31992

On-line determination of optimal flight paths for helicopters p 495 A85-31994

Design considerations for helicopter effectiveness in air-to-air combat p 482 A85-31995

Stability and control of the twin lift helicopter system
p 513 A85-32846

The role of testing in qualification and certification of aircraft p 571 A85-34263

BK 117 for dual pilot IFR operation
[MBB-UD-422-84-OE] p 572 A85-35253

Rotary-wing aerodynamics. Volume 1 - Basic theories of rotor aerodynamics (With application to helicopters). Volume 2 Performance prediction of helicopters (2nd revised and enlarged edition) — Book
p 617 A85-36996

Research trend in advanced technology helicopter
p 647 A85-38360

Development of the BK 117 helicopter
p 674 A85-38389

Helicopter flight test of a ring laser gyro Attitude and Heading Reference System p 643 A85-38529

Advanced techniques for health and usage monitoring of helicopter transmissions
[AIAA PAPER-85-1142] p 617 A85-39621

The Bristol wire strike protection system — helicopter wire cutter p 754 A85-40462

Rotor dynamics simulation - A new approach
[AIAA PAPER 85-1739] p 754 A85-40565

Environmental control systems for helicopters compared p 756 A85-41070

Will rotors lose their bearings? p 756 A85-41528

Routes to improved airworthiness of helicopters
p 745 A85-41729

Structural integrity of helicopters in relation to their airworthiness p 757 A85-41730

A review of Army Air Corps helicopter accidents 1971-1982 p 746 A85-42065

Development of a simulator facility for helicopter air-to-air combat
[AIAA PAPER 85-1733] p 780 A85-42862

Investigation of the dynamics of the limit maneuvers of a helicopter by means of a flight simulator
p 781 A85-43051

Applications of numerical optimization methods to helicopter design problems - A survey
p 826 A85-45792

An improved technique for testing helicopter rotor-pylon aeromechanical stability using measured rotor dynamic impedance characteristics p 826 A85-45794

DFVLR rotorcraft: Construction and engineering
[NASA-TM-77740] p 19 N85-10035

Applications of numerical optimization methods to helicopter design problems: A survey
[NASA-TM-86010] p 19 N85-10036

Airworthiness and flight characteristics test of the JOH-6A light combat helicopter configured with a wire strike protection system
[AD-A144880] p 20 N85-10038

Airworthiness and Flight Characteristics (A and FC) test of the EH - 1X/EH - 1H helicopter configurations
[AD-A144881] p 20 N85-10039

Estimation of helicopter performance using a program based on blade element analysis
[AD-A146341] p 105 N85-12055

The need for a dedicated public service helicopter design p 154 N85-14828

Preliminary airworthiness evaluation AH-1S (MC) helicopter with external fuel tanks installed
[AD-A148091] p 258 N85-16865

Preliminary helicopter design decision making based on flight performance factors
[AD-A151488] p 575 N85-25254

Wind-tunnel evaluation of a 21-percent-scale powered model of a prototype advanced scout helicopter
[NASA-TP-2420] p 637 N85-26923

Effect of ground and/or ceiling planes on thrust of rotors in hover
[NASA-TM-86754] p 743 N85-31014

Standardization of helicopter certification requirements in the western world
[SNIAS-851-210-103] p 761 N85-31048

The effects of parameter variation on helicopter performance
[AD-A156027] p 887 N85-35189

Development of NATOPS performance software for the SH-3D and SH-3H helicopters
[AD-A156140] p 887 N85-35192

**HELICOPTER PROPELLER DRIVE**

Reduction gears of gas-turbine engines for aircraft and helicopters p 441 A85-27719

Techniques for the early detection of gear and bearing failures in helicopter drive trains p 525 A85-31967

A 2400 kW lightweight helicopter transmission with split-torque gear trains
[ASME PAPER 84-DET-91] p 560 A85-33773

Thrust changes induced by ground and ceiling planes on a rotor in hover p 759 A85-43223

The in-flight estimation and indication of cumulative fatigue damage to helicopter gears
[ARL/AERO-R-164] p 104 N85-12050

The helicopter transmission design process
p 510 N85-23772

Fine filtration: An attractive route towards lower helicopter operating costs p 503 N85-23774

Possible technological answers to new design requirements for power transmission systems
p 510 N85-23779

**HELICOPTER TAIL ROTORS**

Composite flexbeam tail rotor practical
p 1 A85-12082

Fatigue substantiation of the SH-60B stabilator by test
[AIAA PAPER 84-2452] p 96 A85-13541

Design, fabrication and verification of composite flexbeam tail rotor for AH-64 Apache helicopter
p 251 A85-21379

Tooling problems in the manufacture of AH-64 Composites Flexbeam Tail Rotor p 200 A85-21382

Impact of main rotor tip geometry on main rotor/tail rotor interaction in hover p 495 A85-31985

Aspects of a see-saw tail rotor balancing
[MBB-UD-423-84-OE] p 572 A85-35251

Extraction of helicopter-radiated noise by frequency domain processing p 805 A85-40572

Calculation of the velocity field generated by a helicopter main and tail rotors in hover
[AD-A147731] p 239 N85-16833

Repair of composites p 284 N85-17058

Reconstruction of a 3-dimensional transonic rotor flow field from holographic interferogram data
[NASA-TM-86690] p 397 N85-21112

Experimental study of main rotor tip geometry and tail rotor interactions in hover. Volume 1. Text and figures
[NASA-CR-177336-VOL-1] p 466 N85-22344

Experimental study of main rotor tip geometry and tail rotor interactions in hover. Volume 2: Run log and tabulated data
[NASA-CR-177336-VOL-2] p 466 N85-22345

Rotorcraft research testing in the National Full-Scale Aerodynamics Complex at NASA Ames Research Center
[NASA-TM-86687] p 652 N85-27854

Fuselage upwash effects on RSRA rotor systems
[NASA-CR-177349] p 743 N85-31015

**HELICOPTER WAKES**

Two dimensional blade-vortex interaction flow visualization study
[AIAA PAPER 84-2307] p 4 A85-10858

Solution method for a hovering helicopter rotor using the Euler equations
[AIAA PAPER 85-0436] p 223 A85-19749

Rotor wake measurements for a rotor in forward flight
[ONERA, TP NO. 1985-12] p 387 A85-27891

Generalized wake geometry for a helicopter in forward flight and effect of wake deformation on airloads
p 472 A85-31986

A new unsteady prescribed wake model of the aerodynamic behavior of a rotor in forward flight
p 617 A85-37178

Vortex panel calculation of wake rollup behind a large aspect ratio wing
[AIAA PAPER 85-1581] p 710 A85-40886

Velocity measurements in the near wake of a hovering rotor
[AIAA PAPER 85-1675] p 725 A85-41408

Free wake analysis of helicopter rotors
p 816 A85-45791

Factors influencing rotor aerodynamics in hover and forward flight p 816 A85-45793

Study for prediction of rotor/wake/fuselage interference, part 1
[NASA-CR-177340-VOL-1] p 466 N85-22346

Study for prediction of rotor/wake/fuselage interference. Part 2: Program users guide
[NASA-CR-177340-VOL-2] p 467 N85-22347

Unsteady analysis of rotor blade tip flow
[NASA-CR-3868] p 556 N85-25202

Ground effect on helicopter aerodynamics and stability
p 776 N85-31063

**HELICOPTERS**

Helicopter ground resonance - A spatial model analysis p 18 A85-11473

A model for the analysis of dynamic properties of a helicopter rotor blade with various boundary conditions
p 115 A85-15719

Theoretical study of helicopter-rotor noise
[ONERA, TP NO. 1984-140] p 134 A85-15856

The night vision goggle compatible helicopter cockpit

Helicopter noise survey performed at Las Vegas, Nevada, 19-21 January, 1984
[AD-A147392] p 305 N85-16593

Noise measurement flight test: Data-analyses aerospatiale AS-355F TwinStar helicopter
[AD-A147497] p 305 N85-16595

Helicopter Guidance and Control Systems for Battlefield Support
[AGARD-CP-359] p 204 N85-16797

Automatic briefing and mission management systems for battlefield support p 259 N85-16799

A Computer-generated topographic display system for navigation and mission planning in helicopters p 259 N85-16800

Map display for helicopters p 259 N85-16801

Development of a Helicopter integrated navigation system p 245 N85-16802

Standard Attitude Heading Reference System (SAHRS) full scale development program p 246 N85-16804

Integrated control and display systems for helicopter battlefield mission management p 260 N85-16805

Recent methods for calibrating the anemometry of helicopters at low speeds p 260 N85-16809

LPI-radar for helicopter obstacle warning p 297 N85-16810

Advanced flight simulation for helicopter development p 277 N85-16815

Development and flight test of a helicopter compact, portable, precision landing system concept p 261 N85-16821

Helicopter model rotor-blade vortex interaction impulsive noise: Scalability and parametric variations
[NASA-TM-86007] p 238 N85-16826

Development, production and testing of central control and display unit for helicopters
[BMFT-FB-W-84-039] p 261 N85-16871

Investigation on experimental techniques to detect, locate and quantify gear noise in helicopter transmissions
[NASA-CR-3847] p 305 N85-17667

Noise measurement flight test: Data-analyses Aerospatiale AS 350D AStar helicopter
[AD-A148496] p 306 N85-17672

Noise measurement flight test: Data-analyses, Sikorsky S-76A helicopter
[AD-A148525] p 306 N85-17673

A feasibility study of free-tip rotor application as a passive cyclic control device p 343 N85-18046

Discrete modifications to continuous dynamic structural systems p 372 N85-18410

Inviscid analysis of unsteady blade tip flow correlation studies
[NASA-CR-172506] p 329 N85-18958

Integrated Technology Rotor/Flight Research Rotor (ITR/FRR) concept definition study
[NASA-CR-166444] p 345 N85-18961

A Lagrange-D'Alembert formulation of the equations of motion of a helicopter carrying an externally suspended load
[NASA-TM-85864] p 416 N85-21149

Analytical and flight investigation of the influence of rotor and other high-order dynamics on helicopter flight-control system bandwidth
[NASA-TM-86696] p 425 N85-21174

Evaluating wind flow around buildings on heliport placement
[FAA-PM-84-25] p 455 N85-21881

Study for prediction of rotor/wake/fuselage interference, part 1
[NASA-CR-177340-VOL-1] p 466 N85-22346

Study for prediction of rotor/wake/fuselage interference. Part 2: Program users guide
[NASA-CR-177340-VOL-2] p 467 N85-22347

Ground evaluation of helicopter air-to-air warfare p 499 N85-22360

A community survey of helicopter noise annoyance conducted under controlled noise exposure conditions
[NASA-TM-86400] p 538 N85-23374

An experimental investigation of the chopping of helicopter main rotor tip vortices by the tail rotor
[NASA-CR-177336] p 538 N85-23376

Basic consideration of the lifting capability of stoppable rotors
[AD-A150850] p 502 N85-23759

Gears and Power Transmission Systems for Helicopters and Turboprops
[AGARD-CP-369] p 502 N85-23765

Summary of drive-train component technology in helicopters p 509 N85-23766

Current transmission systems p 510 N85-23767

Helicopter transmission lubricants p 520 N85-23768

A state of the art assessment of turboprop transmission technology and projected needs for the next generation p 510 N85-23770

Case depth on flanks of gears for helicopter gearboxes p 528 N85-23780

Condition monitoring of helicopter gearboxes using automatic vibration analysis techniques p 510 N85-23790

Transmission error measurements in gearbox development p 529 N85-23794

Do new aircraft need new technologies and certification rules? p 503 N85-23795

Establishment and maintenance of certification standards for helicopter and turboprop power transmission systems p 503 N85-23796

Recent developments in the dynamics of advanced rotor systems
[NASA-TM-86669] p 531 N85-24320

MI-8 helicopter cargo loading experiment for Arctic shipping p 504 N85-24425

Investigation of technology needs for avoiding helicopter pilot error related accidents
[NASA-CR-3895] p 563 N85-25220

Helicopter user survey: Traffic alert and collision avoidance system (TCAS)
[FAA-PM-85-6] p 567 N85-25236

Calibration loading of a strain-gauged diverless helicopter weapon recovery system
[AD-A151486] p 575 N85-25253

Effects of side-stick controllers on rotorcraft handling qualities for terrain flight
[NASA-TM-86686] p 585 N85-25267

Rotorcraft digital advanced avionics system (Rodaas) p 576 N85-26606

The use of a self-compensated magnetometer in an economical navigation system for the helicopter p 568 N85-26650

Finite-difference computations of rotor loads
[NASA-TM-86682] p 580 N85-26669

Rotor blade flap-lag stability and response in forward flight in turbulent flows p 577 N85-26696

Determination of quantitative relationships between selected critical helicopter design parameters
[AD-A152034] p 577 N85-26700

Development and flight test of a helicopter, X-band, portable precision landing system concept
[NASA-TM-86710] p 586 N85-26721

The evaluation of ACS for helicopters: Conceptual simulation studies to preliminary design p 589 N85-26737

ACT applied to helicopter flight control p 589 N85-26738

The evolution of active control technology systems for the 1990's helicopter p 591 N85-26758

The NAVTAG (Naval Tactical Game) system and its modification to include the SH-60B helicopter
[AD-A152004] p 611 N85-27624

Investigation of imaging and flight guidance concepts for rotorcraft zero visibility approach and landing
[NASA-CR-166571] p 644 N85-27643

Helicopter Aeromechanics
[AGARD-LS-139] p 617 N85-28913

Helicopter aeromechanics: Introduction and historical review p 653 N85-28914

A survey of recent development in helicopter aerodynamics p 653 N85-28915

Rotorcraft noise p 705 N85-28916

Recent developments in the dynamics of advanced rotor systems p 653 N85-28917

Mission requirements and handling qualities p 680 N85-28918

The role of simulation p 684 N85-28919

Flight testing for performance and flying qualities p 654 N85-28920

The evolution of the U.S. helicopter industry
[AD-A154290] p 709 N85-29913

Application of two-dimensional unsteady aerodynamic to a free-tip rotor response analysis
[NASA-CR-177348] p 741 N85-29933

Correlation of rheological characteristics of lubricants with transmission efficiency measurements
[NASA-TM-86968] p 796 N85-30342

A study of the application of differential techniques to the global positioning system for a helicopter precision approach
[NASA-CR-177326] p 750 N85-31035

Standardization of helicopter certification requirements in the western world
[SNIAS-851-210-103] p 761 N85-31048

Automated fabrication of composite structures for helicopters
[SNIAS-851-210-104] p 761 N85-31049

The helicopter, instrument of choice for health evacuation
[SNIAS-851-220-101] p 761 N85-31051

Ground effect on helicopter aerodynamics and stability p 776 N85-31063

Impulsive noise due to transonic blade-vortex interactions p 806 N85-31913

R and D activities of the Structural Sciences Division p 799 N85-32026

Wind tunnel drag evaluations of helicopter nose sections
[AD-A155489] p 818 N85-32100

A phase-locked frequency multiplier for the signal averaging of the vibration of the Wessex helicopter input spiral bevel pinion
[AD-A154914] p 829 N85-32113

Artificial and natural icing tests YEH-60A quick fix helicopter
[AD-A155147] p 830 N85-32116

Proposal for modifications to the Wessex helicopter main rotor gearbox vibration monitoring program
[AD-A155196] p 830 N85-32117

A three-dimensional viscous flow analyses for the helicopter tip vortex generation problem
[NASA-CR-3906] p 874 N85-34114

An evaluation of three helicopter rotor sections
[NASA-TM-86719] p 874 N85-34115

Flight service evaluation of composite helicopter components
[NASA-CR-172562] p 901 N85-34222

Some problems in high speed gears and gearing p 910 N85-34312

U.S. Civil airmen statistics for calendar year 1984
[AD-A156326] p 866 N85-35153

Laboratory vibration schedules
[AD-A155856] p 867 N85-35188

Development of NATOPS (Naval Air Training and Operating Procedure Standardization) performance software for the H-46D helicopter
[AD-A156069] p 887 N85-35190

Development of NATOPS performance software for the SH-3D and SH-3H helicopters
[AD-A156140] p 887 N85-35192

**HELIPORTS**

Acoustical guidelines for new heliports p 276 A85-21644

Public-use heliport planning - A state-of-the-art report p 357 A85-23675

The development of acoustical guidelines for new heliports p 516 A85-32014

A federal perspective on heliport development p 778 A85-40535

Heliport snow and ice control methods and guidelines
[DOT/FAA/PM-84/22] p 37 N85-10073

Structural design guidelines for heliports
[FAA-PM-84-23] p 39 N85-11010

Evaluating wind flow around buildings on heliport placement
[FAA-PM-84-25] p 455 N85-21881

Microwave landing systems for heliport operators, owners and users
[FAA-PM-85-7] p 750 N85-29940

**HELIUM**

Combined cold compressor/ejector helium refrigerator
[DE85-006408] p 910 N85-34326

**HELMET MOUNTED DISPLAYS**

Among the weeds at night - Transition to night NOE flying p 763 A85-41532

Onboard simulation - A newly emerging technology and the potential of the helmet mounted display as an embedded training device
[AIAA PAPER 85-1737] p 757 A85-42664
The use of lasers in wide-angle visual systems
[AD-P004322] p 370 N85-17976
Design considerations for an eye tracked AOI (Area of Interest) display system
[AD-P004324] p 359 N85-17978
Air combat visual simulation using a head slaved projector
[AD-P004327] p 359 N85-17981
The fiber-optic helmet-mounted display
[AD-P004330] p 348 N85-17984
Binocular overlap in a fiber optic helmet mounted display
[AD-P004331] p 348 N85-17985
The effect of modified spectacles on the field of view of the helmet display unit of the integrated helmet and display sighting system
[AD-A148893] p 348 N85-18055

**HELMETS**
The night vision goggle compatible helicopter cockpit
[MBB-UD-420-84-OE] p 163 A85-16069

**HELMHOLTZ RESONATORS**
A research program to reduce the interior noise in general aviation aircraft, index and summary
[NASA-CR-176178] p 919 N85-35695

**HELMHOLTZ VORTICITY EQUATION**
An introduction to vortex breakdown and vortex core bursting
[NAE-AN-28] p 635 N85-27829

**HERCULES ENGINE**
Review of empirical and analytical specific impulse methodologies
[AIAA PAPER 85-1434] p 669 A85-39776

**HERMES MANNED SPACEPLANE**
Hermes - A cockpit inspired by the Airbus A320
p 782 A85-40914

**HEURISTIC METHODS**
A minimum-exposure, minimum-elevation military aircraft heuristic route selection model p 482 A85-31774
Heuristically-guided planning for mission control/decision support
[AIAA PAPER 85-1909] p 850 A85-45919
Generation of flight paths using heuristic search
[AD-A151949] p 569 N85-26694

**HIGH ALTITUDE**
A 73-ft cross parachute for cargo delivery
p 402 A85-29264
Starduster - A solar powered high altitude airplane
[AIAA PAPER 85-1449] p 651 A85-39786
Design considerations for high-altitude, long-endurance, microwave-powered aircraft
[NASA-TM-86403] p 501 N85-23751

**HIGH ALTITUDE BALLOONS**
Balloon system and balloon-borne experiments in China p 640 A85-38310

**HIGH ASPECT RATIO**
Computer study of a jet flap ASTVOL 'Harrier'
[SAE PAPER 841457] p 650 A85-39202
Circular-to-rectangular transition ducts for high-aspect ratio nonaxisymmetric nozzles
[AIAA PAPER 85-1346] p 632 A85-39738
Flutter parametric studies of cantilevered twin-engine transport type wing with and without winglet. Volume 2: Transonic and density effect investigations
[NASA-CR-172410-VOL-2] p 130 N85-13270
Aileron effectiveness for a subsonic transport model with a high-aspect-ratio supercritical wing
[NASA-TM-85674] p 235 N85-15695
Comparison of analytical and experimental steadyand unsteady-pressure distributions at Mach number 0.78 for a high-aspect-ratio supercritical wing model with oscillating control surfaces
[NASA-TM-84589] p 235 N85-15697
Numerical simulation of transonic flutter of a high-aspect ratio transport wing p 586 N85-26630
Low-speed tests of a high-aspect-ratio, supercritical-wing transport model equipped with a high-lift flap system in the Langley 4- by 7-meter and Ames 12-foot pressure tunnels
[NASA-TP-2097] p 742 N85-31010

**HIGH FREQUENCIES**
Tactical HF communication for military helicopters using the NVIS mode p 297 N85-16807
High frequency estimation of 2-dimensional cavity scattering
[AD-A151697] p 602 N85-25696

**HIGH GAIN**
Decoupling of high-gain multivariable tracking systems
p 172 A85-18332

**HIGH GRAVITY ENVIRONMENTS**
Naval Center seeks new uses for centrifuge-based simulator p 591 A85-33800

**HIGH LEVEL LANGUAGES**
Data flow methods for dynamic system simulation - A CSSL-IV microcomputer network interface
p 458 A85-28614
A functional language approach in high-speed digital simulation p 458 A85-28615

**HIGH PRESSURE**
Energy efficient engine. High pressure compressor detail design report
[NASA-CR-165558] p 35 N85-10996
Applications of high pressure differential scanning calorimetry to aviation fuel thermal stability research
[NASA-TM-87002] p 521 N85-23941
Energy efficient engine high-pressure turbine component rig performance test report
[NASA-CR-168189] p 772 N85-29955
High pressure compressor component performance report
[NASA-CR-168245] p 891 N85-34138

**HIGH REYNOLDS NUMBER**
Variable-temperature water tunnel for high Reynolds numbers
[AIAA PAPER 85-0051] p 273 A85-19483
Mach-10 high Reynolds number development in the NSWC hypervelocity facility
[AIAA PAPER 85-0054] p 273 A85-19486
Development of the UTA High Reynolds Number Transonic Wind Tunnel
[AIAA PAPER 85-0315] p 275 A85-19662
A comparative study between an implicit and explicit algorithm for transonic airfoils
[AIAA PAPER 85-0480] p 225 A85-19777
Euler and Navier-Stokes solutions for supersonic shear flow past a circular cylinder p 391 A85-29090
The high Reynolds number finite flat-plate cascade
p 474 A85-32616
A cryogenic high-Reynolds number transonic wind tunnel with pre-cooled and restricted flow p 592 A85-35752
The Kryo-Kanal Koeln (KKK) as an example of a higher-Reynolds-number wind tunnel
[DGLR PAPER 84-095] p 777 A85-40314
The application of cryogenics to high Reynolds number testing in wind tunnels. I - Evolution, theory, and advantages p 780 A85-41326
Rotary-balance experiments on a modern fighter aircraft configuration at high Reynolds numbers
[AIAA PAPER 85-1829] p 848 A85-43870
A note on the steady high-Reynolds-number flow about a circular cylinder p 872 A85-49369
Transition fixing and simulation of high Reynolds number flow at transonic velocities p 480 N85-23721
Investigation of the aerodynamic forces on bluff bodies at high Reynolds numbers
[DFVLR-MITT-84-19] p 481 N85-23727
Mach-10 high Reynolds number development in the NSWC (Naval Surface Weapons Center) hypervelocity facility
[AD-A151241] p 593 N85-25274

**HIGH SPEED**
A study of friction in high-speed face seals
p 46 A85-10381
Numerical solution of the Euler equations for high-speed, blended wing-body configurations
[AIAA PAPER 85-0123] p 211 A85-19534
Design and experimental evaluation of propfan inlets
[SAE PAPER 841477] p 352 A85-25976
High speed compressor rig as a stall recovery research tool
[AIAA PAPER 85-1428] p 682 A85-39773
Design and performance comparison of three high-speed fans p 768 A85-41807
Development of a high specific speed radial-inflow turbine for turbochargers p 793 A85-41832
Capabilities of the high speed anechoic wind tunnel at Lyon University p 848 A85-44049
Wind tunnel results of advanced high speed propellers in the takeoff, climb, and landing operating regimes
[AIAA PAPER 85-1259] p 817 A85-47025
Results of winglet development studies for DC-10 derivatives
[NASA-CR-3677] p 22 N85-10936
Effect of two inner-ring oil-flow distribution schemes on the operating characteristics of a 35 millimeter bore ball bearing to 2.5 million DN
[NASA-TP-2404] p 129 N85-13233
Visual perceptual aspects of low level high speed flight and flight simulation
[AD-P004310] p 358 N85-17964
Low altitude high speed flight simulation using video disc technology
[AD-P004312] p 358 N85-17966
Lubrication and performance of high-speed rolling-element bearings
[NASA-TM-86958] p 450 N85-21658
Development of a multiplane multispeed balancing system for turbine systems
[NASA-CR-174750] p 516 N85-22400
Transition fixing in the high speed range for the development of civil aircraft wings p 480 N85-23716
Advanced gearbox technology in small turbo propeller engines p 510 N85-23771
Wind tunnel results of advanced high speed propellers in the takeoff, climb and landing operating regimes
[NASA-TM-87054] p 740 N85-29925

**HIGH SPEED PHOTOGRAPHY**
Use of a radiance amplifier for visualizing seeded aerodynamic flows p 855 A85-45671

**HIGH STRENGTH ALLOYS**
Strengthening the study on the usability of aircraft materials p 42 A85-12354
Recent developments and trends in high strength PM materials p 785 A85-43127
High strength and elevated temperature PM alloy forgings for aerospace applications p 786 A85-43141
High performance PM alloys - The price of allowing for high stresses in components p 787 A85-43161
Ti-10V-2Fe-Al properties p 851 A85-43672
Hot isostatically pressed manufacture of high strength MERL 76 disk and seal shapes
[NASA-CR-165550] p 45 N85-11225

**HIGH STRENGTH STEELS**
Heat resistant alloys for jet engines and high strength steels for landing gears p 784 A85-41004
Fatigue crack growth due to periodic underloads and overloads p 784 A85-41464

**HIGH TEMPERATURE**
New high temperature and fuel resistant sealants based on Permapol P-3, polythioether polymers
p 178 A85-16052
Equivalent damage: A critical assessment
p 28 N85-10952
Benchmark notch test for life prediction
p 28 N85-10953
Pre-HOST high temperature crack propagation
p 29 N85-10956
Development of powder metallurgy 2XXX series Al alloys for high temperature aircraft structural applications
[NASA-CR-172408] p 44 N85-11220
High-temperature optically activated GaAs power switching for aircraft digital electronic control
[NASA-CR-174711] p 116 N85-12901
Life prediction at high temperature under multiaxial loading p 267 N85-15745
Experiences with the material bevaviour and high temperature low cycle fatigue life prediction of the IN 738 blading alloy p 292 N85-15746
Multiaxial and thermomechanical fatigue considerations in damage tolerant design
[NASA-TM-87022] p 597 N85-26964
Research test facility for evaporation and combustion of alternative jet fuels at high air temperatures
[AD-A153830] p 691 N85-29073
Creep fatigue life prediction for engine hot section materials (isotropic)
[NASA-CR-168228] p 774 N85-31057

**HIGH TEMPERATURE AIR**
Performance of a new nose-lip hot-air anti-icing concept
[AIAA PAPER 85-1117] p 664 A85-39614

**HIGH TEMPERATURE ENVIRONMENTS**
High temperature ducts - A composite alternative
[AIAA PAPER 84-2519] p 70 A85-13582
Component-specific modeling p 31 N85-10971
The 3-D inelastic analysis methods for hot section components: Brief description p 31 N85-10972
Life prediction and constitutive behavior: Overview
p 31 N85-10973
Surface protection overview p 32 N85-10978
Airfoil deposition model p 32 N85-10979
Evaluation results of the 700 deg C Chinese strain gauges — for gas turbine engine
[NASA-TM-86973] p 450 N85-21605
Gas turbines: Operating conditions, material selection and development
[NLR-MP-83046-U] p 774 N85-31062
Thermal barrier coating system
[NASA-CASE-LEW-14057-1] p 902 N85-35233

**HIGH TEMPERATURE GASES**
Hot gas ingestion and the speed needed to avoid ingestion for transport type STO/VL and STOL configurations
[AIAA PAPER 84-2530] p 101 A85-13589
Estimation of hot gas reingestion for a VTOL aircraft at the conceptual design stage
[SAE PAPER 841555] p 663 A85-39207
Influence of heat transfer between turbine and compressor on the performance of small turbochargers
p 793 A85-41833

Results of tests of weathered K5NA closeout material in the MSFC Hot Gas Facility
[NASA-CR-170893] p 902 N85-35239
Study of NSI and related cable performance during tests performed in the NASA Hot Gas Facility
[NASA-CR-170886] p 912 N85-35423

**HIGH TEMPERATURE RESEARCH**
Technology for the design of high temperature rise combustors
[AIAA PAPER 85-1292] p 668 A85-39705

**HIGH TEMPERATURE TESTS**
Statistical fatigue crack propagation of IN100 at elevated temperatures p 41 A85-11614
K747 composite main rotor blade modification, analysis and qualification for new high temperature requirements
p 251 A85-21378
Polyimide protective coatings for 700 deg service
p 282 A85-21527
Plastic flow of plasma sprayed ceramics
p 362 A85-24161
A test system for determining the strength of structural elements exposed to a high-temperature gas stream and vibrational loads p 426 A85-27768
Thermal test and analysis of SEM Format B integrated rack and application to SEM Format C — Standard Electronic Modules for aircraft avionics
[SAE PAPER 840944] p 566 A85-33755
New nonmetallic structural composites for military-aircraft construction
[DGLR PAPER 84-102] p 783 A85-40320
Thermal characteristics of gas turbine combustor in high temperature operation p 792 A85-41793
Development of a high temperature single impact rain erosion test capability
[AD-P004371] p 431 N85-21465

**HIGH THRUST**
The evolution of high-thrust turbojet engine technology
p 353 A85-26017

**HIGHLY MANEUVERABLE AIRCRAFT**
Prediction of HiMAT RPRV component interference effects at transonic speeds
[AIAA PAPER 85-0213] p 215 A85-19593
Closing the design loop on HiMAT (highly maneuverable aircraft technology)
[NASA-TM-85923] p 162 N85-14836
Autofocus motion compensation for synthetic aperture radar and its compatibility with strapdown inertial navigation sensors on highly maneuverable aircraft
[AD-A151940] p 569 N85-26893

**HIGHWAYS**
USSR report: Transportation
[JPRS-UTR-84-008] p 468 N85-23694

**HILSCH TUBES**
Computational study of three-dimensional wake structure
[AIAA PAPER 85-1617] p 725 A85-41404

**HISTORIES**
Aero engine components in composite materials - 20 years' experience p 111 A85-15956
Pioneering commercial rocketry in the United States of America - Reaction Motors, Inc. 1941-1958. II - Projects
p 463 A85-29374
Propulsion influences on air combat
[AIAA PAPER 85-1457] p 651 A85-39789
Flight control dynamics of the 1903 Wright Flyer
[AIAA PAPER 85-1804] p 809 A85-43877
The Malcolm horizon: History and future
p 23 N85-10046
Propulsion — jet aircraft engines
[PNR-90208] p 113 N85-12062
On the frontier: Flight research at Dryden 1946-1981
[NASA-SP-4303] p 313 N85-17934
The Prandtl Hergesell project of a national research establishment for aeronautics
[ESA-TT-835] p 313 N85-17993
Some fighter aircraft trends
[NASA-TM-86352] p 326 N85-18954
A history of full-scale testing of aircraft structures at the National Aeronautical Establishment
[NAE-AN-24] p 417 N85-21153
Model research: The National Advisory Committee for Aeronautics, 1915-1958, volume 1
[NASA-SP-4103-VOL-1] p 467 N85-23683
Model research, the National Advisory Committee for Aeronautics, 1915-1958, volume 2
[NASA-SP-4103-VOL-2] p 467 N85-23684
Special course on V/STOL aerodynamics: An assessment of European jet lift aircraft
[AGARD-R-710-ADDENDUM] p 542 N85-25188
Air traffic: Instruments, airports, companies, post, cargo and passengers p 641 N85-28932
The evolution of the U.S. helicopter industry
[AD-A154290] p 709 N85-29913
Quest for performance: The evolution of modern aircraft
[NASA-SP-468] p 811 N85-32089

Typical and historical aspects of motor gliders as meteorological measuring aircraft p 886 N85-35544

**HODOGRAPHS**
Classical free-streamline flow over a polygonal obstacle
[NASA-CR-172448] p 53 N85-10301

**HOLDERS**
Results of tests of MTA-2 TPS on the SRB hold-down bolt blast container
[NASA-CR-170891] p 899 N85-35224

**HOLE DISTRIBUTION (MECHANICS)**
The influence of an inclusion or a hole on the bending of a cracked beam p 123 A85-13703
Stress intensity factors for cracks at a double row of holes p 125 A85-15584
A experiment method to determine the air distribution of the holes along the flametube of gas turbine combustor p 351 A85-25223

**HOLE GEOMETRY (MECHANICS)**
Effect of residual stresses on crack growth from a hole p 124 A85-15339
Reducing the effects of rivet holes on fatigue life by adhesive bonding p 693 A85-37472
Comparison of predictions and experimental results on notches and bolt-loaded drilled holes in CFRP laminates
[DGLR PAPER 84-141] p 788 A85-40277
Finite element analysis of problems associated with life enhancement techniques
[ARL/STRUC-R-404] p 451 N85-21676

**HOLES**
Stochastic crack propagation in fastener holes
[AIAA PAPER 85-0666] p 522 A85-30251
Stochastic crack propagation in fastener holes
p 855 A85-45845

**HOLOGRAPHIC INTERFEROMETRY**
In situ aircraft inspection by pulsed laser holography
p 1 A85-10554
Tomographic reconstruction of three-dimensional flow over airfoils
[AIAA PAPER 85-0479] p 225 A85-19776
Application of digital interferogram evaluation techniques to the measurement of three-dimensional flow fields
[AIAA PAPER 85-0037] p 288 A85-20852
Comparison of inviscid and viscous computations with an interferometrically measured transonic flow
p 545 A85-35129
Optical interferometry in fluid dynamics research
p 599 A85-35203
A holographic interferometric study of an axisymmetric shock-wave/boundary-layer strong interaction flow
[AIAA PAPER 85-1564] p 711 A85-40689
Holographic-interferometric vibration analysis for fast-rotating constructional units p 794 A85-42659
Digital fringe reduction techniques applied to the measurement of three-dimensional transonic flow fields
p 907 A85-48521
Reconstruction of a 3-dimensional transonic rotor flow field from holographic interferogram data
[NASA-TM-86690] p 397 N85-21112
Practical aspects of laser holographic interferometry in wind tunnels
[NASA-TM-86788] p 911 N85-34378

**HOLOGRAPHY**
Volume phase holograms and their application to avionic displays p 47 A85-10634
Certification of a holographic head-up display system for low visibility landings
[AIAA PAPER 84-2689] p 166 A85-17868
Peripheral vision displays: The future
p 24 N85-10058
A collection of flow visualization techniques used in the Aerodynamic Research Branch
[NASA-TM-85998] p 189 N85-15135

**HOMING**
The general class of optimal proportional navigation
p 153 A85-18346
A new guidance law for homing missiles
p 488 A85-32793
Accounting for error stochasticity in terminal homing of aircraft p 97 N85-13115

**HOMING DEVICES**
Scene matching and its application to aerospace electronic systems p 15 A85-12353
A real time (on line) adaptive target detection technique for an airborne millimeter wave seeker design
p 347 A85-24267
Digital simulation of adaptive guidance and control system of a homing missile p 409 A85-28604
Fixed step friction model p 443 A85-28609

**HONEYCOMB CORES**
Aircraft safety improvement p 564 N85-26602

**HONEYCOMB STRUCTURES**
Noise transmission through an acoustically treated and honeycomb stiffened aircraft sidewall
[AIAA PAPER 84-2329] p 62 A85-10873
Noise transmission through an acoustically treated and honeycomb-stiffened aircraft sidewall
p 537 A85-32592
Quasi-steady analysis of aircraft panel flammability
[AD-A145461] p 22 N85-10938
Air Force honeycomb shaping at SM-ALC (Sacramento Air Logistics Center)
[AD-P004005] p 72 N85-11985
Composite repair of aircraft structures
p 285 N85-17059

**HOOKS**
Snatching Harrier from the air with Skyhook
p 781 A85-42890

**HORIZON**
Early Air Force Flight Test Center (AFFTC) experience with Peripheral Vision Horizon Displays (PVHD)
p 24 N85-10057

**HORIZON SCANNERS**
Evaluation of the Malcolm horizon in a moving-base flight simulator p 23 N85-10051
Peripheral vision horizon display on the single seat night attack A-10 p 23 N85-10053

**HORIZONTAL FLIGHT**
Zeroth-order feedback strategies for medium-range interception in a horizontal plane p 157 A85-18327
Isochrones for maximum endurance horizontal gliding flight p 158 A85-18348

**HORIZONTAL ORIENTATION**
The Malcolm horizon: History and future
p 23 N85-10046
Wake effects on the aerodynamic performance of horizontal axis wind turbines
[NASA-CR-174920] p 702 N85-29364

**HORIZONTAL TAIL SURFACES**
Fatigue substantiation of the SH-60B stabilator by test
[AIAA PAPER 84-2452] p 98 A85-13541
Experimental trim drag values and flow-field measurements for a wide-body transport model with conventional and supercritical wings
[NASA-TP-2071] p 12 N85-10920

**HOT CORROSION**
Chemical reactions involved in the initiation of hot corrosion of IN-738 p 519 A85-31686
Coating composition and the formation of protective oxide layers at high temperatures p 596 A85-36234
Effects of surface chemistry on hot corrosion life: Overview p 32 N85-10980
Studies on the hot corrosion of a nickel-base superalloy, Udimet 700
[NASA-TM-86882] p 45 N85-11224
Effects of surface chemistry on hot corrosion life
[NASA-CR-174915] p 582 N85-26711

**HOT PRESSING**
The substitution of nickel for cobalt in hot isostatically pressed powder metallurgy UDIMET 700 alloys
p 686 A85-37415
Microstructures and properties of HIP, HIP plus forged and extruded P/M superalloy FGH95
p 786 A85-43137
The technology of hot isostatic pressing with reference to silicon nitride p 786 A85-43151
Screw press forging of powder HIP billet to critical gas turbine discs and wheels p 795 A85-43158
Hot isostatically pressed manufacture of high strength MERL 76 disk and seal shapes
[NASA-CR-165550] p 45 N85-11225
Development and fabrication of refractory bodies for gas turbine engines
[BMFT-FB-T-84-180] p 113 N85-12899

**HOT SURFACES**
Component-specific modeling
[NASA-CR-174765] p 891 N85-34140

**HOT WORKING**
Hot forming of mechanically alloyed gas turbine components p 787 A85-43157

**HOT-FILM ANEMOMETERS**
A combined visualization-anemometry study of the turbulent drag reducing mechanisms of triangular micro-groove surface modifications
[AIAA PAPER 85-0548] p 369 A85-25941
Stall warning - Catching it early p 578 A85-36144
An experimental investigation on location of boundary layer transition on the NACA 0012 using surface hot film gages p 736 A85-43231
Development of a temperature-compensated hot-film anemometer system for boundary-layer transition detection on high-performance aircraft
[NASA-TM-86732] p 835 N85-33121

**HOT-WIRE ANEMOMETERS**
Upstream influence on turbulent jet flows from cruciform nozzles p 470 A85-30995
Experimental method for the study of corner flows
[AAAF PAPER NT 84-06] p 870 A85-46988
Aero-optics experimental techniques
[AD-A146755] p 294 N85-16067

**HOT-WIRE FLOWMETERS**

Effect of a buried-wire gage on the separation bubble Numerical study p 73 A85-12704

**HOUSINGS**

Development of a graphite/polyimide composite transmission housing p 281 A85-21380

**HOVERING**

Hot gas ingestion and the speed needed to avoid ingestion for transport type STO/VL and STOL configurations [AIAA PAPER 84-2530] p 101 A85-13589

The modelling and control of RC helicopter — Radio Control p 115 A85-15657

Digital avionics and flight path director functions of the HH-60 helicopter [AIAA PAPER 84-2674] p 151 A85-17857

A study of the flow recirculation problems within an anechoic hover chamber [AIAA PAPER 85-0071] p 273 A85-19497

Solution method for a hovering helicopter rotor using the Euler equations [AIAA PAPER 85-0436] p 223 A85-19749

Comparison of noise prediction for the X-wing system and a conventional rotor in hover p 493 A85-31953

Impact of main rotor tip geometry on main rotor/tail rotor interaction in hover p 495 A85-31985

A nonlinear pilot model for hover p 513 A85-32783

Aeroelastic stability analysis of a composite rotor blade p 498 A85-32847

X-Wing Harrier speed and helicopter hovering p 572 A85-35352

The evaluation of aerodynamic coefficients for projectiles fired from a hovering helicopter p 618 A85-37203

An investigation into the hovering behaviour of the LTA 20-1 airship in calm and turbulent air [AIAA PAPER 85-0878] p 641 A85-38793

Velocity measurements in the near wake of a hovering rotor [AIAA PAPER 85-1675] p 725 A85-41408

Thrust changes induced by ground and ceiling planes on a rotor in hover p 759 A85-43223

Development of time response criteria for rotorcraft at hover and low speed [AIAA PAPER 85-1790] p 838 A85-43848

Investigation of outside visual cues required for low speed and hover [AIAA PAPER 85-1808] p 857 A85-43857

Factors influencing rotor aerodynamics in hover and forward flight p 816 A85-45793

Visualization studies of jet impingement flows at McDonnell Douglas Research Laboratories p 867 A85-47144

Reconstruction of a 3-dimensional transonic rotor flow field from holographic interferogram data [NASA-TM-86690] p 397 N85-21112

Experimental study of main rotor tip geometry and tail rotor interactions in hover. Volume 1. Text and figures [NASA-CR-177336-VOL-1] p 466 N85-22344

Experimental study of main rotor tip geometry and tail rotor interactions in hover. Volume 2: Run log and tabulated data [NASA-CR-177336-VOL-2] p 466 N85-22345

Hover test results of a small-scale twin-tilt nacelle model [NASA-TM-86665] p 478 N85-23706

Harrier p 576 N85-26595

Effect of ground and/or ceiling planes on thrust of rotors in hover [NASA-TM-86754] p 743 N85-31014

**HOVERING STABILITY**

Application of the finite-state arbitrary-motion aerodynamics to rotor blade aeroelastic response and stability in hover and forward flight [AIAA PAPER 85-0763] p 491 A85-30380

Aeromechanical stability of a full-scale hingeless rotor in hover p 496 A85-32002

Stability and control of the twin lift helicopter system p 513 A85-32846

**HTPB PROPELLANTS**

Study of HTPB-based SOFRAM fuels [FOA-C-20563-D3] p 437 N85-20150

**HUBS**

Sikorsky composite rotor hub development p 251 A85-21381

Delamination control of composite rotor hubs p 519 A85-31962

Aspects of a see-saw tail rotor balancing [MBB-UD-423-84-OE] p 572 A85-35251

The 'Spheriflex' - A new rotor-hub concept p 755 A85-40920

Damage tolerance design for aircraft hubs made of cast magnesium alloy p 852 A85-44250

Extended aeroelastic analysis for helicopter rotors with prescribed hub motion and blade appended penduluum vibration absorbers [NASA-CR-172455] p 85 N85-12038

Integrated technology rotor/flight research rotor hub concept definition [NASA-CR-166447] p 344 N85-18051

Integrated Technology Rotor/Flight Research Rotor (ITR/FRR) concept definition [NASA-CR-166443] p 345 N85-18978

Integrated Technology Rotor/Flight Research Rotor (ITR/FRR) concept definition [NASA-CR-166445] p 345 N85-18979

Integrated technology rotor/flight research rotor concept definition study [NASA-CR-166446] p 345 N85-18980

Integrated Technology Rotor/Flight Research Rotor (ITR/FRR) concept definition study [NASA-CR-166444] p 345 N85-18981

A new main rotor hub for the AS 332 Super Puma [SNIAS-851-210-102] p 761 N85-31047

**HUGHES AIRCRAFT**

Hughes' new attackers p 18 A85-12175

**HUMAN CENTRIFUGES**

Naval Center seeks new uses for centrifuge-based simulator p 591 A85-33800

Flight simulation fidelity in a total g-force environment [AIAA PAPER 85-1741] p 779 A85-40557

Controlling the human centrifuge as a force and motion platform for the dynamic flight simulator [AIAA PAPER 85-1742] p 779 A85-40558

**HUMAN FACTORS ENGINEERING**

Proposed criteria for sound pressure levels in USAF aircraft [AIAA PAPER 84-2294] p 60 A85-10849

Contemporary problems in airborne displays p 346 A85-22593

Cockpit technology in a modern commercial aircraft p 341 A85-25510

A mission oriented approach to cockpit design as applied to observation and attack helicopters p 497 A85-32011

Display technology and the role of human factors p 656 A85-38957

Pilots wary of tactical information systems p 783 A85-41058

Organization of the cockpit in future aircraft p 825 A85-44239

Simplifying the cockpit p 888 A85-48074

LED multifunction keyboard engineering study [AD-A145199] p 24 N85-10061

Aircrew-aircraft integration: A summary of US Army research programs and plans [NASA-TM-85991] p 36 N85-11004

Auditory information systems in military aircraft: Current configurations versus the state of the art [AD-A145469] p 65 N85-11794

Technical Workshop: Advanced Helicopter Cockpit Design [NASA-CP-2351] p 154 N85-14806

Attack helicopter (AH-1T) cockpit systems integration p 161 N85-14826

Avionics system design for requirements for the United States Coast Guard HH-65A Dolphin p 154 N85-14827

Biodynamic resistant control stick [AD-D011380] p 259 N85-15721

Operational requirements versus technological capabilities p 204 N85-16798

A Computer-generated topographic display system for navigation and mission planning in helicopters p 259 N85-16800

A review of US Army aircrew-aircraft integration research programs p 270 N85-16814

Simulating speed and height cues in the C-130 weapon system trainer [AD-P004313] p 358 N85-17967

The fiber-optic helmet-mounted display [AD-P004330] p 348 N85-17984

Pictorial format display evaluation [AD-A149252] p 348 N85-18986

Electronic displays: Their strengths and weaknesses for advanced high performance aircraft p 349 N85-19664

Biomechanics finds practical applications in aerospace research p 446 N85-20205

Proceedings of the 6th Advanced Aircrew Display Symposium [AD-A150044] p 419 N85-21160

Investigation of technology needs for avoiding helicopter pilot error related accidents [NASA-CR-3895] p 563 N85-25220

Preliminary design of a limb restraint evaluator [AD-A151749] p 564 N85-25226

Rotorcraft digital advanced avionics system (RODAAS) functional description [NASA-CR-166611] p 568 N85-25237

A comparison of pictorial and speech warning messages in the modern cockpit [AD-A151917] p 579 N85-26706

Utilization of an automated riveting system in aircraft construction [MBB-UT-11/84-O] p 578 N85-27736

Human factors in cockpit automation: A field study of flight crew transition [NASA-CR-177333] p 747 N85-29937

Study to determine potential flight applications and human factors design guidelines for voice recognition and synthesis systems [NASA-CR-172590] p 797 N85-31349

**HUMAN PERFORMANCE**

Situational interactive micro/graphic simulator system for improving maintenance performance [AD-A146677] p 177 N85-14846

Performance evaluation of A-10 aircraft mainteance units and aircraft using constrained facet analysis [AD-A146955] p 201 N85-15660

Nondestructive inspection: Improved capabilities of technicians [AD-A147388] p 295 N85-16196

Multiple resources and display formatting: The implications of task integration in a simulated air traffic control task [AD-A150713] p 530 N85-24205

Human factors in cockpit automation: A field study of flight crew transition [NASA-CR-177333] p 747 N85-29937

**HUMAN REACTIONS**

A path model of aircraft noise annoyance p 304 A85-22071

Aviation noise effects [AD-A154319] p 806 N85-30776

**HUMAN TOLERANCES**

Research on the effect of noise at different times of day: Models, methods and findings [NASA-CR-3888] p 538 N85-23375

**HYBRID NAVIGATION SYSTEMS**

Terrain following without use of forward looking sensors p 569 N85-26659

**HYBRID STRUCTURES**

Resonance vibrations of skeleton models of turbine blades with a composite fir-tree root p 26 A85-11821

**HYDRAULIC CONTROL**

Application of model-following control synthesis techniques to design of hydraulic velocity flight simulation table with one axis p 195 A85-18285

An adaptive control of an electro-hydraulic position control system p 893 A85-47702

A fluidic flight control system demonstrator p 894 A85-47788

Performance evaluation of an electrofluidic flight control actuator p 894 A85-47789

Fluidics - A reliable alternative for aircraft control p 894 A85-47790

Powered articulated headrest system [AD-D011353] p 254 N85-15710

**HYDRAULIC EQUIPMENT**

The hydraulic and electrohydraulic elements used in flight simulators p 287 A85-19886

Integrated paratroop door [AD-D011507] p 416 N85-21148

Active control landing gear for ground load alleviation p 679 N85-27902

**HYDRAULIC JETS**

On a forced elliptic jet p 78 A85-14357

**HYDRAZINE ENGINES**

Pitot pressure and heat transfer measurements in hydrazine thruster plumes [AIAA PAPER 85-0934] p 685 A85-37599

**HYDROCARBON COMBUSTION**

delta function and generalized tables of thermodynamic properties for CnHm-air system combustion products p 43 A85-12358

An improved procedure for calculating the aerothermodynamic properties of a vitiated air test medium [AIAA PAPER 85-0913] p 704 A85-37583

**HYDROCARBON FUELS**

A chromatographic method for determining the content of aromatic hydrocarbons in aviation gasolines p 434 A85-28035

Combustion efficiency of a hydrogen-kerosene fuel in a straight-through channel p 836 A85-46221

Chemistry of fuel deposits and sediments and their predursors [NASA-CR-174778] p 44 N85-10209

Analysis of middle distillate fuels by high resolution field ionization mass spectrometry [AD-A147724] p 285 N85-17153

Aspects of high-resolution gas chromatography as applied to the analysis of hydrocarbon fuels and other complex organic mixtures. Volume 1
[AD-A156154] p 902 N85-35257

**HYDROCARBONS**

Impact of aircraft emissions on air quality in the vicinity of airports. Volume 4. Nitrogen dioxide and hydrocarbons
[AD-A148253] p 299 N85-17436

Oxidation and gum formation in jet fuels
[AD-A149834] p 438 N85-21401

Applications of high pressure differential scanning calorimetry to aviation fuel thermal stability research
[NASA-TM-87002] p 521 N85-23941

**HYDRODYNAMIC RAM EFFECT**

Unsteady forces on a body immersed in viscous fluids. I - For a uniformly accelerated elliptic cylinder
p 47 A85-10971

**HYDRODYNAMICS**

Theory and practice of lubrication for engineers (2nd revised and enlarged edition) — Book
p 124 A85-15521

A study of characteristics of the 'long' hydrodynamic dampers of gas turbine engine rotors with allowance for lubricant turbulization and cavitation in the damper clearance p 349 A85-23978

Rotordynamic Instability Problems in High-Performance Turbomachinery
[NASA-CP-2338] p 186 N85-14116

Hydraulic forces on a centrifugal impeller undergoing synchronous whirl p 187 N85-14124

Hydrodynamic impeller stiffness, damping, and inertia in the rotordynamics of centrifugal flow pumps
p 187 N85-14125

Multi-ducted inlet combustor research and development
[AD-A153753] p 673 N85-28946

**HYDROFOILS**

Sidewall boundary-layer corrections in subsonic, two-dimensional airfoil/hydrofoil testing
p 439 A85-26761

**HYDROGEN**

The need to return to hydrogen in airships
[AIAA PAPER 85-0873] p 646 A85-38798

Simultaneous flow visualization and unsteady lift measurement on an oscillating lifting surface
[AD-P004157] p 323 N85-17942

**HYDROGEN FUELS**

Off-design point characteristics of the precooled gas turbine cycle with liquefied hydrogen as fuel
p 289 A85-20884

Combustion efficiency of a hydrogen-kerosene fuel in a straight-through channel p 836 A85-46221

**HYDROGEN OXYGEN ENGINES**

A new technique to break diaphragms electrically in a double-tube short duration jet simulation facility
p 682 A85-38875

Advanced High Pressure O2/H2 Technology
[NASA-CP-2372] p 595 N85-26862

**HYDROPLANING**

Runway rubber removal specification development field evaluation procedures development
[FAA-PM-84-27] p 430 N85-21179

Very high speed lap with positive lift effect
[AD-D011710] p 796 N85-30344

**HYDROSTATICS**

Theory and practice of lubrication for engineers (2nd revised and enlarged edition) — Book
p 124 A85-15521

**HYPERBOLAS**

Hyperbolic phenomena in the flow of viscoelastic fluids
[AD-A153533] p 700 N85-29166

**HYPERBOLIC DIFFERENTIAL EQUATIONS**

Implicit TVD schemes for hyperbolic conservation laws in curvilinear coordinates
[AIAA PAPER 85-1513] p 721 A85-40946

Generation of 3-dimensional body fitted coordinates using hyperbolic partial differential equations
[AD-A148059] p 327 N85-18006

Use of a hyperbolic grid generation scheme in simulating supersonic viscous flow about three-dimensional winged configuration
[NASA-TM-85344] p 874 N85-34116

**HYPERBOLIC FUNCTIONS**

Finite element methods for first-order hyperbolic systems with particular emphasis on the compressible Euler equations p 446 A85-30218

**HYPERBOLIC NAVIGATION**

OMEGA navigation system position-fix accuracy assessment p 93 A85-14828

Early history of the Decca Navigator system
p 824 A85-46994

**HYPERBOLIC SYSTEMS**

Multi-dimensional case of an entropic variational formulation of conservative hyperbolic systems
p 535 A85-33018

**HYPERSONIC AIRCRAFT**

NASA researchers believe efforts could yield speeds of Mach 12 p 351 A85-25180

Navier-Stokes solution of the flow field around a complete aircraft
[AIAA PAPER 85-1509] p 721 A85-40944

Two federal agencies support hypersonic transport research p 810 A85-44974

Aerodynamic heating rate distributions induced by trailing edge controls on hypersonic aircraft configurations at Mach 8
[NASA-TM-87453] p 470 N85-22370

Aerodynamic characteristics of a distinct wing-body configuration at Mach 6: Experiment, theory, and the hypersonic isolation principle
[NASA-TP-2467] p 818 N85-33107

**HYPERSONIC BOUNDARY LAYER**

Critical layer concept relative to hypersonic boundary layer stability
[AIAA PAPER 85-0303] p 219 A85-19652

Measurements of density and velocity profiles in non-equilibrium laminar hypersonic boundary layers in air
p 320 A85-25483

Experimental studies of Quasi-Two-Dimensional and three-dimensional viscous interaction regions induced by skewed-shock and swept-shock boundary layer interactions
[AD-A150080] p 449 N85-21587

Proceedings of the 9th US Air Force and the Federal Republic of Germany Data Exchange Agreement Meeting. Viscous and Interacting Flow Field Effects
[AD-A153020] p 699 N85-28266

**HYPERSONIC FLIGHT**

Periodic optimal cruise of an atmospheric vehicle
p 102 A85-13701

Introductory aerothermodynamics of advanced space transportation systems p 231 A85-21827

**HYPERSONIC FLOW**

Hypersonic flow past a wing at large angles of attack
p 78 A85-14591

Hypersonic large-deflection similitude for oscillating delta wings p 78 A85-14653

Regarding parametric investigations of slender cone nose bluntness effects
[AIAA PAPER 85-0349] p 220 A85-19688

Hypersonic multicycle gas jet with a strongly underexpanded stream at the nozzle section
p 229 A85-20554

Hypersonic chemically nonequilibrium viscous shock layer on wings with a catalytic surface
p 229 A85-20561

Investigations of the longitudinal flow in corner configurations in the hypersonic regime. II - Corners between swept wedges p 232 A85-22146

Heat-transfer distributions for biconics at incidence in hypersonic-hypervelocity real-gas flows
p 319 A85-25478

Flow field studies on a biconic model in high enthalpy non-equilibrium flow p 320 A85-25480

General features characterizing separated flows arising in supersonic and hypersonic flows past blunt bodies
p 388 A85-28350

Optimal aerodynamic configurations in a twisted hypersonic gas flow p 389 A85-28390

Theory of hypersonic jets p 389 A85-28394

Analysis of aerothermal loads on spherical dome protuberances p 473 A85-32602

A numerical calculation of nonequilibrium flow past a wing in the approximation of a thin shock layer
p 544 A85-33593

Knudsen layer characteristics for a highly cooled blunt body in hypersonic rarefied flow p 545 A85-35127

Experimental investigation of heat transfer to bluff cylinders and cones in hypersonic rarefied gas flow
p 548 A85-35747

An experimental investigation of flap turbulent heat transfer and pressure characteristics in hypersonic flow
p 550 A85-35773

Numerical calculation of separation flow over severely indented blunt body p 551 A85-35777

A numerical investigation of a viscous hypersonic air flow around elongated blunted bodies at large angles of attack p 619 A85-37333

Investigation of three-dimensional separated flows
p 619 A85-37338

Computational methods for hypersonic viscous flow over finite ellipsoid-cones at incidence
[AIAA PAPER 85-0925] p 620 A85-37594

The effects of surface discontinuities on convective heat transfer in hypersonic flow
[AIAA PAPER 85-0971] p 620 A85-37621

Stagnation point heat transfer in hypersonic high enthalpy flow
[AIAA PAPER 85-0973] p 620 A85-37623

The drag of simple shaped bodies in the rarefied hypersonic flow regime
[AIAA PAPER 85-0998] p 621 A85-37642

The effect of the bluntness shape on the drag coefficient of a body in hypersonic flow of a rarefied gas
p 624 A85-38564

PNS predicted shock location and jump conditions at supersonic and hypersonic speeds — Parabolized Navier-Stokes
[AIAA PAPER 85-1407] p 632 A85-39766

Navier-Stokes solution for hypersonic flow over an indented nosetip
[AIAA PAPER 85-1504] p 721 A85-40940

Inviscid hypersonic flow around a conical flat-top wing-body combination p 723 A85-41011

Asymptotic calculations of gasdynamic quantities near the separation of a limiting shock layer
p 724 A85-41275

Numerical computation of hypersonic laminar near-wake flow via Navier-Stokes solver
[AIAA PAPER 85-1672] p 731 A85-42873

The supercritical regime of hypersonic flow past a delta wing p 815 A85-44152

Hypersonic flow past a wing at large angles of attack with a detached shock wave p 815 A85-44788

Turbulent boundary layers over rough surfaces hypersonic flow
[AD-A145040] p 10 N85-10016

Aerodynamic and thermal characteristics of stellate bodies in hypersonic flow of rarefied gas at angle of attack p 148 N85-14974

Hypersonic flow of mixture around blunt body
p 148 N85-14979

Laminar heat-transfer distributions on biconics at incidence in hypersonic-hypervelocity flows
[NASA-TP-2213] p 293 N85-16065

Instrumentation for Application Number 1: Mass spectrometric analysis of the boundary layer associated with the tethered satellite p 433 N85-20372

Hypersonic flow about triangular airfoil at large angles of attack p 477 N85-22792

Flow over a biconic configuration with an afterbody compression flap
[AD-A151882] p 603 N85-25776

Hypersonic nonequilibrium gas flow past zero-aspect wing p 562 N85-27063

Mach 14 flow restrictor thermal stress analysis
[AD-A158215] p 898 N85-35208

**HYPERSONIC HEAT TRANSFER**

Numerical analysis of heat transfer on the surface of a delta wing in hypersonic air flow at large angles of attack p 141 A85-16190

A numerical study of three-dimensional radiation fields in problems of supersonic flow past segmental bodies
p 227 A85-20025

An experimental investigation of flap turbulent heat transfer and pressure characteristics in hypersonic flow
p 550 A85-35773

Stagnation point heat transfer in hypersonic high enthalpy flow
[AIAA PAPER 85-0973] p 620 A85-37623

Experimental investigation of heat transfer to bluff cylinders and cones in hypersonic rarefied gas flow
p 396 N85-20195

An experimental investigation of flap turbulent heat transfer and pressure characteristics in hypersonic flow
p 400 N85-21426

**HYPERSONIC REENTRY**

Waveriders p 595 A85-34193

Stagnation point heat transfer in hypersonic high enthalpy flow
[AIAA PAPER 85-0973] p 620 A85-37623

Transitional, hypervelocity aerodynamic simulation and scaling in light of recent flight data
[AIAA PAPER 85-1028] p 621 A85-37661

Engineering flowfield method with angle-of-attack applications p 731 A85-42913

An analysis of the Space Shuttle hypersonic entry trim anomaly
[AIAA PAPER 85-1764] p 850 A85-43878

**HYPERSONIC SHOCK**

A theory for a three-dimensional hypersonic viscous shock layer in the vicinity of a plane of symmetry
p 141 A85-16217

Aerodynamic force measurements in the IISc hypersonic shock tunnel p 320 A85-25481

**HYPERSONIC TEST APPARATUS**

Development and performance of the NASA Langley Research Center expansion tube/tunnel, a hypersonic-hypervelocity real-gas facility
p 368 A85-25482

**HYPERSONIC VEHICLES**

Transient motion of hypersonic vehicles including time history effects
[AIAA PAPER 85-0201] p 268 A85-19585

Equation associated with the theory of local interaction in a rarefied gas p 384 A85-30110

Transition measurements via heat-transfer instrumentation on a 0.5 bluntness 9.75-deg cone at Mach 7 with and without mass addition
[AIAA PAPER 85-1004] p 621 A85-37645

An investigation of film cooling on a hypersonic vehicle using a PNS flow analysis code
[AIAA PAPER 85-1591] p 712 A85-40707

Inviscid flow field analysis of maneuvering hypersonic vehicles using the SCM formulation and parabolic grid generation — Split-Coefficient Matrix
[AIAA PAPER 85-1682] p 716 A85-40767

Aerodynamics for an entry research vehicle
[AIAA PAPER 85-1793] p 814 A85-43879

A model of hypersonic two-dimensional oblique detonation wave ramjet
[UTIAS-TN-257] p 891 N85-34139

**HYPERSONIC WAKES**

Free perturbations of a laminar hypersonic flow behind an airfoil p 141 A85-16218

Recent developments in the modeling of high speed jets, plumes and wakes
[AIAA PAPER 85-1616] p 714 A85-40724

Numerical computation of hypersonic laminar near-wake flow via Navier-Stokes solver
[AIAA PAPER 85-1672] p 731 A85-42673

**HYPERSONIC WIND TUNNELS**

Hypersonic characteristics of an advanced aerospace plane
[AIAA PAPER 85-0346] p 269 A85-19685

Refinement of an 'alternate' method for measuring heating rates in hypersonic wind tunnels
p 516 A85-32625

Measurement of wing-leading-edge heating rates on wind tunnel models using the thin-film technique
[AIAA PAPER 85-0972] p 681 A85-37622

Developments in aerothermal test techniques at the AEDC supersonic-hypersonic wind tunnels
[AIAA PAPER 85-1003] p 681 A85-37644

Measured and predicted vortex-induced leeward heating on a biconic at Mach 6 and 10
[AIAA PAPER 85-1061] p 621 A85-37675

Aeronautical facilities catalogue. Volume 1: Wind tunnels
[NASA-RP-1132] p 361 N85-18991

Mach-10 high Reynolds number development in the NSWC (Naval Surface Weapons Center) hypervelocity facility
[AD-A151241] p 593 N85-25274

Mach 14 flow restrictor thermal stress analysis
[AD-A156215] p 898 N85-35208

**HYPERVELOCITY**

Introductory aerothermodynamics of advanced space transportation systems p 231 A85-21827

Mach-10 high Reynolds number development in the NSWC (Naval Surface Weapons Center) hypervelocity facility
[AD-A151241] p 593 N85-25274

**HYPERVELOCITY FLOW**

Heat-transfer distributions for biconics at incidence in hypersonic-hypervelocity real-gas flows
p 319 A85-25478

Development and performance of the NASA Langley Research Center expansion tube/tunnel, a hypersonic-hypervelocity real-gas facility
p 368 A85-25482

Laminar heat-transfer distributions on biconics at incidence in hypersonic-hypervelocity flows
[NASA-TP-2213] p 293 N85-16065

**HYPERVELOCITY PROJECTILES**

Base pressure of a projectile within the transonic flight regime p 317 A85-25136

**HYPERVELOCITY WIND TUNNELS**

Mach-10 high Reynolds number development in the NSWC hypervelocity facility
[AIAA PAPER 85-0054] p 273 A85-19486

Improvements in low Reynolds number testing in the NSWC hypervelocity wind tunnel No. 9
[AIAA PAPER 85-0226] p 274 A85-19602

Experimental investigation of heat transfer to bluff cylinders and cones in hypersonic rarefied gas flow
p 548 A85-35747

Transitional, hypervelocity aerodynamic simulation and scaling in light of recent flight data
[AIAA PAPER 85-1028] p 621 A85-37661

**HYSTERESIS**

Lift hysteresis of an oscillating slender ellipse
p 80 A85-15332

Aerodynamic hysteresis in stationary separated flow past elongated bodies p 552 A85-35881

Effects of aspect ratio on stall hysteresis for the Wortmann airfoil
[AIAA PAPER 85-1770] p 812 A85-43832

The influence of laminar separation and transition on low Reynolds number airfoil hysteresis
p 817 A85-45838

Internal hysteresis experienced on a high pressure syn gas compressor p 187 N85-14122

**I**

**I BEAMS**

Impact dynamics research on composite transport structures
[NASA-TM-86391] p 797 N85-30367

**ICE**

Comparison of icing cloud instruments for 1982-1983 icing season flight program
[AIAA PAPER 84-0020] p 163 A85-16096

Droplet size distribution effects on aircraft ice accretion p 563 A85-35585

Initial feasibility ground test of a proposed photogrammetric system for measuring the shapes of ice accretions on helicopter rotor blades during forward flight
[NASA-TM-87391] p 106 N85-12887

**ICE FLOES**

Parachute expedition to Arctic p 236 N85-16240

**ICE FORMATION**

Progress toward the development of an aircraft icing analysis capability
[AIAA PAPER 84-0105] p 13 A85-10653

Icing flight tests p 90 A85-15595

The Federal Aviation Administration's Engineering and Development Aircraft Icing Program
[AIAA PAPER 85-0015] p 247 A85-19459

The development of mathematical modelling techniques for helicopter rotor icing
[AIAA PAPER 85-0336] p 240 A85-19679

Correlation of airfoil icing relationships with two-dimensional model and full scale rotorcraft icing test data
[AIAA PAPER 85-0337] p 240 A85-19680

Detailed measurements of the flowfield in the vicinity of an airfoil with glaze ice
[AIAA PAPER 85-0409] p 222 A85-19730

Progress in development of a Navier-Stokes solver for evaluation of iced airfoil performance
[AIAA PAPER 85-0410] p 222 A85-19731

Three-dimensional airflow and hydrometeor trajectory calculation with applications
[AIAA PAPER 85-0412] p 222 A85-19733

Measurement of ice accretion using ultrasonic pulse-echo techniques
[AIAA PAPER 85-0471] p 286 A85-19769

Analytical determination of propeller performance degradation due to ice accretion
[AIAA PAPER 85-0339] p 264 A85-20867

Icing tunnel tests of Electro-Impulse De-icing of an engine inlet and high-speed wings
[AIAA PAPER 85-0466] p 241 A85-20872

Icing conditions encountered by a research aircraft
p 299 A85-21141

Experimental aerodynamic characteristics of an NACA 0012 airfoil with simulated ice p 252 A85-21844

Predicting rime ice accretion on airfoils
p 317 A85-25135

The NASA altitude wind tunnel - its role in advanced icing research and development
[AIAA PAPER 85-0090] p 357 A85-26381

Overview of icing research at ONERA
[AIAA PAPER 85-0335] p 401 A85-28028

Natural icing flight tests of the Beech Model F90-1 prototype p 401 A85-28642

The UH-1H helicopter icing flight test program - An overview
[AIAA PAPER 85-0338] p 401 A85-28898

Icing flight research - Aerodynamic effects of ice and ice shape documentation with stereo photography
[AIAA PAPER 85-0468] p 402 A85-30192

Measurement of ice accretion using ultrasonic pulse-echo techniques p 600 A85-35589

Icing on aircraft - Again a topic of interest
p 745 A85-41065

Performance degradation of helicopter rotor in forward flight due to ice p 746 A85-42937

Determination of the local heat transfer coefficients of three simulated smooth ice formation characteristics on a cylinder
[AIAA PAPER 85-1835] p 819 A85-43873

Aircraft icing must never be underestimated
p 877 A85-48862

Automated aircraft icing forecast technique
[AD-A144853] p 57 N85-10571

The UH-1H helicopter icing flight test program: An overview
[NASA-TM-86925] p 242 N85-15702

The NASA Altitude Wind Tunnel (AWT): Its role in advanced icing research and development
[NASA-TM-86920] p 276 N85-15758

Icing flight research: Aerodynamic effects of ice and ice shape documentation with stereo photography
[NASA-TM-86906] p 343 N85-18049

First stage of equipping a Do 28 as a research aircraft for icing, and first research results
[ESA-TT-855] p 416 N85-19982

Ice shapes and the resulting drag increase for a NACA 0012 airfoil
[NASA-TM-83556] p 641 N85-27839

On the state of knowledge on meteorologically caused icing of aircraft in clouds
[ESA-TT-861] p 801 N85-31736

Artificial and natural icing tests YEH-60A quick fix helicopter
[AD-A155147] p 830 N85-32116

**ICE PREVENTION**

Progress toward the development of an aircraft icing analysis capability
[AIAA PAPER 84-0105] p 13 A85-10653

Analysis and testing of the Diamond One wing anti-icing system
[AIAA PAPER 85-0414] p 286 A85-19735

Thermal analysis techniques for design of VSTOL aircraft rotor ice protection
[AIAA PAPER 85-0340] p 332 A85-26387

Overview of icing research at ONERA
[AIAA PAPER 85-0335] p 401 A85-28028

Performance of a new nose-lip hot-air anti-icing concept
[AIAA PAPER 85-1117] p 664 A85-39614

Flight evaluation of an insect contamination protection system for laminar flow wings
[SAE PAPER 850860] p 884 A85-50102

Flight testing a liquid ice protection system on a single-engine airplane
[SAE PAPER 850923] p 885 A85-50129

Heliport snow and ice control methods and guidelines
[DOT/FAA/PM-84/22] p 37 N85-10073

To take off and to land safely, Hoechst 1678 for ice and snow free runways p 149 N85-13791

Analytical and physical modeling program for the NASA Lewis Research Center's Altitude Wind Tunnel (AWT)
[NASA-TM-86919] p 276 N85-15757

**ICE REPORTING**

Ultrashort-wave radar subsurface sounding of sea ice and earth covers p 374 A85-25594

**IDEAL FLUIDS**

Nonstationary aerodynamic characteristics of a profile in separated flow near an undulated wall
p 730 A85-42120

Variational principle for two dimensional flows of the compressible ideal fluid with incontinuous surfaces
p 909 A85-49704

**IDEAL GAS**

Approximate determination of the boundaries of an ideal gas jet issuing under conditions of pressure difference from a nozzle with the formation of a free vortex flow
p 315 A85-23982

Conical flows near edge breaks of surfaces dividing the supersonic wake flows of an ideal gas
p 389 A85-28441

A supersonic inhomogeneous flow of an ideal gas around blunted bodies p 619 A85-37335

**IDENTIFYING**

Microscopic identification of feathers in order to improve birdstrike statistics
[AD-P004187] p 403 N85-19950

**IFF SYSTEMS (IDENTIFICATION)**

Aircraft identification based on pattern recognition of FM emission spectra p 15 A85-11078

**ILYUSHIN AIRCRAFT**

Testing solution for IL-76 braking system problem
p 256 N85-16766

**IMAGE ANALYSIS**

An approach to automatic FLIR video assessment
p 182 A85-16650

The impact of VLSI on guidance and control system design p 595 N85-26654

**IMAGE CONTRAST**

Contrast sensitivity performance assessment of HUD display systems p 259 A85-21593

**IMAGE INTENSIFIERS**

Use of a radiance amplifier for visualizing seeded aerodynamic flows p 855 A85-45671

**IMAGE MOTION COMPENSATION**

Depth of field for SAR with aircraft acceleration
p 91 A85-12664

The main characteristics of a synthetic-aperture radar in the case of arbitrary motion of the flight vehicle
p 96 A85-15687

Autofocus motion compensation for synthetic aperture radar and its compatibility with strapdown inertial navigation sensors on highly maneuverable aircraft
[AD-A151940] p 569 N85-26693

**IMAGE PROCESSING**

Scene matching and its application to aerospace electronic systems p 15 A85-12353

Imaging Sensor Autoprocessor — for automatic target recognition
[AIAA PAPER 84-2613] p 184 A85-17811

Application of digital interferogram evaluation techniques to the measurement of three-dimensional flow fields
[AIAA PAPER 85-0037] p 268 A85-20852

Detection of moving vehicles in thermal imagery obtained from a moving platform p 367 A85-24284

Passive millimeter wave imaging for guidance applications p 347 A85-24937

Passive navigation by triangulation and tracking of undistinguished features in successive high-resolution images p 642 A85-37830

Development of a simulator facility for helicopter air-to-air combat
[AIAA PAPER 85-1733] p 780 A85-42662

Advances in computer-generated imagery for flight simulation p 850 A85-44124

Airborne Electronic Terrain Map System - Conclusions p 834 A85-45152

Digital fringe reduction techniques applied to the measurement of three-dimensional transonic flow fields p 907 A85-48521

Recent advances in computer image generation p 918 A85-49005

Simulators - How real does the visual system need to be? p 898 A85-49948

Analysis of on-board CIG (Computer Image Generator) applications for aircrew training
[AD-A145214] p 38 N85-10079

Functional built-in-test in a pipelined image processor p 202 N85-16740

The IMAGE 3 Conference Proceedings
[AD-A148636] p 313 N85-17962

The use of lasers in wide-angle visual systems
[AD-P004322] p 370 N85-17976

A second generation WAVIDS (Wide Angle Virtual Image Display System)
[AD-P004328] p 359 N85-17982

Military applications of the Singer Link-Miles IMAGE visual system
[AD-P004337] p 359 N85-17991

AVTS (Advanced Visual Technology System): A high fidelity visual simulator
[AD-P004338] p 359 N85-17992

**IMAGE RECONSTRUCTION**

Three-dimensional tomographic reconstruction of the flow around a revolving helicopter rotorblade - A numerical simulation p 903 A85-47106

Digital fringe reduction techniques applied to the measurement of three-dimensional transonic flow fields p 907 A85-48521

**IMAGES**

Aircraft flow effects on cloud droplet images and concentrations
[AD-A146176] p 131 N85-12529

**IMAGING TECHNIQUES**

Automated and interactive data base generation
[AD-P004316] p 374 N85-17970

Geographic subdivision and top level data structures, Columbus, Magellan, and expanding CIG (Computer Image Generation) horizons
[AD-P004317] p 374 N85-17971

CIG (Computer image generation) data bases in an instance: Bits and pieces
[AD-P004318] p 375 N85-17972

The generation of three-dimensional data bases using a building block approach
[AD-P004319] p 379 N85-17973

SODERN Visualization System (SVS) for flight simulation
[AD-P004320] p 358 N85-17974

An overview of the research program at the visual technology research simulator
[AD-P004321] p 359 N85-17975

Design considerations for an eye tracked AOI (Area of interest) display system
[AD-P004324] p 359 N85-17978

Control systems analysis program: A tool for analysis of the GE-VSCDP (General Electric-Visual System Component Display Program) image display system
[AD-P004325] p 356 N85-17979

Progress report on an eye-slaved area-of-interest visual display
[AD-P004326] p 359 N85-17980

Baffled eye and confounded brain or using visual illusions to train blind pilots
[AD-P004332] p 359 N85-17986

On-board Computer Image Generator (CIG) applications
[AD-P004335] p 376 N85-17989

CIG (Computer Image Generator) goes to war: The tactical illusion
[AD-P004336] p 376 N85-17990

Military applications of the Singer Link-Miles IMAGE visual system
[AD-P004337] p 359 N85-17991

**IMBEDDINGS (MATHEMATICS)**

A 3-D chimera grid embedding technique
[AIAA PAPER 85-1523] p 802 A85-40955

**IMPACT**

Evaluation of the birdstrike threat to the F-15 present fleet, rapid deployment force, and dual role fighter transparencies
[AD-A148954] p 334 N85-18966

**IMPACT DAMAGE**

Assessment of damage tolerance in composites p 688 A85-39306

Impact bending of a rotating, rigid-plastic fan blade p 836 A85-45860

Birds and aviation
[AD-P004177] p 402 N85-19939

Avoiding serious bird strike incidents
[AD-P004178] p 402 N85-19940

Accidents and serious incidents to civil aircraft due to birdstrikes
[AD-P004180] p 402 N85-19942

Worldwide birdstrike statistics of Lufthansa German Airlines
[AD-P004183] p 403 N85-19945

Birds and aircraft engine strike rates
[AD-P004184] p 403 N85-19946

**IMPACT LOADS**

Three dimensional nonlinear dynamic finite element analysis for the response of a thick laminated shell to impact loads
[AIAA PAPER 85-0713] p 491 A85-30361

Alternative shock characterizations for consistent shock test specifications p 372 N85-18396

General Aviation Crashworthiness Project. Phase 2: Impact severity and potential injury prevention in general aviation accidents
[PB85-917002] p 747 N85-29938

Analysis of rotorcraft crash dynamics for development of improved crashworthiness design criteria
[FAA-CT-85-11] p 747 N85-31031

**IMPACT RESISTANCE**

Crash-survivable flight data recorder
[AIAA PAPER 84-2705] p 166 A85-17878

Impact of MIL-STD-1290 crashworthiness requirements on design of helicopter composite structures
[SAWE PAPER 1567] p 160 A85-18819

**IMPACT STRENGTH**

Proceedings of the International Conference and Exposition on Structural Impact and Crashworthiness
[AD-A147845] p 242 N85-15703

**IMPACT TESTS**

Impact fracture of thermally tempered glass helicopter windshields
[ACS PAPER 41-G-83F] p 363 A85-25084

Crashworthiness of light aircraft fuselage structures: A numerical and experimental investigation p 20 N85-10399

Analysis of a transport fuselage section drop test p 21 N85-10400

Full-scale crash-test evaluation of two load-limiting subfloors for general aviation airframes
[NASA-TP-2380] p 129 N85-13267

Impact tests of automatic lap belt configurations
[AD-A148034] p 243 N85-16844

Development of a high temperature single impact rain erosion test capability
[AD-P004371] p 431 N85-21465

Impact studies of a 1/3-scale model of an air cushion vehicle
[NASA-TM-86360] p 501 N85-23757

Flight test experience and controlled impact of a large, four-engine, remotely piloted airplane
[NASA-TM-86738] p 847 N85-33123

Design and testing of an energy-absorbing crewseat for the F/FB-111 aircraft. Volume 2: Data from seat testing
[NASA-CR-3917] p 886 N85-35184

**IMPACT TOLERANCES**

Assessment of damage tolerance in composites p 688 A85-39598

Design and testing of an energy-absorbing crewseat for the F/FB-111 aircraft. Volume 2: Data from seat testing
[NASA-CR-3917] p 886 N85-35184

**IMPEDANCE MEASUREMENT**

Surface characterization of anodic oxides on aluminum alloys by means of surface potential difference, surface impedance and surface morphology p 442 A85-27908

**IMPELLERS**

An analysis of unsteady torque on quasi-three-dimensional centrifugal impeller p 185 A85-18

Calculation and analysis of the three-dimensional in centrifugal compressor impellers p 228 A85-20

Experimental investigation of backswept centrifu compressor impeller. I p 264 A85-20

Finite element analysis for 3-D compressible poten flow in turbomachinery p 728 A85-41

The effect of boundary layer control on the performa of radial fan impellers p 728 A85-41

A consideration concerning stall and surge limitati within centrifugal compressors. II p 793 A85-41

Slip Factor dependence on flow coefficient in centrifu compressors p 793 A85-41

Development of high specific speed centrifu compressors for turbochargers p 793 A85-41

Blade vibration on radial impellers excited by rotat stall-cells and during surge p 771 A85-41

Lateral fluid forces acting on a whirling centrifu impeller in vaneless and vaned diffuser p 187 N85-141

Hydraulic forces on a centrifugal impeller undergo synchronous whirl p 187 N85-141

Hydrodynamic impeller stiffness, damping, and ine in the rotordynamics of centrifugal flow pumps p 187 N85-141

Investigation of gas-turbine engine blower impe vibrations with change in engine intake conditions p 530 N85-241

**IMPINGEMENT**

Experimental and numerical investigation of a sho wave impingement on a cylinder p 545 A85-351

Impingement cooling of gas turbine components p 767 A85-417

Impingement cooling of turbine airfoils by multip two-dimensional jets p 768 A85-417

Computation of three-dimensional shock wave a boundary-layer interactions
[NASA-TM-86780] p 911 N85-353

**IMPULSE GENERATORS**

Fast response impulse generator
[AD-D011283] p 178 N85-148

**IMPURITIES**

The determination of biological impurities in fuels p 179 A85-169

Milling of Si3N4 with Si3N4 hardware
[NASA-TM-86864] p 43 N85-101

**IN-FLIGHT MONITORING**

Electronic control and monitoring of aircraft secondar flying controls p 156 A85-173

Flight study of induced turbofan inlet acoustic radiatio with theoretical comparisons p 197 A85-1851

In-flight simulation in flight mechanics p 159 A85-1871

The lightning threat to aerospace vehicles
[AIAA PAPER 85-0094] p 240 A85-1951

Measurement of ice accretion using ultrasoni pulse-echo techniques
[AIAA PAPER 85-0471] p 286 A85-1976

The unambiguous in-flight determination of propelle rotational noise in aircraft with four-cycle combustio engines p 304 A85-2065

Maintenance computer for Tornado p 348 A85-2585

Living with EICAS - Operational experience to date or the 757 and 767 — Engine Indication and Crew Alertin System
[SAE PAPER 841506] p 352 A85-2598

The enigma of false bias detection in a strapdown system during transfer alignment p 406 A85-2642

Flight line EW system testing - The key to operational readiness p 381 A85-2680

In-flight flow visualization - A fluid approach p 414 A85-2864

Takeoff performance data using onboard instrumentation p 418 A85-2865

PADDS - A Portable Airborne Digital Data System p 418 A85-28652

767/757 instrumentation system p 418 A85-28653

Flight-test evaluation of engine power effects on lift and drag p 497 A85-32588

Measurement of ice accretion using ultrasonic pulse-echo techniques p 600 A85-35589

'The test stand flies with the aircraft' - Engine condition monitoring in the case of the Airbus A 310 of the Lufthansa
[DGLR PAPER 84-114] p 764 A85-40330

MU-300 flight test data system p 762 A85-40977

Stress measuring equipments for aircraft p 762 A85-40978

Application of aircraft integrated data system on jet engine module performance monitoring and turbine blade life accounting p 770 A85-41840

Using aviation oils on the basis of their actual condition p 852 A85-44200
Combining quantitative and qualitative reasoning in aircraft failure diagnosis [AIAA PAPER 85-1905] p 811 A85-45917
Identification of pilot dynamics from in-flight tracking data [AIAA PAPER 85-1945] p 845 A85-45935
The Collins AFDS Maintenance System for the Boeing 757/767 — Autopilot Flight Director System [AIAA PAPER 85-1911] p 849 A85-45971
E and H fields measurements on the Transall C160 aircraft during lightning flashes [ONERA, TP NO. 1985-48] p 876 A85-47259
Laboratory studies related to in-flight acoustic emission monitoring p 905 A85-47428
Acoustic intensity techniques for airplane cabin applications p 919 A85-49137
Wind shear measuring on board an airliner [NASA-TM-77463] p 131 N85-12521
Tornado: Structural Usage Monitoring System (SUMS) p 292 N85-15680
Flight parameters recording for structure fatigue life monitoring p 292 N85-15682
USAF approach to airborne structural data recording: Airborne Data Acquisition Multifunction System (ADAMS) p 292 N85-15683

**INCIDENCE**
The effect of changes in the angle of incidence in the event of a ricochet at a float step [RAE-TRANS-2120] p 255 N85-15712

**INCOMPRESSIBLE BOUNDARY LAYER**
Boundary layers and separation on a spheroid at incidence p 145 A85-18683
More detailed measurements behind turbulence manipulators including tandem devices using servo-controlled balances [AIAA PAPER 85-0521] p 320 A85-25927
The high Reynolds number finite flat-plate cascade p 474 A85-32616
A method of determining the suction velocity for laminar flow control of two-dimensional airfoil in incompressible flow [NAL-TR-845] p 637 N85-28925

**INCOMPRESSIBLE FLOW**
Design method for highly-loaded blades with blockage in cascade p 5 A85-11644
Theoretical study of two dimensional stall in an incompressible flow [ONERA, TP NO. 1984-63] p 7 A85-12612
Role of constraints in inverse design for transonic airfoils p 80 A85-15337
Quasistatic analysis of composite lifting surfaces in incompressible gas flow p 142 A85-17061
The aerodynamic behavior of infinite swept wings - Another point of view p 144 A85-18517
An incremental block-line-Gauss-Seidel method for the Navier-Stokes equations [AIAA PAPER 85-0033] p 207 A85-19470
Computational study of circulation control with suction [AIAA PAPER 85-0042] p 208 A85-19477
Accelerated convergence for incompressible flow calculations [AIAA PAPER 85-0058] p 209 A85-19489
A Fourier Transform method for calculating velocity profiles on airfoils [AIAA PAPER 85-0208] p 215 A85-19592
Survey on jet instability theory p 227 A85-20074
Drag prediction for projectiles and finned bodies in incompressible flow [AIAA PAPER 85-0104] p 230 A85-20854
An experimental investigation of the mixing of co-annular swirling flows [AIAA PAPER 85-0186] p 230 A85-20862
Optimal control of flow of a viscous incompressible fluid p 290 A85-22105
Calculation of three-dimensional unsteady incompressible flows by a vortex method p 291 A85-22240
Some analytical solutions applicable to verify 3-D numerical methods in turbomachines p 318 A85-25216
Numerical calculation of rotor performances in real flight configurations [ONERA, TP NO. 1985-13] p 368 A85-27892
Incompressible flow round an airfoil in a straight-line cascade and between parallel walls, with some phenomena in the boundary layer taken into consideration p 388 A85-28373
Vortex induced lift on a flat plate with a curved forward-facing flap p 394 A85-30175
Lifting surface approach of oscillating wings in weak shear flow p 394 A85-30201
Exact solution for wind tunnel interference using the panel method p 591 A85-34734
A method for the estimation of jet interferences p 549 A85-35751
A numerical study of the separation flow by Navier-Stokes equation past a circular cylinder and sphere p 551 A85-35782
Characteristics of the oscillations of a tail unit in a flow of an incompressible gas p 649 A85-39125
The interaction of a diffusing line vortex and an aligned shear flow p 788 A85-40254
Lift due to thickness for low aspect ratio wings in incompressible flow [AIAA PAPER 85-1588] p 712 A85-40705
Computation of internal incompressible seperated flows using a space-marching technique [AIAA PAPER 85-1624] p 790 A85-40730
On the accuracy of the pseudocompressibility method in solving the incompressible Navier-Stokes equations [AIAA PAPER 85-1689] p 717 A85-40772
Numerical analysis of aerodynamic characteristics of an aeroplane wing in compressible flow p 728 A85-41606
A discussion on lift and moment characteristics of aerofoils in incompressible potential flows p 730 A85-42441
Aero/hydrodynamic stability of elastically supported plates in narrow channels with upstream barriers preventing flow redistribution p 794 A85-42584
A numerical method for second order thin airfoil theory p 815 A85-44626
Computation of inviscid incompressible flow with rotation p 871 A85-49356
Classical free-streamline flow over a polygonal obstacle [NASA-CR-172448] p 53 N85-10301
Incompressible lifting-surface aerodynamics for a rotor-stator combination [NASA-TM-83767] p 86 N85-12039
Calculation of the velocity field generated by a helicopter main and tail rotors in hover [AD-A147731] p 239 N85-16833
Analysis of sudden expansion flow in a two-dimensional duct with and without side-wall injection using the k-epsilon turbulence model p 371 N85-18282
Experimental investigation of a breakdown criterion for a vortex in an incompressible flow — delta wing [ONERA-RT-27/1147-AY] p 395 N85-19935
A method of determining the suction velocity for laminar flow control of two-dimensional airfoil in incompressible flow [NAL-TR-845] p 637 N85-28925
A computational method for wings of arbitrary planform [AD-A153788] p 638 N85-28929
A method for computing the core flow in three-dimensional leading-edge vortices [NASA-TM-87489] p 741 N85-29932
SANDRAG: A computer code for predicting drag of bodies of revolution at zero angle of attack in incompressible flow [DE85-011170] p 804 N85-30684
Generation by conformal mappings of aerofoil sections and of certain other simple shapes suitable for both aerodynamic and stress-concentration problems [AD-A154901] p 819 N85-33112
Modelling of unsteady, incompressible separation on an aerofoil using an inviscid flow algorithm [GU-AERO-8412] p 874 N85-34122

**INCOMPRESSIBLE FLUIDS**
An analysis of the resistance of two disks in turbulent flow of an incompressible fluid p 390 A85-28466
The theory of oscillating thick wings in subsonic flow Lifting line theory p 393 A85-29992

**INCONEL (TRADEMARK)**
Statistical fatigue crack propagation of IN100 at elevated temperatures p 41 A85-11614
Hot forming of mechanically alloyed gas turbine components p 787 A85-43157
Benchmark notch test for life prediction p 28 N85-10953
Experiences with the material bevaviour and high temperature low cycle fatigue life prediction of the IN 738 blading alloy p 292 N85-15746
Hold-time effects in elevated temperature fatigue crack propagation [AD-A154146] p 797 N85-30376
Finite element analysis of notch behavior using a state variable constitutive equation p 799 N85-31548

**INDEPENDENT VARIABLES**
A preliminary study of using a strain-gauged balance and parameter estimation techniques for the determination of aerodynamic forces on a model in a very short duration wind tunnel [AD-A146473] p 190 N85-15145
Optimum performance parameters for ski-jump operations of USAF fighter aircraft [AD-A148532] p 258 N85-16867
The effects of parameter variation on helicopter performance [AD-A156027] p 887 N85-35189

**INDEXES (DOCUMENTATION)**
A research program to reduce the interior noise in general aviation aircraft, index and summary [NASA-CR-176178] p 919 N85-35695

**INDEXES (RATIOS)**
The application of a technology index to aircraft turbine engine cost estimating relationships [AD-A147701] p 268 N85-16874

**INDICATING INSTRUMENTS**
Advanced Aircrew Display Symposium, 6th, Patuxent River, MD, May 15, 16, 1984, Proceedings p 655 A85-38951
An argument for standardization in modern aircraft crew stations p 657 A85-38961

**INDUCTION MOTORS**
Solar powered actuator with continuously variable auxiliary power control [NASA-CASE-MFS-25637-1] p 454 N85-21769

**INDUSTRIAL MANAGEMENT**
DOD Value Engineering Conference report. Value Engineering (VE): A tool that benefits line management held at Leesburg, Virginia on 1-2 November 1984. Part 2. Plenary session [AD-A156068] p 919 N85-35811

**INDUSTRIAL PLANTS**
The battle against noise in industry p 705 A85-39349
Aviation repair plant directors on quality control measures p 384 N85-21106
West Europe report: Science and technology [JPRS-WST-84-012] p 601 N85-25552
MBB uses new CFC form tool for titanium alloy air intake p 601 N85-25553
West Europe report: Science and technology [JPRS-WST-85-020] p 797 N85-31333

**INDUSTRIAL SAFETY**
Portable automatic eye-safe laser and FLIR test set p 440 A85-26810

**INDUSTRIES**
Airport ground equipment under development at Riga p 360 N85-18038

**INELASTIC STRESS**
The 3-D inelastic analysis methods for hot section components: Brief description p 31 N85-10972

**INERTIA**
Measurement of the inertial constants of a rigid or flexible structure of arbitrary share through a vibration test [NASA-TM-77557] p 55 N85-11381
Hydrodynamic impeller stiffness, damping, and inertia in the rotordynamics of centrifugal flow pumps p 187 N85-14125

**INERTIAL NAVIGATION**
Artificial intelligence applied to the inertial navigation system performance and maintenance improvement p 94 A85-14830
Integrated flight control/navigation sensors [AIAA PAPER 84-2623] p 171 A85-17820
Modeling of certain strapdown heading-sensitive errors in INS error models p 153 A85-18345
The avionics flight test system p 154 A85-18718
The enigma of false bias detection in a strapdown system during transfer alignment p 406 A85-26428
Structural and algorithmic aspects of the design of a mathematical-modeling system for problems of ballistics, control, and navigation p 432 A85-28391
Fighter aircraft dynamic performance p 414 A85-28647
Takeoff performance data using onboard instrumentation p 416 A85-28651
Autocalibration of a laser gyro strapdown inertial reference/navigation system p 642 A85-37808
Integrated Inertial Sensor Assembly program status p 642 A85-37810
Institute of Navigation, National Technical Meeting, San Diego, CA, January 17-19, 1984, Proceedings p 643 A85-38526
Spectral analysis of optimal and suboptimal gyro monitoring filters p 696 A85-39459
Status and development trends of navigation systems for general aviation p 748 A85-40292
Sfena backs laser gyros p 853 A85-44749
Gravity effects on high accuracy inertial navigation p 822 A85-45019
Kalman filter implementation in the Litton LR-80 AHRS p 823 A85-45032
Interfacing Kalman filters with the standard INS p 823 A85-45033
Potential impact of Navstar GPS on NATO tactical operations p 459 N85-20763
Avionics Flight Evaluation System (AFES) p 505 N85-22357
Flight simulation for inertial navigation system p 490 N85-24081

Combinational performance/cost analysis of an autonomous navigation system for aircraft
p 568 N85-26640
Navigation: Accounting for copy p 568 N85-26641
Low cost two gimbal inertial platform and its system integration p 569 N85-26661
A system for take-off and landing measurements (STALINS)
[B8580072] p 645 N85-27849
The AFTI/F16 terrain-aided navigation system
[DE85-008411] p 645 N85-28935
Simulations of strapdown-system errors and error compensation methods — transport aircraft navigation
[DFVLR-MITT-84-22] p 751 N85-31040
Using regression analysis for determining air data sensor errors by means of an inertial navigation system
[ESA-TT-886] p 751 N85-31041

**INERTIAL PLATFORMS**
Flight test configuration for verifying inertial sensor redundancy management techniques
[AIAA PAPER 84-2496] p 92 A85-13568
Low cost two gimbal inertial platform and its system integration p 569 N85-26661

**INERTIAL REFERENCE SYSTEMS**
Flight trial results of a hybrid strapdown attitude and heading reference system p 91 A85-13446
Marriage of inertial-reference and air-data systems now assured p 488 A85-32486
Autocalibration of a laser gyro strapdown inertial reference/navigation system p 642 A85-37808
The ARINC 704 ring laser gyro Inertial Reference System p 643 A85-38528
Helicopter flight test of a ring laser gyro Attitude and Heading Reference System p 643 A85-38529

**INERTIAL UPPER STAGE**
IUS-1 - Redundant inertial measurement unit test plan and results p 899 A85-47057

**INFINITE SPAN WINGS**
Free perturbations of a laminar hypersonic flow behind an airfoil p 141 A85-16218
Hypersonic chemically nonequilibrium viscous shock layer on wings with a catalytic surface
p 229 A85-20561

**INFLATABLE STRUCTURES**
A brief review of the performance of the Canadian aircrew life preservers over the last twenty years
p 330 A85-22760
'Phoenix' - A polyester-film inflatable man-powered aircraft
[SAE PAPER 840028] p 342 A85-26312
Air bag restraint system
[AD-D011671] p 747 N85-29836

**INFLATING**
A theoretical view on the stress analysis of fully inflated parachute canopies
[AD-A148387] p 239 N85-16835

**INFLUENCE COEFFICIENT**
Economical influence function calibrations using the distributed loads code — for prediction of store loads in aircraft interference flowfield
[AD-A158490] p 158 A85-18518
Inexpensive calibrations for the influence function method using the interference distributed loads code — for prediction of store loads in aircraft flow fields
[AIAA PAPER 85-0270] p 247 A85-19623

**INFORMATION DISSEMINATION**
Operational benefits and design approaches for combining JTIDS and GPS navigation
p 336 A85-25195
AGARD Highlights
[AGARD-HIGHLIGHTS-84/2] p 67 N85-11972
Safety awareness, pilot education, and incident reporting programs p 332 N85-18020
The aviation safety reporting system
p 332 N85-18021

**INFORMATION MANAGEMENT**
Army aviation maintenance data and supportability interface p 465 A85-31980

**INFORMATION RETRIEVAL**
Analytical modeling of a polling protocol — airline information network
[ENST-84H001] p 333 N85-18029
Avionics Data Base users manual
[AD-A153810] p 657 N85-28942

**INFORMATION SYSTEMS**
Implications of Joint Tactical Information Distribution System/Tactical Digital Information Link J on Navy aircraft weapons systems
[AIAA PAPER 84-2719] p 152 A85-17883
'Fancy radio' develops split personality
p 749 A85-41057
Pilots wary of tactical information systems
p 763 A85-41058
Integrating aeronautical information for flight operations p 745 A85-41727
Auditory information systems in military aircraft: Current configurations versus the state of the art
[AD-A145469] p 65 N85-11794
Analytical modeling of a polling protocol — airline information network
[ENST-84H001] p 333 N85-18029
The interactive generation of specifications for an onboard software series (GISELE) p 679 N85-27906
Avionics Data Base users manual
[AD-A153810] p 657 N85-28942

**INFORMATION THEORY**
Optimal control synthesis for stochastic systems with allowance for a delay in the control circuit in the case of incomplete and inaccurate information on the system state p 535 A85-31475

**INFORMATION TRANSFER**
CAD systems for knowledge transfer
p 375 A85-24509
The switched network approach to high speed communications p 822 A85-44994

**INFRARED DETECTORS**
A LANTIRN for seeing in the dark
p 763 A85-41051
Moving object detection system using infrared scanning
[AD-D011222] p 64 N85-10822
Aerostructure nondestructive evaluation by thermal field detection. Phase 2: Technique refinement and quantitative determination of flaw detection capabilities
[AD-A149622] p 417 N85-21155
Low-resolution target classification from a staring infrared sensor
[AD-A151690] p 612 N85-26358

**INFRARED IMAGERY**
Laser Imaging Radar Sensor (LIRS)
p 334 A85-22649
The RS-700 series of infrared line scanners
p 347 A85-24254
Sirius - An advanced concept for photo-interpretation
p 387 A85-24259
Detection of moving vehicles in thermal imagery obtained from a moving platform p 387 A85-24284
A simulated infrared model board
[AIAA PAPER 85-1748] p 789 A85-40560

**INFRARED INSTRUMENTS**
Infrared Search and Track system development
[AIAA PAPER 84-2610] p 150 A85-17812
An airborne infrared thermal scanning system for easy use on Navy P-3 aircraft
[AD-A149690] p 461 N85-22143

**INFRARED RADAR**
Laser Imaging Radar Sensor (LIRS)
p 334 A85-22649
Field tests and signature analysis of an imaging CO2 laser radar — for cruise missile guidance and targeting sensor p 334 A85-22651
Field measurements with a coherent transversely excited atmospheric CO2 laser radar
p 357 A85-22652

**INFRARED RADIATION**
Long-duration flights using MIR (infrared balloon system) — for stratospheric study p 639 A85-38307
First results of a stratospheric experiment using a Montgolfiere Infra-Rouge (MIR) — balloon
p 639 A85-38308
The influence on IR emission of engine parameters for an afterburn case. A sensitivity study on NATO infrared air target model (NIRATAM) version: 0.0
[AD-B089311L] p 422 N85-21171
Low-resolution target classification from a staring infrared sensor
[AD-A151690] p 612 N85-26358

**INFRARED SCANNERS**
The RS-700 series of infrared line scanners
p 347 A85-24254
An airborne infrared thermal scanning system for easy use on Navy P-3 aircraft
[AD-A149690] p 461 N85-22143

**INFRARED SPECTROMETERS**
GC-FTIR (Fourier Transform Infrared Spectrometry) of jet fuels
[AD-A148272] p 285 N85-17155

**INFRARED SUPPRESSION**
Internal aerodynamics of infrared suppressors for helicopter engines p 507 A85-32012
Airworthiness and flight characteristics test of the RC-12D Guardrail V
[AD-A148046] p 258 N85-16864

**INFRARED TRACKING**
Infrared Search and Track system development
[AIAA PAPER 84-2610] p 150 A85-17812

**INGESTION (ENGINES)**
Techniques to reduce exhaust gas ingestion for vectored-thrust V/STOVL aircraft
[AIAA PAPER 84-2398] p 97 A85-13508
Evaluation and correction of the adverse effects of (i) inlet turbulence and (ii) rain ingestion on high bypass engines
[AIAA PAPER 84-2486] p 109 A85-13561
Hot gas ingestion and the speed needed to avoid ingestion for transport type STO/VL and STOL configurations
[AIAA PAPER 84-2530] p 101 A85-13589
Temperature distortion generator for turboshaft engine testing
[SAE PAPER 841541] p 659 A85-39065
Estimation of hot gas reingestion for a VTOL aircraft at the conceptual design stage
[SAE PAPER 841555] p 663 A85-39207
Temperature distortion generator for turboshaft engine testing
[NASA-TM-83748] p 200 N85-15658
Avoiding serious bird strike incidents
[AD-P004178] p 402 N85-19940
Accidents and serious incidents to civil aircraft due to birdstrikes
[AD-P004180] p 402 N85-19942
Birds and aircraft engine strike rates
[AD-P004184] p 403 N85-19946
Review of engine ingestions to wide body transport aircraft
[AD-P004185] p 403 N85-19947

**INGOTS**
Development of lithium-containing aluminum alloys for the ingot metallurgy production route
p 434 A85-27120
Engineering property comparisons of PM and IM aluminum alloy forgings
[AD-B088140L] p 298 N85-17398
Mechanisms of corrosion fatigue in high strength I/M (Ingot Metallurgy) and P/M (Powder Metallurgy) aluminum alloys
[AD-A151177] p 597 N85-25478

**INITIATORS (EXPLOSIVES)**
Fast response impulse generator
[AD-D011283] p 178 N85-14853

**INJECTION**
The effect of boundary layer control on the performance of radial fan impellers p 728 A85-41820
A new single filament smoke tube injection device
p 903 A85-47082
The effect of injection-stream turbulence on film cooling effectiveness and heat transfer coefficients
p 797 N85-31424

**INJECTORS**
Finlet injector
[AD-D011245] p 180 N85-14891
Segmented zoned fuel injection system for use with a combustor
[AD-D011640] p 670 N85-27865

**INJURIES**
The helicopter, instrument of choice for health evacuation
[SNIAS-851-220-101] p 761 N85-31051

**INLET AIRFRAME CONFIGURATIONS**
Grid generation for inlet configurations using conformal mapping p 474 A85-32633
Flight and wind-tunnel comparisons of the inlet-airframe interaction of the F-15 airplane
[NASA-TP-2374] p 105 N85-12884
Performance and surge limits of a TF30-P-3 turbofan engine/axisymmetric mixed-compression inlet propulsion system at Mach 2.5
[NASA-TP-2461] p 581 N85-25261

**INLET FLOW**
Analytical study of blowing boundary layer control for subsonic V/STOL inlets p 5 A85-11646
Forced oscillations of transonic channel and inlet flows with shock waves p 73 A85-12711
Flight study of induced turbofan inlet acoustic radiation with theoretical comparisons p 197 A85-18513
A comparison of different three-dimensional singularity methods for modelling internal flows
[ONERA, TP NO. 1984-150] p 205 A85-19264
Three dimensional aerodynamics of an annular cascade in a non-uniform inlet flow
[AIAA PAPER 85-0174] p 213 A85-19567
A universal turboshaft engine test cell - Design considerations and model test results
[AIAA PAPER 85-0382] p 275 A85-19711
Simulation of transonic three-dimensional nacelle/inlet flowfields using an Euler/Navier-Stokes algorithm
[AIAA PAPER 85-0084] p 226 A85-19798
Computation of transonic inlet flows — German thesis
p 227 A85-19844
Effect of inlet and outlet flow conditions on the flow and performance of subsonic two-dimensional diffuser
p 228 A85-20241
Determination of surging line of two-spool axial flow compressor with cropped fan stages at low speed by use of parallel compressor theory p 264 A85-20242

Inlet flow distortions in centrifugal fans
[ASME PAPER 84-JPGC-GT-4] p 314 A85-23193
Approximate factorization algorithm for three-dimensional transonic nacelle/inlet flowfield computations p 314 A85-23392
An improved model of shock waves in front of two-dimensional cascades p 318 A85-25213
Two-dimensional viscous simulation of inlet/diffuser flows with terminal shocks p 386 A85-27091
Experimental study of flows in a two-dimensional inlet model p 386 A85-27092
Response of a supersonic inlet to downstream perturbations p 386 A85-27093
Effects of an S-inlet on the flow in a dump combustor p 392 A85-29323
Contributions to the finite element solution of the fan noise radiation problem
[ASME PAPER 84-WA/NCA-1] p 537 A85-32954
A mixed finite difference analysis of the internal and external transonic flow fields of inlets with centerbody p 548 A85-35743
Investigation of transonic inlet drag characteristics
[SAE PAPER 841539] p 627 A85-39063
Effects of inlet pressure fluctuations on axial flow compressors - Some experimental and theoretical results
[AIAA PAPER 85-1135] p 696 A85-39619
Numerical simulation of a supercritical inlet flow
[AIAA PAPER 85-1214] p 630 A85-39658
Loss in turbofan thrust caused by boundary layer growth in a nacelle's inlet and exhaust ducts
[AIAA PAPER 85-1281] p 631 A85-39697
The investigation of inlet/nozzle flowfield coupling using compact propulsion simulators
[AIAA PAPER 85-1284] p 651 A85-39698
Stall transients of axial compression systems with inlet distortion
[AIAA PAPER 85-1348] p 632 A85-39740
Transonic flow calculations around isolated inlet configurations
[AIAA PAPER 85-1596] p 713 A85-40712
Adaptive mesh solution for supersonic conical flow in a rectilinear inlet
[AIAA PAPER 85-1626] p 714 A85-40732
Calculation of compressible flow about three-dimensional inlets with auxiliary inlets, slats and vanes by means of a panel method
[AIAA PAPER 85-1196] p 719 A85-40817
A Mach 2.0 plus supersonic inlet study using the Navier-Stokes equations
[AIAA PAPER 85-1211] p 720 A85-40820
The Dynamic Data Analyzer (DDA), an aircraft aero-propulsion digital analysis tool
[AIAA PAPER 85-1212] p 779 A85-40821
Extension of CFD technology used to design the JVX inlet
[AIAA PAPER 85-1215] p 720 A85-40822
External compression inlet predictions using an implicit, upwind, multiple zone approach
[AIAA PAPER 85-1521] p 722 A85-40966
A comparison between implicit and hybrid methods for the calculation of steady and unsteady inlet flows
[AIAA PAPER 85-1125] p 725 A85-41417
An analytical investigation of the ground and ambient head flow influence on the free inlet flow into a turbojet engine p 726 A85-41606
Some applications of actuator and semi-actuator disk theory to the problem of intake/engine compatibility p 727 A85-41810
Research on supersonic diffusers of centrifugal compressor by means of swirl flow. I - Flow in a diffuser at various Mach numbers p 728 A85-41824
The three-dimensional compressible flow in a radial inflow turbine scroll p 729 A85-41826
Development of a high specific speed radial-inflow turbine for turbochargers p 79[illegible] A85-41832
Numerical calculation of flow field in afterburner diffuser of turbofan engine p 772 A85-43244
The unsteady properties of a flow within a schematic air intake
[AAAF PAPER NT 84-09] p 870 A85-48989
Turbulence in air inlets
[AAAF PAPER NT 84-10] p 870 A85-48990
A wind tunnel inlet flow simulation p 871 A85-49141
Approximate calculation of flow field in an inlet with arbitrary cross sections and curved axis p 872 A85-49652
Effect of steady-state temperature distortion on inlet flow to a high-bypass-ration turbofan engine
[NASA-TM-86896] p 265 N85-15725
Current problems in turbomachinery fluid dynamics
[AD-A147127] p 294 N85-16074
Interest of internal bleed for a two-dimensional air intake operating in a wide Mach number range (1.8-3 plus) p 237 N85-16793
Research and development for semi-spherical inflow control device
[NAL-TR-833] p 353 N85-18056
A mixed finite difference analysis of the internal and external transonic flow fields of inlets with centerbody p 446 N85-20192
Effects of inlet distortion on a static pressure probe mounted on the engine hub in an F-15 airplane
[NASA-TP-2411] p 506 N85-22394
Aerodynamic detuning analysis of an unstalled supersonic turbofan cascade
[NASA-TM-87001] p 560 N85-26670

INLET NOZZLES
Performance characteristics of rectangular and circular thrust augmenting ejectors
[AIAA PAPER 85-1344] p 631 A85-39736
Interest of internal bleed for a two-dimensional air intake operating in a wide Mach number range (1.8-3 plus) p 237 N85-16793
Investigation of heat transfer to a turbine blade cascade using a shock tube
[AD-A153090] p 671 N85-27871

INLET PRESSURE
An experimental investigation on response of turbojet engine to the turbulence-type of dynamic inlet distortion p 27 A85-12365
Data acquisition and processing for steady-state inlet pressure distortion at a turbojet engine face p 143 A85-18286
Design and experimental evaluation of propfan inlets
[SAE PAPER 841477] p 352 A85-25976
Inlet and airframe compatibility for a V/STOL fighter/attack aircraft with top-mounted inlets
[NASA-TM-84252] p 10 N85-10015
Investigation of heat transfer to a turbine blade cascade using a shock tube
[AD-A153090] p 671 N85-27871

INLET TEMPERATURE
Instrumentation for gas turbine research in short-duration facilities
[SAE PAPER 841504] p 695 A85-39062
Estimation of hot gas reingestion for a VTOL aircraft at the conceptual design stage
[SAE PAPER 841555] p 663 A85-39207
Technology for the design of high temperature rise combustors
[AIAA PAPER 85-1292] p 668 A85-39705
An experimental investigation of pressure losses in cooling air supply system for gas turbine rotor p 769 A85-41808

INPUT/OUTPUT ROUTINES
Flight control system for a computer controlled aircraft with limited sensors
[AD-A155107] p 830 N85-32115

INSECTS
Flight evaluation of an insect contamination protection system for laminar flow wings
[SAE PAPER 850860] p 884 A85-50102
Unsteady separated flows: Generation and use by insects
[AD-P004168] p 324 N85-17953

INSERTION LOSS
Laboratory tests on an aircraft fuselage to determine the insertion loss of various acoustic add-on treatments
[AIAA PAPER 84-2330] p 16 A85-10874

INSPECTION
Inspecting fastener holes electronically - The capacitance hole probe system p 52 A85-12592
Inspection intervals for fail-safe structure p 124 A85-14899
A robotic quick disconnect wrist for aircraft bulkhead inspection
[AIAA PAPER 85-0700] p 534 A85-30267
Automatic inspection and precision grinding of spiral bevel gears p 525 A85-31978
Reliability assessment from small sample inspection data for gas turbine engine components
[SAE PAPER 841599] p 659 A85-39069
Innovative eddy current probe coupling method p 906 A85-47472
Nondestructive inspection: Improved capabilities of technicians
[AD-A147388] p 295 N85-16196
Mobile accelerator neutron radiography system
[AD-A148808] p 372 N85-18311
Aerostructure nondestructive evaluation by thermal field detection. Phase 2: Technique refinement and quantitative determination of flaw detection capabilities
[AD-A149622] p 417 N85-21155
Towards the year 2000: Developments in inspection and product assurance to be anticipated during the next 15 years — aircraft engines
[PNR-90258] p 911 N85-34421

INSTITUTIONS
Model research: The National Advisory Committee for Aeronautics, 1915-1958, volume 1
[NASA-SP-4103-VOL-1] p 467 N85-23683
Model research, the National Advisory Committee for Aeronautics, 1915-1958, volume 2
[NASA-SP-4103-VOL-2] p 467 N85-23684

INSTRUCTION SETS (COMPUTERS)
Digital signal processing utilizing a generic instruction set p 854 A85-45006

INSTRUMENT APPROACH
Realistic localizer courses for aircraft instrument landing simulators
[NASA-CR-172333] p 105 N85-12885
Safety recommendation(s), A-84-123 and -124
[REPT-38948/93] p 563 N85-25222

INSTRUMENT COMPENSATION
Dynamic gas temperature measurement system p 694 A85-37706
The use of a self-compensated magnetometer in an economical navigation system for the helicopter p 568 N85-26650

INSTRUMENT ERRORS
GPS aided low cost strapdown INS for attitude determination p 92 A85-13684
Fundamentals of the general structural-physical theory of flight instruments — Russian book p 131 A85-13750
Doppler effect and its influence on low-altitude CW altimeters p 106 A85-13971
Suboptimal filtering for aided GPS navigation p 94 A85-14832
Clock coasting and altimeter error analysis for GPS p 94 A85-14834
C/A code receivers for precise positioning applications p 95 A85-14838
A robust and efficient technique for dealing with time-varying instrumental bias in linear filtering p 458 A85-29370
An aspect of the role of the clock in a GPS receiver p 485 A85-31745
Gravity effects on high accuracy inertial navigation p 822 A85-45019
Problem of reduction to ideal wind tunnel in experimental aerodynamics p 13 N85-11702
On the application of compatibility checking techniques to dynamic flight test data
[ARL/AERO-R-161] p 416 N85-21151

INSTRUMENT FLIGHT RULES
BK 117 for dual pilot IFR operation
[MBB-UD-422-84-OE] p 572 A85-35253
Radio navigation and landing devices for IFR navigation with helicopters p 748 A85-40243
New ICAO procedures on instrument departures and noise abatement p 746 A85-41733
National airspace review: Airport radar service area operational confirmation report
[DOT/FAA/AT-84/2] p 245 N85-15707
A guide to USAF helicopter instrument flight procedures
[AD-A156102] p 880 N85-35162

INSTRUMENT LANDING SYSTEMS
Status and development trends of navigation systems for general aviation p 748 A85-40292
Ames develops remote site landing aids p 748 A85-40918
Status and trends of microwave landing system p 749 A85-41010
Landing path requirements for instrumental air traffic at regional airports and landing strips p 780 A85-41331
Use of microprocessor techniques and new antenna systems to improve the navigation aids very high frequency omnidirectional radar (VOR), Doppler VOR and Instrument Landing System (ILS)
[BMFT-FB-W-84-026] p 18 N85-10930
Realistic localizer courses for aircraft instrument landing simulators
[NASA-CR-172333] p 105 N85-12885
Measurement of signal separation between radio service and air navigation service
[IRT-TB-B-40/82] p 248 N85-16860
A preliminary investigation of handling qualities requirements for helicopter instrument flight during decelerating approach maneuvers and overshoot
[AD-A154850] p 847 N85-32125

INSTRUMENT ORIENTATION
Navigation and sensor orientation systems in aerial photography p 586 A85-36284

INSTRUMENTS
HOST instrumentation R and D program overview p 29 N85-10957

INSULATION
Model tests of aircraft interior panel flammability p 852 A85-44125

Results of variable enthalpy tests of CPR-488 TIP panels in MSFC Hot Gas Facility
[NASA-CR-170889] p 902 N85-35237

**INTAKE SYSTEMS**

Inlet and airframe compatibility for a V/STOL fighter/attack aircraft with top-mounted inlets
[NASA-TM-84252] p 10 N85-10015

A study of bird ingestions into large high bypass ratio turbine aircraft engines
[DOE/FAA-CT-84/13] p 14 N85-10028

Applications of finite and wave envelope element approximations to acoustic radiation from turbofan engine inlets in flight p 197 N85-14664

The role of convective perturbations in supercritical inlet oscillations p 526 N85-22563

Performance and surge limits of a TF30-P-3 turbofan engine/axisymmetric mixed-compression inlet propulsion system at Mach 2.5
[NASA-TP-2481] p 581 N85-25261

Multi-ducted inlet combustor research and development
[AD-A153753] p 673 N85-28946

An experimental investigation of fuel regression rate control in solid fuel ramjets
[AD-A154251] p 782 N85-30006

Calculation of compressible flow about three-dimensional inlets with auxiliary inlets, slats and vanes by means of a panel method
[NASA-CR-174975] p 876 N85-35162

**INTEGRAL EQUATIONS**

Simplified transonic integral equations for lifting profiles and wings p 6 A85-12034

Compressible lifting surface theory for propeller performance calculation p 143 A85-18508

Computation of transonic vortex flows past delta wings integral equation approach
[AIAA PAPER 85-1582] p 725 A85-41415

Identification of integro-differential systems for application to unsteady aerodynamics and aeroelasticity
[AIAA PAPER 85-1763] p 858 A85-43828

Integral equation of lifting surfaces in Laplace domain and analytic continuation of its pressure kernel
[NAL-TR-795T] p 9 N85-10009

A theoretical design method for 3-dimensional transonic wings
[NAL-TR-830] p 161 N85-14834

Noise transmission loss of a rectangular plate in an infinite baffle
[NASA-TP-2398] p 461 N85-22109

**INTEGRATED CIRCUITS**

Packaging and interconnection for avionics p 290 A85-21480

Will advanced fighter avionics operate when needed? p 889 A85-49949

China report: Science and technology
[JPRS-CST-84-039] p 446 N85-20206

Design for tactical avionics maintainability, technical evaluation report
[AGARD-AR-204] p 505 N85-23798

The impact of VLSI on guidance and control system design p 595 N85-26854

**INTEGRATORS**

Accelerated convergence of Jameson's finite-volume Euler scheme using van der Houwen integrators p 610 A85-35175

Integrated control and display systems for helicopter battlefield mission management p 250 N85-16805

**INTEGRITY**

Avionics integrity program (Avip). Volume 4: Force management. Economic life considerations
[AD-A145592] p 24 N85-10941

**INTERACTIONAL AERODYNAMICS**

Propulsive efficiency of vibrating bodies in a subsonic gas flow p 2 A85-10111

Comparison of experimental and analytical predictions of rotor blade-vortex interactions using model scale acoustic data
[AIAA PAPER 84-2269] p 58 A85-10833

Aeroacoustic interaction of a distributed vortex with a lifting Joukowski airfoil
[AIAA PAPER 84-2287] p 59 A85-10843

Two dimensional blade-vortex interaction flow visualization study
[AIAA PAPER 84-2307] p 4 A85-10858

Flow field and acoustics of two-dimensional transonic blade-vortex interactions
[AIAA PAPER 84-2309] p 61 A85-10860

Jet and wing/flap interaction noise
[AIAA PAPER 84-2362] p 64 A85-10896

Evidence of large scale time dependent flow in the wing-wall interaction wake p 49 A85-11629

Calculation of unsteady transonic separated flows by viscous-inviscid interaction
[ONERA, TP NO. 1984-100] p 8 A85-12621

A characteristics approach to swept shock-wave/boundary-layer interactions p 73 A85-12717

Modular potential flow computation including fuselage and wing tip effects p 75 A85-13677

Investigation of the axial velocities induced along rotating blades by trailing helical vortices p 75 A85-13678

Further investigation of the coupled flapping and torsion dynamics of helicopter rotor blades p 102 A85-13680

Noise produced by the interaction of a rotor wake with a swept stator blade
[AIAA PAPER 84-2326] p 133 A85-12956

Turbulent boundary layer-wake interaction p 77 A85-14345

Application of the finite element technique to aerodynamic problems of aircraft p 104 A85-15882

Supersonic motion of bodies in a gas with shock waves p 140 A85-16183

Numerical analysis of heat transfer on the surface of a delta wing in hypersonic air flow at large angles of attack p 141 A85-16190

An engineering method for evaluating unsteady aerodynamic effects on cascade blades during flexural vibrations p 182 A85-16815

Effects of suction on shock/boundary-layer interaction and shock-induced separation p 143 A85-18510

Flow over double-delta wing and wing body at high alpha p 144 A85-18516

Roll up of strake leading/trailing-edge vortex sheets for double-delta wings p 144 A85-18519

Tests, in the transonic regime, of a model motorized by a blowing turbine 23 cm in diameter (9 inches) in the S1MA wind tunnel
[ONERA, TP NO. 1984-158] p 272 A85-19272

An experimental investigation of blade-vortex interaction at normal incidence
[AIAA PAPER 85-0003] p 206 A85-19451

An experimental investigation of stator/rotor interaction influence on multistage compressor rotor flow
[AIAA PAPER 85-0009] p 206 A85-19455

The interaction and merging of two turbulent line vortices
[AIAA PAPER 85-0046] p 208 A85-19480

A zonal computational approach to thrust augmentor optimization
[AIAA PAPER 85-0110] p 282 A85-19525

Surface pressure fluctuations in a three-dimensional shock wave/turbulent boundary layer interaction
[AIAA PAPER 85-0125] p 211 A85-19536

Three-dimensionality in unsteady flow about a wing
[AIAA PAPER 85-0132] p 212 A85-19543

A procedure for the calculation of supersonic flows with strong viscous-inviscid interaction
[AIAA PAPER 85-0166] p 213 A85-19562

Transient motion of hypersonic vehicles including time history effects
[AIAA PAPER 85-0201] p 288 A85-19565

Unsteady aerodynamics of an airfoil encountering a passing vortex
[AIAA PAPER 85-0203] p 214 A85-19567

A class of airfoils having finite trailing edge pressure gradients
[AIAA PAPER 85-0206] p 215 A85-19580

Viscous/inviscid interaction analysis of transonic shock induced separated flow including normal pressure gradients
[AIAA PAPER 85-0371] p 221 A85-19703

Experimental study of forward-located jet-interaction nozzles
[AIAA PAPER 85-0454] p 224 A85-19782

Disturbance-wave interactions in flows with crossflow
[AIAA PAPER 85-0494] p 226 A85-19788

A linearized unsteady aerodynamic analysis for transonic cascades p 229 A85-20744

Evaluation of a stalled airfoil analysis program p 231 A85-21848

Flowfield scaling in sharp fin-induced shock wave/turbulent boundary-layer interaction p 232 A85-21857

Parameters affecting helicopter interactional aerodynamics in ground effect p 314 A85-23147

Transonic shock wave - Boundary layer interaction at a convex wall p 317 A85-24800

Vorticity growth and decay in the jet in cross flow p 317 A85-25146

A lower bound for three-dimensional turbulent separation in supersonic flow p 318 A85-25149

Effect of a longitudinal vortex on a separated turbulent boundary layer
[AIAA PAPER 85-0530] p 321 A85-25830

The effects of gusts on the fluctuating airloads of airfoils in transonic flow p 385 A85-26762

Experimental study of flows in a two-dimensional inlet model p 386 A85-27082

An assessment of the effect of the use of conventional weapons on the operation of a jet engine p 383 A85-27720

Hybrid approach to steady transonic normal shock-compressible laminar boundary layer interactions over airfoils with suction
[AIAA PAPER 85-0522] p 386 A85-27876

Control plate for shock-boundary layer interaction
[AIAA PAPER 85-0523] p 387 A85-27877

Numerical calculation of rotor performances in real flight configurations
[ONERA, TP NO. 1985-13] p 388 A85-27882

An analysis of the resistance of two disks in turbulent flow of an incompressible fluid p 390 A85-28466

Viscid/inviscid interaction analysis of separated trailing-edge flows p 390 A85-29076

The effect of source location on the structural-acoustic interaction of an infinite elastic shell
[AIAA PAPER 85-0788] p 523 A85-30390

A note on tower wake/blade interaction noise of a wind turbine p 470 A85-30773

The interaction of a wake with a turbulent boundary layer p 471 A85-30867

Modeling of gas flows with shock waves — Russian book p 472 A85-31589

Analytic and experimental verification of the NOTAR circulation control tail boom p 495 A85-31990

A new look at sound generation by blade/vortex interaction
[ASME PAPER 84-WA/NCA-2] p 536 A85-32855

A note on blade wake interaction influence on compressor stator row aerodynamic performance p 475 A85-32965

Transonic shock interaction with a tangentially injected turbulent boundary layer p 548 A85-35584

Numerical analysis of a 3-D separated flow p 552 A85-35792

A method computing viscous/inviscid interaction with laminar separation p 552 A85-35795

Interaction of twin turbulent circular jet p 617 A85-37049

Wind tunnel investigation of the interaction of an airship configuration with lifting rotors
[AIAA PAPER 85-0875] p 625 A85-38790

Conical similarity of shock/boundary-layer interactions generated by swept and unswept fins p 626 A85-38984

Engine inlet interaction with a prop-fan propulsion system
[SAE PAPER 841478] p 627 A85-39058

Results of a wind tunnel/flight test program to compare afterbody/nozzle pressures on a 1/12 scale model and an F-15 aircraft
[SAE PAPER 841543] p 649 A85-39086

Unsteady blade row interactions in a multi-stage compressor
[AIAA PAPER 85-1134] p 630 A85-39618

The investigation of inlet/nozzle flowfield coupling using compact propulsion simulators
[AIAA PAPER 85-1284] p 651 A85-39698

Aerodynamics of two-dimensional blade-vortex interaction
[AIAA PAPER 85-1560] p 710 A85-40685

A holographic interferometric study of an axisymmetric shock-wave/boundary-layer strong interaction flow
[AIAA PAPER 85-1564] p 711 A85-40689

Computation of a three dimensional skewed shock wave laminar boundary layer interaction
[AIAA PAPER 85-1565] p 711 A85-40690

Boundary layer effects on the flowfield about flow-through nacelles
[AIAA PAPER 85-1623] p 714 A85-40729

Overlaid approach for base flow analyses at supersonic velocities. I - Basic model description. II - Applications including base combustion and multi-phase exhaust effects
[AIAA PAPER 85-1673] p 716 A85-40762

Effects of non-uniform velocity profiles on dual jets in a crossflow
[AIAA PAPER 85-1674] p 716 A85-40763

Predictions of transonic separated flow with an eddy-viscosity/Reynolds-shear-stress closure model
[AIAA PAPER 85-1683] p 717 A85-40768

Analysis of transitional separation bubbles on infinite swept wings
[AIAA PAPER 85-1685] p 717 A85-40770

Unsteady characteristics of an airfoil interacting with a vortical wake
[AIAA PAPER 85-1707] p 718 A85-40780

Implicit/explicit analysis of interactive phenomena in supersonic, chemically-reacting, mixing and boundary layer problems
[AIAA PAPER 85-1717] p 790 A85-40785

Inviscid modeling of turbomachinery wake transport
[AIAA PAPER 85-1132] p 719 A85-40812

Navier-Stokes simulations of rotor-stator interaction using patched and overlaid grids
[AIAA PAPER 85-1519] p 721 A85-40952

Newton solution of direct and inverse transonic Euler equations
[AIAA PAPER 85-1530] p 722 A85-40962

Interaction between shock waves and boundary layers induced by sharp fin p 723 A85-40999

Aerodynamic interactions between a rotor and airframe in forward flight
[AIAA PAPER 85-1606] p 724 A85-41403

Vortex trajectories and breakdown on wing-canard configurations p 731 A85-42926

Developments in the simulation of separated flows using finite difference methods p 732 A85-42953

The computation of viscid/inviscid interaction on airfoils with separated flow p 732 A85-42954

A quasi-simultaneous finite difference approach for strongly interacting flow p 732 A85-42956

Application of a viscous-inviscid interaction method to predict transonic separated flows p 732 A85-42957

Newton solution of coupled Euler and boundary layer equations p 733 A85-42958

Airfoils with separation and the resulting wakes p 733 A85-42959

Viscous-inviscid interaction computations using a pseudo Navier-Stokes approach p 733 A85-42964

Development of a Navier-Stokes analysis to investigate the mechanism of shock/wave boundary layer interactions p 734 A85-42966

Oscillating oblique shock interaction with a laminar boundary layer p 736 A85-42971

Computation of three-dimensional shock-wave/turbulent boundary-layer interaction flows p 736 A85-42980

Numerical simulation of shock/boundary-layer interaction using a finite-volume Runge-Kutta time-stepping scheme p 736 A85-42982

The effect of boattailing of a projectile in transonic flow
[AD-A157758] p 736 A85-42983

Computation of velocity and pressure variation across thick turbulent stern flows p 736 A85-42985

Prediction of dynamic separation characteristics using a time-stepping viscid/inviscid approach p 737 A85-42990

An interactive scheme for three-dimensional transonic flows p 737 A85-42992

Measurements of canard-induced roll oscillations
[AIAA PAPER 85-1830] p 838 A85-43871

Unsteady aerodynamic forces induced by aeroelastic vibrations of a turbojet engine in a nacelle
[ONERA, TP NO. 1985-58] p 880 A85-47302

A simple and effective difference scheme in aerodynamics p 872 A85-49702

Calculation of unsteady transonic separated flows by viscous-inviscid interaction p 554 N85-25178

An experimental and analytical study of the aerodynamic interference effects between two Sears-Haack bodies at Mach 2.7
[NASA-TM-85729] p 580 N85-26873

Flow around rotating and nonmoving circular cylinder near flat screen. Report 1: Aerodynamic forces in cylinder p 582 N85-27059

Study of stresses on surface of flat barrier immersed in under expanded jet of rarefied gas p 582 N85-27061

Propulsion efficiency of vibrating bodies in subsonic gas stream p 699 N85-28159

**INTERACTIVE CONTROL**

IDAS - An Interactive Design and Analysis System — for aircraft
[SAWE PAPER 1515] p 195 A85-18807

Interactive aircraft flight control and aeroelastic stabilization
[NASA-CR-176035] p 776 N85-31084

**INTERCEPTION**

Validation of zero-order feedback strategies for medium-range air-to-air interception in a horizontal plane p 70 A85-13702

Interception in three dimensions - An energy formulation p 158 A85-18329

Dual control guidance for simultaneous identification and interception
[AD-A154807] p 407 A85-27510

Energy management of three-dimensional minimum-time intercept — for aircraft flight optimization
[AIAA PAPER 85-1781] p 836 A85-43841

Aircraft intercept vectoring in a known wind field
[AIAA PAPER 85-1782] p 824 A85-43842

Improved feedback algorithms for optimal maneuvers in vertical plane
[AIAA PAPER 85-1976] p 846 A85-45956

LPI-radar for helicopter obstacle warning p 297 N85-16810

**INTERCEPTORS**

The interceptor radar evolves as a sensor p 409 A85-27847

**INTERFACES**

Data bus interface MIL-STD-1553B/ARINC 561 --- avionics for KC-135 tanker aircraft
[AIAA PAPER 84-2682] p 194 A85-17862

A digital interface for flight simulator cockpits
[AIAA PAPER 85-1755] p 780 A85-42667

Interface specifications for SCR (Software Cost Reduction) (A-7E) extended computer module, revised
[AD-A149948] p 459 N85-22024

**INTERFACIAL TENSION**

Investigation of surface tension phenomena using the KC-135 aircraft
[NASA-TM-82508] p 382 N85-18995

**INTERFERENCE**

Experiments suitable for wind tunnel wall interference assessment/correction p 83 N85-12021

Asymptotic methods for wind tunnel wall corrections at transonic speed p 84 N85-12022

Progress in wind tunnel wall interference assessment/correction procedures at the NAE p 84 N85-12025

The susceptibility of aeronautical navigational aids to interference from adjacent-band broadcast transmissions
[BBC-RD-1984/12] p 371 N85-18234

Pseudospectral calculations of two-dimensional transonic flow (Task 1). Numerical investigation of VTOL aerodynamics (Task 2)
[AD-A150123] p 399 N85-21126

**INTERFERENCE DRAG**

Installed nacelle drag-improvement tests of an M = 0.8 turboprop transport configuration
[NASA-TM-84302] p 255 N85-15716

**INTERFERENCE LIFT**

Wall lift interference corrections in ground effect testing p 592 A85-35781

Assessment of lift- and blockage-induced wall interference in a three-dimensional adaptive-wall tunnel p 83 N85-12016

Wind tunnel wall interference correction for aircraft models p 84 N85-12029

**INTERFEROMETERS**

Turbulence measurement interferometer apparatus
[AD-D011377] p 295 N85-16156

**INTERFEROMETRY**

The development and applications of GPS determined attitude p 488 A85-32198

Fuel droplet size measurements with a laser Doppler interferometer
[AIAA PAPER 85-1182] p 697 A85-39643

Comparison of a computed transonic flow and interferometric measurements around the leading edge of a two dimensional aerofoil asymmetrically mounted in a wind tunnel p 868 A85-47164

**INTERMETALLICS**

The B2 aluminides as alternative materials
[NASA-TM-86937] p 364 N85-19076

Oxidizing seal for a turbine tip gas path
[NASA-CASE-LEW-14053-1] p 911 N85-34402

**INTERMODULATION**

The susceptibility of aeronautical navigational aids to interference from adjacent-band broadcast transmissions
[BBC-RD-1984/12] p 371 N85-18234

**INTERNAL COMBUSTION ENGINES**

Internal combustion engine combustion chamber process studies at NASA Lewis Research Center p 855 A85-45856

Structural ceramics in transportation: Fuel implications and economic impacts
[DE85-003024] p 436 N85-20130

Stratified charge rotary aircraft engine technology enablement program
[NASA-CR-174812] p 422 N85-21163

**INTERNAL FRICTION**

Control of rotordynamic instability in a typical gas turbine's power system p 187 N85-14120

**INTERNAL PRESSURE**

A nonlinear analysis of infinitely long graphite-epoxy cylindrical panels loaded with internal pressure
[AIAA PAPER 85-0770] p 522 A85-30291

**INTERNATIONAL COOPERATION**

PAH-2 - The German/French connection p 104 A85-15593

EH-101 - Agusta and Westland join forces p 104 A85-15596

The European transonic wind-tunnel ETW - A cryogenic solution p 174 A85-17240

Registration and nationality of aircraft operated by international agencies in law and practice p 462 A85-27396

International air transport - Economic aspects — Russian book p 612 A85-35817

Wind tunnel project demonstrates difficulties of European cooperation p 592 A85-36419

Turboshaft truce in Europe p 658 A85-38436

Chinese design supersonic bomber, plan joint efforts to build momentum p 708 A85-40902

China considers joint development of transonic wind tunnel facility p 780 A85-42591

AGARD Highlights
[AGARD-HIGHLIGHTS-84/2] p 67 N85-11972

International projects, other work of Aeroproyekt Institute p 204 N85-16767

Window on science visit to the USA, 21 March - 22 April, 1984 — ramjets and solid propellant rocketry
[VTH-LR-426] p 432 N85-20011

FRG's DFVLR ready for participation in space station p 433 N85-20176

Construction 1976-1980: Design, manufacturing, calibration of the German-Dutch wind tunnel (DNW) p 683 N85-27913

Cost and schedule implications of multinational coproduction
[AD-A154358] p 807 N85-30969

Search and rescue services for international civil aviation p 807 N85-31090

**INTERNATIONAL LAW**

Destruction of Korean Air Lines Boeing 747 over Sea of Japan, 31 August 1983 p 66 A85-10049

US jurisdiction and bilateral air agreements p 66 A85-10050

A legal analysis of the shooting of Korean Airlines Flight 007 by the Soviet Union p 66 A85-11937

Annals of air and space law. Volume 8 p 378 A85-23799

Registration and nationality of aircraft operated by international agencies in law and practice p 462 A85-27396

Selected American decisions on the Warsaw Convention and related matters - February 1981 to June 1984. I p 462 A85-30167

Attempt to regulate restrictive commercial practices in the field of air transportation within a transnational antitrust legal and institutional framework p 539 A85-30999

Obtaining title and financing transport category aircraft National and international implications p 863 A85-44097

**INTERNATIONAL TRADE**

International airport study: How to improve the effect of airports on trade and on export-related industries
[PB85-124923] p 429 N85-19992

**INTERPOLATION**

Calculation of the probabilistic characteristics of nonlinear control systems using a trigonometric version of the factorial interpolation method p 192 A85-17065

Analytical construction of flight vehicle surfaces p 162 N85-14957

A study of aerodynamic control in stalled flight leading-edge vortex formation analysis
[AD-A153758] p 638 N85-28928

**INTERPROCESSOR COMMUNICATION**

Development of a generic architecture — in computers p 535 A85-31991

**INVENTORY MANAGEMENT**

Optimal maintenance center inventories for fault-tolerant repairable systems p 301 A85-21548

Ministry wants better commo facilities for agroaviation p 127 N85-12003

The Air Force stock fund and aircraft availability
[AD-A148653] p 203 N85-16761

**INVERTED CONVERTERS (DC TO AC)**

Experimental cascaded doubly fed variable speed constant frequency generator system p 854 A85-45038

**INVISCID FLOW**

A note on the instability of columnar vortices p 46 A85-10360

Progress toward the development of an aircraft icing analysis capability
[AIAA PAPER 84-0105] p 13 A85-10653

Analysis of the flow field in an engine inlet particle separator p 5 A85-11633

Design method for highly-loaded blades with blockage in cascade p 5 A85-11644

Theoretical study of two-dimensional and three-dimensional potential flows with rotational source terms - Application to turbomachines — French thesis p 50 A85-11729

Metric-discontinuous zonal grid calculations using the Osher scheme p 6 A85-12151

Theoretical study of the transonic flow past wedge profiles with detached shock waves p 74 A85-12870

High frequency properties in the unsteady linearised potential flow of a compressible fluid p 78 A85-14852

Inviscid steady flow past turbofan mixer nozzles p 168 A85-17041

Computation of flow around wings based on the Euler equations p 142 A85-18066

Viscous/inviscid analysis of curved sub- or supersonic wall jets p 145 A85-18677

Three-dimensional inviscid flow analysis of turbofan forced mixers
[AIAA PAPER 85-0086] p 210 A85-19510
A quasi-conservative lambda formulation — for inviscid transonic flow simulation
[AIAA PAPER 85-0088] p 210 A85-19511
Shock waves in transonic channel flows at moderate Reynolds number
[AIAA PAPER 85-0369] p 221 A85-19702
Viscous/inviscid interaction analysis of transonic shock induced separated flow including normal pressure gradients
[AIAA PAPER 85-0371] p 221 A85-19703
Finite volume solution of the two-dimensional Euler equations on a regular triangular mesh
[AIAA PAPER 85-0435] p 223 A85-19748
Evaluation of vortex wake predictions in the SWINT code
[AIAA PAPER 85-0450] p 224 A85-19759
Efficient self-consistent viscous-inviscid solutions for unsteady transonic flow
[AIAA PAPER 85-0482] p 225 A85-19779
A numerical study of three-dimensional radiation fields in problems of supersonic flow past segmental bodies
p 227 A85-20025
Survey on jet instability theory p 227 A85-20074
Computation of choked and supersonic turbomachinery flows by a modified potential method
p 232 A85-21859
Shock-free turbomachinery blade design
p 232 A85-21864
Calculation of three-dimensional unsteady incompressible flows by a vortex method
p 291 A85-22240
Entropy condition satisfying approximations for the full potential equation of transonic flow p 385 A85-26916
A viscous-inviscid interaction method for computing unsteady transonic separation
[ONERA, TP NO. 1985-5] p 387 A85-27885
Viscid/inviscid interaction analyses of separated trailing-edge flows p 390 A85-29076
Vortex induced lift on a flat plate with a curved forward-facing flap p 394 A85-30175
Lifting surface approach of oscillating wings in weak shear flow p 394 A85-30201
Assessment of three-dimensional inviscid codes and loss calculations for turbine aerodynamic computations
[ASME PAPER 84-GT-187] p 475 A85-32961
Analysis of unsteady inviscid diffuser flow with a shock wave p 580 A85-34010
Accelerated convergence of Jameson's finite-volume Euler scheme using van der Houwen integrators
p 610 A85-35175
The split-coefficient matrix method for supersonic three dimensional flow p 550 A85-35771
Finite element solution of non-viscous flows in cascades of blades p 552 A85-36335
Triangular finite element methods for the Euler equations p 601 A85-36414
The finite element formulation of airflow around a deformable wing by using the incremental finite element method p 621 A85-37879
Aerodynamic characteristics of the Weis-Fogh mechanism p 623 A85-38370
An investigation of lift augmentation of tandem cascades
[ASME PAPER 84-WA/FM-3] p 633 A85-39875
Lift due to thickness for low aspect ratio wings in incompressible flow
[AIAA PAPER 85-1586] p 712 A85-40705
Refined numerical solution of the transonic flow past a wedge
[AIAA PAPER 85-1593] p 713 A85-40709
Boundary layer effects on the flowfield about flow-through nacelles
[AIAA PAPER 85-1623] p 714 A85-40729
Inviscid flow field analysis of maneuvering hypersonic vehicles using the SCM formulation and parabolic grid generation — Split-Coefficient Matrix
[AIAA PAPER 85-1682] p 716 A85-40767
Predictions of transonic separated flow with an eddy-viscosity/Reynolds-shear-stress closure model
[AIAA PAPER 85-1683] p 717 A85-40768
Inviscid modeling of turbomachinery wake transport
[AIAA PAPER 85-1132] p 719 A85-40812
A new finite element approach for prediction of aerothermal loads - Progress in inviscid flow computations
[AIAA PAPER 85-1533] p 722 A85-40964
Inviscid hypersonic flow around a conical flat-top wing-body combination p 723 A85-41011
Development of computational flow analysis for blade rows p 727 A85-41813
Engineering flowfield method with angle-of-attack applications p 731 A85-42913
Application of a viscous-inviscid interaction method to predict transonic separated flows p 732 A85-42957
Newton solution of coupled Euler and boundary layer equations p 733 A85-42958
Airfoils with separation and the resulting wakes
p 733 A85-42959
Viscous-inviscid interaction computations using a pseudo Navier-Stokes approach p 733 A85-42964
Nonaxisymmetric, discontinuous body, second-order, linear, supersonic flow prediction
[AIAA PAPER 85-1810] p 813 A85-43858
Inviscid analysis of advanced turboprop propeller flow fields
[AIAA PAPER 85-1263] p 814 A85-43977
An inviscid model of unsteady aerofoil flow with fixed upper surface separation p 816 A85-45166
Inviscid and viscous flows in cascades with an explicit multiple-grid algorithm p 869 A85-48539
Finite element simulation of transonic flows by modified potential and stream function methods
p 871 A85-49149
Unsteady lifting-line theory as a singular-perturbation problem p 871 A85-49353
Computation of inviscid incompressible flow with rotation p 871 A85-49356
Gas side heat transfer: 2-D flow p 30 N85-10965
An inviscid computational method for supersonic inlets
[AD-A145997] p 86 N85-12042
The numerical simulation of steady transonic rotational flow using a dual potential formulation
p 146 N85-13770
A comparative study of the nonuniqueness problem of the potential equation
[NASA-TP-2385] p 235 N85-15694
Analysis of the flow field about a T-45 using PANAIR
[AD-A146811] p 236 N85-15699
Recent advances in computational methods to solve the high-lift multi-component airfoil problem
p 236 N85-16774
Inviscid compressible flow past a multi-element aerofoil p 236 N85-16776
Theoretical study of boundary-layer control
p 237 N85-16784
Leading edge separation criterion for an oscillating airfoil
[AD-P004175] p 325 N85-17960
Analysis of inviscid transonic flow around an airfoil by diagonal form of IAF scheme
[NAL-TR-831] p 328 N85-18955
Inviscid analysis of unsteady blade tip flow correlation studies
[NASA-CR-172506] p 329 N85-18958
Efficient self-consistent viscous-inviscid solutions for unsteady transonic flow
[NASA-TM-86335] p 329 N85-18959
Wind tunnel wall interference
[AD-A151212] p 593 N85-25273
Investigation of potential and viscous flow effects contributing to dynamic stall
[AD-A151696] p 602 N85-25773
The role of computational fluid dynamics in aeronautical engineering p 605 N85-26629
Theoretical investigation of three-dimensional shock wave turbulent boundary layer interactions. Part 3
[AD-A152251] p 607 N85-27177
Inviscid analysis of two supercritical laminar-flow-control airfoils at design and off-design conditions
[NASA-TM-84657] p 739 N85-29920
A new finite element approach: Progress in inviscid flow computations
[NASA-TM-86434] p 798 N85-31450
An evaluation of four methods of numerical analysis for two-dimensional airfoil flows
[AD-A155202] p 818 N85-32098
Generation by conformal mappings of aerofoil sections and of certain other simple shapes suitable for both aerodynamic and stress-concentration problems
[AD-A154901] p 819 N85-33112
Modelling of unsteady, incompressible separation on an aerofoil using an inviscid flow algorithm
[GU-AERO-8412] p 874 N85-34122

**ION ACCELERATORS**
Mobile accelerator neutron radiography system
[AD-A148808] p 372 N85-18311

**IONIC DIFFUSION**
Propagation of an ion jet near a dielectric surface
p 197 A85-16187

**IONIC REACTIONS**
Design and testing of axisymmetric nozzles for ion-molecule reaction studies between 20 K and 160 K
p 596 A85-33537

**IONIZATION**
Analysis of middle distillate fuels by high resolution field ionization mass spectrometry
[AD-A147724] p 285 N85-17153

**IONIZING RADIATION**
Further observations of X-rays inside thunderstorms
p 701 A85-37720

**IONOSPHERIC PROPAGATION**
Anomalous interference in Omega VLF wave propagation on east-to-west equatorial paths
p 14 A85-11024

**IONS**
Comparison of computational results of a few representative three-dimensional transonic potential flow analysis programs p 559 N85-26628

**IRON**
Low-gravity solidification of cast iron and space technology applications p 44 N85-11022
Directional solidification of flake and nodular cast iron during KC-135 low-g maneuvers p 44 N85-11040
Effect of superconducting solenoid model cores on spanwise iron magnet roll control
[NASA-TM-86378] p 683 N85-27915

**IRON ALLOYS**
Metallurgy institute's developments for alloy and aircraft producers p 120 N85-12288
Thermal barrier coating system
[NASA-CASE-LEW-14057-1] p 902 N85-35233

**ISOSTATIC PRESSURE**
The substitution of nickel for cobalt in hot isostatically pressed powder metallurgy UDIMET 700 alloys
p 686 A85-37415
Explosive forming of low carboon steel sheet into a stepped disc shape p 684 A85-38169
The technology of hot isostatic pressing with reference to silicon nitride p 786 A85-43151

**ISOTHERMAL FLOW**
Fluid motion in the regions of abrupt expansion of the channels of rotor-cooling systems of energy-converting machines p 442 A85-28473
The propagation of a subsonic turbulent jet in a closed plane container of varying length p 816 A85-44851
Theoretical and experimental investigations of dust loaded flow fields in industrial halls
[BMFT-FB-HA-84-044] p 449 N85-21411
Predictions and measurements of isothermal flowfields in axisymmetric combustor geometries
[NASA-CR-174916] p 671 N85-27867

**ISOTROPIC TURBULENCE**
Temperature fluctuations and heat flux in grid-generated isotropic turbulence with streamwise and transverse mean-temperature gradients p 908 A85-49359

**ISOTROPY**
Constitutive model development for isotropic materials
p 31 N85-10975

**ITERATION**
Newton-like minimal residual methods applied to transonic flow calculations p 458 A85-29081
An efficient iteration strategy for the solution of the Euler equations
[AIAA PAPER 85-1529] p 803 A85-40961
Transonic pressure distribution computations of a flexible wing p 396 N85-20213
A study of aerodynamic control in stalled flight leading-edge vortex formation analysis
[AD-A153758] p 638 N85-28928

**ITERATIVE SOLUTION**
Second-order p-iterative solution of the Lambert/Gauss problem — algorithm for efficient orbit determination
p 177 A85-18674
A new iterative matrix solution procedure for three-dimensional panel methods
[AIAA PAPER 85-0176] p 213 A85-19568
Newton iteration formulas for correcting temperature and pressure in thermodynamic calculation of rocket engines
p 279 A85-20226
Solution of transonic S1 surface flow by successively reversing the direction of integration of the stream function equation p 315 A85-24094
An iterative procedure for nonlinear flutter analysis
[AIAA PAPER 85-0688] p 523 A85-30355
Some iterative schemes for transonic potential flows
p 474 A85-32624
Iterative queueing network techniques for the analysis of large maintenance facilities p 535 A85-33299
Application of the single-cycle optimization approach to aerodynamic design p 548 A85-35586
A fast algorithm of the finite difference method for computation of the transonic flow past an arbitrary airfoil with the conservative full-potential equation
p 548 A85-35742
A study for calculating rotor loads using free vortex concept p 600 A85-35746
An iteration panel method for predicting three dimensional surface pressure distribution of a wing with thickness in the subcritical steady transonic flow
p 549 A85-35749
Multigrid acceleration of an iterative method with application to transonic potential flow
p 553 A85-36404

Transonic airfoil design based on Navier-Stokes equation to attain arbitrarily specified pressure distribution - An iterative procedure
[AIAA PAPER 85-1592] p 712 A85-40708
New iterative algorithm between stream function and density for transonic cascade flow
[AIAA PAPER 85-1594] p 713 A85-40710
Iterative three-dimensional transonic wing design using integral equations p 731 A85-42928
Iterative method of calculating strength of airframe members using finite element method
p 162 N85-14955

J

J-52 ENGINE
A Q-GERT network simulation model for examining pipeline time in the Navy's J-52 intermediate level jet engine repair cycle
[AD-A147269] p 201 N85-15663
J-85 ENGINE
Problems and possibilities for life extension in gas turbine components p 287 N85-15742
JAGUAR AIRCRAFT
Unstable Jaguar proves active controls for EFA
p 583 A85-33428
Experiences obtained from service fatigue monitoring exercises p 292 N85-15672
An update of experience on the fly by wire Jaguar equipped with a full-time digital flight control system
p 678 N85-27893
JAMMING
Meeting the challenge of ESM/ECM integration
p 889 A85-49091
JAPANESE SPACE PROGRAM
Japanese aerospace - Split personality on the mend
p 382 A85-27365
JAPANESE SPACECRAFT
Identification of power analysis models for ETS-III operation p 595 A85-34426
JET AIRCRAFT
Dynamics of spatial motion of an aeroplane with deformable controls p 115 A85-15716
Dynamics of non-autonomous spatial motion of an aeroplane with fixed control systems
p 116 A85-15720
Ground-effect analysis of a jet transport airplane
[AIAA PAPER 85-0307] p 248 A85-19677
Calculation of the minimum-time loop maneuver for jet aircraft p 269 A85-19876
Design of a STOL aircraft with jet assisted takeoff units p 253 A85-22373
Flight-test evaluation of engine power effects on lift and drag p 487 A85-32586
Dynamic pressure fluctuations in the internozzle region of a twin-jet nacelle
[SAE PAPER 841540] p 627 A85-39064
Rationalizing the choice of an actuating mechanism for a jet drive p 661 A85-39124
Optimal disturbance suppression with application to wind shear — for digital flight control of small commercial jet
[AIAA PAPER 85-1886] p 844 A85-45909
Minimum-fuel, three-dimensional flight paths for jet transports p 828 A85-46341
Pegasus - An intermediate/advanced Navy jet trainer aircraft p 829 A85-46997
The MCA method of determining thrust of jet aircraft in flight — Mass Consumption-Acceleration
p 881 A85-49134
Advanced systems for the Gulfstream IV
[SAE PAPER 850900] p 885 A85-50117
Observations from varying the lift and drag inputs to a noise prediction method for supersonic helical tip speed propellers
[NASA-TM-83797] p 64 N85-10788
Development and flight evaluation of an augmented stability active controls concept: Executive summary
[NASA-CR-166009] p 37 N85-11006
Auditory information systems in military aircraft: Current configurations versus the state of the art
[AD-A145469] p 65 N85-11794
Computer programs to predict induced effects of jets exhausting into a crossflow
[NASA-CR-166591] p 146 N85-13776
Advanced fatigue monitoring on service aircraft
p 292 N85-15671
Ground-effect analysis of a jet transport airplane
[NASA-TM-85920] p 234 N85-15687
Analysis of the flow field about a T-45 using PANAIR
[AD-A146811] p 236 N85-15699
The influence on IR emission of engine parameters for an afterburn case. A sensitivity study on NATO infrared air target model (NIRATAM) version: 0.0
[AD-B089311L] p 422 N85-21171
Designer O. K. Antonov on new AN-74 arctic transport
p 564 N85-25230
A method for simulating 3-D aircraft flow fields with jet plume effects
[NASA-CR-175802] p 559 N85-26664
Flight trials of a modified gulfstream commander carrying external stores
[AD-A153376] p 653 N85-27859
The AFTI/F16 terrain-aided navigation system
[DE85-008411] p 645 N85-28935
JET AIRCRAFT NOISE
On the relationship between broadband shock associated noise and screech tones
[AIAA PAPER 84-2276] p 59 A85-10838
Control of jet shock associated noise by a reflector
[AIAA PAPER 84-2279] p 59 A85-10839
Weakly nonlinear theory of supersonic turbopropeller noise
[AIAA PAPER 84-2302] p 60 A85-10853
Noise of counter-rotation propellers
[AIAA PAPER 84-2305] p 60 A85-10856
Mechanism of broadband jet noise amplification and suppression under controlled excitation
[AIAA PAPER 84-2319] p 61 A85-10866
Phase averaged acoustic measurements for a Mach number 0.6 jet
[AIAA PAPER 84-2320] p 61 A85-10867
Applications of finite element and wave envelope element approximations to turbofan engine noise radiation including flight effects
[AIAA PAPER 84-2333] p 62 A85-10877
An acoustic mode measurement technique
[AIAA PAPER 84-2337] p 62 A85-10879
Review of recent research of interior noise of propeller aircraft
[AIAA PAPER 84-2349] p 17 A85-10885
Scaling laws for jet mixing noise in simulated flight and the prediction scheme associated
[AIAA PAPER 84-2360] p 63 A85-10894
Jet and wing/flap interaction noise
[AIAA PAPER 84-2362] p 64 A85-10896
Noise control characteristics of synchrophasing - An experimental investigation — on aircraft fuselage model
[AIAA PAPER 84-2370] p 17 A85-10899
Advances in high speed jet aeroacoustics
[AIAA PAPER 84-2275] p 133 A85-13959
Turbulence characteristics of the noise producing region of an excited round jet. II - Large scale structure characteristics
[AIAA PAPER 84-2342] p 133 A85-13961
Turbulence characteristics of the noise producing region of an excited round jet. I - Time-average flow properties
[AIAA PAPER 84-2343] p 133 A85-13962
The prediction of static-to-flight changes in jet noise
[AIAA PAPER 84-2358] p 134 A85-13963
Large-scale coherent structure and far-field jet noise
p 78 A85-14390
Supersonic jet shock noise reduction
[AIAA PAPER 84-2278] p 196 A85-16099
Effect of sonic boom on a cracked plaster-wood wall
p 191 A85-16256
The silencers — JT3D engine noise reduction options
p 167 A85-16272
Application of scaling laws for the flyover jet noise to three departure procedures for the Boeing 727-200 advanced
[AIAA PAPER 84-2359] p 377 A85-26319
Community noise testing - New techniques and equipment — for Boeing aircraft p 401 A85-28645
Far-field noise of a subsonic jet under controlled excitation p 537 A85-30669
Analysis of turbulent underexpanded jets. II - Shock noise features using SCIPVIS p 537 A85-32605
Controlled suppression or amplification of turbulent jet noise p 611 A85-35128
Power spectral density of subsonic jet noise
p 704 A85-37898
Noise of counter-rotation propellers
p 705 A85-39220
Noise control technology for gas turbine engines
p 766 A85-41031
Effect of initial condition on subsonic jet noise
p 862 A85-45710
A more modern theory of combustion noise
p 918 A85-47309
Parametric analysis of the acoustic power emitted by coaxial jets p 918 A85-48179
Commercial aircraft noise
[PNR-90208] p 135 N85-12665
Experimental investigation of shock-cell noise reduction for dual-stream nozzles in simulated flight
[NASA-CR-3846] p 135 N85-13549
Computation of noise radiation from a free jet perpendicular to its axis via laser anemometry measurements
[ESA-TT-870] p 378 N85-18669
Fan noise suppression in turbofan engines
[B8580076] p 671 N85-27872
JET AMPLIFIERS
Experimental study of forward-located jet-interaction nozzles
[AIAA PAPER 85-0454] p 224 A85-19762
JET BLAST EFFECTS
A study of flow past an airfoil with a jet issuing from its lower surface
[NASA-CR-166610] p 86 N85-12860
JET BOUNDARIES
Approximate determination of the boundaries of an ideal gas jet issuing under conditions of pressure difference from a nozzle with the formation of a free vortex flow
p 315 A85-23982
JET ENGINE FUELS
The effect of esters on 'antiwear' properties of jet engine fuel obtained by hydrofining p 179 A85-16950
Oxidation and stabilization of jet fuels — Russian book
p 281 A85-20925
Fuel effects on the TF30 engine (Alternate Test Procedure)
[ASME PAPER 84-JPGC-GT-1] p 349 A85-23191
Stabilizing T-6 fuel with antioxidant mixtures
p 364 A85-26279
Estimation of structural transformations in jet fuels from electrical conductivity and viscosity p 518 A85-31572
Did safe jet fuel flunk its final exam?
p 745 A85-41053
Combustion gas properties I-ASTM jet A fuel and dry air
[NASA-TP-2359] p 27 N85-10064
Molecular interactions of high energy fuels and jet fuels with oncogenic viruses and endogenous viruses
[AD-A145484] p 45 N85-11255
Lubricity of well-characterized jet and broad-cut fuels by ball-on-cylinder machine
[NASA-TM-83807] p 120 N85-12183
Compound class quantitation of JP-5 jet fuels by high performance liquid chromatography-differential refractive index detection
[AD-A145754] p 120 N85-12185
Liquid phase products and solid deposit formation from thermally stressed model jet fuels
[NASA-TM-86874] p 121 N85-13066
Method for evaluating petrol products corrosivity using piezoelectric crystals. Part 2: Instruction manual — jet engine corrosion tests
[FOA-C-40198-84] p 121 N85-13073
Storage stability of jet fuels
[AD-A146360] p 180 N85-14943
Heater block assembly for use in thermal oxidation testing of jet fuel
[AD-D011430] p 285 N85-17077
GC-FTIR (Fourier Transform Infrared Spectrometry) of jet fuels
[AD-A148272] p 285 N85-17155
Atmospheric photochemical modeling of turbine engine fuels. Phase 1: Experimental studies. Volume 2: Environmental chamber data tabulations
[AD-A147786] p 300 N85-17470
Study of advanced fuel system concepts for commercial aircraft and engines
[NASA-CR-174752] p 365 N85-19176
Quantitative determination of compound classes in jet turbine fuels by high performance liquid Chromatography/Differential refractive index detection: Part 2
[AD-A149298] p 436 N85-20144
Oxidation and gum formation in jet fuels
[AD-A149934] p 438 N85-21401
JP-8 and JP-5 as compression ignition engine fuel
[AD-A150796] p 521 N85-24022
Influence of fuel properties on gas turbine combustion performance
[AD-A151464] p 596 N85-25448
Aviation turbine fuels from tar sands bitumen and heavy oils. Part 1: Process analysis
[AD-A151319] p 597 N85-25539
Jet fuel property changes and their effect on producibility and cost in the U.S., Canada, and Europe
[NASA-CR-174840] p 598 N85-27012
Jet fuel instability mechanisms
[NASA-CR-175856] p 690 N85-28127
Research test facility for evaporation and combustion of alternative jet fuels at high air temperatures
[AD-A153830] p 691 N85-29073
The distribution of higher n-alkanes in partially frozen middle distillate fuels
[AD-A153940] p 692 N85-29074
Measurement and correlation of jet fuel viscosities at low temperatures
[NASA-CR-174911] p 901 N85-34295
Nitrogen analysis by chemiluminescence
[AD-A156197] p 902 N85-35306

**JET ENGINES**

Eddy current jet engine disk-crack monitor
p 47 A85-11100

Frequency response of a jet engine test facility air supply system
[AIAA PAPER 85-0053] p 273 A85-19485

An assessment of the effect of the use of conventional weapons on the operation of a jet engine
p 383 A85-27720

Instrumenting a very large scale R&D facility
p 426 A85-28117

The use of Ada in distributed simulations
p 457 A85-28612

Multibus-based parallel processor for simulation
p 457 A85-28613

Evaluation of automated eddy current system reliability
p 525 A85-31977

Explosive forming of low carboon steel sheet into a stepped disc shape p 694 A85-38169

Repairing commercial aircraft jet engine nacelle composite structures
[SAE PAPER 841567] p 616 A85-39068

A comment on controlled diffusion airfoil
p 723 A85-40996

Heat resistant alloys for jet engines and high strength steels for landing gears p 784 A85-41004

Condition monitoring of jet engines
p 835 A85-43649

The effect of direct heating on combustion efficiency of the chamber of jet engine in the simulation test on the ground p 835 A85-43669

F404/RM12 - A key step in the F404 growth plans
[AIAA PAPER 85-1461] p 835 A85-43778

Air force engine repair - Oklahoma City Air Logistics Center, Propulsion Division
[AD-P003999] p 71 N85-11980

Propulsion — jet aircraft engines
[PNR-90208] p 113 N85-12062

The applications of fibre optics in gas turbine engine instrumentation
[PNR-90209] p 135 N85-12687

Air intake efficiency at zero speed and lip suction — jet engines
[BAE-KRS-N-GEN-303] p 326 N85-17996

Oxidation resistant materials for hot gas turbines and jet engines
[AD-B087399L] p 507 N85-22389

Fabrication of ceramic substrate-reinforced and free forms
[NASA-TM-86994] p 518 N85-23926

Fiscal year 1986 technical objective document
[AD-A151039] p 539 N85-25000

Advanced smoke meter development survey and analysis
[NASA-CR-168287] p 604 N85-25792

Alternatives for jet engine control
[NASA-CR-175831] p 583 N85-26713

Alternatives for jet engine control
[NASA-CR-175832] p 583 N85-26714

Alternatives for jet engine control
[NASA-CR-175833] p 583 N85-26715

Testing of materials and coatings for jet engine components under simulated operational conditions
[B8580073] p 672 N85-27673

Opacity control technique for jet engine test cells
[AD-D011668] p 774 N85-29968

Man-vehicle systems research facility advanced aircraft flight simulator throttle mechanism p 858 N85-33527

Component-specific modeling
[NASA-CR-174765] p 891 N85-34140

**JET EXHAUST**

Coaxial jet noise source distributions
[AIAA PAPER 84-2361] p 64 A85-10895

Theoretical study on supersonic jet plumes
p 206 A85-19439

Dispersion process of jet engine exhaust plume
p 351 A85-24589

Experimental definition of nonaxisymmetric exhaust nozzle plumes — for aircraft thrust vector control
p 385 A85-26752

A new technique to break diaphragms electrically in a double-tube short duration jet simulation facility
p 682 A85-38975

A simulation technique for jet temperature effects on nozzle-afterbody drag at transonic Mach numbers
[AIAA PAPER 85-1463] p 633 A85-39792

Effects of non-uniform velocity profiles on dual jets in a crossflow
[AIAA PAPER 85-1674] p 716 A85-40763

Opacity control technique for jet engine test cells
[AD-D011668] p 774 N85-29968

**JET FLAPS**

Aerodynamics of an airfoil in ground effect with a jet issuing from its undersurface
[AIAA PAPER 85-0019] p 207 A85-19461

Stability of the thin-jet model of the unsteady jet flap
p 626 A85-38997

Computer study of a jet flap ASTVOL 'Harrier'
[SAE PAPER 841457] p 650 A85-39202

Aerodynamic characteristics of a circulation control elliptical airfoil with two blown jets p 816 A85-45834

A study of flow past an airfoil with a jet issuing from its lower surface
[NASA-CR-169810] p 86 N85-12980

**JET FLOW**

Passive control of jets with indeterminate origins
[AIAA PAPER 84-2299] p 4 A85-10852

The role of excitation on modifying the sound sources
[AIAA PAPER 84-2317] p 61 A85-10865

Organized structures in wakes and jets - An aerodynamic resonance phenomenon p 77 A85-14344

Noise generated by a subsonic jet
p 134 A85-14895

The effect of phase-difference on the spreading rate of a laminar circular jet under bi-modal excitation
[AIAA PAPER 85-0045] p 208 A85-19479

Survey on jet instability theory p 227 A85-20074

Turbulence suppression in free turbulent shear flows under controlled excitation. II - Jet-noise reduction
p 366 A85-23844

Study of a bounded jet flow considering the initial turbulence - Experiments with a nozzle having aspect ratio of 3 p 387 A85-24585

Vorticity growth and decay in the jet in cross flow
p 317 A85-25146

Heat transfer in the case of jet flow past an arbitrarily nonisothermal surface p 366 A85-25621

Theory of hypersonic jets p 389 A85-28394

Upstream influence on turbulent jet flows from cruciform nozzles p 470 A85-30995

The contribution of Elie Carafoli to the development of the theory of wings with lateral jets p 473 A85-32501

Analyses of turbulent underexpanded jets. II - Shock noise features using SCIPVIS p 537 A85-32805

Subsonic multiple-jet aerodynamic window
p 683 A85-37216

Gas flow in nozzles and jets p 619 A85-37337

Experiments in dilution jet mixing - Effects of multiple rows and non-circular orifices
[AIAA PAPER 85-1104] p 664 A85-39606

Numerical calculation of subsonic jets in crossflow with reduced numerical diffusion
[AIAA PAPER 85-1441] p 687 A85-39780

Recent developments in the modeling of high speed jets, plumes and wakes
[AIAA PAPER 85-1616] p 714 A85-40724

A flow visualization study of the effect of wing-tip jets on wake vortex development p 867 A85-47129

Visualization studies of jet impingement flows at McDonnell Douglas Research Laboratories
p 867 A85-47144

Experimental results on edge-tone oscillations in high-speed subsonic jets p 918 A85-48527

Tunnel constraint for a jet in crossflow
p 84 N85-12027

Preliminary analysis of tone-excited two-stream jet velocity decay
[NASA-TM-86951] p 387 N85-21114

An investigation of turbulence mechanisms in V/STOL upwash flow fields
[AD-A149786] p 399 N85-21123

Pseudospectral calculations of two-dimensional transonic flow (Task 1). Numerical investigation of VTOL aerodynamics (Task 2)
[AD-A150123] p 399 N85-21126

Large amplitude forcing of a high speed 2-dimensional jet
[NASA-CR-175646] p 507 N85-22393

Numerical calculation of subsonic jets in crossflow with reduced numerical diffusion
[NASA-TM-87003] p 581 N85-25263

Experiments in dilution jet mixing effects of multiple rows and non-circular orifices
[NASA-TM-86996] p 582 N85-25266

Preliminary wind tunnel study of the influence of a jet on the unsteady aerodynamics of a turbojet engine
[ONERA-RT-12/5115-RY-230-R-] p 561 N85-26679

Analyses of orderly structures in jets and the relationship with emitted noise
[ISL-R-117/83] p 612 N85-27646

Background noise measurements from jet exit vanes designed to reduced flow pulsations in an open-jet wind tunnel
[NASA-TM-86383] p 683 N85-27916

Heat transfer characteristics for two-dimensional arrays of impinging jets with initial crossflow
p 911 N85-35365

**JET IMPINGEMENT**

Turbulence structure of a three dimensional impinging jet in a cross stream
[AIAA PAPER 85-0044] p 208 A85-19478

A novel experimental facility for conducting jet impingement studies related to VTOL aircraft
[AIAA PAPER 85-0052] p 209 A85-19484

Experimental investigation of the partial impingement of a jet on a half-plate p 316 A85-24202

An investigation on turbulent heat transfer of an axisymmetric jet impinging on a flat plate
p 440 A85-27235

Self-oscillations in a jet impinging on a barrier
p 394 A85-30109

The propagation of a subsonic turbulent jet in a closed plane container of varying length p 816 A85-44851

Visualization studies of jet impingement flows at McDonnell Douglas Research Laboratories
p 867 A85-47144

Jet array impingement flow distributions and heat transfer characteristics: Effects of initial crossflow and nonuniform array geometry p 30 N85-10967

**JET MIXING FLOW**

Scaling laws for jet mixing noise in simulated flight and the prediction scheme associated
[AIAA PAPER 84-2360] p 63 A85-10894

Turbulence characteristics of the noise producing region of an excited round jet. I - Time-average flow properties
[AIAA PAPER 84-2343] p 133 A85-13962

Numerical analysis of the combined flow of a reaction jet and an external stream with allowance for the effect of boundary layers and a turbulent mixing zone
p 141 A85-16185

Computational-experimental study of a Laval nozzle with a cylindrical throat p 141 A85-16189

Inviscid steady flow past turbofan mixer nozzles
p 168 A85-17041

A simple analytical method for predicting axisymmetric turbulent jet flowfields in a freestream
[AIAA PAPER 85-0251] p 216 A85-19614

Flow parameters in a chamber during the mixing of wakes p 349 A85-23983

The effect of quality of gas jet mixing in the mixing chamber of a subsonic jet pump on the diffuser performance p 442 A85-28374

Measurements of a zero-pressure-gradient boundary layer blown by an asymmetric jet p 390 A85-29077

Analyses of turbulent underexpanded jets. I - Parabolized Navier-Stokes model, SCIPVIS p 391 A85-29080

Experiments in dilution jet mixing - Effects of multiple rows and non-circular orifices
[AIAA PAPER 85-1104] p 664 A85-39606

Dilution zone mixing studies p 33 N85-10984

Dilution jet mixing p 33 N85-10985

An experimental investigation of an underexpanded rectangular jet ejector
[AD-A149656] p 422 N85-21170

Development of a temperature measurement system with application to a jet in a cross flow experiment
[NASA-CR-174896] p 581 N85-25262

Experiments in dilution jet mixing effects of multiple rows and non-circular orifices
[NASA-TM-86996] p 582 N85-25266

**JET NOZZLES**

Experimental study of forward-located jet-interaction nozzles
[AIAA PAPER 85-0454] p 224 A85-19762

Evaluation of nozzle throat materials for ramjet engines p 686 A85-37201

Influence of setting angle of jet cooling nozzles on temperature and stress state of a turbine wheel
p 355 N85-18208

**JET PROPULSION**

Modeling of propulsive jet plumes--extension of modeling capabilities by utilizing wall curvature effects
[AD-A146262] p 126 N85-12324

Air Force Academy Aeronautics Digest
[AD-A149614] p 384 N85-21104

Fiscal year 1986 technical objective document
[AD-A151039] p 539 N85-25000

**JET PROVOST AIRCRAFT**

Experiences obtained from service fatigue monitoring exercises p 292 N85-15672

**JET PUMPS**

Cryptosteady modes of energy exchange
p 439 A85-26769

**JET STREAMS (METEOROLOGY)**

A preliminary intercomparison between numerical upper wind forecasts and research aircraft measurements of jet streams
[NASA-CR-167884] p 914 N85-35539

**JET THRUST**

Loss in turbofan thrust caused by boundary layer growth in a nacelle's inlet and exhaust ducts
[AIAA PAPER 85-1281] p 631 A85-39697

An investigation of high performance, short thrust augmenting ejectors
[ASME PAPER 84-WA/FE-10] p 697 A85-39873

**JET VANES**

Effect of jet exit vanes on flow pulsations in an open-jet wind tunnel
[NASA-TM-86299] p 326 N85-17999

Background noise measurements from jet exit vanes designed to reduced flow pulsations in an open-jet wind tunnel
[NASA-TM-86383] p 683 N85-27916

**JOINING**

Using the force method for joining substructures with various kinematic hypotheses p 524 A85-31459

**JOINTS (JUNCTIONS)**

Advanced-composite joints and fittings for primary structural components p 290 A85-21385

Determination of the optimum lubricant change period for the joints of the landing gear of aircraft
p 695 A85-38600

Fracture toughness of adhesively bonded joints
p 688 A85-39492

Aeroproyekt develops improved runway surfacing
p 277 N85-16770

Long term durability of urea formaldehyde glued joints removed from Vampire aircraft
[AD-A149053] p 348 N85-18985

Adhesive joint formation under field conditions
[AD-D011478] p 385 N85-19153

Initial quality of advanced joining concepts
[AD-A152241] p 606 N85-27027

Further investigations to improve the fatigue life of the Mirage 1110 wing main span
[ARL/STRUC-TM-397] p 654 N85-28938

Elastomers used in aeronautics industry
[SNIAS-851-551-103] p 788 N85-31304

**JOUKOWSKI TRANSFORMATION**

Unsteady flow about a Joukowski airfoil in the presence of moving vortices p 473 A85-32603

Joukowsky airfoil with circulation control
[AIAA PAPER 85-1772] p 812 A85-43833

**JOULE-THOMSON EFFECT**

A fast cool-down J-T minicryocooler
p 438 A85-26510

**JOURNAL BEARINGS**

A theoretical study of stability of a rigid rotor under the influence of dilute viscoelastic lubricants
[ASME PAPER 84-TRIB-17] p 289 A85-21278

Effects of turbulence and viscosity variation on the dynamic coefficients of fluid film journal bearings
[ASME PAPER 84-TRIB-8] p 289 A85-21283

**JP-4 JET FUEL**

Variability of major organic components in aircraft fuels. Volume 3: Sample data package for the reference JP-4 fuel
[AD-A145483] p 45 N85-11254

Variability of major organic components in aircraft fuels. Volume 1: Technical discussion
[AD-A145574] p 46 N85-11256

Variability of major organic components in aircraft fuels. Volume 2: Illustrations
[AD-A145831] p 121 N85-13067

Effects of temperature variation among droplets in an evaporating fuel spray p 520 N85-22562

**JP-5 JET FUEL**

Variability of major organic components in aircraft fuels. Volume 3: Sample data package for the reference JP-4 fuel
[AD-A145483] p 45 N85-11254

Variability of major organic components in aircraft fuels. Volume 1: Technical discussion
[AD-A145574] p 46 N85-11256

Variability of major organic components in aircraft fuels. Volume 2: Illustrations
[AD-A145831] p 121 N85-13067

Evaluation of jet fuel deposit kinetics. Lot 4
[AD-A147196] p 284 N85-15922

**JP-8 JET FUEL**

Effects of temperature variation among droplets in an evaporating fuel spray p 520 N85-22562

**JUDGMENTS**

Judgment and discipline - Recipe for survival
p 241 A85-21582

## K

**KALMAN FILTERS**

Navigation processing of the Flight Management Computer System for the Boeing 737-300
p 93 A85-14827

Suboptimal filtering for aided GPS navigation
p 94 A85-14832

A three-dimensional Kalman filter for short observation times to extrapolate flight trajectories — German thesis
p 301 A85-19835

Dual control guidance for simultaneous identification and interception
[AD-A154607] p 407 A85-27510

Numerical computation of extended Kalman filter and its application to aerodynamic parameter identification of reentry satellite p 610 A85-35796

The design, development, and flight testing of a modern-control-designed autoland system
p 584 A85-35981

Simulation and analysis of differential GPS
p 685 A85-38546

Spectral analysis of optimal and suboptimal gyro monitoring filters p 696 A85-39459

Observability of relative navigation using range-only measurements p 750 A85-42399

On-line estimation and identification of aircraft stability derivatives using the modified gain extended Kalman filter
[AIAA PAPER 85-1762] p 837 A85-43827

Kalman filter implementation in the Litton LR-80 AHRS
p 823 A85-45032

Interfacing Kalman filters with the standard INS
p 823 A85-45033

Algorithm for tracking maneuvering object with ambiguous measurements p 189 N85-15057

Robust Kalman filtering and its applications
[AD-A149044] p 376 N85-19775

Acta Electronica Sinica (selected articles)
[AD-A148829] p 447 N85-20252

Reference systems for the evaluation of dead-reckoning navigation equipment p 489 N85-22358

Formulation and implementation of nonstationary adaptive estimation algorithm with applications to air-data reconstruction
[NASA-TM-86727] p 577 N85-26699

Estimation of flight mechanical variables by means of Kalman filters p 876 N85-35171

**KAPTON (TRADEMARK)**

Field and laboratory investigation of Kapton insulated aircraft wiring p 852 A85-45138

**KARMAN VORTEX STREET**

Karman vortex shedding - Friend or foe of the structural dynamicist? — application to Space Shuttle cable tray flutter
[AIAA PAPER 85-0661] p 470 A85-30349

**KELVIN-HELMHOLTZ INSTABILITY**

Feedback in separated flows over symmetric airfoils
[AIAA PAPER 84-2297] p 390 A85-28899

**KEPLER LAWS**

Second-order p-iterative solution of the Lambert/Gauss problem — algorithm for efficient orbit determination
p 177 A85-18674

**KERNEL FUNCTIONS**

Induced drag and lift of wing by the piecewise continuous kernel function method p 6 A85-11976

A kernel function method for computing unsteady load on three-dimensional wings in transonic flow
p 7 A85-12355

An improved kernel function computation in subsonic unsteady lifting surface theory p 726 A85-41739

**KEROSENE**

The determination of biological impurities in fuels
p 179 A85-16949

Combustion efficiency of a hydrogen-kerosene fuel in a straight-through channel p 836 A85-46221

Aircraft wing fuel tank environmental simulator tests for evaluation of antimisting fuels
[FAA-CT-84-15] p 283 N85-15920

**KEVLAR (TRADEMARK)**

Certification of Kevlar on primary structure SAAB/Fairchild SF-340 aircraft p 118 A85-14111

Damping of composite materials p 119 A85-15579

Structural uses of aramid fibers as a plastic reinforcement in aircraft and missiles
p 119 A85-15631

Evaluation of Kevlar 29 for filament-wound structural applications in helicopter p 178 A85-16033

Kevlar aramid fibers vs other fibers for reinforcement of composite structures p 282 A85-21392

Carbon and kevlar in the Dornier 228 utility-commuter aircraft p 341 A85-24819

Development of a field repair technique for mini-sandwich Kevlar/epoxy aircraft skin
[AD-A151369] p 596 N85-25439

Flight service evaluation of composite helicopter components
[NASA-CR-172562] p 901 N85-34222

**KEYING**

The use of a simulated multifunction keyboard (SMFK) in MFK software development projects
p 859 A85-45101

**KINEMATICS**

Using the force method for joining substructures with various kinematic hypotheses p 524 A85-31459

Computer-aided kinematic and dynamic analysis of the landing-gear mechanisms of aircraft p 492 A85-31471

Advanced stress analysis methods applicable to turbine engine structures
[NASA-CR-175573] p 422 N85-21165

**KINETIC EQUATIONS**

Theoretical principles of turbulence and a simple example of turbulent flow p 460 A85-26742

**KINETICS**

Future fundamental combustion research for aeropropulsion systems
[AIAA PAPER 85-1398] p 771 A85-42671

Evaluation of jet fuel deposit kinetics. Lot 4
[AD-A147196] p 284 N85-15922

Future fundamental combustion research for aeropropulsion systems
[NASA-TM-87049] p 671 N85-27870

**KNUDSEN FLOW**

Knudsen layer characteristics for a highly cooled blunt body in hypersonic rarefied flow p 545 A85-35127

**KUTTA-JOUKOWSKI CONDITION**

The Kutta condition in unsteady flow
p 471 A85-31183

Improvements in transonic airfoil potential flow calculations
[AIAA PAPER 85-1642] p 715 A85-40743

## L

**L-1011 AIRCRAFT**

Demonstration of relaxed static stability on a commercial transport p 35 A85-12593

Effect of active control system nonlinearities on the L-1011-3(ACS) design gust loads
[AIAA PAPER 85-0755] p 511 A85-30374

On the wake hazard alleviation associated with roll oscillations of wake-generating aircraft
[AIAA PAPER 85-1774] p 812 A85-43835

Modal insensitivity with optimality — in feedback control p 917 A85-47735

Advanced manufacturing development of a composite empennage component for L-1011 aircraft
[NASA-CR-165885] p 44 N85-11141

Flight service evaluation of advanced composite ailerons on the L-1011 transport aircraft
[NASA-CR-172483] p 284 N85-17049

**LABORATORIES**

Spring program summary, 1983
[PB84-222223] p 192 N85-15330

The use of small mobile radars to detect, monitor, and quantify bird movements
[AD-P004188] p 403 N85-19951

Fiscal year 1986 technical objective document
[AD-A151039] p 539 N85-25000

Guide for the execution of reliability tests in the laboratory — aeronautical equipment p 608 N85-27237

Technical services at NLR
[B8561898] p 705 N85-28871

**LABORATORY EQUIPMENT**

Advanced research instrumentation for aircraft turbomachinery
[SAE PAPER 841502] p 444 A85-28900

**LABYRINTH SEALS**

Preliminary investigation of labyrinth packing pressure drops at onset of swirl-induced rotor instability
p 187 N85-14132

**LAGRANGE COORDINATES**

Users manual for coordinate generation code CRDSRA
[NASA-CR-172584] p 634 N85-27824

**LAMINAR BOUNDARY LAYER**

Mechanism of broadband jet noise amplification and suppression under controlled excitation
[AIAA PAPER 84-2319] p 61 A85-10866

Laminar turbulent boundary layers; Proceedings of the Energy Sources Technology Conference, New Orleans, LA, February 12-16, 1984 p 48 A85-11619

Surface phenomena in a three-dimensional skewed shock wave/laminar boundary-layer interaction
p 80 A85-15336

Critical layer concept relative to hypersonic boundary layer stability
[AIAA PAPER 85-0303] p 219 A85-19652

Laminar boundary layer stability experiments on a cone at Mach 8. III - Sharp cone at angle of attack
[AIAA PAPER 85-0492] p 226 A85-19787

Scaling of airfoil self-noise using measured flow parameters p 304 A85-21858

Hybrid approach to steady transonic normal shock-compressible laminar boundary layer interactions over airfoils with suction
[AIAA PAPER 85-0522] p 386 A85-27876

Transition calculations in three-dimensional flows
[ONERA, TP NO. 1985-7] p 387 A85-27887

Investigation of drag and heat transfer for nonuniform supersonic flow past a body in the cases of laminar and turbulent regimes p 388 A85-28387

Unsteady laminar boundary-layer separation on oscillating configurations p 391 A85-29089

Factors influencing heat transfer to the pressure surfaces of gas turbine blades p 421 A85-29345
The high Reynolds number finite flat-plate cascade p 474 A85-32616
The effect of freestream turbulence on pressure fluctuations in transonic flow p 545 A85-34998
The effects of surface discontinuities on convective heat transfer in hypersonic flow
[AIAA PAPER 85-0971] p 620 A85-37621
Density and velocity profiles in non-equilibrium laminar boundary layers in air
[AIAA PAPER 85-0976] p 620 A85-37626
Development of an active laminar flow nacelle
[AIAA PAPER 85-1116] p 629 A85-39613
Computation of a three dimensional skewed shock wave laminar boundary layer interaction
[AIAA PAPER 85-1565] p 711 A85-40690
Stability characteristics of a supersonic boundary layer and their relation to the position of the laminar-turbulent transition point p 730 A85-42123
Laminar separation studied as an airfoil problem p 732 A85-42955
Oscillating oblique shock interaction with a laminar boundary layer p 735 A85-42971
Flow characteristics of a body of revolution at incidence p 737 A85-42986
Structure of a laminar boundary layer with distributed suction p 815 A85-44133
Effect of initial condition on subsonic jet noise p 862 A85-45710
A study of laminar separation bubble in the concave region of an airfoil using laser velocimetry p 866 A85-46520
On the abrupt turbulent reattachment downstream of leading-edge laminar separation p 872 A85-49698
Some important problems in unsteady boundary layers including separation. 1: Nature of singularity on oscillating airfoils
[AD-A147897] p 294 N85-16087
Technology developments for laminar boundary layer control on subsonic transport aircraft p 237 N85-16787
Leading edge separation criterion for an oscillating airfoil
[AD-P004175] p 325 N85-17960
Numerical approach for the aerodynamic analysis if airfoils with laminar separation
[NASA-CR-172498] p 326 N85-18001
Three-dimensional boundary layer research at NLR p 603 N85-25787
Brief review of current work in the UK on three dimensional boundary layers p 603 N85-25788
Proceedings of the 9th US Air Force and the Federal Republic of Germany Data Exchange Agreement Meeting, Viscous and Interacting Flow Field Effects
[AD-A153020] p 699 N85-28266

LAMINAR FLOW
Computation of the aerothermodynamic field of laminar diffusion flames p 41 A85-10557
NASA research on viscous drag reduction II p 48 A85-11624
Instability and transition in supersonic boundary layers p 5 A85-11625
Calculation of streamlines from wall pressures on a fusiform body p 79 A85-14894
The effect of phase-difference on the spreading rate of a laminar circular jet under bi-modal excitation
[AIAA PAPER 85-0045] p 208 A85-19479
A comparison of flight test and analytical techniques for boundary layer transition on a sailplane
[AIAA PAPER 85-0075] p 210 A85-19501
The aerodynamic effect of surface wetting characteristics on a laminar flow airfoil in simulated heavy rain
[AIAA PAPER 85-0260] p 247 A85-19619
Potential flow calculations and preliminary wing design in support of an NLF variable sweep transition flight experiment
[AIAA PAPER 85-0426] p 248 A85-19741
Flight testing of a wing section with laminar flow control p 233 A85-22227
Measurements of density and velocity profiles in non-equilibrium laminar hypersonic boundary layers in air p 320 A85-25483
Heat transfer in the case of jet flow past an arbitrarily nonisothermal surface p 368 A85-25621
Numerical calculation of a laminar two dimensional straight cascade flow p 386 A85-27348
Boundary layer flow over long cylinders with suction p 444 A85-29140
Viscous shock-layer flowfield analysis by an explicit-implicit method p 474 A85-32612
The position of laminar separation lines on smooth inclined bodies p 546 A85-35148
Computation of forced laminar convection in rotating cavities p 600 A85-35592
A method computing viscous/inviscid interaction with laminar separation p 552 A85-35795
Viscous influence in axisymmetric laminar supersonic flow over blunt bodies p 552 A85-36339
Numerical simulation of hypersonic viscous fore- and afterbody flows over capsule-type vehicles at angles of attack
[AIAA PAPER 85-0924] p 620 A85-37593
Families of variational principles for the semi-inverse and type-A hybrid problems on a S2-streamsheet in mixed-flow turbomachines p 622 A85-37930
The interaction of a diffusing line vortex and an aligned shear flow p 788 A85-40254
The spanwise variation of laminar separation bubbles on finite wings at low Reynolds numbers
[AIAA PAPER 85-1590] p 712 A85-40706
A numerical study of spin effects on axisymmetric flow past a body of revolution
[AIAA PAPER 85-1605] p 724 A85-41402
An analytical investigation of the ground and ambient head flow influence on the free inlet flow into a turbojet engine p 726 A85-41608
Numerical computation of hypersonic laminar near-wake flow via Navier-Stokes solver
[AIAA PAPER 85-1672] p 731 A85-42673
Manufacturing tolerances for natural laminar flow airframe surfaces
[SAE PAPER 850863] p 884 A85-50103
A review and analysis of boundary layer transition data for turbine application
[NASA-TM-86880] p 53 N85-10306
Laminar flow heat exchangers. Viscosity induced non-uniform flow
[AD-A144777] p 53 N85-10307
Hybrid laminar flow control study
[NASA-CR-165930] p 21 N85-10933
Laminar-to-turbulent flow transition under influence of acoustic oscillations p 55 N85-11701
Natural laminar flow airfoil design considerations for winglets on low-speed airplanes
[NASA-CR-3853] p 87 N85-12863
Laminar separation bubble with transition: Prediction test with local interaction
[BLL-PNR-90231-(8019.3153)] p 189 N85-15132
Aircraft drag reduction technology p 257 N85-16782
Design studies of thick laminar flow airfoils for low speed flight employing turbulent boundary layer suction over the rear part p 257 N85-16786
Pneumatic turbulators: A device for drag reduction at Reynolds numbers below 5 million p 257 N85-16791
Laminar separation bubble with transition: Prediction test with local interaction — airfoils
[PNR-90231] p 328 N85-18008
Profile design for wings and propellers
[NASA-TM-77785] p 328 N85-18953
A multistage time-stepping scheme for the Navier-Stokes equations
[NASA-CR-172527] p 373 N85-19365
Flight-measured laminar boundary-layer transition phenomena including stability theory analysis
[NASA-TP-2417] p 398 N85-21118
La Recherche Aerospatiale Bimonthly Bulletin Number 1984-3, 220/May-June
[ESA-TT-882] p 543 N85-26636
Low Reynolds number vehicles
[AGARD-AG-288] p 560 N85-26666
A method of determining the suction velocity for laminar flow control of two-dimensional airfoil in incompressible flow
[NAL-TR-845] p 637 N85-28925
A study of aerodynamic control in stalled flight long laminar separation bubble analyses
[AD-A153850] p 638 N85-28930
Inviscid analysis of two supercritical laminar-flow-control airfoils at design and off-design conditions
[NASA-TM-84657] p 739 N85-29920
Nacelle/pylon/wing integration on a transport model with a natural laminar flow nacelle
[NASA-TP-2439] p 740 N85-29924
Sidewall boundary-layer effects in two-dimensional airfoil testing
[NASA-CR-176034] p 781 N85-31085

LAMINAR FLOW AIRFOILS
Free perturbations of a laminar hypersonic flow behind an airfoil p 141 A85-16218
Experimental and theoretical analysis of laminar separation bubbles
[AIAA PAPER 84-2201] p 288 A85-20874
Natural laminar flow hits smoother air p 724 A85-41055
The influence of laminar separation and transition on low Reynolds number airfoil hysteresis p 817 A85-45838
Flight evaluation of an insect contamination protection system for laminar flow wings
[SAE PAPER 850860] p 884 A85-50102
Unsteady Navier-Stokes calculations in an accelerated reference frame
[AD-A151751] p 602 N85-25774
A method of determining the suction velocity for laminar flow control of two-dimensional airfoil in incompressible flow
[NAL-TR-845] p 637 N85-28925

LAMINAR HEAT TRANSFER
Heat-transfer distributions for biconics at incidence in hypersonic-hypervelocity real-gas flows p 319 A85-25478
Laminar heat-transfer distributions on biconics at incidence in hypersonic-hypervelocity flows
[NASA-TP-2213] p 293 N85-16085

LAMINAR WAKES
Theoretical study of blockage effect of wind-tunnel wall on wake of two-dimensional flat plate normal to plane wall p 272 A85-19402
Experimental investigation of blockage effect of upper wall of wind-tunnel of wake of two-dimensional flat plate normal to plane boundary p 272 A85-19403

LAMINATES
An equivalent strength method for optimum design of composite laminates p 51 A85-12362
Aeroelastic stability and vibration of layered plates and cylindrical shells p 288 A85-20472
Vibration tailoring of advanced composite lifting surfaces p 290 A85-21846
Effects of moisture on high performance laminates p 435 A85-29929
The laminated epoxy French glider Pegasus p 520 A85-33241
Properties of glass and carbon fiber fabrics used in helicopter rotors
[MBB-UD-424-84-OE] p 541 A85-35254
Explicit formulation for a high precision triangular laminated anisotropic thin plate finite element p 696 A85-39170
Fracture behavior of glass-cloth/polyester composite laminate at low temperature p 688 A85-39228
Comparison of predictions and experimental results on notches and bolt-loaded drilled holes in CFRP laminates
[DGLR PAPER 84-141] p 788 A85-40277
Hygrothermally curvature stable laminates with tension-torsion coupling p 787 A85-43224
The weight reduction potential of advanced composites
[SAWE PAPER 1579] p 901 A85-49905
Flight simulation fatigue crack propagation in metal/carbon-epoxy laminates
[NLR-TR-83006-U] p 54 N85-10416
Energy efficient engine. Volume 2. Appendix A: Component development and integration program
[NASA-CR-173085] p 34 N85-10991
Composite repair of aircraft structures p 285 N85-17059
Aerostructure nondestructive evaluation by thermal field detection. Phase 2: Technique refinement and quantitative determination of flaw detection capabilities
[AD-A149622] p 417 N85-21155
Impact dynamics research on composite transport structures
[NASA-TM-86391] p 797 N85-30367

LAND ICE
Ultrashort-wave radar subsurface sounding of sea ice and earth covers p 374 A85-25594

LAND MANAGEMENT
Landscape management on airports for reduction of bird populations
[AD-P004194] p 428 N85-19960
Inexpensive multipurpose landscaping p 428 N85-19961

LAND USE
Control of mammals at airports
[AD-P004192] p 404 N85-19957
A study of the methods for evaluating the noise impact of a proposed airport on a community p 609 N85-25957

LANDFILLS
FAA policy regarding solid waste disposal facilities
[AD-P004196] p 428 N85-19963
Successful control of gulls and other birds at a sanitary landfill
[AD-P004198] p 453 N85-19965
Effectiveness of an overhead wire barrier in deterring gulls from feeding at a sanitary landfill
[AD-P004199] p 453 N85-19966
Effectiveness of an overhead wire barrier system in reducing gull use at the BFI Jedburg sanitary landfill, Berkeley and Dorchester counties, South Carolina
[AD-P004200] p 454 N85-19967

Evaluation of effectiveness of bird scaring operations at a sanitary landfill site near CFB Trenton, Ontario, Canada
[AD-P004201] p 454 N85-19968

**LANDING**

Time scheduling of a mix of 4D equipped and unequipped aircraft p 483 A85-33278
Wind tunnel results of advanced high speed propellers in the takeoff, climb, and landing operating regimes
[AIAA PAPER 85-1259] p 817 A85-47025
Wind tunnel results of advanced high speed propellers in the takeoff, climb and landing operating regimes
[NASA-TM-87054] p 740 N85-29925
Ground-based and in-flight simulator studies of flight characteristics of a twin-fuselage passenger transport airplane during approach and landing
[NASA-TP-2451] p 895 N85-34144

**LANDING AIDS**

Certification of a holographic head-up display system for low visibility landings
[AIAA PAPER 84-2689] p 165 A85-17868
Glideslope descent-rate cuing to aid carrier landings
p 409 A85-29124
The design, development, and flight testing of a modern-control-designed autoland system
p 584 A85-35981
Radio navigation and landing devices for IFR navigation with helicopters p 748 A85-40243
Ames develops remote site landing aids
p 748 A85-40918
A TACAN-based approach and landing aid
p 821 A85-43564
Development and flight test of a helicopter, X-band, portable precision landing system concept
[NASA-TM-86710] p 586 N85-26721

**LANDING GEAR**

Determination of the axis and the angle of rotation for a retractable landing gear p 19 A85-12357
Preliminary aircraft design and the landing gear turnover angle criterion
[AIAA PAPER 84-2449] p 98 A85-13539
Computer-aided kinematic and dynamic analysis of the landing-gear mechanisms of aircraft p 492 A85-31471
Determination of the optimum lubricant change period for the joints of the landing gear of aircraft
p 695 A85-38600
Pilot production of superplastically formed/diffusion bonded T-38 main landing gear doors
[AIAA PAPER 94-0933] p 616 A85-39214
Heat resistant alloys for jet engines and high strength steels for landing gears p 784 A85-41004
Air force landing gear repair - Ogden Air Logistics Center Industrial Products and Landing Gear Division
[AD-P004001] p 71 N85-11962
Determination of parameters of cupped aircraft landing ski p 162 N85-14956
Testing solution for IL-76 braking system problem
p 256 N85-16766
A literature survey of ground load statistics for landing gear fatigue design purposes
[FFA-TN-1984-39] p 344 N85-18054
Deflection model of a CT4-A undercarriage
[AD-A149778] p 417 N85-21156
Safety recommendation(s), A-84-65
[REPT-3906] p 484 N85-23743
Selection of effective arrangement of heavy undercarriage systems for use with concrete runways
p 503 N85-24158
Active control landing gear for ground loads alleviation
p 590 N85-26749
Active control landing gear for ground load alleviation
p 679 N85-27902

**LANDING LOADS**

Aeronautical roadways - Publication of admissible loads: The new ACN/PCN method p 176 A85-18871
Aeronautical roadways - The French method of evaluating the loadbearing capability of aeronautical roadways p 176 A85-18872
Optimization of airplane wing structures under landing loads p 252 A85-22005
Development of a preliminary ALRS stabilized material pavement analysis system (SPAS)
[AD-A147116] p 277 N85-15760
Learjet Model 55 wing analysis with landing loads
p 604 N85-25883
Active control landing gear for ground load alleviation
p 679 N85-27902

**LANDING MODULES**

Descent vehicles --- Russian book
p 899 A85-49435

**LANDING RADAR**

Investigation of imaging and flight guidance concepts for rotorcraft zero visibility approach and landing
[NASA-CR-166571] p 644 N85-27843

**LANDING SIMULATION**

Model problem concerning the control of the lateral motion of an aircraft during landing p 35 A85-10451
Visual simulation takes flight — Computer-generated imagery for improving realism of aircraft landing
p 116 A85-15581
Certification of a holographic head-up display system for low visibility landings
[AIAA PAPER 84-2689] p 165 A85-17868
Application of frequency domain handling qualities criteria to the longitudinal landing task
[AIAA PAPER 85-1848] p 842 A85-45877
Reducing landing dispersions through flight control improvements on a turboprop-powered transport aircraft (The Lockheed High Technology Test Bed)
[AIAA PAPER 85-1850] p 842 A85-45879
Simulation of time-control procedures for the advanced air traffic control system p 878 A85-47686
Realistic localizer courses for aircraft instrument landing simulators
[NASA-CR-172333] p 105 N85-12885

**LANDING SITES**

Landing path requirements for instrumental air traffic at regional airports and landing strips p 780 A85-41331
Structural design guidelines for heliports
[FAA-PM-84-23] p 39 N85-11010

**LANDING SPEED**

Glideslope descent-rate cuing to aid carrier landings
p 409 A85-29124

**LANGUAGE PROGRAMMING**

Atlas avionics automatic resource allocation - A statement and solution of the problem
p 456 A85-26832

**LAP JOINTS**

Design of an adhesive lap joint p 444 A85-29142
Effect of penetrant on fatigue of aluminum alloy lap joints
[NLR-TR-82104-U] p 53 N85-10373

**LAPLACE EQUATION**

Applications of the conformal mapping method to the solution of mechanical vibrations problems
p 528 N85-23103

**LAPLACE TRANSFORMATION**

Fitting aerodynamic forces in the Laplace domain: An application of a nonlinear nongradient technique to multilevel constrained optimization
[NASA-TM-86317] p 12 N85-10917

**LARGE SCALE INTEGRATION**

An analog CMOS autopilot p 583 A85-34096
The impact of VLSI on guidance and control system design p 595 N85-26654

**LARGE SPACE STRUCTURES**

Research and technology highlights of the Lewis Research Center
[NASA-TM-86899] p 309 N85-17928
Development concerns for satellite-based air traffic control surveillance systems p 489 N85-23816
On-orbit systems identification of flexible spacecraft Technol., 1984, Pt. 2 p 465-481 p 518 N85-23841
Structures and Dynamics Division research and technology plans for FY 1985 and accomplishments for FY 1984
[NASA-TM-86417] p 605 N85-25895

**LASER ANEMOMETERS**

Laser anemometry - Beyond laboratory techniques
p 369 A85-26019
Investigation of flow phenomena in a transonic fan rotor using laser anemometry
[ASME PAPER 84-GT-199] p 475 A85-32963
Measurement and prediction of model-rotor flow fields
[AIAA PAPER 85-1558] p 710 A85-40683
Juncture flow measurements using laser velocimetry
[AIAA PAPER 85-1612] p 719 A85-40804
Computation of noise radiation from a free jet perpendicular to its axis via laser anemometry measurements
[ESA-TT-870] p 378 N85-18669
Determination of the drag of free flying particles in supersonic flow with a pulsed laser p 400 N85-21129
Application of laser anemometry to jets in combustion chambers
[ISL-CO-210/83] p 531 N85-24253
Measurements in the flow field of a cylinder with a laser transit anemometer and a drag rake in the Langley 0.3 m transonic cryogenic tunnel
[NASA-TM-86399] p 531 N85-24270

**LASER APPLICATIONS**

Laser Imaging Radar Sensor (LIRS)
p 334 A85-22649
Portable automatic eye-safe laser and FLIR test set
p 440 A85-26810
Applications of a photomultiplier to visualization of aerodynamic flows by laser tomography
[ONERA, TP NO. 1985-11] p 442 A85-27890
Development of a microprocessor-controlled laser system for automated precision balancing
p 443 A85-28828
A proposed method for remote thermometry in turbine engines
[AIAA PAPER 85-1468] p 792 A85-41425
Visualization of the vortex flow over delta and double-delta wings p 867 A85-47149
Laser paint removal
[AD-P004009] p 127 N85-11989
Theoretical and experimental analyses of laser altimeters for barometric measurements over the ocean
p 298 N85-17351
NASA three-laser airborne differential absorption lidar system electronics
[NASA-CR-174293] p 298 N85-17353
The use of lasers in wide-angle visual systems
[AD-P004322] p 370 N85-17976
Laser clock
[AD-D011513] p 450 N85-21634
Optical system for measuring shadowgraph data
[AD-D011642] p 705 N85-28784

**LASER CUTTING**

Laser drilling of aeroengine components
p 531 N85-24290

**LASER DAMAGE**

A methodology for analyzing laser induced structural damage
[AIAA PAPER 84-2521] p 122 A85-13584

**LASER DOPPLER VELOCIMETERS**

Examining the validity of a combustor flow model with LDV
[AIAA PAPER 85-0055] p 209 A85-19487
Measurements of separating boundary layer and wake of an airfoil using laser Doppler velocimetry
[AIAA PAPER 85-0181] p 214 A85-19572
Laser-three-slice (L3S) velocimeter and applications in aerodynamics flow field measurements
p 368 A85-25224
Optical interferometry in fluid dynamics research
p 599 A85-35203
LDA measurements for leading edge vortex core of a strake-wing p 550 A85-35774
Measurements of flow field within an axial flow fan rotor using a Laser Two Focus velocimeter
p 727 A85-41809
Internal combustion engine combustion chamber process studies at NASA Lewis Research Center
p 855 A85-45856
A study of laminar separation bubble in the concave region of an airfoil using laser velocimetry
p 868 A85-48520
Laser velocimeter measurements of the flow fields around single- and counter-rotation propeller models
[SAE PAPER 850870] p 873 A85-50105
Hot section laser anemometry p 30 N85-10962
Laser anemometer study of separated flow on wing profiles
[ISL-CO-214/83] p 88 N85-12872
The boundary layer on compressor cascade blades
[NASA-CR-174369] p 372 N85-18292
La Recherche Aerospatiale Bimonthly Bulletin, Number 1984-4, 221/July-August
[ESA-TT-884] p 543 N85-26637
A comparison of laser Doppler anemometry and probe measurements within the boundary layer of an airfoil at subsonic flow
[ISL-CO-219/84] p 875 N85-34127
Study of boundary layer separation on a supercritical profile with a spoiler by means of a laser Doppler velocimeter
[ISL-CO-225/84] p 875 N85-34128

**LASER DRILLING**

Laser drilling of aeroengine components
p 531 N85-24290

**LASER GYROSCOPES**

Marriage of inertial-reference and air-data systems now assured p 488 A85-32486
Autocalibration of a laser gyro strapdown inertial reference/navigation system p 642 A85-37808
The ARINC 704 ring laser gyro inertial Reference System p 643 A85-38528
Helicopter flight test of a ring laser gyro Attitude and Heading Reference System p 643 A85-38529
Redundancy management in strapdown navigation systems p 644 A85-38530
Sfena backs laser gyros p 853 A85-44749
Fast reaction and high reliability of strapdown navigation systems using ring laser gyros p 822 A85-45020
Flight testing of Litton laser gyro strapdown system LTN-90 for general aviation
[DFVLR-MITT-84-16] p 245 N85-15709
Autofocus motion compensation for synthetic aperture radar and its compatibility with strapdown inertial navigation sensors on highly maneuverable aircraft
[AD-A151940] p 569 N85-26693

**LASER INTERFEROMETRY**
In situ aircraft inspection by pulsed laser holography p 1 A85-10554
A new method for determining threshold values of creep crack growth p 50 A85-11669
Application of laser interferometry to density measurements in free jets p 206 A85-19406
Turbulence measurement interferometer apparatus [AD-D011377] p 295 N85-16156
Practical aspects of laser holographic interferometry in wind tunnels [NASA-TM-86788] p 911 N85-34378

**LASER OUTPUTS**
Extracts from the test plan for in-flight evaluation of the NT-33A peripheral vision display p 23 N85-10055
Laser speckle technique for burner liner strain measurements p 29 N85-10960
Laser paint removal [AD-P004009] p 127 N85-11989
Storage stability of jet fuels [AD-A146360] p 180 N85-14843

**LASER PUMPING**
Some schemes for introducing an electron beam into a dense gas — for laser pumping p 366 A85-24055

**LASER TARGETS**
Autofocus motion compensation for synthetic aperture radar and its compatibility with strapdown inertial navigation sensors on highly maneuverable aircraft [AD-A151940] p 569 N85-26693

**LASER WELDING**
Laser drilling of aeroengine components p 531 N85-24290

**LASER WINDOWS**
Subsonic multiple-jet aerodynamic window p 683 A85-37216

**LASERS**
Hot section laser anemometry p 30 N85-10982
Laser anemometer optimization p 30 N85-10983
Evaluation of laser profile and deflection measuring system [FAA-PM-84-24] p 55 N85-11341
Laser paint removal [AD-P004009] p 127 N85-11989
China report: Science and technology [JPRS-CST-84-042] p 138 N85-14789

**LATERAL CONTROL**
Model problem concerning the control of the lateral motion of an aircraft during landing p 35 A85-10451
A multiloop robust controller design study using singular value gradients p 703 A85-39564
Investigation of limb-sidestick dynamic interaction with roll control [AIAA PAPER 85-1853] p 843 A85-45882
Preliminary airworthiness evaluation of the Rutan Aircraft Factory (RAF), Inc. LONG-EZ airplane with external sight [AD-A145381] p 22 N85-10937
The lateral-directional characteristics of a 74-degree Delta wing employing gothic planform vortex flaps [NASA-CR-3848] p 82 N85-12009
Flight tests with a new helicopter Force Feel System (FFS) p 257 N85-16818
Leading edge flap system for aircraft control augmentation [NASA-CASE-LAR-12787-2] p 424 N85-19985
Relative control effectiveness technique with application to airplane control coordination [NASA-TP-2416] p 501 N85-23753

**LATERAL OSCILLATION**
Clearance flow-generated transverse forces at the rotors of thermal turbomachines [NASA-TM-77292] p 296 N85-16180

**LATERAL STABILITY**
Theory of wing rock [AIAA PAPER 85-0199] p 262 A85-19583
Cl Beta of unswept flat wings in sideslip. II p 623 A85-38371
Theory of wing rock p 895 A85-49139
Aileron effectiveness for a subsonic transport model with a high-aspect-ratio supercritical wing [NASA-TM-85674] p 236 N85-15695
Operational and developmental experience with the F/A-18A digital flight control system p 589 N85-26742
Experimental and theoretical determination of the wing-induced lateral wind on the tail surfaces in oscillating rolling motion. Part 2: Theoretical investigations for calculation of the lateral wind [IFD-1/84-PT-2] p 654 N85-28840

**LATTICES (MATHEMATICS)**
A vortex-lattice method for general, unsteady aerodynamics p 144 A85-18511
Nonplanar doublet lattices — for lifting surfaces p 385 A85-26765
Propeller aerodynamic performance by vortex-lattice method p 731 A85-42927

Comparison of analytical and experimental steadyand unsteady-pressure distributions at Mach number 0.78 for a high-aspect-ratio supercritical wing model with oscillating control surfaces [NASA-TM-84583] p 235 N85-15687

**LAUNCHING**
Voice command weapons launching system [AD-D011378] p 293 N85-15940

**LAW (JURISPRUDENCE)**
Annals of air and space law. Volume 8 p 378 A85-23799
Recent developments in aviation case law p 378 A85-24709
SAR maritime missions p 139 N85-14813

**LAY-UP**
Improved resins for wet layup repair of advanced composite structure p 686 A85-37381

**LEAD (METAL)**
Trends of petroleum fuels [DE85-000116] p 522 N85-24029

**LEADING EDGE FLAPS**
Rotor blade flap-lag stability and response in forward flight in turbulent flows p 115 A85-14050
Leading edge flap system for aircraft control augmentation [NASA-CASE-LAR-12787-2] p 424 N85-19985
Investigation of the Vortex Tab [NASA-CR-172586] p 557 N85-25209
Simulator study of the stall departure characteristics of a light general aviation airplane with and without a wing-leading-edge modification [NASA-TM-86309] p 574 N85-25250
Application of an aerodynamic analysis method including attainable thrust estimates to low speed leading-edge flap design for supersonic cruise vehicles [NASA-CR-165843] p 739 N85-29918
Aerodynamic characteristics of a distinct wing-body configuration at Mach 6: Experiment, theory, and the hypersonic isolation principle [NASA-TP-2467] p 818 N85-33107

**LEADING EDGE SLATS**
Calculation of compressible flow about three-dimensional inlets with auxiliary inlets, slats and vanes by means of a panel method [AIAA PAPER 85-1196] p 719 A85-40817
Design of an airfoil leading edge slat using an inverse aerodynamic calculation method p 256 N85-16777
Effects of leading-edge devices on the low-speed aerodynamic characteristics of a highly-swept arrow-wing [NASA-CR-172531] p 476 N85-22385
Pressure distribution data from tests of 2.29 M (7.5 feet) span EET high-lift transport aircraft model in the Ames 12-foot pressure tunnel [NASA-TM-84517] p 709 N85-29912
Low-speed tests of a high-aspect-ratio, supercritical-wing transport model equipped with a high-lift flap system in the Langley 4- by 7-meter and Ames 12-foot pressure tunnels [NASA-TP-2097] p 742 N85-31010
Presentation of the acoustic and aerodynamic results of the Aladin 2 concept qualification testing [NASA-TM-77883] p 876 N85-35161

**LEADING EDGE SWEEP**
The influence of leading-edge load alleviation on supersonic wing design p 144 A85-18515

**LEADING EDGE THRUST**
Wing design with attainable leading-edge thrust considerations p 411 A85-26783

**LEADING EDGES**
Unsteady loading of leading-edges in unstable flows - An overview [AIAA PAPER 84-2306] p 4 A85-10867
Hypersonic large-deflection similitude for oscillating delta wings p 78 A85-14853
Dynamic edge effects during the aeroelastic vibration of plates p 124 A85-15248
Analysis of airfoil leading-edge separation bubbles [AIAA PAPER 83-0300] p 79 A85-15327
Roll up of strake leading/trailing-edge vortex sheets for double-delta wings p 144 A85-18519
A theory for the core of a three-dimensional leading-edge vortex [AIAA PAPER 85-0108] p 210 A85-19624
An attached flow design of a noninterfering leading edge extension to a thick delta wing [AIAA PAPER 85-0350] p 220 A85-19689
Progress in development of a Navier-Stokes solver for evaluation of iced airfoil performance [AIAA PAPER 85-0410] p 222 A85-19731
Analysis and testing of the Diamond One wing anti-icing system [AIAA PAPER 85-0414] p 286 A85-19735
A summary of NASA's research on the fluid ice protection system [AIAA PAPER 85-0467] p 241 A85-19768

The discussion of the position of conical shock of axisymmetric air intake of supersonic aircraft relative to the leading edge of the cowl lip p 316 A85-24096
Leading-edge separations and cross-flow shocks on delta wings p 317 A85-25126
Flow past V-wings with a break in the leading edge p 389 A85-28445
Discontinuous wing leading edge to enhance spin resistance p 424 A85-29255
On the effect of wing taper and sweep direction on leading edge transition p 545 A85-35000
Determination of forward edge eddies in delta wings p 547 A85-35260
A calculation of slender delta wing with leading-edge separation by Quasi-Vortex-Lattice method p 550 A85-35768
LDA measurements for leading edge vortex core of a strake-wing p 550 A85-35774
The study on the wing leading edge vortex breakdown p 551 A85-35791
Measurement of wing-leading-edge heating rates on wind tunnel models using the thin-film technique [AIAA PAPER 85-0972] p 661 A85-37822
Flow separation from the leading edge of an airfoil and the effect of acoustic perturbations on the separated flow p 694 A85-38510
Modelling vortex flowfields by supercomputers with super-size memory p 628 A85-39242
Evaluation of Euler and Navier-Stokes solutions for leading-edge and shock-induced separations [AIAA PAPER 85-1563] p 711 A85-40688
The entrainment effect of a leading-edge vortex [AIAA PAPER 85-1584] p 712 A85-40703
Vortex trajectories and breakdown on wing-canard configurations p 731 A85-42926
Computation of turbulent separated flows over wings p 737 A85-42991
Prediction of leading-edge vortex behaviour to supplement the suction analogy p 815 A85-44525
A numerical method for second order thin airfoil theory p 815 A85-44626
Determination of leading-edge vortex trajectories by schlieren photography p 904 A85-47150
Comparison of a computed transonic flow and interferometric measurements around the leading edge of a two dimensional aerofoil asymmetrically mounted in a wind tunnel p 866 A85-47164
Experimental results on edge-tone oscillations in high-speed subsonic jets p 918 A85-48527
On the abrupt turbulent reattachment downstream of leading-edge laminar separation p 872 A85-49698
A calculating method of the breakdown feature of the leading-edge separating vortex for slender delta wings p 873 A85-49707
Flight evaluation of an insect contamination protection system for laminar flow wings [SAE PAPER 850860] p 884 A85-50102
The structural dynamics of Electro-Impulse De-icing on the Lear Fan Kevlar Composite leading edge [SAE PAPER 850917] p 885 A85-50127
Prediction of aerodynamic characteristics of fighter wings at high angles of attack [AD-A145107] p 10 N85-10017
Force and moment measurements on a 74 deg delta wing with an apex flap [NASA-CR-166081] p 12 N85-10918
Hybrid laminar flow control study [NASA-CR-165930] p 21 N85-10933
A visual study of a delta wing in steady and unsteady motion [AD-P004158] p 324 N85-17943
Laminar separation bubble with transition: Prediction test with local interaction — airfoils [PNR-90231] p 328 N85-18008
A calculation of slender delta wing with leading-edge separation by quasi-vortex-lattice method p 400 N85-21423
Energy losses at leading edge of turbine blade during multirow jet cooling p 508 N85-22826
An exploratory study of apex fence flaps on a 74 deg delta wing [NASA-CR-172463] p 557 N85-25208
Flow past a flat plat with a vortex/sink combination [JIAA-TR-58] p 558 N85-25215
Some effects of sweep direction and strakes for wings with sharp leading edges [CA-8421] p 634 N85-27826
On the effect of wing taper and sweep direction on leading edge transition [CA-8435] p 634 N85-27827
A study of aerodynamic control in stalled flight leading-edge vortex formation analysis [AD-A153758] p 638 N85-28928
Lee-side flow over delta wings at supersonic speeds [NASA-TP-2430] p 739 N85-29921

A method for computing the core flow in three-dimensional leading-edge vortices
[NASA-TM-87489] p 741 N85-29832

DC-10 winglet flight evaluation
[NASA-CR-3704] p 760 N85-29949

**LEAKAGE**

Cantilevered stator vane tip leakage studies
[AIAA PAPER 85-1136] p 684 A85-39620

Theoretical study of airborne electromagnetic leakage
p 826 A85-45139

Detection of electromagnetic radiation leakage through small structural openings p 826 A85-45140

Analysis for leakage and rotordynamic coefficients of surface roughened tapered annular gas seals
p 188 N85-14135

Clearance flow-generated transverse forces at the rotors of thermal turbomachines
[NASA-TM-77292] p 295 N85-16180

A voice-actuated wind tunnel model leak checking system
[NASA-TM-86359] p 313 N85-17936

Theory versus experiment for the rotordynamic coefficients of annular gas seals. Part 1: Test facility and apparatus
[NASA-CR-174409] p 374 N85-19417

Interactions between F-111 fuselage fuel tank sealants. Part 2: Variation in performance properties of polysulfides after contact with polyester degradation products
[AD-A149777] p 438 N85-21368

**LEAR JET AIRCRAFT**

Lear Fan Model 2100 emergency Egress System
p 401 A85-28640

Aircraft accident report. Central Airlines flight 27, Hughes Charter Air, Gates Learjet model 25 (N51CA) Newark International Airport, Newark, New Jersey, March 30, 1983
[PB84-910411] p 14 N85-10924

Safety recommendation(s), A-84-93 through -95
[REPT-3983/33] p 484 N85-23746

Learjet Model 55 wing analysis with landing loads
p 604 N85-25883

**LEAST SQUARES METHOD**

A method for high order linear system reduction and nonlinear system simplification p 457 A85-27514

Time series approximation of unsteady aerodynamics including pole locations as free parameters
[AIAA PAPER 85-0663] p 481 A85-30350

Parametric estimates of propulsion system maintenance manhours
[AD-A147120] p 201 N85-15662

Efficiency of algorithms for gas-air channel diagnostics in gas turbine engines based on gas thermodynamic parameters p 508 N85-22823

**LEE WAVES**

The determination of lee circulation during the foehn wind p 915 N85-35554

**LEGAL LIABILITY**

Recent developments in aviation case law
p 378 A85-24709

Fire safety in transport category aircraft - Litigating a post-crash or in-flight aircraft fire p 378 A85-24710

Punitive damages in aviation products liability cases
p 461 A85-27394

Cargo claims - From the carrier's point of view
p 461 A85-27395

The liability of aircraft manufacturers and certification authorities in the United Kingdom p 462 A85-27397

A new proposal for the reform of commercial air crash litigation p 863 A85-44096

**LEVITATION**

The generation of rolling moments with the superconducting solenoid model
[NASA-CR-172520] p 360 N85-18068

**LIABILITIES**

Structural failure, product liability and technical insurance; Proceedings of the First International Conference, Technische Universitaet Wien, Vienna, Austria, September 26-29, 1983 p 181 A85-16251

Air traffic control and airport authorities - The U.K. viewpoint p 138 A85-18163

The division of tasks in modern air transport and its effect on the liability of the air carrier - The concept 'agents' in the so-called Warsaw Convention — German thesis
p 307 A85-19826

**LIFE (DURABILITY)**

Crack growth life-time prediction under aeronautical type loading
[ONERA, TP NO. 1984-113] p 125 A85-15833

A balanced approach to the establishment of structural component lives p 524 A85-31959

Radial tires undergo operational tests on military, civil aircraft p 498 A85-32800

Life prediction methodology for aircraft gas turbine engine disks
[AIAA PAPER 85-1141] p 792 A85-41416

Turbine Engine Hot Section Technology (HOST)
[NASA-TM-83022] p 28 N85-10951

Nonlinear structural and life analyses of a turbine blade p 29 N85-10954

Nonlinear structural and life analyses of a combustor liner p 29 N85-10955

Constitutive model development for isotropic materials
p 31 N85-10975

Life prediction and constitutive models for anisotropic materials p 31 N85-10976

Surface protection overview p 32 N85-10978

Effects of surface chemistry on hot corrosion life: Overview p 32 N85-10980

Monitoring engine thermal stresses
p 266 N85-15735

Accelerated Mission Endurance Testing (AMET)
p 266 N85-15736

Cumulative damage modeling of fatigue crack growth
p 267 N85-15741

Problems and possibilities for life extension in gas turbine components p 267 N85-15742

Engine cyclic durability by analysis and material testing p 267 N85-15744

Life prediction at high temperature under multiaxial loading p 267 N85-15745

Verification of life prediction through component testing p 292 N85-15748

View of future requirements for engine cyclic durability by analysis and testing p 267 N85-15751

Effective life cycle software support: A study in discipline and versatility p 302 N85-16746

Airbus fatigue tests p 416 N85-20186

A state of the art assessment of turboprop transmission technology and projected needs for the next generation
p 510 N85-23770

Fabrication of ceramic substrate-reinforced and free forms
[NASA-TM-86994] p 518 N85-23926

Effects of surface chemistry on hot corrosion life
[NASA-CR-174915] p 582 N85-26711

Fatigue life analysis of a turboprop reduction gearbox
[NASA-TM-87014] p 606 N85-27228

Corrosion in civil aircraft structures
[SNIAS-851-111-105] p 787 N85-31291

**LIFE CYCLE COSTS**

A cost-effective integrated diagnostics support system
p 439 A85-26797

JVX LCC reduction through front-end logistics
p 465 A85-31982

Fault Detection/Location System (FD/LS) - How much, how little and how to implement p 466 A85-31992

Supportability considerations for advanced engine development
[AIAA PAPER 85-1205] p 665 A85-39655

A comparison of various Life Cycle Cost models — in avionics systems acquisition p 863 A85-45150

Electronic Equipment Thermal Management
p 906 A85-49530

ITAD - A CAD system for environmental reliability design — Intregrated Thermal Avionic Design
p 918 A85-49531

Accelerated Mission Endurance Testing (AMET)
p 266 N85-15736

A practical example of reducing life cycle costs and increased availability p 296 N85-16736

Standard Attitude Heading Reference System (SAHRS) full scale development program p 246 N85-16804

Life cycle cost model for very high speed integrated circuits
[AD-A147798] p 297 N85-17296

Optimization of a ground coupled heat pump
[DE85-000273] p 374 N85-19380

Some aspects of how to design cost-effective flight control systems p 586 N85-26639

**LIFE RAFTS**

Air carrier overwater emergency equipment and procedures
[PB85-917006] p 820 N85-32105

**LIFE SCIENCES**

Research and technology
[NASA-TM-86862] p 539 N85-25166

**LIFE SUPPORT SYSTEMS**

ACES II R&D upgrade program p 330 A85-22757

A brief review of the performance of the Canadian aircrew life preservers over the last twenty years
p 330 A85-22760

U.S. Navy aircrew automated escape systems (AAES) and aircrew life support systems (ALSS) in-service usage data analysis program - A progress report and report of longer term plans p 331 A85-22767

Aeronautical systems technology needs: Escape, rescue and survival, test facilities and test equipment and training-simulation equipment
[AD-A145059] p 1 N85-10002

**LIFEBOATS**

Air carrier overwater emergency equipment and procedures
[PB85-917006] p 820 N85-32105

**LIFT**

Induced drag and lift of wing by the piecewise continuous kernel function method p 6 A85-11976

Lift hysteresis of an oscillating slender ellipse
p 80 A85-15332

The aerodynamic behavior of infinite swept wings - Another point of view p 144 A85-18517

Analysis of counter-rotating propeller performance
[AIAA PAPER 85-0005] p 262 A85-19453

Scaling laws for testing of high lift airfoils under heavy rainfall
[AIAA PAPER 85-0257] p 216 A85-19617

Application of continuous vorticity panels to general unsteady two-dimensional lifting flows
[AIAA PAPER 85-0282] p 217 A85-19633

Vortex induced lift on a flat plate with a curved forward-facing flap p 394 A85-30175

Icing flight research - Aerodynamic effects of ice and ice shape documentation with stereo photography
[AIAA PAPER 85-0468] p 402 A85-30192

Impact of fuselage incidence on the supersonic aerodynamics of two fighter configurations
p 473 A85-32590

The effect of aerodynamic lift on near circular satellite orbits p 595 A85-34859

Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurised low-speed wind tunnel p 592 A85-34999

Lift and drag of airfoils in nonuniform supersonic stream p 618 A85-37200

Dynamic ground effects on a two-dimensional flat plate p 628 A85-39226

Lift due to thickness for low aspect ratio wings in incompressible flow
[AIAA PAPER 85-1588] p 712 A85-40705

A discussion on lift and moment characteristics of aerofoils in incompressible potential flows
p 730 A85-42441

Studies of the flow field near an NACA 4412 aerofoil at nearly maximum lift p 736 A85-42978

Convergence characteristics of a vortex-lattice method for nonlinear configuration aerodynamics
p 816 A85-45835

Observations from varying the lift and drag inputs to a noise prediction method for supersonic helical tip speed propellers
[NASA-TM-83797] p 64 N85-10788

Lifting surface theory for a helicopter rotor in forward flight
[NASA-TM-86315] p 12 N85-10916

A comparison of Wortmann airfoil computer-generated lift and drag polars with flight and wind tunnel results
[NASA-TM-86035] p 87 N85-12868

A study of lift characteristics of an upper surface blown jetwing with a rectangular nozzle p 145 N85-13767

Improvement of Aerodynamic Performance Through Boundary Layer Control and High Lift Systems
[AGARD-CP-365] p 204 N85-16771

Recent progress of development and understanding of high lift systems p 236 N85-16772

Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurized low-speed wind tunnel p 236 N85-16773

Detailed study of the flow around a multi-element airfoil. Comparison with calculations p 236 N85-16775

Turbulent bubbles behind airfoils and wings at high angle of attack p 296 N85-16779

Aerodynamic issues in the design of high-lift systems for transport aircraft p 256 N85-16780

An update of the Canada/USA augmentor-wing project p 257 N85-16781

Preliminary results from the unsteady airfoil model USTAR2
[AD-P004171] p 325 N85-17956

Icing flight research: Aerodynamic effects of ice and ice shape documentation with stereo photography
[NASA-TM-86906] p 343 N85-18049

Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurised low-speed wind tunnel
[RAE-TM-AERO-2006] p 477 N85-22372

Estimating unsteady aerodynamic forces on a cascade in a three-dimensional turbulence field
[NASA-TM-86701] p 478 N85-23704

A preliminary investigation of the dynamic force-calibration of a magnetic suspension and balance system
[NASA-CR-172580] p 517 N85-23808

Flow past a flat plat with a vortex/sink combination
[JIAA-TR-58] p 558 N85-25215

High specific power aircraft turn maneuvers: Tradeoff of time-to-turn versus change in specific energy
[AD-A151701] p 575 N85-25257
Aerodynamic performance of a wing in ground effect using the PANAIR program
[AD-A153303] p 635 N85-27832
Method of calculating separation flow of subsonic gas stream around wings p 636 N85-28161
A method for computing the core flow in three-dimensional leading-edge vortices
[NASA-TM-87489] p 741 N85-29932
Application of two-dimensional unsteady aerodynamic to a free-tip rotor response analysis
[NASA-CR-177348] p 741 N85-29933
Circulation control lift generation experiment: Hardware development p 856 N85-33535

**LIFT AUGMENTATION**
Control of flow separation by sound
[AIAA PAPER 84-2298] p 60 A85-10851
Optimization of the parameters of transport aircraft with a lift-generating fuselage p 155 A85-17069
Study of winglets applied to biplanes
[AIAA PAPER 85-0279] p 217 A85-19631
Trapping of free vortex by airfoils with surface suction
[AIAA PAPER 85-0446] p 224 A85-19755
Approach and landing technologies for STOL fighter configurations p 414 A85-29254
The effect of a small blowing on vortex-breakdown of a swirling flow p 383 A85-29964
Circulation control technology applied to propulsive high lift systems
[SAE PAPER 841497] p 627 A85-39205
An investigation of lift augmentation of tandem cascades
[ASME PAPER 84-WA/FM-3] p 633 A85-39875
Manufacturing report of an augmented lift, variable deflection half wing
[ONERA-RT-25/1736-AY-108-A] p 138 N85-13766
Presentation of the acoustic and aerodynamic results of the Aladin 2 concept qualification testing
[NASA-TM-77883] p 876 N85-35161

**LIFT DEVICES**
Nonplaner doublet lattices — for lifting surfaces
p 385 A85-26765
Aerodynamic characteristics of a circulation control elliptical airfoil with two blown jets p 816 A85-45834
Incompressible lifting-surface aerodynamics for a rotor-stator combination
[NASA-TM-83767] p 86 N85-12039
Recent progress of development and understanding of high lift systems p 236 N85-16772
Three-dimensional unsteady lifting surface theory in the subsonic range
[NASA-TM-77812] p 397 N85-21111
Wind tunnel wall interference
[AD-A151212] p 593 N85-25273
A computational method for wings of arbitrary planform
[AD-A153788] p 638 N85-28929
Unsteady transonic flow calculations for interfering lifting surface configurations
[NASA-TM-86432] p 741 N85-29931

**LIFT DRAG RATIO**
The aerodynamic effect of surface wetting characteristics on a laminar flow airfoil in simulated heavy rain
[AIAA PAPER 85-0260] p 247 A85-19819
Forward sweep - The pros and cons
p 250 A85-20146
Flow past V-wings with a break in the leading edge
p 389 A85-28445
Flight-test evaluation of engine power effects on lift and drag p 497 A85-32586
Lift and thrust of a linear synchronous engine with a solid-conductor stator winding p 658 A85-37550
Effect of maximum lift to drag ratio on optimal aeroassisted plane change
[AIAA PAPER 85-1817] p 849 A85-43863
An experimental study of the transonic equivalence rule with lift, part 2
[AR-LR-614-PT-2] p 8 N85-10004
Over the wing propeller
[NASA-CASE-LAR-13134-1] p 415 N85-19980
Aerodynamic performance of a wing in ground effect using the PANAIR program
[AD-A153303] p 635 N85-27832
Study of an efficient long-range Mach 2.7 supersonic transport configuration concept
[NASA-TM-86414] p 829 N85-32110
The influence of helicopter tail shape on drag: An aerodynamic study using a low speed wind tunnel
[AD-A156304] p 876 N85-35174

**LIFTING BODIES**
Aeroacoustic interaction of a distributed vortex with a lifting Joukowski airfoil
[AIAA PAPER 84-2287] p 59 A85-10843
Simplified transonic integral equations for lifting profiles and wings p 6 A85-12034
Design parameters for flow energizers — highly swept strakes mounted above lifting surfaces
[AIAA PAPER 84-2499] p 74 A85-13570
Method of fundamental solutions - A novel theory of lifting surface in a subsonic flow p 79 A85-15077
Quasistatic analysis of composite lifting surfaces in incompressible gas flow p 142 A85-17061
Isochrones for maximum endurance horizontal gliding flight p 158 A85-18348
Compressible lifting surface theory for propeller performance calculation p 143 A85-18508
Comparative study of various quadratures for subsonic lifting surface chordwise integrals p 205 A85-19404
Aerodynamic prediction of elliptically-shaped missile configurations using component build-up methodology
[AIAA PAPER 85-0271] p 216 A85-19624
Finite element solutions of Euler equations for lifting airfoils
[AIAA PAPER 85-0294] p 230 A85-20884
Vibration tailoring of advanced composite lifting surfaces p 290 A85-21846
Extremum problem concerning a wing with a maximum gradient of lift force p 234 A85-22370
Finite difference computations of flow about supersonic lifting bodies p 319 A85-25479
Lifting surface approach of oscillating wings in weak shear flow p 394 A85-30201
Exact solution for wind tunnel interference using the panel method p 591 A85-34734
Design parameters for flow energizers — of general aviation aircraft p 547 A85-35582
Nonequilibrium supersonic flows past oscillating 2-D lifting surfaces and thin elastic bodies
p 618 A85-37197
Software-engineering elements in the problem of the optimal design of lift systems for flight vehicles
p 646 A85-37323
A study on the method for solving the equation of subsonic oscillatory lifting-surface theory. IV - Computer program SOLST 1 p 622 A85-38355
Unsteady transonic flow calculations for interfering lifting surface configurations
[AIAA PAPER 85-1711] p 719 A85-40783
An improved kernel function computation in subsonic unsteady lifting surface theory p 726 A85-41739
Prediction of leading-edge vortex behaviour to supplement the suction analogy p 815 A85-44525
Lifting surface theory for a helicopter rotor in forward flight
[NASA-TM-86315] p 12 N85-10916
An investigation of vortex-induced aerodynamic characteristics of supersonic cruise configurations
[NASA-CR-174299] p 234 N85-15690
Comparison of analytical and experimental steadyand unsteady-pressure distributions at Mach number 0.78 for a high-aspect-ratio supercritical wing model with oscillating control surfaces
[NASA-TM-84589] p 235 N85-15697
Simultaneous flow visualization and unsteady lift measurement on an oscillating lifting surface
[AD-P004157] p 323 N85-17942
Genesis of unsteady separation
[AD-P004173] p 370 N85-17958
Unsteady transonic flow calculations for interfering lifting surface configurations
[NASA-TM-86432] p 741 N85-29931

**LIFTING REENTRY VEHICLES**
The application of some lifting-body reentry concepts to missile design
[AIAA PAPER 85-0497] p 279 A85-19791
Minimax optimal control and its application to the reentry of a space glider p 899 A85-47306
Aerodynamic characteristics of some lifting reentry concepts applicable to transatmospheric vehicle design studies
[NASA-TM-86331] p 138 N85-14787
The application of some lifting-body reentry concepts to missile design
[NASA-TM-86394] p 476 N85-22366

**LIFTING ROTORS**
Study of the unsteady transonic flow on rotor blade with different tip shapes
[ONERA, TP NO. 1984-82] p 7 A85-12811
Lifting rotor analysis at subsonic and transonic flow
p 75 A85-13689
Computerized aerodynamic design of a transonically 'quiet' blade p 473 A85-31989
Stability and control of the twin lift helicopter system
p 513 A85-32846
Quantification of downwash and ground vortex of a lifting rotor model by flow visualization technique
p 867 A85-47134
Basic consideration of the lifting capability of stoppable rotors
[AD-A150850] p 502 N85-23758
A new main rotor hub for the AS 332 Super Puma
[SNIAS-851-210-102] p 761 N85-31047

**LIGHT AIRCRAFT**
A new digital X-band SLAR p 46 A85-10283
Theoretical design of acoustic treatment for cabin noise control of a light aircraft
[AIAA PAPER 84-2328] p 16 A85-10872
Light Helicopter Family (LHX) - The U.S. Army's future light rotorcraft fleet p 71 A85-15591
A terrain data/digital map system for LHX — Light Helicopter
[AIAA PAPER 84-2723] p 152 A85-17885
Glasswind Gemini - The next step — in homebuilt general aviation aircraft design
[SAWE PAPER 1528] p 159 A85-18813
Experimental methods for wind-tunnel flight-mechanics investigations using dynamically similar aircraft models — German thesis p 249 A85-19836
Analysis of fatal accidents involving light aircraft weighing up to two tons and their causes in the context of flight medicine — German thesis p 241 A85-19846
Technology gains expected to yield LHX size, weight, cost reductions p 249 A85-20058
An engine for a light helicopter p 353 A85-26024
The evolution of Shorts range of light transport aircraft
p 412 A85-27450
Man powered flight advances p 383 A85-28825
Theoretical design of acoustic treatment for noise control in a turboprop aircraft p 414 A85-29260
Advance technology impacts on rotorcraft weight
p 494 A85-31973
A 2400 kW lightweight helicopter transmission with split-torque gear trains
[ASME PAPER 84-DET-91] p 580 A85-33773
LHX - Not just another helicopter p 572 A85-35351
Porsche's new light-aircraft engine
p 581 A85-35354
The integration of a new concept in VTOL aircraft propulsion
[AIAA PAPER 85-1448] p 651 A85-39785
Starduster - A solar powered high altitude airplane
[AIAA PAPER 85-1449] p 651 A85-39786
Simple aircraft p 707 A85-40293
Coordination of different types of air traffic
p 707 A85-40294
Bush aviation - How effective are present regulations?
p 745 A85-41731
Flight investigation of cabin noise control treatments for a light turboprop aircraft
[SAE PAPEP 850876] p 885 A85-50109
Prop jet singles have arrived
[SAE PAPER 850882] p 890 A85-50112
Sport aircraft design trends - Shaping the future of general aviation
[SAE PAPER 850881] p 886 A85-50130
Crashworthiness of light aircraft fuselage structures: A numerical and experimental investigation
p 20 N85-10399
Preliminary airworthiness evaluation of the Rutan Aircraft Factory (RAF), Inc. LONG-EZ airplane with external sight
[AD-A145381] p 22 N85-10937
Low power laminar aircraft structures
p 73 N85-12857
Contribution of the study of light aircraft propeller noise
[ESA-TT-865] p 377 N85-18867
The design of sport and touring aircraft
[NASA-TM-77783] p 344 N85-18975
Development and operation of a measuring data acquisition system for use in light airplanes
p 912 N85-35556

**LIGHT AMPLIFIERS**
Applications of a photomultiplier to visualization of aerodynamic flows by laser tomography
[ONERA, TP NO. 1985-11] p 442 A85-27890

**LIGHT EMITTING DIODES**
LED multifunction keyboard engineering study
[AD-A145199] p 24 N85-10061

**LIGHT SCATTERING**
Storage stability of jet fuels
[AD-A146380] p 180 N85-14943
Investigation of light source and scattering medium related to vapor-screen flow visualization in a supersonic wind tunnel
[NASA-TM-86290] p 190 N85-15144

**LIGHT SOURCES**
An evaluation of flashtube signal characteristics
[AD-A149569] p 339 N85-18974

**LIGHT SPEED**
Navigation, the Sagnac effects, and the Michelson experiment p 337 A85-25516

**LIGHT TRANSMISSION**
Passive control effects on flow separation around a protuberance at high subsonic speed --- for optical propagation quality enhancement to and from airborne platforms
[AIAA PAPER 85-0351] p 220 A85-19690
The optics of aircraft shear flows --- laser beam propagation through atmospheric turbulence
[AIAA PAPER 85-0557] p 460 A85-27880

**LIGHTHILL GAS MODEL**
Aerodynamic characteristics of the Weis-Fogh mechanism p 623 A85-38370

**LIGHTHILL METHOD**
The role of excitation on modifying the sound sources
[AIAA PAPER 84-2317] p 61 A85-10865
Scaling laws for jet mixing noise in simulated flight and the prediction scheme associated
[AIAA PAPER 84-2360] p 63 A85-10894
Hypersonic flow of mixture around blunt body p 148 N85-14979

**LIGHTING EQUIPMENT**
1984 SAE aerospace handbook - Lighting p 156 A85-17246
Evaluation of arctic test of improved tritium radioluminescent lighting
[AD-A148215] p 278 N85-16884

**LIGHTNING**
Recent data from the airlines lightning strike reporting project
[AIAA PAPER 84-2406] p 89 A85-13513
Survey of lightning hazard and low altitude direct lightning strike program
[AIAA PAPER 84-2485] p 89 A85-13560
The hazard of lightning p 89 A85-15165
General aviation data bus update
[AIAA PAPER 84-2637] p 164 A85-17828
Atmospheric electricity hazards to aircraft operation
[AIAA PAPER 85-0013] p 247 A85-19457
Recent data from the airlines lightning strike reporting project p 482 A85-32591
Further observations of X-rays inside thunderstorms p 701 A85-37720
A study of the physical mechanisms and the perturbations created by the attachment of an arc to a conducting cylinder
[ONERA, TP NO. 1985-47] p 904 A85-47258
E and H fields measurements on the Transall C160 aircraft during lightning flashes
[ONERA, TP NO. 1985-48] p 878 A85-47259
Study of effects of lightning on aircraft systems stressed p 90 N85-12005
NASA thunderstorm overflight program: Atmospheric electricity research. An overview report on the optical lightning detection experiment for spring and summer 1983
[NASA-TM-86468] p 128 N85-12330
Spring program summary, 1983
[PB84-222223] p 192 N85-15330
A study of the effects of triggered lightning
[AD-A148296] p 300 N85-17494
Direct-strike lightning photographs, swept-flash attachment patterns, and flight conditions for storm hazards 1982
[NASA-TM-86347] p 454 N85-21877
USSR report: Transportation
[JPRS-UTR-84-017] p 542 N85-25196
Effects of lightning on aircraft studied at Sheremetyevo p 563 N85-25199
Lightning strikes on aircraft. The TRIP 82 experiment and 3-dimensional electromagnetic interferometry
[ONERA-RF-88/7154-PY] p 565 N85-26690
Lightning-safe carbon fiber composite for Airbus tail unit p 692 N85-29100
Comparison of the electromagnetic properties of lightning and EMP (Electromagnetic pulse): Results of recent lightning studies
[AD-A154325] p 800 N85-30560

**LIGHTNING SUPPRESSION**
Lightning simulation facilities in the United States and Europe
[AIAA PAPER 85-0093] p 273 A85-19515
The lightning threat to aerospace vehicles
[AIAA PAPER 85-0094] p 240 A85-19516
Protection of carbon-fiber reinforced artificial materials against damage by lightning
[DGLR PAPER 84-151] p 752 A85-40283

**LIMITER CIRCUITS**
An electronic limiter for aircraft engines
[SAE PAPER 850910] p 890 A85-50122

**LINE OF SIGHT**
Line-of-sight reconstruction for faster homing guidance p 153 A85-18326
Application of modern control to bank-to-turn guidance using digital simulation p 423 A85-28608
Pursit-evasion game analysis in a line of sight coordinate system p 803 A85-41339

**LINE OF SIGHT COMMUNICATION**
Feasibility of a UHF/TDM communications link for the worldwide airborne command post (WWABNCP) system p 823 A85-45133

**LINEAR ARRAYS**
On aircraft antennas and basic scattering studies
[AD-A146017] p 127 N85-12282

**LINEAR EQUATIONS**
Mass flux boundary conditions in linear theory p 73 A85-12726
On limits of applicability of linear models to dynamics of gas channels in aircraft engines p 355 N85-18219

**LINEAR FILTERS**
A robust and efficient technique for dealing with time-varying instrumental bias in linear filtering p 458 A85-29370
The application of the detection filter to aircraft control surface and actuator failure detection and isolation
[AIAA PAPER 85-1973] p 845 A85-45954

**LINEAR PROGRAMMING**
Operations research
[B8561897] p 704 N85-28712
Study of an efficient long-range Mach 2.7 supersonic transport configuration concept
[NASA-TM-86414] p 829 N85-32110

**LINEAR SYSTEMS**
Controllability and observability of linear time delay systems p 132 A85-15654
A problem concerning the incomplete-feedback control of linear Markovian systems with random parameters p 192 A85-17055
A method for high order linear system reduction and nonlinear system simplification p 457 A85-27514
Multistep terminal guidance of linear systems under conditions of parametric and constant perturbations p 534 A85-31453
Nonlinear state feedback control of uncertain linear systems and application to control of aircraft p 513 A85-33294
Time-domain stability robustness measures for linear regulators p 703 A85-39565
Identification of linear dynamic control plants by means of signal expansion on the basis of the Walsh function p 803 A85-42675
Robustness enhancement for LQG digital flight controller design p 840 A85-45048
Eigenstructure assignment and its application in design of flight control system p 860 A85-46822
Design of a digital ride quality augmentation system for commuter aircraft
[NASA-CR-172419] p 20 N85-10037

**LINEAR VIBRATION**
Contribution to the linear dynamic analysis of slender bodies in low and medium frequency ranges
[ONERA, TP NO. 1985-95] p 525 A85-32345

**LINEARITY**
Absolute stability of unsteady movement of axisymmetrical rotating flight vehicle p 477 N85-22793

**LINEARIZATION**
A parallel quasi-linearization algorithm for air vehicle trajectory optimization
[AIAA PAPER 85-0498] p 279 A85-19792
Development and validation of a general purpose linearization program for rigid aircraft models
[AIAA PAPER 85-1891] p 846 A85-45976
Development and validation of a general purpose linearization program for rigid aircraft models
[NASA-TM-86737] p 847 N85-32122

**LINES (GEOMETRY)**
A description of the Langley wireframe geometry standard (LaWGS) format
[NASA-TM-85767] p 499 N85-22380

**LININGS**
Advanced liner-cooling techniques for gas turbine combustors
[AIAA PAPER 85-1290] p 667 A85-39703
Nonlinear structural and life analyses of a combustor liner p 29 N85-10955
Burner liner thermal/structural load modelling p 30 N85-10970
Verification of structural analysis methods using the in-house liner cyclic rigs p 33 N85-10987
HOST liner cyclic facilities: Facility description p 33 N85-10988
Advanced liner-cooling techniques for gas turbine combustors
[NASA-TM-86952] p 397 N85-21115
Elevated temperature crack growth
[NASA-CR-174957] p 856 N85-33540
Development of advanced high-temperature heat flux sensors. Phase 2: Verification testing
[NASA-CR-174973] p 911 N85-35391

**LINKAGES**
Second sailplane project: The RP-2 p 129 N85-12977

Vibrations of rotors connected through couplings with backlash p 672 N85-28147

**LIQUID ATOMIZATION**
Transverse jet breakup and atomization with rapid vaporization along the trajectory p 444 A85-29092
Boron slurry fuel atomization evaluation
[AIAA PAPER 85-1184] p 689 A85-39645

**LIQUID CHROMATOGRAPHY**
A chromatographic method for determining the content of aromatic hydrocarbons in aviation gasolines p 434 A85-28035
Compound class quantitation of JP-5 jet fuels by high performance liquid chromatography-differential refractive index detection
[AD-A145754] p 120 N85-12185
Quantitative determination of compound classes in jet turbine fuels by high performance liquid Chromatography/Differential refractive index detection: Part 2
[AD-A149298] p 436 N85-20144

**LIQUID COOLING**
Aerodynamics of liquid-cooled aircraft engine installations
[SAE PAPER 850896] p 891 A85-50132

**LIQUID CRYSTALS**
alpha-Si addressed liquid crystal aircraft display
[AIAA PAPER 84-2659] p 165 A85-17846

**LIQUID FUELS**
Liquid-fueled ramjets
[ONERA, TP NO. 1984-112] p 111 A85-15832
Off-design point characteristics of the precooled gas turbine cycle with liquefied hydrogen as fuel p 289 A85-20884
Fuel effects on the TF30 engine (Alternate Test Procedure)
[ASME PAPER 84-JPGC-GT-1] p 349 A85-23191
Determination of liquid-fuel prevaporization and premixing in gas-turbine combustion chambers --- German thesis p 443 A85-28798
Boron slurry fuel atomization evaluation
[AIAA PAPER 85-1184] p 689 A85-39645
Pressure oscillations in liquid-fueled ramjet engines p 169 N85-13797
The influence of fuel quality upon flame-tube temperature and flame radiation in a model gas-turbine primary zone
[K233] p 508 N85-22396
The influence of fuel molecular composition upon flame-tube temperature and flame radiation in a model gas-turbine primary zone
[K234] p 520 N85-22646

**LIQUID HYDROGEN**
Off-design point characteristics of the precooled gas turbine cycle with liquefied hydrogen as fuel p 289 A85-20884

**LIQUID INJECTION**
Improvement of gas turbine engine performance by water injection into turbine cooling air p 370 N85-18209
Effect of water injection into air for turbine cooling on economy of operation of gas turbine engine with afterburning p 509 N85-22830

**LIQUID NITROGEN**
The AH-64A nitrogen inerting system
[AIAA PAPER 84-2480] p 108 A85-13557

**LIQUID OXYGEN**
Ultrasound instrumentation for the 7 inch Mach seven tunnel
[NASA-CR-174277] p 305 N85-16586

**LIQUID PROPELLANT ROCKET ENGINES**
Analytical prediction of the thermal state of flight vehicle engine chambers with internal film cooling under conditions of pulsed operation p 350 A85-23986

**LIQUID SLOSHING**
Measurements of despin and yawing moments produced by a viscous liquid p 423 A85-26447
A relation between liquid roll moment and liquid side moment p 423 A85-26449

**LIQUID-VAPOR EQUILIBRIUM**
Spontaneous vapor condensation in nonequilibrium supersonic monodisperse flow p 47 A85-10550

**LITHIUM ALLOYS**
Aluminum-lithium alloys for aircraft structure - An overview p 434 A85-27119
Aluminium-lithium based alloys for aerospace applications p 785 A85-41624

**LOAD DISTRIBUTION (FORCES)**
Load sharing in a planetary gear stage in the presence of gear errors and misalignment
[ASME PAPER 84-DET-54] p 580 A85-33768
Crack growth analysis in multiple load path structure p 693 A85-37186
Distributions of fatigue life and fatigue strength in notched specimens of a carbon 8-harness-satin laminate
[NAL-TR-809T] p 54 N85-10407

Evaluation of operational loads to verify structural design p 254 N85-15877

**LOAD TESTING MACHINES**

A test system for determining the strength of structural elements exposed to a high-temperature gas stream and vibrational loads p 426 A85-27768

**LOAD TESTS**

An experimental study on effect of overload on fatigue life p 51 A85-12364

Test loading of airfield pavements
p 426 A85-27721

The effect of mercury on the load-bearing capacity of the structural elements of aircraft p 435 A85-28994

Evaluation of a ten-foot diameter X-wing rotor
p 495 A85-31987

Crack growth analysis in multiple load path structure
p 693 A85-37186

Acoustic emission monitoring of flaw growth in a graphite-epoxy experimental wing segment
p 907 A85-48084

Durability calculation of wing panel element
p 503 N85-24159

Calibration loading of a strain-gauged diverless helicopter weapon recovery system
[AD-A151486] p 575 N85-25253

**LOADING MOMENTS**

A literature survey of ground load statistics for landing gear fatigue design purposes
[FFA-TN-1984-39] p 344 N85-18054

Two recent cases of marker load applications on cargo/fighter aircraft fatigue tests p 532 N85-24325

Generation of marker lines on fatigue fracture surfaces p 532 N85-24328

**LOADING OPERATIONS**

New performance requirements for MIL-T-25959 tiedown adjusters p 330 A85-22762

Analysis of KC-10 loading alternatives
[SAE PAPER 840701] p 332 A85-26313

Calibration loading of a strain-gauged diverless helicopter weapon recovery system
[AD-A151486] p 575 N85-25253

**LOADING RATE**

Development of a fatigue crack propagation model of Incoloy 901 p 280 A85-20758

An analogue method for crack propagation life prediction p 856 A85-46825

Modifications of flight-by-flight load sequences to provide for good fracture surface readability
[NLR-MP-84012-U] p 799 N85-31577

**LOADS (FORCES)**

Crack growth of lugs under spectrum loading
[AIAA PAPER 84-2451] p 122 A85-13540

Strength analysis of aircraft structures by the step method under conditions of physical nonlinearity
p 183 A85-17071

Determination of loads on a thin-walled structure from parameters of its stress-strain state p 492 A85-31461

Airloads on bluff bodies, with application to the rotor-induced downloads on tilt-rotor aircraft
p 544 A85-33469

Influence of fighter aircraft load spectrum variations on fatigue crack initiation and growth p 693 A85-37181

A program for computerized structural resizing of aircraft structure subject to strength and local panel buckling criteria under multiple loading p 693 A85-37187

Structural analysis p 30 N85-10969

Evaluation of laser profile and deflection measuring system
[FAA-PM-84-24] p 55 N85-11341

Extended aeroelastic analysis for helicopter rotors with prescribed hub motion and blade appended pendulum vibration absorbers
[NASA-CR-172455] p 85 N85-12038

Application of the ONERA model of dynamic stall
[NASA-TP-2399] p 87 N85-12862

Initial sailplane project: The RP-1
p 129 N85-12976

Preliminary investigation of labyrinth packing pressure drops at onset of swirl-induced rotor instability
p 187 N85-14132

Operational Loads Data
[AGARD-CP-375] p 201 N85-15664

Experiences obtained from service fatigue monitoring exercises p 292 N85-15672

US Army helicopter operational flight loads
p 254 N85-15675

Helicopter data acquisition in WHL
p 254 N85-15676

A theoretical view on the stress analysis of fully inflated parachute canopies
[AD-A148387] p 239 N85-16835

Detailed pressure distribution measurements obtained on several configurations of an aspect-ratio-7 variable twist wing
[NASA-TM-86308] p 314 N85-18950

Integrated Technology Rotor/Flight Research Rotor (ITR/FRR) concept definition
[NASA-CR-166443] p 345 N85-18978

Techniques to analyze vehicle coastdown data
[DE85-005159] p 390 N85-21127

Study for prediction of rotor/wake/fuselage interference, part 1
[NASA-CR-177340-VOL-1] p 466 N85-22346

Study for prediction of rotor/wake/fuselage interference. Part 2: Program users guide
[NASA-CR-177340-VOL-2] p 467 N85-22347

Advanced life analysis methods. Volume 4: Tabulated test data for attachment lugs
[AD-A151016] p 502 N85-23760

Case depth on flanks of gears for helicopter gearboxes p 528 N85-23780

A preliminary investigation of the dynamic force-calibration of a magnetic suspension and balance system
[NASA-CR-172580] p 517 N85-23808

Recent developments in the dynamics of advanced rotor systems
[NASA-TM-86669] p 531 N85-24320

Generation of marker lines on fatigue fracture surfaces p 532 N85-24328

Periodic loading sequences for the systematic marking of fatigue crack fracture surfaces p 532 N85-24329

Modifications of flight by flight load sequences to provide for good fracture surface readability p 532 N85-24330

Unsteady gas dynamics problems related to flight vehicles
[AD-A151187] p 558 N85-25216

Finite-difference computations of rotor loads
[NASA-TM-86682] p 560 N85-26669

Automatic flight control modes for the AFTI/F-111 mission adaptive wing aircraft p 591 N85-26756

B-52B/DTV (Drop Test Vehicle) flight test results: Drop test missions
[NASA-CR-171530] p 741 N85-29934

General Aviation Crashworthiness Project. Phase 2: Impact severity and potential injury prevention in general aviation accidents
[PB85-917002] p 747 N85-29938

Aircraft rotor blade with passive tuned tab
[NASA-CASE-ARC-11444-1] p 759 N85-29947

Estimation of dynamic rotor loads for the rotor systems research aircraft: Methodology development and validation
[NASA-CR-177362] p 760 N85-31045

**LOCKHEED AIRCRAFT**

Future Air Force tactical airlifter considerations
[AIAA PAPER 84-2504] p 100 A85-13574

Intercompany technology task forces promote cooperation at Lockheed p 381 A85-26847

Supportability engineering why, how, when, who
p 381 A85-26850

Designing an RPV - The Lockheed Aquila
p 411 A85-27367

Beta titanium on the SR-71 - Historical note I
p 851 A85-43652

Lockheed's High Tech Test Bed p 825 A85-44746

**LOCOMOTION**

Global optical metrics for self-motion perception
[AD-P004333] p 377 N85-17987

**LOFTING**

Semianalytic modeling of aerodynamic shapes
[NASA-TP-2413] p 398 N85-21120

**LOGIC CIRCUITS**

Deployment sequence mode selection system for aircraft ejection seat
[AD-D011464] p 334 N85-18968

**LOGIC DESIGN**

Gate array, standard cell, and fully custom - Building blocks for the digital avionics designer
[AIAA PAPER 84-2711] p 184 A85-17880

New concepts in collision avoidance logic
[AIAA PAPER 84-2737] p 153 A85-17890

**LOGIC PROGRAMMING**

TCAS 2 logic performance during phase one operational evaluation
[DOT/FAA/PM-84/20] p 154 N85-13793

**LOGISTICS**

Future robotics program at San Antonio ALC (Air Logistics Center)
[AD-P004011] p 127 N85-11991

Supply center processes
[AD-P004014] p 127 N85-11993

Logistics support costs for the B-1B aircraft can be reduced
[AD-A145846] p 72 N85-11996

Distribution and storage of aviation turbine fuel for military operations in northern Australia
[AD-A147180] p 283 N85-15921

A description of a logistically ideal aircraft
[AD-A148425] p 258 N85-16866

A preliminary analysis of C-12 aircraft usage by the Navy Air Logistics System
[AD-A151921] p 543 N85-26634

**LOGISTICS MANAGEMENT**

JVX LCC reduction through front-end logistics
p 465 A85-31982

Commission stacker - Incorporation in a total logistic concept — for Airbus production
[MBB-UT-38-84-OE] p 541 A85-35073

Dyna-METRIC - New capabilities — Dynamic Multi-Echelon Technique for Recoverable Item Control
p 859 A85-45148

Modeling aircraft combat damage repair
p 866 A85-49576

R&M analysis techniques for fault-tolerant systems
p 909 A85-49588

An update of the functional requirements of the Naval Aviation Logistics Command Management Information System (NALCOMIS)
[AD-A146565] p 198 N85-15532

Managing recoverable aircraft components in the PPB and related processes: Executive summary
[AD-A146806] p 308 N85-16667

Utilization of Increased Airlift Capability (UIAC) study
[AD-A148669] p 243 N85-16847

Managing recoverable aircraft components in the PPB (Planning, Programming and Budgeting) and related processes. Technical volume
[AD-A152014] p 542 N85-25169

**LONG DURATION SPACE FLIGHT**

Propellant options for long duration, high altitude unmanned aircraft
[AIAA PAPER 85-1326] p 689 A85-39727

**LONGERONS**

Advanced-composite joints and fittings for primary structural components p 290 A85-21385

Tensile and fracture toughness properties of Mirage III spars
[AR-003-019] p 605 N85-25899

Fatigue lives of specimens representing critical locations in Mirage 3 spars under Australian and Swiss test spectra
[ARL-STRUC-R-415] p 887 N85-35187

**LONGITUDINAL CONTROL**

Multi-input/multi-output controller design for longitudinal decoupled aircraft motion p 114 A85-13633

Pilot modeling and closed-loop analysis of flexible aircraft in the pitch tracking task p 172 A85-18334

Criteria for low-speed longitudinal handling qualities of transport aircraft with closed-loop flight control systems — Thesis p 423 A85-28477

Pitch-flap-lag instability of elastic modes of an articulated rotor blade p 496 A85-32003

Design of direct digital flight-mode control systems for high-performance aircraft with multiple actuator non-linearities p 840 A85-45051

Application of frequency domain handling qualities criteria to the longitudinal landing task
[AIAA PAPER 85-1848] p 842 A85-45877

Flying qualities in the time domain
[AIAA PAPER 85-1849] p 842 A85-45878

Application of a new multivariable model-following method to decoupled flight control p 846 A85-46339

Design of decoupled longitudinal flight control laws utilizing eigensystem assignment p 893 A85-47697

Design of a pitch orientation control system for aircraft control in stall region p 893 A85-47701

Flight tests with a new helicopter Force Feel System (FFS) p 257 N85-16818

A feasibility study of free-tip rotor application as a passive cyclic control device p 343 N85-18046

Remote pivot decoupler pylon: Wing/store suppression
[NASA-CASE-LAR-13173-1] p 416 N85-19981

Total energy-rate feedback for automatic glide-slope tracking during wind-shear penetration
[NASA-TP-2412] p 515 N85-23801

In-flight investigation of the influence of pitch damping and pitch control effectiveness on landing approach flying qualities of statically unstable transport aircraft
[DFVLR-FB-84-12] p 676 N85-27880

Transonic and supersonic wind tunnel tests on control effectiveness on schematic missile configurations
[FFA-TN-1983-20] p 743 N85-31020

Transonic and supersonic wind tunnel tests on control effectiveness on schematic missile configurations: Supplement
[FFA-TN-1983-20-SUPPL] p 743 N85-31021

Analysis of flexible aircraft longitudinal dynamics and handling qualities. Volume 1: Analysis methods
[NASA-CR-177943-VOL-1] p 896 N85-35202

Analysis of flexible aircraft longitudinal dynamics and handling qualities. Volume 2: Data
[NASA-CR-177943-VOL-2] p 896 N85-35203

**LONGITUDINAL STABILITY**
A longitudinal stability augmentation system for a tilt rotor aircraft
[AIAA PAPER 85-0072] p 268 A85-19498
An experimental determination of the longitudinal stability properties of the LTA 20-1 airship
[AIAA PAPER 85-0879] p 674 A85-38794
Discussions on the regular behavior of the longitudinal dynamic response of aircraft during variable sweep flights p 674 A85-38974
Singular perturbation theory of longitudinal dynamic stability and response of aircraft p 839 A85-44683
Approximate neutral point of a subsonic canard aircraft
[NASA-TM-86694] p 557 N85-25205
Static longitudinal stability and control characteristics of the Fokker F27 Friendship calculated by simple handbook methods
[VTH-LR-394] p 588 N85-26728
Realisation of relaxed static stability on a commercial transport p 679 N85-27899
Contributions on the subject of longitudinal movements of aircraft in wind shears
[NASA-TM-77837] p 702 N85-29432

**LOOP ANTENNAS**
Effect of counterpoise on VOR antenna radiation patterns p 566 A85-33999
Tactical HF communication for military helicopters using the NVIS mode p 297 N85-16807

**LOOPS**
Normal mode calculations for fuselage type intricate structures by regarding them as systems with superposed constraints p 500 N85-22817
Low-profile fastener
[AD-D011667] p 796 N85-30343

**LORAN C**
Evaluation of radionavigation systems
p 643 A85-37831
National Airspace System Plan: Facilities, equipment and associated development p 569 N85-26692

**LOSSES**
An improved computer model for prediction of axial gas turbine performance losses
[NASA-CR-174246] p 265 N85-15724
Current status of trailing edge loss calculation for a turbine blade
[PNR-90244] p 354 N85-18061

**LOUVERS**
Advanced Floatwall combustor liner technology eliminates TF30-P-100 transition duct fatigue cracking
[AIAA PAPER 85-1288] p 667 A85-39701
Pre-HOST high temperature crack propagation
p 29 N85-10956

**LOW ALTITUDE**
Survey of lightning hazard and low altitude direct lightning strike program
[AIAA PAPER 84-2485] p 89 A85-13560
Doppler effect and its influence on low-altitude CW altimeters p 106 A85-13971
Escape system operation through adaptive control
p 331 A85-22769
A calculation method of ground effects for the aircraft
p 549 A85-35762
Using a limited field of view simulator to instruct high speed, low altitude flying skills
[AD-P004309] p 358 N85-17963
Visual perceptual aspects of low level high speed flight and flight simulation
[AD-P004310] p 358 N85-17964
Low altitude high speed flight simulation using video disc technology
[AD-P004312] p 358 N85-17966
AVTS (Advanced Visual Technology System): A high fidelity visual simulator
[AD-P004338] p 359 N85-17992
Personnel protection concepts for advance escape system design p 334 N85-19658
Safety recommendation(s), A-84-82 through -84
[REPT-3957] p 469 N85-23748
The role of simulation p 684 N85-28919

**LOW ASPECT RATIO**
Study of controlled diffusion stator blading
[NASA-CR-167995] p 354 N85-18058

**LOW ASPECT RATIO WINGS**
Efficient algorithm for unsteady transonic aerodynamics of low-aspect-ratio wings p 385 A85-26756
Aerodynamics of swept wings of medium and small aspect ratios. I p 473 A85-32517
A numerical calculation of nonequilibrium flow past a wing in the approximation of a thin shock layer
p 544 A85-33593
Computational/experimental pressure distributions on a transonic, low-aspect-ratio wing p 628 A85-39210
Lift due to thickness for low aspect ratio wings in incompressible flow
[AIAA PAPER 85-1586] p 712 A85-40705
Computation of the tip vortex off a low-aspect-ratio wing p 730 A85-42352
The rolling vortex-damping of supersonic wing
p 872 A85-49705
Experimental data base for computers program assessment. Report of the Fluid Dynamics Panel Working Group 04: Addendum
[AGARD-AR-138-ADD] p 11 N85-10020

**LOW CARBON STEELS**
Explosive forming of low carboon steel sheet into a stepped disc shape p 694 A85-38169

**LOW COST**
Low cost demonstrators for maturing technologies — in military aircraft development
[AIAA PAPER 84-2472] p 99 A85-13554
Low cost GPS receiver signal processing
p 96 A85-14841
Low-cost demonstrators for maturing technologies — in military aircraft development p 627 A85-45842
Training effectiveness evaluation and utilization demonstration of a low cost cockpit procedures trainer
[AD-A145179] p 38 N85-10078
Navigation: Accounting for copy p 568 N85-26641

**LOW DENSITY FLOW**
Application of laser interferometry to density measurements in free jets p 206 A85-19406
Low density aerothermodynamics
[AIAA PAPER 85-0994] p 620 A85-37640

**LOW DENSITY MATERIALS**
Strengthening the study on the usability of aircraft materials p 42 A85-12354

**LOW DENSITY WIND TUNNELS**
Experimental investigation of heat transfer to bluff cylinders and cones in hypersonic rarefied gas flow
p 548 A85-35747

**LOW FREQUENCIES**
Mechanisms of transmission and control of low-frequency sound in aircraft interiors
[SAE PAPER 850879] p 885 A85-50111

**LOW GRAVITY MANUFACTURING**
The use of countergravity casting for producing compressor body castings of AK-7 alloy
p 441 A85-27717
Superalloy microstructural variations induced by gravity level during directional solidification p 900 A85-48274
Directional solidification of flake and nodular cast iron during KC-135 low-g maneuvers p 44 N85-11040
Design and implementation of a low-gravity solidification experiment package for the F-104 p 40 N85-11053

**LOW LEVEL TURBULENCE**
Adding computationally efficient realism to Monte Carlo turbulence simulation
[NASA-TP-2469] p 704 N85-28706

**LOW PASS FILTERS**
An airborne infrared thermal scanning system for easy use on Navy P-3 aircraft
[AD-A149690] p 461 N85-22143

**LOW PRESSURE**
Energy efficient engine. Low pressure turbine test hardware detailed design report
[NASA-CR-167956] p 34 N85-10994

**LOW REYNOLDS NUMBER**
Turbulent roughness drag due to surface waviness at low roughness Reynolds numbers p 181 A85-16243
The design of airfoils at low Reynolds numbers
[AIAA PAPER 85-0074] p 209 A85-19500
Flows over low Reynolds number airfoils - Compressible Navier-Stokes numerical solutions
[AIAA PAPER 85-0107] p 210 A85-19523
Improvements in low Reynolds number testing in the NSWC hypervelocity wind tunnel No. 9
[AIAA PAPER 85-0226] p 274 A85-19602
Evaluation of low Reynolds number turbulence models for attached and separated flows
[AIAA PAPER 85-0375] p 286 A85-19706
The spanwise variation of laminar separation bubbles on finite wings at low Reynolds numbers
[AIAA PAPER 85-1590] p 712 A85-40706
Aerofoils at low Reynolds numbers - Prediction and experiment p 736 A85-42979
The influence of laminar separation and transition on low Reynolds number airfoil hysteresis
p 817 A85-45838
The aerodynamic characteristics of a GU25-5(11)8 aerofoil for low Reynolds numbers p 873 A85-49874
Low Reynolds number vehicles
[AGARD-AG-288] p 580 N85-26666
Aerodynamic characteristics of a distinct wing-body configuration at Mach 6: Experiment, theory, and the hypersonic isolation principle
[NASA-TP-2467] p 818 N85-33107

**LOW SPEED**
Benefits and costs of powered engine simulation at low speeds
[AIAA PAPER 85-0381] p 263 A85-19710
Development of time response criteria for rotorcraft at hover and low speed
[AIAA PAPER 85-1790] p 838 A85-43848
Results of winglet development studies for DC-10 derivatives
[NASA-CR-3677] p 22 N85-10936
Design studies of thick laminar flow airfoils for low speed flight employing turbulent boundary layer suction over the rear part p 257 N85-16786
Recent methods for calibrating the anemometry of helicopters at low speeds p 260 N85-16809
Air intake efficiency at zero speed and lip suction — jet engines
[BAE-KRS-N-GEN-303] p 326 N85-17996
Effects of leading-edge devices on the low-speed aerodynamic characteristics of a highly-swept arrow-wing
[NASA-CR-172531] p 476 N85-22365
The use of pressure sensing taps on the aircraft wing as sensor for flight control systems p 606 N85-26660

**LOW SPEED STABILITY**
Mirage 2000 fighter combines acceleration, low-speed stability p 646 A85-38243
Application of the ONERA model of dynamic stall
[NASA-TP-2399] p 87 N85-12862
Low-speed stability and control wind-tunnel investigations of effects of spanwise blowing on fighter flight characteristics at high angles of attack — Langely 12-ft low-speed tunnel and 30- by 60-ft tunnel
[NASA-TP-2431] p 479 N85-23708
Low-speed tests of a high-aspect-ratio, supercritical-wing transport model equipped with a high-lift flap system in the Langley 4- by 7-meter and Ames 12-foot pressure tunnels
[NASA-TP-2097] p 742 N85-31010

**LOW SPEED WIND TUNNELS**
A numerical simulation of the NFAC (National Full-scale Aerodynamics Complex) open-return wind tunnel inlet flow
[AIAA PAPER 85-0437] p 230 A85-20869
The performance of smooth-wall drag reducing outer-layer devices in rough-wall boundary layers
[AIAA PAPER 85-0558] p 369 A85-25947
An experiment research of boundary layer control technique for multi-component airfoils
p 550 A85-35775
Low-speed wind tunnel testing /2nd edition/ — Book
p 592 A85-35804
An integral method of wall interference correction for low speed wind tunnel p 682 A85-38962
Modernization of the Braunschweig low-speed wind tunnel p 779 A85-41066
Transient aerodynamic characteristics of a two-dimensional airfoil during stepwise incidence variation p 731 A85-42929
A wind tunnel inlet flow simulation
p 871 A85-49141
Wall influence corrections in wind tunnels: Blockage correction according to the wall pressure signature method
[FW-FO-1613] p 88 N85-12875
Comparison of options for reduction of noise in the test section of the NASA Langley 4x7m wind tunnel, including reduction of nozzle area
[NASA-CR-172446-VOL-2] p 197 N85-14667
Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurized low-speed wind tunnel p 238 N85-16773
Low-speed wind tunnel tests of the NAL fan-jet STOL research aircraft model with ground simulation by tangential blowing
[NAL-TR-828] p 345 N85-18976
Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurised low-speed wind tunnel
[RAE-TM-AERO-2006] p 477 N85-22372
CARD's low-speed wind tunnel described
p 516 N85-22849
Construction 1976-1980: Design, manufacturing, calibration of the German-Dutch wind tunnel (DNW)
p 683 N85-27913
Background noise measurements from jet exit vanes designed to reduced flow pulsations in an open-jet wind tunnel
[NASA-TM-86383] p 683 N85-27916
The influence of helicopter tail shape on drag: An aerodynamic study using a low speed wind tunnel
[AD-A156304] p 876 N85-35174

**LOW TEMPERATURE**
Detailed studies of aviation fuel flowability
[NASA-CR-174938] p 788 N85-31308
A comparison of two bench scale tests of fuel low temperature flow properties
[AD-A154477] p 788 N85-31311

Measurement and correlation of jet fuel viscosities at low temperatures
[NASA-CR-174911] p 901 N85-34295

LOW TEMPERATURE TESTS
Effect of temperature on the fatigue and fracture properties of 7475-T761 aluminum p 900 A85-47973
Low temperature and loading frequency effects on crack growth and fracture toughness of 2024 and 7475 aluminum p 900 A85-47974

LOW VISIBILITY
TADS/PNVS - The keen eyes of the hunter — Target Acquisition Designation Sight/Pilot Night Vision Sensor p 107 A85-15594
Certification of a holographic head-up display system for low visibility landings
[AIAA PAPER 84-2689] p 165 A85-17888
Status of warm fog dispersal research
[AIAA PAPER 85-0010] p 272 A85-19456

LUBRICANT TESTS
Corrosion-inhibiting gas-turbine engine lubricant. I - Accelerated test development and validation
[ASLE PREPRINT 84-AM-5D-3] p 383 A85-25981
Certification of reciprocating engine aircraft oils and additives by supplemental type certification procedures
[SAE PAPER 850899] p 901 A85-50116

LUBRICANTS
A theoretical study of stability of a rigid rotor under the influence of dilute viscoelastic lubricants
[ASME PAPER 84-TRIB-17] p 289 A85-21278
Determination of the optimum lubricant change period for the joints of the landing gear of aircraft p 695 A85-38800
Transmission efficiency measurements and correlations with physical characteristics of the lubricant p 521 N85-23781
Correlation of rheological characteristics of lubricants with transmission efficiency measurements
[NASA-TM-86988] p 798 N85-30342

LUBRICATING OILS
The recovery of used MS-8p oil by high-volume consumers p 42 A85-11850
A study of characteristics of the 'long' hydrodynamic dampers of gas turbine engine rotors with allowance for lubricant turbulization and cavitation in the damper clearance p 349 A85-23978
Corrosion-inhibiting gas-turbine engine lubricant. I - Accelerated test development and validation
[ASLE PREPRINT 84-AM-5D-3] p 383 A85-25981
Corrosion-inhibiting gas-turbine engine lubricant. II - Fluid formulation and evaluation
[ASLE PREPRINT 84-AM-5D-4] p 383 A85-25982
Chemical nature of wear debris — in lubricating oils used in gas turbine engines
[ASLE PREPRINT 84-LC-3A-1] p 383 A85-25984
Determination of the service life of oils in aircraft gas turbine engines p 384 A85-26280
Condition monitoring of jet engines p 835 A85-43849
Using aviation oils on the basis of their actual condition p 852 A85-44200
Effect of two inner-ring oil-flow distribution schemes on the operating characteristics of a 35 millimeter bore ball bearing to 2.5 million DN
[NASA-TP-2404] p 129 N85-13233
Fine filtration: An attractive route towards lower helicopter operating costs p 503 N85-23774
Design of piping for oil drain from turbine bearings p 529 N85-24073

LUBRICATION
Lubricity of well-characterized jet and broad-cut fuels by ball-on-cylinder machine
[NASA-TM-83807] p 120 N85-12183
Study of advanced fuel system concepts for commercial aircraft
[NASA-CR-174751] p 415 N85-19878
Tribological systems as applied to aircraft engines
[NASA-TM-86965] p 450 N85-21857
Lubrication and performance of high-speed rolling-element bearings
[NASA-TM-86958] p 450 N85-21858
Development of a multiplane multispeed balancing system for turbine systems
[NASA-CR-174750] p 516 N85-22400
Gears and Power Transmission Systems for Helicopters and Turboprops
[AGARD-CP-369] p 502 N85-23765
Helicopter transmission lubricants p 520 N85-23768
A state of the art assessment of turboprop transmission technology and projected needs for the next generation p 510 N85-23770
Problems of elastic hydrodynamic lubrication of helicopter transmission gears p 521 N85-23784
Experimental study of heat transfer from shaft in cooled radial bearing of GNT-25 gas turbine p 329 N85-24068

LUBRICATION SYSTEMS
Lubrication systems for air turbine starters
[SAE PAPER 841547] p 662 A85-38157
Design of piping for oil drain from turbine bearings p 529 N85-24073

LUGS
Crack growth of lugs under spectrum loading
[AIAA PAPER 84-2451] p 122 A85-13540
The analysis on the dynamic performance of a single lug
[AD-P004289] p 379 N85-18806
Advanced life analyses methods. Volume 1: Cracking data survey and NDI (nondestructive inspection) assessment for attachment lugs
[AD-A150419] p 529 N85-23108
Advanced life analyses methods. Volume 4: Tabulated test data for attachment lugs
[AD-A151016] p 502 N85-23780
Advanced life analyses methods. Volume 5: Executive summary and damage tolerance criteria recommendations for attachment lugs
[AD-A151017] p 502 N85-23781
Advanced life analyses methods. Volume 3: Experimental evaluation of crack growth analyses methods for attachment lugs
[AD-A151058] p 531 N85-24319

LUMINAIRES
Radioluminescent lighting for rural Alaskan runway lighting and marking
[DE85-007022] p 594 N85-26764
Acceptability testing of radioluminescent lights for VFR-night air taxi operations
[DE85-007303] p 594 N85-26765

LUMINANCE
Electronic displays: Their strengths and weaknesses for advanced high performance aircraft p 349 N85-19664
Visual simulation requirements for aircraft aspect recognition at real world distances
[AD-A151040] p 517 N85-23810

LUMINESCENCE
Light your runways and taxiways without electricity
[DE85-000289] p 429 N85-19991
Examination of the feasibility for demonstration and use of radioluminescent lights for Alaskan remote runway lighting
[DE85-002503] p 431 N85-21165

M

MACH NUMBER
The effect of the Mach number on the aerodynamic characteristics of a deformable body during its nonstationary motion p 472 A85-31491
A method for computing the drag rise Mach number for any aerofoil section p 472 A85-31781
Near-sonic subsonic flow around a profile - In particular: the foot-point structure of a shock and the flow-reverse theorem p 553 A85-36342
Research on supersonic diffusers of centrifugal compressor by means of swirl flow. I - Flow in a diffuser at various Mach numbers p 729 A85-41824
Wind tunnel tests on a tube-launched missile configuration with a deflectable nose control and a novel wrap-around fin stabiliser
[AR-003-696] p 8 N85-10003
Effect of upstream sidewall boundary layer removal on an airfoil test — conducted in Langley 0.3-m transonic cryogenic tunnel p 63 N85-12019
Progress in wind tunnel wall interference assessment/correction procedures at the NAE p 64 N85-12025
Comparison of analytical and experimental steadyand unsteady-pressure distributions at Mach number 0.78 for a high-aspect-ratio supercritical wing model with oscillating control surfaces
[NASA-TM-84589] p 235 N85-15897
Joined wing transonic design and test validation
[AD-A146355] p 239 N85-16634
Unsteady stall penetration of an oscillating swept wing
[AD-P004156] p 323 N85-17941
Mach-10 high Reynolds number development in the NSWC (Naval Surface Weapons Center) hypervelocity facility
[AD-A151241] p 583 N85-25274
Measurements of the symmetric aerodynamic coefficients for flat faced cylinders in the angle of attack regime 0 to 90 deg for transonic and supersonic speeds
[FFA-TN-1984-04] p 561 N85-26675
On power effecient operation of the 2m x 2m transonic wind tunnel at the National Aerospace Laboratory
[NAL-TR-847] p 684 N85-28953
Development of a temperature-compensated hot-film anemometer system for boundary-layer transition detection on high-performance aircraft
[NASA-TM-86732] p 835 N85-33121
An evaluation of three helicopter rotor sections
[NASA-TM-86719] p 874 N85-34115

MACH REFLECTION
Experimental study of Mach reflection of weak shock waves p 124 A85-14866
Mach reflection flowfields associated with strong shocks p 391 A85-29082

MACHINE TOOLS
Airport ground equipment under development at Riga p 380 N85-18038
Automating the study of error in discrete aerodynamic lattice design p 504 N85-24176

MACHINING
New processing techniques for automated chemical removal of surface metal
[DGLR PAPER 84-085] p 789 A85-40305
T700 cutter life improvement program
[AD-A150450] p 528 N85-23089

MAGNESIUM ALLOYS
Review of the origin of Japanese Industrial Standard p 280 A85-20545
Damage tolerance design for aircraft hubs made of cast magnesium alloy p 852 A85-44250

MAGNET COILS
Design and test of a four channel motor for electromechanical flight control actuation
[NASA-CR-171838] p 297 N85-17294

MAGNETIC BEARINGS
Adaptive control of an elastic rotor with a magnetic bearing p 600 A85-36321

MAGNETIC FIELDS
Magnetically actuated compressor
[NASA-CASE-GSC-12798-1] p 448 N85-21404

MAGNETIC SUSPENSION
Progress toward magnetic suspension and balance systems for large wind tunnels p 427 A85-29252
The generation of rolling moments with the superconducting solenoid model
[NASA-CR-172520] p 380 N85-18088
A preliminary investigation of the dynamic force-calibration of a magnetic suspension and balance system
[NASA-CR-172580] p 517 N85-23808
Study on needs for a magnetic suspension system operating with a transonic wind tunnel
[NASA-CR-3900] p 580 N85-26759
Effect of superconducting solenoid model cores on spanwise iron magnet roll control
[NASA-TM-86378] p 683 N85-27915

MAGNETIC TRANSDUCERS
Geomagnetic velocimeter
[AD-D011672] p 784 N85-29953

MAGNETOMETERS
The use of a self-compensated magnetometer in an economical navigation system for the helicopter p 568 N85-26650
A method of estimating aircraft attitude from fly by wire flight control system data p 586 N85-26653

MAGNETRONS
Very-short-pulse modulator using asymmetric thyristors p 185 A85-18466

MAGNUS EFFECT
A computer simulation of separated flow past a rotating cylinder and the Magnus force reversal p 380 A85-28465
Surface pressure measurements on a transonic spinning projectile p 392 A85-29303
Computations of projectile Magnus effect at transonic velocities p 625 A85-38981
The effect of the Magnus moment on the motion stability of an asymmetric flight vehicle p 850 A85-44848

MAINTAINABILITY
A system approach to flight control reliability and maintainability
[AIAA PAPER 84-2483] p 114 A85-13549
Supportability engineering why, how, when, who p 381 A85-26850
Development of consensus modular avionics standards p 833 A85-45003
A comparison of various Life Cycle Cost models — in avionics systems acquisition p 863 A85-45150
Annual Reliability and Maintainability Symposium, San Francisco, CA, January 24-26, 1984, Proceedings p 908 A85-49526
Maintainability aspects in maintenance management p 909 A85-49536
DoD/industry - R&M technology study analysis p 909 A85-49538
Establishing realistic requirements for reliability, maintainability, and built-in-test p 909 A85-49539
An M principle - Pay me now or spend more later p 909 A85-49581

F-15 readiness - The maintainability contribution
p 882 A85-49582

Design for Tactical Avionics Maintainability
[AGARD-CP-361] p 201 N85-16731

Objectives in studying the maintainability of aircraft systems p 202 N85-16732

Joint service design for testability program
p 296 N85-16733

The embedded test (BIT): Impact on the total cost of possession p 202 N85-16734

ATE user's view on design for maintainability
p 202 N85-16737

Maintainability: An ILS effort to manipulate LCC
p 202 N85-16743

A description of a logistically ideal aircraft
[AD-A148425] p 258 N85-16886

Design for tactical avionics maintainability, technical evaluation report
[AGARD-AR-204] p 505 N85-23798

**MAINTENANCE**

Optimal maintenance center inventories for fault-tolerant repairable systems p 301 A85-21548

Maintenance test requirements of spread spectrum CNI systems — Communications-Navigation Identification
p 407 A85-26806

Fatigue reliability of gas turbine engine components under scheduled inspection maintenance
p 507 A85-32589

Repair procedures for composite sinewave substructure p 686 A85-37380

Improved resins for wet layup repair of advanced composite structure p 686 A85-37381

The Collins AFDS Maintenance System for the Boeing 757/767 — Autopilot Flight Director System
[AIAA PAPER 85-1911] p 849 A85-45971

A systematic approach to designing for testability
p 909 A85-49586

Expert systems in maintenance diagnostics for self-repair of digital flight control systems
[AD-P003933] p 58 N85-11613

Future robotics program at San Antonio ALC (Air Logistics Center)
[AD-P004011] p 127 N85-11881

Logistics support costs for the B-1B aircraft can be reduced
[AD-A145848] p 72 N85-11986

Development of a pavement maintenance management system. Volume 10: Summary of development from 1974 through 1983
[AD-A146035] p 117 N85-12067

Materials for emergency repair of runways
[AD-A146139] p 117 N85-12068

Development of a pavement maintenance management system. Volume 9: Development of airfield pavement performance prediction models
[AD-A146150] p 117 N85-12069

Prefabricated panels for rapidly runway repair and expedient airfield surfacing
[AD-D011277] p 177 N85-13804

Situational interactive micro/graphic simulator system for improving maintenance performance
[AD-A146677] p 177 N85-14846

System for rapid repair of damaged airfield runways
[AD-D011325] p 276 N85-15754

Managing recoverable aircraft components in the PPB and related processes: Executive summary
[AD-A146806] p 306 N85-16867

Maintainability: An ILS effort to manipulate LCC
p 202 N85-16743

A weapon system design approach to diagnostics
p 203 N85-16752

Flight service evaluation of advanced composite ailerons on the L-1011 transport aircraft
[NASA-CR-172483] p 284 N85-17049

Repair of composites p 284 N85-17058

Adhesive joint formation under field conditions
[AD-D011478] p 385 N85-19153

Establishment and maintenance of certification standards for helicopter and turboprop power transmission systems p 503 N85-23796

Graphic simulation of a machine-repairman model
[AD-A151761] p 543 N85-26833

The use of flight simulators in measuring and improving training effectiveness
[AD-A153617] p 684 N85-28854

Automated maintenance system test program increment VI production scheduling
[AD-A153694] p 706 N85-29838

**MAINTENANCE TRAINING**

AIRMEC 83 - International Aircraft Maintenance Engineering Exhibition and Conference, 3rd, Duesseldorf, West Germany, April 12-15, 1983, Conference Reports
p 311 A85-25225

Simulators for training aircraft maintenance personnel
p 427 A85-29863

Cost effectiveness of simulated aircraft maintenance training systems p 846 A85-45118

**MALFUNCTIONS**

Safety recommendation(s), A-84-65
[REPT-3908] p 484 N85-23743

General Aviation Airworthiness Alerts, no. 85
[FAA-AC-43-16] p 830 N85-33117

**MAMMALS**

Control of mammals at airports
[AD-P004192] p 404 N85-19957

**MAN MACHINE SYSTEMS**

Software controlled display/pushbutton — for avionics
[AIAA PAPER 84-2657] p 164 A85-17844

Pilot command interfaces for discrete control of automated nap-of-earth flight
[AIAA PAPER 84-2621] p 172 A85-17859

A simulator application of a 'hands-on throttle and stick' concept to a transport pilot/autopilot interface
[AIAA PAPER 84-2687] p 165 A85-17866

Evolution of the Collision Avoidance System in the cockpit
[AIAA PAPER 84-2734] p 152 A85-17888

In-flight simulation in flight mechanics
p 159 A85-18713

Trends in digital flight control systems
p 269 A85-21465

Cockpit technology in a modern commercial aircraft
p 341 A85-25510

Aircraft cockpit work station as exemplified by a flight simulator p 357 A85-25513

A nonlinear pilot model for hover p 513 A85-32783

Errare humanum est — human factors contributing to aircraft navigation errors p 567 A85-36429

A systematic program for the development and evaluation of airborne color display systems
p 655 A85-38952

Airborne electronic color displays - A review of UK activity since 1981 p 656 A85-38953

Toward a unifying theory for aircraft handling qualities
p 651 A85-39554

DARPA stressing development of pilot's associate system p 802 A85-40917

Among the weeds at night - Transition to night NOE flying p 763 A85-41532

On the controllability limit of a human operator when using a Bang-Bang type controller p 804 A85-42689

Cross coupling in pilot/vehicle systems
[AIAA PAPER 85-1787] p 838 A85-43845

Information displays for piloting modern aircraft
p 825 A85-44238

Organization of the cockpit in future aircraft
p 825 A85-44239

A user friendly introduction to handling qualities
p 839 A85-45040

Closed-loop, pilot/vehicle analysis of the approach and landing task
[AIAA PAPER 85-1851] p 842 A85-45880

Investigation of limb-sidestick dynamic interaction with roll control
[AIAA PAPER 85-1853] p 843 A85-45882

Quantitative feedback design approach to robust flying qualities
[AIAA PAPER 85-1902] p 844 A85-45916

Identification of pilot dynamics from in-flight tracking data
[AIAA PAPER 85-1945] p 845 A85-45935

MERIT: A man/computer data management and enhancement system for upper air nowcasting/forecasting in the United States — Minimum Energy Routes using Interactive Techniques (MERIT) p 56 N85-10558

Technical Workshop: Advanced Helicopter Cockpit Design
[NASA-CP-2351] p 154 N85-14806

Superaugmented rotorcraft program
p 139 N85-14807

Guidance and navigation programs and plans
p 154 N85-14809

Integrated cockpit design for the Army helicopter improvement program p 161 N85-14816

International aviation (selected articles)
[AD-A148704] p 204 N85-16762

Integrated control and display systems for helicopter battlefield mission management p 260 N85-16805

A review of US Army aircrew-aircraft integration research programs p 270 N85-16814

Time series analysis of closed-loop pilot vehicle dynamics p 271 N85-16876

Operations concept for the advanced automation system man-machine interface
[AD-A149797] p 410 N85-21139

An interactive environment for the development of an expert system in ZOG
[AD-A149954] p 459 N85-22025

A comparison of pictorial and speech warning messages in the modern cockpit
[AD-A151917] p 579 N85-26706

Controller requirements for uncoupled aircraft motion, volume 2
[AD-A153300] p 676 N85-27879

Program Manager: The journal of the defense systems management college, volume 14, number 2, March-April 1985
[AD-A154219] p 808 N85-32031

Man-vehicle systems research facility advanced aircraft flight simulator throttle mechanism p 856 N85-33527

Development of NATOPS performance software for the SH-3D and SH-3H helicopters
[AD-A156140] p 887 N85-35192

The integrated manual and automatic control of complex flight systems
[NASA-CR-176166] p 896 N85-35201

**MAN POWERED AIRCRAFT**

Five years experience with minimum induced loss propellers. II - Applications
[SAE PAPER 840027] p 322 A85-26311

'Phoenix' - A polyester-film inflatable man-powered aircraft
[SAE PAPER 840028] p 342 A85-26312

Man powered flight advances p 383 A85-28825

Man-powered aircraft — review p 615 A85-38353

Bionic Bat - Stored energy human powered aircraft
[AIAA PAPER 85-1447] p 708 A85-40842

**MANAGEMENT**

Distribution and storage of aviation turbine fuel for military operations in northern Australia
[AD-A147180] p 283 N85-15921

Flight Training Technology for Regional/Commuter Airline Operations: Regional Airline Association/NASA Workshop Proceedings
[NASA-CP-2348] p 332 N85-18009

DOD Value Engineering Conference report. Value Engineering (VE): A tool that benefits line management held at Leesburg, Virginia on 1-2 November 1984. Part 2. Plenary session
[AD-A156068] p 919 N85-35811

**MANAGEMENT ANALYSIS**

Aviation maintenance computerized management information systems: Perspective for the future
[AD-A150637] p 467 N85-22349

Program Manager: The journal of the defense systems management college, volume 14, number 2, March-April 1985
[AD-A154219] p 808 N85-32031

**MANAGEMENT INFORMATION SYSTEMS**

Automating the decision support for ATE operations management p 456 A85-26836

Maintenance Management Information and Control System (MMICS): Administrative boon or burden
[AD-A145762] p 136 N85-12790

An update of the functional requirements of the Naval Aviation Logistics Command Management Information System (NALCOMIS)
[AD-A146565] p 198 N85-15532

An interactive environment for the development of an expert system in ZOG
[AD-A149954] p 459 N85-22025

Aviation maintenance computerized management information systems: Perspective for the future
[AD-A150637] p 467 N85-22349

**MANAGEMENT METHODS**

Intercompany technology task forces promote cooperation at Lockheed p 381 A85-26847

Dyna-METRIC - New capabilities — Dynamic Multi-Echelon Technique for Recoverable Item Control
p 859 A85-45148

The imposition of flow control avoids ATC overloads
p 879 A85-48851

Automation in air traffic management
p 879 A85-49171

Maintenance Management Information and Control System (MMICS): Administrative boon or burden
[AD-A145762] p 136 N85-12790

Performance evaluation of A-10 aircraft mainteance units and aircraft using constrained facet analysis
[AD-A146955] p 201 N85-15660

A Q-GERT network simulation model for examining pipeline time in the Navy's J-52 intermediate level jet engine repair cycle
[AD-A147269] p 201 N85-15663

Effective life cycle software support: A study in discipline and versatility p 302 N85-16746

Automated maintenance system test program increment VI production scheduling
[AD-A153694] p 706 N85-29838

**MANAGEMENT PLANNING**

Integration of MSG-3 into airline operation
[SAE PAPER 841483] p 312 A85-25978

MSG-3 - A method for maintenance program planning
[SAE PAPER 841485] p 312 A85-25979

Support program planning - Managing to get it supported — ATE for avionics p 461 A85-26785

System engineering and integration contract for implementation of the National Airspace System plan, volume 1, sections 1.0-4.0, 6.0
[AD-A145763] p 96 N85-12048

**MANAGEMENT SYSTEMS**

Intercompany technology task forces promote cooperation at Lockheed p 381 A85-26847

Application of technology to achieve value - Added in-service support — of jet engines
[SAE PAPER 841566] p 659 A85-39067

Initial European Central Data Bank of air traffic demand now in operational trials p 879 A85-48852

The Delco Performance Management System
p 895 A85-49172

Report of the Department of Aerospace Engineering
p 71 N85-11977

Development of a pavement maintenance management system. Volume 10: Summary of development from 1974 through 1983
[AD-A146035] p 117 N85-12067

Development of a pavement maintenance management system. Volume 9: Development of airfield pavement performance prediction models
[AD-A146150] p 117 N85-12069

National Airspace System Plan: Facilities, equipment and associated development p 569 N85-26692

The economics of private sector R and D decisionmaking in aeronautics
[NASA-CR-176007] p 807 N85-30962

DOD Value Engineering Conference report. Value Engineering (VE): A tool that benefits line management held at Leesburg, Virginia on 1-2 November 1984. Part 2. Plenary session
[AD-A156068] p 919 N85-35811

**MANEUVERABILITY**

Supermaneuverability
[AIAA PAPER 84-2386] p 69 A85-13501

A modelling approach for autopilot design of a rolling missile p 115 A85-13691

An investigation of association region in maneuvering multi-target tracking p 410 A85-29697

Insights into helicopter air combat maneuverability
p 493 A85-31957

Aerodynamics for an entry research vehicle
[AIAA PAPER 85-1793] p 814 A85-43879

Performance capabilities of the C-5 and C-17 cargo aircraft
[AD-A145518] p 22 N85-10939

Robotics in nondestructive inspection at Sacramento Air Logistics Center
[AD-P004012] p 127 N85-11982

Details of export A-5 close-support aircraft given — Qiang-5 aircraft p 139 N85-14793

Supermaneuverability
[AD-P004153] p 342 N85-17938

**MANEUVERS**

Bifurcation theory applied to aircraft motions
[NASA-TM-86704] p 478 N85-23705

Harrier p 576 N85-26595

Design of robust controllers for a multiple input-multiple output control system with uncertain parameters application to the lateral and longitudinal modes of the KC-135 transport aircraft
[AD-A153100] p 875 N85-27877

**MANGANESE ALLOYS**

Metallurgy institute's developments for alloy and aircraft producers p 120 N85-12268

**MANIPULATORS**

A robotic quick disconnect wrist for aircraft bulkhead inspection
[AIAA PAPER 85-0700] p 534 A85-30267

**MANNED SPACE FLIGHT**

Biomechanics finds practical applications in aerospace research p 446 N85-20205

**MANPOWER**

Parametric estimates of propulsion system maintenance manhours
[AD-A147120] p 201 N85-15862

**MANUAL CONTROL**

Toward a unifying theory for aircraft handling qualities
p 651 A85-39554

Interaction between display dynamics and handling qualities in manual control tasks
[AIAA PAPER 85-1805] p 838 A85-43855

Closed-loop, pilot/vehicle analysis of the approach and landing task
[AIAA PAPER 85-1851] p 842 A85-45880

Investigation of limb-sidestick dynamic interaction with roll control
[AIAA PAPER 85-1853] p 843 A85-45882

Singular value analysis of competitive multi-input/multi-output manual control systems
[AIAA PAPER 85-1943] p 860 A85-45966

The integrated manual and automatic control of complex flight systems
[NASA-CR-176166] p 896 N85-35201

**MANUALS**

Method for evaluating petrol products corrosivity using piezoelectric crystals. Part 2: Instruction manual — jet engine corrosion tests
[FOA-C-40198-B4] p 121 N85-13073

**MANUFACTURING**

Design and manufacture of composite control surfaces p 312 A85-26304

Commuter airlines - The manufacturer's viewpoint
p 745 A85-41337

Manufacturing tolerances for natural laminar flow airframe surfaces
[SAE PAPER 850863] p 884 A85-50103

Advanced manufacturing development of a composite empennage component for L-1011 aircraft
[NASA-CR-165885] p 44 N85-11141

Manufacturing Methods and Technology (MM/T) specifications for miniature cathode ray tube
[AD-A145597] p 54 N85-11298

Manufacturing report of an augmented lift, variable deflection half wing
[ONERA-RT-25/1736-AY-108-A] p 138 N85-13766

Flexible manufacturing system for the production of aircraft parts
[BLL-PNR-90237-(8019.3153)] p 297 N85-17159

The effects of manufacturing automation on the surge and mobilization capabilities of the gas turbine engine industry
[AD-A147295] p 297 N85-17162

Report of the Technology and Test Panel
p 448 N85-20370

Fiber optics applications for MIL-STD-1760
[AD-A151113] p 575 N85-25251

Future of ceramic turbochargers: Promises and pitfalls
[DE85-006209] p 700 N85-28380

**MAP MATCHING GUIDANCE**

A comparison of several digital map-aided navigation techniques p 642 A85-37829

**MAPPING**

Map display for helicopters p 259 N85-16801

Microwave responses of the western North Atlantic
[NASA-CR-175868] p 699 N85-28191

**MAPS**

The Icarus multicolor visual display system for fighter aircraft p 831 A85-44051

Digital map products and the avionics requirement - Can DMA meet the challenge? p 821 A85-44989

F-15 digital map feasibility demonstration system
p 832 A85-44990

Future electronic map systems p 832 A85-44993

Automatic land vehicle navigation using road map data
[DE84-017178] p 338 N85-18043

**MARINE ENVIRONMENTS**

Tethered aerostat operations in the marine environment
[AIAA PAPER 85-0860] p 640 A85-38778

High Endurance Lighter Than Air (HELTA) Program
[AIAA PAPER 85-0861] p 640 A85-38779

Marine helicopter missions p 139 N85-14811

SAR maritime missions p 139 N85-14813

**MARINE PROPULSION**

Design of compensation schemes for a nonminimum-phase multivariable plant
p 458 A85-28810

An analytic model of gas turbine engine installations
[AD-A146708] p 354 N85-18059

**MARINE TECHNOLOGY**

Equipment for a maritime user of the Global Positioning System (GPS) p 337 A85-25820

Satellite navigation systems for the USSR merchant marine p 408 A85-27607

**MARINE TRANSPORTATION**

Renegade 250 - Flight evaluation or boat ride?
p 252 A85-22273

Multivariable control of VTOL aircraft for shipboard landing
[AIAA PAPER 85-1926] p 844 A85-45926

USSR report: Transportation
[JPRS-UTR-85-008] p 542 N85-25189

USSR report: Transportation
[JPRS-UTR-84-017] p 542 N85-25196

USSR report: Transportation
[JPRS-UTR-84-014] p 564 N85-25229

**MARKET RESEARCH**

Boeing's airliner launch criteria p 383 A85-28824

Foreign civil aviation competition: 1976 summary and implications
[NASA-TM-X-73907] p 1 N85-10907

German domestic scheduled air transport in the year 2000
[ESA-TT-828] p 149 N85-13792

**MARKETING**

Technology and the market place - A changing air transport equation
[SAE PAPER 841545] p 312 A85-25983

The acquisition and operating cost of an advertising airship p 562 A85-34261

Ultralights break the rules p 615 A85-38439

MBB cost-reduction plan for Airbus construction described p 542 N85-25616

FRG journal analyzes state, prospects of airbus programs: General analysis p 542 N85-25638

**MARKOV PROCESSES**

A problem concerning the incomplete-feedback control of linear Markovian systems with random parameters
p 192 A85-17055

Fault tolerant computer system for the A129 helicopter p 504 A85-31271

A user's view of CARE III — computer aided reliability estimation p 918 A85-49570

**MASS DISTRIBUTION**

Mass flux boundary conditions in linear theory
p 73 A85-12726

Computer aided determination of rotor blade mass properties
[SAWE PAPER 1626] p 884 A85-49926

Measurement of the inertial constants of a rigid or flexible structure of arbitrary share through a vibration test
[NASA-TM-77557] p 55 N85-11381

Design of helicopter rotor blades for optimum dynamic characteristics
[NASA-CR-176076] p 750 N85-31044

**MASS FLOW**

Comparison of options for reduction of noise in the test section of the NASA Langley 4x7m wind tunnel, including reduction of nozzle area
[NASA-CR-172446-VOL-2] p 197 N85-14667

Flow measurement device
[AD-D011432] p 298 N85-17369

Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 2: Statistical analysis of Marshall properties of plant-produced bituminous materials
[FAA-PM-84-12-VOL-2] p 430 N85-21181

**MASS FLOW RATE**

Surge transient simulation in turbo-jet engine
p 169 N85-13796

**MASS SPECTROSCOPY**

Analysis of middle distillate fuels by high resolution field ionization mass spectrometry
[AD-A147724] p 285 N85-17153

Instrumentation for Application Number 1: Mass spectrometric analysis of the boundary layer associated with the tethered satellite p 433 N85-20372

**MASS TRANSFER**

The problems arising in testing of carbon-based materials for structural components of airframes
p 686 A85-37339

**MATCHED FILTERS**

Application of digital signal processing to a low data rate communications receiver
[AIAA PAPER 84-2652] p 183 A85-17839

Target super-resolution compensation for spread spectrum radar waveforms p 823 A85-45129

**MATERIALS HANDLING**

Analysis of KC-10 loading alternatives
[SAE PAPER 840701] p 332 A85-26313

DoD Robotics Application Workshop Proceedings
[AD-A145867] p 71 N85-11978

Depot modernization at the Defense Logistics Agency
[AD-P004008] p 126 N85-11988

Future robotics program at San Antonio ALC (Air Logistics Center)
[AD-P004011] p 127 N85-11991

Supply center processes
[AD-P004014] p 127 N85-11993

BI-PAC F-15 external fuel tank container modification
[AD-A148836] p 344 N85-18053

MI-8 helicopter cargo loading experiment for Arctic shipping p 504 N85-24425

Laboratory vibration schedules
[AD-A155856] p 887 N85-35188

**MATERIALS SCIENCE**

An overview of potential for the substitution of ceramic materials for vulnerable materials and the implications of national materials policy p 179 A85-19099

Evolution in the U.S. of ceramic technology for turbine engines
[ACS PAPER 3-JIII-84] p 383 A85-25269

Dissipative properties of inhomogeneous materials and systems — Russian book p 687 A85-38874

Developments in aero engine materials
p 784 A85-41623

Fibre reinforced composites '84; Proceedings of the International Conference, University of Liverpool, England, April 3-5, 1984 p 900 A85-48562

USSR report: Engineering and equipment
[JPRS-UEQ-84-007] p 188 N85-14954
Research and technology highlights of the Lewis Research Center
[NASA-TM-86899] p 309 N85-17928
Thermal response of aircraft cabin ceiling materials during a post-crash, external fuel-spill, fire scenario
[PB85-145647] p 502 N85-23764
USSR report: Engineering and equipment
[JPRS-UEQ-84-005] p 530 N85-24157

**MATERIALS TESTS**
Evaluation of Kevlar 29 for filament-wound structural applications in helicopter p 178 A85-16033
A test system for determining the strength of structural elements exposed to a high-temperature gas stream and vibrational loads p 426 A85-27768
Recent advances in experimental characterization of composites; Proceedings of the Fall Meeting, Salt Lake City, UT, November 6-10, 1983 p 435 A85-30151
Structures, Structural Dynamics, and Materials Conference, 26th, Orlando, FL, April 15-17, 1985, Technical Papers. Parts 1 & 2 p 522 A85-30226
Evaluation of nozzle throat materials for ramjet engines p 666 A85-37201
Material evaluation of second-generation composites for transport wing application
[SAE PAPER 841520] p 688 A85-39291
The first British designed and built composite sailplane p 865 A85-48573

**MATHEMATICAL MODELS**
Application of active noise control to model propeller noise
[AIAA PAPER 84-2344] p 62 A85-10883
Resonance vibrations of skeleton models of turbine blades with a composite fir-tree root p 26 A85-11821
Identification of multivariable high-performance turbofan engine dynamics from closed-loop data p 109 A85-13630
Crack growth retardation and acceleration models p 126 A85-15862
Modeling of certain strapdown heading-sensitive errors in INS error models p 153 A85-18345
A longitudinal stability augmentation system for a tilt rotor aircraft
[AIAA PAPER 85-0072] p 268 A85-19498
The development of mathematical modelling techniques for helicopter rotor icing
[AIAA PAPER 85-0336] p 240 A85-19679
The fundamental equations of 3-dimensional two-phase particulate gas flow and a twofold stream surfaces model of solution for particulate gas flow in turbomachines p 228 A85-20233
A formalism for the design problem of aircraft system universalization p 250 A85-20473
Artificial dissipation models for the Euler equations
[AIAA PAPER 85-0438] p 231 A85-20870
The problem of gradual opening in wave rotor passages p 365 A85-23387
Structural and algorithmic aspects of the design of a mathematical-modeling system for problems of ballistics, control, and navigation p 432 A85-28391
A dynamic tire/soil contact surface interacting model for aircraft ground operations
[AIAA PAPER 85-0708] p 482 A85-30358
The discrete nature of the motion of a system during surface working p 524 A85-31473
Modeling of gas flows with shock waves — Russian book p 472 A85-31889
A composite model of aircraft noise p 537 A85-32594
A ring-vortex downburst model for real-time flight simulation of severe wind shears
[AIAA PAPER 85-1749] p 799 A85-40561
The development of efficient models of the deformation of thin-wall structures p 789 A85-40589
Mathematical modelling of performance characteristics and optimization of turbomachine stages p 769 A85-41812
Implementation of the supersonic triplet singularity into the USTORE computer code
[CSIR-NIAST-83/47] p 8 N85-10006
Prediction of aerodynamic characteristics of fighter wings at high angles of attack
[AD-A145107] p 10 N85-10017
Aerodynamics of airfoils subject to 3-dimensional periodic gusts
[AD-A145149] p 10 N85-10018
Singular asymptotic expansions in nonlinear rotordynamics
[NASA-CR-174012] p 39 N85-10100
Estimation of the threshold in fatigue crack initiation models: A Bayesian approach
[AD-A144847] p 54 N85-10410
Enhanced TCAS 2/CDTI traffic Sensor digital simulation model and program description
[NASA-CR-172445] p 15 N85-10927
Advanced composite stabilizer for Boeing 737 aircraft
[NASA-CR-168451] p 21 N85-10934
Quasi-steady analysis of aircraft panel flammability
[AD-A145461] p 22 N85-10938
Determination of equivalent model geometry for tunnel wall interference assessment/correction p 85 N85-12031
Estimation of helicopter performance using a program based on blade element analysis
[AD-A146341] p 105 N85-12055
Prediction and modeling of helicopter noise
[AD-A145764] p 134 N85-12656
Outline of a new emissions model for military and civilian aircraft facilities
[DE84-016455] p 131 N85-13394
Model reduction for control system design p 172 N85-13799
A Generalized Escape System Simulation (GESS) computer program. Volume 2: GESS programmer's manual, version 2
[AD-A148363] p 243 N85-16645
Production rate variations cost models
[AD-A147706] p 306 N85-17732
Modeling of aircraft performance from flight test results using quasi steady-state test techniques p 343 N85-18047
Deflection model of a CT4-A undercarriage
[AD-A149776] p 417 N85-21156
The influence on IR emission of engine parameters for an afterburn case. A sensitivity study on NATO infrared air target model (NIRATAM) version: 0.0
[AD-B089311L] p 422 N85-21171
Singular asymptotic expansions in nonlinear rotordynamics p 451 N85-22218
Simple theoretical models for composite rotor blades
[NASA-CR-175620] p 499 N85-22382
Model reduction for control system design
[NASA-CR-170417] p 514 N85-22398
The generation of three-dimensional body-fitted coordinate systems for viscous flow problems
[AD-A150861] p 536 N85-24846
Automatic Dynamic Aircraft Modeler (ADAM), volume 1
[AD-A151410] p 575 N85-25252
Mathematical modeling of the AEDC (Arnold Engineering Development Center) propulsion wind tunnel (16T)
[AD-A151293] p 593 N85-25275
Fundamental studies of structure borne noise for advanced turboprop applications
[NASA-CR-175737] p 612 N85-26320
Fluid-dynamic model of a downburst
[UTIAS-271] p 609 N85-27441
An introduction to vortex breakdown and vortex core bursting
[NAE-AN-28] p 635 N85-27829
Parameter identification results of tests in nonsteady symmetric flight with the Hawker Hunter Mk 7
[NLR-TR-83042-U] p 653 N85-27860
Description and illustration of the use of CRACKS IV
[AD-A153543] p 701 N85-29325
Numerical simulations of the effect of floor and ceiling venting on fire and smoke spread in aircraft cabins
[PB85-178333] p 747 N85-29939
Informatics Division p 797 N85-31416
Aerodynamic characteristics of the standard dynamics model in coning motion at Mach 0.6
[NASA-TM-86717] p 817 N85-32094
Component-specific modeling
[NASA-CR-174765] p 891 N85-34140
Development of a mathematical model for predicting the percentage fatigue life increase resulting from shot peened components
[AD-A155774] p 912 N85-35425

**MATHEMATICAL PROGRAMMING**
Structural optimization with dynamic behavior constraints p 185 A85-18693
A model for the optimal synthesis and analysis of maintenance facilities p 456 A85-26838
Time-domain stability robustness measures for linear regulators p 703 A85-39565

**MATRICES (MATHEMATICS)**
Matrix solution of compressible flow on S(1) surface through a turbomachine blade row with splitter vanes or tandem blades p 227 A85-20228
The determination of load and slope transformation matrices for aeroelastic analysis p 794 A85-42940
Modal synthesis of multidimensional PI-regulators for objects with inertial sections p 529 N85-24064
A method to calculate the parameters of wings of arbitrary planform
[AD-A152689] p 635 N85-27831

**MATRIX MATERIALS**
Flexible matrix composites applied to bearingless rotor systems p 281 A85-21389
High performance fibers for structurally reliable metal and ceramic composites — advanced gas turbine engine materials
[NASA-TM-86878] p 119 N85-12095
Solvent resistant thermoplastic composite matrices p 120 N85-12960

**MATRIX METHODS**
An equivalent strength method for optimum design of composite laminates p 51 A85-12362
The treatment art of rigid-substructures in modal synthesis methods p 183 A85-17169
Universal matrices to obtain thermal load vectors for the family of anisotropic plane triangular finite elements p 291 A85-22232
Transonic test of a forward swept wing configuration exhibiting Body Freedom Flutter
[AIAA PAPER 85-0689] p 491 A85-30356
An implementation of the modular approach in solving elasticity problems p 524 A85-31455
Using the force method for joining substructures with various kinematic hypotheses p 524 A85-31459

**MAXIMUM LIKELIHOOD ESTIMATES**
A likelihood function method for multiple aircraft maneuver tracking p 866 A85-47699
More than you want to know about maximum likelihood estimation
[NASA-TM-85905] p 270 N85-15752
On the application of compatibility checking techniques to dynamic flight test data
[ARL/AERO-R-161] p 416 N85-21151
Extraction of aerodynamic parameters for aircraft at extreme flight conditions
[NASA-TM-86730] p 704 N85-29686

**MCDONNELL DOUGLAS AIRCRAFT**
C-17 will fill long-haul airlift gap p 570 A85-33850

**MEASURE AND INTEGRATION**
A conformal mapping suitable for problems involving interaction between given geometries and known far fields
[AD-A149050] p 376 N85-19744

**MEASUREMENT**
Method for measuring haze in transparencies
[AD-D011233] p 65 N85-10823

**MEASURING INSTRUMENTS**
Estimating the trajectory of an accelerationless aircraft by means of a stationary acoustic sensor p 64 A85-12300
Fundamentals of the general structural-physical theory of flight instruments — Russian book p 131 A85-13750
Comparison of icing cloud instruments for 1982-1983 icing season flight program
[AIAA PAPER 84-0020] p 163 A85-16098
Development of a noninterference technique for measuring turbine engine rotor blade stresses
[AIAA PAPER 85-1472] p 697 A85-39797
A measuring and computing off-line and on-line system for a turbine laboratory p 795 A85-43052
Method for evaluating petrol products corrosivity using piezoelectric crystals. Part 2: Instruction manual — jet engine corrosion tests
[FOA-C-40198-B4] p 121 N85-13073
Advanced fatigue monitoring on service aircraft p 292 N85-15671
High temperature thermocouple and heat flux gauge using a unique thin film-hardware hot juncture
[NASA-TM-86898] p 295 N85-16096
Advanced smoke meter development survey and analysis
[NASA-CR-168287] p 604 N85-25792
Study of acceptance criteria for joint densities in bituminous airport pavements
[FAA-PM-85-5] p 594 N85-26761
Development of advanced high-temperature heat flux sensors. Phase 2: Verification testing
[NASA-CR-174973] p 911 N85-35391

**MECHANICAL DEVICES**
Dynamic analysis of large-scale mechanical systems and animated graphics
[AIAA PAPER 83-0946] p 184 A85-18340
Computer-aided kinematic and dynamic analysis of the landing-gear mechanisms of aircraft p 492 A85-31471
Extended moment arm anti-spin device
[NASA-CASE-LAR-12979-1] p 416 N85-21147

**MECHANICAL DRIVES**
Reduction gears of gas-turbine engines for aircraft and helicopters p 441 A85-27719
A 2400 kW lightweight helicopter transmission with split-torque gear trains
[ASME PAPER 84-DET-91] p 580 A85-33773
Rationalizing the choice of an actuating mechanism for a jet drive p 661 A85-39124
Summary of drive-train component technology in helicopters p 509 N85-23766
Special power train requirements for the next generation of rotary-wing aircraft p 510 N85-23769

Solid state compressor
[AD-A150790] p 531 N85-24302
Vibrations of rotors connected through couplings with backlash p 672 N85-28147

**MECHANICAL ENGINEERING**
Metallurgical aspects of metallic materials and damage tolerance in accessory gearboxes p 48 A85-10544
Activities report of the Department of Engineering p 127 N85-12202

**MECHANICAL MEASUREMENT**
Importance of phase measurements in mechanical fault diagnosis of rotating machinery p 442 A85-27960

**MECHANICAL PROPERTIES**
Strength analyses of aircraft structures using a mixed superelement method p 183 A85-17070
V-378A, a new modified bismaleimide matrix resin for high modulus graphite p 282 A85-21482
Engineering ceramics p 382 A85-24229
The SEPCARB carbon-carbon materials, friction materials p 383 A85-24820
Aluminum and titanium compared p 433 A85-26481
Development of lithium-containing aluminum alloys for the ingot metallurgy production route p 434 A85-27120
Ageing of structural film adhesives - Changes in chemical and physical properties and the effect on joint strength p 434 A85-27913
Permanent fasteners for light-weight structures — Book p 443 A85-28479
The uses of titanium p 519 A85-32023
Polycrystalline grain controlled castings for rotating compressor and turbine components p 519 A85-32380
Modification of titanium powder metallurgy alloy microstructures by strain energizing and rapid omni-directional compaction p 596 A85-35524
Mechanical properties of advanced titanium powder metallurgy compacts p 783 A85-40250
Titanium alloys for high temperature applications - A review p 783 A85-40922
Titanium and its alloys for aerospace p 784 A85-41003
Advanced composites - Present status and future trend p 784 A85-41005
Recent advances in research and applications of composite materials in aerospace structures p 784 A85-41021
The technology of hot isostatic pressing with reference to silicon nitride p 786 A85-43151
High performance PM alloys - The price of allowing for high stresses in components p 787 A85-43161
Development and properties of Ti-15V-3Cr-3Sn-3Al (Ti-15-3) p 851 A85-43662
Ti-17 properties — titanium alloy p 851 A85-43671
Ti-10V-2Fe-Al properties p 851 A85-43672
Laser speckle technique for burner liner strain measurements p 29 N85-10960
Report of the Technology and Test Panel p 446 N85-20370
Composite structural materials
[NASA-CR-175515] p 437 N85-21288
Elastomer toughened polyimide adhesives — bonding metal and composite material structures for aircraft and spacecraft
[NASA-CASE-LAR-12775-2] p 437 N85-21349
Research Reports: 1984 NASA/ASEE Summer Faculty Fellowship Program
[NASA-CR-171317] p 462 N85-22210
New materials and techniques for aircraft structures
[B8580074] p 653 N85-27861

**MECHANICAL SHOCK**
Shock capturing finite difference algorithms for supersonic flow past fighter and missile type configurations
[NASA-CR-174051] p 11 N85-10913
Alternative shock characterizations for consistent shock test specifications p 372 N85-18396

**MECHANICS (PHYSICS)**
Ill-posed problems in perturbation theory (Asymptotic methods of mechanics) p 233 A85-22364

**MEDICAL SCIENCE**
China report: Science and technology
[JPRS-CST-84-012] p 530 N85-24140
Proceedings of the 14th Army Science Conference. Volume 2: Principal authors I through O
[AD-A149201] p 919 N85-35890

**MELTING**
Design and implementation of a low-gravity solidification experiment package for the F-104 p 40 N85-11053

**MELTING POINTS**
Acquisition of detailed heat transfer behavior in complex internal flow passages
[SAE PAPER 841503] p 686 A85-39061
Study of advanced fuel system concepts for commercial aircraft and engines
[NASA-CR-174752] p 365 N85-19176
Jet fuel property changes and their effect on producibility and cost in the U.S., Canada, and Europe
[NASA-CR-174840] p 598 N85-27012
Fuel freeze point investigations
[AD-A152801] p 690 N85-28129
Measurement and correlation of jet fuel viscosities at low temperatures
[NASA-CR-174911] p 901 N85-34295

**MEMORY (COMPUTERS)**
Trends in computational capabilities for fluid dynamics p 601 N85-25172

**MENTAL PERFORMANCE**
Hygienic evaluation of noise in living quarters near an airport p 606 A85-33579

**MERCURY (METAL)**
The effect of mercury on the load-bearing capacity of the structural elements of aircraft p 435 A85-28864

**MERCURY ARCS**
Investigation of light source and scattering medium related to vapor-screen flow visualization in a supersonic wind tunnel
[NASA-TM-86290] p 190 N85-15144

**MESOSCALE PHENOMENA**
A method for determining mesoscale dynamic topography
[AD-D011412] p 300 N85-17506

**MESSAGE PROCESSING**
Data communications and teleprocessing systems on ground and on board of aircraft p 15 A85-12533
Observability of relative navigation using range-only measurements p 750 A85-42399

**METAL BONDING**
Surface characterization of anodic oxides on aluminum alloys by means of surface potential difference, surface impedance and surface morphology p 442 A85-27908
Bonded repair of damage p 910 A85-50083

**METAL COATINGS**
Annual Airline Plating and Metal Finishing Forum, 19th, San Antonio, TX, March 7-10, 1983, Proceedings p 123 A85-14126
Coating composition and the formation of protective oxide layers at high temperatures p 596 A85-36234
Effects of MAR-M247 substrate (modified) composition on coating oxidation coating/substrate interdiffusion — protective coatings for hot section components of gas turbine engines
[NASA-CR-174851] p 364 N85-19073
Effects of surface chemistry on hot corrosion life
[NASA-CR-174915] p 582 N85-26711

**METAL CRYSTALS**
Low temperature creep and fracture of near alpha titanium alloys p 687 A85-38748

**METAL CUTTING**
Very high speed lap with negative lift effect
[AD-D011711] p 796 N85-30345

**METAL FATIGUE**
Statistical fatigue crack propagation of IN100 at elevated temperatures p 41 A85-11614
Fatigue life prediction - Metals and composites p 42 A85-11752
An experimental study on effect of overload on fatigue life p 51 A85-12364
A statistical analysis of the fatigue strength characteristics of turbomachine blades p 110 A85-14801
Damage tolerance of metallic structures: Analyses methods and applications p 125 A85-15859
Air force damage tolerance design philosophy p 126 A85-15866
Two examples of failure-analyses in metal structures p 182 A85-16253
Development of a fatigue crack propagation model of Incoloy 901 p 280 A85-20758
Fatigue crack growth behavior of 7XXX aluminum alloys under simple variable amplitude loading p 280 A85-20759
Interpretation of fatigue crack growth in aluminum alloys under programmed block loading p 281 A85-20790
Fatigue crack growth under variable amplitude loading p 366 A85-23711
Application of laboratory test data to engineering design — stress corrosion threshold data applied to structural failure p 599 A85-33630
Fatigue-crack propagation in aircraft Duralumin shell structures p 695 A85-38918
The effect of coatings on the thermomechanical fatigue life of a single crystal turbine blade material
[AIAA PAPER 85-1366] p 689 A85-39744
Damage tolerance design for aircraft hubs made of cast magnesium alloy p 852 A85-44250
Effect of temperature on the fatigue and fracture properties of 7475-T761 aluminum p 900 A85-47973
Low temperature and loading frequency effects on crack growth and fracture toughness of 2024 and 7475 aluminum p 900 A85-47974
Constitutive modeling of engine materials
[AD-A146630] p 190 N85-1518
Cumulative damage modeling of fatigue crack growth p 267 N85-15741
Reaction-bonded and fiber-reinforced SiC static and dynamic gas turbine components
[BMFT-FB-T-84-302] p 672 N85-27874

**METAL GRINDING**
Automatic inspection and precision grinding of spiral bevel gears p 525 A85-31978
Very high speed lap with negative lift effect
[AD-D011711] p 796 N85-30345

**METAL IONS**
Ionic radii and electronegativities of effective sintering aids for Si3N4 ceramics p 519 A85-32850

**METAL JOINTS**
A biaxial fatigue test for dovetail joints — turbojet engines p 28 A85-11617
Fatigue strength of aluminized bolted joints
[MBB-VFW-53-84-OE] p 181 A85-16112
Permanent fasteners for light-weight structures — Book p 443 A85-28479
Durability calculation of wing panel element p 503 N85-24159

**METAL MATRIX COMPOSITES**
Composites for aluminum extrusions — for CH-47D Chinook helicopter p 311 A85-25100
Fibers for structurally reliable metal and ceramic composites p 687 A85-37484
Advanced composites - Present status and future trend p 784 A85-41005
High performance fibers for structurally reliable metal and ceramic composites — advanced gas turbine engine materials
[NASA-TM-86878] p 119 N85-12095
Composite structural materials
[NASA-CR-174077] p 121 N85-12966

**METAL OXIDES**
Coating composition and the formation of protective oxide layers at high temperatures p 596 A85-36234
Adhesive joint formation under field conditions
[AD-D011478] p 366 N85-19153

**METAL PARTICLES**
Chemical nature of wear debris — in lubricating oils used in gas turbine engines
[ASLE PREPRINT 84-LC-3A-1] p 363 A85-25964

**METAL POWDER**
Mechanical properties of advanced titanium powder metallurgy compacts p 783 A85-40250
Modern processes for superclean metal powder production p 795 A85-43154

**METAL PROPELLANTS**
Combustion studies of metallized fuels for solid fuel ramjets
[AIAA PAPER 85-1177] p 689 A85-39640

**METAL SHEETS**
Accumulation of fracture probability as damage accumulation for the prediction of service life and crack propagation in dynamically loaded aviation sheet metal p 122 A85-12944

**METAL SURFACES**
Improved surface preparation of AM355 for adhesive bonding p 180 A85-15999
An analysis of the pattern of longitudinal slot antenna on the metal cylinder covered with a high collision plasma layer p 183 A85-17173
Repair procedures for composite sinewave substructure p 686 A85-37380
New processing techniques for automated chemical removal of surface metal
[DGLR PAPER 84-085] p 789 A85-40305

**METAL WORKING**
Pilot production of superplastically formed/diffusion bonded T-38 main landing gear doors
[AIAA PAPER 84-0933] p 616 A85-39214

**METALLIZING**
Metallized fabrics, their properties and technical applications p 118 A85-15166
Electroforming of complex parts and heat exchanger systems
[MBB-Z-42-85-OE] p 599 A85-35256

**METALLURGY**
A history of superalloy metallurgy for superalloy metallurgists p 519 A85-32409

**METEORITES**
Thermoluminescence studies on Jilin meteorite p 463 A85-28043

**METEOROLOGICAL BALLOONS**
Long-duration flights using MIR (infrared balloon system) — for stratospheric study p 639 A85-38307
First results of a stratospheric experiment using a Montgolfiere Infra-Rouge (MIR) — balloon p 639 A85-38308
The University of Wyoming's small scientific balloon program p 639 A85-38309

**METEOROLOGICAL FLIGHT**

Characteristics of gust front and downdrafts from single Doppler radar data p 453 A85-28779

The history and evolution of aeronautical meteorology p 608 A85-35957

Nighttime observations of thunderstorm electrical activity from a high altitude airplane p 702 A85-39526

E and H fields measurements on the Transall C160 aircraft during lightning flashes [ONERA, TP NO. 1985-46] p 876 A85-47259

In-flight electrical conductivity measurements [ONERA, TP NO. 1985-61] p 912 A85-47264

Proceedings of Meteorological Motor Glider (MEMO) Workshop '84 [DFVLR-MITT-85-04] p 914 N85-35542

Motor glider meteorology p 914 N85-35543

Typical and historical aspects of motor gliders as meteorological measuring aircraft p 886 N85-35544

Determination of vertical air velocity using measurements of the aircraft motion p 914 N85-35545

A comparison between Falcon data and motor glider data p 914 N85-35547

Case studies for flux measurements along a low-flying route to the south of Munich p 915 N85-35548

Environmental-physical measurements and determination of atmospheric turbulence with the ASK-16 motor glider p 915 N85-35549

Partitioning of the vertical turbulent energy transport into positive and negative contributions — meteorology p 915 N85-35551

Aircraft measurements during the Bonn Experiment (BONEX 1) — meteorology p 915 N85-35552

Meteorological measurements with motor gliders in Poland p 915 N85-35555

The principles of wind measurement with the help of aircraft p 916 N85-35558

**METEOROLOGICAL INSTRUMENTS**

Optimizing the use of surface sensors for wind shear detection p 181 A85-16242

Evaluation of the forward scattering spectrometer probe. I - Electronic and optical studies p 291 A85-22168

Solving the pilot's wind-shear problem p 400 A85-27366

Development and testing of the RPS-1000 parachute system for the MMR-06-DART meteorological rocket system p 685 A85-38608

Solution of certain technical problems connected with the development of the MMR-06M meteorological rocket p 685 A85-38610

New AWOS provides synthesized-voice weather information p 907 A85-48853

ADAPS (Airborne Data Acquisition and Processing System) operation and maintenance manual [AD-A149297] p 419 N85-19983

**METEOROLOGICAL PARAMETERS**

Closely spaced independent parallel runway simulation [DOT/FAA/CT-84/45] p 117 N85-12902

Spring program summary, 1983 [PB84-222223] p 192 N85-15330

The visibility climatology of McMurdo Sound-Williams Field, Antarctica [AD-A148108] p 300 N85-17492

Investigation of air pollution impact in Eastern Bavaria: Measurement results from August and September, 1984 [DFVLR-FB-85-03] p 702 N85-28471

Contributions on the subject of longitudinal movements of aircraft in wind shears [NASA-TM-77837] p 702 N85-29432

**METEOROLOGICAL RADAR**

FAA's new terminal radar, the ASR-9 incorporates a separate weather channel p 15 A85-12080

Use of Doppler radar to detect weather hazards such as turbulence, wind shear, and gust fronts p 191 A85-17485

Scan rates of Next Generation Weather Radar p 191 A85-17486

Radar for storm forecasting and weather hazard warning [AIAA PAPER 85-0092] p 299 A85-19514

Aviation radar — Russian book p 244 A85-19805

Pulsed Doppler radars for weather observation and flight safety enhancement p 374 A85-24903

Development of a terminal sensor for hazardous weather and wake turbulence detection p 441 A85-27532

Comparisons of lidar and radar wind measurements made during the JAWS experiment — Joint Airport Weather Study p 452 A85-28770

JAWS data collection, analysis highlights, and microburst statistics p 452 A85-28771

The structure of a microburst - As observed by ground-based and airborne Doppler radar p 452 A85-28772

Evaluation of Doppler radar for airport wind shear detection p 452 A85-28774

Microbursts in JAWS depicted by Doppler radars, PAM, and aerial photographs p 453 A85-28777

Characteristics of gust front and downdrafts from single Doppler radar data p 453 A85-28779

The potential of the NEXRAD radar system for warning of bird hazards [AD-P004210] p 405 N85-19977

**METEOROLOGICAL RESEARCH AIRCRAFT**

The history and evolution of aeronautical meteorology p 608 A85-35957

Three powered sailplanes as meteorological instrumentation for atmospheric boundary layer studies at DFVLR [DFVLR-FB-84-50] p 653 N85-27862

A preliminary intercomparison between numerical upper wind forecasts and research aircraft measurements of jet streams [NASA-CR-167884] p 914 N85-35539

**METEOROLOGICAL SATELLITES**

Technical evaluation report on the 48th Symposium of the Avionics Panel on Space System Applications to Tactical Operations [AGARD-AR-203] p 349 N85-18988

**METEOROLOGICAL SERVICES**

Seventh Annual Workshop on Meteorological and Environmental Inputs to Aviation Systems 26-28 October 1983, Tullahoma, Tennessee p 191 A85-18324

Safety - Meteorological data vital for simulator training [AIAA PAPER 85-0091] p 240 A85-19513

Radio Technical Commission for Aeronautics, Annual Assembly Meeting and Technical Symposium, Washington, DC, November 15-17, 1983, Proceedings and Supplement p 382 A85-27527

The plan for an integrated FAA surveillance and weather system p 407 A85-27528

Cockpit requirements for weather information and data link messages p 401 A85-27529

Weather information in the USSR ATC systems p 441 A85-27530

**METEOROLOGY**

The history and evolution of aeronautical meteorology p 608 A85-35957

Developments in the area of air traffic control systems and the relation with meteorology [NLR-MP-84029-U] p 645 N85-27848

**METHOD OF CHARACTERISTICS**

Theoretical study on supersonic jet plumes p 206 A85-19439

Calculation of viscous nozzle flows by the unsteady method of characteristics [AIAA PAPER 85-0131] p 212 A85-19542

The split-coefficient matrix method for supersonic three dimensional flow p 550 A85-35771

Three dimensional CSCM method for the compressible Navier-Stokes equations with application to a multi-nozzle exhaust flowfield [AIAA PAPER 85-1193] p 726 A85-41419

Calculation of three-dimensional flowfields by the unsteady method of characteristics p 869 A85-48532

Modeling of propulsive jet plumes—extension of modeling capabilities by utilizing wall curvature effects [AD-A146262] p 128 N85-12324

**METHODOLOGY**

A design methodology for integrated avionic systems p 301 A85-21458

EMV assessment methodology for Navy guided weapons p 407 A85-26679

**MICHELSON INTERFEROMETERS**

Navigation, the Sagnac effects, and the Michelson experiment p 337 A85-25513

**MICROCOMPUTERS**

Micro-based control and display research — using flight simulators [AIAA PAPER 84-2688] p 165 A85-17867

Data flow methods for dynamic system simulation - A CSSL-IV microcomputer network interface p 458 A85-28614

The microcomputer in flight test data reduction p 458 A85-28649

Designing aircraft on small computers p 573 A85-36147

Microcomputer for aircraft gun-sight p 764 A85-42447

Control system design language implementation of a gas turbine starting controller [AD-A147896] p 266 N85-15732

Ultrasound instrumentation for the 7 inch Mach seven tunnel [NASA-CR-174277] p 305 N85-16586

Computer assisted flight schedule optimization [AD-A151669] p 611 N85-27623

Deployable Core Automated Maintenance System (DCAMS) [AD-A153695] p 706 N85-29839

A research program to reduce the interior noise in general aviation aircraft, index and summary [NASA-CR-176178] p 919 N85-35695

**MICROCRACKS**

Experimental and analytical study of ceramic-coated turbine-tip shroud seals for small turbine engines [NASA-TM-86881] p 353 N85-18057

**MICROELECTRONICS**

Moving object detection system using infrared scanning [AD-D011222] p 64 N85-10822

The effect of aircraft generated electromagnetic interference (EMI) on future avionics systems: A compendium [AD-A146380] p 189 N85-15101

Investigation of device and electronic interactions in GaAs device processing [AD-A149747] p 461 N85-22182

West Europe report: Science and technology [JPRS-WST-85-020] p 797 N85-31333

**MICROGRAVITY APPLICATIONS**

Parabolic aircraft flights - An effective tool in preparing microgravity experiments p 782 A85-42697

Superalloy microstructural variations induced by gravity level during directional solidification p 900 A85-48274

**MICROPHONES**

Ground plane microphone installation for measurement of aircraft flyover noise [AIAA PAPER 84-2353] p 63 A85-10889

Estimating the trajectory of an accelerationless aircraft by means of a stationary acoustic sensor p 64 A85-12300

A theoretical appraisal of the use of ground-plane microphones for aircraft noise measurements [NPL-AC-103] p 862 N85-33752

**MICROPROCESSORS**

Microprocessor control of turboprop engines p 263 A85-19877

A functional language approach in high-speed digital simulation p 458 A85-28615

Development of a microprocessor-controlled laser system for automated precision balancing p 443 A85-28828

General aviation avionics - An overview p 410 A85-29873

A digital interface for flight simulator cockpits [AIAA PAPER 85-1755] p 780 A85-42667

A generalized computer code for developing dynamic gas turbine engine models (DIGTEM) p 890 A85-49021

Control system design language implementation of a gas turbine starting controller [AD-A147896] p 266 N85-15732

Functional built-in-test in a pipelined image processor p 202 N85-16740

Design description of a microprocessor based Engine Monitoring and Control unit (EMAC) for small turboshaft [NASA-TM-86860] p 313 N85-17935

The AFTI/F16 terrain-aided navigation system [DE85-008411] p 645 N85-28935

**MICROSCOPES**

Microscopic identification of feathers in order to improve birdstrike statistics [AD-P004187] p 403 N85-19950

**MICROSCOPY**

Application of optical and electron microscopic techniques in the fractographic determination of fatigue crack growth rates p 532 N85-24334

**MICROSTRUCTURE**

Modification of titanium powder metallurgy alloy microstructures by strain energizing and rapid omni-directional compaction p 596 A85-35524

The influence of microstructure on the temperature-dependent flow properties of Ti-6Al-4V p 687 A85-38749

Feasibility study of the welding of SiC p 688 A85-39339

Titanium alloys for high temperature applications - A review p 783 A85-40922

Microstructures and properties of HIP, HIP plus forged and extruded P/M superalloy FGH95 p 786 A85-43137

Ultrasonic microstructural noise parameters in a powder metal alloy p 905 A85-47381

Development and fabrication of refractory bodies for gas turbine engines [BMFT-FB-T-84-180] p 113 N85-12899

**MICROWAVE EQUIPMENT**

Continued development of distance measuring equipment for real-time spatial positioning in military aircraft testing p 419 A85-26656

Microwave receivers enter a new era p 821 A85-44070

**MICROWAVE FREQUENCIES**

A wideband X100 low noise microwave frequency multiplier p 903 A85-47060

**MICROWAVE IMAGERY**

Passive millimeter wave imaging for guidance applications p 347 A85-24937

Microwave responses of the western North Atlantic
[NASA-CR-175888] p 699 N85-28191

**MICROWAVE LANDING SYSTEMS**

NASA-FAA helicopter Microwave Landing System curved path flight test p 485 A85-31993

MLS exists - We have tested it p 567 A85-36430

GPS-based certification for the microwave landing system p 642 A85-37825

Status and trends of microwave landing system
p 749 A85-41010

A broad view of how Microwave Landing Systems will change the environment p 821 A85-44307

Flight tests of the Digital Integrated Automatic Landing System (DIALS)
[NASA-CR-3859] p 116 N85-12900

Developments in the area of air traffic control systems and the relation with meteorology
[NLR-MP-84029-U] p 645 N85-27848

Evaluation of a fault tolerant system for an integrated avionics sensor configuration with TSRV flight data
[NASA-CR-172589] p 657 N85-28941

Microwave landing systems for heliport operators, owners and users
[FAA-PM-85-7] p 750 N85-29940

**MICROWAVE OSCILLATORS**

Development of active microwave ferromagnetic resonance eddy current probes and associated signal processing methods p 906 A85-47473

**MICROWAVE RADIOMETERS**

Passive millimeter wave imaging for guidance applications p 347 A85-24937

Microstrip antenna for multichannel radiometer
p 188 N85-15056

MIZEX, 1984, NASA CV-990 flight report
[NASA-TM-86216] p 800 N85-30451

**MICROWAVE REFLECTOMETERS**

Ultrashort-wave radar subsurface sounding of sea ice and earth covers p 374 A85-25594

**MICROWAVE SCANNING BEAM LANDING SYSTEM**

Microwave Scanning Beam Landing System performance during Shuttle landings
p 486 A85-32199

**MICROWAVE SENSORS**

Millimeter wave guidance applications - An overview
p 336 A85-24936

Signal processing consideration for a millimeter wave seeker p 338 A85-24938

**MICROWAVE TRANSMISSION**

Anomalous clutter interference in radar ranging
p 335 A85-24912

**MICROWAVES**

Microwave-powered, unmanned, high-altitude airplanes p 155 A85-16241

Design considerations for high-altitude, long-endurance, microwave-powered aircraft
[NASA-TM-86403] p 501 N85-23751

Microwave responses of the western North Atlantic
[NASA-CR-175888] p 699 N85-28191

**MIDAIR COLLISIONS**

Improved TCAS I for pilot warning indication
[AIAA PAPER 84-2736] p 153 A85-17891

The role of air traffic control in the co-ordination of civil and military operations p 749 A85-41728

TCAS II: Design and validation of the high-traffic-density surveillance subsystem
[DOT/FAA/PM-84/5] p 489 N85-22375

**MIE SCATTERING**

Investigation of light source and scattering medium related to vapor-screen flow visualization in a supersonic wind tunnel
[NASA-TM-86290] p 190 N85-15144

**MIG AIRCRAFT**

MiG-2000 p 412 A85-27839

China has developed a new version of fighter aircraft
[AD-A155293] p 830 N85-32118

**MIGRATION**

The study of bird migration over a water area in the northwestern portion of the Black Sea and adjacent areas in order to prevent bird-aircraft collisions
p 638 A85-37542

The use of small mobile radars to detect, monitor, and quantify bird movements
[AD-P004188] p 403 N85-19951

**MIL AIRCRAFT**

Flying qualities in the time domain
[AIAA PAPER 85-1849] p 842 A85-45878

**MILITARY AIR FACILITIES**

DoD Robotics Application Workshop Proceedings
[AD-A145867] p 71 N85-11978

Air force engine repair - Oklahoma City Air Logistics Center, Propulsion Division
[AD-P003999] p 71 N85-11980

Air force landing gear repair - Ogden Air Logistics Center Industrial Products and Landing Gear Division
[AD-P004001] p 71 N85-11982

Depot modernization at the Defense Logistics Agency
[AD-P004008] p 126 N85-11988

Future robotics program at San Antonio ALC (Air Logistics Center)
[AD-P004011] p 127 N85-11991

Supply center processes
[AD-P004014] p 127 N85-11993

Development of a pavement maintenance management system. Volume 9: Development of airfield pavement performance prediction models
[AD-A146150] p 117 N85-12089

Visibility monitoring in the southern California desert for the Department of Defense: Research on operations-limiting visual extinction. RESOLVE protocol
[AD-A146617] p 191 N85-15315

Installation restoration program. Phase 2: Stage 1 problem confirmation study, Duluth International Airport Duluth, Minnesota
[AD-A148318] p 278 N85-16885

Environmental and energy audits of Air Force government owned-contractor operated installations
[AD-P004138] p 375 N85-18474

Staff assistance to bases for bird hazards
[AD-P004205] p 405 N85-19972

Bird strike avoidance system for Dover AFB, Delaware
[AD-P004206] p 405 N85-19973

**MILITARY AIRCRAFT**

Proposed criteria for sound pressure levels in USAF aircraft
[AIAA PAPER 84-2294] p 60 A85-10849

A simplified approach for assessing spectrum loading effects in preliminary design --- crack propagation in flight vehicle structures p 48 A85-11613

Methodology to better predict structural maintenance requirements for individual aircraft
[AIAA PAPER 84-2411] p 69 A85-13517

Transatmospheric vehicles - A challenge for the next century
[AIAA PAPER 84-2414] p 98 A85-13519

Future transport aircraft design challenges
[AIAA PAPER 84-2416] p 98 A85-13521

Future technologies using the Lockheed HTB aircraft --- High Technology Test Bed
[AIAA PAPER 84-2466] p 70 A85-13552

Low cost demonstrators for maturing technologies --- in military aircraft development
[AIAA PAPER 84-2472] p 99 A85-13554

Future Air Force tactical airlifter considerations
[AIAA PAPER 84-2504] p 100 A85-13574

Near-term application of modern propulsion technology to a tactical transport
[AIAA PAPER 84-2506] p 109 A85-13576

Design for military aircraft on-board inert gas generation systems
[AIAA PAPER 84-2518] p 109 A85-13581

Robust countermeasures help 'leap-frog' the threat
p 92 A85-14012

Drones and RPVs - Technologies, systems and trends
p 103 A85-14856

Joint services vertical lift development (JVX) program - Looking to the future p 71 A85-15592

1984 SAE aerospace handbook - Lighting
p 156 A85-17246

Lockheed pushes Stol technology
p 137 A85-17773

Safety-of-flight and qualification testing for avionic systems
[AIAA PAPER 84-2670] p 175 A85-17853

Remote maintenance monitoring using a digital data link
[AIAA PAPER 84-2677] p 152 A85-17877

Common modular avionics - Partitioning and design philosophy
[AIAA PAPER 84-2745] p 184 A85-17896

High density modular avionics packaging
[AIAA PAPER 84-2749] p 184 A85-17898

U-2R, TR-1 - Lockheed's black ladies
p 158 A85-18472

Unique weight and balance aspects of V/STOL airplane design
[SAWE PAPER 1518] p 159 A85-18809

Environmental test capabilities of the Air Force McKinley Climatic Laboratory
[AIAA PAPER 85-0089] p 273 A85-19512

Combat aircraft: Flight vehicles, power plants, and their maintenance --- Russian book p 199 A85-19812

Army, NASA researching needs for future engine components p 263 A85-20060

Radar cross section lectures --- Book
p 289 A85-20915

Hardware design techniques --- systems integration for civil and military aircraft avionics p 244 A85-21459

Integrated communications - A designers view --- for civil and military aircraft avionics p 245 A85-21462

Problems in the quantification of aircrew automated escape systems (AAES) in-service reliability
p 331 A85-22766

Escape system operation through adaptive control
p 331 A85-22769

Discovery of military aircraft accident investigation reports p 378 A85-24711

USAF doubles engine-test capability - $625 million boost for Arnold facility p 357 A85-25920

Aquila, the next-generation RPV - Advanced capability, at a price p 341 A85-25921

Analysis of KC-10 loading alternatives
[SAE PAPER 840701] p 332 A85-26313

Operational considerations for the design of military fiber optic test equipment p 440 A85-26813

Intelligent test generator --- for Naval aircraft maintenance p 456 A85-26821

The Air Force modular automatic test equipment (mate) maintenance concepts p 440 A85-26825

Continued development of distance measuring equipment for real-time spatial positioning in military aircraft testing p 419 A85-28656

Soviet Doctrine and Aviation Technology Study Seminar, Washington, DC, April 12, 13, 1985, Proceedings
p 463 A85-29949

Army aviation maintenance data and supportability interface p 465 A85-31980

Aviation of the present and future --- Russian book
p 541 A85-33396

C-17 will fill long-haul airlift gap p 570 A85-33850

C-17 cleared for take-off --- new heavy lifter for US Air Force p 572 A85-35353

Military missions call for oblique wing
p 573 A85-36150

Tweety-bird replacement --- from T-37B to Fairchild T-46A trainer aircraft p 646 A85-37945

Secondary power generation system considerations for advanced aircraft
[SAE PAPER 841604] p 650 A85-39164

United States Air Force engine damage tolerance requirements
[AIAA PAPER 85-1209] p 665 A85-39657

Integration of vectoring nozzles in a STOL transonic tactical aircraft
[AIAA PAPER 85-1285] p 667 A85-39699

The development of the generalized escape system simulation program
[ASME PAPER 84-WA/DSC-20] p 651 A85-39869

New nonmetallic structural composites for military-aircraft construction
[DGLR PAPER 84-102] p 783 A85-40320

A LANTIRN for seeing in the dark
p 763 A85-41051

The V-22 Osprey p 755 A85-41068

Aerospace design and projected defence policy
p 708 A85-41317

Gulfstream - Versatility through concentration
p 756 A85-41539

Aspects of modern military aero engines
p 770 A85-41848

Microcomputer for aircraft gun-sight
p 764 A85-42447

The metamorphosis of the military aircraft cockpit
p 764 A85-42893

Risk assessment of an aging military aircraft
[AIAA PAPER 84-0851] p 759 A85-42933

Experimental investigation of the short period response requirements of MIL-F-8785C --- flying qualities of piloted aircraft
[AIAA PAPER 85-1806] p 839 A85-43856

Lockheed's High Tech Test Bed p 825 A85-44746

Defense Mapping Agency digital data bases --- new sub-systems for current and near operational aircraft
p 821 A85-44988

Digital map products and the avionics requirement - Can DMA meet the challenge? p 821 A85-44989

The switched network approach to high speed communications p 822 A85-44994

Meeting the electric power needs for aircraft digital electronics p 835 A85-45036

Effects of specification on airborne display hardware
p 833 A85-45102

Real-time management of strategic penetrator missions p 810 A85-45153

Low-cost demonstrators for maturing technologies --- in military aircraft development p 827 A85-45842

Fuel conservative guidance for shipboard landing of powered-lift STOL aircraft
[AIAA PAPER 85-1889] p 827 A85-45911

Integration of digital aircraft controls - Benefits and dangers
[AIAA PAPER 85-1951] p 851 A85-45937

Flight testing of avionic systems on the ground
p 897 A85-49002

Evaluation of the benefits of advanced avionics system technologies through computer simulation
p 869 A85-49003

Determining operating and support costs with USAF DO56 maintenance data collection system
p 865 A85-49553

Squadron Maintenance and Repair Techniques (SMART) validation test report p 866 A85-49584

Handheld computer weight and balance computations for military aircraft
[SAWE PAPER 1582] p 877 A85-49907

How much does it cost/how much does it weigh?
[SAWE PAPER 1593] p 919 A85-49913

The Air Force stock fund and aircraft availability
[AD-A148653] p 203 N85-16761

Mission-oriented requirements for updating MIL-H-8501. Volume 1: STI proposed structure — military rotorcraft
[NASA-CR-177331-VOL-1] p 271 N85-16877

Mission-oriented requirements for updating MIL-H-8501. Volume 2: STI background and rationale — military rotorcraft
[NASA-CR-177331-VOL-2] p 271 N85-16878

Using the control system design environment in the design of a data link receiver unit for the Coast Guard HH-65A helicopter
[AD-A148624] p 271 N85-16880

Reliability predictions for military avionics. Royal Signals and Radar Establishment reliability prediction method no. 250
[BR69221] p 505 N85-22388

High specific power aircraft turn maneuvers: Tradeoff of time-to-turn versus change in specific energy
[AD-A151701] p 575 N85-25257

Generation of flight paths using heuristic search
[AD-A151949] p 589 N85-26694

Operations research
[B8561897] p 704 N85-28712

**MILITARY AVIATION**

25,000 flight hours in the Alpha jet by the 8th chase squadron. I p 159 A85-18725

What will aircraft capabilities and needs really be in 2005? p 382 A85-27534

Evolution of Soviet air power p 463 A85-29950

Keeping up with operational loads in the French Air Force: Defining new equipment p 292 N85-15681

Development of NATOPS (Naval Air Training and Operating Procedure Standardization) performance software for the H-46D helicopter
[AD-A156089] p 887 N85-35190

**MILITARY HELICOPTERS**

Descriptors for rotary wing aircraft noise
[AIAA PAPER 84-2292] p 59 A85-10847

Hughes' new attackers p 18 A85-12175

Inspection and repair of advanced composite airframe structures for helicopters p 70 A85-14047

ACAP crashworthiness analysis by KRASH
p 103 A85-14048

Adaptive fuel control for helicopter applications
p 110 A85-14049

Light Helicopter Family (LHX) - The U.S. Army's future light rotorcraft fleet p 71 A85-15591

PAH-2 - The German/French connection
p 104 A85-15593

A terrain data/digital map system for LHX — Light Helicopter
[AIAA PAPER 84-2723] p 152 A85-17885

Weight-aspects of the advanced composite airframe program (ACAP)
[SAWE PAPER 1517] p 159 A85-18806

Advanced helicopter technology - Industry girds for challenges of evolving operational needs
p 199 A85-20057

Technology gains expected to yield LHX size, weight, cost reductions p 249 A85-20058

Mi-28 - The Soviets create Havoc p 250 A85-20147

K747 composite main rotor blade modification, analysis and qualification for new high temperature requirements
p 251 A85-21378

Advanced composites - Designed to survive — helicopter safety in modern battlefield p 251 A85-21387

Environmental effects and durability evaluation of advanced composite fuselage structures
p 251 A85-21388

The impact of integrated systems - The helicopter designer's viewpoint p 252 A85-21467

Parameters affecting helicopter interactional aerodynamics in ground effect p 314 A85-23147

Avionics systems for helicopters of the next generation p 338 A85-25851

Dornier helicopter avionics experiments
p 338 A85-25852

Helicopter cargo - New opportunities through technology transfer
[SAE PAPER 840703] p 342 A85-26314

From Hind to Havoc p 412 A85-27840

Insights into helicopter air combat maneuverability
p 493 A85-31957

A balanced approach to the establishment of structural component lives p 524 A85-31959

The application of geodetic construction to helicopter airframes p 494 A85-31961

An assessment of the impact of technology on VTOL weight prediction p 495 A85-31974

Design considerations for helicopter effectiveness in air-to-air combat p 482 A85-31995

JVX design update p 496 A85-31999

Internal aerodynamics of infrared suppressors for helicopter engines p 507 A85-32012

LHX - Not just another helicopter p 572 A85-35351

The evaluation of aerodynamic coefficients for projectiles fired from a hovering helicopter
p 618 A85-37203

LHX - A giant leap p 648 A85-38438

Dynamics of helicopter air combat
[DGLR PAPER 84-124] p 801 A85-40337

Helicopter air-to-air from the R&D perspective
p 708 A85-40536

Among the weeds at night - Transition to night NOE flying p 763 A85-41532

First Havoc, now Hokum - What role for the new Soviet helicopter? p 756 A85-41533

Development of a simulator facility for helicopter air-to-air combat
[AIAA PAPER 85-1733] p 780 A85-42662

The metamorphosis of the military aircraft cockpit
p 764 A85-42893

Static test techniques for composite airframe structures developed on the U.S. Army/Sikorsky ACAP
p 759 A85-43222

Ultrasonic weld bonding of primary structures
p 853 A85-43546

Electronics - Key to future military helicopters
p 831 A85-44769

Kalman filter implementation in the Litton LR-80 AHRS
p 823 A85-45032

The Soviets explain the Ka-32 helix
p 828 A85-46524

Ka-32 multimission helicopter designed to operate in harsh climate p 828 A85-46597

Advanced avionics for the next generation military helicopters p 888 A85-48072

Modeling combat maintenance operations
p 866 A85-49571

Airworthiness and flight characteristics test of the JOH-6A light combat helicopter configured with a wire strike protection system
[AD-A144880] p 20 N85-10038

Airworthiness and Flight Characteristics (A and FC) test of the EH - 1X/EH - 1H helicopter configurations
[AD-A144881] p 20 N85-10039

US Army helicopter operational flight loads
p 254 N85-15675

Speed benefits of tilt-rotor designs for LHX
[NASA-CR-166437] p 255 N85-15717

A digital piloting system for the combat helicopter
p 260 N85-16806

Tactical HF communication for military helicopters using the NVIS mode p 297 N85-16807

Evaluation of nose, roof, and mast mounted sensor platforms for piloting and sighting, integrated in future combat helicopters p 260 N85-16808

The design and development of an integrated core system for battlefield helicopters p 260 N85-16811

Evolution toward a multi-bus architecture for Army helicopter avionic systems p 260 N85-16812

A review of US Army aircrew-aircraft integration research programs p 270 N85-16814

A simulator for studying helicopter weapons systems
p 277 N85-16816

Preliminary airworthiness evaluation AH-1S (MC) helicopter with external fuel tanks installed
[AD-A148091] p 258 N85-16865

Cost-estimating relationships for tactical combat aircraft
[AD-A151575] p 575 N85-25255

Piloted simulation of one-on-one helicopter air combat at NOE flight levels
[NASA-TM-86686] p 586 N85-26720

A new main rotor hub for the AS 332 Super Puma
[SNIAS-851-210-102] p 761 N85-31047

Research Flight Simulator for Helicopters (RFSH): Description and application to fire control system design
[SNIAS-851-210-106] p 761 N85-31050

**MILITARY OPERATIONS**

Calculation of the exchange ratio for the Adaptive Maneuvering Logic program
[AIAA PAPER 85-0311] p 199 A85-19658

Supernormal flight may change battle flight concepts into the indefinite future p 424 A85-29195

A minimum-exposure, minimum-elevation military aircraft heuristic route selection model p 482 A85-31774

Army aviation today and tomorrow
p 139 N85-14810

Marine helicopter missions p 139 N85-14811

Attack helicopter (AH-1T) cockpit systems integration
p 161 N85-14826

Distribution and storage of aviation turbine fuel for military operations in northern Australia
[AD-A147180] p 283 N85-15921

The Air Force can improve its forecasts of aircraft spare parts requirements
[AD-A147911] p 308 N85-16682

Estimating wartime support resource requirements. Statistical and related policy issues
[AD-A147923] p 308 N85-16685

Operational requirements versus technological capabilities p 204 N85-16798

Automatic briefing and mission management systems for battlefield support p 259 N85-16799

Standard Attitude Heading Reference System (SAHRS) full scale development program p 246 N85-16804

Integrated control and display systems for helicopter battlefield mission management p 260 N85-16805

Evaluation of nose, roof, and mast mounted sensor platforms for piloting and sighting, integrated in future combat helicopters p 260 N85-16808

Military applications of the Singer Link-Miles IMAGE visual system
[AD-P004337] p 359 N85-17991

Personnel protection concepts for advance escape system design p 334 N85-19658

Potential impact of Navstar GPS on NATO tactical operations p 459 N85-20763

Testing of the digital flight control system of the German CCV fighter experimental aircraft p 514 N85-22361

Fiber optics applications for MIL-STD-1760
[AD-A151113] p 575 N85-25251

The evolution of active control technology systems for the 1990's helicopter p 591 N85-26758

The NAVTAG (Naval Tactical Game) system and its modification to include the SH-60B helicopter
[AD-A152004] p 611 N85-27624

Future of V/STOL aircraft systems: A survey of opinions
[NASA-TM-86689] p 654 N85-28937

Introduction to European air traffic control
[AD-A156328] p 878 N85-35176

A guide to USAF helicopter instrument flight procedures
[AD-A156102] p 880 N85-35182

RAFTS: A T-38 replacement for the 21st century
[AD-A156103] p 887 N85-35191

Next generation gunship
[AD-A156361] p 887 N85-35193

**MILITARY TECHNOLOGY**

Advanced concepts in combat automation
[AIAA PAPER 84-2458] p 99 A85-13546

Advanced tactical fighter p 102 A85-13919

Communication control group technology insertion for the S-3A p 93 A85-14454

The Navy's tactical data network
[AIAA PAPER 84-2716] p 152 A85-17882

General Dynamics Convair Division totally reconfigurable embedded computer
[AIAA PAPER 84-2748] p 195 A85-17900

The F110 engine monitoring system
[AIAA PAPER 84-2754] p 166 A85-17902

Military electronics - Why so unreliable?
p 185 A85-18440

New generation military tactical airborne communications systems - The interoperability challenge
p 244 A85-19275

Military avionics - Increasing integration at all levels
p 244 A85-20221

Flight test techniques for the advanced fighter technology integration (AFTI) F-16 p 340 A85-24230

The principles and practice of modern AEW radar — Airborne Early Warning p 336 A85-24916

Simulating 'the right stuff' p 369 A85-26249

AUTOTESTCON '83; Proceedings of the Conference, Fort Worth, TX, November 1-3, 1983
p 455 A85-26776

Integration Status Accounting Program (ISAP) - A data collection and analysis program for ATE and TPS development p 455 A85-26783

Harrier GR5, second-generation jump jet - Easier ride, greater punch p 571 A85-33870

Color CRT in the F-15 p 656 A85-38954

'Fancy radio' develops split personality
p 749 A85-41057

Pilots wary of tactical information systems
p 763 A85-41058

Electronic warfare - The next 15 years
p 792 A85-41547

A modern air combat dome visual system
[AIAA PAPER 85-1747] p 780 A85-42665

Air Force standardizing avionics p 831 A85-44074

Avionics as an expert systems domain
p 833 A85-45001
Stirling engines for Air Force Applications
p 855 A85-45470
DoD/industry - R&M technology study analysis
p 909 A85-49538
Establishing realistic requirements for reliability, maintainability, and built-in-test p 909 A85-49539
Documentation and separate test program development is most important for test/maintenance
p 203 N85-16745
Helicopter Guidance and Control Systems for Battlefield Support
[AGARD-CP-353] p 204 N85-16797
Technical evaluation report on the 46th Symposium of the Avionics Panel on Space System Applications to Tactical Operations
[AGARD-AR-203] p 349 N85-18968
Program Manager: The journal of the defense systems management college, volume 14, number 2, March-April 1985
[AD-A154219] p 808 N85-32031
Proceedings of the 14th Army Science Conference. Volume 2: Principal authors I through O
[AD-A149201] p 919 N85-35680

**MILLIMETER WAVES**
A real time (on line) adaptive target detection technique for an airborne millimeter wave seeker design
p 347 A85-24267
Millimeter wave guidance applications - An overview
p 336 A85-24936
Passive millimeter wave imaging for guidance applications p 347 A85-24937
Signal processing consideration for a millimeter wave seeker p 336 A85-24938

**MILLING MACHINES**
T700 cutter life improvement program
[AD-A150450] p 528 N85-23089
The application of numerical control (NC) in manufacturing wind tunnel models
[B8580078] p 696 N85-28140

**MINERAL EXPLORATION**
China report: Science and technology
[JPRS-CST-84-012] p 530 N85-24140

**MINIATURE ELECTRONIC EQUIPMENT**
Miniature electrooptical air flow sensor
[NASA-CASE-LAR-13065-1] p 447 N85-20295

**MINIATURIZATION**
Manufacturing Methods and Technology (MM/T) specifications for miniature cathode ray tube
[AD-A145597] p 54 N85-11298

**MINICOMPUTERS**
Some problems in the development of CAD systems -- for design of minicomputer digital components
p 200 A85-20466
A numerical analysis of the aerodynamic properties of wings using a minicomputer p 472 A85-31777
The use of minicomputers for automating design tasks during the static testing of aircraft structures
p 515 A85-31782
Improving engine testing thru automation using a minicomputer p 829 A85-46823

**MINIMAX TECHNIQUE**
Information approach to fixed-gain design
p 455 A85-26606
Optimization of control systems using the minimax criterion — Russian book p 801 A85-39975
Minimax optimal control in the reentry of a space glider p 40 N85-11124

**MINIMUM DRAG**
Arrays for minimum wave drag of bodies of revolution
[AIAA PAPER 85-0449] p 249 A85-19758
Optimal aerodynamic configurations in a twisted hypersonic gas flow p 389 A85-28390
Arrays of bodies of revolution for minimum wave drag
p 881 A85-49136

**MIRAGE AIRCRAFT**
Mirage 2000 fighter combines acceleration, low-speed stability p 646 A85-38243
The Icarus multicolor visual display system for fighter aircraft p 831 A85-44051
All-weather low altitude penetration
p 821 A85-44052
Aeroelastic analysis and the identification of flight loads -- Mirage 2000 aircraft p 254 N85-15679
Map display for helicopters p 259 N85-16801
A comparison of fatigue lives under a complex and a much simplified flight-by-flight testing sequence — Mirage 3 aircraft
[ARL/STRUC-TM-386] p 344 N85-18052
Unsteady aerodynamic characterization of a military aircraft in vertical gusts
[NASA-TM-77810] p 396 N85-21110
Calculation of unsteady transonic flow around a high swept wing p 555 N85-25184

**MIRAGE 3 AIRCRAFT**
Repair of Mirage III aircraft using the BFRP crack-patching technique p 137 A85-16244
Modifying and testing a canard on a Swiss Mirage III - Flight test status report p 158 A85-18610
Fatigue crack propagation in mirage 1110 wing main spar specimens and the effects of spectrum truncation on life
[ARL/STRUC-R-405] p 417 N85-21152
Tensile and fracture toughness properties of Mirage III spars
[AR-003-019] p 605 N85-25899
Further investigations to improve the fatigue life of the Mirage 1110 wing main spar
[ARL/STRUC-TM-387] p 654 N85-26938

**MISALIGNMENT**
Load sharing in a planetary gear stage in the presence of gear errors and misalignment
[ASME PAPER 84-DET-54] p 580 A85-33766

**MISS DISTANCE**
Friendly ejection seat trajectory computer program
p 330 A85-22754

**MISSILE BODIES**
Flow visualization of high angle of attack vortex wake structures
[AIAA PAPER 85-0102] p 296 A85-19520
Correlation and analysis of oil flow data for an air-breathing missile model
[AIAA PAPER 85-0452] p 224 A85-19761
Supersonic aerodynamic characteristics of elliptic cross section bodies
[AIAA PAPER 85-1607] p 713 A85-40719
Nonlinear applications of slender-body theory to missile aerodynamics
[AIAA PAPER 85-1775] p 812 A85-43836
Flow modeling at the base region of missiles
[SNIAS-851-320-101] p 782 N85-31226

**MISSILE COMPONENTS**
Aerodynamic prediction of elliptically-shaped missile configurations using component build-up methodology
[AIAA PAPER 85-0271] p 216 A85-19624

**MISSILE CONFIGURATIONS**
Evaluation of missile aerodynamic characteristics using rapid prediction techniques p 80 A85-15505
Aerodynamic prediction of elliptically-shaped missile configurations using component build-up methodology
[AIAA PAPER 85-0271] p 216 A85-19624
Aerodynamic configured missiles - Promise and future
[AIAA PAPER 85-0345] p 248 A85-19684
Interactive design technique for arbitrary shaped, airbreathing missile configurations
[AIAA PAPER 85-0496] p 249 A85-19790
Supersonic aerodynamic characteristics of elliptic cross section bodies
[AIAA PAPER 85-1607] p 713 A85-40719
Comparison of experiment and computation for a missile base region flowfield with a centered propulsive jet
[AIAA PAPER 85-1618] p 714 A85-40725
Wind tunnel tests on a tube-launched missile configuration with a deflectable nose control and a novel wrap-around fin stabiliser
[AR-003-696] p 8 N85-10003
Shock capturing finite difference algorithms for supersonic flow past fighter and missile type configurations
[NASA-CR-174081] p 11 N85-10913
An overview of some monoplanar missile programs
[NASA-TM-86330] p 138 N85-14796

**MISSILE CONTROL**
Line-of-sight reconstruction for faster homing guidance
p 153 A85-18326
Millimeter wave guidance applications - An overview
p 336 A85-24936
Digital homing guidance - Stability vs performance tradeoffs p 406 A85-26440
Status and concerns for bank-to-turn control of tactical missiles p 423 A85-26442
Dual control guidance for simultaneous identification and interception
[AD-A154607] p 407 A85-27510
Digital simulation of adaptive guidance and control system of a homing missile p 409 A85-28604
Application of modern control to bank-to-turn guidance using digital simulation p 423 A85-28608
Fixed step friction model p 443 A85-28609
Radio frequency test facility for evaluation of missile hardware p 432 A85-28621
A new guidance law for homing missiles
p 486 A85-32793
A realistic aerial combat duel as a differential game study p 535 A85-33287
An analog CMOS autopilot p 583 A85-34096
An evading path against 3 D obstacles
p 674 A85-38357
Analysis of missile control system stability with Monte Carlo method p 776 A85-42438

Prediction of cruciform all-movable contro characteristics at transonic speeds
[AD-A147291] p 239 N85-18632
Optical data processing for missile guidance
[AD-A149346] p 339 N85-18972

**MISSILE DEFENSE**
Influence of propulsion/mission profile combinations upon generic missile penetration of a hypothetica defense
[AIAA PAPER 85-0495] p 249 A85-19789

**MISSILE DESIGN**
A modelling approach for autopilot design of a rolling missile p 115 A85-13691
Designing a cruise missile - General Dynamics' BGM-109 Tomahawk p 158 A85-18441
Aerodynamic prediction of elliptically-shaped missile configurations using component build-up methodology
[AIAA PAPER 85-0271] p 216 A85-19624
Influence of propulsion/mission profile combinations upon generic missile penetration of a hypothetical defense
[AIAA PAPER 85-0495] p 249 A85-19789
Interactive design technique for arbitrary shaped, airbreathing missile configurations
[AIAA PAPER 85-0496] p 249 A85-19790
The application of some lifting-body reentry concepts to missile design
[AIAA PAPER 85-0497] p 279 A85-19791
Mode test of a wing pair of the HARM missile
p 415 A85-30162
How autopilot requirements constrain the aerodynamic design of homing missiles p 894 A85-47717
The application of some lifting-body reentry concepts to missile design
[NASA-TM-86394] p 476 N85-22366
Simulation: A tool for cost-effective systems design and live test reduction p 613 N85-26657
Flow modeling at the base region of missiles
[SNIAS-851-320-101] p 782 N85-31226

**MISSILE LAUNCHERS**
Designing a cruise missile - General Dynamics' BGM-109 Tomahawk p 158 A85-18441
Wind tunnel tests on a tube-launched missile configuration with a deflectable nose control and a novel wrap-around fin stabiliser
[AR-003-696] p 8 N85-10003

**MISSILE RANGES**
High dynamic, low volume GPS receiver
p 487 A85-32206

**MISSILE SIMULATORS**
Influence of propulsion/mission profile combinations upon generic missile penetration of a hypothetical defense
[AIAA PAPER 85-0495] p 249 A85-19789

**MISSILE STRUCTURES**
Structural uses of aramid fibers as a plastic reinforcement in aircraft and missiles
p 119 A85-15631
Radio frequency test facility for evaluation of missile hardware p 432 A85-28621
Mode test of a wing pair of the HARM missile
p 415 A85-30162

**MISSILE SYSTEMS**
Simulation: A tool for cost-effective systems design and live test reduction p 613 N85-26657

**MISSILE TESTS**
EMV assessment methodology for Navy guided weapons p 407 A85-26679

**MISSILE TRACKING**
Modeling and simulation in missile target tracking
p 409 A85-28607

**MISSILE TRAJECTORIES**
A missile duel between two aircraft
p 703 A85-39563
Fast response impulse generator
[AD-D011283] p 178 N85-14853

**MISSILES**
Drones and RPVs - Technologies, systems and trends
p 103 A85-14856
Fiscal year 1986 technical objective document
[AD-A151030] p 539 N85-25000
Transonic and supersonic wind tunnel tests on control effectiveness on schematic missile configurations
[FFA-TN-1983-20] p 743 N85-31020
Transonic and supersonic wind tunnel tests on control effectiveness on schematic missile configurations: Supplement
[FFA-TN-1983-20-SUPPL] p 743 N85-31021

**MISSION PLANNING**
The AFA computerized mission planning system
p 347 A85-25853
A mission oriented approach to cockpit design as applied to observation and attack helicopters
p 497 A85-32011

Heuristically-guided planning for mission control/decision support
[AIAA PAPER 85-1909] p 650 A85-45919
Automatic briefing and mission management systems for battlefield support p 259 N85-16799
A Computer-generated topographic display system for navigation and mission planning in helicopters
p 259 N85-16800
The development of a performance and mission planning program for the A-7E aircraft
[AD-A151717] p 576 N85-25256
Mission requirements and handling qualities
p 680 N85-28918
Mission analysis of solar powered aircraft
[NASA-CR-172583] p 782 N85-31072

**MIST**
Description of a technique to measure spray distribution in an air stream
[AD-A149780] p 396 N85-21122

**MIXED OXIDES**
Plastic flow of plasma sprayed ceramics
p 382 A85-24161

**MIXERS**
Inviscid steady flow past turbofan mixer nozzles
p 168 A85-17041
Three-dimensional inviscid flow analysis of turbofan forced mixers
[AIAA PAPER 85-0086] p 210 A85-19510
Performance estimation for turbofans with and without mixers p 580 A85-34014
On selecting bypass mixers for turbofan engines
p 354 N85-18207
Flameholder with integrated air mixer
[AD-D011549] p 421 N85-21161

**MIXING**
An approximate method for calculating flow in the mixing chambers of bypass engines under conditions of incomplete mixing of gas flows p 350 A85-23989
Evaluation of experimental epoxy monomers
[NASA-TM-87476] p 597 N85-26996

**MIXTURES**
Nitrogen analysis by chemiluminescence
[AD-A156197] p 902 N85-35308

**MOBILE COMMUNICATION SYSTEMS**
Anomalous interference in Omega VLF wave propagation on east-to-west equatorial paths
p 14 A85-11024
Aeronautical satellite data link study
p 655 A85-45340

**MODAL RESPONSE**
Experimental methods for the analysis of dynamic phenomena found in helicopters p 155 A85-16199
The treatment art of rigid-substructures in modal synthesis methods p 163 A85-17169
Modal analysis of flexible aircraft dynamics with handling qualities implications p 423 A85-26431
Natural mode analyses of N blades disc coupled system - Modal synthesis of symmetric structure with Cnv group
p 445 A85-29147
Mode test of a wing pair of the HARM missile
p 415 A85-30162
Active vibration suppression of a cantilever wing
p 497 A85-32344
Modal insensitivity with optimality --- in feedback control p 917 A85-47735
F-8 refueling boom ground vibration test
[NASA-TM-84914] p 255 N85-15713

**MODELS**
Effects of surface chemistry on hot corrosion life: Overview p 32 N85-10960
A study of transonic flutter of a two-dimensional airfoil using the U-g and p-k methods
[LR-615] p 398 N85-21121
Study of longitudinal landing flying qualities evaluation using pilot model theory
[AD-A152194] p 577 N85-26702
Airport and airway system cost allocation model. Volume 7: User's manual
[AD-A152877] p 683 N85-27917
The impact of supercomputers on experimentation: A view from a national laboratory
[NASA-TM-86822] p 918 N85-34510
FAA requirements for model to support capacity, delay, noise and energy programs
[AD-A155815] p 860 N85-35179
Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 2
[NASA-CR-167963] p 913 N85-35535
Comparative analyses of operational forecasts versus actual weather conditions in airline flight planning: Summary report
[NASA-CR-167966] p 913 N85-35538

**MODULATION**
An explanation for the asymmetry of the modulation sidebands about the tooth meshing frequency in epicyclic gear vibration p 441 A85-27480

**MODULATORS**
Very-short-pulse modulator using asymmetric thyristors p 188 A85-18486

**MODULES**
Modular programming structure applied to the simulation of non-linear aircraft models p 132 A85-15661
Common modular avionics - Partitioning and design philosophy
[AIAA PAPER 84-2745] p 184 A85-17896
Modular avionics packaging standardization
[AIAA PAPER 84-2746] p 184 A85-17899

**MOISTURE**
Flight-service program for advanced composite rudders on transport aircraft
[NASA-CR-174537] p 780 N85-29950

**MOISTURE CONTENT**
Effects of moisture on high performance laminates
p 435 A85-29929
Condensation phenomena in supersonic nozzles
p 393 A85-29989

**MOISTURE METERS**
Microstrip antenna for multichannel radiometer
p 188 N85-15056

**MOISTURE RESISTANCE**
V-378A, a new modified bismaleimide matrix resin for high modulus graphite p 282 A85-21482

**MOJAVE DESERT (CA)**
Visibility monitoring in the southern California desert for the Department of Defense: Research on operations-limiting visual extinction, RESOLVE protocol
[AD-A146617] p 191 N85-15315

**MOLECULAR INTERACTIONS**
Design and testing of axisymmetric nozzles for ion-molecule reaction studies between 20 K and 160 K
p 596 A85-33537

**MOLECULAR PHYSICS**
The 'solution-large molecules' method for calculating the equilibrium composition of heterogeneous systems
p 687 A85-39101

**MOLECULAR STRUCTURE**
The influence of fuel molecular composition upon flame-tube temperature and flame radiation in a model gas-turbine primary zone
[K234] p 520 N85-22646

**MOMENT DISTRIBUTION**
Force and moment measurements on a 74 deg delta wing with an apex flap
[NASA-CR-166081] p 12 N85-10918

**MOMENTS**
Experimental trim drag values and flow-field measurements for a wide-body transport model with conventional and supercritical wings
[NASA-TP-2071] p 12 N85-10920

**MOMENTUM**
Turbulent boundary layers over rough surfaces hypersonic flow
[AD-A145040] p 10 N85-10016
Turbulent drag reduction research
p 237 N85-16788
Theoretical investigation of dynamic stall using a momentum integral method
[AD-P004170] p 325 N85-17965
Investigation of potential and viscous flow effects contributing to dynamic stall
[AD-A151696] p 602 N85-25773

**MOMENTUM THEORY**
Families of variational principles for the semi-inverse and type-A hybrid problems on a S2-streamsheet in mixed-flow turbomachines p 622 A85-37930

**MONITORS**
Integrated on-board monitoring and test concepts
[AIAA PAPER 84-2709] p 166 A85-17875
System status display information
[NASA-CR-172347] p 107 N85-12889
Tornado: Structural Usage Monitoring System (SUMS) p 292 N85-15680
Design description of a microprocessor based Engine Monitoring and Control unit (EMAC) for small turboshaft
[NASA-TM-86860] p 313 N85-17935

**MONOCOQUE STRUCTURES**
Fatigue-crack propagation in aircraft Duralumin shell structures p 696 A85-38918

**MONOMERS**
PMR polyimide composites for aerospace applications — Polymerization of Monomer Reactants
p 282 A85-21520
Evaluation of experimental epoxy monomers
[NASA-TM-87476] p 597 N85-26996

**MONOPLANES**
An overview of some monoplanar missile programs
[NASA-TM-86330] p 138 N85-14786

**MONOPULSE RADAR**
A radome for air traffic control SSR radar systems
[AD-P004373] p 449 N85-21467

**MONSOONS**
Electra vertical air motions in summer MONEX - Using the aircraft as an air motion sensor and notification of a data labeling error p 800 A85-42173

**MONTE CARLO METHOD**
An investigation of association region in maneuvering multi-target tracking p 410 A85-29697
Knudsen layer characteristics for a highly cooled blunt body in hypersonic rarefied flow p 545 A85-35127
Simulation and analysis of differential GPS
p 685 A85-38546
Analysis of missile control system stability with Monte Carlo method p 776 A85-42438
Adding computationally efficient realism to Monte Carlo turbulence simulation
[NASA-TP-2469] p 704 N85-28708
Ultra high energy events in ECHOS series and primary energy spectrum
[HE-3.7-9] p 920 N85-35966

**MOORING**
Mooring airships p 562 A85-34259

**MOTION PERCEPTION**
Evaluation of the Malcolm horizon in a moving-base flight simulator p 23 N85-10051

**MOTION STABILITY**
Determination of the limits of the stability region of a parachute system with a low-permeability canopy
p 142 A85-17075
Application of the finite-state arbitrary-motion aerodynamics to rotor blade aeroelastic response and stability in hover and forward flight
[AIAA PAPER 85-0763] p 491 A85-30380
The effect of the force structure on motion stability
p 611 A85-35870
Dynamic characteristics of peripheral jet ACV. III - Coupling motion of heaving and pitching
p 791 A85-41006
The effect of the Magnus moment on the motion stability of an asymmetric flight vehicle p 850 A85-44848
Translating rudder pedal system
[AD-D011510] p 425 N85-21172
Absolute stability of unsteady movement of axisymmetrical rotating flight vehicle
p 477 N85-22793

**MOTOR VEHICLES**
USSR report: Transportation
[JPRS-UTR-84-008] p 468 N85-23694
USSR report: Transportation
[JPRS-UTR-84-015] p 542 N85-25192
USSR report: Transportation
[JPRS-UTR-84-014] p 564 N85-25229

**MOUNTING**
Effect of a wing-tip mounted pusher turboprop on the aerodynamic characteristics of a semi-span wing
[AIAA PAPER 85-1286] p 631 A85-39700
Mounting construction for turbine vane assembly
[AD-D011395] p 265 N85-15723
Advanced life analysis methods. Volume 1: Cracking data survey and NDI (nondestructive inspection) assessment for attachment lugs
[AD-A150419] p 528 N85-23108

**MOVING TARGET INDICATORS**
Integrated tracking software for multimode operation
[AIAA PAPER 84-2614] p 193 A85-17814
Detection of moving vehicles in thermal imagery obtained from a moving platform p 367 A85-24284
Adaptivity and design criteria of a latest-generation MTD processor p 336 A85-25105
Moving target, distributed, real-time simulation using Ada p 609 A85-34131
Moving object detection system using infrared scanning
[AD-D011222] p 64 N85-10822
Algorithm for tracking manuevering object with ambiguous measurements p 189 N85-15057

**MRCA AIRCRAFT**
MBB - Reconnaissance programs p 346 A85-24252
Maintenance computer for Tornado
p 348 A85-25854
Short-range antiarmor flight vehicles of the Apache/CWS family
[DGLR PAPER 84-125] p 707 A85-40338
Tornado: Structural Usage Monitoring System (SUMS) p 292 N85-15680
Flight parameters recording for structure fatigue life monitoring p 292 N85-15682
Study and realisation of a 3rd level maintenance center based on ATE systems utilization p 202 N85-16735

**MTBF**
Invincible aircraft may be a step closer to reality
p 585 A85-36723
A management guide to reliability predictions
p 909 A85-49541

**MULTIENGINE VEHICLES**

Propeller noise measurements in DNW on the fuselage of a twin engine aircraft model — German-Dutch wind tunnel
[AIAA PAPER 84-2367] p 17 A85-10697

**MULTIPATH TRANSMISSION**

Time reference errors of angle-measuring signals at the output of an envelope detector under multipath conditions p 488 A85-33045

**MULTIPHASE FLOW**

Overlaid approach for base flow analysis at supersonic velocities. I - Basic model description. II - Applications including base combustion and multi-phase exhaust effects
[AIAA PAPER 85-1673] p 716 A85-40762

**MULTIPLEXING**

Fault tolerant computer system for the A129 helicopter p 504 A85-31271

Design of airborne fiber-optic data bus system
p 750 A85-43245

Error corrective coding for MIL-STD-1553B aircraft stores management systems p 823 A85-45127

Reliability analyses of the A129 Integrated Multiplex System — in flight control in helicopters
p 834 A85-45142

**MULTIPROCESSING (COMPUTERS)**

A functional language approach in high-speed digital simulation p 458 A85-28615

A signal processor with distributed control and multidimensional scalability p 858 A85-45005

Validation of fault-free behavior of a reliable multiprocessor system - FTMP: A case study — Fault-Tolerant Multi-Processor avionics
p 886 A85-47757

Will advanced fighter avionics operate when needed?
p 889 A85-49949

Evolution toward a multi-bus architecture for Army helicopter avionic systems p 260 N85-16812

Development and evaluation of a Fault-Tolerant Multiprocessor (FTMP) computer. Volume 2: FTMP software
[NASA-CR-166072] p 804 N85-30706

**MULTISENSOR APPLICATIONS**

Multi-sensor surveillance performance evaluation tool — using computerized simulation
[AIAA PAPER 84-2631] p 193 A85-17827

Test experience on an ultrareliable computer communication network
[AIAA PAPER 84-2649] p 194 A85-17836

**MULTISPECTRAL BAND SCANNERS**

Evaluation of aircraft MSS analytical block adjustment
p 439 A85-26641

**MULTISTAGE ROCKET VEHICLES**

An experimental study on the induced normal force on tail-fins due to wing-tail interference
[NAL-TR-814] p 104 N85-12061

**MULTIVARIATE STATISTICAL ANALYSIS**

Identification of multivariable high-performance turbofan engine dynamics from closed-loop data
p 109 A85-13630

Tail behaviour for suprema of empirical processes
[AD-A147629] p 303 N85-17613

Analysis of control system from a viewpoint of desired pole placement and desired degree of robustness
[AD-A152627] p 675 N85-27876

## N

**NACELLES**

Composite nacelle development p 71 A85-15960

Filament winding of aircraft engine nacelle components p 178 A85-16050

A comparison of different three-dimensional singularity methods for modelling internal flows
[ONERA, TP NO. 1984-150] p 205 A85-19264

Tests of air inlets on civil aircraft
[ONERA, TP NO. 1984-157] p 272 A85-19271

Simulation of transonic three-dimensional nacelle/inlet flowfields using an Euler/Navier-Stokes algorithm
[AIAA PAPER 85-0084] p 226 A85-19798

Approximate factorization algorithm for three-dimensional transonic nacelle/inlet flowfield computations p 314 A85-23392

A simplified model for external loading on an engine nacelle enclosing an engine. I - For the nacelle at a steady incidence p 340 A85-24201

Use of structural adhesives in aircraft turbine engine nacelles p 382 A85-27600

Repairing commercial aircraft jet engine nacelle composite structures
[SAE PAPER 841567] p 616 A85-39068

Development of an active laminar flow nacelle
[AIAA PAPER 85-1116] p 629 A85-39613

Loss in turbofan thrust caused by boundary layer growth in a nacelle's inlet and exhaust ducts
[AIAA PAPER 85-1281] p 631 A85-39697

Boundary layer effects on the flowfield about flow-through nacelles
[AIAA PAPER 85-1623] p 714 A85-40729

Flow simulations using Euler equations for nacelle-propeller configurations in a wind tunnel environment
[AIAA PAPER 85-1678] p 716 A85-40765

Electro-impulse de-icing of a turbofan engine inlet
[AIAA PAPER 85-1118] p 754 A85-40811

Simulation of Nacelle-afterbody/exhaust-jet flowfields using a three-dimensional Navier-Stokes algorithm
[AIAA PAPER 85-1283] p 720 A85-40829

Energy efficient engine ICLS Nacelle detail design report
[NASA-CR-167870] p 34 N85-10993

Installed nacelle drag-improvement tests of an M = 0.8 turboprop transport configuration
[NASA-TM-84302] p 255 N85-15716

Over the wing propeller
[NASA-CASE-LAR-13134-1] p 415 N85-19980

Hover test results of a small-scale twin-tilt nacelle model
[NASA-TM-86665] p 478 N85-23706

Low-speed wind-tunnel tests of an advanced eight-bladed propeller
[NASA-TM-86364] p 740 N85-29928

Calculation of transonic flows around an aircraft configuration with motorized nacelle
[SNIAS-851-111-106] p 742 N85-31008

An experimental investigation of propfan installations on an upswept supercritical wing at transonic Mach numbers
[NASA-CR-172605] p 742 N85-31013

Design of the nacelle for the A-320 aircraft
[SNIAS-851-111-111] p 761 N85-31046

**NAP-OF-THE-EARTH NAVIGATION**

Pilot command interfaces for discrete control of automated nap-of-earth flight
[AIAA PAPER 84-2621] p 172 A85-17869

Avionics systems for helicopters of the next generation p 336 A85-25851

Dornier helicopter avionics experiments
p 336 A85-25852

A LANTIRN for seeing in the dark
p 763 A85-41051

All-weather low altitude penetration
p 821 A85-44052

Enhanced terrain masked penetration program
p 832 A85-44991

Guidance and navigation programs and plans
p 154 N85-14809

Integrated cockpit design for the Army helicopter improvement program p 161 N85-14816

Assessment of simulation fidelity using measurements of piloting technique in flight p 278 N85-16817

Ground evaluation of helicopter air-to-air warfare
p 499 N85-22360

Piloted simulation of one-on-one helicopter air combat at NOE flight levels
[NASA-TM-86686] p 586 N85-26720

**NARCOTICS**

The airline passenger undergoing withdrawal or overdose from narcotics or other drugs
p 746 A85-42074

**NARROWBAND**

Survey of narrow band vocoder technology
[AD-A151919] p 606 N85-27114

**NASA PROGRAMS**

Aeronautical technology 2000 - A projection of advanced vehicle concepts
[AIAA PAPER 84-2501] p 100 A85-13572

The Western Aeronautical Test Range of NASA Ames Research Center
[AIAA PAPER 85-0316] p 275 A85-19676

Analytical and physical modeling program for the NASA Lewis Research Center's Altitude Wind Tunnel (AWT)
[AIAA PAPER 85-0379] p 275 A85-19709

Army, NASA researching needs for future engine components p 283 A85-20060

Development and performance of the NASA Langley Research Center expansion tube/tunnel, a hypersonic-hypervelocity real-gas facility
p 368 A85-25482

The congressional authorization process as it applies to aeronautical research and technology
p 462 A85-29555

Geopotential Research Mission - Status report
p 800 A85-42469

Research and technology
[NASA-TM-8[illegible]21] p 67 N85-11973

Scientific and technical information output of the Langley Research Center for calendar year 1984
[NASA-TM-86336] p 309 N85-17740

Aerospace Safety Advisory Panel
[NASA-TM-87428] p 406 N85-21135

Bibliography of Lewis Research Center technica publications announced in 1983
[NASA-TM-83693] p 462 N85-22255

The 1985 long-range program plan
[NASA-TM-87464] p 612 N85-26440

NASA Ames Summer High School Apprenticeship Research Program
[NASA-TM-86006] p 613 N85-26590

Activities of the Aeronautics and Space Engineering Board
[NASA-CR-175825] p 543 N85-26610

**NASTRAN**

Composite curved frames for helicopter fuselage structure p 252 A85-21396

Structural analysis of the CL-600 rear pressure bulkhead, using NASTRAN nonlinear analysis capabilities (Solution 64) p 754 A85-40459

Automatic Dynamic Aircraft Modeler (ADAM) for the computer program NASTRAN p 604 N85-25875

Learjet Model 55 wing analysis with landing loads
p 604 N85-25883

The structural finite element model of the C-5A
p 604 N85-25885

NASTRAN-based software for the structural dynamic analysis of vertical and horizontal axis wind turbines
[DE85-001712] p 605 N85-25911

**NATIONAL AIRSPACE SYSTEM**

National airspace review p 15 N85-10926

System engineering and integration contract for implementation of the National Airspace System Plan. Volume 2: Section 5.0
[AD-A145710] p 16 N85-10929

System engineering and integration contract for implementation of the National Airspace System plan, volume 1, sections 1.0-4.0, 6.0
[AD-A145763] p 96 N85-12048

National airspace review: Airport radar service area operational confirmation report
[DOT/FAA/AT-84/2] p 245 N85-15707

National airspace review enhancement plan, revision 3
[AD-A150743] p 246 N85-16852

National airspace system: Operational requirements
[AD-A149349] p 339 N85-18973

National Airspace System Plan: Facilities, equipment and associated development p 569 N85-26692

National airspace review, change 1
[AD-A152369] p 644 N85-27844

**NATIONAL AIRSPACE UTILIZATION SYSTEM**

Radio Technical Commission for Aeronautics, Annual Assembly Meeting and Technical Symposium, Washington, DC, November 15-17, 1983, Proceedings and Supplement p 382 A85-27527

The plan for an integrated FAA surveillance and weather system p 407 A85-27528

National airspace review p 15 N85-10926

**NATIONAL AVIATION SYSTEM**

Program to support the approval of supplemental navigation aids in the National Airspace System
p 644 A85-38541

Satellite navigation
[S-HRG-98-856] p 246 N85-16851

Thirty years' activities for aircraft safety
p 747 N85-31033

**NATURAL GAS**

Energy characteristics of the combustion chambers of an aircraft engine when operating on natural gas
p 26 A85-11839

**NAVIER-STOKES EQUATION**

Application of the implicit MacCormack scheme to the parabolized Navier-Stokes equations p 80 A85-15335

A finite element penalty algorithm for the parabolic Navier-Stokes equations for turbulent three-dimensional flow p 182 A85-16286

Efficient solution of the Euler and Navier-Stokes equations with a vectorized multiple-grid algorithm
p 145 A85-18679

Current status of numerical solutions of the Navier-Stokes equations
[AIAA PAPER 85-0032] p 207 A85-19469

An incremental block-line-Gauss-Seidel method for the Navier-Stokes equations
[AIAA PAPER 85-0033] p 207 A85-19470

A multistage time-stepping scheme for the Navier-Stokes equations
[AIAA PAPER 85-0035] p 207 A85-19472

Accelerated convergence for incompressible flow calculations
[AIAA PAPER 85-0058] p 209 A85-19489

Flows over low Reynolds number airfoils - Compressible Navier-Stokes numerical solutions
[AIAA PAPER 85-0107] p 210 A85-19523

A comparison of Euler and Navier-Stokes solutions for supersonic flow over a conical delta wing
[AIAA PAPER 85-0111] p 210 A85-19526

Numerical solution of unsteady viscous flow past rotor sections
[AIAA PAPER 85-0129] p 212 A85-19540
Analyses of circulation control airfoils using an implicit Navier-Stokes solver
[AIAA PAPER 85-0171] p 213 A85-19565
A Navier-Stokes investigation of a circulation control airfoil
[AIAA PAPER 85-0300] p 219 A85-19649
A three-dimensional Navier-Stokes/Euler code for blunt-body flow computations
[AIAA PAPER 85-0361] p 220 A85-19696
A Navier-Stokes calculation of 3-D, turbulent flow near a propeller in a shear flow
[AIAA PAPER 85-0365] p 220 A85-19698
Navier-Stokes computations of axisymmetric transonic flows with a two-equation model of turbulence
[AIAA PAPER 85-0373] p 221 A85-19705
Progress in development of a Navier-Stokes solver for evaluation of iced airfoil performance
[AIAA PAPER 85-0410] p 222 A85-19731
Simulation of transonic three-dimensional nacelle/inlet flowfields using an Euler/Navier-Stokes algorithm
[AIAA PAPER 85-0084] p 226 A85-19798
Navier-Stokes computations for exotic airfoils
[AIAA PAPER 85-0109] p 230 A85-20855
Implicit upwind methods for the compressible Navier-Stokes equations p 317 A85-25134
A full Navier-Stokes solution of viscous gas flow through profile cascade on S1 stream surface of revolution employing nonorthogonal curvilinear coordinate system
p 386 A85-26699
X-marching methods to solve the Navier-Stokes equations in two- and three-dimensional flows
[ONERA, TP NO. 1985-6] p 387 A85-27886
Analysis of turbulent underexpanded jets. I - Parabolized Navier-Stokes model, SCIPVIS p 391 A85-29080
Euler and Navier-Stokes solutions for supersonic shear flow past a circular cylinder p 391 A85-29090
An assessment of numerical solutions of the compressible Navier-Stokes equations
p 526 A85-32582
Advances in the study of separated flows
p 550 A85-35765
Numerical calculation of separation flow over severely indented blunt body p 551 A85-35777
An implicit technique for computation of base flowfield
p 551 A85-35778
A numerical study of the separation flow by Navier-Stokes equation past a circular cylinder and sphere p 551 A85-35782
Numerical methods for the time dependent compressible Navier-Stokes equations p 553 A85-36415
Simplified implicit block-bidiagonal finite difference method for solving the Navier-Stokes equations
p 695 A85-39003
External compression supersonic inlet analysis using a finite difference two-dimensional Navier-Stokes code
p 629 A85-39581
PNS predicted shock location and jump conditions at supersonic and hypersonic speeds — Parabolized Navier-Stokes
[AIAA PAPER 85-1407] p 632 A85-39766
The interaction of a diffusing line vortex and an aligned shear flow p 788 A85-40254
Evaluation of Euler and Navier-Stokes solutions for leading-edge and shock-induced separations
[AIAA PAPER 85-1563] p 711 A85-40688
An investigation of film cooling on a hypersonic vehicle using a PNS flow analysis code
[AIAA PAPER 85-1591] p 712 A85-40707
Transonic airfoil design based on Navier-Stokes equation to attain arbitrarily specified pressure distribution - An iterative procedure
[AIAA PAPER 85-1592] p 712 A85-40708
Computation of three-dimensional transonic viscous flowfields using unsteady parabolized Navier-Stokes equations
[AIAA PAPER 85-1595] p 713 A85-40711
A Navier-Stokes solution procedure for analysis of steady two-dimensional transonic nozzle flows
[AIAA PAPER 85-1597] p 713 A85-40713
Numerical solution of transonic wing flows using an Euler/Navier-Stokes zonal approach
[AIAA PAPER 85-1640] p 715 A85-40742
Numerical simulation of flow through scramjet inlets using a three-dimensional Navier-Stokes code
[AIAA PAPER 85-1664] p 716 A85-40760
Time-dependent Navier-Stokes computations of separated flows over airfoils
[AIAA PAPER 85-1684] p 717 A85-40769
On the accuracy of the pseudocompressibility method in solving the incompressible Navier-Stokes equations
[AIAA PAPER 85-1689] p 717 A85-40772
Simulation of wing, fuselage, and wing/fuselage flowfields using a three-dimensional Euler/Navier-Stokes algorithm
[AIAA PAPER 85-1693] p 718 A85-40775
A Mach 2.0 plus supersonic inlet study using the Navier-Stokes equations
[AIAA PAPER 85-1211] p 720 A85-40820
Simulation of Nacelle-afterbody/exhaust-jet flowfields using a three-dimensional Navier-Stokes algorithm
[AIAA PAPER 85-1283] p 720 A85-40829
An implicit time-marching method for studying unsteady flow with massive separation
[AIAA PAPER 85-1489] p 790 A85-40929
Convergence acceleration for a three-dimensional Euler/Navier-Stokes zonal approach
[AIAA PAPER 85-1496] p 720 A85-40934
Navier-Stokes solution for hypersonic flow over an indented nosetip
[AIAA PAPER 85-1504] p 721 A85-40940
Navier-Stokes solution of the flow field around a complete aircraft
[AIAA PAPER 85-1509] p 721 A85-40944
Navier-Stokes simulations of rotor-stator interaction using patched and overlaid grids
[AIAA PAPER 85-1519] p 721 A85-40952
ICFD - Interdisciplinary Computational Fluid Dynamics
[AIAA PAPER 85-1522] p 755 A85-40954
Three dimensional CSCM method for the compressible Navier-Stokes equations with application to a multi-nozzle exhaust flowfield
[AIAA PAPER 85-1193] p 726 A85-41419
A parabolized Navier-Stokes algorithm for separated supersonic internal flows
[AIAA PAPER 85-1411] p 726 A85-41423
Numerical computation of hypersonic laminar near-wake flow via Navier-Stokes solver
[AIAA PAPER 85-1672] p 731 A85-42673
Viscous-inviscid interaction computations using a pseudo Navier-Stokes approach p 733 A85-42964
Comparison of interactive and Navier Stokes calculations of separating boundary layer flows
p 734 A85-42965
Development of a Navier-Stokes analysis to investigate the mechanism of shock/wave boundary layer interactions p 734 A85-42966
Analysis of two-dimensional incompressible flow past airfoils using unsteady Navier-Stokes equations
p 735 A85-42975
A computational study of complex three-dimensional compressible turbulent flowfields p 869 A85-48526
Numerical analysis of transonic flow around a two-dimensional airfoil by solving full Navier-Stokes equations p 869 A85-48875
Further development of a transonic cascade analysis
[AD-A145410] p 54 N85-11319
Physics on aircraft wakes
[NASA-CR-174105] p 87 N85-12871
Development of a Navier-Stokes rotor and stator analysis
[AD-A146967] p 294 N85-16070
A Navier-Stokes calculation of the airfoil dynamic stall process
[AD-P004163] p 324 N85-17948
A multistage time-stepping scheme for the Navier-Stokes equations
[NASA-CR-172527] p 373 N85-19365
Pseudospectral calculations of two-dimensional transonic flow (Task 1). Numerical investigation of VTOL aerodynamics (Task 2)
[AD-A150123] p 399 N85-21126
Unsteady Navier-Stokes calculations in an accelerated reference frame
[AD-A151751] p 602 N85-25774
Flow over a biconic configuration with an afterbody compression flap
[AD-A151882] p 603 N85-25778
Numerical analyses in aerodynamic design of aero-engine fan p 582 N85-26618
Navier-Stokes solution of hypersonic blunt-nosed body flowfields p 558 N85-26624
Recent progress in computational aerodynamics
p 558 N85-26626
Theoretical investigation of three-dimensional shock wave turbulent boundary layer interactions. Part 3
[AD-A152251] p 607 N85-27177
Users manual for coordinate generation code CRDSRA
[NASA-CR-172584] p 634 N85-27824
User's manual for airfoil flow field computer code SRAIR
[NASA-CR-172585] p 634 N85-27825
Use of quaternions in flight mechanics
[AD-A152616] p 675 N85-27875
Proceedings of the 9th US Air Force and the Federal Republic of Germany Data Exchange Agreement Meeting. Viscous and Interacting Flow Field Effects
[AD-A153020] p 699 N85-28266
Two approaches for the prediction of plume-induced separation
[AD-A154098] p 741 N85-29935
Calculation of steady and unsteady airfoil flow fields via the Navier-Stokes equations
[NASA-CR-3899] p 816 N85-33105
A three-dimensional viscous flow analysis for the helicopter tip vortex generation problem
[NASA-CR-3906] p 874 N85-34114
Comments on the prediction of dynamic stall
[GU-AERO-8501] p 875 N85-34125

An evaluation of flashtube signal characteristics
[AD-A149569] p 339 N85-18974
Reference systems for the evaluation of dead-reckoning navigation equipment p 489 N85-22358
Combinatorial performance/cost analysis of an autonomous navigation system for aircraft
p 568 N85-26640
The use of a self-compensated magnetometer in an economical navigation system for the helicopter
p 568 N85-26650
A method of estimating aircraft attitude from fly by wire flight control system data p 586 N85-26653
Terrain following without use of forward looking sensors p 569 N85-26659
Low cost two gimbal inertial platform and its system integration p 569 N85-26661
Navigation and flight director guidance for the NASA/FAA helicopter MLS curved approach flight test program
[NASA-CR-177350] p 569 N85-26691
Avionics data base
[AD-A152415] p 657 N85-27863
The AFTI/F16 terrain-aided navigation system
[DE85-008411] p 645 N85-28935

**NAVIGATION INSTRUMENTS**
Optoelectronic guidance instruments for flight vehicles (4th revised and enlarged edition) — Russian book
p 125 A85-15815
Maintenance test requirements of spread spectrum CNI systems — Communications-Navigation Identification
p 407 A85-26806
Aircrew and automation p 383 A85-27603
Navigation and sensor orientation systems in aerial photography p 566 A85-36284
Spectral analysis of optimal and suboptimal gyro monitoring filters p 696 A85-39459
Radio navigation sensor p 749 A85-41016
CMA-771 - A new OMEGA onboard system
p 749 A85-41399
Air navigation systems — Russian book
p 749 A85-42247
Status and development trends of navigation systems for general aviation p 879 A85-48175
Reference systems for the evaluation of dead-reckoning navigation equipment p 489 N85-22358
Navigation and flight director guidance for the NASA/FAA helicopter MLS curved approach flight test program
[NASA-CR-177350] p 569 N85-26691

**NAVIGATION SATELLITES**
The Geostar Satellite Navigation and Communications System p 94 A85-14829
The use of pseudo-satellites (PLs) for improving GPS performance p 94 A85-14836
The Geostar position determination and digital message system p 487 A85-32219

**NAVIGATORS**
International flight planning handbook
[AD-A156330] p 878 N85-35177

**NAVSTAR SATELLITES**
The use of pseudo-satellites (PLs) for improving GPS performance p 94 A85-14836
On the development of a data base for the Navstar GPS phase IIB user equipment DT&E (OR) field testing
p 95 A85-14839
TI 4100 NAVSTAR navigator test results
p 95 A85-14840
Navstar
[IAF PAPER 83-265] p 335 A85-23812
What can civil transport aircraft do with Navstar?
p 337 A85-25817
GPS/Navstar - Some experimental results
p 337 A85-25818
An example of a French Navstar/GPS receiver
p 337 A85-25819
An aspect of the role of the clock in a GPS receiver
p 485 A85-31745
An austere GPS receiver for airborne applications
p 485 A85-32194
The development and applications of GPS determined attitude p 486 A85-32198
A field test program for test and training applications of the NAVSTAR/Global Positioning System
p 486 A85-32202
Time division multiple access differential GPS
p 486 A85-32203
Trajectory estimation using translated GPS signals
p 487 A85-32207
Constraints on the unlimited applications of the NAVSTAR Global Positioning System
p 487 A85-32233
Widespread civil uses envisioned for satellite navigation system p 566 A85-34217
Commercial aviation GPS Navigation Set architecture
p 644 A85-38538
An experimental program for the testing and demonstration of GPS/Navstar, taking into account applications in civil aviation
[DGLR PAPER 84-092] p 748 A85-40311
Geometric deterioration of precision - The case of Navstar (GPS) and multilateral systems
p 821 A85-44054
Potential impact of Navstar GPS on NATO tactical operations p 459 N85-20763
Program INNAVSAT: Global Positioning System (GPS): Test and demonstration program
[BMFT-FB-W-84-047] p 410 N85-21145

**NAVY**
The Navy's tactical data network
[AIAA PAPER 84-2716] p 152 A85-17882
U.S. Navy aircrew automated escape systems (AAES) and aircrew life support systems (ALSS) in-service usage data analysis program - A progress report and report of longer term plans p 331 A85-22767
U.S. Navy experience with side-by-side unsequenced escape in A-6 series aircraft lessons to be learned (1 January 1969 through 31 December 1979)
p 331 A85-22768
Importance of test and evaluation in Navy's LAMPS MK III program p 382 A85-27471
Combustion technology - A Navy perspective
[AIAA PAPER 85-1400] p 690 A85-39763
Don't fowl out
[AD-P004179] p 402 N85-19941
An airborne infrared thermal scanning system for easy use on Navy P-3 aircraft
[AD-A149690] p 461 N85-22143
A preliminary analysis of C-12 aircraft usage by the Navy Air Logistics System
[AD-A151921] p 543 N85-26634
Navy geothermal plan
[AD-A152478] p 702 N85-28450
Development of NATOPS (Naval Air Training and Operating Procedure Standardization) performance software for the H-46D helicopter
[AD-A156089] p 887 N85-35190

**NEAR FIELDS**
Reflector antennas with directional effect in the near-field Characteristics and applications — German thesis p 287 A85-19837
Near-field frequency-domain theory for propeller noise
p 460 A85-29079
Coupling linearized far-field boundary conditions with non-linear near-field solutions in transonic flow
[AIAA PAPER 85-0599] p 469 A85-30328
A technique for determining the effects of aircraft components on the pattern of radar antennas before they are built p 833 A85-45018

**NEAR WAKES**
Study of flow field in the near wake of delta wings
p 472 A85-31753
A nonstationary transition process caused by injection of a gas into the near wake of a body in a supersonic flow p 619 A85-37336
Velocity measurements in the near wake of a hovering rotor
[AIAA PAPER 85-1675] p 725 A85-41408
The subsonic near-wake of an axisymmetric semielliptical afterbody p 869 A85-48534

**NETHERLANDS**
On the altitudinal distribution of birds and bird strikes in the Netherlands
[AD-P004189] p 404 N85-19952
Rotterdam Airport and the Common Market
p 641 N85-27840
OWEMA report: A project study concerning the possibilities and the desirability of a east-west runway for Maastricht Airport (Netherlands) as a Euro-regional air freight center
[B8476490] p 685 N85-28955

**NETWORK CONTROL**
Test experience on an ultrareliable computer communication network
[AIAA PAPER 84-2649] p 194 A85-17836
The switched network approach to high speed communications p 822 A85-44994
A signal processor with distributed control and multidimensional scalability p 858 A85-45005

**NETWORK SYNTHESIS**
Analysis and synthesis of radio-electronic complexes — Russian book p 124 A85-14631
Application of digital signal processing to a low data rate communications receiver
[AIAA PAPER 84-2652] p 183 A85-17839
Gate array, standard cell, and fully custom - Building blocks for the digital avionics designer
[AIAA PAPER 84-2711] p 184 A85-17880
High density modular avionics packaging
[AIAA PAPER 84-2749] p 184 A85-17898
A generalized algorithm for the topological optimization of the secondary electric power distribution systems of aircraft p 506 A85-31458
Advanced Computer Aided Engineering requirements for electronics p 859 A85-45146
Multi-input multi-output automatic design synthesis for performance and robustness
[AIAA PAPER 85-1929] p 859 A85-45929

**NEUTRON RADIOGRAPHY**
Robotics in nondestructive inspection at Sacramento Air Logistics Center
[AD-P004012] p 127 N85-11992
Mobile accelerator neutron radiography system
[AD-A148808] p 372 N85-18311

**NEUTRONS**
A search for solar neutrons on a long duration balloon flight
[SH-1.4-6] p 920 N85-34766

**NEWTON SECOND LAW**
Aerodynamic force measurements in the IISc hypersonic shock tunnel p 320 A85-25481

**NEWTON-RAPHSON METHOD**
A compatible mixed design and analysis finite element method for the design of turbomachinery blades
p 599 A85-34706
Newton solution of coupled Euler and boundary layer equations p 733 A85-42958

**NICHROME (TRADEMARK)**
Metallurgical and mechanical phenomena due to rubbing of titanium against sintered powder Nichrome
p 291 A85-22281

**NICKEL**
The substitution of nickel for cobalt in hot isostatically pressed powder metallurgy UDIMET 700 alloys
p 686 A85-37415
Dispersion strengthened nickel for gas turbine applications p 786 A85-43132
Comparison between the properties of conventional wrought and powder metallurgical alloys for turbine disc applications p 283 N85-15739
Crack closure characteristics considering center cracked and compact tension specimens
[AD-A151702] p 605 N85-25907

**NICKEL ALLOYS**
Creep life predictions in nickel-based superalloys
p 42 A85-12100
Development of a fatigue crack propagation model of Incoloy 901 p 280 A85-20758
Chemical reactions involved in the initiation of hot corrosion of IN-738 p 519 A85-31688
Progress in the utilization of an oxide-dispersion-strengthened alloy for small engine turbine blades
[SAE PAPER 841512] p 686 A85-39284
Determination of thermal stresses in diffusionless heat-resisting coatings of the Ni(Co)CrAlY system
p 783 A85-40145
Heat resistant alloys for jet engines and high strength steels for landing gears p 784 A85-41004
Effect of inclusions on tensile ductility of a nickel-base oxide dispersion strengthened superalloy
p 785 A85-42753
Microstructures and properties of HIP, HIP plus forged and extruded P/M superalloy FGH95
p 786 A85-43137
High performance PM alloys - The price of allowing for high stresses in components p 787 A85-43161
Superalloy microstructural variations induced by gravity level during directional solidification p 900 A85-48274
Studies on the hot corrosion of a nickel-base superalloy, Udimet 700
[NASA-TM-86882] p 45 N85-11224
Problems and possibilities for life extension in gas turbine components p 267 N85-15742

**NIGHT**
Hygienic evaluation of noise in living quarters near an airport p 608 A85-33579
HH-60D night hawk helicopter p 161 N85-14817

**NIGHT FLIGHTS (AIRCRAFT)**
The night vision goggle compatible helicopter cockpit
[MBB-UD-420-84-OE] p 163 A85-16089
Avionics systems for helicopters of the next generation p 338 A85-25851
A LANTIRN for seeing in the dark
p 763 A85-41051

Among the weeds at night - Transition to night NOE flying p 763 A85-41532
Peripheral vision horizon display on the single seat night attack A-10 p 23 N85-10053
Civil law enforcement missions p 139 N85-14812
Some thoughts on the implementation of pilot night vision devices for helicopters p 166 N85-14814
Flight research on visual aids and navigation equipment for helicopter low-level flight at night p 261 N85-16820

NIGHT SKY
Nighttime observations of thunderstorm electrical activity from a high altitude airplane p 702 A85-39526

NIGHT VISION
TADS/PNVS - The keen eyes of the hunter — Target Acquisition Designation Sight/Pilot Night Vision Sensor p 107 A85-15594
The night vision goggle compatible helicopter cockpit
[MBB-UD-420-84-OE] p 163 A85-16069
A simulated infrared model board
[AIAA PAPER 85-1748] p 789 A85-40560
Some thoughts on the implementation of pilot night vision devices for helicopters p 166 N85-14814

NIMBUS 7 SATELLITE
MIZEX, 1984, NASA CV-990 flight report
[NASA-TM-86216] p 900 N85-30451

NIMONIC ALLOYS
Screw press forging of powder HIP billet to critical gas turbine discs and wheels p 795 A85-43158

NITROGEN
Lubricity of well-characterized jet and broad-cut fuels by ball-on-cylinder machine
[NASA-TM-83807] p 120 N85-12183
Flow of nitrogen-pressurized Halon 1301 in fire extinguishing systems
[NASA-CR-174271] p 242 N85-15701
Nitrogen analysis by chemiluminescence
[AD-A156197] p 902 N85-35308

NITROGEN OXIDES
Impact of aircraft emissions on air quality in the vicinity of airports. Volume 4. Nitrogen dioxide and hydrocarbons
[AD-A148253] p 299 N85-17436

NOISE (SOUND)
On boundary layer transition in high-subsonic and transonic flow under the influence of acoustic disturbances and free-stream turbulence
[AIAA PAPER 85-0082] p 210 A85-19506
Computation of noise radiation from a free jet perpendicular to its axis via laser anemometry measurements
[ESA-TT-870] p 378 N85-18669
Further comparison of wind tunnel and airplane acoustic data for advanced design high speed propeller models
[NASA-TM-86935] p 460 N85-22106
Transmission of gear noise to aircraft interiors prediction methods p 539 N85-23788
A study of interior noise levels, noise sources and transmission paths in light aircraft
[NASA-CR-172152] p 805 N85-30766
Operational noise data for the LACV-30 air cushion vehicle
[AD-A154063] p 806 N85-30773
Aviation noise effects
[AD-A154319] p 806 N85-30776
Some problems in high speed gears and gearing p 910 N85-34312

NOISE GENERATORS
Finite element modelling of acoustic singularities with application to near and far field propeller noise
[AIAA PAPER 84-2286] p 59 A85-10842
Airfoil tip vortex formation noise
[AIAA PAPER 84-2308] p 60 A85-10859
Coaxial jet noise source distributions
[AIAA PAPER 84-2361] p 64 A85-10895
Noise generated by a subsonic jet p 134 A85-14895
Wave envelope and infinite element schemes for fan noise radiation from turbofan inlets p 134 A85-15330
A technique for the evaluation of the magnitude of acoustic power radiated from the duct of a turbojet using a point measurement p 861 A85-44045
A more modern theory of combustion noise p 918 A85-47309
Acoustic intensity techniques for airplane cabin applications p 919 A85-49137

NOISE INTENSITY
Acoustic pressures emanating from a turbomachine stage
[AIAA PAPER 84-2325] p 4 A85-10870
A composite model of aircraft noise p 537 A85-32594
Effect of initial condition on subsonic jet noise p 862 A85-45710
Investigation on experimental techniques to detect, locate and quantify gear noise in helicopter transmissions
[NASA-CR-3847] p 305 N85-17667

NOISE MEASUREMENT
The effects of installation on single- and counter-rotation propeller noise
[AIAA PAPER 84-2263] p 58 A85-10830
Engine noise measurement with acoustic shield wall
[AIAA PAPER 84-2283] p 26 A85-10841
Quantification of advanced turboprop aircraft flyover noise annoyance
[AIAA PAPER 84-2293] p 56 A85-10848
Phase averaged acoustic measurements for a Mach number 0.6 jet
[AIAA PAPER 84-2320] p 61 A85-10867
Effects of acoustic treatment on the interior noise levels of a twin-engine propeller aircraft - Experimental flight results and theoretical predictions
[AIAA PAPER 84-2331] p 17 A85-10875
An acoustic mode measurement technique
[AIAA PAPER 84-2337] p 62 A85-10879
Ground plane microphone installation for measurement of aircraft flyover noise
[AIAA PAPER 84-2353] p 63 A85-10889
De-Dopplerisation and acoustic imaging of aircraft flyover measurements
[AIAA PAPER 84-2355] p 63 A85-10891
Propeller noise measurements in DNW on the fuselage of a twin engine aircraft model — German-Dutch wind tunnel
[AIAA PAPER 84-2367] p 17 A85-10897
Comparison of scaled model data to full size energy efficient engine test results
[AIAA PAPER 84-2281] p 110 A85-13953
Measurement and prediction of Energy Efficient Engine noise
[AIAA PAPER 84-2284] p 110 A85-13954
Advances in high speed jet aeroacoustics
[AIAA PAPER 84-2275] p 133 A85-13959
Analysis of the effect on combustor noise measurements of acoustic waves reflected by the turbine and combustor inlet
[AIAA PAPER 84-2323] p 196 A85-16103
Noise of an airfoil in a flow
[ONERA, TP NO. 1984-155] p 303 A85-19269
The unambiguous in-flight determination of propeller rotational noise in aircraft with four-cycle combustion engines p 304 A85-20650
Noise testing of an advanced design propeller in the Boeing transonic wind tunnel with and without test section acoustic treatment
[AIAA PAPER 84-2386] p 377 A85-26320
The Flyover Noise Test Monitoring System (FONTMS) p 414 A85-28646
Noise testing of an advanced design propeller in the Boeing anechoic test chamber with a relative velocity free jet
[AIAA PAPER 84-2262] p 421 A85-30193
A note on tower wake/blade interaction noise of a wind turbine p 470 A85-30773
Noise radiation patterns of counter-rotation and unsteadily loaded single-rotation propellers p 862 A85-45840
Effects of acoustic treatment on the interior noise of a twin-engine propeller airplane p 827 A85-45841
Noise testing of an advanced design propeller in a wind tunnel p 836 A85-45862
Advanced design propeller noise testing in an anechoic chamber p 836 A85-45869
Acoustic intensity techniques for airplane cabin applications p 919 A85-49137
Analysis of noise measured from a propeller in a wake
[NASA-TP-2358] p 65 N85-11788
Airport noise impact prediction and measurement p 130 N85-12476
Evaluation of the Langley 4- by 7-meter tunnel for propeller noise measurements
[NASA-TM-85721] p 136 N85-13553
Helicopter noise survey performed at Las Vegas, Nevada, 19-21 January, 1984
[AD-A147392] p 305 N85-16593
Noise measurement flight test: Data-analyses aerospatiale AS-355F TwinStar helicopter
[AD-A147497] p 305 N85-16595
Noise measurement flight test for Boeing Vertol 234/CH 47-d helicopter: Data/analyses
[AD-A148172] p 306 N85-17670
Noise measurement flight test: Data-analyses Aerospatiale AS 350D AStar helicopter
[AD-A148496] p 306 N85-17672
Noise measurement flight test: Data-analyses, Sikorsky S-76A helicopter
[AD-A148525] p 306 N85-17673
Noise measurement flight test: Data/Analyses, hughes 500 D/E helicopter
[AD-A148110] p 501 N85-23758
Transmission error measurements in gearbox development p 529 N85-23794
An experimental study of the noise generated by vaporous cavitation in turbulent shear flows produced by confined orifice plates p 611 N85-26316
Analyses of orderly structures in jets and the relationship with emitted noise
[ISL-R-117/83] p 612 N85-27646
Prediction of free-field noise levels from aircraft flyover measurements
[VTH-LR-427] p 612 N85-27647
A study of interior noise levels, noise sources and transmission paths in light aircraft
[NASA-CR-172152] p 805 N85-30766
FAA/GAMA (Federal Aviation Administration/General Aviation Manufacturer's Association) propeller aircraft noise test program, Salina Municipal Airport, Salina, Kansas
[AD-A154818] p 862 N85-32983
A theoretical appraisal of the use of ground-plane microphones for aircraft noise measurements
[NPL-AC-103] p 862 N85-33752

NOISE POLLUTION
Assessment and prediction of aircraft community noise annoyance
[AIAA PAPER 84-2291] p 55 A85-10846
Quantification of advanced turboprop aircraft flyover noise annoyance
[AIAA PAPER 84-2293] p 56 A85-10848
Effect of sonic boom on a cracked plaster-wood wall p 191 A85-16256
The noise problem and the airport environment p 191 A85-18874
An overview of helicopter's environmental considerations p 241 A85-21643
Acoustical guidelines for new heliports p 276 A85-21644
A path model of aircraft noise annoyance p 304 A85-22071
Aircraft noise annoyance at three joint air carrier and general aviation airports p 452 A85-27359
The development of acoustical guidelines for new heliports p 516 A85-32014
Hygienic evaluation of noise in living quarters near an airport p 608 A85-33579
NOISEMAP 4.4 computer program update, operator's manual, addendum 1
[AD-A147091] p 302 N85-16503

NOISE PREDICTION
Analysis of turbulent underexpanded jets. II - Shock noise features using SCIPVIS p 537 A85-32605

NOISE PREDICTION (AIRCRAFT)
Helicopter noise as predicted by three-dimensional monopole and quasi-steady full-potential dipole sources
[AIAA PAPER 84-2267] p 58 A85-10832
Assessment and prediction of aircraft community noise annoyance
[AIAA PAPER 84-2291] p 55 A85-10846
Weakly nonlinear theory of supersonic turbopropeller noise
[AIAA PAPER 84-2302] p 60 A85-10853
The unified acoustic and aerodynamic prediction theory of advanced propellers in the time domain
[AIAA PAPER 84-2303] p 60 A85-10854
Noise of counter-rotation propellers
[AIAA PAPER 84-2305] p 60 A85-10856
Theoretical design of acoustic treatment for cabin noise control of a light aircraft
[AIAA PAPER 84-2328] p 16 A85-10872
Effects of acoustic treatment on the interior noise levels of a twin-engine propeller aircraft - Experimental flight results and theoretical predictions
[AIAA PAPER 84-2331] p 17 A85-10875
Applications of finite element and wave envelope element approximations to turbofan engine noise radiation including flight effects
[AIAA PAPER 84-2333] p 62 A85-10877
Application of active noise control to model propeller noise
[AIAA PAPER 84-2344] p 62 A85-10883
Predicted changes in advanced turboprop noise with shaft angle of attack
[AIAA PAPER 84-2347] p 63 A85-10884
Review of recent research of interior noise of propeller aircraft
[AIAA PAPER 84-2349] p 17 A85-10885
Coaxial jet noise source distributions
[AIAA PAPER 84-2361] p 64 A85-10895
Noise control characteristics of synchrophasing - An analytical investigation — of turboprop aircraft noise
[AIAA PAPER 84-2369] p 17 A85-10898

READEX FICHE best copy available pages tightly bound

Measurement and prediction of Energy Efficient Engine noise
[AIAA PAPER 84-2284] p 110 A85-13954

Noise produced by the interaction of a rotor wake with a swept stator blade
[AIAA PAPER 84-2326] p 133 A85-13956

Advanced turboprop noise - A historical review
[AIAA PAPER 84-2261] p 133 A85-13958

Advances in high speed jet aeroacoustics
[AIAA PAPER 84-2275] p 133 A85-13959

The prediction of static-to-flight changes in jet noise
[AIAA PAPER 84-2358] p 134 A85-13963

Large-scale coherent structure and far-field jet noise
p 78 A85-14390

Effect of angle of attack on rotor trailing-edge noise
p 134 A85-15346

Theoretical study of helicopter-rotor noise
[ONERA, TP NO. 1984-140] p 134 A85-15856

Modelling of wind tunnel wall effects on the radiation characteristics of acoustic sources
[AIAA PAPER 84-2364] p 197 A85-18104

1984 SAE aerospace handbook: Noise
p 156 A85-17245

Propagation of propeller tone noise through a fuselage boundary layer p 197 A85-18514

Near-field frequency-domain theory for propeller noise
p 460 A85-29079

Noise transmission through aircraft panels
p 460 A85-29258

Theoretical design of acoustic treatment for noise control in a turboprop aircraft p 414 A85-29260

Review of research on structureborne noise
[AIAA PAPER 85-0786] p 536 A85-30388

The effect of source location on the structural-acoustic interaction of an infinite elastic shell
[AIAA PAPER 85-0788] p 523 A85-30390

Application of a turbulence distortion theory to predict helicopter rotor broadband noise due to inflow turbulence as a function of rotor thrust p 493 A85-31952

Comparison of noise prediction for the X-wing system and a conventional rotor in hover p 493 A85-31953

A composite model of aircraft noise
p 537 A85-32594

Diffraction of a baffled dipole - Frequency dependence
p 611 A85-33915

Noise of counter-rotation propellers
p 705 A85-39220

Pseudo-noise and noise — in aeronautics
p 862 A85-45670

Effects of acoustic treatment on the interior noise of a twin-engine propeller airplane p 827 A85-45841

Predicted changes in advanced turboprop noise with shaft angle of attack p 838 A85-45861

Noise transmission characteristics of aircraft-type composite panels
[SAE PAPER 850878] p 919 A85-50110

Observations from varying the lift and drag inputs to a noise prediction method for supersonic helical tip speed propellers
[NASA-TM-83797] p 64 N85-10788

Airport noise impact prediction and measurement
p 130 N85-12476

Prediction and modeling of helicopter noise
[AD-A145764] p 134 N85-12656

Contribution of the study of light aircraft propeller noise
[ESA-TT-885] p 377 N85-18667

Wind tunnel acoustic study of a propeller installed behind an airplane empennage: Data report
[NASA-CR-177335] p 538 N85-23377

Transmission of gear noise to aircraft interiors prediction methods p 539 N85-23788

A study of the methods for evaluating the noise impact of a proposed airport on a community
p 609 N85-25957

Prediction of free-field noise levels from aircraft flyover measurements
[VTH-LR-427] p 612 N85-27647

Design of sidewall treatment of cabin noise control of a twin engine turboprop aircraft
[NASA-CR-172245] p 806 N85-30771

Some problems in high speed gears and gearing
p 910 N85-34312

Optimally designed propellers constrained by noise
p 892 N85-35196

**NOISE PROPAGATION**

Penetration of aircraft noise into an open configuration airport terminal building p 37 A85-10408

Finite element modelling of acoustic singularities with application to near and far field propeller noise
[AIAA PAPER 84-2286] p 59 A85-10842

The role of excitation on modifying the sound sources
[AIAA PAPER 84-2317] p 61 A85-10865

Noise transmission through an acoustically treated and honeycomb stiffened aircraft sidewall
[AIAA PAPER 84-2329] p 62 A85-10873

Propagation of propeller tone noise through a fuselage boundary layer p 197 A85-18514

Investigation of nonlinear effects in the instabilities and noise radiation of supersonic jets
[AIAA PAPER 85-0081] p 304 A85-19507

Field-incidence noise transmission loss of general aviation aircraft double-wall configurations
p 304 A85-21842

A mapped, factored-implicit scheme for the computation of duct and far-field acoustics p 460 A85-29037

Noise transmission through aircraft panels
p 460 A85-29258

Noise transmission through an acoustically treated and honeycomb-stiffened aircraft sidewall
p 537 A85-32592

Noise transmission characteristics of aircraft-type composite panels
[SAE PAPER 850878] p 919 A85-50110

Computation of noise radiation from a free jet perpendicular to its axis via laser anemometry measurements
[ESA-TT-870] p 378 N85-18669

Noise transmission loss of a rectangular plate in an infinite baffle
[NASA-TP-2398] p 451 N85-22109

Aircraft cabin noise prediction and optimization
[NASA-CR-175982] p 806 N85-30768

Design of sidewall treatment of cabin noise control of a twin engine turboprop aircraft
[NASA-CR-172245] p 806 N85-30771

Some problems in high speed gears and gearing
p 910 N85-34312

**NOISE REDUCTION**

Control of jet shock associated noise by a reflector
[AIAA PAPER 84-2279] p 59 A85-10839

Far-field measurement and mode analysis of the effects of vane/blade ratio on fan noise
[AIAA PAPER 84-2280] p 25 A85-10840

Mechanism of broadband jet noise amplification and suppression under controlled excitation
[AIAA PAPER 84-2319] p 61 A85-10866

Theoretical design of acoustic treatment for cabin noise control of a light aircraft
[AIAA PAPER 84-2328] p 16 A85-10872

Laboratory tests on an aircraft fuselage to determine the insertion loss of various acoustic add-on treatments
[AIAA PAPER 84-2330] p 16 A85-10874

Effects of acoustic treatment on the interior noise levels of a twin-engine propeller aircraft - Experimental flight results and theoretical predictions
[AIAA PAPER 84-2331] p 17 A85-10875

Application and test verification of finite element analyses for gas turbine extended reaction exhaust muffler systems
[AIAA PAPER 84-2334] p 26 A85-10878

Application of active noise control to model propeller noise
[AIAA PAPER 84-2344] p 62 A85-10883

Noise control characteristics of synchrophasing - An experimental investigation — on aircraft fuselage model
[AIAA PAPER 84-2370] p 17 A85-10899

Alternate approach to aircraft interior noise control. I Damped trim panels
[AIAA PAPER 84-2371] p 17 A85-10900

Alternate approach to aircraft interior noise control. II Self-supporting damped interior shell
[AIAA PAPER 84-2372] p 18 A85-10901

Flight tests of a sweptback parabolic tip on a Dauphin 365N
[ONERA, TP NO. 1984-84] p 7 A85-12813

Adhesive bonded noise suppression structures for commercial and military aircraft p 134 A85-14172

Supersonic jet shock noise reduction
[AIAA PAPER 84-2278] p 196 A85-16099

The silencers — JT3D engine noise reduction options
p 167 A85-16272

1984 SAE aerospace handbook: Noise
p 156 A85-17245

An overview of helicopter's environmental considerations p 241 A85-21643

Turbulence suppression in free turbulent shear flows under controlled excitation. II - Jet-noise reduction
p 366 A85-23844

Model tests of phase-locked propeller installations
[AIAA PAPER 85-0001] p 353 A85-26316

Application of scaling laws for the flyover jet noise to three departure procedures for the Boeing 727-200 advanced
[AIAA PAPER 84-2359] p 377 A85-26319

M61A1 gunfire environmental effects on F-14 aircraft structure and equipment p 411 A85-26552

A new approach to applying electromagnetic transient protection requirements to avionic and electronic equipment p 439 A85-26684

Theoretical design of acoustic treatment for noise control in a turboprop aircraft p 414 A85-29260

Review of research on structureborne noise
[AIAA PAPER 85-0786] p 536 A85-30388

Far-field noise of a subsonic jet under controlled excitation p 537 A85-30869

Computerized aerodynamic design of a transonically 'quiet' blade p 473 A85-31989

Development of piloting techniques to reduce helicopter approach noise p 512 A85-32015

Acoustic shocks in a variable area duct containing near sonic flows p 474 A85-32632

Controlled suppression or amplification of turbulent jet noise p 611 A85-35128

Evaluation of interior noise control treatments for advanced turboprop aircraft p 573 A85-35588

Study on the comfortability of helicopter - Flight test of acoustic noise level p 647 A85-38385

Investigation on reducing the flow noise of the 0.6 m x 0.6 m trisonic wind tunnel p 682 A85-38968

Approach to interior noise control. I - Damped trim panels p 650 A85-39221

The battle against noise in industry
p 705 A85-39349

Meeting the 1985 FAA noise regulations with old engines and modern acoustic technology
[AIAA PAPER 85-1120] p 651 A85-39616

Noise control technology for gas turbine engines
p 766 A85-41031

Adaptive noise cancellation in a fighter cockpit environment
[AD-A153178] p 749 A85-41321

New ICAO procedures on instrument departures and noise abatement p 746 A85-41733

Approach to interior noise control. II - Self-supporting damped interior shell p 758 A85-42939

Effects of acoustic treatment on the interior noise of a twin-engine propeller airplane p 827 A85-45841

Noise constraints effecting optimal propeller designs
[SAE PAPER 850871] p 874 A85-50106

Flight investigation of cabin noise control treatments for a light turboprop aircraft
[SAE PAPER 850876] p 885 A85-50109

Mechanisms of transmission and control of low-frequency sound in aircraft interiors
[SAE PAPER 850879] p 885 A85-50111

Jet noise suppression by porous plug nozzles
[NASA-CR-3613] p 65 N85-11790

Commercial aircraft noise
[PNR-90206] p 135 N85-12865

Experimental investigation of shock-cell noise reduction for dual-stream nozzles in simulated flight
[NASA-CR-3846] p 135 N85-13549

Experimental investigation of shock-cell noise reduction for single stream nozzles in simulated flight
[NASA-CR-3845] p 135 N85-13550

Sources, paths, and concepts for reduction of noise in the test section of the NASA Langley 4x7m wind tunnel
[NASA-CR-172446-VOL-1] p 197 N85-14666

Comparison of options for reduction of noise in the test section of the NASA Langley 4x7m wind tunnel, including reduction of nozzle area
[NASA-CR-172446-VOL-2] p 197 N85-14667

Noise constraints effecting optimal propeller designs
[NASA-TM-86967] p 394 N85-19823

A study of the methods for evaluating the noise impact of a proposed airport on a community
p 609 N85-25957

Fan noise suppression in turbofan engines
[B8580076] p 671 N85-27872

Effects of propeller rotation direction on airplane interior noise levels
[NASA-TP-2444] p 805 N85-30767

Aircraft cabin noise prediction and optimization
[NASA-CR-175982] p 806 N85-30768

Design of sidewall treatment of cabin noise control of a twin engine turboprop aircraft
[NASA-CR-172245] p 806 N85-30771

FAA/GAMA (Federal Aviation Administration/General Aviation Manufacturer's Association) propeller aircraft noise test program, Salina Municipal Airport, Salina, Kansas
[AD-A154818] p 862 N85-32983

Discussion of the paper, Some Aspects of Propulsion for the Augmenter-Wing Concept, by D. C. Whittley
[NASA-TM-77884] p 818 N85-33108

Some problems in high speed gears and gearing
p 910 N85-34312

Langley aeronautics and space test highlights, 1984
[NASA-TM-87585] p 920 N85-35151

Optimally designed propellers constrained by noise
p 892 N85-35196

A research program to reduce the interior noise in general aviation aircraft, index and summary
[NASA-CR-176178] p 919 N85-35695

**NOISE SPECTRA**

On the relationship between broadband shock associated noise and screech tones
[AIAA PAPER 84-2276] p 59 A85-10836

Large-scale coherent structure and far-field jet noise
p 78 A85-14390

Power spectral density of subsonic jet noise
p 704 A85-37898

Noise bands associated with the turbulence-rotor interaction p 862 A85-44046

**NOISE TOLERANCE**

A path model of aircraft noise annoyance
p 304 A85-22071

Airport noise impact prediction and measurement
p 130 N85-12476

NOISEMAP 4.4 computer program update, operator's manual, addendum 1
[AD-A147091] p 302 N85-16503

A community survey of helicopter noise annoyance conducted under controlled noise exposure conditions
[NASA-TM-86400] p 538 N85-23374

Disturbance to the population due to flight operations at landing fields. Questionnaire on community reaction to non-commercial and sporting aviation
[NASA-TM-76531] p 534 N85-24537

**NONDESTRUCTIVE TESTS**

In situ aircraft inspection by pulsed laser holography
p 1 A85-10554

Eddy current jet engine disk-crack monitor
p 47 A85-11100

Critical analysis of flaw acceptance methods
p 50 A85-11754

Non-destructive testing of aircraft composite structures p 123 A85-14107

Evolution of an automated eddy current inspection system p 125 A85-15606

Test loading of airfield pavements
p 426 A85-27721

Inspection of gas-turbine engine blades under operating conditions p 421 A85-29775

Development of acoustic emission techniques for quantitative use on aerospace C.F.R.P. structures
p 445 A85-29936

Techniques for the early detection of gear and bearing failures in helicopter drive trains p 525 A85-31967

Advanced methodology for quality control of composite rotor blades at Bell Helicopter Textron
p 525 A85-31976

Evaluation of automated eddy current system reliability
p 525 A85-31977

Aircraft corrosion and detection methods
p 541 A85-36143

Ultrasonic detection of cracks in web geometries
p 905 A85-47380

Crack characterisation in turbine disks
p 905 A85-47396

Development of a quantitative flaw characterization module - A status report p 905 A85-47402

Manufacturing technology for nondestructive evaluation (NDE) system to implement retirement for cause (RFC) procedures for gas turbine engine components
p 905 A85-47469

NDT-33 - A computerized eddy current instrument
p 906 A85-47470

Innovative eddy current probe coupling method
p 906 A85-47472

Development of active microwave ferromagnetic resonance eddy current probes and associated signal processing methods p 906 A85-47473

Electric Current Perturbation inspection of selected retirement-for-cause turbine engine components
p 906 A85-47474

Evaluation of captured water column technology for advanced ultrasonic sizing techniques
p 906 A85-47475

Aerospace radiography - The last three decades
p 908 A85-49100

Robotics in nondestructive inspection at Sacramento Air Logistics Center
[AD-P004012] p 127 N85-11992

Defect detection threshold in riveted joints, test report no.44-833/F — in aircraft p 129 N85-13260

Nondestructive inspection: Improved capabilities of technicians
[AD-A147388] p 295 N85-16196

Exploratory development of advanced surface flaw detection methods
[AD-A148757] p 354 N85-18060

Aerostructure nondestructive evaluation by thermal field detection. Phase 2: Technique refinement and quantitative determination of flaw detection capabilities
[AD-A149822] p 417 N85-21155

Nondestructive tests of ceramic components for aircraft turbines p 583 N85-26718

Initial quality of advanced joining concepts
[AD-A152241] p 606 N85-27027

Modifications of flight-by-flight load sequences to provide for good fracture surface readability
[NLR-MP-84012-U] p 799 N85-31577

**NONEQUILIBRIUM FLOW**

Spontaneous vapor condensation in nonequilibrium supersonic monodisperse flow p 47 A85-10550

Effects of slip and chemical reaction models on three-dimensional nonequilibrium viscous shock-layer flows p 80 A85-15506

Flow field studies on a biconic model in high enthalpy non-equilibrium flow p 320 A85-25480

Measurements of density and velocity profiles in non-equilibrium laminar hypersonic boundary layers in air
p 320 A85-25483

Three-dimensional nonequilibrium viscous flow over the Shuttle Orbiter with catalytic surface effects
p 392 A85-29301

A numerical calculation of nonequilibrium flow past a wing in the approximation of a thin shock layer
p 544 A85-33593

Nonequilibrium supersonic flows past oscillating 2-D lifting surfaces and thin elastic bodies
p 618 A85-37197

Density and velocity profiles in non-equilibrium laminar boundary layers in air
[AIAA PAPER 85-0976] p 620 A85-37626

Hypersonic nonequilibrium gas flow past zero-aspect wing p 562 N85-27063

**NONFLAMMABLE MATERIALS**

Model tests of aircraft interior panel flammability
p 852 A85-44125

Investigation of experimental lightweight firewall materials for A/C engine bay applications
[AD-A155765] p 878 N85-35175

**NONISENTROPICITY**

Non-isentropic unsteady transonic small disturbance theory
[AIAA PAPER 85-0600] p 469 A85-30329

**NONLINEAR EQUATIONS**

Approximate solution of a nonlinear problem of flow past a thin airfoil profile near a support surface
p 233 A85-22368

Entropy condition satisfying approximations for the full potential equation of transonic flow p 385 A85-26916

A nonlinear analysis of infinitely long graphite-epoxy cylindrical panels loaded with internal pressure
[AIAA PAPER 85-0770] p 522 A85-30291

The nonlinear model for predicting rotating stall in multistage axial-flow compressors p 471 A85-31339

Comparison of various numerical techniques in gas dynamics p 475 A85-33354

A nonlinear solution for parachute suspension line deformation p 877 A85-49140

On solving nonlinear problems of aircraft structural mechanical design p 344 N85-18223

**NONLINEAR FILTERS**

Nonlinear and adaptive filters for aircraft tracking — German thesis p 485 A85-31848

**NONLINEAR SYSTEMS**

Robust model following system and its application — for nonlinear aircraft control p 57 A85-10998

Nonlinear model simplification in flight control system design p 114 A85-13631

Modular programming structure applied to the simulation of non-linear aircraft models p 132 A85-15661

Calculation of the probabilistic characteristics of nonlinear control systems using a trigonometric version of the factorial interpolation method p 192 A85-17065

A generalized stability criterion for nonlinear dynamic systems — modeling aircraft roll maneuvers
[AIAA PAPER 85-0202] p 300 A85-19586

The development of digital attitude controllers - Its past, present and future p 302 A85-22449

A method for high order linear system reduction and nonlinear system simplification p 457 A85-27514

An iterative procedure for nonlinear flutter analysis
[AIAA PAPER 85-0668] p 523 A85-30355

Effect of active control system nonlinearities on the L-1011-3(ACS) design gust loads
[AIAA PAPER 85-0755] p 511 A85-30374

Nonlinear state feedback control of uncertain linear systems and application to control of aircraft
p 513 A85-33294

Determination of the discrepancy vector components using nonlinear functions in solving certain boundary value elasticity problems p 600 A85-35900

Structural analysis of the CL-600 rear pressure bulkhead, using NASTRAN nonlinear analysis capabilities (Solution 64) p 754 A85-40459

The effect of the Magnus moment on the motion stability of an asymmetric flight vehicle p 850 A85-44848

Design of direct digital flight-mode control systems for high-performance aircraft with multiple actuator non-linearities p 840 A85-45051

Aeroelastic stability analysis with interacting structural nonlinearities p 55 N85-11364

Nonlinear system identification methodology development based on F-4S flight test data analysis
[AD-A146289] p 105 N85-12053

Iterative method of calculating strength of airframe members using finite element method
p 162 N85-14955

On the application of compatibility checking techniques to dynamic flight test data
[ARL/AERO-R-161] p 416 N85-21151

Application of CFD techniques toward the validation of nonlinear aerodynamic models
[NASA-TM-86715] p 560 N85-26871

Alternatives for jet engine control
[NASA-CR-175831] p 583 N85-26713

Alternatives for jet engine control
[NASA-CR-175832] p 583 N85-26714

Alternatives for jet engine control
[NASA-CR-175833] p 583 N85-26715

Observations, theoretical ideas and modeling of turbulent flows: Past, present and future
[NASA-TM-86679] p 607 N85-27167

An analytical investigation of dynamic coupling in nonlinear, geared rotor systems p 607 N85-27218

Evaluation of a fault tolerant system for an integrated avionics sensor configuration with TSRV flight data
[NASA-CR-172589] p 657 N85-28941

Aerodynamic characteristics of the standard dynamics model in coning motion at Mach 0.6
[NASA-TM-86717] p 817 N85-32094

**NONLINEARITY**

Acoustic shocks in a variable area duct containing near sonic flows p 474 A85-32632

Nonlinear waves theories in vortex flow
p 550 A85-35767

PROGRAM VSAERO: A computer program for calculating the non-linear aerodynamic characteristics of arbitrary configurations: User's manual
[NASA-CR-166476] p 148 N85-14802

An investigation of vortex-induced aerodynamic characteristics of supersonic cruise configurations
[NASA-CR-174299] p 234 N85-15690

Prediction of dynamic stall characteristics using advanced non-linear panel methods
[AD-A148453] p 239 N85-16836

Nonlinear analysis for high-temperature multilayered fiber composite structures — turbine blades
[NASA-TM-83754] p 437 N85-21273

Bifurcation theory applied to aircraft motions
[NASA-TM-86704] p 478 N85-23705

Nonlinear problems in flight dynamics involving aerodynamic bifurcations
[NASA-TM-86706] p 557 N85-25206

Method of calculating separation flow of subsonic gas stream around wings p 636 N85-28161

Hyperbolic phenomena in the flow of viscoelastic fluids
[AD-A153533] p 700 N85-29186

**NONSTABILIZED OSCILLATION**

Nonstationary deformation of structural elements and their optimization p 696 A85-39450

Nonlinear problems in flight dynamics involving aerodynamic bifurcations
[NASA-TM-86706] p 557 N85-25206

**NONUNIFORM FLOW**

Three dimensional aerodynamics of an annular cascade in a non-uniform inlet flow
[AIAA PAPER 85-0174] p 213 A85-19567

Lift and drag of airfoils in nonuniform supersonic stream p 618 A85-37200

A supersonic inhomogeneous flow of an ideal gas around blunted bodies p 619 A85-37335

Effects of non-uniform velocity profiles on dual jets in a crossflow
[AIAA PAPER 85-1674] p 716 A85-40763

Laminar flow heat exchangers. Viscosity induced non-uniform flow
[AD-A144777] p 53 N85-10307

Studies on the interference of wings and propeller slipstreams
[NASA-CR-175753] p 557 N85-25210

**NORMAL SHOCK WAVES**

The response of normal shocks in diffusers
p 318 A85-25150

Hybrid approach to steady transonic normal shock-compressible laminar boundary layer interactions over airfoils with suction
[AIAA PAPER 85-0522] p 386 A85-27876

Transonic shock-wave/turbulent boundary-layer interactions in a circular duct p 474 A85-32610

Effect of the Basset term on particle relaxation behind normal shock waves
[AD-A145446] p 54 N85-11320

**NORTHERN HEMISPHERE**

An alternate approach to very long duration ballooning in the northern hemisphere p 640 A85-38316

NORWAY
Finnair, LOT, SAS reps in USSR on present operations, plans p 333 N85-18035
The national Search and Rescue (SAR) needs and organization in Norway p 607 N85-31099
NOSE CONES
Regarding parametric investigations of slender cone nose bluntness effects [AIAA PAPER 85-0349] p 220 A85-19688
Laminar heat-transfer distributions on biconics at incidence in hypersonic-hypervelocity flows [NASA-TP-2213] p 293 N85-16065
NOSE FINS
Wind tunnel tests on a tube-launched missile configuration with a deflectable nose control and a novel wrap-around fin stabiliser [AR-003-696] p 8 N85-10003
NOSE INLETS
Performance of a new nose-lip hot-air anti-icing concept [AIAA PAPER 85-1117] p 664 A85-39614
NOSE TIPS
Heat-transfer distributions for biconics at incidence in hypersonic-hypervelocity real-gas flows p 319 A85-25478
The wind tunnel investigation for obtaining rolling moment with small asymmetry p 674 A85-38970
Navier-Stokes solution for hypersonic flow over an indented nosetip [AIAA PAPER 85-1504] p 721 A85-40940
NOSES (FOREBODIES)
Noseboom position error prediction data base update p 418 A85-28650
3-D separation on bodies with elliptic cross-section and near root-section of wing-body combination p 737 A85-42987
Development of the F-20 nose radome [AD-P004374] p 449 N85-21468
Nose and inlet duct radomes for the firebolt aerial target [AD-P004375] p 449 N85-21469
Development of a fuselage forward section in Carbon Fiber Reinforced Plastic (CFRP) type of construction [MBB/LFA34/CFK/PUB/008] p 651 N85-27851
Wind tunnel drag evaluations of helicopter nose sections [AD-A155489] p 818 N85-32100
NOTCH STRENGTH
Finite element analysis of notch behavior using a state variable constitutive equation p 799 N85-31548
NOTCH TESTS
Comparison of predictions and experimental results on notches and bolt-loaded drilled holes in CFRP laminates [DGLR PAPER 84-141] p 788 A85-40277
Finite element analysis of notch behavior using a state variable constitutive equation p 799 N85-31548
NOWCASTING
MERIT: A man/computer data management and enhancement system for upper air nowcasting/forecasting in the United States — Minimum Energy Routes using Interactive Techniques (MERIT) p 56 N85-10558
TAF verification (airport weather forecasts) [GEOPHYSBDBW-FM-205] p 191 N85-14420
NOZZLE DESIGN
Engine control considerations for multifunction nozzles [AIAA PAPER 84-2454] p 108 A85-13542
Single expansion ramp nozzle development status [AIAA PAPER 84-2455] p 108 A85-13543
Supersonic jet shock noise reduction [AIAA PAPER 84-2278] p 196 A85-16099
Design of asymmetric nozzles of maximum moment under additional conditions on geometric and force characteristics p 140 A85-16184
Computational-experimental study of a Laval nozzle with a cylindrical throat p 141 A85-16189
Aerodynamic studies linked to the development of deployable nozzles — for upper stage ballistic missiles [ONERA, TP NO. 1984-149] p 205 A85-19263
Design and experimental evaluation of propfan inlets [SAE PAPER 841477] p 352 A85-25976
An analytical and experimental investigation of annular propulsive nozzles p 392 A85-29253
Design and testing of axisymmetric nozzles for ion-molecule reaction studies between 20 K and 160 K p 596 A85-33537
External compression supersonic inlet analysis using a finite difference two-dimensional Navier-Stokes code p 629 A85-39581
Study of an asymmetric flap nozzle as a thrust-vectoring device p 629 A85-39582
Performance characteristics of rectangular and circular thrust augmenting ejectors [AIAA PAPER 85-1344] p 631 A85-39736
Circular-to-rectangular transition ducts for high-aspect ratio nonaxisymmetric nozzles [AIAA PAPER 85-1346] p 632 A85-39738
Summary of nonaxisymmetric nozzle internal performance from the NASA Langley Static Test Facility [AIAA PAPER 85-1347] p 668 A85-39739
Jet noise suppression by porous plug nozzles [NASA-CR-3613] p 65 N85-11790
Experimental investigation of shock-cell noise reduction for single stream nozzles in simulated flight [NASA-CR-3845] p 135 N85-13550
Some aspects of the design of a fly-by-wire flying control system for a supersonic V/STOL fighter aircraft [COLL-AERON-8413] p 425 N85-21175
NOZZLE EFFICIENCY
Calculation of the full cooling efficiency of the perforated wall of a gas turbine nozzle guide vane p 352 A85-25623
Altitude testing of a flight weight, self-cooled, 2D thrust vectoring exhaust nozzle [SAE PAPER 841557] p 352 A85-25984
Dynamic pressure fluctuations in the internozzle region of a twin-jet nacelle [SAE PAPER 841540] p 627 A85-39064
The effect of the pitch of axisymmetric nozzles on the efficiency of the nozzle assembly and of the turbine stage p 660 A85-39107
Static internal performance of single-expansion-ramp nozzles with various combinations of internal geometric parameters [NASA-TM-86270] p 147 N85-14797
NOZZLE FLOW
Choking phenomena in multiflow nozzles with and without viscosity effects p 3 A85-10540
Certain features characterizing the development of coherent flow structures in the initial region of three-dimensional turbulent jets p 76 A85-13795
The prediction of static-to-flight changes in jet noise [AIAA PAPER 84-2358] p 134 A85-13963
Inviscid steady flow past turbofan mixer nozzles p 168 A85-17041
Calculation of viscous nozzle flows by the unsteady method of characteristics [AIAA PAPER 85-0131] p 212 A85-19542
A method for calculating the performance of ejector nozzles p 287 A85-20232
Hypersonic multicycle gas jet with a strongly underexpanded stream at the nozzle section p 229 A85-20554
Approximate determination of the boundaries of an ideal gas jet issuing under conditions of pressure difference from a nozzle with the formation of a free vortex flow p 315 A85-23982
Analysis of steady, two-dimensional, chemically reacting, nonequilibrium, inviscid flow in nozzles p 317 A85-25129
Gasdynamic model and similarity relations for the starting process in supersonic nozzles and jets p 384 A85-26494
A comparison of different calculation methods for axisymmetric fields in convergent-divergent nozzles p 390 A85-29047
An analytical and experimental investigation of annular propulsive nozzles p 392 A85-29253
Condensation phenomena in supersonic nozzles p 393 A85-29989
Upstream influence on turbulent jet flows from cruciform nozzles p 470 A85-30995
The Kutta condition in unsteady flow p 471 A85-31183
An assessment of numerical solutions of the compressible Navier-Stokes equations p 526 A85-32582
Effect of ambient pressure on nozzle centerline flow properties p 546 A85-35146
An experimental investigation of the aerodynamics of nozzle flow in a rectangular passage p 547 A85-35500
Interaction of twin turbulent circular jet p 617 A85-37049
Gas flow in nozzles and jets p 619 A85-37337
Computation of the thrust performance of axisymmetric nozzles p 622 A85-37932
Experiment of turbulent round jet parallel to ground plane p 622 A85-38367
The computation of transonic nozzle flow-field by a time-dependent method p 625 A85-38963
Investigation of the effect of two endwall contours on the performance of an annular nozzle cascade [AIAA PAPER 85-1218] p 630 A85-39661
Numerical solutions of ramjet nozzle flows [AIAA PAPER 85-1270] p 631 A85-39689
The investigation of inlet/nozzle flowfield coupling using compact propulsion simulators [AIAA PAPER 85-1284] p 651 A85-39698
Performance characteristics of rectangular and circular thrust augmenting ejectors [AIAA PAPER 85-1344] p 631 A85-39736
Summary of nonaxisymmetric nozzle internal performance from the NASA Langley Static Test Facility [AIAA PAPER 85-1347] p 668 A85-39739
Results of AGARD assessment of prediction capabilities for nozzle afterbody flows [AIAA PAPER 85-1464] p 633 A85-39793
Influence of downstream distance on simplex atomizer spray characteristics [ASME PAPER 84-WA/HT-25] p 696 A85-39888
Vector control of two-dimensional turbulent free jet by both-side flaps p 789 A85-40358
A Navier-Stokes solution procedure for analysis of steady two-dimensional transonic nozzle flows [AIAA PAPER 85-1597] p 713 A85-40713
Three dimensional CSCM method for the compressible Navier-Stokes equations with application to a multi-nozzle exhaust flowfield [AIAA PAPER 85-1193] p 726 A85-41419
Aerodynamic performance of a turbine scroll with a diagonal flow nozzle p 729 A85-41825
The three-dimensional compressible flow in a radial inflow turbine scroll p 729 A85-41826
Calculation of flow in the main part of a supersonic jet with allowance for the influence of the nozzle exit section p 815 A85-44131
Experimental investigation of shock-cell noise reduction for single stream nozzles in simulated flight [NASA-CR-3845] p 135 N85-13550
Flow of nitrogen-pressurized Halon 1301 in fire extinguishing systems [NASA-CR-174271] p 242 N85-15701
Static internal performance of a two-dimensional convergent nozzle with thrust-vectoring capability up to 60 deg [NASA-TP-2391] p 328 N85-18951
Effect of drag behind nozzle array on its force and energy characteristics p 481 N85-24107
Nozzle wall roughness effects on free-stream noise and transition in the pilot low-disturbance tunnel [NASA-TM-86389] p 910 N85-34355
NOZZLE GEOMETRY
Passive control of jets with indeterminate origins [AIAA PAPER 84-2299] p 4 A85-10852
Development of a pneumatic thrust deflecting nozzle [AIAA PAPER 84-2456] p 108 A85-13544
On a forced elliptic jet p 78 A85-14357
Supersonic jet shock noise reduction [AIAA PAPER 84-2278] p 196 A85-16099
Design of asymmetric nozzles of maximum moment under additional conditions on geometric and force characteristics p 140 A85-16184
Aerodynamic studies linked to the development of deployable nozzles — for upper stage ballistic missiles [ONERA, TP NO. 1984-149] p 205 A85-19263
Experimental study of forward-located jet-interaction nozzles [AIAA PAPER 85-0454] p 224 A85-19762
Effect of the arrangement of apertures on the gain coefficient during asymmetric gas injection into a Laval nozzle p 229 A85-20562
Study of a bounded jet flow considering the initial turbulence - Experiments with a nozzle having aspect ratio of 3 p 367 A85-24565
Experimental definition of nonaxisymmetric exhaust nozzle plumes — for aircraft thrust vector control p 385 A85-26752
Upstream influence on turbulent jet flows from cruciform nozzles p 470 A85-30995
Recent developments in ejector design for V/STOL aircraft [SAE PAPER 841498] p 683 A85-39206
Development of a pneumatic thrust deflector [SAE PAPER 841558] p 683 A85-39209
Unsteady temperature analysis of air-cooled turbine vanes p 767 A85-41783
Aerodynamic performance of a turbine scroll with a diagonal flow nozzle p 729 A85-41825
Estimation of the wave resistance of bodies of revolution with a front separation zone in supersonic flow p 730 A85-42119
A study of lift characteristics of an upper surface blown jetwing with a rectangular nozzle p 145 N85-13767
Comparison of options for reduction of noise in the test section of the NASA Langley 4x7m wind tunnel, including reduction of nozzle area [NASA-CR-172446-VOL-2] p 197 N85-14667
Preliminary analysis of tone-excited two-stream jet velocity decay [NASA-TM-86951] p 397 N85-21114
Effect of drag behind nozzle array on its force and energy characteristics p 481 N85-24107
NOZZLE THRUST COEFFICIENTS
Design of asymmetric nozzles of maximum moment under additional conditions on geometric and force characteristics p 140 A85-16184

Study of an asymmetric flap nozzle as a thrust-vectoring device p 629 A85-39582
Engine thrust measurement uncertainty [AIAA PAPER 85-1404] p 669 A85-39765
Review of empirical and analytical specific impulse methodologies [AIAA PAPER 85-1434] p 669 A85-39776
Static internal performance of a two-dimensional convergent nozzle with thrust-vectoring capability up to 60 deg [NASA-TP-2391] p 328 N85-18951

**NOZZLE WALLS**
A curved test section for research on transonic shock wave-boundary layer interaction [VTH-LR-414] p 561 N85-26682

**NOZZLES**
Pressure drop and coefficients of internal heat transfer necessary for transpiration cooling p 527 N85-22831
Discussion of the paper, Some Aspects of Propulsion for the Augmenter-Wing Concept, by D. C. Whittley [NASA-TM-77884] p 818 N85-33106

**NUCLEAR ELECTRIC POWER GENERATION**
USSR report: Engineering and equipment [JPRS-UEQ-84-007] p 188 N85-14954

**NUCLEAR EXPLOSION EFFECT**
Flight test techniques for validating simulated nuclear electromagnetic pulse aircraft responses [AIAA PAPER 84-2498] p 100 A85-13569

**NUCLEAR POWER PLANTS**
Assuring structural integrity in Army systems [NASA-CR-175492] p 448 N85-20398

**NUMERICAL ANALYSIS**
A numerical analysis of the aerodynamic properties of wings using a minicomputer p 472 A85-31777
Multi-dimensional case of an entropic variational fomulation of conservative hyperbolic systems p 535 A85-33018
Instationary dolphin flight - The optimal energy exchange between a sailplane and vertical currents in the atmosphere p 646 A85-37488
Numerical solution of the minimum-time flight of a glider through a thermal by use of multiple shooting methods p 638 A85-37489
A data-processing procedural chain in structural mechanics [DGLR PAPER 84-115] p 801 A85-40331
Numerical analysis of aerodynamic characteristics of an aeroplane wing in compressible flow p 726 A85-41606
Numerical analysis of the dynamic characteristics of a helicopter rotor blade with various boundary conditions p 757 A85-41607
Effect of the Basset term on particle relaxation behind normal shock waves [AD-A145446] p 54 N85-11320
A numerical study of several supersonic flows p 325 N85-17995
China report: Science and technology [JPRS-CST-84-008] p 500 N85-22384
Computations of two-dimensional airfoil-vortex interactions — helicopter rotor flowfields [NASA-CR-3885] p 479 N85-23709
Unsteady Navier-Stokes calculations in an accelerated reference frame [AD-A151751] p 602 N85-25774
Proceedings of the NAL Symposium on Aircraft Computational Aerodynamics [NAL-SP-1] p 543 N85-26611
Numerical analyses in aerodynamic design of aero-engine fan p 582 N85-26618
The impact of supercomputers on experimentation: A view from a national laboratory [NASA-TM-86822] p 916 N85-34510

**NUMERICAL CONTROL**
Software controlled display/pushbutton — for avionics [AIAA PAPER 84-2657] p 164 A85-17844
Microprocessor control of turboprop engines p 263 A85-19877
Trends in digital engine control - Integration of propulsion control with flight control and avionic systems in future military and commercial aircraft p 264 A85-21466
Design and flight testing of digital direct side-force control laws p 423 A85-26430
Design of compensation schemes for a nonminimum-phase multivariable plant p 458 A85-28810
Development of a microprocessor-controlled laser system for automated precision balancing p 443 A85-28828
A unified method for evaluating real-time computer controllers and its application p 458 A85-29408
Automatic monitoring of aviation terminal forecasts p 532 A85-30600
The X-29 - Is it coming or going? p 572 A85-34699
COMPAS - Computer support for approach control [DGLR PAPER 84-091] p 748 A85-40310
The transonic wind tunnel of the Munich Institute for Air Transport Technology and Light Construction of HSBw [DGLR PAPER 84-107] p 777 A85-40324
Development of low cost digital control system for small gas turbine engine p 769 A85-41839
A unified method for evaluating real-time computer controllers: A case study — aircraft control [NASA-CR-174168] p 132 N85-13478
Flexible manufacturing system for the production of aircraft parts [BLL-PNR-90237-(8019.3153)] p 297 N85-17159
Design description of a microprocessor based Engine Monitoring and Control unit (EMAC) for small turboshaft [NASA-TM-86860] p 313 N85-17935
Design and realization of a multiradar tracking system for air traffic control [ENST-84E010] p 338 N85-18044
Automating the study of error in discrete aerodynamic fairing design p 504 N85-24176
Application of AFTI/F-16 task-tailored control modes in advanced multirole fighters p 589 N85-26735
X-29A digital flight control system design p 589 N85-26736
Some flight test results with redundant digital flight control systems p 589 N85-26739
An update on experience on the fly by wire Jaguar equipped with a full-time digital flight control system p 589 N85-26740
The application of numerical control (NC) in manufacturing wind tunnel models [B8580078] p 699 N85-28140
Flight control system for a computer controlled aircraft with limited sensors [AD-A155107] p 830 N85-32115

**NUMERICAL FLOW VISUALIZATION**
Numerical simulation of the transonic flowfield for wing/nacelle configurations [AIAA PAPER 84-2430] p 76 A85-13964
Modeling of turbulent buoyant flows in aircraft cabins p 90 A85-15867
Flows over low Reynolds number airfoils - Compressible Navier-Stokes numerical solutions [AIAA PAPER 85-0107] p 210 A85-19523
Numerical computation of viscous flowfields about multiple component airfoils [AIAA PAPER 85-0167] p 213 A85-19563
The numerical simulation of steady transonic rotational flow using a dual potential formulation [AIAA PAPER 85-0368] p 221 A85-19701
A numerical simulation of the NFAC (National Full-scale Aerodynamics Complex) open-return wind tunnel inlet flow [AIAA PAPER 85-0437] p 230 A85-20869
Two-dimensional viscous simulation of inlet/diffuser flows with terminal shocks p 386 A85-27091
Numerical study of a ramjet dump combustor flowfield p 392 A85-29093
An experimental and numerical study of flow past a wedge of finite width at angles of sideslip p 471 A85-31476
Simulation of rotating stall by the vortex method p 544 A85-34012
Experimental and numerical investigation of a shock wave impingement on a cylinder p 545 A85-35130
Determination of forward edge eddies in delta wings p 547 A85-35260
Experimental and numerical investigation of supersonic flow through a square duct [AIAA PAPER 85-1622] p 714 A85-40728
Computation of three-dimensional viscous transonic flows with the LU factored scheme [AIAA PAPER 85-1510] p 721 A85-40945
Computational study of three-dimensional wake structure [AIAA PAPER 85-1617] p 725 A85-41404
Three-dimensional tomographic reconstruction of the flow around a revolving helicopter rotorblade - A numerical simulation p 903 A85-47106
The use of visualization as a guide in the numerical determination of the flow around an abruptly accelerated elliptic cylinder or airfoil p 904 A85-47127
Some contributions to the modelling of discontinuous flows p 907 A85-48224
A wind tunnel inlet flow simulation p 871 A85-49141
Calculation of transonic flows around an aircraft configuration with motorized nacelle [SNIAS-851-111-106] p 742 N85-31008

**NUMERICAL INTEGRATION**
Comparative study of various quadratures for subsonic lifting surface chordwise integrals p 205 A85-19404
Solution of transonic S1 surface flow by successively reversing the direction of integration of the stream function equation p 315 A85-24094

**NUMERICAL STABILITY**
Potential equation for transonic steady flow with large longitudinal disturbance and line relaxation p 142 A85-18281
Treatment of supersonic flows with embedded subsonic regions p 145 A85-18681
A study of the effects of numerical dissipation on the calculation of supersonic separated flows [AIAA PAPER 85-0301] p 219 A85-19650
An algebraic solution of the GPS equations p 406 A85-26809
Stability of a stationary solution to the ablation equation p 623 A85-38555
Compressor and turbine models - numerical stability and other aspects [AD-A153611] p 673 N85-28948

**NUMERICAL WEATHER FORECASTING**
Wind modelling for increased aircraft operational efficiency p 559 N85-26652
AEV local verification for aviation, precipitation, and temperature programs: AV, REL, TEM [PB85-179125] p 800 N85-30568

**O**

**OBLIQUE SHOCK WAVES**
Interaction between a weak oblique shock wave and a turbulent boundary layer in purely supersonic flow p 6 A85-12035
Surface phenomena in a three-dimensional skewed shock wave/laminar boundary-layer interaction p 80 A85-15336
Oblique shock wave - Turbulent boundary layer interaction with suction p 142 A85-17243
The discussion of the position of conical shock of axisymmetric air intake of supersonic aircraft relative to the leading edge of the cowl lip p 316 A85-24096
Flow past V-wings with a break in the leading edge p 389 A85-28445
Experimental and numerical investigation of a shock wave impingement on a cylinder p 545 A85-35130
Oscillating oblique shock interaction with a laminar boundary layer p 735 A85-42971

**OBLIQUE WINGS**
Joined-wing research airplane feasibility study [AIAA PAPER 84-2471] p 99 A85-13553
Projected advantage of an oblique wing design on a fighter mission [AIAA PAPER 84-2474] p 102 A85-13965
Numerical solution of the full-potential equation for rotors and oblique wings using a new wake model [AIAA PAPER 85-0268] p 216 A85-19621
Oblique wing ready for research aircraft p 573 A85-36149
Military missions call for oblique wing p 573 A85-36150
Project advantage of an oblique wing design on a fleet air defense mission p 881 A85-49135

**OBSERVABILITY (SYSTEMS)**
Controllability and observability of linear time delay systems p 132 A85-15654
Observability of relative navigation using range-only measurements p 750 A85-42399

**OBSERVATION AIRCRAFT**
Investigation of air pollution impact in Eastern Bavaria: Measurement results from August and September, 1984 [DFVLR-FB-85-03] p 702 N85-28471
Motor glider meteorology p 914 N85-35543

**OBSTACLE AVOIDANCE**
LPI-radar for helicopter obstacle warning p 297 N85-16810

**OCEAN SURFACE**
Cosmic interpolation of terrestrial potential values p 451 A85-26476
Regional mean sea surfaces based on GEOS-3 and SEASAT altimeter data p 453 A85-29716
TOPEX ground data system p 517 A85-32192
The use of synthetic aperture radar imagery to detect hazards to navigation [AD-A149324] p 339 N85-18971
A survey of the turbulence in the marine surface layer for the operation of low-Reynolds number aircraft [AD-A154133] p 800 N85-30558

**OCEANOGRAPHY**
TOPEX ground data system p 517 A85-32192
An airborne infrared thermal scanning system for easy use on Navy P-3 aircraft [AD-A149890] p 461 N85-22143

**OCEANS**
Theoretical and experimental analyses of laser altimeters for barometric measurements over the ocean p 298 N85-17351
MIZEX, 1984, NASA CV-990 flight report [NASA-TM-86216] p 800 N85-30451

**OCTANE NUMBER**
Trends of petroleum fuels
[DE85-000116] p 522 N85-24023
**OCTANES**
Effects of heterogeneity of mixtures on gaseous emissions in premixed/prevaporized combustion
p 793 A85-41600
**OCULOMETERS**
Electrooculographic measurement, fatigue and variability of performance in simulated aircraft flight
p 760 N85-29946
**OFF-ON CONTROL**
On the controllability limit of a human operator when using a Bang-Bang type controller p 604 A85-42689
**OFFSHORE PLATFORMS**
Full load testing in the platform module prior to tow-out: A case history of subsynchronous instability
p 186 N85-14117
**OGIVES**
The effect of Reynolds number on normal and side forces on ogive-cylinders at high incidence
[AIAA PAPER 85-1799] p 813 A85-43852
Projectile aerodynamics prediction with CSCM-S upwind implicit relaxation algorithm
[AIAA PAPER 85-1833] p 814 A85-43874
**OH-58 HELICOPTER**
Limited flight investigation of strakes mounted on a helicopter tail boom p 342 A85-26394
**OIL ADDITIVES**
Certification of reciprocating engine aircraft oils and additives by supplemental type certification procedures
[SAE PAPER 850899] p 901 A85-50116
**OIL RECOVERY**
The recovery of used MS-8p oil by high-volume consumers p 42 A85-11850
**OILS**
Aviation turbine fuels from tar sands bitumen and heavy oils. Part 1: Process analysis
[AD-A151319] p 597 N85-25539
**OMEGA NAVIGATION SYSTEM**
Anomalous interference in Omega VLF wave propagation on east-to-west equatorial paths
p 14 A85-11024
OMEGA navigation system position-fix accuracy assessment p 93 A85-14828
CMA-771 - A new OMEGA onboard system
p 749 A85-41399
**ON-LINE SYSTEMS**
On-line determination of optimal flight paths for helicopters p 495 A85-31994
A measuring and computing off-line and on-line system for a turbine laboratory p 795 A85-43052
Maintenance Management Information and Control System (MMICS): Administrative boon or burden
[AD-A145762] p 136 N85-12790
CIG (Computer image generation) data bases in an instance: Bits and pieces
[AD-P004318] p 375 N85-17972
Calculation and display of stack departure times for aircraft inbound to Heathrow Airport
[AD-A151991] p 568 N85-25241
**ONBOARD DATA PROCESSING**
Data communications and teleprocessing systems on ground and on board of aircraft p 15 A85-12533
Navigation processing of the Flight Management Computer System for the Boeing 737-300
p 93 A85-14827
Some concepts for improving non-precision approach guidance through use of on-board data bases
p 95 A85-14837
The design of an on-board look-ahead-simulation for approach p 96 A85-15658
Integrated flight control/navigation sensors
[AIAA PAPER 84-2623] p 171 A85-17820
The impact of advanced computational techniques on digital avionics signal processor performance
[AIAA PAPER 84-2653] p 194 A85-17840
Integrated avionics for advanced Army rotorcraft
[AIAA PAPER 84-2672] p 151 A85-17855
The microcomputer in flight test data reduction
p 458 A85-28649
Investigation of modern flight-control problems with regard to minimal fuel consumption, with consideration of arrival-time limitations, air-traffic density, and onboard real-time computation — German thesis
p 409 A85-28794
Development of an on-board computer for flight test data analysis p 504 A85-31965
Stress measuring equipments for aircraft
p 762 A85-40978
Aircraft flight recorder system p 762 A85-40979
Radio navigation sensor p 749 A85-41016
Optical technology for flight control systems
p 776 A85-41019
Adaptable air data computer standardization
p 833 A85-45025
Advanced air data system concepts
p 833 A85-45027
A concept for more test time on flight software
p 858 A85-45076
The flight planning - flight management connection
p 877 A85-47684
Simulation of time-control procedures for the advanced air traffic control system p 878 A85-47686
Keeping up with operational loads in the French Air Force: Defining new equipment p 292 N85-15681
Designer on Aeroflot automated COMMO system development p 296 N85-16785
On-board processing for linescan sensors in miniature unmanned aircraft
[RAE-TM-SPACE-327] p 281 N85-16870
Piloted simulation of an algorithm for onboard control of time-optimal intercept
[NASA-TP-2445] p 681 N85-28949
Implications of artificial intelligence on the design of future onboard systems
[SFENA-DPS/C/S3/84252A] p 918 N85-34596
**ONBOARD EQUIPMENT**
Design for military aircraft on-board inert gas generation systems
[AIAA PAPER 84-2518] p 109 A85-13581
Recent advances in aircraft on-board weight and balance systems
[AIAA PAPER 84-2606] p 164 A85-17809
Integrated on-board monitoring and test concepts
[AIAA PAPER 84-2709] p 166 A85-17875
The technical evolution of on-board clocks
p 853 A85-44053
Study of effects of lightning on aircraft systems stressed p 90 N85-12005
On-board Computer Image Generator (CIG) applications
[AD-P004335] p 376 N85-17989
Cockpit resources management and the theory of the situation p 333 N85-18022
Cockpit resource management training
p 333 N85-18023
Flight control system for a computer controlled aircraft with limited sensors
[AD-A155107] p 830 N85-32115
**ONE DIMENSIONAL FLOW**
Accurate and efficient solutions of transonic internal flows
[AIAA PAPER 85-1334] p 631 A85-39729
**OPACITY**
Opacity control technique for jet engine test cells
[AD-D011668] p 774 N85-29968
**OPEN CHANNEL FLOW**
Behavior of turbulent gas jets in an axisymmetric confinement
[NASA-CR-174829] p 581 N85-25265
**OPERATING COSTS**
Manufacture and operating cost appraisals for modern airships p 571 A85-34260
The acquisition and operating cost of an advertising airship p 562 A85-34261
New configurations and their contribution to the reduction of commercial-aircraft operating costs
[DGLR PAPER 84-081] p 707 A85-40301
Determining operating and support costs with USAF DO56 maintenance data collection system
p 865 A85-49553
Energy efficient engine flight propulsion system preliminary analysis and design report
[NASA-CR-174701] p 28 N85-10947
Energy efficient engine component development and integration program
[NASA-CR-169496] p 33 N85-10989
Energy efficient engine. Volume 1: Component development and integration program
[NASA-CR-173084] p 34 N85-10992
**OPERATING TEMPERATURE**
Stressed-strained state of tightening buckles in sectional runners of gas turbines p 672 N85-28149
**OPERATIONAL PROBLEMS**
Gas turbines: Operating conditions, material selection and development
[NLR-MP-83046-U] p 774 N85-31062
**OPERATIONS**
Optimum performance parameters for ski-jump operations of USAF fighter aircraft
[AD-A148532] p 258 N85-16867
**OPERATIONS RESEARCH**
The development of maintenance and supply support of multi-mission helicopters operating from multiple locations p 466 A85-31984
Maintainability aspects in maintenance management
p 909 A85-49536
Operations research
[B8561897] p 704 N85-28712
**OPERATOR PERFORMANCE**
On the controllability limit of a human operator when using a Bang-Bang type controller p 604 A85-42689
Defect detection threshold in riveted joints, test report no.44-833/F — in aircraft p 129 N85-13260
**OPERATORS (MATHEMATICS)**
A new implicit plus minus splitting method for the solution of the Euler equations in the transonic flow regime
p 556 N85-25200
**OPTICAL COMMUNICATION**
The effects of atmospheric turbulence on an air-to-air optical communication link
[AD-A151840] p 602 N85-25700
**OPTICAL DATA PROCESSING**
Design of airborne fiber-optic data bus system
p 750 A85-43245
Optical data processing for missile guidance
[AD-A149346] p 339 N85-18972
La Recherche Aerospatiale Bimonthly Bulletin, Number 1984-4, 221/July-August
[ESA-TT-884] p 543 N85-26637
**OPTICAL EQUIPMENT**
The approach to optical system designs for aircraft head up displays p 22 A85-10628
Volume phase holograms and their application to avionic displays p 47 A85-10634
Optical technology for flight control systems
p 776 A85-41019
LPI-radar for helicopter obstacle warning
p 297 N85-16810
Air combat visual simulation using a head slaved projector
[AD-P004327] p 359 N85-17981
ACT applied to helicopter flight control
p 589 N85-26738
**OPTICAL GYROSCOPES**
Navigation, the Sagnac effects, and the Michelson experiment p 337 A85-25516
Sfena backs laser gyros p 853 A85-44749
**OPTICAL HETERODYNING**
Field measurements with a coherent transversely excited atmospheric CO2 laser radar
p 357 A85-22652
Terrain/wire and wirelike obstacles warning system for helicopters p 655 A85-38383
**OPTICAL MEASURING INSTRUMENTS**
Imaging Sensor Autoprocessor — for automatic target recognition
[AIAA PAPER 84-2613] p 164 A85-17811
Evaluating defeat mechanisms of electro-optical systems onboard remotely piloted vehicles
p 347 A85-24268
Digital optical transducers for helicopter flight control systems p 368 A85-25331
Aero-optical turbulent boundary layer/shear layer experiment on the KC-135 aircraft revisited
p 546 A85-35202
Noncontact engine blade vibration measurements and analysis
[AIAA PAPER 85-1473] p 670 A85-39798
Airborne optical information systems (Handbook) — in Russian p 835 A85-46119
Application of infrared radiometers for airborne detection of clear air turbulence and low level wind shear, airborne infrared low level wind shear detection test
[NASA-CR-175725] p 609 N85-25985
Optical system for measuring shadowgraph data
[AD-D011642] p 705 N85-28784
**OPTICAL PROPERTIES**
NASA thunderstorm overflight program: Atmospheric electricity research. An overview report on the optical lightning detection experiment for spring and summer 1983
[NASA-TM-86468] p 128 N85-12330
**OPTICAL PUMPING**
Some schemes for introducing an electron beam into a dense gas — for laser pumping p 366 A85-24055
**OPTICAL RADAR**
Applications of FM-CW CO2 waveguide laser radar
p 334 A85-22650
Comparisons of lidar and radar wind measurements made during the JAWS experiment — Joint Airport Weather Study p 452 A85-28770
Precision pointing using a dual-wedge scanner — for airborne carbon dioxide Doppler lidar
p 526 A85-32711
Shipboard measurement of cloud bases and average surface visibility with an eye-safe lidar
[AD-A144889] p 53 N85-10345
NASA three-laser airborne differential absorption lidar system electronics
[NASA-CR-174293] p 298 N85-17353
**OPTICAL REFLECTION**
Operational considerations for the design of military fiber optic test equipment p 440 A85-26813

**OPTICAL SCANNERS**

Precision pointing using a dual-wedge scanner — for airborne carbon dioxide Doppler lidar p 526 A85-32711

Moving object detection system using infrared scanning [AD-D011222] p 64 N85-10822

DoD Robotics Application Workshop Proceedings [AD-A145867] p 71 N85-11978

Air Force honeycomb shaping at SM-ALC (Sacramento Air Logistics Center) [AD-P004005] p 72 N85-11985

**OPTICAL TRACKING**

Passive navigation by triangulation and tracking of undistinguished features in successive high-resolution images p 642 A85-37830

**OPTICS**

The use of an optical data acquisition system for bladed disk vibration analysis [NASA-TM-86891] p 190 N85-15184

**OPTIMAL CONTROL**

Nonlinear model simplification in flight control system design p 114 A85-13631

Optimum parametric control of objects with a lagging argument p 192 A85-17058

The problem of determining the optimum flight control law for an aircraft p 170 A85-17064

Application of model-following control synthesis techniques to design of hydraulic velocity flight simulation table with one axis p 195 A85-18285

Optimal simultaneous structural and control design of maneuvering flexible spacecraft p 177 A85-18338

The general class of optimal proportional navigation p 153 A85-18346

Optimal control of flow of a viscous incompressible fluid p 290 A85-22105

Vector optimization of aircraft deceleration in air p 423 A85-27795

Flight time enhancement on the basis of a cyclically controlled dynamic duration flight p 424 A85-29049

The application of the optimal model-following method to the design of elevator controllers p 511 A85-31342

Onboard near-optimal climb-dash energy management p 497 A85-32781

An Optimal, Proportional-plus-Integral/Tracking control law for aircraft applications p 513 A85-33282

A realistic aerial combat duel as a differential game study p 535 A85-33287

A state-space model for an aeroelastic system p 535 A85-33301

Output feedback design for aircraft with ill-conditioned dynamics p 536 A85-33303

Instationary dolphin flight - The optimal energy exchange between a sailplane and vertical currents in the atmosphere p 646 A85-37488

Rationalizing the choice of an actuating mechanism for a jet drive p 661 A85-39124

New concepts in control theory, 1959-1984 (Dryden Lectureship in Research) — for aerospace flight control p 703 A85-39551

Optimization of control systems using the minimax criterion — Russian book p 801 A85-39975

Minimum time turning — of fighter aircraft [AIAA PAPER 85-1780] p 837 A85-43840

Energy management of three-dimensional minimum-time intercept — for aircraft flight optimization [AIAA PAPER 85-1781] p 838 A85-43841

Optimal disturbance suppression with application to wind shear — for digital flight control of small commercial jet [AIAA PAPER 85-1886] p 844 A85-45909

Multivariable control of VTOL aircraft for shipboard landing [AIAA PAPER 85-1928] p 844 A85-45926

Stability robustness improvement using constrained optimization techniques [AIAA PAPER 85-1931] p 859 A85-45930

Optimization of ski-jump take-off performance [AIAA PAPER 85-1962] p 827 A85-45946

Minimax optimal control and its application to the reentry of a space glider p 899 A85-47306

1984 American Control Conference, San Diego, CA, June 6-8, 1984, Proceedings. Volumes 1, 2 & 3 p 916 A85-47676

Design of optimal low-sensitivity controllers with prespecified eigenvalues - Application to aircraft lateral motion p 893 A85-47696

Further application of output predictive algorithmic control to terrain following p 894 A85-47734

Minimax optimal control in the reentry of a space glider p 40 N85-11124

Algorithm for tracking manuevering object with ambiguous measurements p 189 N85-15057

Research on optimal control, stabilization and computational algorithms for aerospace applications [NASA-CR-174318] p 303 N85-17603

SUBOPT: A CAD program for suboptimal linear regulators [NASA-CR-172536] p 376 N85-19702

Optimal symmetric flight studies [NASA-CR-172508] p 426 N85-21176

Total energy-rate feedback for automatic glide-slope tracking during wind-shear penetration [NASA-TP-2412] p 515 N85-23801

Application of linear optimal control theory to the design of the elevator control system of the DHC-2 Beaver experimental aircraft [VTH-LR-411] p 586 N85-26729

Research on optimal control, stabilization and computational algorithms for aerospace applications [NASA-CR-172528] p 776 N85-29970

**OPTIMIZATION**

Optimal frequency response shaping by appendant structures — for helicopter model p 46 A85-10403

An equivalent strength method for optimum design of composite laminates p 51 A85-12362

Design development and optimization criteria considerations for a tandem fan medium speed V/STOL propulsion concept [AIAA PAPER 84-2395] p 107 A85-13506

Periodic optimal cruise of an atmospheric vehicle p 102 A85-13701

Optimization of the parameters of transport aircraft with a lift-generating fuselage p 155 A85-17069

Structural optimization with dynamic behavior constraints p 185 A85-18693

757 payloads weight optimization [SAWE PAPER 1571] p 160 A85-18823

TRO-2D - A code for rational transonic aerodynamic optimization [AIAA PAPER 85-0425] p 223 A85-19740

A procedure for the optimization of the aerothermodynamic design of multistage axial compressors — German thesis p 227 A85-19851

Selection of rational models in the optimal planning of aeromechanical experiments p 288 A85-20460

A formalism for the design problem of aircraft system universalization p 250 A85-20473

Optimization methods applied to the aerodynamic design of helicopter rotor blades [AIAA PAPER 85-0644] p 490 A85-30245

Optimization of queuing disciplines in multiphase closed queuing systems p 534 A85-31463

Numerical optimization method for airfoil design p 475 A85-33014

Software-engineering elements in the problem of the optimal design of lift systems for flight vehicles p 646 A85-37323

Optimal structural design of shells - A survey p 788 A85-40240

Mathematical modelling of performance characteristics and optimization of turbomachine stages p 769 A85-41812

Optimization of cascade blade mistuning. I - Equations of motion and basic inherent properties p 771 A85-42365

Application of computer-aided structural optimization in the design of aircraft components [MBB-UT-21-84-OE] p 758 A85-42685

Design of flight vehicles and their systems p 854 A85-44832

Combined analysis and optimization of extended heat transfer surfaces p 858 A85-46482

Computer-aided design of control systems via parameter optimization method (CADCS/POM) - An interactive graphics approach p 917 A85-47784

Numerical optimization of circulation control airfoil at high subsonic speed p 871 A85-49131

Noise constraints effecting optimal propeller designs [SAE PAPER 850871] p 874 A85-50106

Fitting aerodynamic forces in the Laplace domain: An application of a nonlinear nongradient technique to multilevel constrained optimization [NASA-TM-86317] p 12 N85-10917

Energy efficient engine. High pressure compressor detail design report [NASA-CR-165558] p 35 N85-10998

An improved computer model for prediction of axial gas turbine performance losses [NASA-CR-174246] p 265 N85-15724

Predicted performance benefits of an adaptive digital engine control system of an F-15 airplane [NASA-TM-85916] p 265 N85-15729

An optimization method for the preliminary design of interplanetary aerobraking missions p 238 N85-16822

Optimization of a ground coupled heat pump [DE85-000273] p 374 N85-19380

Noise constraints effecting optimal propeller designs [NASA-TM-86967] p 394 N85-19923

Preliminary development of an approximation procedure for supercritical wing design optimization applications [AD-A150177] p 500 N85-22383

China report: Science and technology [JPRS-CST-84-008] p 500 N85-22384

Model reduction for control system design [NASA-CR-170417] p 514 N85-22398

Relative control effectiveness technique with application to airplane control coordination [NASA-TP-2416] p 501 N85-23753

Some optimization problems in static aeroelasticity for wings made of composite materials p 503 N85-24104

Alternatives for jet engine control [NASA-CR-175831] p 583 N85-26713

Alternatives for jet engine control [NASA-CR-175833] p 583 N85-26715

ESP (External-Stores Program): A pilot computer program for determining flutter-critical external-store configurations. Volume 1: User's manual [AD-A152268] p 587 N85-26725

Probabilistic computer model of optimal runway turnoffs [NASA-CR-172549] p 594 N85-26760

Development and application of optimum sensitivity analysis of structures [NASA-CR-175857] p 608 N85-27257

Design of helicopter rotor blades for optimum dynamic characteristics [NASA-CR-176076] p 760 N85-31044

Interactive aircraft flight control and aeroelastic stabilization [NASA-CR-176035] p 776 N85-31064

High pressure compressor component performance report [NASA-CR-168245] p 891 N85-34136

An automated technique for encasing specific payloads with low-drag fairings p 886 N85-35183

Energy management of three-dimensional minimum-time intercept [NASA-CR-176174] p 887 N85-35186

**ORBIT CALCULATION**

Second-order p-iterative solution of the Lambert/Gauss problem — algorithm for efficient orbit determination p 177 A85-18674

Satellite orbit determination from an airborne platform p 850 A85-45126

**ORBIT PERTURBATION**

Radial variations of a satellite orbit due to gravitational errors - Implications for satellite altimetry p 452 A85-28140

The effect of aerodynamic lift on near circular satellite orbits p 595 A85-34859

**ORBIT TRANSFER VEHICLES**

Effects of slip and chemical reaction models on three-dimensional nonequilibrium viscous shock-layer flows p 80 A85-15506

Introductory aerothermodynamics of advanced space transportation systems p 231 A85-21827

Measured and predicted vortex-induced leeward heating on a biconic at Mach 6 and 10 [AIAA PAPER 85-1061] p 621 A85-37675

Effect of maximum lift to drag ratio on optimal aeroassisted plane change [AIAA PAPER 85-1817] p 849 A85-43863

New analytical results for AOTV guidance [AIAA PAPER 85-1820] p 849 A85-43865

**ORBITAL MANEUVERS**

Orbit control of a synchronous satellite — Russian book p 899 A85-49448

**ORBITAL MECHANICS**

Second-order p-iterative solution of the Lambert/Gauss problem — algorithm for efficient orbit determination p 177 A85-18674

**ORBITAL POSITION ESTIMATION**

Trajectory estimation using translated GPS signals p 487 A85-32207

**ORBITS**

An optimization method for the preliminary design of interplanetary aerobraking missions p 238 N85-16822

**ORGANIC COMPOUNDS**

Aspects of high-resolution gas chromatography as applied to the analysis of hydrocarbon fuels and other complex organic mixtures. Volume 1 [AD-A156154] p 902 N85-35257

**ORGANIZATIONS**

Calendar of selected aeronautical and space meetings [AGARD-CAL-84/2] p 379 N85-19917

Model research: The National Advisory Committee for Aeronautics, 1915-1958, volume 1 [NASA-SP-4103-VOL-1] p 467 N85-23683

Model research, the National Advisory Committee for Aeronautics, 1915-1958, volume 2 [NASA-SP-4103-VOL-2] p 467 N85-23684

**ORIFICE FLOW**

Application of laser interferometry to density measurements in free jets p 206 A85-19406

Experiments in dilution jet mixing - Effects of multiple rows and non-circular orifices [AIAA PAPER 85-1104] p 664 A85-39606

Experiments in dilution jet mixing effects of multiple rows and non-circular orifices [NASA-TM-86996] p 582 N85-25266

An experimental study of the noise generated by vaporous cavitation in turbulent shear flows produced by confined orifice plates p 611 N85-26316

**ORTHOGONAL FUNCTIONS**

Grid generation for inlet configurations using conformal mapping p 474 A85-32633

**ORTHOTROPIC PLATES**

Critical flutter parameters of orthotropic rectangular flat panels with in-plane loads p 693 A85-37192

**OSCILLATING CYLINDERS**

Propulsive efficiency of an oscillating cylinder in supersonic flow p 140 A85-16181

Some important problems in unsteady boundary layers including separation. 1: Nature of singularity on oscillating airfoils [AD-A147897] p 294 N85-16087

**OSCILLATING FLOW**

Resonance in flows with vortex sheets and edges p 3 A85-10357

Forced oscillations of transonic channel and inlet flows with shock waves p 73 A85-12711

Transformation of acoustic disturbances into coherent structures in the turbulent wake of an airfoil p 75 A85-13794

Certain features characterizing the development of coherent flow structures in the initial region of three-dimensional turbulent jets p 76 A85-13795

Development of artificially induced perturbations in a supersonic boundary layer p 140 A85-16177

Modes of shock-wave oscillations on spike-tipped bodies p 232 A85-21855

Calculation of three-dimensional unsteady incompressible flows by a vortex method p 291 A85-22240

Transformation of acoustic oscillations into the eddy ones in turbulent flows p 367 A85-24983

A study of the pulsation driving mechanism in pulsating combustors p 368 A85-25477

Experimental study of flows in a two-dimensional inlet model p 386 A85-27092

Self-oscillations in a jet impinging on a barrier p 394 A85-30109

The Kutta condition in unsteady flow p 471 A85-31183

A locally linearized panel method for transubsonic flow past an oscillating wing p 549 A85-35755

Three-dimensional unsteady Euler equations solutions on dynamic grids [AIAA PAPER 85-1704] p 790 A85-40778

Transonic flows about oscillating airfoils using the Euler equations [AIAA PAPER 85-1514] p 721 A85-40949

An improved kernel function computation in subsonic unsteady lifting surface theory p 726 A85-41739

Unsteady heat transfer of oscillating wake flows p 726 A85-41781

Numerical analysis of turbulent flow past a plate using equations for fluctuations p 794 A85-42121

Oscillating oblique shock interaction with a laminar boundary layer p 735 A85-42971

Boundary layers on oscillating airfoils p 735 A85-42973

On the theory of oscillating airfoils in supersonic and sonic flow p 814 A85-43925

Development and applications of algorithms for calculating the transonic flow about harmonically oscillating wings [NASA-CR-172376] p 9 N85-10007

Numerical studies of unsteady transonic flow over an oscillating airfoil [NASA-TM-86011] p 128 N85-12316

Large amplitude forcing of a high speed 2-dimensional jet [NASA-CR-175646] p 507 N85-22393

The role of convective perturbations in supercritical inlet oscillations p 526 N85-22563

Numerical studies of unsteady transonic flow over oscillating airfoil p 554 N85-25174

A supersonic potential gradient method for the calculation of unsteady aerodynamic pressures on harmonically oscillating wings [DFVLR-FB-85-11] p 744 N85-31026

**OSCILLATION DAMPERS**

A study of transonic flutter of a two-dimensional airfoil using the U-g and p-k methods [AD-A151463] p 585 N85-25268

**OSCILLATIONS**

Influence of sampling rate on the calculated fidelity of an aircraft simulation p 57 A85-11083

Unsteady transonic flow over oscillating slender bodies [AIAA PAPER 85-1709] p 718 A85-40781

Aerodynamic characteristics of an airfoil oscillating in transonic flow between parallel walls p 729 A85-41837

Laminar-to-turbulent flow transition under influence of acoustic oscillations p 55 N85-11701

Wear and corrosion of components under stress and subjected to motion [AD-A145781] p 128 N85-12372

A Navier-Stokes calculation of the airfoil dynamic stall process [AD-P004163] p 324 N85-17948

Leading edge separation criterion for an oscillating airfoil [AD-P004175] p 325 N85-17960

Space shuttle pilot-induced-oscillation research testing p 498 N85-22351

Oscillations of gas turbine installation rotors under operating conditions p 530 N85-24077

Wing tunnel investigation of dynamic stall of an NACA 0018 airfoil oscillating in pitch [NAE-AN-27] p 635 N85-27830

Turbulence structure in the boundary layers of an oscillating airfoil [AD-A153631] p 637 N85-28926

Data set 8: ZKP wing, oscillating aileron p 744 N85-31029

**OUTLET FLOW**

Effect of inlet and outlet flow conditions on the flow and performance of subsonic two-dimensional diffuser p 228 A85-20241

Unsteady flow at the outlet of the high specific speed centrifugal compressor impeller [ASME PAPER 84-JPGC-GT-10] p 365 A85-23194

Study of a bounded jet flow considering the initial turbulence - Experiments with a nozzle having aspect ratio of 3 p 367 A85-24565

The influence of blade wakes on the performance of outwardly curved combustor pre-diffusers [AIAA PAPER 85-1291] p 667 A85-39704

Calculation of flow in the main part of a supersonic jet with allowance for the influence of the nozzle exit section p 815 A85-44131

effect of gas stream sweeping past the effluent of a perforated plate on heat transfer inside the perforations p 527 N85-22636

**OV-1 AIRCRAFT**

Preliminary airworthiness evaluation of a National Aeronautics and Space Administration automated stall warning system for an OV-1 aircraft [AD-A152010] p 579 N85-26706

**OVERPRESSURE**

The effect of the fan characteristic on the dynamics of a stand supported by excess pressure — for air cushion devices p 315 A85-23998

**OXIDATION**

Oxidation and gum formation in jet fuels [AD-A149934] p 436 N85-21401

Effects of surface chemistry on hot corrosion life [NASA-CR-174915] p 582 N85-26711

**OXIDATION RESISTANCE**

Oxidation-based model for thermal barrier coating life p 41 A85-10310

Oxidation and stabilization of jet fuels — Russian book p 281 A85-20925

Polyimide protective coatings for 700 deg service p 282 A85-21527

Development of coatings for the protection of gas turbine blades against high temperature oxidation and corrosion p 519 A85-32433

Titanium alloys for high temperature applications - A review p 783 A85-40922

Effects of MAR-M247 substrate (modified) composition on coating oxidation coating/substrate interdiffusion — protective coatings for hot section components of gas turbine engines [NASA-CR-174851] p 364 N85-19073

Oxidation resistant materials for hot gas turbines and jet engines [AD-B087399L] p 507 N85-22389

Thermal barrier coating system [NASA-CASE-LEW-14057-1] p 902 N85-35233

**OXIDE FILMS**

Thermal barrier coating system [NASA-CASE-LEW-14057-1] p 902 N85-35233

**OXYGENATION**

Jet fuel instability mechanisms [NASA-CR-175856] p 690 N85-28127

**OXYNITRIDES**

The use of high-temperature ceramics in diesel and gas-turbine engines (Review) p 518 A85-31487

Ionic radii and electronegativities of effective sintering aids for Si3N4 ceramics p 519 A85-32850

**OZONE**

Simultaneous cabin and ambient ozone measurements on two Boeing 747 airplanes. Volume 3: October 1978 - July 1979 [NASA-TM-86883] p 454 N85-21872

## P

**P-3 AIRCRAFT**

ATE in the field supporting airborne ASW avionics P-3 style p 381 A85-26778

Efficiencies of multiple-input techniques for aircraft ground vibration testing [SAE PAPER 841575] p 682 A85-39274

An airborne infrared thermal scanning system for easy use on Navy P-3 aircraft [AD-A149690] p 461 N85-22143

**P-531 HELICOPTER**

Wind-tunnel evaluation of a 21-percent-scale powered model of a prototype advanced scout helicopter [NASA-TP-2420] p 637 N85-28923

**PACKING DENSITY**

High density modular avionics packaging [AIAA PAPER 84-2749] p 184 A85-17898

**PAINTS**

Polyurethane paint systems - High surface quality p 784 A85-41400

Laser paint removal [AD-P004009] p 127 N85-11989

Investigation of the influence of some paint systems and water displacing corrosion inhibitors on anodic undermining corrosion of aluminum 2024 clad alloy — aircraft structures [VTH-LR-443] p 598 N85-27009

**PANEL FLUTTER**

Free vibration characteristics of periodically stiffened panels with damped stringers p 182 A85-16763

A digital simulation study of 2-dimensional flutter active suppression system p 172 A85-18280

Exploratory flutter test in a cryogenic wind tunnel [AIAA PAPER 85-0736] p 515 A85-30369

Computer-aided frequency domain synthesis of a robust active flutter suppression control law [AIAA PAPER 85-0754] p 511 A85-30373

Critical flutter parameters of orthotropic rectangular flat panels with in-plane loads p 693 A85-37192

The role of damping on supersonic panel flutter p 907 A85-48557

**PANEL METHOD (FLUID DYNAMICS)**

CFO is nearing a new plateau — current panel methods in aircraft design p 103 A85-15074

Applicability of a panel method, which includes nonlinear effects, to a forward-swept-wing aircraft [AIAA PAPER 84-2402] p 139 A85-16105

Comment on 'Prediction of subsonic aerodynamic characteristics - A case for low-order panel methods' p 144 A85-18521

A comparison of different three-dimensional singularity methods for modelling internal flows [ONERA, TP NO. 1984-150] p 205 A85-19264

Calculation of compressible potential flow about multielement airfoils using a finite field-panel approach [AIAA PAPER 85-0038] p 207 A85-19473

The use of panel methods for the development of low-subsonic wall interference and blockage corrections [AIAA PAPER 85-0159] p 212 A85-19556

A new iterative matrix solution procedure for three-dimensional panel methods [AIAA PAPER 85-0176] p 213 A85-19568

Linearized potential flow analysis of complex aircraft configurations by HISSS, a higher order panel method [AIAA PAPER 85-0281] p 217 A85-19632

Calculation of steady flow about propellers by means of a surface panel method [AIAA PAPER 85-0283] p 218 A85-19634

An attached flow design of a noninterfering leading edge extension to a thick delta wing [AIAA PAPER 85-0350] p 220 A85-19689

Circulation around thick wings with free vortices — German thesis p 227 A85-19848

Flowfield analysis of low bypass ratio test cells p 265 A85-21839

Wing-in-ground effect aerodynamic predictions using PANAIR [AIAA PAPER 84-2429] p 322 A85-26321

A field panel/finite difference method for potential unsteady transonic flow p 391 A85-29084

Calculation of aerodynamic characteristics of winglets and experimental verification p 393 A85-29692

A harmonic gradient method for unsteady supersonic flow calculations p 473 A85-32583

Aerodynamic canard/wing parametric analysis for general-aviation applications p 473 A85-32587

Exact solution for wind tunnel interference using the panel method p 591 A85-34734

Calculation of nonlinear subsonic characteristics of wings with thickness and camber at high incidence
p 545 A85-35126
A generalized discrete-vortex method for sharp-edged cylinders p 546 A85-35132
An iteration panel method for predicting three dimensional surface pressure distribution of a wing with thickness in the subcritical steady transonic flow
p 549 A85-35749
A locally linearized panel method for transubsonic flow past an oscillating wing p 549 A85-35755
Calculation of the flow around thick wings with separation vortices p 550 A85-35769
A supersonic panel method based on the triplet singularity p 617 A85-37191
Substantiation of the applicability of VSAERO panel method to subsonic inlet design
[AIAA PAPER 85-1119] p 629 A85-39615
Vortex panel calculation of wake rollup behind a large aspect ratio wing
[AIAA PAPER 85-1561] p 710 A85-40686
Calculation of compressible flow about three-dimensional inlets with auxiliary inlets, slats and vanes by means of a panel method
[AIAA PAPER 85-1196] p 719 A85-40817
A summary of an AGARD assessment of testing techniques for aircraft afterbody flows
[AIAA PAPER 85-1465] p 779 A85-40844
Aerodynamic characteristics of swept propellers
p 723 A85-40981
Purely three-dimensional analysis of a flow in an axial rotor by panel method p 728 A85-41817
Transonic panel method for the full potential equation applied to multicomponent airfoils
[AIAA PAPER 83-1855] p 816 A85-45704
Convergence characteristics of a vortex-lattice method for nonlinear configuration aerodynamics
p 816 A85-45835
PAN AIR: A computer program for predicting subsonic or supersonic linear potential flows about arbitrary configurations using a higher order panel method. Volume 3: Case manual (version 1.0)
[NASA-CR-3253] p 13 N85-10922
Prediction of dynamic stall characteristics using advanced non-linear panel methods
[AD-A148453] p 239 N85-16836
Numerical approach for the aerodynamic analyses if airfoils with laminar separation
[NASA-CR-172496] p 326 N85-18001
Calculation of the flow around thick wings with separation vortices p 400 N85-21424
Application of time-linearized methods to oscillating wings in transonic flow and flutter p 585 N85-25182
A study of aerodynamic control in stalled flight leading-edge vortex formation analysis
[AD-A153758] p 638 N85-28928
Shock waves in adjacent engine inlets
[ISL-R-104/84] p 781 N85-31068
Calculation of compressible flow about three-dimensional inlets with auxiliary inlets, slats and vanes by means of a panel method
[NASA-CR-174975] p 876 N85-35162

**PANELS**
Measurements of the response of transport aircraft ceiling panels to fuel pool fires
[AIAA PAPER 85-0394] p 240 A85-19720
Field-incidence noise transmission loss of general aviation aircraft double-wall configurations
p 304 A85-21842
The dynamics of a parachute panel during opening
p 819 A85-44173
Quasi-steady analysis of aircraft panel flammability
[AD-A145461] p 22 N85-10938
Effect of stress concentrations in composite structures
[NASA-CR-173976] p 44 N85-11140
Performance of two transonic airfoil wind tunnels utilizing limited ventilation p 83 N85-12020
Prefabricated panels for rapidly runway repair and expedient airfield surfacing
[AD-D011277] p 177 N85-13804
Preliminary evaluation of an improved flammability test method for aircraft materials
[FAA-CT-84-22] p 242 N85-16840
Composite repair of aircraft structures
p 285 N85-17059
A safety evaluation of the relocation of the ACM (Air Combat Maneuver) panel in the F-14 ( )/AIP (Avionics Integration Program)
[AD-A149596] p 419 N85-21158
Aircraft safety improvement p 564 N85-26602
Removable cleanable antireflection shield
[AD-D011735] p 863 N85-33810
A research program to reduce the interior noise in general aviation aircraft, index and summary
[NASA-CR-176178] p 919 N85-35695

**PARABOLIC BODIES**
Flight tests of a sweptback parabolic tip on a Dauphin 365N
[ONERA, TP NO. 1984-84] p 7 A85-12613

**PARABOLIC DIFFERENTIAL EQUATIONS**
Noniterative three-dimensional grid generation using parabolic partial differential equations
[AIAA PAPER 85-0485] p 300 A85-19782
Analysis of turbulent underexpanded jets. I - Parabolized Navier-Stokes model, SCIPVIS p 391 A85-29080
Numerical investigation of internal high-speed viscous flows using a parabolic technique
[AIAA PAPER 85-1409] p 632 A85-39768
An investigation of film cooling on a hypersonic vehicle using a PNS flow analysis code
[AIAA PAPER 85-1591] p 712 A85-40707

**PARABOLIC FLIGHT**
Parabolic aircraft flights - An effective tool in preparing microgravity experiments p 782 A85-42697

**PARACHUTE DESCENT**
Dynamic analysis of large-scale mechanical systems and animated graphics
[AIAA PAPER 83-0946] p 184 A85-18340
Investigation of the use of radar data for the measurement of parachute rate of descent and glide ratio p 331 A85-22764
The functional structure of the aerodynamic coefficients of a parachute due to symmetry p 471 A85-31451
Parachute expedition to Arctic p 236 N85-16240

**PARACHUTE FABRICS**
A parachute theory allowing for the structure of the canopy fabric p 13 A85-11822
The effect of the deformation of the parachute material on the aeroelastic characteristics of the parachute during opening p 140 A85-16152
The dynamics of a parachute panel during opening
p 819 A85-44173

**PARACHUTES**
Determination of the limits of the stability region of a parachute system with a low-permeability canopy
p 142 A85-17075
Drag of the fundamental shapes of parachutes
p 231 A85-20996
Stress analysis and shaping of the canopy of a square parachute p 242 A85-21668
ACES II R&D upgrade program p 330 A85-22757
Development and testing of the RPS-1000 parachute system for the MMR-06-DART meteorological rocket system p 685 A85-38606
A nonlinear solution for parachute suspension line deformation p 877 A85-49140
60,000 pound capacity extraction system
[AD-A145841] p 105 N85-12052
A theoretical view on the stress analysis of fully inflated parachute canopies
[AD-A148387] p 239 N85-16835
Deployment sequence mode selection system for aircraft ejection seat
[AD-D011464] p 334 N85-18966
Airspeed sensing pressure valve system
[AD-D011472] p 348 N85-18987
Parachute inflation dynamics p 396 N85-20792
Parachute extraction device for ultralight gliders
[CH-643499-A5] p 559 N85-26683
Dual towline spin-recovery device
[NASA-CASE-LAR-13076-1] p 895 N85-35200

**PARALLEL FLOW**
Instability of plane-parallel supersonic gas flows in the linear approximation p 623 A85-38551

**PARALLEL PROCESSING (COMPUTERS)**
A parallel quasi-linearization algorithm for air vehicle trajectory optimization
[AIAA PAPER 85-0498] p 279 A85-19792
Multibus-based parallel processor for simulation
p 457 A85-28613
Ada - Will DOD's new computer language cut software cost? p 459 A85-29669
Interface specifications for SCR (Software Cost Reduction) (A-7E) extended computer module, revised
[AD-A149948] p 459 N85-22024

**PARALLELEPIPEDS**
Closely spaced independent parallel runway simulation
[DOT/FAA/CT-84/45] p 117 N85-12902

**PARAMETER IDENTIFICATION**
Modal test and parameter identification of a flutter wing model with external missiles p 51 A85-12383
Identification of multivariable high-performance turbofan engine dynamics from closed-loop data
p 109 A85-13630
Optimum parametric control of objects with a lagging argument p 192 A85-17058
The effect of design parameters on the ground resonance of helicopters p 493 A85-31780
Aerodynamic canard/wing parametric analysis for general-aviation applications p 473 A85-32587
Numerical computation of extended Kalman filter and its application to aerodynamic parameter identification of reentry satellite p 610 A85-35796
On-line estimation and identification of aircraft stability derivatives using the modified gain extended Kalman filter
[AIAA PAPER 85-1762] p 837 A85-43827
An analysis of the Space Shuttle hypersonic entry trim anomaly
[AIAA PAPER 85-1764] p 850 A85-43878
Stability of adaptive control algorithms - Theoretical examination and simulation for F-4 flight control
[AIAA PAPER 85-1966] p 845 A85-45965
A new approach to the maneuvering target tracking problem p 917 A85-47769
Aeroelastic analysis and the identification of flight loads — Mirage 2000 aircraft p 254 N85-15679
More than you want to know about maximum likelihood estimation
[NASA-TM-85905] p 270 N85-15752
A method for estimating the rolling moment due to spin rate for arbitrary planform wings
[NASA-TM-86365] p 357 N85-18990
Air combat simulation: Methods, models, trends
p 498 N85-22359
Determination of aerodynamic and propulsion parameters of general aviation aircraft using steady state flight test data p 499 N85-22377
Development and application of optimum sensitivity analysis of structures
[NASA-CR-175857] p 608 N85-27257
Parameter identification results of tests in nonsteady symmetric flight with the Hawker Hunter Mk 7
[NLR-TR-83042-U] p 653 N85-27860
Identification of gust input and gust response characteristics from Do 28 TNT flight test data
[DFVLR-FB-84-48] p 676 N85-27881
Heating parameter estimation using coaxial thermocouple gages in wind tunnel test articles
[AD-A153039] p 699 N85-28328

**PARAMETERIZATION**
Time series approximation of unsteady aerodynamics including pole locations as free parameters
[AIAA PAPER 85-0663] p 491 A85-30350
Parameter space design of control systems using interactive computer graphics p 916 A85-47681
The static aeroelasticity of a composite wing
p 701 N85-29321

**PARSING ALGORITHMS**
Evaluating syntactic constraints to speech recognition in a fighter aircraft environment
[AD-A152117] p 607 N85-27119

**PARTIAL DIFFERENTIAL EQUATIONS**
Entropy condition satisfying approximations for the full potential equation of transonic flow p 385 A85-26916
Equation associated with the theory of local interaction in a rarefied gas p 394 A85-30110
Generation of 3-dimensional body fitted coordinates using hyperbolic partial differential equations
[AD-A148059] p 327 N85-18006
The generation of three-dimensional body-fitted coordinate systems for viscous flow problems
[AD-A150861] p 536 N85-24848

**PARTICLE DIFFUSION**
Performance deterioration of cascades exposed to solid particles p 112 N85-12057

**PARTICLE IN CELL TECHNIQUE**
Finite difference computations of flow about supersonic lifting bodies p 319 A85-25479

**PARTICLE LADEN JETS**
Installed engine performance in dust-laden atmosphere
[AIAA PAPER 84-2488] p 109 A85-13563
Environmental problems in turbomachinery
p 769 A85-41811

**PARTICLE MOTION**
Least acceleration motion for given terminal conditions p 459 A85-26443
The motion of a spherical particle suspended in a turbulent flow near a plane wall p 444 A85-29056
Determination of the drag of free flying particles in supersonic flow with a pulsed laser p 400 N85-21129

**PARTICLE PRECIPITATION**
Effect of precipitation static on general aviation digital avionics
[AIAA PAPER 84-2641] p 157 A85-17830

**PARTICLE SIZE DISTRIBUTION**
Analysis of a split-flow inertial particle separator by finite elements — for helicopter gas turbine engine
p 231 A85-21845
Predicting rime ice accretion on airfoils
p 317 A85-25135
Droplet size distribution effects on aircraft ice accretion p 563 A85-35585
Milling of Si3N4 with Si3N4 hardware
[NASA-TM-86864] p 43 N85-10191

Size distributions of elemental carbon in atmospheric aerosols
[PB85-153534] p 609 N85-25983
An investigation into the soot production processes in a gas turbine engine
[AD-A152710] p 690 N85-27992
**PARTICLE TRAJECTORIES**
Air flow and particle trajectories around aircraft fuselages. I - Theory p 74 A85-13651
Air flow and particle trajectories around aircraft fuselages. II - Measurements p 106 A85-13652
Computational particle trajectory analysis on a 3-dimensional engine inlet
[AIAA PAPER 85-0411] p 222 A85-19732
Three-dimensional airflow and hydrometeor trajectory calculation with applications
[AIAA PAPER 85-0412] p 222 A85-19733
Development of an advanced vaneless inlet particle separator for helicopter engines
[AIAA PAPER 85-1277] p 666 A85-39694
Performance deterioration of cascades exposed to solid particles p 112 N85-12057
**PARTICLES**
Technical Review of the Solid Particle Receiver Program
[DE84-015181] p 56 N85-10451
Effect of the Basset term on particle relaxation behind normal shock waves
[AD-A145446] p 54 N85-11320
**PARTICULATE SAMPLING**
A study of the control of particulate emissions from turbine engine test cells p 898 N85-35205
**PASSAGEWAYS**
Vortex-generating coolant-flow-passage design for increased film-cooling effectiveness and surface coverage
[NASA-TP-2388] p 127 N85-12314
**PASSENGER AIRCRAFT**
SAAB-Fairchild 340 - Operator's analyses
p 102 A85-13899
Developing aircraft passenger seats for safety and economy p 90 A85-15170
PW2037 starts work p 167 A85-16271
R&D in the evolution of the DASH 8
p 155 A85-17226
Development of the PW100 turboprop engines
p 168 A85-17229
Simulators/training devices for commuter airlines
p 174 A85-17232
Evaluation of aircraft interior panels under full-scale cabin fire test conditions
[AIAA PAPER 85-0393] p 240 A85-19719
A look at 'chair-chutes' - Parachute industry's answer to airline safety in the 1940s p 331 A85-22765
The importance of aircraft center-of-gravity position for flight control p 396 A85-25521
Aircraft engineering design - Design engineer's problems are now; Proceedings of the Aerospace Engineering Conference and Show, Los Angeles, CA, February 12-14, 1985
[AIAA PAPER 85-0847] p 341 A85-26305
Redesign of airplane windows due to environmental crazing of acrylic p 341 A85-26306
Getting a partnership into the air - Testing of the Saab-Fairchild 340 p 413 A85-28635
Boeing's airliner launch criteria p 383 A85-28824

**PATENTS**
Flying objects
[CH-634516-A5] p 573 N85-25242
Airfoil wing with flap
[CH-634787-A5] p 574 N85-25243
Aircraft structure for application to training aircraft
[CH-635266-A5] p 574 N85-25244
Aircraft
[CH-642598-A5] p 574 N85-25246
**PATTERN RECOGNITION**
Aircraft identification based on pattern recognition of FM emission spectra p 15 A85-11078
A model for the optimal synthesis and analysis of maintenance facilities p 456 A85-28838
Content, variety, and augmentation of simulated visual scenes for teaching air-to-ground attack
[AD-A145216] p 38 N85-10080
Optical data processing for missile guidance
[AD-A149346] p 339 N85-18972
**PAVEMENTS**
Test loading of airfield pavements
p 426 A85-27721
Evaluation of laser profile and deflection measuring system
[FAA-PM-84-24] p 55 N85-11341
Development of a pavement maintenance management system. Volume 10: Summary of development from 1974 through 1983
[AD-A146035] p 117 N85-12067
Development of a pavement maintenance management system. Volume 9: Development of airfield pavement performance prediction models
[AD-A146150] p 117 N85-12069
Prefabricated panels for rapidly runway repair and expedient airfield surfacing
[AD-D011277] p 177 N85-13804
System for rapid repair of damaged airfield runways
[AD-D011325] p 276 N85-15754
Development of a preliminary ALRS stabilized material pavement analysis system (SPAS)
[AD-A147116] p 277 N85-15760
Aeroproyekt develops improved runway surfacing
p 277 N85-16770
Runway rubber removal specification development field evaluation procedures development
[FAA-PM-84-27] p 430 N85-21179
Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 1: Correlation analysis of Marshall properties of laboratory-compacted specimens
[FAA-PM-84-12-VOL-1] p 430 N85-21180
Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 2: Statistical analysis of Marshall properties of plant-produced bituminous materials
[FAA-PM-84-12-VOL-2] p 430 N85-21181
Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 3: Statistical analyses of 3 methods for determining maximum specific gravity of bituminous concrete mixtures
[FAA-PM-84-12-VOL-3] p 430 N85-21182
Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 4: Computer simulation of multiple acceptance criteria
[FAA-PM-84-12-VOL-4] p 431 N85-21183
Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 5: Summary of validation studies
[FAA-PM-84-12-VOL-5] p 431 N85-21184
Study of acceptance criteria for joint densities in bituminous airport pavements
[FAA-PM-85-5] p 594 N85-26761
**PAYLOADS**
Assuring payload security in flight and recovery - Design approaches and flight experience p 640 A85-38315
An automated technique for encasing specific payloads with low-drag fairings p 886 N85-35183
**PDP 11 COMPUTER**
Data processing on the rotor test stand at DFVLR in Brunswick: Microprogrammable interfaces and array processor as key components in a PDP 11 real time data acquisition and processing system
[DFVLR-MITT-85-03] p 684 N85-27921
**PEELING**
Finger materials for air cushion vehicles. Volume 2: Base fabrics for finger materials
[AD-A149701] p 448 N85-21408
**PENALTIES**
Punitive damages in aviation products liability cases
p 461 A85-27394
**PENETRATION**
Evaluation of the birdstrike threat to the F-15 present fleet, rapid deployment force, and dual role fighter transparencies
[AD-A148954] p 334 N85-18966
Aircraft skin penetrator and agent applicator. Volume 1: Working model development and construction
[AD-A150498] p 483 N85-22374
Aircraft skin penetrator and agent applicator. Volume 2: Test and evaluation
[AD-A151609] p 564 N85-25225
**PERFORATED PLATES**
Suppression of shocks on transonic airfoils
p 319 A85-25458
effect of gas stream sweeping past the effluent of a perforated plate on heat transfer inside the perforations
p 527 N85-22836
**PERFORATION**
Wind tunnel wall interference
[AD-A151212] p 593 N85-25273
**PERFORMANCE**
Optimum performance parameters for ski-jump operations of USAF fighter aircraft
[AD-A148532] p 258 N85-16867
**PERFORMANCE PREDICTION**
Progress toward the development of an aircraft icing analysis capability
[AIAA PAPER 84-0105] p 13 A85-10653
Methodology to better predict structural maintenance requirements for individual aircraft
[AIAA PAPER 84-2411] p 69 A85-13517
Suboptimal filtering for aided GPS navigation
p 94 A85-14832
Predicted performance benefits of an adaptive digital engine control system on an F-15 airplane
[AIAA PAPER 85-0255] p 263 A85-19801
A method for calculating the performance of ejector nozzles p 267 A85-20232
Prediction of performance of aircraft gas turbines
p 264 A85-21682
Analyses of starting performance of the single shaft gas turbines by theory of similarity p 351 A85-25211
Calculation and analysis of the off-design performance of split shaft gas turbine p 351 A85-25212
Fixed step friction model p 443 A85-28609
Noseboom position error prediction data base update
p 418 A85-28650
The nonlinear model for predicting rotating stall in multistage axial-flow compressors p 471 A85-31339
Optimal symmetric flight with an intermediate vehicle model p 497 A85-32780
Predicted turbine stage performance using quasi-three-dimensional and boundary-layer analyses
p 580 A85-34013
A simplified analysis of aircraft steady spin
p 584 A85-36483
Probabilistic prediction of the fatigue life of the compressor blades of gas-turbine engines under two-level programmed loading p 658 A85-37567
Hovercraft skirt design and manufacture
p 694 A85-38233
Redundancy management in strapdown navigation systems p 644 A85-38530
An aerodynamic performance model for hybrid heavy lift systems
[AIAA PAPER 85-0865] p 648 A85-38781

Performance of a new nose-lip hot-air anti-icing concept
[AIAA PAPER 85-1117] p 664 A85-39614

Performance characteristics of rectangular and circular thrust augmenting ejectors
[AIAA PAPER 85-1344] p 631 A85-39736

Modeling post-stall operation of aircraft gas turbine engines
[AIAA PAPER 85-1431] p 669 A85-39775

Mathematical modelling of performance characteristics and optimization of turbomachine stages
p 769 A85-41812

Performance prediction of the Wells self-rectifying air turbine p 857 A85-45352

An analogue method for crack propagation life prediction p 856 A85-46825

The Delco Performance Management System
p 895 A85-49172

Maintainability aspects in maintenance management
p 909 A85-49536

A management guide to reliability predictions
p 909 A85-49541

The aerodynamic characteristics of a GU25-5(11)8 aerofoil for low Reynolds numbers p 873 A85-49874

Predicting changes in reliability characteristics of gas turbine engines during operation p 169 N85-14964

The influence of fastener flexibility on load transfer and fatigue life predictions for multirow bolted and riveted joints — aircraft structures
[LBF-FB-172/84] p 296 N85-16219

Boundary layer control by transition fixing — conference
[DFVLR-MITT-84-17] p 479 N85-23712

Simulation: A tool for cost-effective systems design and live test reduction p 613 N85-26657

Analytical fuel property effects--small combustors
[NASA-CR-174738] p 582 N85-26709

Mission requirements and handling qualities
p 680 N85-28916

**PERFORMANCE TESTS**

Operational evaluation of an experimental TCAS — Traffic Alert and Collision Avoidance System
[AIAA PAPER 84-2407] p 89 A85-13514

Safety-of-flight and qualification testing for avionic systems
[AIAA PAPER 84-2670] p 175 A85-17653

Analysis of counter-rotating propeller performance
[AIAA PAPER 85-0005] p 262 A85-19453

A universal turboshaft engine test cell - Design considerations and model test results
[AIAA PAPER 85-0382] p 275 A85-19711

Experimental investigation of backswept centrifugal compressor impeller. I p 264 A85-20243

Field tests and signature analysis of an imaging CO2 laser radar — for cruise missile guidance and targeting sensor p 334 A85-22651

Field measurements with a coherent transversely excited atmospheric CO2 laser radar
p 357 A85-22652

Improved supersonic performance for the F-16 inlet modified for the J79 engine p 314 A85-23391

Altitude testing of a flight weight, self-cooled, 2D thrust vectoring exhaust nozzle
[SAE PAPER 841557] p 352 A85-25964

Tests of wall suction and blowing in highly offset diffusers p 385 A85-26751

A comparison of scramjet integral analysis techniques
p 420 A85-27099

Uncertainty of turbine engine performance measurements in altitude ground test facilities
p 421 A85-29566

Evaluation of stochastic similarity criteria for a limited volume of aviation equipment tests p 534 A85-31464

Evaluation of a ten-foot diameter X-wing rotor
p 495 A85-31987

Microwave Scanning Beam Landing System performance during Shuttle landings
p 486 A85-32199

Radial tires undergo operational tests on military, civil aircraft p 498 A85-32800

Development and testing of forced-air cooled enclosures for high density electronic equipment
[SAE PAPER 840952] p 566 A85-33763

Design and performance evaluation of a two-position variable geometry turbofan combustor
p 580 A85-34005

Instrumentation for gas turbine research in short-duration facilities
[SAE PAPER 841504] p 695 A85-39062

Drive system development for Propfan Test Assessment Program
[AIAA PAPER 85-1188] p 664 A85-39646

An experimental program for the testing and demonstration of GPS/Navstar, taking into account applications in civil aviation
[DGLR PAPER 84-092] p 748 A85-40311

Recent advances in vaporiser fuel injection technology
p 768 A85-41794

Evaluation of abradable turbine seal by friction-wear test and engine performance test p 770 A85-41842

A quantitative measure of monochrome CRT displays — for aircraft cockpits p 833 A85-45103

Field and laboratory investigation of Kapton insulated aircraft wiring p 852 A85-45138

The economicality of equipping aircraft with gas turbine-propeller propulsion -- German thesis
p 826 A85-45525

Crack growth in aluminium alloy sheet material under flight-simulation loading p 853 A85-46489

Performance evaluation of an electrofluidic flight control actuator p 894 A85-47789

Evaluation of the Malcolm horizon in a moving-base flight simulator p 23 N85-10051

Peripheral vision horizon display testing in RF-4C aircraft p 23 N85-10054

A preliminary flight evaluation of the peripheral vision display using the NT-33A aircraft
[AD-A145123] p 24 N85-10060

Rotordynamic analysis of the SSME turbopumps using reduced models
[NASA-CR-171170] p 53 N85-10355

Procedural aspects of testing aerodynamic models with combustion in high-enthalpy transient-mode installations
p 188 N85-14658

Tailored airfoils for vertical axis wind turbines
[DE85-004626] p 399 N85-21128

Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 4: Computer simulation of multiple acceptance criteria
[FAA-PM-84-12-VOL-4] p 431 N85-21183

Optimization of combined convective and film cooling of perforated baffle blades in gas turbines
p 529 N85-24067

Advanced life analysis methods. Volume 3: Experimental evaluation of crack growth analysis methods for attachment lugs
[AD-A151058] p 531 N85-24319

US Army Aviation Engineering Flight Activity (USAAEFA) report bibliography update 1983 - 1984
[AD-A151381] p 541 N85-25166

An assessment of the suitability of the BHGA structural test rig for aerodynamic testing of hang gliders
[CA-8505] p 652 N85-27853

Rotorcraft research testing in the National Full-Scale Aerodynamics Complex at NASA Ames Research Center
[NASA-TM-86687] p 652 N85-27854

Testing of materials and coatings for jet engine components under simulated operational conditions
[B8560073] p 672 N85-27873

Field test report of the Department of Energy's 100-kW vertical axis wind turbine
[DE85-008475] p 702 N85-28458

Low-speed wind-tunnel tests of an advanced eight-bladed propeller
[NASA-TM-86364] p 740 N85-29928

Traffic alert and collision avoidance system: Operational simulation
[FAA-PM-85-10] p 750 N85-29941

Effect of interference on the performance of a minimum TCAS 2
[FAA-PM-84-33] p 880 N85-34131

Planetary-gear-support bearing test rig design
[NASA-CR-174927] p 886 N85-35185

Development of NATOPS (Naval Air Training and Operating Procedure Standardization) performance software for the H-46D helicopter
[AD-A156089] p 887 N85-35190

**PERIODIC FUNCTIONS**

Periodic internal flows — in gas turbines
p 5 A85-11643

Periodic motions of generalized conservative mechanical systems whose equations of motion contain a large parameter — Russian book p 460 A85-30017

**PERIODIC VARIATIONS**

Periodic optical cruise of an atmospheric vehicle
p 158 A85-18330

The universal nature of zero-crossing time and velocity scales in turbulent shear flows p 232 A85-21851

Streamtube expansion effects on the Darrieus wind turbine p 451 A85-27098

**PERIPHERAL JET FLOW**

Dynamic characteristics of peripheral jet ACV. I - Heaving motion p 791 A85-40985

Dynamic characteristics of peripheral jet ACV. II - Pitching motion p 791 A85-41001

Dynamic characteristics of peripheral jet ACV. III - Coupling motion of heaving and pitching
p 791 A85-41006

**PERIPHERAL VISION**

Peripheral Vision Horizon Display (PVHD)
[NASA-CP-2306] p 23 N85-10044

Evaluation of the Malcolm horizon in a moving-base flight simulator p 23 N85-10051

Peripheral vision horizon display on the single seat night attack A-10 p 23 N85-10053

Peripheral vision horizon display testing in RF-4C aircraft p 23 N85-10054

Extracts from the test plan for in-flight evaluation of the NT-33A peripheral vision display p 23 N85-10055

NASA Ames-Dryden T-37 demonstration comments
p 23 N85-10056

Early Air Force Flight Test Center (AFFTC) experience with Peripheral Vision Horizon Displays (PVHD)
p 24 N85-10057

Peripheral vision displays: The future
p 24 N85-10058

A production peripheral vision display system
p 24 N85-10059

A preliminary flight evaluation of the peripheral vision display using the NT-33A aircraft
[AD-A145123] p 24 N85-10060

**PERSONNEL**

Maintenance Management Information and Control System (MMICS): Administrative boon or burden
[AD-A145762] p 136 N85-12790

U.S. Civil airmen statistics for calendar year 1984
[AD-A156326] p 866 N85-35153

**PERSONNEL DEVELOPMENT**

Nondestructive inspection: Improved capabilities of technicians
[AD-A147388] p 295 N85-16196

Improvements in personnel needed for better flight safety p 483 N85-23693

Administration chief on air traffic control improvements
p 567 N85-25193

**PERSONNEL MANAGEMENT**

Performance evaluation of A-10 aircraft mainteance units and aircraft using constrained facet analysis
[AD-A146955] p 201 N85-15660

**PERTURBATION**

Two- and three-dimensional model and wall data from a flexible-walled transonic test section
p 82 N85-12015

Investigations of flow field perturbations induced on slotted transonic-tunnel walls p 83 N85-12018

Comparison of uniform perturbation solutions and numerical solutions for some potential flows past slender bodies
[NASA-CR-172465] p 147 N85-14799

Exploratory development of advanced surface flaw detection methods
[AD-A148757] p 354 N85-18060

Flutter taming: A new tool for the aeroelastic designer
[AD-A150834] p 515 N85-23802

Improvement and extension of a numerical procedure for the three dimensional unsteady transonic flows
p 555 N85-25181

Analysis of control system from a viewpoint of desired pole placement and desired degree of robustness
[AD-A152627] p 675 N85-27876

Supersonic flow around blunt wedge
p 636 N85-28158

**PERTURBATION THEORY**

A general perturbation approach for computational fluid dynamics p 80 A85-15334

Ill-posed problems in perturbation theory (Asymptotic methods of mechanics) p 233 A85-22384

An asymptotic analysis of transonic wind-tunnel interference based on the full potential theory
p 394 A85-30171

Multistep terminal guidance of linear systems under conditions of parametric and constant perturbations
p 534 A85-31453

Perturbations of a transonic flow with vanishing shock waves p 548 A85-35152

First-order feedback strategies for variable speed planar pursuit-evasion games p 703 A85-37198

Singular perturbation theory of longitudinal dynamic stability and response of aircraft p 839 A85-44683

Unsteady lifting-line theory as a singular-perturbation problem p 871 A85-49353

A theory of quasi-conical solutions of noninteger degree — flow fields on supersonic wings
[UTH-LR-420] p 744 N85-31024

**PESTICIDES**

Chemical preparations for protecting aircraft against birds p 638 A85-37541

Installation restoration program. Phase 2: Stage 1 problem confirmation study, Duluth International Airport Duluth, Minnesota
[AD-A148318] p 278 N85-16885

**PHANTOM AIRCRAFT**

Peace Jack - An enigma exposed p 757 A85-41540

**PHASE DEVIATION**

The main characteristics of a synthetic-aperture radar in the case of arbitrary motion of the flight vehicle
p 96 A85-15687

**PHASE ERROR**
OMEGA navigation system position-fix accuracy assessment p 93 A85-14828
**PHASE LOCKED SYSTEMS**
Model tests of phase-locked propeller installations
[AIAA PAPER 85-0001] p 353 A85-26316
A phase-locked frequency multiplier for the signal averaging of the vibration of the Wessex helicopter input spiral bevel pinion
[AD-A154914] p 629 N85-32113
**PHASE SHIFT**
Importance of phase measurements in mechanical fault diagnosis of rotating machinery p 442 A85-27980
**PHASE TRANSFORMATIONS**
Two-dimensional deforming finite element methods for surface ablation p 368 A85-25147
**PHASED ARRAYS**
Design considerations for high-altitude, long-endurance, microwave-powered aircraft
[NASA-TM-86403] p 501 N85-23751
**PHENOLS**
Preliminary evaluation of an improved flammability test method for aircraft materials
[FAA-CT-84-22] p 242 N85-16840
**PHONEMES**
Evaluating syntactic constraints to speech recognition in a fighter aircraft environment
[AD-A152117] p 607 N85-27119
Study to determine potential flight applications and human factors design guidelines for voice recognition and synthesis systems
[NASA-CR-172590] p 797 N85-31349
**PHOSPHORUS**
Fire-resistant phosphorus containing polyimides and copolyimides
[NASA-CASE-ARC-11522-2] p 901 N85-34280
**PHOTOCHEMICAL REACTIONS**
Atmospheric photochemical modeling of turbine engine fuels. Phase 1: Experimental studies. Volume 2: Environmental chamber data tabulations
[AD-A147786] p 300 N85-17470
Composition and photochemical reactivity of turbine engine exhaust
[AD-A150559] p 533 N85-23256
**PHOTOELASTICITY**
Root stresses in conformal gears-strain gauge and photoelastic investigations p 528 N85-23787
**PHOTOGRAMMETRY**
A new technique to determine inflight store separation trajectories p 70 A85-13696
Evaluation of aircraft MSS analytical block adjustment p 439 A85-26641
Initial feasibility ground test of a proposed photogrammetric system for measuring the shapes of ice accretions on helicopter rotor blades during forward flight
[NASA-TM-87391] p 106 N85-12887
Investigations of the accuracy of the Digital Photogrammetry System (DPS), a rigorous three-dimensional compilation process for pushbroom imagery
[MBB-UA-753/83-O] p 609 N85-27734
**PHOTOGRAPHIC EQUIPMENT**
Vapor-screen technique for flow visualization in the Langley Unitary Plan Wind Tunnel
[NASA-TM-86384] p 740 N85-29929
**PHOTOGRAPHIC FILM**
Data annotation techniques for film and electro-optic sensors p 387 A85-24262
**PHOTOGRAPHIC RECORDING**
Photographic surveying of flow speed and direction adjacent to a surface p 441 A85-27646
Preliminary results using a rapid photographic wake traverse system — in a wind tunnel
[RAE-TM-AERO-1987] p 55 N85-11332
**PHOTOGRAPHS**
Initial feasibility ground test of a proposed photogrammetric system for measuring the shapes of ice accretions on helicopter rotor blades during forward flight
[NASA-TM-87391] p 106 N85-12887
Direct-strike lightning photographs, swept-flash attachment patterns, and flight conditions for storm hazards 1982
[NASA-TM-86347] p 454 N85-21877
Vapor-screen technique for flow visualization in the Langley Unitary Plan Wind Tunnel
[NASA-TM-86384] p 740 N85-29929
**PHOTOGRAPHY**
Chemical and photographic evaluation of rigid explosive transfer lines
[AD-A149303] p 437 N85-20145
**PHOTOINTERPRETATION**
The RS-700 series of infrared line scanners p 347 A85-24254
Sirius - An advanced concept for photo-interpretation p 367 A85-24259
Computer understanding of air traffic control displays p 488 A85-32498
**PHOTOMAPPING**
Advanced SAR system maps Arctic regions p 441 A85-27841
**PHOTOSENSITIVITY**
Contrast sensitivity performance assessment of HUD display systems p 259 A85-21593
**PHOTOTRANSISTORS**
High-temperature optically activated GaAs power switching for aircraft digital electronic control
[NASA-CR-174711] p 116 N85-12901
**PHOTOVOLTAIC EFFECT**
Air Force Federal Photovoltaic Utilization Program
[DE85-010812] p 801 N85-31648
**PHYSICAL PROPERTIES**
Handbook of aviation fuel properties
[CRC-530] p 43 A85-12651
**PHYSIOLOGICAL EFFECTS**
Hygienic evaluation of noise in living quarters near an airport p 606 A85-33579
Biomechanics finds practical applications in aerospace research p 446 N85-20205
Aviation noise effects
[AD-A154319] p 806 N85-30776
**PHYSIOLOGICAL RESPONSES**
Loss of cabin pressure in Canadian Forces ejection seat aircraft, 1962-1982 p 148 A85-16819
**PIEZOELECTRIC CRYSTALS**
Method for evaluating petrol products corrosivity using piezoelectric crystals. Part 2: Instruction manual — jet engine corrosion tests
[FOA-C-40196-84] p 121 N85-13073
**PIEZOELECTRIC TRANSDUCERS**
Description and test methods for a frequency output accelerometer p 694 A85-38536
**PIEZORESISTIVE TRANSDUCERS**
A rivet hole sensor for measuring airplane fuselage acoustic pressures
[AIAA PAPER 84-2350] p 47 A85-10686
**PILOT ERROR**
Analysis of fatal accidents involving light aircraft weighing up to two tons and their causes in the context of flight medicine — German thesis p 241 A85-19846
An intelligent flight-management aid for procedure execution p 332 A85-25793
Errare humanum est — human factors contributing to aircraft navigation errors p 567 A85-36429
Safety recommendation(s), A-84-93 through -95
[REPT-3983/33] p 484 N85-23746
Investigation of technology needs for avoiding helicopter pilot error related accidents
[NASA-CR-3895] p 563 N85-25220
Safety recommendation(s), A-84-98
[REPT-3983A/217] p 563 N85-25223
**PILOT INDUCED OSCILLATION**
A nonlinear pilot model for hover p 513 A85-32783
In-flight evaluation of pure time delays in pitch and roll
[AIAA PAPER 85-1852] p 843 A85-45881
Investigation of limb-sidestick dynamic interaction with roll control
[AIAA PAPER 85-1853] p 843 A85-45882
**PILOT PERFORMANCE**
Wright Brothers Lectureship in Aeronautics - Handling qualities and pilot evaluation
[AIAA PAPER 84-2442] p 113 A85-13534
Pilot command interfaces for discrete control of automated nap-of-earth flight
[AIAA PAPER 84-2621] p 172 A85-17859
An advanced media interface for control of modern transport aircraft navigational systems
[AIAA PAPER 84-2686] p 165 A85-17865
Pilot modeling and closed-loop analysis of flexible aircraft in the pitch tracking task p 172 A85-18334
Judgment and discipline - Recipe for survival p 241 A85-21582
Contemporary problems in airborne displays p 346 A85-22593
Solving the pilot's wind-shear problem p 400 A85-27366
Tachistoscopic studies of powerplant instruments p 504 A85-31779
Development of piloting techniques to reduce helicopter approach noise p 512 A85-32015
The Command Flight Path Display - All weather, all missions p 356 A85-38959
Toward a unifying theory for aircraft handling qualities p 651 A85-39554
DARPA stressing development of pilot's associate system p 802 A85-40917
Pilots wary of tactical information systems p 763 A85-41058
Food poisoning as an in-flight safety hazard p 746 A85-42089
Loop Separation Parameter for landing flying qualities
[AIAA PAPER 85-1786] p 838 A85-43846
Closed-loop, pilot/vehicle analysis of the approach and landing task
[AIAA PAPER 85-1851] p 842 A85-45880
Quantitative feedback design approach to robust flying qualities
[AIAA PAPER 85-1902] p 844 A85-45916
Identification of pilot dynamics from in-flight tracking data
[AIAA PAPER 85-1945] p 845 A85-45935
A mathematical simulation model of the CH-47B helicopter, volume 1
[NASA-TM-84351-VOL-1] p 19 N85-10033
The Malcolm horizon: History and future p 23 N85-10046
Content, variety, and augmentation of simulated visual scenes for teaching air-to-ground attack
[AD-A145218] p 38 N85-10080
Aircraft accident report. Central Airlines flight 27, Hughes Charter Air, Gates Learjet model 25 (N51CA) Newark International Airport, Newark, New Jersey, March 30, 1983
[PB84-910411] p 14 N85-10924
Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project-longitudinal handling qualities study of a relaxed-stability airplane
[NASA-CR-3660] p 36 N85-11005
An in-flight investigation of a twin fuselage configuration in approach and landing
[NASA-CR-172368] p 173 N85-13601
Superaugmented rotorcraft program p 139 N85-14807
Some thoughts on the implementation of pilot night vision devices for helicopters p 166 N85-14814
Operational requirements - system concepts p 161 N85-14823
Assessment of simulation fidelity using measurements of piloting technique in flight p 278 N85-16817
Space shuttle pilot-induced-oscillation research testing p 496 N85-22351
Air combat simulation: Methods, models, trends p 498 N85-22359
A comparison of pictorial and speech warning messages in the modern cockpit
[AD-A151917] p 579 N85-26706
The use of flight simulators in measuring and improving training effectiveness
[AD-A153817] p 684 N85-28954
Electrooculographic measurement, fatigue and variability of performance in simulated aircraft flight p 760 N85-29946
**PILOT PLANTS**
ETW, the European cryogenic wind tunnel will be built in Cologne, West Germany p 175 A85-18723
**PILOT TRAINING**
25,000 flight hours in the Alpha jet by the 8th chase squadron. I p 159 A85-18725
Safety - Meteorological data vital for simulator training
[AIAA PAPER 85-0091] p 240 A85-19513
History of the development and manufacture of flight simulators in Czechoslovakia and the rest of the world p 275 A85-19878
Future helicopter developments p 311 A85-24512
AV-8B Harrier II training capabilities
[AIAA PAPER 85-1734] p 778 A85-40554
Boeing Flight Simulator Approval Process
[AIAA PAPER 85-1736] p 780 A85-42683
Training effectiveness evaluation and utilization demonstration of a low cost cockpit procedures trainer
[AD-A145179] p 38 N85-10078
Content, variety, and augmentation of simulated visual scenes for teaching air-to-ground attack
[AD-A145218] p 38 N85-10080
Analysis of the flow field about a T-45 using PANAIR
[AD-A148811] p 236 N85-15699
Directions of the West German Ministry of Transport for education and control of airline personnel (section 3, chapters 2 and 12) p 243 N85-16848
Directions of the West German Ministry of Transport for education and control or airline personnel, Report 6, chapters 3/A and 3/B p 244 N85-16849
Using a limited field of view simulator to instruct high speed, low altitude flying skills
[AD-P004309] p 358 N85-17963
Visual perceptual aspects of low level high speed flight and flight simulation
[AD-P004310] p 358 N85-17964
On-board Computer Image Generator (CIG) applications
[AD-P004335] p 376 N85-17989
CIG (Computer Image Generator) goes to war: The tactical illusion
[AD-P004336] p 376 N85-17990

Flight Training Technology for Regional/Commuter Airline Operations: Regional Airline Association/NASA Workshop Proceedings
[NASA-CP-2348] p 332 N85-18009
Safety awareness, pilot education, and incident reporting programs p 332 N85-18020
The aviation safety reporting system
p 332 N85-18021
Simulation of aircraft behaviour on and close to the ground
[NASA-TM-87460] p 501 N85-23754
Visual simulation requirements for aircraft aspect recognition at real world distances
[AD-A151040] p 517 N85-23810
Human factors in cockpit automation: A field study of flight crew transition
[NASA-CR-177333] p 747 N85-29937
RAFTS: A T-38 replacement for the 21st century
[AD-A156103] p 867 N85-35191

**PILOTLESS AIRCRAFT**
Drones and RPVs - Technologies, systems and trends
p 103 A85-14856
Powerplants for long-duration unmanned aircraft
p 420 A85-27094
Propellant options for long duration, high altitude unmanned aircraft
[AIAA PAPER 85-1326] p 689 A85-39727
Argus - Standoff-reconnaissance with unmanned rotor platform
[DGLR PAPER 84-126] p 754 A85-40339
On-board processing for linescan sensors in miniature unmanned aircraft
[RAE-TM-SPACE-327] p 261 N85-16870

**PILOTS**
Analysis of the reported incidence of tumble, flail and windblast by ejectees p 331 A85-22774

**PILOTS (PERSONNEL)**
Evaluation of arctic test of improved tritium radioluminescent lighting
[AD-A148215] p 278 N85-16864
Global optical metrics for self-motion perception
[AD-P004333] p 377 N85-17987
Pilot education and safety awareness programs
p 333 N85-18026
US Army Aviation Engineering Flight Activity (USAAEFA) report bibliography update 1983 - 1984
[AD-A151381] p 541 N85-25168
Aspects of application of ACT systems for pilot workload alleviation p 588 N85-26734
Aspects of application of ACT systems for pilot workload alleviation p 677 N85-27887
U.S. Civil airmen statistics for calendar year 1984
[AD-A156326] p 866 N85-35153
International flight planning handbook
[AD-A156330] p 878 N85-35177

**PIPE FLOW**
Classical free-streamline flow over a polygonal obstacle
[NASA-CR-172448] p 53 N85-10301
Flow of nitrogen-pressurized Halon 1301 in fire extinguishing systems
[NASA-CR-174271] p 242 N85-15701
Design of piping for oil drain from turbine bearings
p 529 N85-24073
Behavior of turbulent gas jets in an axisymmetric confinement
[NASA-CR-174829] p 581 N85-25265

**PIPELINES**
Pipeline control system with high safety reliability — for transportation of aviation fuels p 778 A85-40543

**PIPES (TUBES)**
Aeronautical tubes and pipes p 185 A85-18724
Computer aided tube routing design in aircrafts
p 615 A85-37183
Problem of reduction to ideal tube in experimental aerodynamics p 481 N85-24179
Measurement of turbofan-turbojet thrust from tailpipe static pressure
[AD-A154036] p 774 N85-29967
Elastomers used in aeronautics industry
[SNIAS-851-551-103] p 788 N85-31304

**PISTON ENGINES**
Practical flight test method for determining reciprocating engine cooling requirements p 167 A85-16237
Certification of reciprocating engine aircraft oils and additives by supplemental type certification procedures
[SAE PAPER 850899] p 901 A85-50116
Some characteristics of automotive gasolines and their performance in a light aircraft engine
[FAA-CT-84-12] p 283 N85-15919
Birds and aviation
[AD-P004177] p 402 N85-19939

**PISTONS**
The development and use of free piston wind tunnels
p 368 A85-25455

Active control landing gear for ground loads alleviation
p 590 N85-26749

**PITCH (INCLINATION)**
Three-dimensional effects on a pitching lifting surface
[AIAA PAPER 85-0041] p 208 A85-19476
Transient motion of hypersonic vehicles including time history effects
[AIAA PAPER 85-0201] p 268 A85-19585
Ground interference effects on subsonic dynamic stall in pitch and plunge p 231 A85-21841
A design methodology for pitch pointing flight control systems p 423 A85-26429
Unsteady surface pressure measurements on a pitching airfoil
[AIAA PAPER 85-0532] p 387 A85-27878
A robust pitch pointing control law
p 513 A85-33304
Dynamic overshoot of the static stall angle
p 628 A85-39225
On the wake of a pitching airfoil
[AIAA PAPER 85-1621] p 737 A85-43050
Development and flight evaluation of an augmented stability active controls concept: Executive summary
[NASA-CR-166009] p 37 N85-11006
Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project. ACT/Control/Guidance System study, volume 1
[NASA-CR-165963-VOL-1] p 162 N85-14837
Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project. ACT/Control/Guidance System study. Volume 2: Appendices
[NASA-CR-165963-VOL-2] p 162 N85-14838
Inviscid analysis of unsteady blade tip flow correlation studies
[NASA-CR-172506] p 329 N85-18958
Investigation of potential and viscous flow effects contributing to dynamic stall
[AD-A151696] p 602 N85-25773
Wing tunnel investigation of dynamic stall of an NACA 0018 airfoil oscillating in pitch
[NAE-AN-27] p 635 N85-27830
Proposals for the determination of necessary elevator handling characteristics of sailplanes in high speed range
[DFVLR-FB-84-52] p 676 N85-27882
Compendum of unsteady aerodynamic measurements, addendum 1
[AGARD-R-702-ADD-1] p 744 N85-31028
Data set 9: LANN wing. Pitching oscillation
p 744 N85-31030
In-flight evaluation of pure time delays in pitch and roll
[NASA-TM-86744] p 847 N85-32123

**PITCHING MOMENTS**
An experimental investigation of an airfoil undergoing large amplitude pitching motions
[AIAA PAPER 85-0039] p 207 A85-19474
Calculation of aerodynamic characteristics of winglets and experimental verification p 393 A85-29692
Impact of fuselage incidence on the supersonic aerodynamics of two fighter configurations
p 473 A85-32590
Dynamic characteristics of peripheral jet ACV. II - Pitching motion p 791 A85-41001
Dynamic characteristics of peripheral jet ACV. III - Coupling motion of heaving and pitching
p 791 A85-41006
An experimental investigation of an airfoil undergoing large-amplitude pitching motions p 730 A85-42351
In-flight evaluation of pure time delays in pitch and roll
[AIAA PAPER 85-1852] p 843 A85-45881
Dynamic stall progress in analysis and prediction
[AIAA PAPER 85-1769] p 817 A85-47026
An evaluation of three helicopter rotor sections
[NASA-TM-86719] p 874 N85-34115

**PITOT TUBES**
Pitot pressure and heat transfer measurements in hydrazine thruster plumes
[AIAA PAPER 85-0934] p 685 A85-37599
A comparison of laser Doppler anemometry and probe measurements within the boundary layer of an airfoil at subsonic flow
[ISL-CO-219/84] p 875 N85-34127

**PLANE STRAIN**
Critical flutter parameters of orthotropic rectangular flat panels with in-plane loads p 693 A85-37192

**PLANE WAVES**
Diffraction of a single plane wave by a conical wing
p 623 A85-38483
The transmission of acoustic energy by a finite cylindrical shell excited by external plane waves
p 861 A85-44040

**PLANETARY LANDING**
Descent vehicles — Russian book
p 899 A85-49435

**PLANNING**
The Air Force can improve its forecasts of aircraft spare parts requirements
[AD-A147911] p 308 N85-16682
FAA aviation forecasts: Fiscal years 1985-1996
[AD-A151050] p 484 N85-23747

**PLASMA DISPLAY DEVICES**
Thin plasma panels squeeze into crammed aircraft
p 106 A85-14009

**PLASMA GUNS**
Compact, high efficiency plasma spray guns for jet engine coatings p 123 A85-14131

**PLASMA JETS**
Propagation of an ion jet near a dielectric surface
p 197 A85-16187

**PLASMA LAYERS**
An analysis of the pattern of longitudinal slot antenna on the metal cylinder covered with a high collision plasma layer p 183 A85-17173

**PLASMA SPRAYING**
Compact, high efficiency plasma spray guns for jet engine coatings p 123 A85-14131
Plastic flow of plasma sprayed ceramics
p 362 A85-24161
ITSC '83; Proceedings of the Tenth International Thermal Spraying Conference, Essen, West Germany, May 2-6, 1983 p 443 A85-28801
High-temperature erosion of plasma-sprayed, yttria-stabilized zirconia in a simulated turbine environment
[AIAA PAPER 85-1219] p 689 A85-39662
Thermal stability of plasma-sprayed zirconia coatings as related to substrate selection p 900 A85-48758
Air force plasma spray at SA-ALC (San Antonio Air Logistics Center)
[AD-P004004] p 72 N85-11984
High-temperature erosion of plasma-sprayed, yttria-stabilized zirconia in a simulated turbine environment
[NASA-TP-2406] p 121 N85-13045
Thermal barrier coating system
[NASA-CASE-LEW-14057-1] p 902 N85-35233

**PLASMA-ELECTROMAGNETIC INTERACTION**
An analysis of the pattern of longitudinal slot antenna on the metal cylinder covered with a high collision plasma layer p 183 A85-17173

**PLASTIC AIRCRAFT STRUCTURES**
Dynamic response and acoustic fatigue of stiffened composite structure p 52 A85-12473
Sonic fatigue design method for the response of CFRP stiffened-skin panels p 52 A85-12474
Structural uses of aramid fibers as a plastic reinforcement in aircraft and missiles
p 119 A85-15631
Principal tests for the automated production of the airbus fin assembly with fiber composite materials
p 137 A85-16066
Impact of MIL-STD-1290 crashworthiness requirements on design of helicopter composite structures
[SAWE PAPER 1567] p 160 A85-18819
Use of high performance composite materials in modern aircraft structures p 341 A85-24818
Carbon and kevlar in the Dornier 228 utility-commuter aircraft p 341 A85-24819
Composite airframe production implementation
p 312 A85-26302
Development of acoustic emission techniques for quantitative use on aerospace C.F.R.P. structures
p 445 A85-29938
Design of a CFRP-wing for the alpha-jet major panel tests
[AIAA PAPER 85-0725] p 490 A85-30278
Improved resins for wet layup repair of advanced composite structure p 686 A85-37381
Natural frequencies and flight loads of composite main rotor blade for helicopter p 647 A85-38361
Wind tunnel experiments of the high-performance rotor blades p 622 A85-38362
Requirements and demonstration for aeronautical structures made of carbon-fiber-reinforced epoxy resins
[DGLR PAPER 84-149] p 783 A85-40282
Stability limits of shear fields of the carbon-fiber-reinforced-plastics rudder unit - Airbus A300/A310
[DGLR PAPER 84-155] p 752 A85-40286
Static strength of carbon-fiber-composite flat bars with unstressed holes p 789 A85-40289
The Airbus A 310-300 as an example of the construction of an FRP vertical tail fin
[MBB-UT-52-85-OE] p 758 A85-42677
Structural plastics in sporting and general aviation aircraft p 865 A85-48571

**PLASTIC DEFORMATION**
Impact bending of a rotating, rigid-plastic fan blade
p 836 A85-45860

**PLASTIC FLOW**
Plastic flow of plasma sprayed ceramics p 362 A85-24161

**PLASTIC PROPERTIES**
Optimal structural design of shells - A survey p 788 A85-40240

**PLATE THEORY**
Current problems in the theory of plates and shells in aircraft p 287 A85-20459
Flutter analysis of cantilevered quadrilateral plates p 600 A85-35296

**PLATES (STRUCTURAL MEMBERS)**
The effect of acoustic disturbances on the vibrations of a multilayer plate p 64 A85-11823
Determination of the discrepancy vector components using nonlinear functions in solving certain boundary value elasticity problems p 600 A85-35900
Numerical analysis of turbulent flow past a plate using equations for fluctuations p 794 A85-42121
Aero/hydrodynamic stability of elastically supported plates in narrow channels with upstream barriers preventing flow redistribution p 794 A85-42564
Experimental study on transonic flutter characteristics of sweptback wing with core composite plates having different fiber orientations
[NAL-TR-827] p 173 N85-14842

**PLATING**
Annual Airline Plating and Metal Finishing Forum, 19th, San Antonio, TX, March 7-10, 1983, Proceedings p 123 A85-14126

**PLATINUM**
Advanced thin film thermocouples
[NASA-CR-175541] p 450 N85-21607

**PLOWING**
Prediction accuracy of the torques for rotary tillage by an analog tool
[AD-P004288] p 379 N85-18865

**PLUG NOZZLES**
Jet noise suppression by porous plug nozzles
[NASA-CR-3613] p 65 N85-11790
Experimental investigation of shock-cell noise reduction for dual-stream nozzles in simulated flight
[NASA-CR-3846] p 135 N85-13549
Experimental investigation of shock-cell noise reduction for single stream nozzles in simulated flight
[NASA-CR-3845] p 135 N85-13550

**PLUGS**
Superconducting gyroscope research
[NASA-CR-171406] p 604 N85-25795

**PLUMAGE**
Microscopic identification of feathers in order to improve birdstrike statistics
[AD-P004187] p 403 N85-19950

**PLUMES**
Theoretical study on supersonic jet plumes p 206 A85-19439
Dispersion process of jet engine exhaust plume p 351 A85-24569
Experimental definition of nonaxisymmetric exhaust nozzle plumes — for aircraft thrust vector control p 385 A85-26752
Pitot pressure and heat transfer measurements in hydrazine thruster plumes
[AIAA PAPER 85-0934] p 685 A85-37599
Modeling of propulsive jet plumes—extension of modeling capabilities by utilizing wall curvature effects
[AD-A146262] p 128 N85-12324
Development of computational fluid dynamics at NASA Ames Research Center
[NASA-TM-86021] p 87 N85-12866
Preliminary analysis of tone-excited two-stream jet velocity decay
[NASA-TM-86951] p 397 N85-21114
The influence on IR emission of engine parameters for an afterburn case. A sensitivity study on NATO infrared air target model (NIRATAM) version: 0.0
[AD-B089311L] p 422 N85-21171
A method for simulating 3-D aircraft flow fields with jet plume effects
[NASA-CR-175802] p 559 N85-26664

**PLY ORIENTATION**
Radial tires undergo operational tests on military, civil aircraft p 498 A85-32800

**PNEUMATIC CONTROL**
Development of a pneumatic thrust deflector
[SAE PAPER 841558] p 663 A85-39209

**PNEUMATIC EQUIPMENT**
Development of a pneumatic thrust deflecting nozzle
[AIAA PAPER 84-2456] p 108 A85-13544
Dynamic characteristics of an unloading device — for flight vehicle vibration tests p 155 A85-17068
Air turbine starter sizing for a proper bleed source match
[SAE PAPER 841509] p 661 A85-39153
Pneumatic turbulators: A device for drag reduction at Reynolds numbers below 5 million p 257 N85-16791

**PODS (EXTERNAL STORES)**
MBB - Reconnaissance programs p 346 A85-24252
Equipment for preflight test of an Electronic Countermeasures (ECM) avionic system p 293 N85-15949

**POINTING CONTROL SYSTEMS**
A design methodology for pitch pointing flight control systems p 423 A85-26429
Precision pointing using a dual-wedge scanner — for airborne carbon dioxide Doppler lidar p 526 A85-32711
A robust pitch pointing control law p 513 A85-33304

**POINTS (MATHEMATICS)**
A description of the Langley wireframe geometry standard (LaWGS) format
[NASA-TM-85767] p 499 N85-22380

**POISONING**
Food poisoning as an in-flight safety hazard p 746 A85-42069

**POLAND**
Finnair, LOT, SAS reps in USSR on present operations, plans p 333 N85-18035
Meteorological measurements with motor gliders in Poland p 915 N85-35555

**POLARIZATION (CHARGE SEPARATION)**
Charge separation in a Florida thunderstorm p 130 A85-15072

**POLARIZATION CHARACTERISTICS**
Measurements of polarization characteristics of radiation field of on-board aircraft antennas p 127 N85-12230

**POLICE**
Civil law enforcement missions p 139 N85-14812

**POLICIES**
Aircraft navigation and landing technology: Status of implementation
[GPO-38-615] p 97 N85-12883
National airspace review enhancement plan, revision 3
[AD-A150743] p 246 N85-16852
FAA policy regarding solid waste disposal facilities
[AD-P004196] p 428 N85-19963
FAA regulation of 9-seat and under passenger aircraft
[GPO-42-703] p 747 N85-31032
West Europe report: Science and technology
[JPRS-WST-85-020] p 797 N85-31333

**POLLUTION CONTROL**
Fuel effects on gas turbine combustion-liner temperature, pattern factor, and pollutant emissions p 26 A85-11984
The battle against noise in industry p 705 A85-39349
Environmental and energy audits of Air Force government owned-contractor operated installations
[AD-P004138] p 375 N85-18474

**POLLUTION TRANSPORT**
Dispersion process of jet engine exhaust plume p 351 A85-24569
Installation restoration program. Phase 2: Stage 1 problem confirmation study, Duluth International Airport Duluth, Minnesota
[AD-A146318] p 278 N85-16885

**POLYCARBONATES**
Laminated thermoplastic radome
[AD-D011684] p 691 N85-29045

**POLYCRYSTALS**
Polycrystalline grain controlled castings for rotating compressor and turbine components p 519 A85-32380
Life prediction and constitutive models for anisotropic materials p 31 N85-10976

**POLYESTER RESINS**
System for rapid repair of damaged airfield runways
[AD-D011325] p 276 N85-15754
Interactions between F-111 fuselage fuel tank sealants. Part 2: Variation in performance properties of polysulfides after contact with polyester degradation products
[AD-A149777] p 438 N85-21368

**POLYESTERS**
'Phoenix' - A polyester-film inflatable man-powered aircraft
[SAE PAPER 840028] p 342 A85-26312
Fracture behavior of glass-cloth/polyester composite laminate at low temperature p 688 A85-39228

**POLYETHYLENES**
Stratospheric flights with large polyethylene balloons from equatorial latitudes p 639 A85-38304

**POLYGONS**
Classical free-streamline flow over a polygonal obstacle
[NASA-CR-172448] p 53 N85-10301

**POLYIMIDE RESINS**
V-378A, a new modified bismaleimide matrix resin for high modulus graphite p 282 A85-21482
Polyimide protective coatings for 700 deg service p 282 A85-21527

**POLYIMIDES**
Process for preparing essentially colorless polyimide film containing phenoxy-linked diamines
[NASA-CASE-LAR-13353-1] p 436 N85-20128
Elastomer toughened polyimide adhesives — bonding metal and composite material structures for aircraft and spacecraft
[NASA-CASE-LAR-12775-2] p 437 N85-21349
Fire-resistant phosphorus containing polyimides and copolyimides
[NASA-CASE-ARC-11522-2] p 901 N85-34280

**POLYMER CHEMISTRY**
New high temperature and fuel resistant sealants based on Permapol P-3, polythioether polymers p 178 A85-16052
PMR polyimide composites for aerospace applications — Polymerization of Monomer Reactants p 282 A85-21520

**POLYMER MATRIX COMPOSITES**
The application of endless-fiber reinforced polymers p 119 A85-15580
PMR polyimide composites for aerospace applications — Polymerization of Monomer Reactants p 282 A85-21520
Fracture behavior of glass-cloth/polyester composite laminate at low temperature p 688 A85-39228
Advanced composites - Present status and future trend p 784 A85-41005
Fibre reinforced composites '84; Proceedings of the International Conference, University of Liverpool, England, April 3-5, 1984 p 900 A85-48562

**POLYMERIC FILMS**
Polyimide protective coatings for 700 deg service p 282 A85-21527
'Phoenix' - A polyester-film inflatable man-powered aircraft
[SAE PAPER 840028] p 342 A85-26312
Coatings for erosion resistance p 434 A85-27538
Ageing of structural film adhesives - Changes in chemical and physical properties and the effect on joint strength p 434 A85-27913
The limits of stratofilm p 646 A85-38302
Process for preparing essentially colorless polyimide film containing phenoxy-linked diamines
[NASA-CASE-LAR-13353-1] p 436 N85-20128
Finger materials for air cushion vehicles. Volume 1: Flexible coatings for finger materials
[AD-A151438] p 601 N85-25545

**POLYMERIZATION**
PMR polyimide composites for aerospace applications — Polymerization of Monomer Reactants p 282 A85-21520

**POLYMERS**
A thermoplastic polyimidesulfone — synthesis of processable and solvent resistant system p 282 A85-21483

**POLYSULFIDES**
Polysulfide-polyurethane interfacial aspects p 434 A85-27905
Interactions between F-111 fuselage fuel tank sealants. Part 2: Variation in performance properties of polysulfides after contact with polyester degradation products
[AD-A149777] p 438 N85-21368

**POLYURETHANE RESINS**
Polysulfide-polyurethane interfacial aspects p 434 A85-27905
Polyurethane paint systems - High surface quality p 784 A85-41400
Aircraft surface coatings
[NASA-CR-3861] p 21 N85-10935
Finger materials for air cushion vehicles. Volume 1: Flexible coatings for finger materials
[AD-A151438] p 601 N85-25545

**POPULATIONS**
Blackbirds and starlings: Population ecology and habits related to airport environments
[AD-P004190] p 404 N85-19953

**POROSITY**
Investigation to optimize the passive shock wave/boundary layer control for supercritical airfoil drag reduction
[NASA-CR-175788] p 559 N85-26665

**POROUS BOUNDARY LAYER CONTROL**
Supersonic flow over a cone with power-law injection through the cone surface p 3 A85-10465
The transpired turbulent boundary layer in various pressure gradients and the blow-off condition
[ASME PAPER 84-WA/HT-71] p 698 A85-39899
Structure of a laminar boundary layer with distributed suction p 815 A85-44133
Progress in wind tunnel wall interference assessment/correction procedures at the NAE p 84 N85-12025

**POROUS MATERIALS**
A comparison of experimental characteristics of porous and blade impellers p 660 A85-39120

Numerical study of porous airfoils in transonic flow
[NASA-TM-86713] p 635 N85-27828

**POROUS PLATES**

Supersonic flow past blunt porous screens
p 389 A85-28442

**POROUS WALLS**

Ultra light wall wind tunnel
[ONERA, TP NO. 1984-129] p 117 A85-15846

Cooling of a turbine profile in the case of air injection through porous areas p 352 A85-25622

Calculation of the full cooling efficiency of the perforated wall of a gas turbine nozzle guide vane
p 352 A85-25623

Investigation of the induction of subsonic wind tunnels with an axisymmetric working part p 389 A85-28443

The free interaction in a supersonic flow over a porous wall p 626 A85-39021

Jet noise suppression by porous plug nozzles
[NASA-CR-3613] p 65 N85-11790

**PORTABLE EQUIPMENT**

Portable automatic eye-safe laser and FLIR test set
p 440 A85-26810

PADDS - A Portable Airborne Digital Data System
p 418 A85-28652

Ames develops remote site landing aids
p 748 A85-40918

Applying shear beam load measuring techniques to portable platform scales for aircraft weighing
[SAWE PAPER 1581] p 898 A85-49906

Mobile accelerator neutron radiography system
[AD-A148808] p 372 N85-18311

The use of small mobile radars to detect, monitor, and quantify bird movements
[AD-P004188] p 403 N85-19951

Deployable Core Automated Maintenance System (DCAMS)
[AD-A153695] p 706 N85-29839

Expedient runway surfacing with post tensioning system for expeditionary airfields
[AD-D011677] p 781 N85-29976

**POSITION (LOCATION)**

Time scheduling of a mix of 4D equipped and unequipped aircraft p 483 A85-33278

Realistic localizer courses for aircraft instrument landing simulators
[NASA-CR-172333] p 105 N85-12885

Three position estimation procedures
[AD-A148748] p 338 N85-18042

Low-resolution target classification from a staring infrared sensor
[AD-A151690] p 612 N85-26358

**POSITION ERRORS**

OMEGA navigation system position-fix accuracy assessment p 93 A85-14828

A feasibility study of a VLF radio compass for Arctic navigation p 94 A85-14833

The use of pseudo-satellites (PLs) for improving GPS performance p 94 A85-14836

C/A code receivers for precise positioning applications p 95 A85-14838

TI 4100 NAVSTAR navigator test results
p 95 A85-14840

Modeling of certain strapdown heading-sensitive errors in INS error models p 153 A85-18345

Noseboom position error prediction data base update
p 418 A85-28650

An aspect of the role of the clock in a GPS receiver
p 485 A85-31745

Simulation and analysis of differential GPS
p 665 A85-38546

Simulations of strapdown-system errors and error compensation methods — transport aircraft navigation
[DFVLR-MITT-84-22] p 751 N85-31040

**POSITION INDICATORS**

Improved legislated emergency locating transmitters and emergency position indicating radio beacons
[NASA-CASE-GSC-12892-1] p 447 N85-20226

A study of the application of differential techniques to the global positioning system for a helicopter precision approach
[NASA-CR-177326] p 750 N85-31035

**POSITIONING**

Continued development of distance measuring equipment for real-time spatial positioning in military aircraft testing p 419 A85-28656

**POST BOOST PROPULSION SYSTEM**

Combined cycle ramjet engine
[AD-D011247] p 178 N85-14859

**POSTFLIGHT ANALYSIS**

Applications of state estimation in aircraft flight-data analysis p 650 A85-39211

Analysis of flight-recorded data as a contribution to safety in air operations p 745 A85-41726

**POSTMISSION ANALYSIS (SPACECRAFT)**

An analysis of the Space Shuttle hypersonic entry trim anomaly
[AIAA PAPER 85-1764] p 850 A85-43878

**POTENTIAL FLOW**

Theoretical study of two-dimensional and three-dimensional potential flows with rotational source terms - Application to turbomachines — French thesis
p 50 A85-11729

Finite element calculation of potential flow around wings
[ONERA, TP NO. 1984-68] p 7 A85-12603

Modular potential flow computation including fuselage and wing tip effects p 75 A85-13677

High frequency properties in the unsteady linearised potential flow of a compressible fluid p 78 A85-14852

Potential equation for transonic steady flow with large longitudinal disturbance and line relaxation
p 142 A85-18281

Transonic solutions for a multielement airfoil using the full-potential equations p 144 A85-18512

Comment on 'Prediction of subsonic aerodynamic characteristics - A case for low-order panel methods'
p 144 A85-18521

Exact solution of compressible potential flow past a body of revolution at zero incidence - Especially for high subsonic flow p 144 A85-18528

Approximate factorization schemes for three-dimensional nonlinear supersonic potential flow
p 145 A85-18678

Treatment of supersonic flows with embedded subsonic regions p 145 A85-18681

Calculation of compressible potential flow about multielement airfoils using a finite field-panel approach
[AIAA PAPER 85-0038] p 207 A85-19473

A class of airfoils having finite trailing edge pressure gradients
[AIAA PAPER 85-0206] p 215 A85-19590

Numerical solution of the full-potential equation for rotors and oblique wings using a new wake model
[AIAA PAPER 85-0268] p 216 A85-19621

Linearized potential flow analysis of complex aircraft configurations by HISSS, a higher order panel method
[AIAA PAPER 85-0281] p 217 A85-19632

Optimized discrete-singularity representation of axisymmetric bodies — for potential flow
[AIAA PAPER 85-0284] p 218 A85-19635

Breakdown of the conservative potential equation — for study of transonic flow
[AIAA PAPER 85-0367] p 221 A85-19700

The numerical simulation of steady transonic rotational flow using a dual potential formulation
[AIAA PAPER 85-0368] p 221 A85-19701

Potential flow calculations and preliminary wing design in support of an NLF variable sweep transition flight experiment
[AIAA PAPER 85-0426] p 248 A85-19741

A new singular integral method for compressible potential flow
[AIAA PAPER 85-0481] p 225 A85-19778

A subdomain finite element method for solving the conservative full potential equation for transonic profile flows — German thesis p 227 A85-19854

A fast algorithm for solving the conservative transonic S1 full potential equation employing non-orthogonal curvilinear coordinates and non-orthogonal velocity components p 228 A85-20239

A linearized unsteady aerodynamic analysis for transonic cascades p 229 A85-20744

Drag prediction for projectiles and finned bodies in incompressible flow
[AIAA PAPER 85-0104] p 230 A85-20854

Finite element solutions of Euler equations for lifting airfoils
[AIAA PAPER 85-0294] p 230 A85-20864

Computation of choked and supersonic turbomachinery flows by a modified potential method
p 232 A85-21859

Computation of potential flow on S2 stream surface for a transonic axial-flow compressor rotor
p 315 A85-24091

Spectral multigrid methods with applications to transonic potential flow p 316 A85-24448

Some analytical solutions applicable to verify 3-D numerical methods in turbomachines
p 318 A85-25216

On the use of parametric differentiation to predict weak shock waves p 319 A85-25465

Entropy condition satisfying approximations for the full potential equation of transonic flow p 385 A85-26916

Monotone switches in implicit algorithms for potential equations applied to transonic flows
p 391 A85-29078

A field panel/finite difference method for potential unsteady transonic flow p 391 A85-29084

A type-dependent splitting scheme with variable parameters for the longitudinal large-disturbance potential equation p 393 A85-29693

Using the discrete vortex method for calculating potential flow past a high-lift wing in the presence of a screen
p 471 A85-31456

Some iterative schemes for transonic potential flows
p 474 A85-32624

A method for predicting unsteady potential flow about an aerofoil p 545 A85-34707

A mixed finite difference analysis of the internal and external transonic flow fields of inlets with centerbody
p 548 A85-35743

Finite element solution of non-viscous flows in cascades of blades p 552 A85-36335

Multigrid acceleration of an iterative method with application to transonic potential flow
p 553 A85-36404

The stability of symmetrical vortices in the wake of elliptical cylinders in confined flow p 618 A85-37194

A general theory of hybrid problems of fully 3-D compressible potential flow in turbo-rotors. I - Axial flow, stream function formulation p 622 A85-37931

An application of source-panel and vortex methods for aerodynamic solutions of airship configurations
[AIAA PAPER 85-0874] p 624 A85-38789

A second-order approximate method for transonic small-disturbance potential flow and its application to the analysis of flows over airfoils p 625 A85-38922

Multigrid calculation of transonic flow past wing-tail-fuselage combinations p 628 A85-39216

Improvements in transonic airfoil potential flow calculations
[AIAA PAPER 85-1642] p 715 A85-40743

Unsteady transonic full potential solutions for airfoils encountering vortices and gusts
[AIAA PAPER 85-1710] p 719 A85-40782

Finite element analysis for 3-D compressible potential flow in turbomachinery p 728 A85-41818

A discussion on lift and moment characteristics of aerofoils in incompressible potential flows
p 730 A85-42441

Comparison of interactive and Navier Stokes calculations of separating boundary layer flows
p 734 A85-42965

Finite-volume scheme for transonic potential flow about airfoils and bodies in an arbitrarily-shaped channel
p 734 A85-42967

Transonic panel method for the full potential equation applied to multicomponent airfoils
[AIAA PAPER 83-1855] p 816 A85-45704

PAN AIR: A computer program for predicting subsonic or supersonic linear potential flows about arbitrary configurations using a higher order panel method. Volume 3: Case manual (version 1.0)
[NASA-CR-3253] p 13 N85-10922

Comparison of uniform perturbation solutions and numerical solutions for some potential flows past slender bodies
[NASA-CR-172485] p 147 N85-14799

Inviscid compressible flow past a multi-element aerofoil p 236 N85-16776

Numerical approach for the aerodynamic analysis of airfoils with laminar separation
[NASA-CR-172496] p 326 N85-18001

Numerical integration of the unsteady full-potential equation with applications to transonic flow about a two-dimensional airfoil
[NLR-MP-84022-U] p 400 N85-21130

Wind tunnel wall interference
[AD-A151212] p 593 N85-25273

Investigation of potential and viscous flow effects contributing to dynamic stall
[AD-A151696] p 602 N85-25773

A study of aerodynamic control in stalled flight long laminar separation bubble analysis
[AD-A153850] p 638 N85-28930

A first-order time-domain Green's function approach to supersonic unsteady flow
[NASA-CR-172208] p 741 N85-29930

Floating shock-fitting in transonic potential flow calculations p 742 N85-31007

Fuselage upwash effects on RSRA rotor systems
[NASA-CR-177349] p 743 N85-31015

Vortex sheet modeling with higher order curved panels
p 797 N85-31428

Calculation of compressible flow about three-dimensional inlets with auxiliary inlets, slats and vanes by means of a panel method
[NASA-CR-174975] p 876 N85-35162

**POTENTIAL GRADIENTS**

A new approach to apply the potential gradient method for supersonic unsteady airloads
[AIAA PAPER 85-0596] p 469 A85-30325

A supersonic potential gradient method for the calculation of unsteady aerodynamic pressures on harmonically oscillating wings
[DFVLR-FB-85-11] p 744 N85-31026

**POTENTIAL THEORY**

An asymptotic analysis of transonic wind-tunnel interference based on the full potential theory
p 394 A85-30171

A fast, time-accurate unsteady full potential scheme
[AIAA PAPER 85-1512] p 802 A85-40947

Full potential solutions of three-dimensional supersonic flows p 871 A85-49133

Finite element simulation of transonic flows by modified potential and stream function methods
p 871 A85-49149

A comparative study of the nonuniqueness problem of the potential equation
[NASA-TP-2385] p 235 N85-15694

A fast algorithm of the finite difference method for computation of the transonic flow past an arbitrary airfoil with the conservative full-potential equation
p 395 N85-20191

Nonlinear potential analysis techniques for supersonic-hypersonic configuration design
[NASA-CR-166078] p 738 N85-29817

**POWDER (PARTICLES)**

Milling of Si3N4 with Si3N4 hardware
[NASA-TM-86864] p 43 N85-10191

**POWDER METALLURGY**

Introduction of titanium powder metallurgy components to aircraft series production
[MBB-BB-569-84-OE] p 178 A85-16085

Powder metallurgy in aeronautics in 1983
p 435 A85-29855

Modification of titanium powder metallurgy alloy microstructures by strain energizing and rapid omni-directional compaction p 596 A85-35524

The substitution of nickel for cobalt in hot isostatically pressed powder metallurgy UDIMET 700 alloys
p 686 A85-37415

Mechanical properties of advanced titanium powder metallurgy compacts p 783 A85-40250

PM aerospace materials; Proceedings of the International Conference, Bern, Switzerland, November 12-14, 1984. Volumes 1 & 2 p 785 A85-43126

Recent developments and trends in high strength PM materials p 785 A85-43127

Dispersion strengthened nickel for gas turbine applications p 786 A85-43132

Some recent Belgian research works on PM superalloys p 786 A85-43133

Microstructures and properties of HIP, HIP plus forged and extruded P/M superalloy FGH95
p 786 A85-43137

High strength and elevated temperature PM alloy forgings for aerospace applications p 786 A85-43141

Dispersion strengthened aluminum extrusions
p 786 A85-43143

The technology of hot isostatic pressing with reference to silicon nitride p 786 A85-43151

Powder materials and ceramics in aerospace applications - A European perspective
p 787 A85-43153

Modern processes for superclean metal powder production p 795 A85-43154

Screw press forging of powder HIP billet to critical gas turbine discs and wheels p 795 A85-43158

High performance PM alloys - The price of allowing for high stresses in components p 787 A85-43161

Ultrasonic microstructural noise parameters in a powder metal alloy p 905 A85-47381

Development of powder metallurgy 2XXX series Al alloys for high temperature aircraft structural applications
[NASA-CR-172408] p 44 N85-11220

Hot isostatically pressed manufacture of high strength MERL 76 disk and seal shapes
[NASA-CR-165550] p 45 N85-11225

Comparison between the properties of conventional wrought and powder metallurgical alloys for turbine disc applications p 283 N85-15739

Fabrication of ceramic substrate-reinforced and free forms
[NASA-TM-86994] p 518 N85-23926

Mechanisms of corrosion fatigue in high strength I/M (Ingot Metallurgy) and P/M (Powder Metallurgy) aluminum alloys
[AD-A151177] p 597 N85-25478

Preparation of sinteractive silicon nitride powders
[BMFT-FB-T-84-303] p 691 N85-29066

**POWER EFFICIENCY**

An experimental study of the start-up of a gas turbine engine by means of compressed air and an electric starter p 51 A85-11842

Analytical method for determining the volumetric efficiency and power losses resulting from resistance in the inlet and exhaust systems of a piston engine
p 167 A85-16231

Unsteady response of an axial flow compressor to planar temperature transients p 143 A85-18507

The properties of isolated and coupled Savonius rotors p 451 A85-27346

Aircraft preliminary design comparison of advanced compound engines with advanced turbine engines for helicopter applications
[AIAA PAPER 85-1276] p 666 A85-39693

Development trend on aircraft gas turbine engine
p 766 A85-41025

Wind tunnel results of advanced high speed propellers in the takeoff, climb, and landing operating regimes
[AIAA PAPER 85-1259] p 817 A85-47025

Use of braking stages for control of turbine speed
p 371 N85-18215

Estimation of gas turbine engine boost provided by injecting water behind compressor p 509 N85-22838

On power effecient operation of the 2m x 2m transonic wind tunnel at the National Aerospace Laboratory
[NAL-TR-847] p 684 N85-28953

Wind tunnel results of advanced high speed propellers in the takeoff, climb and landing operating regimes
[NASA-TM-87054] p 740 N85-29925

Wingtip vortex propeller
[NASA-CASE-LAR-13013-1] p 892 N85-35194

**POWER FACTOR CONTROLLERS**

Solar powered actuator with continuously variable auxiliary power control
[NASA-CASE-MFS-25637-1] p 454 N85-21789

**POWER GAIN**

The use of grooves in the housings of axial-flow compressors with increased radial clearances
p 350 A85-23999

**POWER SPECTRA**

The perfection and application of the flutter subcritical response analytical method p 573 A85-35748

Power spectral density of subsonic jet noise
p 704 A85-37898

Instabilities and transition in the wall boundary layers of low-disturbance supersonic nozzles
[AIAA PAPER 85-1573] p 712 A85-40697

The buffeting pressure field of a high-aspect-ratio swept wing
[AIAA PAPER 85-1609] p 714 A85-40720

Flight test technique for evaluation of gust load alleviation analysis methodology
[NASA-TM-86344] p 161 N85-14833

**POWERED LIFT AIRCRAFT**

The aerodynamic characteristics of a propulsive wing/canard concept in STOL
[AIAA PAPER 84-2396] p 74 A85-13507

Circulation control technology applied to propulsive high lift systems
[SAE PAPER 841497] p 627 A85-39205

Recent developments in ejector design for V/STOL aircraft
[SAE PAPER 841498] p 663 A85-39206

Fuel conservative guidance for shipboard landing of powered-lift STOL aircraft
[AIAA PAPER 85-1889] p 827 A85-45911

Flight evaluation of highly augmented controls and electronic displays for precision approach and landing of powered-lift aircraft
[AIAA PAPER 85-1944] p 827 A85-45934

Future of V/STOL aircraft systems: A survey of opinions
[NASA-TM-86869] p 654 N85-29937

**PRANDTL-MEYER EXPANSION**

Condensation phenomena in supersonic nozzles
p 393 A85-29989

Analytical solutions for unsteady Prandtl-Meyer flow
p 873 A85-49710

**PRECIPITATION HARDENING**

Progress in the utilization of an oxide-dispersion-strengthened alloy for small engine turbine blades
[SAE PAPER 841512] p 688 A85-39284

**PRECIPITATION PARTICLE MEASUREMENT**

Evaluation of the forward scattering spectrometer probe. I - Electronic and optical studies p 291 A85-22168

**PRECOOLING**

Off-design point characteristics of the precooled gas turbine cycle with liquefied hydrogen as fuel
p 289 A85-20884

**PREDICTION ANALYSIS TECHNIQUES**

Methodology to better predict structural maintenance requirements for individual aircraft
[AIAA PAPER 84-2411] p 69 A85-13517

Evaluation of missile aerodynamic characteristics using rapid prediction techniques p 80 A85-15505

The design of an on-board look-ahead-simulation for approach p 96 A85-15858

Crack growth life-time prediction under aeronautical type loading
[ONERA, TP NO. 1984-113] p 125 A85-15833

Economical influence function calibrations using the distributed loads code — for prediction of store loads in aircraft interference flowfield
[AD-A158490] p 158 A85-18518

An improved version of the LTRAN2 for high frequency domain p 205 A85-19401

SFRJ simulator results - Experiment and analysis in cold flow — Solid Fuel RamJet
[AIAA PAPER 85-0329] p 283 A85-19671

Hypersonic characteristics of an advanced aerospace plane
[AIAA PAPER 85-0346] p 269 A85-19685

Predicting rime ice accretion on airfoils
p 317 A85-25135

Evaluation of cumulative damage models for fatigue crack growth in an aircraft engine alloy
p 433 A85-27095

Multimode instability prediction method
[AIAA PAPER 85-0737] p 523 A85-30370

Evaluation of stochastic similarity criteria for a limited volume of aviation equipment tests p 534 A85-31464

An assessment of the impact of technology on VTOL weight prediction p 495 A85-31974

The effects of surface discontinuities on convective heat transfer in hypersonic flow
[AIAA PAPER 85-0971] p 620 A85-37621

Correlation and prediction of rotating stall inception by divergence method p 629 A85-39245

Predictor laws for pictorial flight displays
p 824 A85-46326

Diagnosing and predicting the technical condition of aviation equipment — Russian book
p 811 A85-46583

Dynamic stall progress in analysis and prediction
[AIAA PAPER 85-1769] p 817 A85-47026

A glance at Soviet helicopter weight trends and a weight-prediction method
[SAWE PAPER 1627] p 883 A85-49925

Recent advances in fatigue crack growth predictions
p 910 A85-50065

Aerodynamics of airfoils subject to 3-dimensional periodic gusts
[AD-A145149] p 10 N85-10016

Automated aircraft icing forecast technique
[AD-A144853] p 57 N85-10571

VORCOR: A computer program for calculating characteristics of wings with edge vortex separation by using a vortex-filament and-core model
[NASA-CR-165902] p 13 N85-10921

Nonlinear structural and life analyses of a turbine blade p 29 N85-10954

Nonlinear structural and life analyses of a combustor liner p 29 N85-10955

Gas side heat transfer: 2-D flow p 30 N85-10965

Life prediction and constitutive behavior: Overview
p 31 N85-10973

Validation of structural analysis methods using the in-house liner cyclic rigs p 33 N85-10987

Estimation of helicopter performance using a program based on blade element analysis
[AD-A146341] p 105 N85-12055

Development of a pavement maintenance management system. Volume 9: Development of airfield pavement performance prediction models
[AD-A146150] p 117 N85-12069

Modeling of propulsive jet plumes—extension of modeling capabilities by utilizing wall curvature effects
[AD-A146262] p 128 N85-12324

Computer programs to predict induced effects of jets exhausting into a crossflow
[NASA-CR-166591] p 146 N85-13776

Parametric estimates of propulsion system maintenance manhours
[AD-A147120] p 201 N85-15662

Experiences with the material bevaviour and high temperature low cycle fatigue life prediction of the IN 738 blading alloy p 292 N85-15746

View of future requirements for engine cyclic durability by analysis and testing p 267 N85-15751

Prediction of cruciform all-movable control characteristics at transonic speeds
[AD-A147291] p 239 N85-16832

Prediction of dynamic stall characteristics using advanced non-linear panel methods
[AD-A148453] p 239 N85-16836

Atmospheric photochemical modeling of turbine engine fuels. Phase 1: Experimental studies. Volume 2: Environmental chamber data tabulations
[AD-A147786] p 300 N85-17470

Synthesized airfoil data method for prediction of dynamic stall and unsteady airloads
[NASA-CR-3672] p 327 N85-18005

Theory of wing rock p 357 N85-18064

Contribution of the study of light aircraft propeller noise
[ESA-TT-865] p 377 N85-18667

Method for the prediction of the installation aerodynamics of a propfan at subsonic speeds
[NASA-CR-3887] p 476 N85-22369

Reliability predictions for military avionics. Royal Signals and Radar Establishment reliability prediction method no. 250
[BR69221] p 505 N85-22388

Advanced life analysis methods. Volume 4: Tabulated test data for attachment lugs
[AD-A151016] p 502 N85-23760

Prediction of vortex-induced loads on wind-tunnel turning vanes
[NASA-TM-86678] p 556 N85-25204

Predictions and measurements of isothermal flowfields in axisymmetric combustor geometries
[NASA-CR-174816] p 671 N85-27887

Improved statistical analysis method for prediction of maximum inlet distortion
[AD-A153757] p 673 N85-28947

Nonlinear potential analysis techniques for supersonic-hypersonic configuration design
[NASA-CR-166078] p 738 N85-29917

Fault detection and accommodation testing on an F100 engine in an F-15 airplane
[NASA-TM-86735] p 773 N85-29962

Vortex sheet modeling with higher order curved panels
p 797 N85-31428

A review and analysis of boundary layer transition data for turbine application p 798 N85-31440

Comments on the prediction of dynamic stall
[GU-AERO-8501] p 875 N85-34125

Development of a mathematical model for predicting the percentage fatigue life increase resulting from shot peened components
[AD-A155774] p 912 N85-35425

PREDICTIONS

Effects of surface chemistry on hot corrosion life: Overview p 32 N85-10980

Prediction of cruciform all-movable control characteristics at transonic speeds
[AD-A147291] p 239 N85-16832

Air traffic management concepts for the UK in the 1990's: A review of recent RSRE work
[AD-A147850] p 246 N85-16853

Prediction accuracy of the torques for rotary tillage by an analog tool
[AD-P004288] p 379 N85-18865

SANDRAG: A computer code for predicting drag of bodies of revolution at zero angle of attack in incompressible flow
[DE85-011170] p 804 N85-30684

PREFORMS

Magnaweave shapes for aircraft - Integrally woven wing sections, stiffened shear panels, and others
p 71 A85-15959

PREMIXED FLAMES

Aerodynamics of premixed flames in flat plate boundary layers p 41 A85-10374

An approximate method for calculating flow in the mixing chambers of bypass engines under conditions of incomplete mixing of gas flows p 350 A85-23989

Combustion efficiency of a premixed continuous flow combustor p 785 A85-42571

Analysis of pressure gradient-velocity correlation in turbulent, premixed flames p 325 N85-17994

PREMIXING

Determination of liquid-fuel prevaporization and premixing in gas-turbine combustion chambers — German thesis p 443 A85-28798

PREPARATION

Preparation of sinteractive silicon nitride powders
[BMFT-FB-T-84-303] p 691 N85-29066

PREPROCESSING

A study of aerodynamic control in stalled flight leading-edge vortex formation analysis
[AD-A153758] p 638 N85-28928

PRESIDENTIAL REPORTS

National aeronautical R and D goals: Technology for America's future p 807 N85-30964

PRESSURE

Analysis of the surface load and radiated sound of a vibrating airfoil with application to the experiment of Brooks
[NASA-CR-3864] p 305 N85-16590

Airspeed sensing pressure valve system
[AD-D011472] p 348 N85-18987

A study of aerodynamic control in stalled flight leading-edge vortex formation analysis
[AD-A153758] p 638 N85-28928

PRESSURE DISTRIBUTION

Pressure distributions around an airfoil placed in a periodically fluctuating air flow. I - A flat plate approximation p 5 A85-10970

The rule of forbidden signals and apparent Mach number in transonic compressor cascades p 5 A85-11632

Computation of unsteady aerodynamic pressure coefficients in a transonic straight cascade
p 79 A85-14893

Role of constraints in inverse design for transonic airfoils p 80 A85-15337

Noniterative cross-flow integration for the pressure-split analysis of subsonic mixing-layer problems
p 145 A85-18897

Subsonic pressure distributions near a wing-fin juncture on a supersonic arrow-wing configuration with wing-mounted vertical fins
[AIAA PAPER 85-0276] p 217 A85-19628

Numerical optimization design of advanced transonic wing configurations
[AIAA PAPER 85-0424] p 248 A85-19739

The response of normal shocks in diffusers
p 313 A85-25150

Surface pressure measurements on a transonic spinning projectile p 392 A85-29303

An improved source model for aircraft interior noise studies
[AIAA PAPER 85-0787] p 537 A85-30389

Pressure distributions on a helicopter swept tip from flight tests and from calculations p 470 A85-30942

Mean velocity and static pressure distributions in a three-dimensional turbulent free jet p 546 A85-35155

An iteration panel method for predicting three dimensional surface pressure distribution of a wing with thickness in the subcritical steady transonic flow
p 549 A85-35749

Transonic pressure distribution computations of a flexible wing p 549 A85-35756

An experimental investigation of flap turbulent heat transfer and pressure characteristics in hypersonic flow
p 550 A85-35773

The solution of transonic flow through three-dimensional turbine blade p 622 A85-37929

The numerical calculation of the pressure distribution of sharp edge slender wings with leading or side edge vortex separation p 625 A85-38966

Results of a wind tunnel/flight test program to compare afterbody/nozzle pressures on a 1/12 scale model and an F-15 aircraft
[SAE PAPER 841543.] p 649 A85-39066

Computational/experimental pressure distributions on a transonic, low-aspect-ratio wing p 628 A85-39210

The flow past two cylinders having different diameters
p 696 A85-39240

Transonic airfoil design based on Navier-Stokes equation to attain arbitrarily specified pressure distribution - An iterative procedure
[AIAA PAPER 85-1592] p 712 A85-40708

Flow past blunt obstacles of circular section placed on a plane boundary p 723 A85-40982

Flow past rectangular cylinder of square [illegible]ction placed on a plane boundary p 72[illegible] A85-41024

Aerodynamic performance of a turbine scroll with a diagonal flow nozzle p 729 A85-41825

Measurement of unsteady pressure distribution on oscillating airfoils in a turbine annular cascade
p 769 A85-41829

Aero/hydrodynamic stability of elastically supported plates in narrow channels with upstream barriers preventing flow redistribution p 794 A85-42564

Computation of velocity and pressure variation across thick turbulent stern flows p 736 A85-42985

Integral equation of lifting surfaces in Laplace domain and analytic continuation of its pressure kernel
[NAL-TR-795T] p 9 N85-10009

A study of aerodynamic characteristics of wing-body combinations. Part 2: Low-wing airplane
[NAL-TR-796] p 9 N85-10010

Pressure distributions measured on research wing M100 mounted on an axisymmetric body p 11 N85-10023

Pressure distributions measured on research wing M86 mounted on an axisymmetric body p 11 N85-10024

Pressure distribution on a swept wing aircraft in flight
p 11 N85-10025

Effect of combined pressure and temperature distortion orientation on high-bypass-ratio turbofan engine stability
[NASA-TM-83771] p 27 N85-10067

Transonic flow analysis for rotors. Part 1: Three-dimensional quasi-steady, full-potential calculation
[NASA-TP-2375-PT-1] p 11 N85-10914

Effect of upstream si[illegible]all boundary layer removal on an airfoil test — conducted in Langley 0.3-m transonic cryogenic tunnel p 83 N85-12019

Performance of two transonic airfoil wind tunnels utilizing limited ventilation p 83 N85-12020

Tunnel constraint for a jet in crossflow
p 84 N85-12027

Investigations of boundary layers in the Emmen Federal Aircraft works transonic tunnel, Switzerland
[FW-FO-1641] p 88 N85-12877

Flight and wind-tunnel comparisons of the inlet-airframe interaction of the F-15 airplane
[NASA-TP-2374] p 105 N85-12884

Static internal performance of single-expansion-ramp nozzles with various combinations of internal geometric parameters
[NASA-TM-86270] p 147 N85-14797

A theoretical design method for 3-dimensional transonic wings
[NAL-TR-830] p 161 N85-14834

Analysis of the flow field about a T-45 using PANAIR
[AD-A146811] p 236 N85-15699

Some important problems in unsteady boundary layers including separation. 2: Unsteady boundary layers close to the stagnation region of slender bodies
[AD-A146964] p 294 N85-16069

Analysis of the surface load and radiated sound of a vibrating airfoil with application to the experiment of Brooks
[NASA-CR-3864] p 305 N85-16590

An improved source model for aircraft interior noise studies
[NASA-CR-172517] p 305 N85-17668

Can the singularity be removed in time-dependent flows?
[AD-P004165] p 324 N85-17950

Detailed pressure distribution measurements obtained on several configurations of an aspect-ratio-7 variable twist wing
[NASA-TM-86308] p 314 N85-18950

Transonic pressure distribution computations of a flexible wing p 396 N85-20213

Measured unsteady transonic aerodynamic characteristics of an elastic supercritical wing with an oscillating control surface
[NASA-TM-86376] p 398 N85-21116

An experimental investigation of flap turbulent heat transfer and pressure characteristics in hypersonic flow
p 400 N85-21426

Recent transonic unsteady pressure measurements at the NASA Langley Research Center
[NASA-TM-86408] p 479 N85-23710

The influence of transition strips on the pressure distribution on transonic profiles p 480 N85-23718

Problems of elastic hydrodynamic lubrication of helicopter transmission gears p 521 N85-23784

Transonic pressure distributions on a two-dimensional 0012 and supercritical MBB-A3 profile oscillating in heave and pitch p 554 N85-25173

Mathematical modeling of the AEDC (Arnold Engineering Development Center) propulsion wind tunnel (16T)
[AD-A151293] p 593 N85-25275

Investigation to optimize the passive shock wave/boundary layer control for supercritical airfoil drag reduction
[NASA-CR-175788] p 559 N85-26665

Aerodynamic research in preparation for a new Dutch transport aircraft with supercritical wings
[B8580077] p 636 N85-27836

Proceedings of the 9th US Air Force and the Federal Republic of Germany Data Exchange Agreement Meeting. Viscous and Interacting Flow Field Effects
[AD-A153020] p 699 N85-28266

Pressure distribution data from tests of 2.29 M (7.5 feet) span EET high-lift transport aircraft model in the Ames 12-foot pressure tunnel
[NASA-TM-84517] p 709 N85-29912

An experimental investigation of propfan installations on an upswept supercritical wing at transonic Mach numbers
[NASA-CR-172605] p 742 N85-31013

Calculation of flow around the SF 310 airplane using a full potential equation method
[FFA-TN-1984-63] p 744 N85-31022

Data set 8: ZKP wing, oscillating aileron
p 744 N85-31029

Generation by conformal mappings of aerofoil sections and of certain other simple shapes suitable for both aerodynamic and stress-concentration problems
[AD-A154901] p 819 N85-33112

PRESSURE DRAG

Theoretical study of blockage effect of wind-tunnel wall on wake of two-dimensional flat plate normal to plane wall p 272 A85-19402

Experimental investigation of blockage effect of upper wall of wind-tunnel of wake of two-dimensional flat plate normal to plane boundary p 272 A85-19403

PRESSURE DROP

Total pressure loss in vortical solutions of the conical Euler equations
[AIAA PAPER 85-1701] p 718 A85-40777

An experimental investigation of pressure losses in cooling air supply system for gas turbine rotor
p 769 A85-41808

Heat transfer and pressure drop in blade cooling channels with turbulence promoters
[NASA-CR-3837] p 128 N85-12315

**PRESSURE EFFECTS**
Experimental study of Mach reflection of weak shock waves p 124 A85-14888
Unsteady response of an axial flow compressor to planar temperature transients p 143 A85-18507
A linearly correcting method of deviation function for considering the influence of pressure on the thermodynamic properties of combustion gas
p 304 A85-20236
Tests of wall suction and blowing in highly offset diffusers p 385 A85-26751
Effect of ambient pressure on nozzle centerline flow properties p 548 A85-35146
Structural analysis of the CL-600 rear pressure bulkhead, using NASTRAN nonlinear analysis capabilities (Solution 64) p 754 A85-40459
Average force acting on a small sphere in a traveling-wave field in a viscous fluid
p 805 A85-41646

**PRESSURE GRADIENTS**
A class of airfoils having finite trailing edge pressure gradients
[AIAA PAPER 85-0206] p 215 A85-19590
An experimental study of pressure fluctuations in flow around a sphere p 460 A85-29005
Drag reduction due to boundary-layer control by combined blowing and suction p 237 N85-16785
Analysis of pressure gradient-velocity correlation in turbulent, premixed flames p 325 N85-17994
Wind tunnel wall interference
[AD-A151212] p 593 N85-25273
A design procedure to modify the trailing edge upper surface pressure gradient of a given aerofoil
[GU-AERO-8408] p 874 N85-34120

**PRESSURE MEASUREMENT**
A rivet hole sensor for measuring airplane fuselage acoustic pressures
[AIAA PAPER 84-2350] p 47 A85-10886
Unsteady surface pressure measurements on a pitching airfoil
[AIAA PAPER 85-0532] p 387 A85-27878
An experimental study of pressure fluctuations in flow around a sphere p 460 A85-29005
Pressure measurement system for the National Transonic Facility p 445 A85-29568
Experimental investigation of losses and secondary flow in an axial compressor stage p 524 A85-31007
Theoretical determination of pressure coefficient Cp on double wedged delta wing and its agreement with experimental results p 552 A85-36340
Pitot pressure and heat transfer measurements in hydrazine thruster plumes
[AIAA PAPER 85-0934] p 685 A85-37599
Approximate relationships for determining pressure at the surface of a sphere or a cylinder for arbitrary free-stream Mach numbers p 624 A85-38563
Time resolved measurements of a turbine rotor stationary tip casing pressure and heat transfer field
[AIAA PAPER 85-1220] p 666 A85-39663
Velocity characteristics of the wakes of in-cylinder projectiles
[AIAA PAPER 85-1676] p 716 A85-40764
Measurement of unsteady pressure distribution on oscillating airfoils in a turbine annular cascade
p 769 A85-41829
Inlet and airframe compatibility for a V/STOL fighter/attack aircraft with top-mounted inlets
[NASA-TM-84252] p 10 N85-10015
Pressure distributions measured on research wing M100 mounted on an axisymmetric body p 11 N85-10023
Pressure distributions measured on research wing M86 mounted on an axisymmetric body p 11 N85-10024
Wind tunnel wall interference correction for aircraft models p 84 N85-12029
Adaptation of a four-wall interference assessment/correction procedure for airfoil tests in the 0.3-m TCT p 85 N85-12035
Unsteady pressure measurements on a biconvex airfoil in a transonic oscillating cascade
[NASA-TM-86914] p 234 N85-15689
Flow quality of NAL 2-dimensional transonic wind tunnel. Part 2: Extensive and systematic pressure fluctuations study in the settling chamber, test section and second throat of the NAL 2-D transonic wind tunnel
[NAL-TR-836-PT2] p 360 N85-18066
Detailed pressure distribution measurements obtained on several configurations of an aspect-ratio-7 variable twist wing
[NASA-TM-86308] p 314 N85-18950
Unsteady transonic pressure measurements on a semispan wind-tunnel model of a transport-type supercritical wing (Lann model). Part 2: Pressure distributions (plotted) and plots of the vibration modes
[AD-A130488] p 330 N85-18965
Unsteady transonic pressure measurements on a semi-span wind-tunnel model of a transport-type supercritical wing (Lann model). Part 2: Pressure distributions (plotted) and plots of the vibration modes
[AD-A130488] p 449 N85-21579
Recent transonic unsteady pressure measurements at the NASA Langley Research Center
[NASA-TM-86408] p 479 N85-23710
Analysis of unsteady pressure measurements on a supercritical airfoil with a harmonically oscillating trailing edge flap at subsonic and transonic speeds
[DFVLR-FB-84-49] p 636 N85-27837
Measurement of turbofan-turbojet thrust from tailpipe static pressure
[AD-A154036] p 774 N85-29967

**PRESSURE OSCILLATIONS**
An experimental investigation on response of turbojet engine to the turbulence-type of dynamic inlet distortion
p 27 A85-12365
Surface pressure fluctuations in a three-dimensional shock wave/turbulent boundary layer interaction
[AIAA PAPER 85-0125] p 211 A85-19536
Response of a supersonic inlet to downstream perturbations p 386 A85-27093
The effect of freestream turbulence on pressure fluctuations in transonic flow p 545 A85-34998
Dynamic pressure fluctuations in the internozzle region of a twin-jet nacelle
[SAE PAPER 841540] p 627 A85-39064
Effects of inlet pressure fluctuations on axial flow compressors - Some experimental and theoretical results
[AIAA PAPER 85-1135] p 696 A85-39619
State of the art and research needs of pulsating combustion
[ASME PAPER 84-WA/NCA-19] p 690 A85-39913
Surface pressure fluctuations in a three-dimensional shock wave/turbulent boundary layer interaction at various shock strengths
[AIAA PAPER 85-1562] p 711 A85-40687
The buffeting pressure field of a high-aspect-ratio swept wing
[AIAA PAPER 85-1609] p 714 A85-40720
An experimental investigation of combustion pressure oscillations in solid fuel ramjets
[AD-A144870] p 43 N85-10147
Pressure oscillations in liquid-fueled ramjet engines
p 169 N85-13797
Effect of jet exit vanes on flow pulsations in an open-jet wind tunnel
[NASA-TM-86299] p 326 N85-17999
Turbulent bouyant flow and pressure variations around a circular cylinder in a cross uniform flow near the ground p 371 N85-18287
Measured unsteady transonic aerodynamic characteristics of an elastic supercritical wing with an oscillating control surface
[NASA-TM-86376] p 398 N85-21116
Transonic pressure distributions on a two-dimensional 0012 and supercritical MBB-A3 profile oscillating in heave and pitch p 554 N85-25173

**PRESSURE PULSES**
An experimental investigation of an unsteady combusting flow in a pulse combustor
[AIAA PAPER 85-0322] p 281 A85-20865

**PRESSURE RATIO**
A straight cascade wind-tunnel study of fan blade flutter in started supersonic flow
[ONERA, TP NO. 1984-117] p 125 A85-15837
High pressure compressor component performance report
[NASA-CR-168245] p 891 N85-34138

**PRESSURE REDUCTION**
Loss of cabin pressure in Canadian Forces ejection seat aircraft, 1962-1982 p 148 A85-16819
Preliminary investigation of labyrinth packing pressure drops at onset of swirl-induced rotor instability
p 187 N85-14132

**PRESSURE SENSORS**
A rivet hole sensor for measuring airplane fuselage acoustic pressures
[AIAA PAPER 84-2350] p 47 A85-10886
Optimizing the use of surface sensors for wind shear detection p 181 A85-16242
A sensor for detection of unsteady distortion maxima in air intakes
[ONERA, TP NO. 1984-148] p 205 A85-19262
Aero-optics experimental techniques
[AD-A146755] p 294 N85-16067
Ultrasound instrumentation for the 7 inch Mach seven tunnel
[NASA-CR-174277] p 305 N85-16586

**PRESSURE VESSELS**
Pressure measurement system for the National Transonic Facility p 445 A85-29568

**PRESSURIZED CABINS**
Loss of cabin pressure in Canadian Forces ejection seat aircraft, 1962-1982 p 148 A85-16819
Crack propagation analysis of longitudinal skin cracks in a pressurized cabin p 645 A85-37188
Aircraft cabin pressurization control system tester
[AD-D011225] p 38 N85-10081

**PRESTRESSING**
Pretwist and shear flexibility in the vibrations of turbine blades p 657 A85-37233

**PREVAPORIZATION**
Determination of liquid-fuel prevaporization and premixing in gas-turbine combustion chambers — German thesis p 443 A85-28798
Effects of heterogeneity of mixtures on gaseous emissions in premixed/prevaporized combustion
p 793 A85-41800

**PRIMARY COSMIC RAYS**
Ultra high energy events in ECHOS series and primary energy spectrum
[HE-3.7-9] p 920 N85-35966

**PRIMERS (COATINGS)**
Results of tests of weathered K5NA closeout material in the MSFC Hot Gas Facility
[NASA-CR-170893] p 902 N85-35239

**PRINCIPAL COMPONENTS ANALYSIS**
Composite statistical method for modeling wind gusts for aircraft simulation
[AIAA PAPER 85-1750] p 799 A85-40562

**PROBABILITY DENSITY FUNCTIONS**
Guaranteed reliability estimates for various amounts of information on the primary factors p 854 A85-44860

**PROBABILITY DISTRIBUTION FUNCTIONS**
Validation of procedures for reliability evaluation and confirmation p 854 A85-44858
Using the Rice distribution in evaluating the reliability of structures p 854 A85-44861

**PROBABILITY THEORY**
Reliability in probabilistic design p 50 A85-11755
Optimal probabilistic design of the structures of flight vehicles p 183 A85-17063
Calculation of the probabilistic characteristics of nonlinear control systems using a trigonometric version of the factorial interpolation method p 192 A85-17065
Fatigue reliability of gas turbine engine components under scheduled inspection maintenance
p 507 A85-32589
A method of estimating the probability of vertical overlap using observed height data p 749 A85-40986
Estimation of the threshold in fatigue crack initiation models: A Bayesian approach
[AD-A144847] p 54 N85-10410

**PROBLEM SOLVING**
Automatic adaptive grid refinement for the Euler equations p 391 A85-29087
Situational interactive micro/graphic simulator system for improving maintenance performance
[AD-A146677] p 177 N85-14846
A conformal mapping suitable for problems involving interaction between given geometries and known far fields
[AD-A149050] p 376 N85-19744
Robust Kalman filtering and its applications
[AD-A149044] p 376 N85-19775
Finite-difference computations of rotor loads
[NASA-TM-86682] p 560 N85-26669
Floating shock-fitting in transonic potential flow calculations p 742 N85-31007

**PROCEDURES**
Guide for the execution of reliability tests in the laboratory — aeronautical equipment p 608 N85-27237

**PROCESS CONTROL (INDUSTRY)**
Annual Airline Plating and Metal Finishing Forum, 19th, San Antonio, TX, March 7-10, 1983, Proceedings
p 123 A85-14126

**PROCUREMENT MANAGEMENT**
Weight control - A procurement agency perspective
[SAWE PAPER 1594] p 919 A85-49914

**PRODUCT DEVELOPMENT**
Flexibility for the next century - P3I and B-1B — Preplanned Product Improvement
[AIAA PAPER 84-2415] p 98 A85-13520
Development tools - Case study for large systems — of digital avionics

CAD/CAM integration - The imperatives
p 185 A85-18439
Fully-automatic flexible manufacturing cell for turbine blades p 367 A85-24647
Optimization of queuing disciplines in multiphase closed queuing systems p 534 A85-31463
AH-64A production line Automatic Test Equipment
p 465 A85-31979
Factory automation for composite structures manufacturing p 526 A85-33007
Methods for the assembly of aircraft structures — Russian book p 616 A85-38641
Activities report of the Department of Engineering
p 127 N85-12202
Full-scale testing, production and cost analysis data for the advanced composite stabilizer for Boeing 737 aircraft. Volume 1: Technical summary
[NASA-CR-3649] p 179 N85-13912
Full-scale testing, production and cost analysis data for the advanced composite stabilizer for Boeing 737 aircraft, volume 2
[NASA-CR-166012] p 179 N85-13915
USSR report: Engineering and equipment
[JPRS-UEQ-84-007] p 188 N85-14954
Integral profile method for production of carbon fiber sheets
[MBB/LFA34/CFK/PUB/006] p 690 N85-27975
Automated maintenance system test program increment VI production scheduling
[AD-A153694] p 706 N85-29838
The evolution of the U.S. helicopter industry
[AD-A154290] p 709 N85-29913
Cost and schedule implications of multinational coproduction
[AD-A154358] p 807 N85-30969
Automated fabrication of composite structures for helicopters
[SNIAS-851-210-104] p 761 N85-31049

**PRODUCTION MANAGEMENT**
Design-To-Cost (DTC) methodology to achieve affordable avionics p 578 N85-25645

**PRODUCTION PLANNING**
Increase in the economy of design and process planning by integrated and graphic data processing, phase 2 — aircraft design
[BMFT-FB-W-84-028] p 196 N85-14589
Riga Institute seeking faster introduction of new technology p 468 N85-23698

**PRODUCTIVITY**
Modernization in aerospace — productivity and quality improvement p 709 A85-43190
Future robotics program at San Antonio ALC (Air Logistics Center)
[AD-P004011] p 127 N85-11991
Flexible manufacturing system for the production of aircraft parts
[BLL-PNR-90237-(8019.3153)] p 297 N85-17159

**PROFILES**
Influence of normalized frequency on time-dependent aerodynamic characteristics of vane blading profiles
p 370 N85-18204

**PROFILOMETERS**
Evaluation of laser profile and deflection measuring system
[FAA-PM-84-24] p 55 N85-11341

**PROGRAM VERIFICATION (COMPUTERS)**
Flight critical system design guidelines and validation methods
[AIAA PAPER 84-2451] p 113 A85-13548
Automated benchmark generation based upon a specification language
[AIAA PAPER 84-2667] p 194 A85-17849
Writing executable assertions to test flight software
[SU-CRC-TR-84-14] p 301 A85-21973
Turbofan-engine nonrecoverable stall computer-simulation development and validation
[AIAA PAPER 85-1432] p 765 A85-40840
The use of a simulated multifunction keyboard (SMFK) in MFK software development projects
p 859 A85-45101
Investigating version dependence in fault-tolerant software p 302 N85-16749
Software test handbook: Software test guidebook, volume 2
[AD-A147289] p 303 N85-17578

**PROGRAMMING (SCHEDULING)**
Computer assisted flight schedule optimization
[AD-A151689] p 611 N85-27623

**PROGRAMMING LANGUAGES**
Automated benchmark generation based upon a specification language
[AIAA PAPER 84-2667] p 194 A85-17849
Automatic ATLAS program generator (AAPG) for the advanced electronic warfare test set
p 456 A85-26817
Atlas avionics automatic resource allocation - A statement and solution of the problem
p 456 A85-26832
Summer Computer Simulation Conference, 15th, Vancouver, Canada, July 11-13, 1983, Proceedings. Volumes 1 & 2 p 457 A85-28601
Control system design language implementation of a gas turbine starting controller
[AD-A147896] p 266 N85-15732
IPAD: Integrated Programs for Aerospace-vehicle Design
[NASA-CR-3890] p 610 N85-26221
Graphic simulation of a machine-repairman model
[AD-A151761] p 543 N85-26633

**PROJECT MANAGEMENT**
Integration of MSG-3 into airline operation
[SAE PAPER 841483] p 312 A85-25978
MSG-3 - A method for maintenance program planning
[SAE PAPER 841485] p 312 A85-25979
The automated KC-135R test program
p 413 A85-28636
ACEE program rationale and implementation
[NASA-TM-84549] p 2 N85-10908
Life prediction and constitutive behavior: Overview
p 31 N85-10973
Research and technology
[NASA-TM-86321] p 67 N85-11973
National airspace review enhancement plan, revision 3
[AD-A150743] p 248 N85-16852
Technical services at NLR
[B8561898] p 705 N85-28871
The development of complex systems
p 807 N85-32021

**PROJECT PLANNING**
Flight test planning from the bottom up - An alternate approach to flight testing p 571 A85-34262
High Endurance Lighter Than Air (HELTA) Program
[AIAA PAPER 85-0861] p 640 A85-38779
Enhanced terrain masked penetration program
p 832 A85-44991
AGARD bulletin technical programme, 1985
[AGARD-BUL-84-2] p 67 N85-11971
The 1985 long-range program plan
[NASA-TM-87464] p 612 N85-26440
National Airspace System Plan: Facilities, equipment and associated development p 569 N85-26692

**PROJECTILES**
The aerodynamic drag characteristics of the Lochkegelleitwerk p 75 A85-13698
The shock wave from a supersonic projectile
p 319 A85-25467
Measurements of despin and yawing moments produced by a viscous liquid p 423 A85-26447
A relation between liquid roll moment and liquid side moment p 423 A85-26449
Surface pressure measurements on a transonic spinning projectile p 392 A85-29303
The evaluation of aerodynamic coefficients for projectiles fired from a hovering helicopter
p 618 A85-37203
Velocity characteristics of the wakes of in-cylinder projectiles
[AIAA PAPER 85-1676] p 716 A85-40764
Projectile aerodynamics prediction with CSCM-S upwind implicit relaxation algorithm
[AIAA PAPER 85-1838] p 814 A85-43874
The aerodynamics of some guided projectiles
[NASA-TM-86334] p 138 N85-14788
Hypothetical zero yaw drag trajectory of spinning projectiles between M = 5 and M = 10
[AD-A148899] p 329 N85-18963

**PROJECTORS**
Air combat visual simulation using a head slaved projector
[AD-P004327] p 359 N85-17981

**PROLATE SPHEROIDS**
Flow characteristics of a body of revolution at incidence p 737 A85-42986

**PROP-FAN TECHNOLOGY**
Noise of counter-rotation propellers
[AIAA PAPER 84-2305] p 60 A85-10856
Dynamic behavior of a propfan
[ONERA, TP NO. 1984-122] p 111 A85-15842
Design and experimental evaluation of propfan inlets
[SAE PAPER 841477] p 352 A85-25976
Is the unducted fan tomorrow's subsonic engine?
p 507 A85-32945
Will propfans require gearboxes? p 507 A85-32946
Engine inlet interaction with a prop-fan propulsion system
[SAE PAPER 841478] p 627 A85-39058
Noise of counter-rotation propellers
p 705 A85-39220
Advanced single-rotation propfan drive system
p 663 A85-39577
Drive system development for Propfan Test Assessment Program
[AIAA PAPER 85-1188] p 664 A85-39646
Future prop-fans - Tractor or pusher
[AIAA PAPER 85-1189] p 664 A85-39647
Design considerations for transport aircraft with modern propeller propulsion
[DGLR PAPER 84-083] p 753 A85-40303
Benefits of blade sweep for advanced turboprops
[AIAA PAPER 85-1260] p 767 A85-41420
The economicality of equipping aircraft with gas turbine-propeller propulsion — German thesis
p 826 A85-45525
Large-scale advanced propfan (LAP) program progress report
[AIAA PAPER 85-1187] p 836 A85-47021
Large-scale Advanced Propfan (LAP) performance, acoustic and weight estimation, January, 1984
[NASA-CR-174782] p 476 N85-22368
Large-scale Advanced Propfan (LAP) program
[NASA-TM-87067] p 774 N85-29964

**PROPAGATION MODES**
An acoustic mode measurement technique
[AIAA PAPER 84-2337] p 62 A85-10879
Turbofan noise generation. Volume 2: Computer programs
[NASA-CR-167952] p 65 N85-11791

**PROPAGATION VELOCITY**
Effect of residual stresses on crack growth from a hole p 124 A85-15339
Crack growth retardation and acceleration models
p 126 A85-15862

**PROPANE**
Propellant options for long duration, high altitude unmanned aircraft
[AIAA PAPER 85-1326] p 689 A85-39727

**PROPELLANT CHEMISTRY**
A chromatographic method for determining the content of aromatic hydrocarbons in aviation gasolines
p 434 A85-28035

**PROPELLANT PROPERTIES**
Propellant options for long duration, high altitude unmanned aircraft
[AIAA PAPER 85-1326] p 689 A85-39727
**PROPELLER BLADES**
The unified acoustic and aerodynamic prediction theory of advanced propellers in the time domain
[AIAA PAPER 84-2303] p 60 A85-10854
Vibration response and sound radiation from beams, plates, and cylinders excited by nonhomogeneous random pressure fields
[AIAA PAPER 84-2327] p 61 A85-10871
Application of active noise control to model propeller noise
[AIAA PAPER 84-2344] p 62 A85-10883
Predicted changes in advanced turboprop noise with shaft angle of attack
[AIAA PAPER 84-2347] p 63 A85-10884
Investigation of the axial velocities induced along rotating blades by trailing helical vortices p 75 A85-13678
Dynamic behavior of a propfan
[ONERA, TP NO. 1984-122] p 111 A85-15842
Interaction of a turbulent vortex with a lifting surface
[AIAA PAPER 85-0004] p 206 A85-19452
Calculation of steady flow about propellers by means of a surface panel method
[AIAA PAPER 85-0283] p 218 A85-19634
A Navier-Stokes calculation of 3-D, turbulent flow near a propeller in a shear flow
[AIAA PAPER 85-0365] p 220 A85-19698
Propellers for the future p 353 A85-26275
Observations of tip vortex cavitation inception from a model marine propeller p 526 A85-33220
A numerical calculation of propeller performance at static condition and its comparison with experiment
p 724 A85-41012
Predicted changes in advanced turboprop noise with shaft angle of attack p 836 A85-45861
Large-scale advanced propfan (LAP) program progress report
[AIAA PAPER 85-1187] p 836 A85-47021
Aerodynamic models for propellers for fast aircraft
[ONERA, TP NO. 1985-55] p 868 A85-47301
Noise constraints affecting optimal propeller designs
[SAE PAPER 850871] p 874 A85-50106
Manufacture of composite propeller blades for commuter aircraft
[SAE PAPER 850875] p 910 A85-50108
Profile design for wings and propellers
[NASA-TM-77785] p 328 N85-18953
Noise constraints affecting optimal propeller designs
[NASA-TM-86967] p 394 N85-19923
Determination of aerodynamic and propulsion parameters of general aviation aircraft using steady state flight test data p 499 N85-22377
Interaction of a turbulent vortex with a lifting surface
p 557 N85-25214
Low-speed wind-tunnel tests of an advanced eight-bladed propeller
[NASA-TM-86364] p 740 N85-29928
Large-scale Advanced Propfan (LAP) program
[NASA-TM-87067] p 774 N85-29964
Effects of propeller rotation direction on airplane interior noise levels
[NASA-TP-2444] p 805 N85-30767
Impulsive noise due to transonic blade-vortex interactions p 806 N85-31913
Two-plane balance and slip-ring design
p 856 N85-33536
Optimally designed propellers constrained by noise
p 892 N85-35196
**PROPELLER DRIVE**
Finite element modelling of acoustic singularities with application to near and far field propeller noise
[AIAA PAPER 84-2286] p 59 A85-10842
Propagation of propeller tone noise through a fuselage boundary layer p 197 A85-18514
The unambiguous in-flight determination of propeller rotational noise in aircraft with four-cycle combustion engines p 304 A85-20650
Advanced single-rotation propfan drive system
p 663 A85-39577
Drive system development for Propfan Test Assessment Program
[AIAA PAPER 85-1188] p 664 A85-39646
**PROPELLER EFFICIENCY**
Determination of aircraft propulsive efficiency and drag using steady state measurements and Lock's propeller model
[AIAA PAPER 84-2500] p 109 A85-13571
Compressible lifting surface theory for propeller performance calculation p 143 A85-18508
Analytical determination of propeller performance degradation due to ice accretion
[AIAA PAPER 85-0339] p 264 A85-20867
Five years experience with minimum induced loss propellers. II - Applications
[SAE PAPER 840027] p 322 A85-26311
Drive system development for Propfan Test Assessment Program
[AIAA PAPER 85-1188] p 664 A85-39646
Future prop-fans - Tractor or pusher
[AIAA PAPER 85-1189] p 664 A85-39647
Effect of a wing-tip mounted pusher turboprop on the aerodynamic characteristics of a semi-span wing
[AIAA PAPER 85-1286] p 631 A85-39700
Aerodynamic characteristics of swept propellers
p 723 A85-40981
Large-scale advanced propfan (LAP) program progress report
[AIAA PAPER 85-1187] p 836 A85-47021
The analysis of counter-rotating propeller systems
[SAE PAPER 850869] p 873 A85-50104
Propulsive efficiency and aircraft drag determined from steady state flight test data
[SAE PAPER 850872] p 885 A85-50107
Welcome to the Saclay Propeller Testing Center
[NASA-TM-77648] p 511 N85-23799
Large-scale Advanced Propfan (LAP) program
[NASA-TM-87067] p 774 N85-29964
Optimally designed propellers constrained by noise
p 892 N85-35196
**PROPELLER FANS**
Near-field frequency-domain theory for propeller noise
p 460 A85-29079
Evaluation of interior noise control treatments for advanced turboprop aircraft p 573 A85-35588
Advanced single-rotation propfan drive system
p 663 A85-39577
Wind tunnel results of advanced high speed propellers in the takeoff, climb, and landing operating regimes
[AIAA PAPER 85-1259] p 817 A85-47025
Large-scale Advanced Propfan (LAP) performance, acoustic and weight estimation, January, 1984
[NASA-CR-174782] p 476 N85-22368
Wind tunnel results of advanced high speed propellers in the takeoff, climb and landing operating regimes
[NASA-TM-87054] p 740 N85-29925
**PROPELLER SLIPSTREAMS**
Euler equation simulation of propeller-wing interaction in transonic flow p 6 A85-11977
On the modelling of a fully-relaxed propeller slipstream
[AIAA PAPER 85-1262] p 630 A85-39685
A numerical calculation of propeller performance at static condition and its comparison with experiment
p 724 A85-41012
Studies on the interference of wings and propeller slipstreams
[NASA-CR-175753] p 557 N85-25210
**PROPELLERS**
Review of recent research of interior noise of propeller aircraft
[AIAA PAPER 84-2349] p 17 A85-10885
Propeller noise measurements in DNW on the fuselage of a twin engine aircraft model — German-Dutch wind tunnel
[AIAA PAPER 84-2367] p 17 A85-10897
Aerodynamic methods used in France for the study of propellers for high-speed aircraft
[ONERA, TP NO. 1984-120] p 81 A85-15840
Modern propeller profiles
[ONERA, TP NO. 1984-121] p 81 A85-15841
Modelling of wind tunnel wall effects on the radiation characteristics of acoustic sources
[AIAA PAPER 84-2364] p 197 A85-16104
Five years experience with minimum induced loss propellers. I - Theory
[SAE PAPER 840026] p 322 A85-26310
Model tests of phase-locked propeller installations
[AIAA PAPER 85-0001] p 353 A85-26316
Noise testing of an advanced design propeller in the Boeing transonic wind tunnel with and without test section acoustic treatment
[AIAA PAPER 84-2368] p 377 A85-26320
A theorem on swirl loss in propeller wakes
p 392 A85-29265
Noise testing of an advanced design propeller in the Boeing anechoic test chamber with a relative velocity free jet
[AIAA PAPER 84-2262] p 421 A85-30193
An aerodynamic theory based on time-domain aeroacoustics p 546 A85-35135
A review of some recent U.K. propeller developments
[AIAA PAPER 85-1261] p 666 A85-39684
Are propellers coming back - and when?
p 764 A85-40070
Design considerations for transport aircraft with modern propeller propulsion
[DGLR PAPER 84-083] p 753 A85-40303
Flow simulations using Euler equations for nacelle-propeller configurations in a wind tunnel environment
[AIAA PAPER 85-1678] p 716 A85-40765
Aerodynamic characteristics of swept propellers
p 723 A85-40981
Propeller aerodynamic performance by vortex-lattice method p 731 A85-42927
Inviscid analysis of advanced turboprop propeller flow fields
[AIAA PAPER 85-1263] p 814 A85-43977
Noise testing of an advanced design propeller in a wind tunnel p 836 A85-45862
Advanced design propeller noise testing in an anechoic chamber p 836 A85-45869
Wind tunnel results of advanced high speed propellers in the takeoff, climb, and landing operating regimes
[AIAA PAPER 85-1259] p 817 A85-47025
Laser velocimeter measurements of the flow fields around single- and counter-rotation propeller models
[SAE PAPER 850870] p 873 A85-50105
Analysis of noise measured from a propeller in a wake
[NASA-TP-2358] p 65 N85-11788
Evaluation of the Langley 4- by 7-meter tunnel for propeller noise measurements
[NASA-TM-85721] p 136 N85-13553
Contribution of the study of light aircraft propeller noise
[ESA-TT-865] p 377 N85-18667
Propeller propulsion system integration: State of technology survey
[NASA-CR-3882] p 398 N85-21119
Towards a renewal of the propeller in aeronautics
[NASA-TM-77803] p 422 N85-21169
Further comparison of wind tunnel and airplane acoustic data for advanced design high speed propeller models
[NASA-TM-86935] p 460 N85-22108
Method for the prediction of the installation aerodynamics of a propfan at subsonic speeds
[NASA-CR-3887] p 476 N85-22369
Wind tunnel acoustic study of a propeller installed behind an airplane empennage: Data report
[NASA-CR-177335] p 536 N85-23377
Wind tunnel results of advanced high speed propellers in the takeoff, climb and landing operating regimes
[NASA-TM-87054] p 740 N85-29925
An experimental investigation of propfan installations on an upswept supercritical wing at transonic Mach numbers
[NASA-CR-172905] p 742 N85-31013
Wingtip vortex propeller
[NASA-CASE-LAR-13019-1] p 892 N85-35194
**PROPORTIONAL CONTROL**
Line-of-sight reconstruction for faster homing guidance
p 153 A85-18326
The general class of optimal proportional navigation
p 153 A85-18346
An Optimal, Proportional-plus-Integral/Tracking control law for aircraft applications p 513 A85-33282
**PROPULSION**
Energy efficient engine. Volume 1: Component development and integration program
[NASA-CR-173084] p 34 N85-10992
Report of the Department of Aerospace Engineering
p 71 N85-11977
Future directions in aeropropulsion technology
[NASA-TM-87010] p 467 N85-23685
Heat transfer in aeropropulsion systems
[NASA-TM-87066] p 798 N85-31444
R and D programmes at the National Aeronautical Laboratory
[AR-22] p 807 N85-32022
**PROPULSION SYSTEM CONFIGURATIONS**
Comment on 'PAN AIR applications to aero-propulsion integration' p 6 A85-11990
Design development and optimization criteria considerations for a tandem fan medium speed V/STOL propulsion concept
[AIAA PAPER 84-2395] p 107 A85-13506
Propulsion technology projections for commercial aircraft
[AIAA PAPER 84-2446] p 108 A85-13536
Near-term application of modern propulsion technology to a tactical transport
[AIAA PAPER 84-2506] p 109 A85-13576
UDF - GE dares to differ — UnDucted Fan
p 167 A85-16270
Influence of propulsion/mission profile combinations upon generic missile penetration of a hypothetical defense
[AIAA PAPER 85-0495] p 249 A85-19789
Powerplants for long-duration unmanned aircraft
p 420 A85-27094
Review - Computational methods for internal flows with emphasis on turbomachinery p 392 A85-29126

Advances in aerospace propulsion; Proceedings of the Aerospace Congress and Exposition, Long Beach, CA, October 15-18, 1984
[SAE SP-594] p 659 A85-39057
Engine inlet interaction with a prop-fan propulsion system
[SAE PAPER 841478] p 627 A85-39058
Aerodynamic test results for a wing-mounted turboprop propulsion installation
[SAE PAPER 841480] p 627 A85-39060
Results of a wind tunnel/flight test program to compare afterbody/nozzle pressures on a 1/12 scale model and an F-15 aircraft
[SAE PAPER 841543.] p 649 A85-39066
Model test results of the split-fan cross-ducted propulsion system concept for medium speed V/STOL aircraft
[SAE PAPER 841495] p 663 A85-39203
Series flow tandem fan - A high-speed V/STOL propulsion concept
[SAE PAPER 841496] p 650 A85-39204
Future prop-fans - Tractor or pusher
[AIAA PAPER 85-1189] p 664 A85-39647
Supportability considerations for advanced engine development
[AIAA PAPER 85-1205] p 665 A85-39655
Development and evaluation of an integrated flight and propulsion control system
[AIAA PAPER 85-1423] p 669 A85-39771
The integration of a new concept in VTOL aircraft propulsion
[AIAA PAPER 85-1448] p 651 A85-39785
Design considerations for transport aircraft with modern propeller propulsion
[DGLR PAPER 84-083] p 753 A85-40303
Future fundamental combustion research for aeropropulsion systems
[AIAA PAPER 85-1398] p 771 A85-42671
Teaching undergraduate airbreathing propulsion at the US Air Force Academy
[AIAA PAPER 85-1145] p 863 A85-43776
The preliminary checkout, evaluation and calibration of a 3-component force measurement system for calibrating propulsion simulators for wind tunnel models
[NASA-CR-174113] p 118 N85-12903
Parametric estimates of propulsion system maintenance manhours
[AD-A147120] p 201 N85-15662
Installed nacelle drag-improvement tests of an M = 0.8 turboprop transport configuration
[NASA-TM-84302] p 255 N85-15716
Propeller propulsion system integration: State of technology survey
[NASA-CR-3882] p 398 N85-21119
Towards a renewal of the propeller in aeronautics
[NASA-TM-77803] p 422 N85-21169
Fiscal year 1986 technical objective document
[AD-A151039] p 539 N85-25000
Mathematical modeling of the AEDC (Arnold Engineering Development Center) propulsion wind tunnel (16T)
[AD-A151293] p 593 N85-25275
Future fundamental combustion research for aeropropulsion systems
[NASA-TM-87049] p 671 N85-27870
The STOL and maneuver technology program integrated control system development p 680 N85-27910
Presentation of the acoustic and aerodynamic results of the Aladin 2 concept qualification testing
[NASA-TM-77583] p 876 N85-35161

**PROPULSION SYSTEM PERFORMANCE**
Development of the AV-8B propulsion system
[AIAA PAPER 84-2426] p 108 A85-13527
Determination of aircraft propulsive efficiency and drag using steady state measurements and Lock's propeller model
[AIAA PAPER 84-2500] p 109 A85-13571
Extended range operations with two-engine airplanes - A regulatory view
[AIAA PAPER 84-2513] p 89 A85-13579
Flight tests of special powerplant equipment and systems for fixed-wing aircraft and helicopters — Russian book p 111 A85-15822
Microwave-powered, unmanned, high-altitude airplanes p 155 A85-16241
Real gas effects in advanced technology engines
[AIAA PAPER 85-0252] p 262 A85-19615
Big wind at Tullahoma — USAF's new aeropropulsion test facility p 275 A85-20122
Calculation of the hydrodynamic characteristics of polyplanes p 290 A85-22113
Analysis of steady, two-dimensional, chemically reacting, nonequilibrium, inviscid flow in nozzles
p 317 A85-25129
Instrumenting a very large scale R&D facility
p 426 A85-28117
Performance estimation for turbofans with and without mixers p 580 A85-34014
From measurement uncertainty to measurement communications, credibility, and cost control in propulsion ground test facilities p 682 A85-39243
Future prop-fans - Tractor or pusher
[AIAA PAPER 85-1189] p 664 A85-39647
Supportability considerations for advanced engine development
[AIAA PAPER 85-1205] p 665 A85-39655
Secondary power unit options for advanced fighter aircraft
[AIAA PAPER 85-1280] p 666 A85-39696
Modeling post-stall operation of aircraft gas turbine engines
[AIAA PAPER 85-1431] p 669 A85-39775
Propulsion influences on air combat
[AIAA PAPER 85-1457] p 651 A85-39789
Aircraft control integration - Methodology and performance impact
[AIAA PAPER 85-1424] p 775 A85-40839
A study of ramjet engine. II - Altitude specific range at the ceiling p 766 A85-41013
On the propulsion system of the quiet STOL research aircraft p 766 A85-41034
V2500 turbofan engine p 767 A85-41035
Integrated flight/propulsion control - HIDEC modes
p 839 A85-45042
Energy efficient engine component development and integration program
[NASA-CR-168496] p 33 N85-10989
Nonlinear system identification methodology development based on F-4S flight test data analysis
[AD-A146289] p 105 N85-12053
An update of the Canada/USA augmentor-wing project p 257 N85-16781
The Altitude Wind Tunnel (AWT): A unique facility for propulsion system and adverse weather testing
[NASA-TM-86921] p 360 N85-18067
Propeller propulsion system integration: State of technology survey
[NASA-CR-3882] p 398 N85-21119
Determination of aerodynamic and propulsion parameters of general aviation aircraft using steady state flight test data p 499 N85-22377
Missions and vehicle concepts for modern, propelled, lighter-than-air vehicles
[NASA-TM-87461] p 542 N85-25170
Performance and surge limits of a TF30-P-3 turbofan engine/axisymmetric mixed-compression inlet propulsion system at Mach 2.5
[NASA-TP-2461] p 581 N85-25261
Mathematical modeling of the AEDC (Arnold Engineering Development Center) propulsion wind tunnel (16T)
[AD-A151293] p 593 N85-25275
Error reduction program — combustor performance evaluation codes
[NASA-CR-174776] p 610 N85-27584
Test devices for aeronautical research and technology
[NASA-TM-77651] p 683 N85-27914
Energy efficient engine integrated core/low spool test hardware design report
[NASA-CR-168137] p 772 N85-29956
Performance improvements of a highly integrated digital electronic control system for an F-15 airplane
[NASA-TM-86748] p 837 N85-32120

**PROPULSIVE EFFICIENCY**
Propulsive efficiency of vibrating bodies in a subsonic gas flow p 2 A85-10111
The aerodynamic characteristics of a propulsive wing/canard concept in STOL
[AIAA PAPER 84-2396] p 74 A85-13507
Propulsive efficiency of an oscillating cylinder in supersonic flow p 140 A85-16181
A method for flight-test determination of propulsive efficiency and drag p 411 A85-26757
Measured and calculated airloads on a transport wing model p 392 A85-29263
The unducted fan engine
[AIAA PAPER 85-1130] p 665 A85-39648
Are propellers coming back - and when?
p 764 A85-40070
The MCA method of determining thrust of jet aircraft in flight — Mass Consumption-Acceleration
p 881 A85-49134
Single-engine propulsion improvement through intercooling
[SAE PAPER 850894] p 890 A85-50114
The preliminary checkout, evaluation and calibration of a 3-component force measurement system for calibrating propulsion simulators for wind tunnel models
[NASA-CR-174113] p 118 N85-12903
Propulsive efficiency of vibrating wing in supersonic flow p 146 N85-14656
Design study of technology requirements for high performance single-propeller-driven business airplanes
[NASA-CR-3863] p 235 N85-15692
Missions and vehicle concepts for modern, propelled, lighter-than-air vehicles
[NASA-TM-87461] p 542 N85-25170
Propulsion efficiency of vibrating bodies in subsonic gas stream p 699 N85-28159

**PROTECTIVE CLOTHING**
Fast-jet aircrew safety p 916 A85-48099
Windblast leg protector assembly
[AD-D011376] p 242 N85-15700
The effect of modified spectacles on the field of view of the helmet display unit of the integrated helmet and display sighting system
[AD-A148693] p 348 N85-18055

**PROTECTIVE COATINGS**
Oxidation-based model for thermal barrier coating life
p 41 A85-10310
Polyimide protective coatings for 700 deg service
p 282 A85-21527
Microstructural development of protective Al2O3 scales p 283 A85-21650
Coatings for erosion resistance p 434 A85-27538
ITSC '83; Proceedings of the Tenth International Thermal Spraying Conference, Essen, West Germany, May 2-6, 1983 p 443 A85-28801
Development of coatings for the protection of gas turbine blades against high temperature oxidation and corrosion
p 519 A85-32433
Electroforming of complex parts and heat exchanger systems
[MBB-Z-42-85-OE] p 599 A85-35256
Coating composition and the formation of protective oxide layers at high temperatures p 596 A85-36234
The effect of coatings on the thermomechanical fatigue life of a single crystal turbine blade material
[AIAA PAPER 85-1366] p 689 A85-39744
Titanium alloys for high temperature applications - A review p 783 A85-40922
Polyurethane paint systems - High surface quality
p 784 A85-41400
Surface protection overview p 32 N85-10978
Experimental and analytical study of ceramic-coated turbine-tip shroud seals for small turbine engines
[NASA-TM-86881] p 353 N85-18057
Effects of MAR-M247 substrate (modified) composition on coating oxidation coating/substrate interdiffusion — protective coatings for hot section components of gas turbine engines
[NASA-CR-174851] p 364 N85-19073
Process for preparing essentially colorless polyimide film containing phenoxy-linked diamines
[NASA-CASE-LAR-13353-1] p 436 N85-20128
A study of intumescent reaction mechanisms
[AD-A149605] p 437 N85-21365
Protective coatings for aircraft structures: A review
[VTH-LR-413] p 577 N85-26704
Effects of surface chemistry on hot corrosion life
[NASA-CR-174915] p 582 N85-26711
Testing of materials and coatings for jet engine components under simulated operational conditions
[B8580073] p 672 N85-27873
Ceramic coatings for heat engine materials: Status and future needs
[DE85-008759] p 691 N85-29053
Ceramic coatings for heat engine materials
[DE85-005238] p 691 N85-29054

**PROTECTORS**
Windblast leg protector assembly
[AD-D011376] p 242 N85-15700
Results of tests of MTA-2 TPS on the SRB hold-down bolt blast container
[NASA-CR-170891] p 899 N85-35224

**PROTOCOL (COMPUTERS)**
A unified approach to data communications in aircraft
p 822 A85-44995

**PROTOTYPES**
Natural icing flight tests of the Beech Model F90-1 prototype p 401 A85-28642
Prototype concept design for US Army type 3A Air Traffic Control Tower (ATCT)
[AD-A148840] p 361 N85-18070
Improved Y-11 general-purpose transport designated Y-12 p 500 N85-22385
Solid state compressor
[AD-A150790] p 531 N85-24302

**PROTUBERANCES**
Analysis of aerothermal loads on spherical dome protuberances p 473 A85-32602

**PSEUDONOISE**
Pseudo-noise and noise — in aeronautics
p 862 A85-45670

**PROPELLANT PROPERTIES**

Propellant options for long duration, high altitude unmanned aircraft
[AIAA PAPER 85-1326] p 689 A85-39727

**PROPELLER BLADES**

The unified acoustic and aerodynamic prediction theory of advanced propellers in the time domain
[AIAA PAPER 84-2303] p 60 A85-10854

Vibration response and sound radiation from beams, plates, and cylinders excited by nonhomogeneous random pressure fields
[AIAA PAPER 84-2327] p 61 A85-10871

Application of active noise control to model propeller noise
[AIAA PAPER 84-2344] p 62 A85-10883

Predicted changes in advanced turboprop noise with shaft angle of attack
[AIAA PAPER 84-2347] p 63 A85-10884

Investigation of the axial velocities induced along rotating blades by trailing helical vortices p 75 A85-13678

Dynamic behavior of a propfan
[ONERA, TP NO. 1984-122] p 111 A85-15842

Interaction of a turbulent vortex with a lifting surface
[AIAA PAPER 85-0004] p 206 A85-19452

Calculation of steady flow about propellers by means of a surface panel method
[AIAA PAPER 85-0283] p 218 A85-19634

A Navier-Stokes calculation of 3-D, turbulent flow near a propeller in a shear flow
[AIAA PAPER 85-0365] p 220 A85-19698

Propellers for the future p 353 A85-26275

Observations of tip vortex cavitation inception from a model marine propeller p 526 A85-33220

A numerical calculation of propeller performance at static condition and its comparison with experiment
p 724 A85-41012

Predicted changes in advanced turboprop noise with shaft angle of attack p 836 A85-45861

Large-scale advanced propfan (LAP) program progress report
[AIAA PAPER 85-1187] p 836 A85-47021

Aerodynamic models for propellers for fast aircraft
[ONERA, TP NO. 1985-55] p 868 A85-47301

Noise constraints effecting optimal propeller designs
[SAE PAPER 850871] p 874 A85-50106

Manufacture of composite propeller blades for commuter aircraft
[SAE PAPER 850875] p 910 A85-50108

Profile design for wings and propellers
[NASA-TM-77785] p 328 N85-18953

Noise constraints effecting optimal propeller designs
[NASA-TM-86967] p 394 N85-19923

Determination of aerodynamic and propulsion parameters of general aviation aircraft using steady state flight test data p 499 N85-22377

Interaction of a turbulent vortex with a lifting surface
p 557 N85-25214

Low-speed wind-tunnel tests of an advanced eight-bladed propeller
[NASA-TM-86364] p 740 N85-29928

Large-scale Advanced Propfan (LAP) program
[NASA-TM-87067] p 774 N85-29964

Effects of propeller rotation direction on airplane interior noise levels
[NASA-TP-2444] p 805 N85-30767

Impulsive noise due to transonic blade-vortex interactions p 806 N85-31913

Two-plane balance and slip-ring design
p 856 N85-33536

Optimally designed propellers constrained by noise
p 892 N85-35196

**PROPELLER DRIVE**

Finite element modelling of acoustic singularities with application to near and far field propeller noise
[AIAA PAPER 84-2286] p 59 A85-10842

Propagation of propeller tone noise through a fuselage boundary layer p 197 A85-18514

The unambiguous in-flight determination of propeller rotational noise in aircraft with four-cycle combustion engines p 304 A85-20650

Advanced single-rotation propfan drive system
p 663 A85-39577

Drive system development for Propfan Test Assessment Program
[AIAA PAPER 85-1188] p 664 A85-39646

**PROPELLER EFFICIENCY**

Determination of aircraft propulsive efficiency and drag using steady state measurements and Lock's propeller model
[AIAA PAPER 84-2500] p 109 A85-13571

Compressible lifting surface theory for propeller performance calculation p 143 A85-18508

Analytical determination of propeller performance degradation due to ice accretion
[AIAA PAPER 85-0339] p 264 A85-20867

Five years experience with minimum induced loss propellers. II - Applications
[SAE PAPER 840027] p 322 A85-26311

Drive system development for Propfan Test Assessment Program
[AIAA PAPER 85-1188] p 664 A85-39646

Future prop-fans - Tractor or pusher
[AIAA PAPER 85-1189] p 664 A85-39647

Effect of a wing-tip mounted pusher turboprop on the aerodynamic characteristics of a semi-span wing
[AIAA PAPER 85-1286] p 631 A85-39700

Aerodynamic characteristics of swept propellers
p 723 A85-40981

Large-scale advanced propfan (LAP) program progress report
[AIAA PAPER 85-1187] p 836 A85-47021

The analysis of counter-rotating propeller systems
[SAE PAPER 850869] p 873 A85-50104

Propulsive efficiency and aircraft drag determined from steady state flight test data
[SAE PAPER 850872] p 885 A85-50107

Welcome to the Saclay Propeller Testing Center
[NASA-TM-77648] p 511 N85-23799

Large-scale Advanced Propfan (LAP) program
[NASA-TM-87067] p 774 N85-29964

Optimally designed propellers constrained by noise
p 892 N85-35196

**PROPELLER FANS**

Near-field frequency-domain theory for propeller noise
p 460 A85-29079

Evaluation of interior noise control treatments for advanced turboprop aircraft p 573 A85-35588

Advanced single-rotation propfan drive system
p 663 A85-39577

Wind tunnel results of advanced high speed propellers in the takeoff, climb, and landing operating regimes
[AIAA PAPER 85-1259] p 817 A85-47025

Large-scale Advanced Propfan (LAP) performance, acoustic and weight estimation, January, 1984
[NASA-CR-174782] p 476 N85-22368

Wind tunnel results of advanced high speed propellers in the takeoff, climb and landing operating regimes
[NASA-TM-87054] p 740 N85-29925

**PROPELLER SLIPSTREAMS**

Euler equation simulation of propeller-wing interaction in transonic flow p 6 A85-11977

On the modelling of a fully-relaxed propeller slipstream
[AIAA PAPER 85-1262] p 630 A85-39685

A numerical calculation of propeller performance at static condition and its comparison with experiment
p 724 A85-41012

Studies on the interference of wings and propeller slipstreams
[NASA-CR-175753] p 557 N85-25210

**PROPELLERS**

Review of recent research of interior noise of propeller aircraft
[AIAA PAPER 84-2349] p 17 A85-10885

Propeller noise measurements in DNW on the fuselage of a twin engine aircraft model — German-Dutch wind tunnel
[AIAA PAPER 84-2367] p 17 A85-10897

Aerodynamic methods used in France for the study of propellers for high-speed aircraft
[ONERA, TP NO. 1984-120] p 81 A85-15840

Modern propeller profiles
[ONERA, TP NO. 1984-121] p 81 A85-15841

Modelling of wind tunnel wall effects on the radiation characteristics of acoustic sources
[AIAA PAPER 84-2364] p 197 A85-16104

Five years experience with minimum induced loss propellers. I - Theory
[SAE PAPER 840026] p 322 A85-26310

Model tests of phase-locked propeller installations
[AIAA PAPER 85-0001] p 353 A85-26316

Noise testing of an advanced design propeller in the Boeing transonic wind tunnel with and without test section acoustic treatment
[AIAA PAPER 84-2366] p 377 A85-26320

A theorem on swirl loss in propeller wakes
p 392 A85-29265

Noise testing of an advanced design propeller in the Boeing anechoic test chamber with a relative velocity free jet
[AIAA PAPER 84-2262] p 421 A85-30193

An aerodynamic theory based on time-domain aeroacoustics p 546 A85-35135

A review of some recent U.K. propeller developments
[AIAA PAPER 85-1261] p 666 A85-39684

Are propellers coming back - and when?
p 764 A85-40070

Design considerations for transport aircraft with modern propeller propulsion
[DGLR PAPER 84-083] p 753 A85-40303

Flow simulations using Euler equations for nacelle-propeller configurations in a wind tunnel environment
[AIAA PAPER 85-1678] p 716 A85-40765

Aerodynamic characteristics of swept propellers
p 723 A85-40981

Propeller aerodynamic performance by vortex-lattice method p 731 A85-42927

Inviscid analysis of advanced turboprop propeller flow fields
[AIAA PAPER 85-1263] p 814 A85-43977

Noise testing of an advanced design propeller in a wind tunnel p 836 A85-45862

Advanced design propeller noise testing in an anechoic chamber p 836 A85-45869

Wind tunnel results of advanced high speed propellers in the takeoff, climb, and landing operating regimes
[AIAA PAPER 85-1259] p 817 A85-47025

Laser velocimeter measurements of the flow fields around single- and counter-rotation propeller models
[SAE PAPER 850870] p 873 A85-50105

Analysis of noise measured from a propeller in a wake
[NASA-TP-2358] p 65 N85-11788

Evaluation of the Langley 4- by 7-meter tunnel for propeller noise measurements
[NASA-TM-85721] p 136 N85-13553

Contribution of the study of light aircraft propeller noise
[ESA-TT-865] p 377 N85-18667

Propeller propulsion system integration: State of technology survey
[NASA-CR-3882] p 398 N85-21119

Towards a renewal of the propeller in aeronautics
[NASA-TM-77803] p 422 N85-21169

Further comparison of wind tunnel and airplane acoustic data for advanced design high speed propeller models
[NASA-TM-86935] p 460 N85-22108

Method for the prediction of the installation aerodynamics of a propfan at subsonic speeds
[NASA-CR-3887] p 476 N85-22369

Wind tunnel acoustic study of a propeller installed behind an airplane empennage: Data report
[NASA-CR-177335] p 538 N85-23377

Wind tunnel results of advanced high speed propellers in the takeoff, climb and landing operating regimes
[NASA-TM-87054] p 740 N85-29925

An experimental investigation of propfan installations on an upswept supercritical wing at transonic Mach numbers
[NASA-CR-172605] p 742 N85-31013

Wingtip vortex propeller
[NASA-CASE-LAR-13019-1] p 892 N85-35194

**PROPORTIONAL CONTROL**

Line-of-sight reconstruction for faster homing guidance
p 153 A85-18326

The general class of optimal proportional navigation
p 153 A85-18346

An Optimal, Proportional-plus-integral/Tracking control law for aircraft applications p 513 A85-33282

**PROPULSION**

Energy efficient engine. Volume 1: Component development and integration program
[NASA-CR-173084] p 34 N85-10992

Report of the Department of Aerospace Engineering
p 71 N85-11977

Future directions in aeropropulsion technology
[NASA-TM-87010] p 467 N85-23685

Heat transfer in aeropropulsion systems
[NASA-TM-87066] p 798 N85-31444

R and D programmes at the National Aeronautical Laboratory
[AR-22] p 807 N85-32022

**PROPULSION SYSTEM CONFIGURATIONS**

Comment on 'PAN AIR applications to aero-propulsion integration' p 6 A85-11990

Design development and optimization criteria considerations for a tandem fan medium speed V/STOL propulsion concept
[AIAA PAPER 84-2395] p 107 A85-13506

Propulsion technology projections for commercial aircraft
[AIAA PAPER 84-2446] p 108 A85-13536

Near-term application of modern propulsion technology to a tactical transport
[AIAA PAPER 84-2506] p 109 A85-13576

UDF - GE dares to differ — UnDucted Fan
p 167 A85-16270

Influence of propulsion/mission profile combinations upon generic missile penetration of a hypothetical defense
[AIAA PAPER 85-0495] p 249 A85-19789

Powerplants for long-duration unmanned aircraft
p 420 A85-27094

Review - Computational methods for internal flows with emphasis on turbomachinery p 392 A85-29126

Advances in aerospace propulsion; Proceedings of the Aerospace Congress and Exposition, Long Beach, CA, October 15-18, 1984
[SAE SP-594] p 659 A85-39057
Engine inlet interaction with a prop-fan propulsion system
[SAE PAPER 841478] p 627 A85-39058
Aerodynamic test results for a wing-mounted turboprop propulsion installation
[SAE PAPER 841480] p 627 A85-39060
Results of a wind tunnel/flight test program to compare afterbody/nozzle pressures on a 1/12 scale model and an F-15 aircraft
[SAE PAPER 841543.] p 649 A85-39066
Model test results of the split-fan cross-ducted propulsion system concept for medium speed V/STOL aircraft
[SAE PAPER 841495] p 663 A85-39203
Series flow tandem fan - A high-speed V/STOL propulsion concept
[SAE PAPER 841496] p 650 A85-39204
Future prop-fans - Tractor or pusher
[AIAA PAPER 85-1189] p 664 A85-39647
Supportability considerations for advanced engine development
[AIAA PAPER 85-1205] p 665 A85-39655
Development and evaluation of an integrated flight and propulsion control system
[AIAA PAPER 85-1423] p 669 A85-39771
The integration of a new concept in VTOL aircraft propulsion
[AIAA PAPER 85-1448] p 651 A85-39785
Design considerations for transport aircraft with modern propeller propulsion
[DGLR PAPER 84-083] p 753 A85-40303
Future fundamental combustion research for aeropropulsion systems
[AIAA PAPER 85-1398] p 771 A85-42671
Teaching undergraduate airbreathing propulsion at the US Air Force Academy
[AIAA PAPER 85-1145] p 863 A85-43776
The preliminary checkout, evaluation and calibration of a 3-component force measurement system for calibrating propulsion simulators for wind tunnel models
[NASA-CR-174113] p 118 N85-12903
Parametric estimates of propulsion system maintenance manhours
[AD-A147120] p 201 N85-15662
Installed nacelle drag-improvement tests of an M = 0.8 turboprop transport configuration
[NASA-TM-84302] p 255 N85-15716
Propeller propulsion system integration: State of technology survey

Future fundamental combustion research for aeropropulsion systems
[NASA-TM-87049] p 671 N85-27870
The STOL and maneuver technology program integrated control system development p 680 N85-27910
Presentation of the acoustic and aerodynamic results of the Aladin 2 concept qualification testing
[NASA-TM-77883] p 876 N85-35161

PROPULSION SYSTEM PERFORMANCE
Development of the AV-8B propulsion system
[AIAA PAPER 84-2426] p 108 A85-13527
Determination of aircraft propulsive efficiency and drag using steady state measurements and Lock's propeller model
[AIAA PAPER 84-2500] p 109 A85-13571
Extended range operations with two-engine airplanes - A regulatory view
[AIAA PAPER 84-2513] p 89 A85-13579
Flight tests of special powerplant equipment and systems for fixed-wing aircraft and helicopters — Russian book p 111 A85-15822
Microwave-powered, unmanned, high-altitude airplanes p 155 A85-16241
Real gas effects in advanced technology engines
[AIAA PAPER 85-0252] p 262 A85-19615
Big wind at Tullahoma — USAF's new aeropropulsion test facility p 275 A85-20122
Calculation of the hydrodynamic characteristics of polyplanes p 290 A85-22113
Analysis of steady, two-dimensional, chemically reacting, nonequilibrium, inviscid flow in nozzles
p 317 A85-25129
Instrumenting a very large scale R&D facility
p 426 A85-28117
Performance estimation for turbofans with and without mixers p 580 A85-34014
From measurement uncertainty to measurement communications, credibility, and cost control in propulsion ground test facilities p 682 A85-39243
Future prop-fans - Tractor or pusher
[AIAA PAPER 85-1189] p 664 A85-39647
Supportability considerations for advanced engine development
[AIAA PAPER 85-1205] p 665 A85-39655
Secondary power unit options for advanced fighter aircraft
[AIAA PAPER 85-1280] p 666 A85-39696
Modeling post-stall operation of aircraft gas turbine engines
[AIAA PAPER 85-1431] p 669 A85-39775
Propulsion influences on air combat
[AIAA PAPER 85-1457] p 651 A85-39789
Aircraft control integration - Methodology and performance impact
[AIAA PAPER 85-1424] p 775 A85-40839
A study of ramjet engine. II - Altitude specific range at the ceiling p 766 A85-41013
On the propulsion system of the quiet STOL research aircraft p 766 A85-41034
V2500 turbofan engine p 767 A85-41035
Integrated flight/propulsion control - HIDEC modes
p 839 A85-45042
Energy efficient engine component development and integration program
[NASA-CR-169496] p 33 N85-10969
Nonlinear system identification methodology development based on F-4S flight test data analysis
[AD-A146289] p 105 N85-12053
An update of the Canada/USA augmentor-wing project p 257 N85-16781
The Altitude Wind Tunnel (AWT): A unique facility for propulsion system and adverse weather testing
[NASA-TM-86921] p 360 N85-18067
Propeller propulsion system integration: State of technology survey
[NASA-CR-3882] p 398 N85-21119
Determination of aerodynamic and propulsion parameters of general aviation aircraft using steady state flight test data p 499 N85-22377
Missions and vehicle concepts for modern, propelled, lighter-than-air vehicles
[NASA-TM-87461] p 542 N85-25170
Performance and surge limits of a TF30-P-3 turbofan engine/axisymmetric mixed-compression inlet propulsion system at Mach 2.5
[NASA-TP-2461] p 581 N85-25261
Mathematical modeling of the AEDC (Arnold Engineering Development Center) propulsion wind tunnel (16T)
[AD-A151293] p 593 N85-25275
Error reduction program — combustor performance evaluation codes
[NASA-CR-174776] p 610 N85-27584
Test devices for aeronautical research and technology
[NASA-TM-77651] p 683 N85-27914
Energy efficient engine integrated core/low spool test hardware design report
[NASA-CR-168137] p 772 N85-29956
Performance improvements of a highly integrated digital electronic control system for an F-15 airplane
[NASA-TM-86748] p 837 N85-32120

PROPULSIVE EFFICIENCY
Propulsive efficiency of vibrating bodies in a subsonic gas flow p 2 A85-10111
The aerodynamic characteristics of a propulsive wing/canard concept in STOL
[AIAA PAPER 84-2396] p 74 A85-13507
Propulsive efficiency of an oscillating cylinder in supersonic flow p 140 A85-16181
A method for flight-test determination of propulsive efficiency and drag p 411 A85-26757
Measured and calculated airloads on a transport wing model p 392 A85-29263
The unducted fan engine
[AIAA PAPER 85-1190] p 665 A85-39648
Are propellers coming back - and when?
p 764 A85-40070
The MCA method of determining thrust of jet aircraft in flight — Mass Consumption-Acceleration
p 881 A85-49134
Single-engine propulsion improvement through intercooling
[SAE PAPER 850894] p 890 A85-50114
The preliminary checkout, evaluation and calibration of a 3-component force measurement system for calibrating propulsion simulators for wind tunnel models
[NASA-CR-174113] p 118 N85-12903
Propulsive efficiency of vibrating wing in supersonic flow p 146 N85-14656
Design study of technology requirements for high performance single-propeller-driven business airplanes
[NASA-CR-3863] p 235 N85-15692
Missions and vehicle concepts for modern, propelled, lighter-than-air vehicles
[NASA-TM-87461] p 542 N85-25170
Propulsion efficiency of vibrating bodies in subsonic gas stream p 699 N85-28159

PROTECTIVE CLOTHING
Fast-jet aircrew safety p 916 A85-48099
Windblast leg protector assembly
[AD-D011376] p 242 N85-15700
The effect of modified spectacles on the field of view of the helmet display unit of the integrated helmet and display sighting system
[AD-A148693] p 348 N85-18055

PROTECTIVE COATINGS
Oxidation-based model for thermal barrier coating life
p 41 A85-10310
Polyimide protective coatings for 700 deg service
p 282 A85-21527
Microstructural development of protective Al2O3 scales p 283 A85-21650
Coatings for erosion resistance p 434 A85-27538
ITSC '83; Proceedings of the Tenth International Thermal Spraying Conference, Essen, West Germany, May 2-6, 1983 p 443 A85-28801
Development of coatings for the protection of gas turbine blades against high temperature oxidation and corrosion
p 519 A85-32433
Electroforming of complex parts and heat exchanger systems
[MBB-Z-42-85-OE] p 599 A85-35256
Coating composition and the formation of protective oxide layers at high temperatures p 596 A85-36234
The effect of coatings on the thermomechanical fatigue life of a single crystal turbine blade material
[AIAA PAPER 85-1366] p 689 A85-39744
Titanium alloys for high temperature applications - A review p 783 A85-40922
Polyurethane paint systems - High surface quality
p 784 A85-41400
Surface protection overview p 12 N85-10978
Experimental and analytical study of ceramic-coated turbine-tip shroud seals for small turbine engines
[NASA-TM-86881] p 353 N85-18057
Effects of MAR-M247 substrate (modified) composition on coating oxidation coating/substrate interdiffusion --- protective coatings for hot section components of gas turbine engines
[NASA-CR-174851] p 364 N85-19073
Process for preparing essentially colorless polyimide film containing phenoxy-linked diamines
[NASA-CASE-LAR-13353-1] p 436 N85-20128
A study of intumescent reaction mechanisms
[AD-A149605] p 437 N85-21365
Protective coatings for aircraft structures: A review
[VTH-LR-413] p 577 N85-26704
Effects of surface chemistry on hot corrosion life
[NASA-CR-174915] p 582 N85-26711
Testing of materials and coatings for jet engine components under simulated operational conditions
[B8580073] p 672 N85-27873
Ceramic coatings for heat engine materials: Status and future needs
[DE85-008759] p 691 N85-29053
Ceramic coatings for heat engine materials
[DE85-005238] p 691 N85-29054

PROTECTORS
Windblast leg protector assembly
[AD-D011376] p 242 N85-15700
Results of tests of MTA-2 TPS on the SRB hold-down bolt blast container
[NASA-CR-170891] p 899 N85-35224

PROTOCOL (COMPUTERS)
A unified approach to data communications in aircraft
p 822 A85-44995

PROTOTYPES
Natural icing flight tests of the Beech Model F90-1 prototype p 401 A85-28642
Prototype concept design for US Army type 3A Air Traffic Control Tower (ATCT)
[AD-A148840] p 381 N85-18070
Improved Y-11 general-purpose transport designated Y-12 p 500 N85-22385
Solid state compressor
[AD-A150790] p 531 N85-24302

PROTUBERANCES
Analysis of aerothermal loads on spherical dome protuberances p 473 A85-32602

PSEUDONOISE
Pseudo-noise and noise — in aeronautics
p 862 A85-45670

**PSYCHOLOGICAL EFFECTS**
Assessment and prediction of aircraft community noise annoyance
[AIAA PAPER 84-2291] p 55 A85-10846
Hygienic evaluation of noise in living quarters near an airport p 608 A85-33579
**PSYCHOTROPIC DRUGS**
The airline passenger undergoing withdrawal or overdose from narcotics or other drugs
p 746 A85-42074
**PUBLIC LAW**
Civil law enforcement missions p 139 N85-14812
The need for a dedicated public service helicopter design p 154 N85-14826
**PULSE COMMUNICATION**
Applications of air-ground-air digital communication system ACARS/AIRCOM
[AIAA PAPER 84-2604] p 150 A85-17807
The Navy's tactical data network
[AIAA PAPER 84-2716] p 152 A85-17862
Implications of Joint Tactical Information Distribution System/Tactical Digital Information Link J on Navy aircraft weapons systems
[AIAA PAPER 84-2719] p 152 A85-17863
Designer on Aeroflot automated COMMO system development p 296 N85-16765
Propagation Influences on Digital Transmission Systems: Problems and Solutions
[AGARD-CP-363] p 373 N85-19269
EHF air-to-air communications p 373 N85-19273
**PULSE COMPRESSION**
Application of digital signal processing to a low data rate communications receiver
[AIAA PAPER 84-2652] p 183 A85-17839
**PULSE DOPPLER RADAR**
Pulsed Doppler radars for weather observation and flight safety enhancement p 374 A85-24903
Range ambiguity resolution in an airborne medium PRF pulse Doppler radar p 335 A85-24911
Medium PPF for the AN/APG-66 radar — Pulse Repetition Frequency for Pulse Doppler Radar
p 408 A85-27834
Design decisions guide airborne radar
p 409 A85-27848
Evaluation of Doppler radar for airport wind shear detection p 452 A85-28774
Development of the F-20 nose radome
[AD-P004374] p 449 N85-21466
**PULSE HEATING**
The structural dynamics of Electro-impulse De-icing on the Lear Fan Kevlar Composite leading edge
[SAE PAPER 850917] p 885 A85-50127
**PULSE MODULATION**
Very-short-pulse modulator using asymmetric thyristors p 185 A85-18466
Pulsewidth modulated speed control of brushless dc motors
[AD-A151966] p 607 N85-27148
**PULSE RADAR**
Very-short-pulse modulator using asymmetric thyristors p 185 A85-18466
**PULSE REPETITION RATE**
Range ambiguity resolution in an airborne medium PRF pulse Doppler radar p 335 A85-24911
Medium PRF for the AN/APG-66 radar — Pulse Repetition Frequency for Pulse Doppler Radar
p 408 A85-27834
**PULSEJET ENGINES**
A study of the pulsation driving mechanism in pulsating combustors p 386 A85-25477
State of the art and research needs of pulsating combustion
[ASME PAPER 84-WA/NCA-19] p 690 A85-38913
**PUMP IMPELLERS**
A comparison of experimental characteristics of porous and blade impellers p 660 A85-39120
**PUMP SEALS**
Analysis and testing for rotordynamic coefficients of turbulent annular seals with different, directionally-homogeneous surface-roughness treatment for rotor and stator elements
[ASME PAPER 84-TRIB-31] p 289 A85-21293
**PUMPING**
The behavior of turbocompressors and turbocompressor installations during the pumping of the compressor — German thesis p 443 A85-28792
**PUMPS**
Conference on Fluid Machinery, 7th, Budapest, Hungary, September 13-16, 1983, Proceedings. Volumes 1 & 2
p 524 A85-30775
Combined cold compressor/ejector helium refrigerator
[DE85-006408] p 910 N85-34326
**PURSUIT TRACKING**
Pursuit-evasion between two realistic aircraft
p 131 A85-13632
Validation of zero-order feedback strategies for medium-range air-to-air interception in a horizontal plane
p 70 A85-13702
Decoupling of high-gain multivariable tracking systems
p 172 A85-18332
To pursue or to evade - That is the question — differential game theory application to air combat
p 381 A85-26426
Modeling and simulation in missile target tracking
p 409 A85-28607
First-order feedback strategies for variable speed planar pursuit-evasion games p 703 A85-37198
Pursit-evasion game analysis in a line of sight coordinate system p 803 A85-41339
A new approach to the maneuvering target tracking problem p 917 A85-47769
**PUSHBROOM SENSOR MODES**
Investigations of the accuracy of the Digital Photogrammetry System (DPS), a rigorous three-dimensional compilation process for pushbroom imagery
[MBB-UA-753/83-O] p 609 N85-27734
**PYLONS**
Nacelle/pylon/wing integration on a transport model with a natural laminar flow nacelle
[NASA-TP-2439] p 740 N85-29824
**PYROLYSIS**
The pyrolysis toxic gas analysis of aircraft interior materials
[AD-A146285] p 119 N85-12115
**PYROMETERS**
Dynamic gas temperature measurement system
p 29 N85-10958

## Q

**Q FACTORS**
The effect of parameter scatter on the quality indices of a flight vehicle platform stabilization system
p 177 A85-17052
**Q SWITCHED LASERS**
Determination of the drag of free flying particles in supersonic flow with a pulsed laser p 400 N85-21129
**QUADRATURES**
Comparative study of various quadratures for subsonic lifting surface chordwise integrals p 205 A85-19404
**QUALIFICATIONS**
Safety-of-flight and qualification testing for avionic systems
[AIAA PAPER 84-2670] p 175 A85-17853
Certification of advanced systems
p 167 N85-14829
Qualification needs for advanced integrated aircraft
[NASA-TM-86731] p 831 N85-33119
**QUALITY**
The interpretation of flying qualities requirements for flight control system design
[NASA-CR-177942] p 848 N85-33125
**QUALITY CONTROL**
Inspecting fastener holes electronically - The capacitance hole probe system p 52 A85-12592
Non-destructive testing of aircraft composite structures p 123 A85-14107
Structural failure, product liability and technical insurance; Proceedings of the First International Conference, Technische Universitaet Wien, Vienna, Austria, September 26-29, 1983 p 181 A85-16251
Development of acoustic emission techniques for quantitative use on aerospace C.F.R.P. structures
p 445 A85-29936
Advanced methodology for quality control of composite rotor blades at Bell Helicopter Textron
p 525 A85-31976
Software Quality Assurance Program for the AH-64 Advanced Attack Helicopter (AAH) p 466 A85-32010
Aircraft service testing of ultrasonically welded panels
p 646 A85-37408
Application of technology to achieve value - Added in-service support — of jet engines
[SAE PAPER 841566] p 669 A85-39067
Avionics integrity program (Avip). Volume 3: Program cost assessment - environmental stress screening and diagnostic techniques
[AD-A145644] p 25 N85-10942
Avionics integrity program (Avip). Volume 1: Procurement phase issues: Design, manufacturing, and integration
[AD-A145651] p 25 N85-10943
Advanced manufacturing development of a composite empennage component for L-1011 aircraft
[NASA-CR-165885] p 44 N85-11141
Editorial urges improved aviation repair work quality
p 72 N85-12004
Fabrication and quality assurance processes for superhybrid composite fan blades
[NASA-TM-83354] p 180 N85-14882
Improvements under way at Gorkiy airport
p 360 N85-18040
Transportation
[JPRS-UTR-85-004] p 384 N85-21105
Aviation repair plant directors on quality control measures p 384 N85-21106
Administration chief on air traffic control improvements
p 567 N85-25193
Nondestructive tests of ceramic components for aircraft turbines p 583 N85-26718
**QUANTITATIVE ANALYSIS**
Impact of aircraft emissions on air quality in the vicinity of airports. Volume 4. Nitrogen dioxide and hydrocarbons
[AD-A148253] p 299 N85-17436
Quantitative determination of compound classes in jet turbine fuels by high performance liquid Chromatography/Differential refractive index detection: Part 2
[AD-A149298] p 436 N85-20144
**QUARTZ CRYSTALS**
Description and test methods for a frequency output accelerometer p 694 A85-38536
**QUATERNARY ALLOYS**
Development of lithium-containing aluminium alloys for the ingot metallurgy production route
p 434 A85-27120
**QUATERNIONS**
Use of quaternions in flight mechanics
[AD-A152616] p 675 N85-27675
**QUENCHING (COOLING)**
Study of residual stresses introduced into TA6ZrD (685) cylinders by quenching — compressor disk alloy
[PNR-90240] p 372 N85-18435
**QUEUEING THEORY**
A model for the optimal synthesis and analysis of maintenance facilities p 456 A85-26836
Optimization of queuing disciplines in multiphase closed queuing systems p 534 A85-31463
Iterative queueing network techniques for the analysis of large maintenance facilities p 535 A85-33299
DYNA-SIM: A nonstationary queuing simulation with application to the automated test equipment problem
[AD-A146384] p 196 N85-15450

## R

**RACKS (FRAMES)**
Thermal test and analysis of SEM Format B integrated rack and application to SEM Format C — Standard Electronic Modules for aircraft avionics
[SAE PAPER 840944] p 566 A85-33755
Low-profile fastener
[AD-D011667] p 796 N85-30343
**RADAR**
SAR maritime missions p 139 N85-14813
LPI-radar for helicopter obstacle warning
p 297 N85-16810
**RADAR ANTENNAS**
Reflector antennas with directional effect in the near-field Characteristics and applications — German thesis p 287 A85-19837
Airborne Doppler radar antennas p 335 A85-24832
A multipurpose synthetic aperture radar
p 335 A85-24867
Multifunction rotating electronically scanned radar (RESR) for air surveillance p 408 A85-27837
Design of a radar guidance mechanism using MECSYN ANIMEC
[ASME PAPER 84-DET-139] p 566 A85-33774
Problems of radome design for modern airborne radar II p 599 A85-34661
Giant surveillance radar squeezed into wing
p 763 A85-41052
Development of the F-20 nose radome
[AD-P004374] p 449 N85-21466
**RADAR APPROACH CONTROL**
Planned office and facility consolidations: To improve system effectiveness and efficiency, FY 1985-87
[AD-A150441] p 489 N85-22376
Investigation of imaging and flight guidance concepts for rotorcraft zero visibility approach and landing
[NASA-CR-166571] p 644 N85-27843
**RADAR ATTENUATION**
Atmospheric propagation losses for long-range airborne radar systems analysis
[AIAA PAPER 85-0267] p 244 A85-19620
**RADAR BEACONS**
Development and flight test of a helicopter compact portable, precision landing system concept
p 261 N85-16821

Development and flight test of a helicopter, X-band, portable precision landing system concept
[NASA-TM-86710] p 586 N85-26721
**RADAR CROSS SECTIONS**
Radar cross section lectures — Book
p 289 A85-20915
Radar targets reveal all to automated tester
p 908 A85-49346
High frequency estimation of 2-dimensional cavity scattering
[AD-A151697] p 602 N85-25696
An empirical self-protection chaff model
[AD-A151926] p 607 N85-27115
**RADAR DATA**
Ultrashort-wave radar subsurface sounding of sea ice and earth covers p 374 A85-25594
**RADAR DETECTION**
Using satellites to improve civilian aircraft surveillance coverage
[AIAA PAPER 84-2405] p 91 A85-13512
A real time (on line) adaptive target detection technique for an airborne millimeter wave seeker design
p 347 A85-24267
Experimental analysis of an innovations-based detection algorithm for surveillance radar p 336 A85-25102
Design of a new airport surveillance radar (ASR-9)
p 408 A85-27832
Airport surface detection equipment
p 408 A85-27833
Airborne early warning radar p 408 A85-27835
Radar signal processing p 599 A85-34443
**RADAR ECHOES**
A facetting model of target glint p 367 A85-24899
Spectral characteristics of radar echoes from aircraft-dispensed chaff p 406 A85-26806
Test plan for the forest-echo experiment
[DE84-017175] p 375 N85-18447
High frequency estimation of 2-dimensional cavity scattering
[AD-A151697] p 602 N85-25696
**RADAR EQUIPMENT**
FAA's new terminal radar, the ASR-9 incorporates a separate weather channel p 15 A85-12080
The APG-66 radar and its derivative applications
[AIAA PAPER 84-2609] p 150 A85-17813
Aviation radar — Russian book p 244 A85-19805
Power traveling-wave tubes for modern airborne radars p 335 A85-24845
The principles and practice of modern AEW radar — Airborne Early Warning p 336 A85-24916
Design of a radar guidance mechanism using MECSYN ANIMEC
[ASME PAPER 84-DET-139] p 566 A85-33774
Real time simulation of airborne radar systems
p 849 A85-45124
Trajectory measurements for take-off and landing tests and other short-range applications, volume 16
[AGARD-AG-160-VOL-16] p 604 N85-25801
**RADAR HOMING MISSILES**
Line-of-sight reconstruction for faster homing guidance
p 153 A85-18326
Millimeter wave guidance applications - An overview
p 336 A85-24936
Signal processing consideration for a millimeter wave seeker p 336 A85-24938
Digital homing guidance - Stability vs performance tradeoffs p 406 A85-26440
The interceptor radar evolves as a sensor
p 409 A85-27847
How autopilot requirements constrain the aerodynamic design of homing missiles p 894 A85-47717
**RADAR IMAGERY**
An algorithm for radiometric and geometric correction of digital SLAR data p 56 A85-11216
Depth of field for SAR with aircraft acceleration
p 91 A85-12664
Laser Imaging Radar Sensor (LIRS)
p 334 A85-22649
Applications of FM-CW CO2 waveguide laser radar
p 334 A85-22650
Field tests and signature analysis of an imaging CO2 laser radar — for cruise missile guidance and targeting sensor p 334 A85-22651
A multipurpose synthetic aperture radar
p 335 A85-24887
Advanced SAR system maps Arctic regions
p 441 A85-27841
Stereo models from synthetic aperture radar
p 533 A85-30961
Studies in fin-line antenna design for imaging array applications p 526 A85-33245
Construction of a special computer for image production using synthetic aperture radar — German thesis
p 834 A85-45550
The use of synthetic aperture radar imagery to detect hazards to navigation
[AD-A149324] p 339 N85-16971
Investigation of imaging and flight guidance concepts for rotorcraft zero visibility approach and landing
[NASA-CR-166571] p 644 N85-27843
**RADAR MEASUREMENT**
Anomalous clutter interference in radar ranging
p 335 A85-24912
Comparisons of lidar and radar wind measurements made during the JAWS experiment — Joint Airport Weather Study p 452 A85-28770
Evaluation of Doppler radar for airport wind shear detection p 452 A85-28774
**RADAR NAVIGATION**
Integration of the B-52G Offensive Avionics System (OAS) with the Global Positioning System (GPS)
p 685 A85-38545
Status and development trends of navigation systems for general aviation p 746 A85-40292
Guidance and navigation programs and plans
p 154 N85-14609
National airspace review: Airport radar service area operational confirmation report
[DOT/FAA/AT-84/2] p 245 N85-15707
Autofocus motion compensation for synthetic aperture radar and its compatibility with strapdown inertial navigation sensors on highly maneuverable aircraft
[AD-A151940] p 569 N85-26693
**RADAR NETWORKS**
Design and realization of a multiradar tracking system for air traffic control
[ENST-84E010] p 338 N85-18044
**RADAR RECEIVERS**
Automated testing speeds EW receiver evaluation
p 408 A85-27845
'Fancy radio' develops split personality
p 749 A85-41057
Meeting the challenge of ESM/ECM integration
p 889 A85-49091
**RADAR RESOLUTION**
The main characteristics of a synthetic-aperture radar in the case of arbitrary motion of the flight vehicle
p 96 A85-15687
Range ambiguity resolution in an airborne medium PRF pulse Doppler radar p 335 A85-24911
Target super-resolution compensaton for spread spectrum radar waveforms p 823 A85-45129
**RADAR SCANNING**
Scan rates of Next Generation Weather Radar
p 191 A85-17486
Multifunction rotating electronically scanned radar (RESR) for air surveillance p 408 A85-27837
**RADAR SCATTERING**
Radar targets reveal all to automated tester
p 908 A85-49346
**RADAR SIGNATURES**
Aircraft identification based on pattern recognition of FM emission spectra p 15 A85-11078
**RADAR TARGETS**
A facetting model of target glint p 367 A85-24899
Range ambiguity resolution in an airborne medium PRF pulse Doppler radar p 335 A85-24911
Experimental analysis of an innovations-based detection algorithm for surveillance radar p 336 A85-25102
Adaptivity and design criteria of a latest-generation MTD processor p 336 A85-25105
An investigation of association region in maneuvering multi-target tracking p 410 A85-29697
Argus - Standoff-reconnaissance with unmanned rotor platform
[DGLR PAPER 84-126] p 754 A85-40339
Target super-resolution compensaton for spread spectrum radar waveforms p 823 A85-45129
Radar targets reveal all to automated tester
p 908 A85-49346
**RADAR TRACKING**
Scene matching and its application to aerospace electronic systems p 15 A85-12353
Conformal EO sensor development for the AFTI/F-16 — Advance Fighter Technology Integrator
[AIAA PAPER 84-2478] p 92 A85-13556
Aircraft track initiation with space based radar
p 93 A85-14440
A three-dimensional Kalman filter for short observation times to extrapolate flight trajectories — German thesis
p 301 A85-19835
Field measurements with a coherent transversely excited atmospheric CO2 laser radar
p 357 A85-22652
Investigation of the use of radar data for the measurement of parachute rate of descent and glide ratio p 331 A85-22764
Airborne early warning radar p 408 A85-27835
An investigation of association region in maneuvering multi-target tracking p 410 A85-29697
Nonlinear and adaptive filters for aircraft tracking --- German thesis p 485 A85-31848
Observation of birds in the flight path of aircraft - An important stage in the prevention of bird strikes
p 639 A85-37544
Algorithms for improved, heading assisted, maneuver tracking p 644 A85-39458
A likelihood function method for multiple aircraft maneuver tracking p 888 A85-47699
Design and realization of a multiradar tracking system for air traffic control
[ENST-84E010] p 338 N85-18044
An empirical self-protection chaff model
[AD-A151926] p 607 N85-27115
**RADAR TRANSMITTERS**
A wideband X100 low noise microwave frequency multiplier p 903 A85-47060
**RADIAL DISTRIBUTION**
Cooling characteristics of air cooled radial turbine blades p 792 A85-41784
**RADIAL FLOW**
The behavior of turbocompressors and turbocompressor installations during the pumping of the compressor --- German thesis p 443 A85-28792
Numerical determination of detached internal flow with the example of a radial compression tunnel — German thesis p 443 A85-28796
Procedure for the calculation of the characteristics of axial, respectively radial, one or multistage thermal flow machines, taking into consideration also the effect of adjustable guide devices — German thesis
p 598 A85-33402
Transonic flow in the throat region of radial or nearly radial supersonic nozzles p 626 A85-39001
Flowfield and performance measurements in a vaned radial diffuser
[ASME PAPER 84-WA/FM-7] p 634 A85-39876
Studies on the flow in supersonic axial-flow compressor rotor. VI - A possibility of two-dimensional supersonic section having quasi-axisymmetric flows which satisfy simplified radial equilibrium p 723 A85-41007
The effect of boundary layer control on the performance of radial fan impellers p 728 A85-41820
The three-dimensional compressible flow in a radial inflow turbine scroll p 729 A85-41826
Development of a high specific speed radial-inflow turbine for turbochargers p 793 A85-41832
Measurement of the radial flow along a low speed compressor blading during unstalled and stalled operation p 729 A85-41834
**RADIANT FLUX DENSITY**
The fuel property/flame radiation relationship for gas turbine combustors p 111 A85-15350
Further observations of X-rays inside thunderstorms
p 701 A85-37720
Microwave responses of the western North Atlantic
[NASA-CR-175888] p 699 N85-28191
**RADIANT HEATING**
Development of advanced high-temperature heat flux sensors. Phase 2: Verification testing
[NASA-CR-174973] p 911 N85-35391
**RADIATION DISTRIBUTION**
A numerical study of three-dimensional radiation fields in problems of supersonic flow past segmental bodies
p 227 A85-20025
Measurements of polarization characteristics of radiation field of on-board aircraft antennas p 127 N85-12230
Measurement of RF fields associated with ISM equipment as it relates to aeronautical services
[FAA-ES-84-2] p 795 N85-30180
**RADIATION EFFECTS**
Flight test techniques for validating simulated nuclear electromagnetic pulse aircraft responses
[AIAA PAPER 84-2498] p 100 A85-13569
**RADIATION HAZARDS**
China report: Science and technology
[JPRS-CST-84-039] p 446 N85-20206
**RADIATION MEASUREMENT**
Flame radiation and linear heat transfer in a tubular-can combustor p 663 A85-39580
Combustion system for radiation investigations
p 33 N85-10986
Measurement of RF fields associated with ISM equipment as it relates to aeronautical services
[FAA-ES-84-2] p 735 N85-30180
**RADIATION SHIELDING**
A new approach to applying electromagnetic transient protection requirements to avionic and electronic equipment p 439 A85-26684
**RADIATIVE HEAT TRANSFER**
Radiative entropy production
[AIAA PAPER 85-0408] p 304 A85-19729
Flow behind an attached shock wave in a radiating gas p 233 A85-22308
Combined analysis and optimization of extended heat transfer surfaces p 856 A85-46482

**RADIATIVE TRANSFER**

Radiative transfer in a gas turbine combustor
[AIAA PAPER 85-1072] p 658 A85-37682

**RADIO ALTIMETERS**

Doppler effect and its influence on low-altitude CW altimeters p 106 A85-13971

Clock coasting and altimeter error analysis for GPS
p 94 A85-14834

**RADIO ANTENNAS**

The Tethered Aerostat Antenna Program (TAAP) demonstration phase
[AIAA PAPER 85-0883] p 616 A85-38797

**RADIO BEACONS**

Automated VOR ground check techniques
p 485 A85-31273

Improved legislated emergency locating transmitters and emergency position indicating radio beacons
[NASA-CASE-GSC-12892-1] p 447 N85-20226

Trajectory measurements for take-off and landing tests and other short-range applications, volume 16
[AGARD-AG-160-VOL-16] p 604 N85-25801

The 121.5 MHz ELT: Past, present and future — Emergency Locator Transmitter (ELT)
p 782 N85-31105

**RADIO COMMUNICATION**

Applications of air-ground-air digital communication system ACARS/AIRCOM
[AIAA PAPER 84-2604] p 150 A85-17807

An adaptive airborne VLF communications array concept
[AIAA PAPER 84-2698] p 151 A85-17870

Airborne Communications Restoral/Relay
p 487 A85-32232

Ministry wants better commo facilities for agroaviation
p 127 N85-12003

Operational requirements versus technological capabilities p 204 N85-16798

Spectrum resource assessment of the Aeronautical Mobile Service between 400 MHz and 17.7 GHz
[PB85-125995] p 447 N85-20241

Survey of narrow band vocoder technology
[AD-A151919] p 606 N85-27114

**RADIO CONTROL**

The modelling and control of RC helicopter — Radio Control p 115 A85-15657

Designing an RPV - The Lockheed Aquila
p 411 A85-27367

Radio frequency test facility for evaluation of missile hardware p 432 A85-28621

**RADIO DIRECTION FINDERS**

A feasibility study of a VLF radio compass for Arctic navigation p 94 A85-14833

**RADIO ELECTRONICS**

Analysis and synthesis of radio-electronic complexes — Russian book p 124 A85-14631

**RADIO EQUIPMENT**

A reliability and survivability assessment tool for fault-tolerant integrated radio systems
p 824 A85-45143

**RADIO FREQUENCY INTERFERENCE**

Anomalous interference in Omega VLF wave propagation on east-to-west equatorial paths
p 14 A85-11024

Measurement of signal separation between radio service and air navigation service
[IRT-TB-B-40/82] p 246 N85-16860

Measurement of RF fields associated with ISM equipment as it relates to aeronautical services
[FAA-ES-84-2] p 796 N85-30180

**RADIO NAVIGATION**

A feasibility study of a VLF radio compass for Arctic navigation p 94 A85-14833

Navstar
[IAF PAPER 83-265] p 335 A85-23812

An austere GPS receiver for airborne applications
p 485 A85-32194

Geostar - A multi-purpose satellite system to serve civil aviation needs p 436 A85-32485

New airborne systems developed for navaids test and calibration p 488 A85-32489

Evaluation of radionavigation systems
p 643 A85-37831

Radio navigation and landing devices for IFR navigation with helicopters p 748 A85-40243

Radio navigation sensor p 749 A85-41016

The technical evolution of on-board clocks
p 853 A85-44053

GPS/AHRS - A synergistic mix p 822 A85-45023

Measurement of signal separation between radio service and air navigation service
[IRT-TB-B-40/82] p 246 N85-16860

Navigation: Accounting for copy p 568 N85-26641

Evaluation of radio navigation systems and their configuration with respect to minimum cost
[ESA-TT-847] p 751 N85-31043

**RADIO RECEIVERS**

C/A code receivers for precise positioning applications p 95 A85-14838

Low cost GPS receiver signal processing
p 95 A85-14841

Application of digital signal processing to a low data rate communications receiver
[AIAA PAPER 84-2652] p 183 A85-17839

A comparison of multichannel, sequential and multiplex GPS receivers for air navigation p 336 A85-25194

GPS/Navstar - Some experimental results
p 337 A85-25818

An example of a French Navstar/GPS receiver
p 337 A85-25819

An austere GPS receiver for airborne applications
p 485 A85-32194

Low cost GPS receiver design considerations
p 485 A85-32195

A GPS fast acquisition receiver p 486 A85-32205

**RADIO SCATTERING**

Theoretical investigation of single-frequency 8-element localizer signal scattering for critical area determination
[FAA-PM-85-4] p 751 N85-31037

**RADIO TELEMETRY**

Real time translator design considerations — for Global Positioning System p 487 A85-32208

**RADIO TRANSMISSION**

Propagation influences on Digital Transmission Systems: Problems and Solutions
[AGARD-CP-363] p 373 N85-19269

**RADIOACTIVE MATERIALS**

Examination of the feasibility for demonstration and use of radioluminescent lights for Alaskan remote runway lighting
[DE85-002503] p 431 N85-21185

**RADIOACTIVITY**

Evaluation of arctic test of improved tritium radioluminescent lighting
[AD-A148215] p 278 N85-16884

Light your runways and taxiways without electricity
[DE85-000289] p 429 N85-19991

**RADIOGRAPHY**

Aerospace radiography - The last three decades
p 906 A85-49100

**RADIOMETERS**

Attitude determination in a limb-scanning balloon radiometer p 655 A85-38319

Development of advanced high-temperature heat flux sensors. Phase 2: Verification testing
[NASA-CR-174973] p 911 N85-35391

**RADIOMETRIC CORRECTION**

An algorithm for radiometric and geometric correction of digital SLAR data p 56 A85-11216

**RADOME MATERIALS**

Continuous fibre reinforced thermoplastics in new generation radomes p 900 A85-48572

Proceedings of the Symposium on Electromagnetic Windows (17th) held at Georgia Inst. of Technology, Engineering Experiment Station, Atlanta, Georgia on 25-27 July 1984. Part 2
[AD-A149125] p 449 N85-21444

Development of a high temperature single impact rain erosion test capability
[AD-P004371] p 431 N85-21465

Laminated thermoplastic radome
[AD-D011664] p 691 N85-29045

**RADOMES**

Problems of radome design for modern airborne radar. II p 599 A85-34661

A radome for air traffic control SSR radar systems
[AD-P004373] p 449 N85-21467

Development of the F-20 nose radome
[AD-P004374] p 449 N85-21468

Nose and inlet duct radomes for the firebolt aerial target
[AD-P004375] p 449 N85-21469

Laminated thermoplastic radome
[AD-D011664] p 691 N85-29045

**RAIL TRANSPORTATION**

USSR report: Transportation
[JPRS-UTR-84-008] p 468 N85-23694

USSR report: Transportation
[JPRS-UTR-85-008] p 542 N85-25189

USSR report: Transportation
[JPRS-UTR-84-017] p 542 N85-25196

USSR report: Transportation
[JPRS-UTR-84-014] p 564 N85-25229

**RAIN**

Evaluation and correction of the adverse effects of (i) inlet turbulence and (ii) rain ingestion on high bypass engines
[AIAA PAPER 84-2486] p 109 A85-13561

Scaling laws for testing of high lift airfoils under heavy rainfall
[AIAA PAPER 85-0257] p 216 A85-19617

Measurements of water film characteristics on airf surfaces from wind-tunnel tests with simulated heav rain
[AIAA PAPER 85-0259] p 274 A85-1961

The aerodynamic effect of surface wettin characteristics on a laminar flow airfoil in simulated heav rain
[AIAA PAPER 85-0260] p 247 A85-1961

Aircraft and Doppler air motion comparisons in a JAWS microburst p 453 A85-2877

Scale-model tests of airfoils in simulated heavy rain
p 546 A85-3559

Laminated thermoplastic radome
[AD-D011664] p 691 N85-2904

**RAIN EROSION**

Development of a high temperature single impact ra erosion test capability
[AD-P004371] p 431 N85-2146

**RAMJET ENGINES**

Real gas effects in advanced technology engines
[AIAA PAPER 85-0252] p 262 A85-1961

SFRJ simulator results - Experiment and analysis in cold flow — Solid Fuel RamJet
[AIAA PAPER 85-0329] p 263 A85-1967

Analysis of steady, two-dimensi[illegible] chemically reacting, nonequilibrium, inviscid flow in noz[illegible]s
p 317 A85-2512

Response of a supersonic inlet to downstream perturbations p 386 A85-2709

Numerical study of a ramjet dump combustor flowfield
p 392 A85-2909

Evaluation of nozzle throat materials for ramje engines p 686 A85-3720

Interaction between acoustics and subsonic ducted flow in a ramjet configuration p 704 A85-3720

Combustion studies of metalized fuels for solid fue ramjets
[AIAA PAPER 85-1177] p 669 A85-3984

Numerical solutions of ramjet nozzle flows
[AIAA PAPER 85-1270] p 631 A85-3986

The 'new look' ramjet p 766 A85-4091

A study of ramjet engine. II - Altitude specific range a the ceiling p 766 A85-4101

An experimental investigation of combustion pressur oscillations in solid fuel ramjets
[AD-A144870] p 43 N85-1014

Pressure oscillations in liquid-fueled ramjet engines
p 169 N85-1379

Combined cycle ramjet engine
[AD-D011247] p 170 N85-1485

Analysis of sudden expansion flow in a two-dimensiona duct with and without side-wall injection using the k-epsilo turbulence model p 371 N85-1828

Window on science visit to the USA, 21 March - 2 April, 1984 — ramjets and solid propellant rocketry
[VTH-LR-426] p 432 N85-2001

Study of HTPB-based SOFRAM fuels
[FOA-C-20563-D3] p 437 N85-2015

Selection of air intake parameters for supersonic-flow operation p 527 N85-2283

Fiscal year 1986 technical objective document
[AD-A151039] p 539 N85-2500

Gasdynamic evaluation of choking cascade turns
[AD-A151854] p 603 N85-2577

An experimental investigation of fuel regression rat control in solid fuel ramjets
[AD-A154251] p 782 N85-3000

A model of hypersonic two-dimensional obliqu detonation wave ramjet
[UTIAS-TN-257] p 891 N85-3413

**RAMJET MISSILES**

Liquid-fueled ramjets
[ONERA, TP NO. 1984-112] p 111 A85-1583

**RAMP FUNCTIONS**

The collected data for ramp function tests on a NACA 23012 aerofoil. Volume 1: Description and pressur data
[GU-AERO-8413-VOL-1] p 875 N85-3412

**RAMPS (STRUCTURES)**

Tensile ski-jump ramp for aircraft takeoff
[AIAA PAPER 85-0802] p 491 A85-3030

**RANDOM LOADS**

Fatigue crack growth analysis under random spectrum loading using the generalized Willenborg model
p 49 A85-1166

Snap-through of initially buckled beams under uniform random pressure p 51 A85-1245

Fractographic observation and estimation of crac growth curve of aluminum alloy under ramdom fligh simulation loading
[NAL-TR-824] p 180 N85-1491

**RANDOM PROCESSES**

Flutter and divergence boundary prediction from nonstationary random responses at increasing flow speeds
[AIAA PAPER 85-0691] p 523 A85-3035

Random air traffic generation for computer models p 567 A85-36509

**RANDOM VIBRATION**
Motion of a flexible wing at supersonic velocity under the effect of a random gust p 393 A85-30108
Efficiencies of multiple-input techniques for aircraft ground vibration testing [SAE PAPER 841575] p 682 A85-39274
Stochastic motor blade dynamics [AD-A146312] p 105 N85-12054
Random vibrations of aircraft engine blades p 170 N85-14967

**RANGE FINDERS**
Observability of relative navigation using range-only measurements p 750 A85-42399

**RANGEFINDING**
Anomalous clutter interference in radar ranging p 335 A85-24912
High dynamic, low volume GPS receiver p 487 A85-32206
Translated GPS real-time tracking p 487 A85-32209

**RANKINE CYCLE**
Modeling of a second-generation solar-driven Rankine air conditioner [DE84-015132] p 52 N85-10223

**RARE GASES**
Design for military aircraft on-board inert gas generation systems [AIAA PAPER 84-2518] p 109 A85-13581

**RAREFIED GAS DYNAMICS**
Determination of rarefied-flow aerodynamics of the Shuttle orbiter from flight measurements on STS-6 and STS-7 [AIAA PAPER 85-0347] p 219 A85-19686
Flow fields near bodies placed in rarefied subsonic and supersonic jets p 322 A85-26016
Equation associated with the theory of local interaction in a rarefied gas p 394 A85-30110
Knudsen layer characteristics for a highly cooled blunt body in hypersonic rarefied flow p 545 A85-35127
The drag of simple shaped bodies in the rarefied hypersonic flow regime [AIAA PAPER 85-0998] p 621 A85-37642
Hypersonic gas dynamics [AIAA PAPER 85-0999] p 621 A85-37643
The effect of the bluntness shape on the drag coefficient of a body in hypersonic flow of a rarefied gas p 624 A85-38564
Study of stresses on surface of flat barrier immersed in under expanded jet of rarefied gas p 562 N85-27061
Unsteady transonic heat transfer in a transient facility [NASA-CR-176145] p 910 N85-34354

**RAREFIED GASES**
Aerodynamic and thermal characteristics of stellate bodies in hypersonic flow of rarefied gas at angle of attack p 146 N85-14974
Experimental investigation of heat transfer to bluff cylinders and cones in hypersonic rarefied gas flow p 396 N85-20195

**RATES (PER TIME)**
Influence of sampling rate on the calculated fidelity of an aircraft simulation p 57 A85-11083
An evaluation of flashtube signal characteristics [AD-A149569] p 339 N85-18974

**RAY TRACING**
High frequency estimation of 2-dimensional cavity scattering [AD-A151697] p 602 N85-25696

**REACTION KINETICS**
Chemical reactions involved in the initiation of hot corrosion of IN-738 p 519 A85-31688
A study of intumescent reaction mechanisms [AD-A149605] p 437 N85-21365

**REACTION PRODUCTS**
Radiative transfer in a gas turbine combustor [AIAA PAPER 85-1072] p 658 A85-37682

**REACTION TIME**
Experimental investigation of the short period response requirements of MIL-F-8785C — flying qualities of piloted aircraft [AIAA PAPER 85-1806] p 839 A85-43856

**REACTOR TECHNOLOGY**
USSR report: Engineering and equipment [JPRS-UEQ-85-003] p 526 N85-22782

**REAL GASES**
Real gas effects in advanced technology engines [AIAA PAPER 85-0252] p 262 A85-19615
Real-gas flowfields about three-dimensional configurations p 231 A85-21830

**REAL TIME OPERATION**
The design of an on-board look-ahead-simulation for approach p 96 A85-15658
Real time data processing for avionics testing on the A-6E [AIAA PAPER 84-2666] p 175 A85-17852
Evaluation of a real-time predictive guidance law for landing VTOL aircraft at sea [AIAA PAPER 84-2673] p 151 A85-17856
Four-dimensional fuel-optimal guidance in the presence of winds p 158 A85-18328
An empirical study of the methodology for real-time air traffic control system simulation testing p 375 A85-24085
Considerations in level of fidelity in real-time avionic system simulations [AIAA PAPER 84-2437] p 338 A85-26322
A unified method for evaluating real-time computer controllers and its application p 458 A85-29408
Real time translator design considerations — for Global Positioning System p 487 A85-32208
Translated GPS real-time tracking p 487 A85-32209
Moving target, distributed, real-time simulation using Ada p 609 A85-34131
Optimal generalized multistep integration formulae for real-time digital simulation [AIAA PAPER 85-1740] p 802 A85-40556
A ring-vortex downburst model for real-time flight simulation of severe wind shears [AIAA PAPER 85-1749] p 799 A85-40561
Real-time analysis of a digital multiloop flight control system p 840 A85-45050
Real time simulation of airborne radar systems p 849 A85-45124
A generalized computer code for developing dynamic gas turbine engine models (DIGTEM) p 890 A85-49021
Reconnoitering the electromagnetic spectrum p 879 A85-49094
A unified method for evaluating real-time computer controllers: A case study — aircraft control [NASA-CR-174168] p 132 N85-13478
Some characteristics of automotive gasolines and their performance in a light aircraft engine [FAA-CT-84-12] p 283 N85-15919
The effect on software design of testing by symbolic execution p 303 N85-16750
Reliable software design for avionics and space applications p 303 N85-16751
Interface specifications for SCR (Software Cost Reduction) (A-7E) extended computer module, revised [AD-A149948] p 459 N85-22024
Graphic simulation of a machine-repairman model [AD-A151761] p 543 N85-26833
Design and specification of a local area network architecture for use in real-time flight simulation [AD-A152242] p 594 N85-26762
Data processing on the rotor test stand at DFVLR in Brunswick: Microprogrammable interfaces and array processor as key components in a PDP 11 real time data acquisition and processing system [DFVLR-MITT-85-03] p 684 N85-27921

**REATTACHED FLOW**
Effect of initial conditions on turbulent reattachment downstream of a backward-facing step p 80 A85-15331
Modification of vortex interactions in a reattaching separated flow [AIAA PAPER 85-0555] p 321 A85-25946
Flow separation from the leading edge of an airfoil and the effect of acoustic perturbations on the separated flow p 694 A85-38510

**RECEIVERS**
High dynamic, low volume GPS receiver p 487 A85-32206
Using the control system design environment in the design of a data link receiver unit for the Coast Guard HH-65A helicopter [AD-A148624] p 271 N85-16860
The susceptibility of aeronautical navigational aids to interference from adjacent-band broadcast transmissions [BBC-RD-1984/12] p 371 N85-18234

**RECESSION**
Results of variable enthalpy tests of CPR-488 TIP panels in MSFC Hot Gas Facility [NASA-CR-170889] p 902 N85-35237

**RECIPROCATION**
Certification of reciprocating engine aircraft oils and additives by supplemental type certification procedures [SAE PAPER 850899] p 901 A85-50116

**RECIRCULATIVE FLUID FLOW**
Calculation of confined swirling flows [AIAA PAPER 85-0060] p 285 A85-19491
A study of the flow recirculation problems within an anechoic hover chamber [AIAA PAPER 85-0071] p 273 A85-19497
Computation of recirculating compressible flow in axisymmetric geometries [AIAA PAPER 85-0185] p 286 A85-19575
Modelling turbulent recirculating flows in complex geometries p 445 A85-29967
Influence of the blockage ratio on the efficiency of swirl generation with vane swirlers [AIAA PAPER 85-1103] p 696 A85-39605
Flow past rectangular cylinder of square section placed on a plane boundary p 724 A85-41024

**RECONNAISSANCE**
Marine helicopter missions p 139 N85-14611

**RECONNAISSANCE AIRCRAFT**
Burbank's Blackbirds — encompassing SR-71 reconnaissance aircraft and YA-12/12-A interceptors p 252 A85-22081
RF-5e production development and flight test p 346 A85-24253
Sirius - An advanced concept for photo-interpretation p 367 A85-24259
Airworthiness and flight characteristics test of the RC-12D Guardrail V [AD-A148046] p 258 N85-16864

**RECONNAISSANCE SPACECRAFT**
A method for determining mesoscale dynamic topography [AD-D011412] p 300 N85-17506

**RECORDING**
Low altitude high speed flight simulation using video disc technology [AD-P004312] p 358 N85-17966

**RECOVERABLE LAUNCH VEHICLES**
Winged first stages of space transport appliances [TUM-RT-TB-84/3] p 40 N85-11125

**RECOVERY**
Calibration loading of a strain-gauged diverless helicopter weapon recovery system [AD-A151486] p 575 N85-25253

**RECOVERY PARACHUTES**
A 73-ft cross parachute for cargo delivery p 402 A85-29264
B-52B/DTV (Drop Test Vehicle) flight test results: Drop test missions [NASA-CR-171530] p 741 N85-29934

**RECOVERY VEHICLES**
Calibration loading of a strain-gauged diverless helicopter weapon recovery system [AD-A151486] p 575 N85-25253

**RECTANGLES**
An experimental investigation of an underexpanded rectangular jet ejector [AD-A149656] p 422 N85-21170

**RECTANGULAR PANELS**
Critical flutter parameters of orthotropic rectangular flat panels with in-plane loads p 693 A85-37192
Noise transmission loss of a rectangular plate in an infinite baffle [NASA-TP-2398] p 461 N85-22109

**RECTANGULAR PLANFORMS**
Aerodynamic improvements by discrete wing tip jets [AD-A148981] p 330 N85-18964

**RECTANGULAR PLATES**
Vibration response and sound radiation from beams, plates, and cylinders excited by nonhomogeneous random pressure fields [AIAA PAPER 84-2327] p 61 A85-10871
Vibrations of a plate induced by an aerodynamic turbulent boundary layer p 377 A85-22575
Heat transfer from rectangular plates inclined at different angles of attack and yaw to an air stream p 600 A85-35593

**RECTANGULAR WIND TUNNELS**
Laser-three-slice (L3S) velocimeter and applications in aerodynamics flow field measurements p 368 A85-25224

**RECTANGULAR WINGS**
Three-dimensional effects on a pitching lifting surface [AIAA PAPER 85-0041] p 208 A85-19476
Crossflow drag of finite-length rectangular wing-bodies [AIAA PAPER 85-0451] p 224 A85-19760
Harmonic oscillations of a rectangular wing with a circulation variable over the span p 231 A85-21656
Wing-in-ground effect aerodynamic predictions using PANAIR [AIAA PAPER 84-2429] p 322 A85-26321
Lifting surface approach of oscillating wings in weak shear flow p 394 A85-30201
Aerodynamic properties of some flexible profiles p 473 A85-32506
Cl Beta of unswept flat wings in sideslip. II p 623 A85-38371
The spanwise variation of laminar separation bubbles on finite wings at low Reynolds numbers [AIAA PAPER 85-1590] p 712 A85-40706

Numerical analysis of aerodynamic characteristics of an aeroplane wing in compressible flow p 726 A85-41606
Effects of viscosity and modes on transonic aerodynamic and aeroelastic characteristics of wings p 817 A85-45837
On the flow processes in sharply inclined and stalled airfoils in parallel movement and rotation [NASA-TM-77509] p 328 N85-18952
Transonic pressure distributions on a two-dimensional 0012 and supercritical MBB-A3 profile oscillating in heave and pitch p 554 N85-25173
Gust load alleviation of a cantilevered rectangular elastic wing. Wind tunnel experiment and analysis [NAK-TR-86] p 681 N85-28950

REDUCED GRAVITY
Low-gravity solidification of cast iron and space technology applications p 44 N85-11022
Design and implementation of a low-gravity solidification experiment package for the F-104 p 40 N85-11053
Investigation of surface tension phenomena using the KC-135 aircraft [NASA-TM-82508] p 382 N85-18995

REDUNDANCY
Sensor failure detection for jet engines using analytical redundancy [AIAA PAPER 84-1452] p 167 A85-16097
Ultrareliable fault-tolerant control systems [AIAA PAPER 84-2650] p 194 A85-17837
Are two always better than one? — aircraft systems redundancy in number of engines, pilots, and crew protection p 496 A85-31997
Redundancy management in strapdown navigation systems p 644 A85-38530
An advanced signal selection algorithm — for redundancy management of flight control sensors p 841 A85-45064
Digital flight control and avionics integration techniques p 834 A85-45156
Analytical redundancy management mechanization and flight data analysis for the F-8 digital fly-by-wire aircraft flight control sensors [NASA-CR-170396] p 173 N85-14844
Analytically redundant output feedback scheme for reduction of structural loads of a flexible transport aircraft [TT-8303] p 417 N85-21154
Some flight test results with redundant digital flight control systems p 589 N85-26739
Intelligent redundant actuation system requirements and preliminary system design [NASA-CR-177386] p 886 N85-34136

REDUNDANT COMPONENTS
A reconfigurable redundancy management strategy for a triplex DFBW system p 35 A85-12361
Flight test configuration for verifying inertial sensor redundancy management techniques [AIAA PAPER 84-2496] p 92 A85-13568
New results in fault latency modelling — in redundant flight control system p 107 A85-14457
Optimal maintenance center inventories for fault-tolerant repairable systems p 301 A85-21548
Control system reconfiguration p 917 A85-47793
Intelligent redundant actuation system requirements and preliminary system design [NASA-CR-177386] p 886 N85-34136

REENTRY
Terminal control of gliding in atmosphere p 174 N85-14968

REENTRY GUIDANCE
Terminal control of gliding in atmosphere p 174 N85-14968

REENTRY PHYSICS
Two-dimensional deforming finite element methods for surface ablation p 368 A85-25147

REENTRY TRAJECTORIES
Use of GPS for determining position of drifting buoys p 486 A85-32204
Minimax optimal control and its application to the reentry of a space glider p 899 A85-47306

REENTRY VEHICLES
Application of axisymmetric analogue for calculating heating in three-dimensional flows [AIAA PAPER 85-0245] p 216 A85-19611
Angular motion influence on re-entry vehicle ablation or erosion asymmetry formation p 431 A85-26446
Wavenders p 595 A85-34193
Supersonic aerodynamic characteristics of some reentry concepts for angles of attack up to 90 deg [AIAA PAPER 85-1795] p 812 A85-43849
Aerodynamics for an entry research vehicle [AIAA PAPER 85-1793] p 814 A85-43879
On rolling resonance and small asymmetrical aerodynamic force of re-entry body p 873 A85-49708
Minimax optimal control in the reentry of a space glider p 40 N85-11124
Terminal control of gliding in atmosphere p 174 N85-14968

REFERENCE SYSTEMS
GPS/AHRS - A synergistic mix p 822 A85-45023

REFINING
Jet fuel property changes and their effect on producibility and cost in the U.S., Canada, and Europe [NASA-CR-174840] p 598 N85-27012

REFLECTED WAVES
Experimental study of Mach reflection of weak shock waves p 124 A85-14888

REFLECTORS
Reflector antennas with directional effect in the near-field Characteristics and applications --- German thesis p 267 A85-19837

REFRACTIVITY
Compound class quantitation of JP-5 jet fuels by high performance liquid chromatography-differential refractive index detection [AD-A145754] p 120 N85-12185
Quantitative determination of compound classes in jet turbine fuels by high performance liquid Chromatography/Differential refractive index detection: Part 2 [AD-A149298] p 436 N85-20144

REFRACTORY COATINGS
Life prediction and constitutive models for engine hot section anisotropic materials [AIAA PAPER 85-1421] p 852 A85-43980

REFRACTORY MATERIALS
Engineering ceramics p 362 A85-24229
The use of high-temperature ceramics in diesel and gas-turbine engines (Review) p 518 A85-31487
Milling of Si3N4 with Si3N4 hardware [NASA-TM-86864] p 43 N85-10191
Nonlinear analysis for high-temperature multilayered fiber composite structures — turbine blades [NASA-TM-83754] p 437 N85-21273

REFRIGERANTS
Optimization of a ground coupled heat pump [DE85-000273] p 374 N85-19380

REFRIGERATING MACHINERY
Magentically actuated compressor [NASA-CASE-GSC-12799-1] p 448 N85-21404

REFRIGERATORS
A fast cool-down J-T minicryocooler p 438 A85-26510
Combined cold compressor/ejector helium refrigerator [DE85-006408] p 910 N85-34326

REFUELING
Safety recommendation(s), A-84-103 [REPT-3909B/101B] p 484 N85-23745

REGENERATION (ENGINEERING)
Analysis of the transient and steady-state heat transfer in rotary regenerative heat exchanger p 366 A85-24098

REGENERATORS
Preliminary mechanical redesign of an existing gas-turbine engine to incorporate a high-efficiency, low-pressure-ratio, highly regenerative cycle for marine applications [AD-A144808] p 28 N85-10070
Selecting the proper ceramic material for a regenerator experiencing large temperature gradients [AD-A144796] p 43 N85-10199

REGRESSION ANALYSIS
Parametric estimates of propulsion system maintenance manhours [AD-A147120] p 201 N85-15662
An experimental investigation of fuel regression rate control in solid fuel ramjets [AD-A154251] p 782 N85-30008
Regression diagnostics in practice: Experiences from modelling jet engine costs [AD-A154199] p 804 N85-30748
Using regression analysis for determining air data sensor errors by means of an inertial navigation system [ESA-TT-886] p 751 N85-31041
Development of NATOPS performance software for the SH-3D and SH-3H helicopters [AD-A156140] p 887 N85-35192

REGULATIONS
FAA regulation of ultralight vehicles p 66 A85-11938
Air transport deregulation - The US experience and its applicability to Europe p 705 A85-39369
Meeting the 1985 FAA noise regulations with old engines and modern acoustic technology [AIAA PAPER 85-1120] p 651 A85-39616
Simple aircraft p 707 A85-40293
Bush aviation - How effective are present regulations? p 745 A85-41731
The extended range operation of twin-engined public transport aircraft. II p 881 A85-49174
The extended range operation of twin-engined public transport aircraft. III p 882 A85-49175
Strategies for preparing and submitting a part B application for a DoD facility [AD-P004139] p 375 N85-18475
Airport bird hazards associated with solid waste disposal facilities [AD-P004197] p 428 N85-19964
The FAA grant-in-aid assurances: FAR part 139, and airport hazards [AD-P004209] p 429 N85-19976
Ultralight aircraft technology and public safety [GPO-38-948] p 405 N85-21131
Do new aircraft need new technologies and certification rules? p 503 N85-23795
Civil air code international flights section explained p 563 N85-25194
FAA regulation of 9-seat and under passenger aircraft [GPO-42-703] p 747 N85-31032

REGULATORS
Time-domain stability robustness measures for linear regulators p 703 A85-39565
Modal synthesis of multidimensional PI-regulators for objects with inertial sections p 529 N85-24064

REINFORCED PLASTICS
Effects of moisture on high performance laminates p 435 A85-29929
The state of the art of reinforced plastics p 852 A85-45739
Impressions from a study tour in Finland concerning fiber reinforced plastics, June 1984 [FOA-C-20552-D2(E4,F9)] p 283 N85-15831

REINFORCED PLATES
Control of the properties of carbon fiber-reinforced plastics p 118 A85-12722

REINFORCED SHELLS
The buckling of a stiffened cylindrical shell heated by an internal gas flow with varying thermodynamic parameters p 158 A85-16916

REINFORCEMENT (STRUCTURES)
Reinforcements for aeronautical roadways p 176 A85-18873
Modern forming procedures for integral structural components which are strengthened by stringers or ribs [DGLR PAPER 84-086] p 789 A85-40306

REINFORCING FIBERS
Kevlar aramid fibers vs other fibers for reinforcement of composite structures p 282 A85-21392
Fibers for structurally reliable metal and ceramic composites p 687 A85-37484
High performance fibers for structurally reliable metal and ceramic composites — advanced gas turbine engine materials [NASA-TM-86878] p 119 N85-12095
Impressions from a study tour in Finland concerning fiber reinforced plastics, June 1984 [FOA-C-20552-D2(E4,F9)] p 283 N85-15831

REINFORCING MATERIALS
Reinforcements for aeronautical roadways p 176 A85-18873

RELATIVISTIC EFFECTS
Relative effects of Reynolds number and freestream turbulence in transonic flow p 391 A85-29085

RELAXATION (MECHANICS)
Effect of the Basset term on particle relaxation behind normal shock waves [AD-A145446] p 54 N85-11320
On relaxation of transonic flows around zero-lift airfoils and convergence of self-correcting wing tunnels p 396 N85-20214

RELAXATION METHOD (MATHEMATICS)
Potential equation for transonic steady flow with large longitudinal disturbance and line relaxation p 142 A85-18281
A relaxation approach to patched-grid calculations with the Euler equations [AIAA PAPER 85-0295] p 218 A85-19644
A stream function relaxation method for solving transonic S1 stream surface with respect to non-orthogonal curvilinear coordinates p 228 A85-20240
Theoretical contributions to transonic flow analysis for transport aircraft [BMFT-FB-W-84-036] p 239 N85-16838

RELIABILITY
Determining operating and support costs with USAF DO56 maintenance data collection system p 865 A85-49553
Avionics integrity program (Avip). Volume 3: Program cost assessment - environmental stress screening and diagnostic techniques [AD-A145644] p 25 N85-10942
Editorial urges improved aviation repair work quality p 72 N85-12004
More than you want to know about maximum likelihood estimation [NASA-TM-85905] p 270 N85-15752

Integrated Technology Rotor/Flight Research Rotor (ITR/FRR) concept definition
[NASA-CR-166445] p 345 N85-18979
Integrated Technology Rotor/Flight Research Rotor (ITR/FRR) concept definition study
[NASA-CR-166444] p 345 N85-18981
Special power train requirements for the next generation of rotary-wing aircraft p 510 N85-23769
Fine filtration: An attractive route towards lower helicopter operating costs p 503 N85-23774
Estimate of fatigue stability of gas-turbine engine compressor vanes in probabilistic aspect
p 530 N85-24169
Avionics integrity issues presented during NAECON (National Aerospace and Electronics Convention) 1984
[AD-A151923] p 579 N85-26707
Technical evaluation report on the Flight Mechanics Symposium on Active Control Systems: Review, Evaluation and Projections
[AGARD-AR-220] p 588 N85-26730
Initial quality of advanced joining concepts
[AD-A152241] p 606 N85-27027

Energy efficient transport technology: Program summary and bibliography
[NASA-RP-1135] p 630 N85-33116

**RESEARCH AIRCRAFT**

Future technologies using the Lockheed HTB aircraft — High Technology Test Bed
[AIAA PAPER 84-2466] p 70 A85-13552

Joined-wing research airplane feasibility study
[AIAA PAPER 84-2471] p 99 A85-13553

The risks of research and development flying
p 103 A85-14750

Role of research aircraft in technology development
[AIAA PAPER 84-2473] p 155 A85-16106

Icing conditions encountered by a research aircraft
p 299 A85-21141

Advanced AFCS developments on the XV-15 tilt rotor research aircraft — Automatic Flight Control System
p 512 A85-32013

X-Wing Harrier speed and helicopter hovering
p 572 A85-35352

Oblique wing ready for research aircraft
p 573 A85-36149

The DFVLR flight-test vehicle ATTAS
[DGLR PAPER 84-093] p 753 A85-40312

On the propulsion system of the quiet STOL research aircraft p 766 A85-41034

Flight evaluation of longitudinal flying qualities parameters
[AIAA PAPER 85-1789] p 838 A85-43847

Two federal agencies support hypersonic transport research p 810 A85-44974

A preliminary flight evaluation of the peripheral vision display using the NT-33A aircraft
[AD-A145123] p 24 N85-10060

YC-3A acoustics research aircraft systems manual
[NASA-TM-85968] p 37 N85-10074

Role of research aircraft in technology development
[NASA-TM-85913] p 21 N85-10932

First stage of equipping a Do 28 as a research aircraft for icing, and first research results
[ESA-TT-855] p 416 N85-19982

ADAPS (Airborne Data Acquisition and Processing System) operation and maintenance manual
[AD-A149297] p 416 N85-19983

Miniature electrooptical air flow sensor
[NASA-CASE-LAR-13065-1] p 447 N85-20295

Civil avionics flight testing with the RAE(B) BAC1-11
p 504 N85-22354

Multivariable control law design for the X-29 aircraft
[AD-A151828] p 576 N85-25259

X-29 digital flight control system design
p 677 N85-27889

The flight control system for the Experimental Aircraft Programme (EAP) demonstration aircraft
p 680 N85-27908

West Europe report: Science and technology
[JPRS-WST-85-020] p 797 N85-31333

MBB demonstrates new research aircraft ATTAS
p 762 N85-31334

**RESEARCH AND DEVELOPMENT**

New developments in aeroelastic research
p 51 A85-12352

Low cost demonstrators for maturing technologies — in military aircraft development
[AIAA PAPER 84-2472] p 99 A85-13554

Future requirements for integrated flight controls
[AIAA PAPER 84-2494] p 114 A85-13567

Aeronautical technology 2000 - A projection of advanced vehicle concepts
[AIAA PAPER 84-2501] p 100 A85-13572

The role of modern control theory in the design of controls for aircraft turbine engines p 109 A85-13627

Improved auxiliary clutch for CH-53 helicopters
p 123 A85-13699

The risks of research and development flying

[JPRS-CST-84-039] p 446 N85-20205

Activities in flight mechanics and flight control
[ISSN-0720-7808] p 515 N85-23803

Research and technology
[NASA-TM-86662] p 539 N85-25186

Flight testing and development of the F/A-18A digital flight control system p 590 N85-26743

Research and development. Technical and scientific reports 1984 p 613 N85-27724

Test devices for aeronautical research and technology
[NASA-TM-77651] p 683 N85-27914

Multi-ducted inlet combustor research and development
[AD-A153753] p 673 N85-28946

The economics of private sector R and D decisionmaking in aeronautics
[NASA-CR-176007] p 807 N85-30962

**RESEARCH FACILITIES**

The Western Aeronautical Test Range of NASA Ames Research Center
[AIAA PAPER 85-0316] p 275 A85-19678

Research and technology highlights of the Lewis Research Center
[NASA-TM-86899] p 309 N85-17928

The Prandtl Hergesell project of a national research establishment for aeronautics
[ESA-TT-835] p 313 N85-17983

Langley aeronautics and space test highlights, 1984
[NASA-TM-87585] p 820 N85-35151

**RESEARCH MANAGEMENT**

Characteristics of systems engineering in aviation science research
[AD-A145602] p 67 N85-11899

Research and technology
[NASA-TM-86321] p 67 N85-11973

Integrated technology wing study (oral presentation)
[NASA-CR-169497] p 256 N85-15718

An overview of the research program at the visual technology research simulator
[AD-P004321] p 359 N85-17975

Research on structural analysis at the DFVLR, Brunswick p 701 N85-29314

The evolution of the U.S. helicopter industry
[AD-A154290] p 709 N85-29913

**RESEARCH PROJECTS**

An overview of the research program at the visual technology research simulator
[AD-P004321] p 359 N85-17975

**RESEARCH VEHICLES**

Aerodynamics for an entry research vehicle
[AIAA PAPER 85-1790] p 814 A85-43879

**RESIDUAL STRENGTH**

Fracture analysis of stiffened structure
p 126 A85-15864

**RESIDUAL STRESS**

Effect of residual stresses on crack growth from a hole p 124 A85-15339

Study of residual stresses introduced into TA6ZrD (685) cylinders by quenching — compressor disk alloy
[PNR-90240] p 372 N85-18435

Development of a mathematical model for predicting the percentage fatigue life increase resulting from shot peened components [AD-A155774] p 912 N85-35425

**RESIN BONDING**

Ageing of structural film adhesives - Changes in chemical and physical properties and the effect on joint strength p 434 A85-27913

**RESIN MATRIX COMPOSITES**

Development of resins for damage tolerant composites - A systematic approach p 118 A85-14167

V-378A, a new modified bismaleimide matrix resin for high modulus graphite p 282 A85-21482

System for rapid repair of damaged airfield runways [AD-D011325] p 276 N85-15754

NASA/aircraft industry standard specification for graphite fiber toughened thermoset resin composite material [NASA-RP-1142] p 597 N85-26923

**RESINS**

Quasi-steady analysis of aircraft panel flammability [AD-A145461] p 22 N85-10938

**RESISTANCE THERMOMETERS**

Measurement of wing-leading-edge heating rates on wind tunnel models using the thin-film technique [AIAA PAPER 85-0972] p 681 A85-37622

Dynamic behaviour of cold wires in heated airflows (T in the range from 300 to 600 K) p 694 A85-38069

High temperature static strain sensor development program p 29 N85-10959

**RESOLUTION**

SODERN Visualization System (SVS) for flight simulation [AD-P004320] p 358 N85-17974

**RESONANCE**

Experimental on-stream elimination of resonant whirl in a large centrifugal compressor p 187 N85-14121

**RESONANT FREQUENCIES**

Organized structures in wakes and jets - An aerodynamic resonance phenomenon p 77 A85-14344

An optimality criterion method for structures with stress, displacement and frequency constraints p 290 A85-21985

Local instability characteristics and frequency determination of self-excited wake flows p 623 A85-38430

The use of an optical data acquisition system for bladed disk vibration analysis [NASA-TM-86891] p 190 N85-15184

Electromagnetic resonances of cylinders and aircraft model with resistive wires [NASA-CR-174203] p 192 N85-15319

**RESONANT VIBRATION**

Helicopter ground resonance - A spatial model analysis p 18 A85-11473

Resonance vibrations of skeleton models of turbine blades with a composite fir-tree root p 26 A85-11821

The effect of acoustic disturbances on the vibrations of a multilayer plate p 64 A85-11823

Analysis of longitudinal natural vibrations of an aeroplane with moving deformable control surfaces p 115 A85-15718

Rotorcraft air resonance in forward flight with various dynamic inflow models and aeroelastic couplings p 492 A85-30943

The effect of design parameters on the ground resonance of helicopters p 493 A85-31780

A method for computing the drag rise Mach number for any aerofoil section p 472 A85-31781

Probabilistic characteristics of the frequency spectrum of the natural vibrations of turbocompressor blades p 526 A85-32759

A discrete model for the analysis of natural vibrations of a deformable aeroplane p 757 A85-41605

The effect of the Magnus moment on the motion stability of an asymmetric flight vehicle p 850 A85-44848

On rolling resonance and small asymmetrical aerodynamic force of re-entry body p 873 A85-49708

**RESOURCE ALLOCATION**

Atlas avionics automatic resource allocation - A statement and solution of the problem p 456 A85-26832

**RESOURCES MANAGEMENT**

Managing recoverable aircraft components in the PPB and related processes: Executive summary [AD-A146806] p 308 N85-16667

Estimating wartime support resource requirements. Statistical and related policy issues [AD-A147923] p 308 N85-16685

Cockpit resource management training p 333 N85-18023

Managing recoverable aircraft components in the PPB (Planning, Programming and Budgeting) and related processes. Technical volume [AD-A152014] p 542 N85-25169

Navy geothermal plan [AD-A152478] p 702 N85-28450

**RESPONSES**

Controller requirements for uncoupled aircraft motion, volume 2 [AD-A153300] p 676 N85-27879

**RETIREMENT FOR CAUSE**

Manufacturing technology for nondestructive evaluation (NDE) system to implement retirement for cause (RFC) procedures for gas turbine engine components p 905 A85-47469

NDT-33 - A computerized eddy current instrument p 906 A85-47470

Electric Current Perturbation inspection of selected retirement-for-cause turbine engine components p 906 A85-47474

Exploratory development of advanced surface flaw detection methods [AD-A148757] p 354 N85-18060

**RETRACTABLE EQUIPMENT**

Determination of the axis and the angle of rotation for a retractable landing gear p 19 A85-12357

Selection of effective arrangement of heavy undercarriage systems for use with concrete runways p 503 N85-24158

**REUSABLE HEAT SHIELDING**

Results of tests of advanced flexible insulation vortex and flow environments in the North American Aerodynamics Laboratory lowspeed wind tunnel using 0.0405-scale Space Shuttle Orbiter model 16-0 (test OA-309) [NASA-CR-167692] p 39 N85-10096

**REUSABLE SPACECRAFT**

Winged first stages of space transport appliances [TUM-RT-TB-84/3] p 40 N85-11125

**REVERSED FLOW**

Determinaiton of the angles of flow incident on the rotating cascade of a reversing device p 366 A85-24002

A computer simulation of separated flow past a rotating cylinder and the Magnus force reversal p 390 A85-28465

Near-sonic subsonic flow around a profile - In particular: the foot-point structure of a shock and the flow-reverse theorem p 553 A85-36342

Small gas turbine combustor study - Fuel injector performance in a transpiration-cooled liner [AIAA PAPER 85-1312] p 668 A85-39717

**REVISIONS**

Facelift gives B-52 new lease on life p 103 A85-14013

Meeting tomorrow's standards with yesterday's simulators - The problems of upgrading p 174 A85-17228

F-16 - Into the 1990s p 414 A85-29799

Preliminary mechanical redesign of an existing gas-turbine engine to incorporate a high-efficiency, low-pressure-ratio, highly regenerative cycle for marine applications [AD-A144808] p 28 N85-10070

United States Air force aircraft modification process: A system dynamics analysis [AD-A146954] p 200 N85-15659

**REYNOLDS NUMBER**

Boundary layers and separation on a spheroid at incidence p 145 A85-18683

Relative effects of Reynolds number and freestream turbulence in transonic flow p 391 A85-29085

Reynolds number dependence of vortex patterns in accelerated flow around airfoils p 470 A85-30525

Flow around a circular cylinder in the first subregion of the critical range [AIAA PAPER 85-1715] p 725 A85-41413

Transition effects of boundary layer on static and dynamic stability of slender cone p 731 A85-42783

The effect of Reynolds number on normal and side forces on ogive-cylinders at high incidence [AIAA PAPER 85-1799] p 813 A85-43852

A review and analysis of boundary layer transition data for turbine application [NASA-TM-86880] p 53 N85-10306

Laminar flow heat exchangers. Viscosity induced non-uniform flow [AD-A144777] p 53 N85-10307

Development of the code NSFOIL for analyzing high Reynolds number transonic flow around an airfoil [NAL-TR-816] p 147 N85-14801

Pneumatic turbulators: A device for drag reduction at Reynolds numbers below 5 million p 257 N85-16791

A visual study of a delta wing in steady and unsteady motion [AD-P004158] p 324 N85-17943

Skin friction measurements for 2 relatively thick airfoil sections at high Reynolds number [AD-A150021] p 399 N85-21125

Cryogenic wind tunnels: A selected annotated bibliography [NASA-TM-86346] p 516 N85-22401

The structure of separated flow regions occurring near the leading edge of airfoils, including transition [NASA-CR-175670] p 478 N85-23703

High Reynolds number tests of a NASA SC(3)-0712(B) airfoil in the Langley 0.3-meter transonic cryogenic tunnel [NASA-TM-86371] p 740 N85-29926

Pressure distribution from high Reynolds number tests of a NASA SC(3)-0712(B) airfoil in the Langley 0.3-meter transonic cryogenic tunnel [NASA-TM-86370] p 740 N85-29927

Low-speed tests of a high-aspect-ratio, supercritical-wing transport model equipped with a high-lift flap system in the Langley 4- by 7-meter and Ames 12-foot pressure tunnels [NASA-TP-2097] p 742 N85-31010

Heat transfer in aeropropulsion systems [NASA-TM-87066] p 798 N85-31444

The aerodynamic characteristics of a GU25-5(11)8 aerofoil for low Reynolds numbers [GU-AERO-8410] p 874 N85-34121

**REYNOLDS STRESS**

Reynolds-stress measurements in a turbulent trailing vortex p 77 A85-14244

Modification of vortex interactions in a reattaching separated flow [AIAA PAPER 85-0555] p 321 A85-25946

The interaction of a wake with a turbulent boundary layer p 471 A85-30997

Prediction of the Reynolds stress in a compressor passage [AIAA PAPER 85-1197] p 790 A85-40818

Analysis of sudden expansion flow in a two-dimensional duct with and without side-wall injection using the k-epsilon turbulence model p 371 N85-18282

**RF-4 AIRCRAFT**

MBB - Reconnaissance programs p 346 A85-24252

Peace Jack - An enigma exposed p 757 A85-41540

Peripheral vision horizon display testing in RF-4C aircraft p 23 N85-10054

**RHODIUM**

Advanced thin film thermocouples [NASA-CR-175541] p 450 N85-21607

**RIBBON PARACHUTES**

A 73-ft cross parachute for cargo delivery p 402 A85-29264

**RIBS (SUPPORTS)**

Modern forming procedures for integral structural components which are strengthened by stringers or ribs [DGLR PAPER 84-086] p 789 A85-40306

Heat transfer and pressure drop in blade cooling channels with turbulence promoters [NASA-CR-3837] p 128 N85-12315

**RIDING QUALITY**

Design of a digital ride quality augmentation system for commuter aircraft [NASA-CR-172419] p 20 N85-10037

Design of a digital ride quality augmentation system for commuter aircraft [AD-A148233] p 271 N85-16879

**RIGID ROTOR HELICOPTERS**

Application of Floquet theory to helicopter blade flapping stability [AD-A154460] p 760 N85-29952

**RIGID ROTORS**

A theoretical study of stability of a rigid rotor under the influence of dilute viscoelastic lubricants [ASME PAPER 84-TRIB-17] p 289 A85-21278

Development of a microprocessor-controlled laser system for automated precision balancing p 443 A85-28828

The analysis on the dynamic performance of a single lug [AD-P004289] p 379 N85-18866

**RIGID STRUCTURES**

Determination of the axis and the angle of rotation for a retractable landing gear p 19 A85-12357

Fracture analysis of stiffened structure p 126 A85-15864

The treatment art of rigid-substructures in modal synthesis methods p 183 A85-17169

Dynamic analysis of large-scale mechanical systems and animated graphics [AIAA PAPER 83-0946] p 184 A85-18340

The development and applications of GPS determined attitude p 486 A85-32198

Measurement of the inertial constants of a rigid or flexible structure of arbitrary share through a vibration test [NASA-TM-77557] p 55 N85-11381

Composite repair of aircraft structures p 285 N85-17059

**RIGID WINGS**
A numerical analysis of the aerodynamic properties of wings using a minicomputer p 472 A85-31777
Impact bending of a rotating, rigid-plastic fan blade p 836 A85-45860
Theoretical study of non-linear unsteady aerodynamics of a non-rigid lifting body
[AD-P004169] p 325 N85-17954
The aerodynamic characteristics of a GU25-5(11)8 aerofoil for low Reynolds numbers
[GU-AERO-8410] p 874 N85-34121

**RING LASERS**
Navigation, the Sagnac effects, and the Michelson experiment p 337 A85-25516
The ARINC 704 ring laser gyro Inertial Reference System p 643 A85-38528
Helicopter flight test of a ring laser gyro Attitude and Heading Reference System p 643 A85-38529
Redundancy management in strapdown navigation systems p 644 A85-38530
Fast reaction and high reliability of strapdown navigation systems using ring laser gyros p 822 A85-45020

**RING STRUCTURES**
Two-plane balance and slip-ring design p 856 N85-33536

**RISK**
Risk assessment of an aging military aircraft
[AIAA PAPER 84-0851] p 759 A85-42933
The physical and empirical basis for a specific clear-air turbulence risk index
[NASA-CR-178522] p 914 N85-35540

**RITZ AVERAGING METHOD**
A study of internal and distributed damping for vibrating turbomachiner blades
[NASA-CR-175901] p 671 N85-27868

**RIVETED JOINTS**
Review of blind rivets and blind-riveting techniques. I p 181 A85-16232
Review of blind rivets and blind-riveting techniques. II p 181 A85-16233
Permanent fasteners for light-weight structures — Book p 443 A85-28479
Defect detection threshold in riveted joints, test report no.44-833/F — in aircraft p 129 N85-13260
The influence of fastener flexibility on load transfer and fatigue life predictions for multirow bolted and riveted joints — aircraft structures
[LBF-FB-172/84] p 296 N85-16219

**RIVETING**
Review of blind rivets and blind-riveting techniques. I p 181 A85-16232
Review of blind rivets and blind-riveting techniques. II p 181 A85-16233
Utilization of an automated riveting system in aircraft construction
[MBB-UT-11/84-O] p 578 N85-27736

**RIVETS**
Review of blind rivets and blind-riveting techniques. I p 181 A85-16232
Review of blind rivets and blind-riveting techniques. II p 181 A85-16233
Reducing the effects of rivet holes on fatigue life by adhesive bonding p 693 A85-37472
Future robotics program at San Antonio ALC (Air Logistics Center)
[AD-P004011] p 127 N85-11991

**ROADS**
Automatic land vehicle navigation using road map data
[DE84-017176] p 338 N85-18043

**ROBOTICS**
A robotic quick disconnect wrist for aircraft bulkhead inspection
[AIAA PAPER 85-0700] p 534 A85-30267
Robotic drilling of acrylic windshields and canopies for fighter aircraft p 703 A85-37396
Future robotics program at San Antonio ALC (Air Logistics Center)
[AD-P004011] p 127 N85-11991
Robotics in nondestructive inspection at Sacramento Air Logistics Center
[AD-P004012] p 127. N85-11992
Supply center processes
[AD-P004014] p 127 N85-11993
Investigation on experimental techniques to detect, locate and quantify gear noise in helicopter transmissions
[NASA-CR-3847] p 305 N85-17667
Optical data processing for missile guidance
[AD-A149346] p 339 N85-18972
West Europe report: Science and technology
[JPRS-WST-84-012] p 601 N85-25552

**ROBOTS**
Fully-automatic flexible manufacturing cell for turbine blades p 367 A85-24647
A robotic quick disconnect wrist for aircraft bulkhead inspection
[AIAA PAPER 85-0700] p 534 A85-30267
DoD Robotics Application Workshop Proceedings
[AD-A145867] p 71 N85-11978
Air force, robotic painting
[AD-P004006] p 126 N85-11986
NyKINM, a further development of KINM 22 — simulation of a robot attack on an aircraft
[FOA-C-20559-D8(E3)] p 256 N85-15720
West Europe report: Science and technology
[JPRS-WST-85-020] p 797 N85-31333

**ROBUSTNESS (MATHEMATICS)**
Robust model following system and its application — for nonlinear aircraft control p 57 A85-10998
Artificial dissipation models for the Euler equations
[AIAA PAPER 85-0438] p 231 A85-20870
Sensitivity reduction and robust tracking with application to aircraft control p 513 A85-33283
A robust pitch pointing control law p 513 A85-33304
A multiloop robust controller design study using singular value gradients p 703 A85-39564
Time-domain stability robustness measures for linear regulators p 703 A85-39565
Robustness enhancement for LQG digital flight controller design p 840 A85-45048
Design of the robust flight control system by realizable linear compensator
[AIAA PAPER 85-1897] p 844 A85-45913
Reduced conservatism in time domain stability robustness bounds by state transformation - Application to aircraft control
[AIAA PAPER 85-1926] p 859 A85-45927
Multi-input multi-output automatic design synthesis for performance and robustness
[AIAA PAPER 85-1929] p 859 A85-45929
Stability robustness improvement using constrained optimization techniques
[AIAA PAPER 85-1931] p 859 A85-45930
Totally robust control - A new concept for design of flight control systems
[AIAA PAPER 85-1974] p 845 A85-45955
Robust Kalman filtering and its applications
[AD-A149044] p 376 N85-19775
Robustness of discrete-time dynamical systems: Application to the multivariable digital control of combat aircraft
[ONERA-NT-1984-2] p 425 N85-19986
A research program in active control/aeroelasticity
[NASA-CR-175674] p 501 N85-23752

**ROCKET ENGINE CASES**
A study on a medium-sized rocket with Burnout frame
[NAL-TR-821] p 361 N85-18082

**ROCKET ENGINE DESIGN**
Newton iteration formulas for correcting temperature and pressure in thermodynamic calculation of rocket engines p 279 A85-20226
A study of the pulsation driving mechanism in pulsating combustors p 368 A85-25477

**ROCKET ENGINES**
Selectable thrust rocket motor for crew escape systems p 340 A85-22758
Pioneering commercial rocketry in the United States of America - Reaction Motors, Inc. 1941-1958. II - Projects p 483 A85-29374

**ROCKET EXHAUST**
Theoretical study on supersonic jet plumes p 206 A85-19439
Recent developments in the modeling of high speed jets, plumes and wakes
[AIAA PAPER 85-1616] p 714 A85-40724
Overlaid approach for base flow analysis at supersonic velocities. I - Basic model description. II - Applications including base combustion and multi-phase exhaust effects
[AIAA PAPER 85-1673] p 716 A85-40762

**ROCKET NOZZLES**
Aerodynamic studies linked to the development of deployable nozzles — for upper stage ballistic missiles
[ONERA, TP NO. 1984-149] p 205 A85-19263

**ROCKET-BORNE INSTRUMENTS**
Development and testing of the RPS-1000 parachute system for the MMR-06-DART meteorological rocket system p 685 A85-38608
Solution of certain technical problems connected with the development of the MMR-06M meteorological rocket p 685 A85-38610

**ROLL**
On the wake hazard alleviation associated with roll oscillations of wake-generating aircraft
[AIAA PAPER 85-1774] p 812 A85-43835
The roll motion of a wraparound fin configuration at subsonic and transonic Mach numbers
[AIAA PAPER 85-1777] p 837 A85-43838
The rolling vortex-damping of supersonic wing p 872 A85-49705
On rolling resonance and small asymmetrical aerodynamic force of re-entry body p 873 A85-49708
Theory of wing rock p 357 N85-18064
In-flight evaluation of pure time delays in pitch and roll
[NASA-TM-86744] p 847 N85-32123

**ROLLER BEARINGS**
The performance of a sealed squeeze-film bearing in a flexible support structure p 440 A85-27476
An energy approach to linearizing squeeze-film damper forces p 440 A85-27479
Techniques for the early detection of gear and bearing failures in helicopter drive trains p 525 A85-31967
Effect of two inner-ring oil-flow distribution schemes on the operating characteristics of a 35 millimeter bore ball bearing to 2.5 million DN
[NASA-TP-2404] p 129 N85-13233
Lubrication and performance of high-speed rolling-element bearings
[NASA-TM-86958] p 450 N85-21658
Planetary-gear-support bearing test rig design
[NASA-CR-174927] p 886 N85-35185

**ROLLING CONTACT LOADS**
A dynamic tire/soil contact surface interacting model for aircraft ground operations
[AIAA PAPER 85-0706] p 482 A85-30358

**ROLLING MOMENTS**
A modelling approach for autopilot design of a rolling missile p 115 A85-13891
A relation between liquid roll moment and liquid side moment p 423 A85-26449
The wind tunnel investigation for obtaining rolling moment with small asymmetry p 674 A85-38970
The roll motion of a wraparound fin configuration at subsonic and transonic Mach numbers
[AIAA PAPER 85-1777] p 837 A85-43838
In-flight evaluation of pure time delays in pitch and roll
[AIAA PAPER 85-1852] p 843 A85-45881
The generation of rolling moments with the superconducting solenoid model
[NASA-CR-172520] p 360 N85-18066
Operational and developmental experience with the F/A-18A digital flight control system p 589 N85-26742
Experimental and theoretical determination of the wing-induced lateral wind on the tail surfaces in oscillating rolling motion. Part 1: Application of the Mobile Oscillating Derivatives (MOD) on an experimental part
[IFD-1/84-PT-1] p 654 N85-28939

**ROOFS**
Evaluating wind flow around buildings on heliport placement
[FAA-PM-84-25] p 455 N85-21881

**ROOT-MEAN-SQUARE ERRORS**
OMEGA navigation system position-fix accuracy assessment p 93 A85-14828
Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 3
[NASA-CR-167864] p 913 N85-35536

**ROOTS OF EQUATIONS**
Root locus method and automatic identification of modes in flutter analysis p 35 A85-12356

**ROTARY ENGINES**
Stratified charge rotary aircraft engine technology enablement program
[NASA-CR-174812] p 422 N85-21163

**ROTARY STABILITY**
The effect of aerodynamic and structural detuning on turbomachine supersonic unstalled torsional flutter
[AIAA PAPER 85-0761] p 506 A85-30378
Application of the finite-state arbitrary-motion aerodynamics to rotor blade aeroelastic response and stability in hover and forward flight
[AIAA PAPER 85-0763] p 491 A85-30380
Toward a unified aerodynamic model for use in rotor blade stability analyses p 473 A85-32001
Aeromechanical stability of a full-scale hingeless rotor in hover p 496 A85-32002
Rotary-balance experiments on a modern fighter aircraft configuration at high Reynolds numbers
[AIAA PAPER 85-1829] p 848 A85-43870
Structural response of a rotating bladed disk to rotor whirl
[NASA-CR-175605] p 507 N85-22391
Application of Floquet theory to helicopter blade flapping stability
[AD-A154460] p 760 N85-29952
Recent developments in rotary-balance testing of fighter aircraft configurations at NASA Ames Research Center
[NASA-TM-86714] p 811 N85-32090

**ROTARY WING AIRCRAFT**

Minimization of the maintenance impact associated with the introduction of high technology electronics to rotary wing aircraft
[AIAA PAPER 84-2413] p 92 A85-13518

Higher harmonic control for rotary wing aircraft
[AIAA PAPER 84-2484] p 100 A85-13559

Integrated avionics for advanced Army rotorcraft
[AIAA PAPER 84-2672] p 151 A85-17855

Studies of convertible turboshaft/turbofan engines for high-speed rotorcraft p 432 A85-29257

Impact of emerging technology on the weight of future rotorcraft p 494 A85-31970

Advance technology impacts on rotorcraft weight
p 494 A85-31973

Rotary-wing aircraft noise measurements: Analysis of variations and proposed measurement standard
[AD-A146207] p 135 N85-12662

Mission-oriented requirements for updating MIL-H-8501. Volume 1: STI proposed structure — military rotorcraft
[NASA-CR-177331-VOL-1] p 271 N85-16877

Mission-oriented requirements for updating MIL-H-8501. Volume 2: STI background and rationale — military rotorcraft
[NASA-CR-177331-VOL-2] p 271 N85-16878

A methodology for the determination of rotary wing aircraft vulnerabilities in air-to-air combat simulation
[AD-A148984] p 346 N85-18584

Special power train requirements for the next generation of rotary-wing aircraft p 510 N85-23769

Rotorcraft digital advanced avionics system (RODAAS) functional description
[NASA-CR-166611] p 568 N85-25237

Rotorcraft research testing in the National Full-Scale Aerodynamics Complex at NASA Ames Research Center
[NASA-TM-86687] p 652 N85-27854

Analysis of rotorcraft crash dynamics for development of improved crashworthiness design criteria
[FAA-CT-85-11] p 747 N85-31031

Fixed gain and adaptive techniques for rotorcraft vibration control
[NASA-CR-177344] p 819 N85-33111

**ROTARY WINGS**

Comparison of experimental and analytical predictions of rotor blade-vortex interactions using model scale acoustic data
[AIAA PAPER 84-2269] p 58 A85-10833

Descriptors for rotary wing aircraft noise
[AIAA PAPER 84-2292] p 59 A85-10847

Flow field and acoustics of two-dimensional transonic blade-vortex interactions
[AIAA PAPER 84-2309] p 61 A85-10860

Optical tomography for flow visualization of the density field around a revolving helicopter rotor blade
p 48 A85-11264

Experimental investigation of the sweep effects on a helicopter blade tip
[ONERA, TP NO. 1984-81] p 7 A85-12610

Study of the unsteady transonic flow on rotor blade with different tip shapes
[ONERA, TP NO. 1984-82] p 7 A85-12611

Theoretical study of two dimensional stall in an incompressible flow
[ONERA, TP NO. 1984-83] p 7 A85-12612

Flight tests of a sweptback parabolic tip on a Dauphin 365N
[ONERA, TP NO. 1984-84] p 7 A85-12613

Design and development of a dynamically scaled model AH-64 main rotor
[AIAA PAPER 84-2532] p 101 A85-13591

Further investigation of the coupled flapping and torsion dynamics of helicopter rotor blades p 102 A85-13680

Rotor blade flap-lag stability and response in forward flight in turbulent flows p 115 A85-14050

A model for the analysis of dynamic properties of a helicopter rotor blade with various boundary conditions
p 115 A85-15719

Theoretical study of helicopter-rotor noise
[ONERA, TP NO. 1984-140] p 134 A85-15856

Dynamics of a helicopter rotor in abnormal operating conditions p 159 A85-18773

Solution of the unsteady Euler equations for fixed and rotor wing configurations
[AIAA PAPER 85-0120] p 211 A85-19531

Numerical study on the dynamic stall process of a NACA 0012 airfoil
[AIAA PAPER 85-0128] p 212 A85-19539

Numerical solution of unsteady viscous flow past rotor sections
[AIAA PAPER 85-0129] p 212 A85-19540

Correlation of airfoil icing relationships with two-dimensional model and full scale rotorcraft icing test data
[AIAA PAPER 85-0337] p 240 A85-19680

Solution method for a hovering helicopter rotor using the Euler equations
[AIAA PAPER 85-0436] p 223 A85-19749

Application of digital interferogram evaluation techniques to the measurement of three-dimensional flow fields
[AIAA PAPER 85-0037] p 288 A85-20852

Sikorsky composite rotor hub development
p 251 A85-21381

Experimental aerodynamic characteristics of an NACA 0012 airfoil with simulated ice p 252 A85-21844

Coupled helicopter rotor/body aeromechanical stability comparison of theoretical and experimental results
p 252 A85-21847

Thermal analysis techniques for design of VSTOL aircraft rotor ice protection
[AIAA PAPER 85-0340] p 332 A85-26387

Rotor wake measurements for a rotor in forward flight
[ONERA, TP NO. 1985-12] p 387 A85-27891

The N/rev phenomenon in simulating a blade-element rotor system p 413 A85-28605

Optimization methods applied to the aerodynamic design of helicopter rotor blades
[AIAA PAPER 85-0644] p 490 A85-30245

Delamination control of composite rotor hubs
p 519 A85-31962

Advanced methodology for quality control of composite rotor blades at Bell Helicopter Textron
p 525 A85-31976

Generalized wake geometry for a helicopter in forward flight and effect of wake deformation on airloads
p 472 A85-31986

The prediction of transonic flows on advancing rotors
p 472 A85-31988

A design methodology for a compliant matrix composite bearingless main rotor p 496 A85-31996

Aeromechanical stability of a full-scale hingeless rotor in hover p 496 A85-32002

Pitch-flap-lag instability of elastic modes of an articulated rotor blade p 496 A85-32003

A new look at sound generation by blade/vortex interaction
[ASME PAPER 84-WA/NCA-2] p 538 A85-32955

A general model of helicopter blade dynamics
p 570 A85-33471

Properties of glass and carbon fiber fabrics used in helicopter rotors
[MBB-UD-424-84-OE] p 541 A85-35254

Rotary-wing aerodynamics. Volume 1 - Basic theories of rotor aerodynamics (With application to helicopters). Volume 2 Performance prediction of helicopters (2nd revised and enlarged edition) — Book
p 617 A85-36996

A new unsteady prescribed wake model of the aerodynamic behavior of a rotor in forward flight
p 617 A85-37178

Natural frequencies and flight loads of composite main rotor blade for helicopter p 647 A85-38361

Wind tunnel experiments of the high-performance rotor blades p 622 A85-38362

Fundamentals of the flight operations of helicopters: Aerodynamics — Russian book p 649 A85-38875

Rotor dynamics simulation - A new approach
[AIAA PAPER 85-1739] p 754 A85-40585

Aerodynamics of two-dimensional blade-vortex interaction
[AIAA PAPER 85-1560] p 710 A85-40685

A numerical calculation of propeller performance at static condition and its comparison with experiment
p 724 A85-41012

Rotor system design - An adventure in compromise
p 756 A85-41069

Velocity measurements in the near wake of a hovering rotor
[AIAA PAPER 85-1675] p 725 A85-41408

Will rotors lose their bearings? p 756 A85-41528

Numerical analysis of the dynamic characteristics of a helicopter rotor blade with various boundary conditions
p 757 A85-41607

Performance degradation of helicopter rotor in forward flight due to ice p 746 A85-42937

Hygrothermally curvature stable laminates with tension-torsion coupling p 787 A85-43224

Free wake analysis of helicopter rotors
p 816 A85-45791

Factors influencing rotor aerodynamics in hover and forward flight p 816 A85-45793

Periodic control of the individual-blade-control helicopter rotor p 842 A85-45795

Impact bending of a rotating, rigid-plastic fan blade
p 836 A85-45860

Active control of helicopter blade flapping
[AIAA PAPER 85-1963] p 827 A85-45947

Three-dimensional tomographic reconstruction of the flow around a revolving helicopter rotorblade - A numerical simulation p 903 A85-47106

The composite technology of a main rotor blade
p 865 A85-48567

Helicopter rotor blade design for minimum vibration
[NASA-CR-3825] p 19 N85-10032

DFVLR rotorcraft: Construction and engineering
[NASA-TM-77740] p 19 N85-10035

Data input, processing and presentation — helicopter rotor balance measurement
[NASA-TM-77739] p 66 N85-10856

Transonic flow analysis for rotors. Part 1: Three-dimensional quasi-steady, full-potential calculation
[NASA-TP-2375-PT-1] p 11 N85-10914

Lifting surface theory for a helicopter rotor in forward flight
[NASA-TM-86315] p 12 N85-10916

Extended aeroelastic analysis for helicopter rotors with prescribed hub motion and blade appended penduluum vibration absorbers
[NASA-CR-172455] p 85 N85-12038

Stochastic motor blade dynamics
[AD-A146312] p 105 N85-12054

Estimation of helicopter performance using a program based on blade element analysis
[AD-A146341] p 105 N85-12055

Detection, classification, and extraction of helicopter-radiated noise
[AD-A145993] p 134 N85-12661

Initial feasibility ground test of a proposed photogrammetric system for measuring the shapes of ice accretions on helicopter rotor blades during forward flight
[NASA-TM-87391] p 106 N85-12887

An experimental investigation of the parallel blade-vortex interaction
[NASA-TM-86005] p 146 N85-13777

Study to eliminate ground resonance using active controls
[NASA-CR-166609] p 255 N85-15715

Helicopter active control with rotor blades relaxation
p 270 N85-16819

Integrated technology rotor/flight research rotor concept definition study
[NASA-CR-166446] p 345 N85-18980

Experimental study of main rotor tip geometry and tail rotor interactions in hover. Volume 1. Text and figures
[NASA-CR-177336-VOL-1] p 466 N85-22344

Experimental study of main rotor tip geometry and tail rotor interactions in hover. Volume 2: Run log and tabulated data
[NASA-CR-177336-VOL-2] p 466 N85-22345

Study for prediction of rotor/wake/fuselage interference, part 1
[NASA-CR-177340-VOL-1] p 466 N85-22346

Study for prediction of rotor/wake/fuselage interference. Part 2: Program users guide
[NASA-CR-177340-VOL-2] p 467 N85-22347

Simple theoretical models for composite rotor blades
[NASA-CR-175620] p 499 N85-22382

Computations of two-dimensional airfoil-vortex interactions — helicopter rotor flowfields
[NASA-CR-3885] p 479 N85-23709

Unsteady analysis of rotor blade tip flow
[NASA-CR-3868] p 556 N85-25202

Interaction of a turbulent vortex with a lifting surface
p 557 N85-25214

Helicopter rotor
[CH-637890-A5] p 574 N85-25245

Rotor blade flap-lag stability and response in forward flight in turbulent flows p 577 N85-26698

Helicopter Aeromechanics
[AGARD-LS-139] p 617 N85-28913

Rotorcraft noise p 705 N85-28916

Recent developments in the dynamics of advanced rotor systems p 653 N85-28917

Application of Floquet theory to helicopter blade flapping stability
[AD-A154460] p 760 N85-29952

Design of helicopter rotor blades for optimum dynamic characteristics
[NASA-CR-176076] p 760 N85-31044

Impulsive noise due to transonic blade-vortex interactions p 806 N85-31913

A three-dimensional viscous flow analysis for the helicopter tip vortex generation problem
[NASA-CR-3906] p 874 N85-34114

An evaluation of three helicopter rotor sections
[NASA-TM-86719] p 874 N85-34115

The effects of parameter variation on helicopter performance
[AD-A156027] p 887 N85-35189

**ROTATING BODIES**

Determination of the axis and the angle of rotation for a retractable landing gear p 19 A85-12357

Time-optimal deceleration of the rotation of an axisymmetric rigid body near the center of mass
p 432 A85-28455

Surface pressure measurements on a transonic spinning projectile p 392 A85-29303
Evaluation of automated eddy current system reliability p 525 A85-31977
Shading and interference effects during the rotation of a plate — in aerodynamics p 624 A85-38559
Holographic-interferometric vibration analysis for fast-rotating constructional units p 794 A85-42659
Lateral fluid forces acting on a whirling centrifugal impeller in vaneless and vaned diffuser p 187 N85-14123
Hypothetical zero yaw drag trajectory of spinning projectiles between M = 5 and M = 10
[AD-A148899] p 329 N85-18963
Flight dynamics of axisymmetrical rotating bodies in air medium p 477 N85-22791

**ROTATING CYLINDERS**
The numerical solution of flow around a rotating circular cylinder in uniform shear flow p 122 A85-12768
A computer simulation of separated flow past a rotating cylinder and the Magnus force reversal p 390 A85-28465
A method for the prediction of Coriolis induced secondary flows and their influence on heat transfer in rotating ducts p 601 A85-36672
Flow around rotating and nonmoving circular cylinder near flat screen. Report 1: Aerodynamic forces in cylinder p 562 N85-27059

**ROTATING DISKS**
Vibration and flutter of mistuned bladed-disk assemblies
[AIAA PAPER 84-0991] p 181 A85-16095
Stability experiments in the flow over a rotating disk p 444 A85-29091
Effects of mistuning on the forced vibration of bladed disks in subsonic flow
[AIAA PAPER 85-0760] p 505 A85-30377
Stress intensity factors for an arc crack in a rotating disc p 599 A85-34974
Computation of forced laminar convection in rotating cavities p 600 A85-35592
Life prediction methodology for aircraft gas turbine engine disks
[AIAA PAPER 85-1141] p 792 A85-41418
An experimental investigation of pressure losses in cooling air supply system for gas turbine rotor p 769 A85-41808
Slipping behavior and fretting fatigue in the disk/blade dovetail region p 770 A85-41852
Some recent Belgian research works on PM superalloys p 788 A85-43133
Screw press forging of powder HIP billet to critical gas turbine discs and wheels p 795 A85-43158
Crack characterisation in turbine disks p 905 A85-47396

**ROTATING ENVIRONMENTS**
A study of friction in high-speed face seals p 46 A85-10381

**ROTATING FLUIDS**
Analysis of the flow field in an engine inlet particle separator p 5 A85-11633
Theoretical study of two-dimensional and three-dimensional potential flows with rotational source terms - Application to turbomachines — French thesis p 50 A85-11729
The numerical solution of flow around a rotating circular cylinder in uniform shear flow p 122 A85-12768
Determinaiton of the angles of flow incident on the rotating cascade of a reversing device p 366 A85-24002
Analysis of the transient and steady-state heat transfer in rotary regenerative heat exchanger p 366 A85-24098
Fluid motion in the regions of abrupt expansion of the channels of rotor-cooling systems of energy-converting machines p 442 A85-28473
An implicit algorithm for solving 2D rotational flow in an aircraft engine fan frame
[AIAA PAPER 85-1534] p 722 A85-40965
Computation of inviscid incompressible flow with rotation p 871 A85-49356
Turbulent jet flow in a channel with a circulation region p 371 N85-18218

**ROTATING LIQUIDS**
Very high speed lap with positive lift effect
[AD-D011710] p 796 N85-30344
Very high speed lap with negative lift effect
[AD-D011711] p 796 N85-30345

**ROTATING SHAFTS**
An analytical investigation of dynamic coupling in nonlinear, geared rotor systems p 607 N85-27218

**ROTATING SPHERES**
Some important problems in unsteady boundary layers including separation. 2: Unsteady boundary layers close to the stagnation region of slender bodies
[AD-A146964] p 294 N85-16069

**ROTATING STALLS**
Precalculation of rotating stall in multistage axial compressors — German thesis p 287 A85-19832
An experimental study of the rotating stall structure in an axial-flow compressor p 350 A85-23987
A prediction research of rotating stall in axial compressors p 316 A85-24097
Rotating stall cells in a low-speed axial flow compressor p 385 A85-26753
Designing for stability in advanced turbine engines p 420 A85-29344
The nonlinear model for predicting rotating stall in multistage axial-flow compressors p 471 A85-31339
Simulation of rotating stall by the vortex method p 544 A85-34012
Correlation and prediction of rotating stall inception by divergence method p 629 A85-39245
Stall transients of axial compression systems with inlet distortion
[AIAA PAPER 85-1348] p 632 A85-39740
Axial-flow compressor stage post-stall analysis
[AIAA PAPER 85-1349] p 632 A85-39741
Application of frequency domain and time domain analysis tools to the analysis of nonrecoverable stall
[AIAA PAPER 85-1350] p 765 A85-40836
Identification of quasi-steady in-stall compressor maps from transient data
[AIAA PAPER 85-1351] p 765 A85-40837
Stall recovery control strategy methodology and results
[AIAA PAPER 85-1433] p 765 A85-40841
A consideration concerning stall and surge limitations within centrifugal compressors. II p 793 A85-41821
Blade vibration on radial impellers excited by rotating stall-cells and during surge p 771 A85-41854
Some observations on circumferentially grooved casing treatment — in compressors p 771 A85-42442
A turbine engine aerodynamic model for in-stall transient simulation
[AIAA PAPER 85-1429] p 772 A85-42672
Subsynchronous vibrations in a high pressure centrifugal compressor: A case history p 186 N85-14118
A theory of post-stall transients in multistage axial compression systems
[NASA-CR-3878] p 398 N85-21117

**ROTATION**
Experimental on-stream elimination of resonant whirl in a large centrifugal compressor p 187 N85-14121
Hydraulic forces on a centrifugal impeller undergoing synchronous whirl p 187 N85-14124
Absolute stability of unsteady movement of axisymmetrical rotating flight vehicle p 477 N85-22793
The unsteady boundary layer on an elliptic cylinder following the impulsive onset of translational and rotational motion — dynamic stall p 477 N85-23699
Use of quaternions in flight mechanics
[AD-A152616] p 675 N85-27875
Aerodynamic characteristics of the standard dynamics model in coning motion at Mach 0.6
[NASA-TM-86717] p 817 N85-32094
Optimally designed propellers constrained by noise p 892 N85-35196

**ROTOR AERODYNAMICS**
Reliability improvement of aerothermal analysis of high speed rotating machinery p 50 A85-11674
Flutter and forced response of mistuned rotors using standing wave analysis p 122 A85-12721
Calculation of unsteady fan rotor response caused by downstream flow distortions
[AIAA PAPER 84-2282] p 76 A85-13960
Two-dimensional unsteady flow in Comprex rotor p 123 A85-13995
Rotor blade flap-lag stability and response in forward flight in turbulent flows p 115 A85-14050
Dynamics of a helicopter rotor in abnormal operating conditions p 159 A85-18773
An analysis of the flow past an S-shaped rotor by discrete vortex model p 206 A85-19405
A study of the flow recirculation problems within an anechoic hover chamber
[AIAA PAPER 85-0071] p 273 A85-19497
Effects of friction dampers on aerodynamically unstable rotor stages p 265 A85-21866
Multilevel methods in the dynamics of the rotors of aircraft engines p 351 A85-24020
Computation of wind tunnel wall effects in ducted rotor experiments p 419 A85-26755
Numerical calculation of rotor performances in real flight configurations
[ONERA, TP NO. 1985-13] p 388 A85-27892
The UH-1H helicopter icing flight test program - An overview
[AIAA PAPER 85-0338] p 401 A85-28898
Near-field frequency-domain theory for propeller noise p 460 A85-29079
Pressure distributions on a helicopter swept tip from flight tests and from calculations p 470 A85-30942
Rotorcraft air resonance in forward flight with various dynamic inflow models and aeroelastic couplings p 492 A85-30943
Impact of main rotor tip geometry on main rotor/tail rotor interaction in hover p 495 A85-31985
Evaluation of a ten-foot diameter X-wing rotor p 495 A85-31987
The prediction of transonic flows on advancing rotors p 472 A85-31988
Computerized aerodynamic design of a transonically 'quiet' blade p 473 A85-31989
Toward a unified aerodynamic model for use in rotor blade stability analyses p 473 A85-32001
Investigation of flow phenomena in a transonic fan rotor using laser anemometry
[ASME PAPER 84-GT-199] p 475 A85-32963
Numerical optimization method for airfoil design p 475 A85-33014
A general model of helicopter blade dynamics p 570 A85-33471
Rotor/body aerodynamic interactions p 544 A85-33473
An aerodynamic theory based on time-domain aeroacoustics p 546 A85-35135
Rotary-wing aerodynamics. Volume 1 - Basic theories of rotor aerodynamics (With application to helicopters). Volume 2 Performance prediction of helicopters (2nd revised and enlarged edition) — Book p 617 A85-36996
Wind tunnel investigation of the interaction of an airship configuration with lifting rotors
[AIAA PAPER 85-0875] p 625 A85-38790
Fundamentals of the flight operations of helicopters: Aerodynamics — Russian book p 649 A85-38875
Numerical solution of two- and three-dimensional rotor tip leakage models p 626 A85-38989
A computational study of the unsteady shock-wave structure in a two-dimensional transonic rotor p 629 A85-39578
Prospects and problems of advanced open rotors for commercial aircraft
[AIAA PAPER 85-1191] p 665 A85-39649
The influence of blade wakes on the performance of outwardly curved combustor pre-diffusers
[AIAA PAPER 85-1291] p 667 A85-39704
Rotor dynamics simulation - A new approach
[AIAA PAPER 85-1739] p 754 A85-40565
Wide-field shadowgraph flow visualization of tip vortices generated by a helicopter rotor
[AIAA PAPER 85-1557] p 710 A85-40682
Measurement and prediction of model-rotor flow fields
[AIAA PAPER 85-1558] p 710 A85-40683
Inviscid modeling of turbomachinery wake transport
[AIAA PAPER 85-1132] p 719 A85-40812
Navier-Stokes simulations of rotor-stator interaction using patched and overlaid grids
[AIAA PAPER 85-1519] p 721 A85-40952
Measurement of 3-D unsteady flow downstream of rotor and stator blades in axial-flow compressors p 729 A85-41828
Aerodynamic responses of turbine rotor blade to sinusoidal gust of large vorticity p 729 A85-41835
Propeller aerodynamic performance by vortex-lattice method p 731 A85-42927
Noise bands associated with the turbulence-rotor interaction p 862 A85-44046
Free wake analysis of helicopter rotors p 816 A85-45791
Factors influencing rotor aerodynamics in hover and forward flight p 816 A85-45793
Active control of helicopter blade flapping
[AIAA PAPER 85-1963] p 827 A85-45947
Dynamic stall progress in analysis and prediction
[AIAA PAPER 85-1769] p 817 A85-47026
The analysis of counter-rotating propeller systems
[SAE PAPER 850869] p 873 A85-50104
Laser velocimeter measurements of the flow fields around single- and counter-rotation propeller models
[SAE PAPER 850870] p 873 A85-50105
Some considerations on Aeroelastic instabilities caused by coupling between propeller-type rotor and its supporting structure
[NAL-TR-834] p 9 N85-10013
Data input, processing and presentation — helicopter rotor balance measurement
[NASA-TM-77739] p 66 N85-10856
Lifting surface theory for a helicopter rotor in forward flight
[NASA-TM-86315] p 12 N85-10916
Extended aeroelastic analysis for helicopter rotors with prescribed hub motion and blade appended penduluum vibration absorbers
[NASA-CR-172455] p 85 N85-12038

Rotordynamic Instability Problems in High-Performance Turbomachinery
[NASA-CP-2338] p 186 N85-14116

Analysis for leakage and rotordynamic coefficients of surface roughened tapered annular gas seals
p 188 N85-14135

The UH-1H helicopter icing flight test program: An overview
[NASA-TM-86925] p 242 N85-15702

Clearance flow-generated transverse forces at the rotors of thermal turbomachines
[NASA-TM-77292] p 295 N85-16180

Synthesized airfoil data method for prediction of dynamic stall and unsteady airloads
[NASA-CR-3672] p 327 N85-18005

Integrated technology rotor/flight research rotor hub concept definition
[NASA-CR-166447] p 344 N85-18051

Theory versus experiment for the rotordynamic coefficients of annular gas seals. Part 1: Test facility and apparatus
[NASA-CR-174409] p 374 N85-19417

A study for calculating rotor loads using free vortex concept p 395 N85-20194

Analytical and flight investigation of the influence of rotor and other high-order dynamics on helicopter flight-control system bandwidth
[NASA-TM-86696] p 425 N85-21174

Research Reports: 1984 NASA/ASEE Summer Faculty Fellowship Program
[NASA-CR-171317] p 462 N85-22210

Study for prediction of rotor/wake/fuselage interference, part 1
[NASA-CR-177340-VOL-1] p 466 N85-22346

Study for prediction of rotor/wake/fuselage interference. Part 2: Program users guide
[NASA-CR-177340-VOL-2] p 467 N85-22347

Flight dynamics of axisymmetrical rotating bodies in air medium p 477 N85-22791

Recent developments in the dynamics of advanced rotor systems
[NASA-TM-86669] p 531 N85-24320

Finite-difference computations of rotor loads
[NASA-TM-86682] p 560 N85-26669

Helicopter Aeromechanics
[AGARD-LS-139] p 617 N85-28913

A survey of recent development in helicopter aerodynamics p 653 N85-28915

Rotorcraft noise p 705 N85-28916

Recent developments in the dynamics of advanced rotor systems p 653 N85-28917

**ROTOR BLADES**

Optical tomography for flow visualization of the density field around a revolving helicopter rotor blade
p 48 A85-11264

Noise produced by the interaction of a rotor wake with a swept stator blade
[AIAA PAPER 84-2326] p 133 A85-13956

Effect of angle of attack on rotor trailing-edge noise
p 134 A85-15346

Numerical solution of the full-potential equation for rotors and oblique wings using a new wake model
[AIAA PAPER 85-0268] p 216 A85-19621

The development of mathematical modelling techniques for helicopter rotor icing
[AIAA PAPER 85-0336] p 240 A85-19679

Full two-dimensional transient solutions of electrothermal aircraft blade deicing
[AIAA PAPER 85-0413] p 248 A85-19734

Solution method for a hovering helicopter rotor using the Euler equations
[AIAA PAPER 85-0436] p 223 A85-19749

K747 composite main rotor blade modification, analysis and qualification for new high temperature requirements
p 251 A85-21378

An experimental investigation and numerical prediction of thermomechanical phenomena in high speed rotor tip rubbing p 351 A85-25442

Application of the finite-state arbitrary-motion aerodynamics to rotor blade aeroelastic response and stability in hover and forward flight
[AIAA PAPER 85-0763] p 491 A85-30380

Application of a turbulence distortion theory to predict helicopter rotor broadband noise due to inflow turbulence as a function of rotor thrust p 493 A85-31952

Comparison of noise prediction for the X-wing system and a conventional rotor in hover p 493 A85-31953

The Sikorsky dynaflex rotor - An advanced main rotor system for the 1990's p 494 A85-31963

Blade design parameters which affect helicopter vibrations p 494 A85-31969

Technology impact on helicopter, tilt rotor, and tilt fold rotor concepts p 494 A85-31971

Aeroelastic stability analysis of a composite rotor blade p 496 A85-32847

Natural frequencies and flight loads of composite main rotor blade for helicopter p 647 A85-38361

Wind tunnel experiments of the high-performance rotor blades p 622 A85-38362

Extraction of helicopter-radiated noise by frequency domain processing p 805 A85-40572

Rotor system design - An adventure in compromise
p 756 A85-41069

The use of active controls to augment rotor/fuselage stability p 776 A85-43220

Factors influencing rotor aerodynamics in hover and forward flight p 816 A85-45793

Periodic control of the individual-blade-control helicopter rotor p 842 A85-45795

Active control of helicopter blade flapping
[AIAA PAPER 85-1963] p 827 A85-45947

Turbofan noise generation. Volume 2: Computer programs
[NASA-CR-167952] p 65 N85-11791

**ROTOR BLADES (TURBOMACHINERY)**

Acoustic pressures emanating from a turbomachine stage
[AIAA PAPER 84-2325] p 4 A85-10870

An experimental investigation of stator/rotor interaction influence on multistage compressor rotor flow
[AIAA PAPER 85-0009] p 206 A85-19455

Application of an adaptive blade control algorithm to a gust alleviation system p 269 A85-20143

Review - Computational methods for internal flows with emphasis on turbomachinery p 392 A85-29126

Vibration analysis of a rotating blade using dynamic discretization p 446 A85-29968

Advanced methodology for quality control of composite rotor blades at Bell Helicopter Textron
p 525 A85-31976

Quasi-three-dimensional blade design code
p 622 A85-37928

Development in UK rotor blade technology
p 615 A85-38236

Time resolved measurements of a turbine rotor stationary tip casing pressure and heat transfer field
[AIAA PAPER 85-1220] p 666 A85-39663

Stall transients of axial compression systems with inlet distortion
[AIAA PAPER 85-1348] p 632 A85-39740

Calculation of three-dimensional, viscous flow through turbomachinery blade passages by parabolic marching
[AIAA PAPER 85-1408] p 632 A85-39767

Development of a noninterference technique for measuring turbine engine rotor blade stresses
[AIAA PAPER 85-1472] p 697 A85-39797

An experimental investigation of pressure losses in cooling air supply system for gas turbine rotor
p 769 A85-41808

Two-dimensional unsteady flow in Comprex rotor
p 728 A85-41819

Measurement of the three-dimensional unsteady flow inside a rotor blade passage of an axial-flow fan
p 729 A85-41827

Aerodynamic responses of turbine rotor blade to sinusoidal gust of large vorticity p 729 A85-41835

Noncontact measurement of rotating blade vibrations
p 770 A85-41853

Blade vibration on radial impellers excited by rotating stall-cells and during surge p 771 A85-41854

A parametric study of the unbalance vibration of the rotor supported in a light, flexible casing
p 771 A85-41855

An experimental investigation of the generation and consequences of acoustic waves in an axial flow compressor Large axial spacings between blade rows
p 805 A85-42044

A three-dimensional boundary-layer analysis including heat-transfer and blade-rotation effects
p 737 A85-42988

Variational principle families for hybrid problems of blade-to-blade flow along axisymmetric stream-sheet - A unified variable-domain approach p 872 A85-49703

Computer aided determination of rotor blade mass properties
[SAWE PAPER 1628] p 884 A85-49926

Thermal fatigue of gas turbine engine blades made of material based on silicon nitride and silicon carbide
p 43 N85-10115

Structural analysis p 30 N85-10969

Incompressible lifting-surface aerodynamics for a rotor-stator combination
[NASA-TM-83767] p 86 N85-12039

Helicopter model rotor-blade vortex interaction impulsive noise: Scalability and parametric variations
[NASA-TM-86007] p 238 N85-16826

A feasibility study of free-tip rotor application as a passive cyclic control device p 343 N85-18046

Integrated technology rotor/flight research rotor hub concept definition
[NASA-CR-166447] p 344 N85-18051

Influence of normalized frequency on time-dependent aerodynamic characteristics of vane blading profiles
p 370 N85-18204

One-piece HPTR blade squealer tip
[AD-D011452] p 355 N85-18989

Structural response of a rotating bladed disk to rotor whirl
[NASA-CR-175605] p 507 N85-22391

An experimental investigation of the chopping of helicopter main rotor tip vortices by the tail rotor
[NASA-CR-177338] p 538 N85-23376

Development of a rotor wake-vortex model, volume 1
[NASA-CR-174849] p 560 N85-26668

Aerodynamic detuning analysis of an unstalled supersonic turbofan cascade
[NASA-TM-87001] p 560 N85-26670

Ice shapes and the resulting drag increase for a NACA 0012 airfoil
[NASA-TM-83556] p 641 N85-27839

A survey of recent development in helicopter aerodynamics p 653 N85-28915

Reflection plane tests of a wind turbine blade tip section with ailerons
[NASA-TM-87018] p 912 N85-34444

**ROTOR BODY INTERACTIONS**

Helicopter ground resonance - A spatial model analysis p 18 A85-11473

A relaxation approach to patched-grid calculations with the Euler equations
[AIAA PAPER 85-0295] p 218 A85-19644

Coupled helicopter rotor/body aeromechanical stability comparison of theoretical and experimental results
p 252 A85-21847

Blade design parameters which affect helicopter vibrations p 494 A85-31969

Impact of main rotor tip geometry on main rotor/tail rotor interaction in hover p 495 A85-31985

Extraction of helicopter-radiated noise by frequency domain processing p 805 A85-40572

Aerodynamic interactions between a rotor and airframe in forward flight
[AIAA PAPER 85-1606] p 724 A85-41403

The use of active controls to augment rotor/fuselage stability p 776 A85-43220

An improved technique for testing helicopter rotor-pylon aeromechanical stability using measured rotor dynamic impedance characteristics p 826 A85-45794

**ROTOR LIFT**

Compressible lifting surface theory for propeller performance calculation p 143 A85-18508

Stability and control of the twin lift helicopter system
p 513 A85-32846

**ROTOR SPEED**

Characteristics of gas-lubricated spherical spiral groove bearings p 365 A85-23628

The prediction of transonic flows on advancing rotors
p 472 A85-31988

Aeromechanical stability of a full-scale hingeless rotor in hover p 496 A85-32002

Experimental study of main rotor tip geometry and tail rotor interactions in hover. Volume 1. Text and figures
[NASA-CR-177336-VOL-1] p 466 N85-22344

Development of a rotor wake-vortex model, volume 1
[NASA-CR-174849] p 560 N85-26668

**ROTOR SYSTEMS RESEARCH AIRCRAFT**

Rotor systems research aircraft airplane configuration flight-test results
[AIAA PAPER 84-2465] p 99 A85-13551

The N/rev phenomenon in simulating a blade-element rotor system p 413 A85-28605

Rotor systems research aircraft airplane configuration flight-test results
[NASA-TM-85911] p 19 N85-10034

Fuselage upwash effects on RSRA rotor systems
[NASA-CR-177349] p 743 N85-31015

Estimation of dynamic rotor loads for the rotor systems research aircraft: Methodology development and validation
[NASA-CR-177362] p 760 N85-31045

Flight testing the fixed-wing configuration of the Rotor Systems Research Aircraft (RSRA)
[NASA-TM-86762] p 886 N85-34135

**ROTORCRAFT AIRCRAFT**

Rotorcraft effectiveness and survival in the 1990's and beyond
[AIAA PAPER 84-2417] p 69 A85-13522

Correlation of airfoil icing relationships with two-dimensional model and full scale rotorcraft icing test data
[AIAA PAPER 85-0337] p 240 A85-19680

Europeans using composites, ceramics for rotorcraft engine improvements p 263 A85-20061

Variable cycle turboshaft technology for rotor-craft of the 90's
[AIAA PAPER 85-1278] p 666 A85-39695

Development of time response criteria for rotorcraft at hover and low speed
[AIAA PAPER 85-1790] p 838 A85-43848
Radio Technical Commission for Aeronautics, Annual Assembly Meeting and Technical Symposium, Washington, DC, November 13-15, 1984, Proceedings
p 809 A85-44303
The coming impact of general aviation aeroplane and rotorcraft on the world's aviation systems
p 810 A85-44304
Rotorcraft simulation at Ames p 897 A85-49006
Effects of side-stick controllers on rotorcraft handling qualities for terrain flight
[NASA-TM-86688] p 585 N85-25267

**ROTORS**
Analysis and testing for rotordynamic coefficients of turbulent annular seals with different, directionally-homogeneous surface-roughness treatment for rotor and stator elements
[ASME PAPER 84-TRIB-31] p 289 A85-21293
Stability of squeeze film damped multi-mass flexible rotor bearing systems
[ASME PAPER 84-TRIB-45] p 289 A85-21296
The problem of gradual opening in wave rotor passages p 365 A85-23387
A study of characteristics of the 'long' hydrodynamic dampers of gas turbine engine rotors with allowance for lubricant turbulization and cavitation in the damper clearance p 349 A85-23978
Wave rotor turbofan engines for aircraft
p 419 A85-26768
Cryptosteady modes of energy exchange
p 439 A85-26769
The properties of isolated and coupled Savonius rotors p 451 A85-27346
An energy approach to linearizing squeeze-film damper forces p 440 A85-27479
Importance of phase measurements in mechanical fault diagnosis of rotating machinery p 442 A85-27980
Integrating new technology into weight methodology
p 494 A85-31972
A study for calculating rotor loads using free vortex concept p 600 A85-35746
Adaptive control of an elastic rotor with a magnetic bearing p 600 A85-36321
The 'Spheriflex' - A new rotor-hub concept
p 755 A85-40920
Dynamic analysis of rotor-bearing systems by finite element method p 795 A85-43238
Some considerations on Aeroelastic instabilities caused by coupling between propeller-type rotor and its supporting structure
[NAL-TR-804] p 9 N85-10013
A mathematical simulation model of the CH-47B helicopter, volume 1
[NASA-TM-84351-VOL-1] p 19 N85-10033
Singular asymptotic expansions in nonlinear rotordynamics
[NASA-CR-174012] p 39 N85-10100
Rotordynamic analysis of the SSME turbopumps using reduced models
[NASA-CR-171170] p 53 N85-10355
Control of rotordynamic instability in a typical gas turbine's power system p 187 N85-14120
Hydrodynamic impeller stiffness, damping, and inertia in the rotordynamics of centrifugal flow pumps
p 187 N85-14125
Preliminary investigation of labyrinth packing pressure drops at onset of swirl-induced rotor instability
p 187 N85-14132
Device for measuring relative axial expansion of turbine rotor employing space-vector tracking method
p 189 N85-14962
The use of an optical data acquisition system for bladed disk vibration analysis
[NASA-TM-86891] p 190 N85-15184
Development of a Navier-Stokes rotor and stator analysis
[AD-A146967] p 294 N85-16070
Prediction accuracy of the torques for rotary tillage by an analog tool
[AD-P004288] p 379 N85-18865
Integrated Technology Rotor/Flight Research Rotor (ITR/FRR) concept definition
[NASA-CR-166443] p 345 N85-18978
Integrated Technology Rotor/Flight Research Rotor (ITR/FRR) concept definition
[NASA-CR-166445] p 345 N85-18979
Singular asymptotic expansions in nonlinear rotordynamics p 451 N85-22218
Oscillations of gas turbine installation rotors under operating conditions p 530 N85-24077
Superconducting gyroscope research
[NASA-CR-171406] p 604 N85-25795
An analytical investigation of dynamic coupling in nonlinear, geared rotor systems p 607 N85-27218
Vibrations of rotors connected through couplings with backlash p 672 N85-28147
Effect of ground and/or ceiling planes on thrust of rotors in hover
[NASA-TM-86754] p 743 N85-31014
Estimation of dynamic rotor loads for the rotor systems research aircraft: Methodology development and validation
[NASA-CR-177362] p 760 N85-31045
R and D activities of the Structural Sciences Division
p 799 N85-32026
A phase-locked frequency multiplier for the signal averaging of the vibration of the Wessex helicopter input spiral bevel pinion
[AD-A154914] p 829 N85-32113
Proposal for modifications to the Wessex helicopter main rotor gearbox vibration monitoring program
[AD-A155196] p 830 N85-32117

**ROUTES**
The determination of optimum flight profiles for short haul routes
[AIAA PAPER 84-2408] p 89 A85-13515
A minimum-exposure, minimum-elevation military aircraft heuristic route selection model p 482 A85-31774

**RUBBER**
Alternatives for runway rubber removal from porous friction surfaces
[DOT/FAA/PM-84/28] p 176 N85-13803
Runway rubber removal specification development field evaluation procedures development
[FAA-PM-84-27] p 430 N85-21179
Finger materials for air cushion vehicles. Volume 2: Base fabrics for finger materials
[AD-A149701] p 448 N85-21408

**RUDDERS**
Stability limits of shear fields of the carbon-fiber-reinforced-plastics rudder unit - Airbus A300/A310
[DGLR PAPER 84-155] p 752 A85-40286
Flight-service program for advanced composite rudders on transport aircraft
[NASA-CR-174537] p 760 N85-29950

**RUN TIME (COMPUTERS)**
Inexpensive calibrations for the influence function method using the interference distributed loads code — for prediction of store loads in aircraft flow fields
[AIAA PAPER 85-0270] p 247 A85-19623
A method of forecasting active constraint with the applications to structural optimization
p 291 A85-22445
A fast, time-accurate unsteady full potential scheme
[AIAA PAPER 85-1512] p 802 A85-40947
Trends in computational capabilities for fluid dynamics
p 601 N85-25172

**RUNGE-KUTTA METHOD**
A digital simulation study of 2-dimensional flutter active suppression system p 172 A85-18280
A multistage time-stepping scheme for the Navier-Stokes equations
[AIAA PAPER 85-0035] p 207 A85-19472
Spectral methods for modeling supersonic chemically reacting flow fields
[AIAA PAPER 85-0302] p 219 A85-19651
Accelerated convergence of Jameson's finite-volume Euler scheme using van der Houwen integrators
p 610 A85-35175
Application of Runge Kutta time marching scheme for the computation of transonic flows in turbomachines
[AIAA PAPER 85-1332] p 631 A85-39728
Shock/turbulent boundary-layer interaction in a compression corner
[AIAA PAPER 85-1567] p 711 A85-40692
Numerical simulation of shock/boundary-layer interaction using a finite-volume Runge-Kutta time-stepping scheme p 736 A85-42982

**RUNWAY ALIGNMENT**
Closely spaced independent parallel runway simulation
[DOT/FAA/CT-84/45] p 117 N85-12902

**RUNWAY CONDITIONS**
Test loading of airfield pavements
p 426 A85-27721
Aircraft accident report: Flying Tigers, Inc., Flight 2468, McDonell Douglas DC8-63, N797FT, Chambers Field, Naval Air Station, Norfolk, Virginia, October 25, 1983
[PB84-910408] p 14 N85-10925
Closely spaced independent parallel runway simulation
[DOT/FAA/CT-84/45] p 117 N85-12902
To take off and to land safely, Hoechst 1678 for ice and snow free runways p 149 N85-13791

**RUNWAY LIGHTS**
Flares and photoflash items
[AD-A145442] p 45 N85-11253
Light your runways and taxiways without electricity
[DE85-000269] p 429 N85-19991
Examination of the feasibility for demonstration and use of radioluminescent lights for Alaskan remote runway lighting
[DE85-002503] p 431 N85-21185
Radioluminescent lighting for rural Alaskan runway lighting and marking
[DE85-007022] p 594 N85-26764
Acceptability testing of radioluminescent lights for VFR-night air taxi operations
[DE85-007303] p 594 N85-26765

**RUNWAYS**
Aeronautical roadways - Peculiarities of airport runways p 176 A85-18870
Aeronautical roadways - Publication of admissible loads: The new ACN/PCN method p 176 A85-18871
Aeronautical roadways - The French method of evaluating the loadbearing capability of aeronautical roadways p 176 A85-18872
Reinforcements for aeronautical roadways
p 176 A85-18873
Materials for emergency repair of runways
[AD-A146139] p 117 N85-12068
Development of a pavement maintenance management system. Volume 9: Development of airfield pavement performance prediction models
[AD-A146150] p 117 N85-12069
Alternatives for runway rubber removal from porous friction surfaces
[DOT/FAA/PM-84/28] p 176 N85-13803
Prefabricated panels for rapidly runway repair and expedient airfield surfacing
[AD-D011277] p 177 N85-13804
System for rapid repair of damaged airfield runways
[AD-D011325] p 276 N85-15754
Development of a preliminary ALRS stabilized material pavement analysis system (SPAS)
[AD-A147116] p 277 N85-15760
International projects, other work of Aeroproyekt Institute p 204 N85-16767
Aeroproyekt develops improved runway surfacing
p 277 N85-16770
New runway enables IL-76 flights to Tenkeli in far north p 430 N85-21108
Runway rubber removal specification development field evaluation procedures development
[FAA-PM-84-27] p 430 N85-21179
Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 1: Correlation analysis of Marshall properties of laboratory-compacted specimens
[FAA-PM-84-12-VOL-1] p 430 N85-21180
Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 2: Statistical analysis of Marshall properties of plant-produced bituminous materials
[FAA-PM-84-12-VOL-2] p 430 N85-21181
Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 3: Statistical analysis of 3 methods for determining maximum specific gravity of bituminous concrete mixtures
[FAA-PM-84-12-VOL-3] p 430 N85-21182
Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 4: Computer simulation of multiple acceptance criteria
[FAA-PM-84-12-VOL-4] p 431 N85-21183
Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 5: Summary of validation studies
[FAA-PM-84-12-VOL-5] p 431 N85-21184
Probabilistic computer model of optimal runway turnoffs
[NASA-CR-172549] p 594 N85-26760
Study of acceptance criteria for joint densities in bituminous airport pavements
[FAA-PM-85-5] p 594 N85-26761
OWEMA report: A project study concerning the possibilities and the desirability of a east-west runway for Maastricht Airport (Netherlands) as a Euro-regional air freight center
[B8476490] p 685 N85-28955
Expedient runway surfacing with post tensioning system for expeditionary airfields
[AD-D011677] p 781 N85-29973
Guidelines for the evaluation of visual approach slope indicators
[ARL/SYS-R-32] p 880 N85-34132

**RURAL AREAS**
Examination of the feasibility for demonstration and use of radioluminescent lights for Alaskan remote runway lighting
[DE85-002503] p 431 N85-21185

## S

**S MATRIX THEORY**

Shielded enclosures for experimental studies of shielding topology [AD-A149292] p 447 N85-20227

**S-3 AIRCRAFT**

Communication control group technology insertion for the S-3A p 93 A85-14454

**S-61 HELICOPTER**

Automatic flight control system (AFCS) of helicopter using an optical control algorithm p 674 A85-38364

**SAAB AIRCRAFT**

SAAB-Fairchild 340 - Operator's analysis p 102 A85-13899

Certification of Kevlar on primary structure SAAB/Fairchild SF-340 aircraft p 118 A85-14111

Getting a partnership into the air - Testing of the Saab-Fairchild 340 p 413 A85-28835

**SAAB 105 AIRCRAFT**

The prediction of buffeting response in flight from wind-tunnel measurements on models of conventional construction p 18 A85-11475

**SAFETY**

A study on a medium-sized rocket with Burnout frame [NAL-TR-821] p 361 N85-18082

Ultralight aircraft technology and public safety [GPO-38-948] p 405 N85-21131

Some aspects of how to design cost-effective flight control systems p 588 N85-26639

**SAFETY DEVICES**

1984 SAE aerospace handbook: Air transport cabin and flight deck safety provisions p 156 A85-17244

A review of Army Air Corps helicopter accidents 1971-1982 p 746 A85-42065

Fast-jet aircrew safety p 916 A85-48099

Flow of nitrogen-pressurized Halon 1301 in fire extinguishing systems [NASA-CR-174271] p 242 N85-15701

Powered articulated headrest system [AD-D011353] p 254 N85-15710

S-3A ballast block final design and engineering tests [AD-A147685] p 243 N85-16842

Parachute extraction device for ultralight gliders [CH-643499-A5] p 559 N85-26663

Torso restraint system [AD-D011609] p 564 N85-26684

**SAFETY FACTORS**

Pipeline control system with high safety reliability — for transportation of aviation fuels p 778 A85-40543

Aircraft chocks [AD-A145135] p 38 N85-10077

System engineering and integration contract for implementation of the National Airspace System plan, volume 1, sections 1.0-4.0, 6.0 [AD-A145763] p 98 N85-12048

**SAFETY MANAGEMENT**

Generic errors in airborne safety-critical systems from an FAA perspective [AIAA PAPER 85-1983] p 820 A85-45969

The aviation safety reporting system p 332 N85-18021

Airport bird hazards associated with solid waste disposal facilities [AD-P004197] p 428 N85-19964

Successful control of gulls and other birds at a sanitary landfill [AD-P004198] p 453 N85-19965

Effectiveness of an overhead wire barrier system in reducing gull use at the BFI Jedburg sanitary landfill, Berkeley and Dorchester counties, South Carolina [AD-P004200] p 454 N85-19967

Aerospace Safety Advisory Panel [NASA-TM-87428] p 406 N85-21135

**SAILS**

The Satellite sail p 433 N85-20376

La Recherche Aerospatiale Bimonthly Bulletin, Number 1984-4, 221/July-August [ESA-TT-884] p 543 N85-26637

**SAILWINGS**

Wing tip sails which give lower drag at all normal flight speeds p 79 A85-14854

**SAINT VENANT PRINCIPLE**

On a generalized optimality criteria method p 795 A85-43232

**SALTS**

Airfoil deposition model p 32 N85-10979

**SALYUT SPACE STATION**

Effect of aerodynamic moment on the regime of the gravity gradient stabilization of the Salyut-6 - Soyuz orbital system p 432 A85-28488

**SAMPLING**

Influence of sampling rate on the calculated fidelity of an aircraft simulation p 57 A85-11083

**SANDWICH STRUCTURES**

Determination of the optimal parameters of aircraft structural elements in the form of sandwich plates and shallow shells with a honeycomb filler p 287 A85-20452

Aeroelastic stability and vibration of layered plates and cylindrical shells p 288 A85-20472

Protection of carbon-fiber reinforced artificial materials against damage by lightning [DGLR PAPER 84-151] p 752 A85-40283

Stress analysis of a SPF/DB composite sandwich panel p 792 A85-41121

Composite repair of aircraft structures p 285 N85-17059

Aircraft safety improvement p 564 N85-26602

**SATELLITE ANTENNAS**

Antenna engineering handbook /2nd edition/ p 180 A85-16081

Development concerns for satellite-based air traffic control surveillance systems p 489 N85-23816

**SATELLITE ATTITUDE CONTROL**

Periodic motions of generalized conservative mechanical systems whose equations of motion contain a large parameter — Russian book p 460 A85-30017

**SATELLITE CONTROL**

Orbit control of a synchronous satellite --- Russian book p 899 A85-49448

**SATELLITE DESIGN**

The Geostar Satellite Navigation and Communications System p 94 A85-14829

Japanese aerospace - Split personality on the mend p 382 A85-27365

**SATELLITE INSTRUMENTS**

Instrumentation for Application Number 1: Mass spectrometric analysis of the boundary layer associated with the tethered satellite p 433 N85-20372

**SATELLITE INTERCEPTORS**

The general class of optimal proportional navigation p 153 A85-18346

**SATELLITE NAVIGATION SYSTEMS**

Institute of Navigation, Annual Meeting, 40th, Cambridge, MA, June 25-28, 1984 p 93 A85-14826

The Geostar Satellite Navigation and Communications System p 94 A85-14829

Clock coasting and altimeter error analysis for GPS p 94 A85-14834

Integrated Global Navigation and Surveillance System p 94 A85-14835

TI 4100 NAVSTAR navigator test results p 95 A85-14840

What can civil transport aircraft do with Navstar? p 337 A85-25817

An algebraic solution of the GPS equations p 408 A85-26609

Satellite navigation systems for the USSR merchant marine p 408 A85-27607

Geostar - A multi-purpose satellite system to serve civil aviation needs p 488 A85-32485

Widespread civil uses envisioned for satellite navigation system p 566 A85-34217

Satellite navigation [S-HRG-98-856] p 246 N85-16851

Program INNAVSAT: Global Positioning System (GPS): Test and demonstration program [BMFT-FB-W-84-047] p 410 N85-21145

**SATELLITE NETWORKS**

Integrated Global Navigation and Surveillance System p 94 A85-14835

The use of pseudo-satellites (PLs) for improving GPS performance p 94 A85-14836

Translated GPS real-time tracking p 487 A85-32209

Satellite communication performance evaluation model for aircraft systems p 566 A85-34490

**SATELLITE OBSERVATION**

TOPEX ground data system p 517 A85-32192

A proof-of-principle getaway special free-flying satellite demonstration p 40 N85-11051

Development concerns for satellite-based air traffic control surveillance systems p 489 N85-23816

**SATELLITE ORBITS**

Radial variations of a satellite orbit due to gravitational errors - Implications for satellite altimetry p 452 A85-28140

The effect of aerodynamic lift on near circular satellite orbits p 595 A85-34859

Satellite orbit determination from an airborne platform p 850 A85-45126

**SATELLITE ROTATION**

Effect of aerodynamic moment on the regime of the gravity gradient stabilization of the Salyut-6 - Soyuz orbital system p 432 A85-28488

**SATELLITE SOUNDING**

Regional mean sea surfaces based on GEOS-3 and SEASAT altimeter data p 453 A85-29716

**SATELLITE TRACKING**

A comparison of multichannel, sequential and multiplex GPS receivers for air navigation p 336 A85-25194

The Geostar position determination and digital message system p 487 A85-32219

**SATELLITE-BORNE INSTRUMENTS**

TOPEX ground data system p 517 A85-32192

**SATELLITE-BORNE RADAR**

Using satellites to improve civilian aircraft surveillance coverage [AIAA PAPER 84-2405] p 91 A85-13512

**SCALE (CORROSION)**

Microstructural development of protective Al2O3 scales p 283 A85-21650

Coating composition and the formation of protective oxide layers at high temperatures p 596 A85-36234

**SCALE EFFECT**

Flowfield scaling in sharp fin-induced shock wave/turbulent boundary-layer interaction p 232 A85-21857

Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurized low-speed wind tunnel p 236 N85-16773

Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurised low-speed wind tunnel [RAE-TM-AERO-2006] p 477 N85-22372

**SCALE MODELS**

Comparison of scaled model data to full size energy efficient engine test results [AIAA PAPER 84-2281] p 110 A85-13953

The accuracy of trials with powered 1/2 models in the S2MA wind tunnel [ONERA, TP NO. 1984-156] p 272 A85-19270

Frequency response of a jet engine test facility air supply system [AIAA PAPER 85-0053] p 273 A85-19485

A universal turboshaft engine test cell - Design considerations and model test results [AIAA PAPER 85-0382] p 275 A85-19711

Evaluation of a ten-foot diameter X-wing rotor p 495 A85-31987

Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurised low-speed wind tunnel p 592 A85-34999

Review of requirements and status of simulation and scaling of transonic, viscous flows [AD-A146357] p 189 N85-15137

Discrete modifications to continuous dynamic structural systems p 372 N85-18410

Impact studies of a 1/3-scale model of an air cushion vehicle [NASA-TM-86360] p 501 N85-23757

Wind-tunnel evaluation of a 21-percent-scale powered model of a prototype advanced scout helicopter [NASA-TP-2420] p 637 N85-28923

**SCALING LAWS**

Scaling laws for jet mixing noise in simulated flight and the prediction scheme associated [AIAA PAPER 84-2360] p 63 A85-10894

Scaling laws for testing of high lift airfoils under heavy rainfall [AIAA PAPER 85-0257] p 216 A85-19617

Application of scaling laws for the flyover jet noise to three departure procedures for the Boeing 727-200 advanced [AIAA PAPER 84-2359] p 377 A85-26319

Computer programs for smoothing and scaling airfoil coordinates [NASA-TM-84666] p 742 N85-31011

**SCANNERS**

Attitude determination in a limb-scanning balloon radiometer p 655 A85-38319

**SCENE ANALYSIS**

Scene matching and its application to aerospace electronic systems p 15 A85-12353

**SCHEDULES**

AGARD bulletin technical programme, 1985 [AGARD-BUL-84-2] p 67 N85-11971

Calendar of selected aeronautical and space meetings [AGARD-CAL-84/2] p 379 N85-19917

**SCHEDULING**

Time scheduling of a mix of 4D equipped and unequipped aircraft p 483 A85-33278

Automated maintenance system test program increment VI production scheduling [AD-A153694] p 706 N85-29838

Cost and schedule implications of multinational coproduction [AD-A154358] p 807 N85-30969

**SCHLIEREN PHOTOGRAPHY**

Determination of leading-edge vortex trajectories by schlieren photography p 904 A85-47150

**SCIENCE**

China report: Science and technology [JPRS-CST-84-037] p 346 N85-18982

**SCINTILLATION**
Unsteady pressure measurements on a biconvex airfoil in a transonic oscillating cascade
[NASA-TM-86914] p 234 N85-15689

**SCREEN EFFECT**
Extremum problem concerning a wing with a maximum gradient of lift force p 234 A85-22370

**SCRUBBERS**
A study of the control of particulate emissions from turbine engine test cells p 696 N85-35205

**SEA ICE**
Ultrashort-wave radar subsurface sounding of sea ice and earth covers p 374 A85-25594
MIZEX, 1984, NASA CV-990 flight report
[NASA-TM-86216] p 800 N85-30451

**SEA SURFACE TEMPERATURE**
Spatial variation of sea surface temperature and flux-related parameters measured from aircraft in the JASIN experiment
[AD-A149321] p 130 A85-15425

**SEALERS**
New high temperature and fuel resistant sealants based on Permapol P-3, polythioether polymers
p 178 A85-16052
Polysulfide-polyurethane interfacial aspects
p 434 A85-27905
Interactions between F-111 fuselage fuel tank sealants. Part 2: Variation in performance properties of polysulfides after contact with polyester degradation products
[AD-A149777] p 438 N85-21368

**SEALING**
Adhesive sealing for integral fuel tanks
[SAWE PAPER 1573] p 901 A85-49901

**SEALS (STOPPERS)**
A study of friction in high-speed face seals
p 46 A85-10381
Blade tip geometry - A factor in abrading sintered seal material p 110 A85-13714
Metallurgical and mechanical phenomena due to rubbing of titanium against sintered powder Nichrome
p 291 A85-22281
An experimental investigation and numerical prediction of thermomechanical phenomena in high speed rotor tip rubbing p 351 A85-25442
High-temperature erosion of plasma-sprayed, yttria-stabilized zirconia in a simulated turbine environment
[AIAA PAPER 85-1219] p 689 A85-39662
Evaluation of abradable turbine seal by friction-wear test and engine performance test p 770 A85-41842
High-temperature erosion of plasma-sprayed, yttria-stabilized zirconia in a simulated turbine environment
[NASA-TP-2406] p 121 N85-13046
Analysis and testing for rotordynamic coefficients of turbulent annular seals with different, directionally homogeneous surface-roughness treatment for rotor and stator elements p 188 N85-14134
Analysis for leakage and rotordynamic coefficients of surface roughened tapered annular gas seals
p 188 N85-14135
Experimental study of ceramic coated tip seals for turbojet engines
[NASA-TM-86939] p 373 N85-19363
Theory versus experiment for the rotordynamic coefficients of annular gas seals. Part 1: Test facility and apparatus
[NASA-CR-174409] p 374 N85-19417
Finger materials for air cushion vehicles. Volume 2: Base fabrics for finger materials
[AD-A149701] p 448 N85-21408
Spacer structure
[AD-D011641] p 670 N85-27866
Oxidizing seal for a turbine tip gas path
[NASA-CASE-LEW-14053-1] p 911 N85-34402

**SEAMS (JOINTS)**
Study of acceptance criteria for joint densities in bituminous airport pavements
[FAA-PM-85-5] p 594 N85-26761

**SEAPLANES**
The effect of changes in the angle of incidence in the event of a richochet at a float step
[RAE-TRANS-2120] p 255 N85-15712

**SEARCH RADAR**
Design decisions guide airborne radar
p 409 A85-27848

**SEARCHING**
Infrared Search and Track system development
[AIAA PAPER 84-2610] p 150 A85-17812
Search and rescue services for international civil aviation p 807 N85-31090
Search and rescue in Canada p 807 N85-31098
The national Search and Rescue (SAR) needs and organization in Norway p 807 N85-31099
The 121.5 MHz ELT: Past, present and future --- Emergency Locator Transmitter (ELT)
p 782 N85-31105

**SEAT BELTS**
Impact tests of automatic lap belt configurations
[AD-A148034] p 243 N85-16844
Improving inflight negative Gz restraint for aircrewmen
[AD-A151909] p 565 N85-26688

**SEATS**
Developing aircraft passenger seats for safety and economy p 90 A85-15170
Development of an energy absorbing passenger seat for the B-720 test aircraft p 332 A85-26308
Crashworthy design considerations for general aviation seats
[SAE PAPER 850855] p 884 A85-50101
Thermal response of aircraft cabin ceiling materials during a post-crash, external fuel-spill, fire scenario
[PB85-149647] p 502 N85-23764
Seat experiments for the full-scale transport aircraft controlled impact demonstration
[AD-A155024] p 820 N85-32106

**SECONDARY FLOW**
Wavelength selection and growth of Goertler vortices
p 73 A85-12703
A method for calculating the performance of ejector nozzles p 287 A85-20232
Effect of wing nose shape on the flow in a wing/body junction p 315 A85-24203
Flow control in a diffusing S-Duct
[AIAA PAPER 85-0524] p 321 A85-25928
Experimental investigation of losses and secondary flow in an axial compressor stage p 524 A85-31007
Control of secondary flow in a turbine stage - Experimental and theoretical study p 727 A85-41804
Supplements to 'Theory of secondary flow in cascades' p 869 A85-48874
Basic consideration of the lifting capability of stoppable rotors
[AD-A150850] p 502 N85-23759

**SECONDARY RADAR**
The automatic SSR taxiway test facility
p 15 A85-12081
Developments in the area of air traffic control systems and the relation with meteorology
[NLR-MP-84029-U] p 645 N85-27848

**SECURITY**
Semiannual report to Congress on the effectiveness of the civil aviation security program
[AD-A149522] p 334 N85-18967

**SEDIMENTS**
Chemistry of fuel deposits and sediments and their precursors
[NASA-CR-174778] p 44 N85-10209
Storage stability of jet fuels
[AD-A146360] p 180 N85-14943

**SELF ADAPTIVE CONTROL SYSTEMS**
Technical evaluation report on the Flight Mechanics Symposium on Active Control Systems: Review, Evaluation and Projections
[AGARD-AR-220] p 588 N85-26730

**SELF ALIGNMENT**
Precision pointing using a dual-wedge scanner — for airborne carbon dioxide Doppler lidar
p 526 A85-32711

**SELF EXCITATION**
Local instability characteristics and frequency determination of self-excited wake flows
p 623 A85-38430
Internal hysteresis experienced on a high pressure syn gas compressor p 187 N85-14122
Clearance flow-generated transverse forces at the rotors of thermal turbomachines
[NASA-TM-77292] p 295 N85-16180
Turbine blade-tip clearance excitation forces
[NASA-CR-171534] p 773 N85-29963

**SELF INDUCED VIBRATION**
Natural mode analysis of N blades disc coupled system - Modal synthesis of symmetric structure with Cnv group
p 445 A85-29147

**SELF OSCILLATION**
Self-oscillations in a jet impinging on a barrier
p 394 A85-30109
The discrete nature of the motion of a system during surface working p 524 A85-31473
Characteristics of the oscillations of a tail unit in a flow of an incompressible gas p 649 A85-39125

**SELF REPAIRING DEVICES**
Invincible aircraft may be a step closer to reality
p 585 A85-36723
Self-Repairing Flight Control System Reliability & Maintainability Program executive overview
p 810 A85-45056
A control law for the self-repairing/digital flight control system p 841 A85-45057

**SEMICONDUCTOR DEVICES**
Investigation of device and electronic interactions in GaAs device processing
[AD-A149747] p 461 N85-22182

**SEMICONDUCTORS (MATERIALS)**
Life cycle cost model for very high speed integrated circuits
[AD-A147798] p 297 N85-17298
The impact of VLSI on guidance and control system design p 595 N85-26654

**SENSITIVITY**
Definition of acceptable levels of mismatch for equivalent systems of augmented CTOL (Conventional Take-Off and Landing) aircraft
[AD-A145819] p 37 N85-11007
Visual simulation requirements for aircraft aspect recognition at real world distances
[AD-A151040] p 517 N85-23810
Selecting step sizes in sensitivity analysis by finite differences
[NASA-TM-86382] p 856 N85-33538

**SENSORIMOTOR PERFORMANCE**
Investigation of limb-sidestick dynamic interaction with roll control
[AIAA PAPER 85-1853] p 843 A85-45882

**SENSORS**
Sensor failure detection for jet engines using analytical redundancy
[AIAA PAPER 84-1452] p 167 A85-16097
Fabrication and testing of a brazed multipiece beryllium support structure for tactical sensors
[AIAA PAPER 85-0679] p 522 A85-30260
Integration of sensor and display subsystems
p 656 A85-38955
A real-time FORTRAN implementation of a sensor failure detection, isolation and accommodation algorithm
p 917 A85-47704
Low-resolution target classification from a staring infrared sensor
[AD-A151690] p 612 N85-26358

**SEPARATED FLOW**
Method for calculating separated subsonic gas flow past wings p 2 A85-10114
Generation of instability waves in flows separating from smooth surfaces p 3 A85-10352
Calculation of unsteady transonic separated flows by viscous-inviscid interaction
[ONERA, TP NO. 1984-100] p 8 A85-12621
A study of separated flow behind two- and three-dimensional bodies exposed to a spherical shock wave p 78 A85-14590
A numerical analysis of unsteady separated flow by the discrete vortex method combined with the singularity method p 81 A85-15884
An incremental block-line-Gauss-Seidel method for the Navier-Stokes equations
[AIAA PAPER 85-0033] p 207 A85-19470
A theory for the core of a three-dimensional leading-edge vortex
[AIAA PAPER 85-0108] p 210 A85-19524
Some features of two-dimensional turbulent separated flows
[AIAA PAPER 85-0178] p 214 A85-19570
Structure of the wall pressure fluctuations in a shock-induced separated turbulent flow
[AIAA PAPER 85-0179] p 214 A85-19571
Prediction of subsonic/transonic separated flow about airfoils
[AIAA PAPER 85-0205] p 215 A85-19589
A study of the effects of numerical dissipation on the calculation of supersonic separated flows
[AIAA PAPER 85-0301] p 219 A85-19650
Passive control effects on flow separation around a protuberance at high subsonic speed — for optical propagation quality enhancement to and from airborne platforms
[AIAA PAPER 85-0351] p 220 A85-19690
Viscous/inviscid interaction analysis of transonic shock induced separated flow including normal pressure gradients
[AIAA PAPER 85-0371] p 221 A85-19703
Evaluation of low Reynolds number turbulence models for attached and separated flows
[AIAA PAPER 85-0375] p 286 A85-19706
Detailed measurements of the flowfield in the vicinity of an airfoil with glaze ice
[AIAA PAPER 85-0409] p 222 A85-19730
Experimental and theoretical analysis of laminar separation bubbles
[AIAA PAPER 84-2201] p 288 A85-20874
Leading-edge separations and cross-flow shocks on delta wings p 317 A85-25126
Vortices in wakes induced by shock waves
p 319 A85-25474

Effect of a longitudinal vortex on a separated turbulent boundary layer [AIAA PAPER 85-0530] p 321 A85-25930
Control of unsteady separated flow structures on airfoils [AIAA PAPER 85-0531] p 321 A85-25931
Modification of vortex interactions in a reattaching separated flow [AIAA PAPER 85-0555] p 321 A85-25946
Aerodynamic effects of probe-induced flow separation of bluff bodies at transonic Mach numbers [AIAA PAPER 85-0103] p 322 A85-26382
A comparison of separated flow airfoil analysis methods p 385 A85-26758
Control plate for shock-boundary layer interaction [AIAA PAPER 85-0523] p 387 A85-27877
A viscous-inviscid interaction method for computing unsteady transonic separation [ONERA, TP NO. 1985-5] p 387 A85-27885
General features characterizing separated flows arising in supersonic and hypersonic flows past blunt bodies p 388 A85-28380
Conical flows near edge breaks of surfaces dividing the supersonic wake flows of an ideal gas p 389 A85-28441
A computer simulation of seperated flow past a rotating cylinder and the Magnus force reversal p 390 A85-28465
Feedback in separated flows over symmetric airfoils [AIAA PAPER 84-2297] p 390 A85-28899
Cavitation models of separated flow of a low-viscosity fluid past wing profiles p 390 A85-29004
Viscid/inviscid interaction analysis of separated trailing-edge flows p 390 A85-29076
Euler and Navier-Stokes solutions for supersonic shear flow past a circular cylinder p 391 A85-29090
Dynamics of forebody flow separation and associated vortices p 392 A85-29262
Structure and characteristics of turbulent separated flow in a cavity p 445 A85-29919
Further experimental evidence of vortex splitting p 470 A85-30673
The Kutta condition in unsteady flow p 471 A85-31183
A possible causative flow mechanism for body rock — nonlinear pitch-yaw-roll coupling in high-performance aircraft p 512 A85-32593
Advances in the study of separated flows p 550 A85-35765
A calculation of slender delta wing with leading-edge separation by Quasi-Vortex-Lattice method p 550 A85-35768
Calculation of the flow around thick wings with separation vortices p 550 A85-35769
Numerical calculation of seperation flow over severely indented blunt body p 551 A85-35777
A numerical study of the separation flow by Navier-Stokes equation past a circular cylinder and sphere p 551 A85-35782
The seperation criteria and flow behavior for three-dimensional steady separated flow p 551 A85-35783
The aerodynamical calculation of the wing section with separation p 551 A85-35784
Numerical analysis of a 3-D separated flow p 552 A85-35792
A method computing viscous/inviscid interaction with laminar separation p 552 A85-35795
Aerodynamic hysteresis in stationary separated flow past elongated bodies p 552 A85-35881
Separated flows p 600 A85-36302
Investigation of three-dimensional separated flows p 619 A85-37338
Experimental research on the effect of separation flow on ablation in supersonic turbulent flow [AIAA PAPER 85-0975] p 694 A85-37625
Cl Beta of unswept flat wings in sideslip. II p 623 A85-38371
The numerical calculation of the pressure distribution of sharp edge slender wings with leading or side edge vortex separation p 625 A85-38966
Numerical and experimental determination of secondary separation on delta wings in subsonic flow p 628 A85-39219
The working group on detached flows - New impulses for flow research and aerodynamics [DGLR PAPER 84-097] p 709 A85-40316
Evaluation of Euler and Navier-Stokes solutions for leading-edge and shock-induced separations [AIAA PAPER 85-1563] p 711 A85-40688
The spanwise variation of laminar separation bubbles on finite wings at low Reynolds numbers [AIAA PAPER 85-1590] p 712 A85-40706
Computation of internal incompressible separated flows using a space-marching technique [AIAA PAPER 85-1624] p 790 A85-40730
Predictions of transonic separated flow with an eddy-viscosity/Reynolds-shear-stress closure model [AIAA PAPER 85-1683] p 717 A85-40768
Time-dependent Navier-Stokes computations of separated flows over airfoils [AIAA PAPER 85-1684] p 717 A85-40769
An implicit time-marching method for studying unsteady flow with massive separation [AIAA PAPER 85-1489] p 790 A85-40929
Analysis of three-dimensional separated flow with the boundary-layer equations [AIAA PAPER 85-1499] p 791 A85-40936
Unsteady, separated flow p 791 A85-40989
Recent tendency of flow field calculations with three-dimensional separation around high velocity vehicle p 723 A85-40992
Asymptotic calculations of gasdynamic quantities near the separation of a limiting shock layer p 724 A85-41275
A parabolized Navier-Stokes algorithm for separated supersonic internal flows [AIAA PAPER 85-1411] p 726 A85-41423
Control of secondary flow in a turbine stage - Experimental and theoretical study p 727 A85-41804
Estimation of the wave resistance of bodies of revolution with a front separation zone in supersonic flow p 730 A85-42119
Nonstationary aerodynamic characteristics of a profile in seperated flow near an undulated wall p 730 A85-42120
The ideal-liquid concept in calculations on the detached flow around blunt objects with a turbulent shear layer at the boundary of the detachment region p 730 A85-42287
High angle-of-attack calculations of the subsonic vortex flow on slender bodies p 730 A85-42353
Developments in the simulation of separated flows using finite difference methods p 732 A85-42953
The computation of viscid/inviscid interaction on airfoils with separated flow p 732 A85-42954
Application of a viscous-inviscid interaction method to predict transonic separated flows p 732 A85-42957
Airfoils with separation and the resulting wakes p 733 A85-42959
Comparison of interactive and Navier Stokes calculations of seperating boundary layer flows p 734 A85-42965
Massive separation and dynamic stall on a cusped trailing-edge airfoil p 735 A85-42974
Studies of the flow field near an NACA 4412 aerofoil at nearly maximum lift p 736 A85-42976
3-D separation on bodies with elliptic cross-section and near root-section of wing-body combination p 737 A85-42987
Prediction of dynamic seperation characteristics using a time-stepping viscid/inviscid approach p 737 A85-42990
Computation of turbulent separated flows over wings p 737 A85-42991
Some developments in vortex motion research p 738 A85-43239
Drag reduction by means of controlled separated flows [AIAA PAPER 85-1800] p 813 A85-43853
An inviscid model of unsteady aerofoil flow with fixed upper surface separation p 816 A85-45166
The rolling vortex-damping of supersonic wing p 872 A85-49705
A calculating method of the breakdown feature of the leading-edge separating vortex for slender delta wings p 873 A85-49707
Laser anemometer study of separated flow on wing profiles [ISL-CO-214/83] p 88 N85-12872
Simulation of separated transonic airfoil flow by finite-difference viscous-inviscid interaction p 146 N85-13768
Flight test results on stall characteristics of a large jet transport [NAL-TR-817] p 162 N85-14835
A collection of flow visualization techniques used in the Aerodynamic Research Branch [NASA-TM-85998] p 189 N85-15135
Turbulent bubbles behind airfoils and wings at high angle of attack p 296 N85-16779
Proceedings of the workshop on unsteady separated flow held at the United States Air Force Academy on August 10-11, 1983 [AD-A148249] p 313 N85-17937
A visual study of a delta wing in steady and unsteady motion [AD-P004158] p 324 N85-17943
Some structural features of unsteady separating turbulent shear flows [AD-P004164] p 370 N85-17949
Unsteady separated flow: Forced and common vorticity about oscillating airfoils [AD-P004167] p 324 N85-17952
Unsteady separated flows: Generation and use by insects [AD-P004168] p 324 N85-17953
Flow separation induced by periodic aerodynamic interference [AD-P004174] p 325 N85-17959
On the flow processes in sharply inclined and stalled airfoils in parallel movement and rotation [NASA-TM-77509] p 328 N85-18952
Annular groove in compressor casing as device for control of air stream p 509 N85-22832
Investigation of the turbulent separated flow behind a spoiler [ISL-CO-240/83] p 481 N85-23726
Stability of vortex structures during separation flow past array of wings p 481 N85-24110
Calculation of unsteady transonic separated flows by viscous-inviscid interaction p 554 N85-25178
An exploratory investigation of sharp fin-induced shock wave/turbulent boundary layer interactions at high shock strengths [AD-A151571] p 602 N85-25772
The role of computational fluid dynamics in aeronautical engineering p 605 N85-26629
Method of calculating separation flow of subsonic gas stream around wings p 636 N85-28161
Proceedings of the 9th US Air Force and the Federal Republic of Germany Data Exchange Agreement Meeting. Viscous and Interacting Flow Field Effects [AD-A153020] p 699 N85-28266
Additional flow field studies of the GA(W)-1 airfoil with 30-percent chord Fowler flap including slot-gap variations and cove shape modifications [NASA-CR-3887] p 739 N85-29919
Experimental investigations on airfoils with different geometries in the domain of high angles of attack-flow separation [NASA-TM-77892] p 818 N85-33110
Modelling of unsteady, incompressible separation on an aerofoil using an inviscid flow algorithm [GU-AERO-8412] p 874 N85-34122

**SEPARATORS**
Analysis of the flow field in an engine inlet particle separator p 5 A85-11633
Analysis of a split-flow inertial particle separator by finite elements — for helicopter gas turbine engine p 231 A85-21845
Development of an advanced vaneless inlet particle separator for helicopter engines [AIAA PAPER 85-1277] p 666 A85-39894

**SEQUENCING**
Low-resolution target classification from a staring infrared sensor [AD-A151690] p 612 N85-26358

**SEQUENTIAL ANALYSIS**
A method of estimating the probability of vertical overlap using observed height data p 749 A85-40986

**SERIES EXPANSION**
Time series approximation of unsteady aerodynamics including pole locations as free parameters [AIAA PAPER 85-0663] p 491 A85-30350

**SERVICE LIFE**
Creep life predictions in nickel-based superalloys p 42 A85-12100
Accumulation of fracture probability as damage accumulation for the prediction of service life and crack propagation in dynamically loaded aviation sheet metal p 122 A85-12944
Maintenance impact of current loads recording methodology on crack-growth based individual aircraft tracking [AIAA PAPER 84-2410] p 97 A85-13516
Damage accumulation techniques in damage tolerance analysis p 126 A85-15861
Long-endurance drones mature p 157 A85-18116
Polyimide protective coatings for 700 deg service p 282 A85-21527
Determination of the service life of oils in aircraft gas turbine engines p 364 A85-26280
Life modeling of atmospheric and low pressure plasma-sprayed thermal-barrier coating p 435 A85-29728
Determination of the optimum lubricant change period for the joints of the landing gear of aircraft p 695 A85-38600
Acquisition of detailed heat transfer behavior in complex internal flow passages [SAE PAPER 841503] p 695 A85-39061
Usage monitoring - A milestone in engine life management [AIAA PAPER 85-1206] p 665 A35-39656
Using aviation oils on the basis of their actual condition p 852 A85-44200

Field and laboratory investigation of Kapton insulated aircraft wiring p 852 A85-45138
Improving reliability and lifetime of rejuvenated turbine blades p 855 A85-45803
Avionics integrity program (Avip). Volume 4: Force management. Economic life considerations
[AD-A145592] p 24 N85-10941
Equivalent damage: A critical assessment p 28 N85-10952
Predicting changes in reliability characteristics of gas turbine engines during operation p 189 N85-14964
Structural flight load measurement demonstration of structural integrity p 254 N85-15670
US Army helicopter operational flight loads p 254 N85-15675
Helicopter data acquisition in WHL p 254 N85-15676
Tailored airfoils for vertical axis wind turbines
[DE85-004628] p 399 N85-21128
Finger materials for air cushion vehicles. Volume 2: Base fabrics for finger materials
[AD-A149701] p 448 N85-21408
Approach for service life extension of explosive devices for aircraft escape systems
[NASA-TM-86323] p 499 N85-22381
Performance improvements from surfacing in aero engine components
[PNR-90257] p 891 N85-34142

**SERVOCONTROL**
More detailed measurements behind turbulence manipulators including tandem devices using servo-controlled balances
[AIAA PAPER 85-0521] p 320 A85-25927
Aeroservoelastic modeling methodology for active control simulation p 839 A85-45044
Asymmetric aeroservoelastic modeling for Active Control Simulation
[AIAA PAPER 85-1861] p 843 A85-45890

**SERVOMECHANISMS**
Flutter taming: A new tool for the aeroelastic designer
[AD-A150834] p 515 N85-23802

**SERVOMOTORS**
Design and test of a four channel motor for electromechanical flight control actuation
[NASA-CR-171838] p 297 N85-17294

**SHADOWGRAPH PHOTOGRAPHY**
Wide-field shadowgraph flow visualization of tip vortices generated by a helicopter rotor
[AIAA PAPER 85-1557] p 710 A85-40682
Optical system for measuring shadowgraph data
[AD-D011642] p 705 N85-28784

**SHAFTS (MACHINE ELEMENTS)**
Critical speed testing of the Grumman X-29A power take-off shaft subsystem
[SAE PAPER 841603] p 662 A85-39163
Improvement of the corrosion resistance of turbine engine bearings
[AD-A147430] p 265 N85-15731

**SHALE OIL**
Lubricity of well-characterized jet and broad-cut fuels by ball-on-cylinder machine
[NASA-TM-83807] p 120 N85-12183
Aspects of high-resolution gas chromatography as applied to the analysis of hydrocarbon fuels and other complex organic mixtures. Volume 1
[AD-A156154] p 902 N85-35257

**SHALLOW SHELLS**
Determination of the optimal parameters of aircraft structural elements in the form of sandwich plates and shallow shells with a honeycomb filler p 287 A85-20452

**SHAPE CONTROL**
Constellations p 433 N85-20352

**SHAPES**
Drag of the fundamental shapes of parachutes p 231 A85-20996
Semianalytic modeling of aerodynamic shapes
[NASA-TP-2413] p 398 N85-21120
A description of the Langley wireframe geometry standard (LaWGS) format
[NASA-TM-85767] p 499 N85-22380

**SHARP LEADING EDGES**
Some effects of sweep direction and strakes for wings with sharp leading edges p 78 A85-14651
A generalized discrete-vortex method for sharp-edged cylinders p 546 A85-35132
The discrete vortices from a delta wing p 546 A85-35150
Assessment of preliminary prediction techniques for wing leading-edge vortex flows at supersonic speeds p 547 A85-35580
Fundamental aerodynamic characteristics of delta wings with leading-edge vortex flows p 547 A85-35581
The numerical calculation of the pressure distribution of sharp edge slender wings with leading or side edge vortex separation p 625 A85-38966
Interaction between shock waves and boundary layers induced by sharp fin p 723 A85-40999

**SHEAR FLOW**
The numerical solution of flow around a rotating circular cylinder in uniform shear flow p 122 A85-12768
A Navier-Stokes calculation of 3-D, turbulent flow near a propeller in a shear flow
[AIAA PAPER 85-0385] p 220 A85-19698
The universal nature of zero-crossing time and velocity scales in turbulent shear flows p 232 A85-21851
Turbulence suppression in free turbulent shear flows under controlled excitation. II - Jet-noise reduction p 366 A85-23844
The optics of aircraft shear flows — laser beam propagation through atmospheric turbulence
[AIAA PAPER 85-0557] p 460 A85-27880
Euler and Navier-Stokes solutions for supersonic shear flow past a circular cylinder p 391 A85-29090
Lifting surface approach of oscillating wings in weak shear flow p 394 A85-30201
Computation of three-dimensional turbulent shear flows in corners p 474 A85-32607
The interaction of a diffusing line vortex and an aligned shear flow p 788 A85-40254
Turbulence in air inlets
[AAAF PAPER NT 84-10] p 870 A85-48990
Some structural features of unsteady separating turbulent shear flows
[AD-P004164] p 370 N85-17949
Three-dimensional boundary layers and shear flows activities at ONERA/CERT p 597 N85-25785
An experimental study of the noise generated by vaporous cavitation in turbulent shear flows produced by confined orifice plates p 611 N85-26316

**SHEAR LAYERS**
Generation of instability waves in flows separating from smooth surfaces p 3 A85-10352
Effect of initial conditions on turbulent reattachment downstream of a backward-facing step p 80 A85-15331
A study of compressible turbulent free shear layers using laser Doppler velocimetry
[AIAA PAPER 85-0177] p 213 A85-19569
Aero-optical turbulent boundary layer/shear layer experiment on the KC-135 aircraft revisited p 546 A85-35202
The ideal-liquid concept in calculations on the detached flow around blunt objects with a turbulent shear layer at the boundary of the detachment region p 730 A85-42287
On the wake of a pitching airfoil
[AIAA PAPER 85-1621] p 737 A85-43050
Aero-optics experimental techniques
[AD-A146755] p 294 N85-16067

**SHEAR PROPERTIES**
Applying shear beam load measuring techniques to portable platform scales for aircraft weighing
[SAWE PAPER 1581] p 898 A85-49906

**SHEAR STRENGTH**
Design of an adhesive lap joint p 444 A85-29142
Stability limits of shear fields of the carbon-fiber-reinforced-plastics rudder unit - Airbus A300/A310
[DGLR PAPER 84-155] p 752 A85-40286

**SHEAR STRESS**
Design of an adhesive lap joint p 444 A85-29142
Pretwist and shear flexibility in the vibrations of turbine blades p 657 A85-37233
An examination of turbulence models for a separating three-dimensional turbulent boundary layer
[ONERA, TP NO. 1985-74] p 904 A85-47273
Study of stresses on surface of flat barrier immersed in under expanded jet of rarefied gas p 562 N85-27061

**SHELL STABILITY**
Stability of the shell structures of powerplants with variable stiffness parameters p 183 A85-17057
Aeroelastic stability and vibration of layered plates and cylindrical shells p 288 A85-20472

**SHELL THEORY**
Current problems in the theory of plates and shells in aircraft p 287 A85-20459
The development of efficient models of the deformation of thin-wall structures p 789 A85-40589

**SHELLS (STRUCTURAL FORMS)**
Three dimensional nonlinear dynamic finite element analysis for the response of a thick laminated shell to impact loads
[AIAA PAPER 85-0713] p 491 A85-30361
The use of functional splines for constructing aircraft surfaces p 534 A85-31466
Optimal structural design of shells - A survey p 788 A85-40240
USSR report: Engineering and equipment
[JPRS-UEQ-85-003] p 526 N85-22782

**SHIELDING**
Experimental study of aerodynamic shielding of turbojet engine air intake against exhaust gases p 355 N85-18210
Shielded enclosures for experimental studies of shielding topology
[AD-A149292] p 447 N85-20227
Removable cleanable antireflection shield
[AD-D011735] p 863 N85-33810

**SHIPS**
Optimization of ski-jump take-off performance
[AIAA PAPER 85-1962] p 827 A85-45946
Simulation evaluation of two VTOL control/display systems in IMC approach and shipboard landing
[NASA-TM-85996] p 173 N85-14841
Using the control system design environment in the design of a data link receiver unit for the Coast Guard HH-65A helicopter
[AD-A148624] p 271 N85-16880
Use of braking stages for control of turbine speed p 371 N85-18215
High-strength composite materials for aircraft, body armor p 435 N85-20057
Uses of composite materials p 520 N85-22698

**SHOCK DISCONTINUITY**
Configuration of shock waves closing a local supersonic zone p 623 A85-38481
Computational methods for discontinuities in fluids p 907 A85-48220
Variational principle for two dimensional flows of the compressible ideal fluid with incontinuous surfaces p 909 A85-49704
Characteristics of steady-state hypersonic flow about blunted bodies with discontinuities in generators p 636 N85-28155

**SHOCK LAYERS**
A numerical study of gas-particle supersonic flow past blunt bodies - The case of axisymmetric flow p 74 A85-12771
Hypersonic flow past a wing at large angles of attack p 78 A85-14591
Effects of slip and chemical reaction models on three-dimensional nonequilibrium viscous shock-layer flows p 80 A85-15506
A theory for a three-dimensional hypersonic viscous shock layer in the vicinity of a plane of symmetry p 141 A85-16217
A numerical study of three-dimensional radiation fields in problems of supersonic flow past segmental bodies p 227 A85-20025
Hypersonic chemically nonequilibrium viscous shock layer on wings with a catalytic surface p 229 A85-20561
Viscous shock-layer flowfield analysis by an explicit-implicit method p 474 A85-32612
A numerical calculation of nonequilibrium flow past a wing in the approximation of a thin shock layer p 544 A85-33593
Asymptotic calculations of gasdynamic quantities near the separation of a limiting shock layer p 724 A85-41275

**SHOCK LOADS**
Effect of sonic boom on a cracked plaster-wood wall p 191 A85-16256

**SHOCK SPECTRA**
Alternative shock characterizations for consistent shock test specifications p 372 N85-18396

**SHOCK TESTS**
A study of the physical mechanisms and the perturbations created by the attachment of an arc to a conducting cylinder
[ONERA, TP NO. 1985-47] p 904 A85-47258

**SHOCK TUBES**
Compressor cascades research using a helium-driven shock tube p 318 A85-25457
Vortices in wakes induced by shock waves p 319 A85-25474
Heat-transfer distributions for biconics at incidence in hypersonic-hyporvelocity real-gas flows p 319 A85-25478
Development and performance of the NASA Langley Research Center expansion tube/tunnel, a hypersonic-hypervelocity real-gas facility p 368 A85-25482
Observation of wave diagrams for shock tube with the divergent nozzle at diaphragm section p 592 A85-35761
Investigation of heat transfer to a turbine blade cascade using a shock tube
[AD-A153090] p 671 N85-27871
Characteristics of steady-state hypersonic flow about blunted bodies with discontinuities in generators p 636 N85-28155

**SHOCK TUNNELS**
The development and use of free piston wind tunnels p 368 A85-25455

Aerodynamic force measurements in the IISc hypersonic shock tunnel p 320 A85-25481

Measurements of density and velocity profiles in non-equilibrium laminar hypersonic boundary layers in air p 320 A85-25483

Non-equilibrium high enthalpy airflows in a free piston shock tunnel p 320 A85-25484

An experimental investigation of flap turbulent heat transfer and pressure characteristics in hypersonic flow p 550 A85-35773

Shock tunnel measurements of heat transfer in a model scramjet
[AIAA PAPER 85-0908] p 658 A85-37582

Hypersonic gas dynamics
[AIAA PAPER 85-0999] p 621 A85-37643

Experimental investigation of heat transfer distribution inside the gap of a flat plate-flap combination in a shock tunnel p 695 A85-38973

**SHOCK WAVE ATTENUATION**

Analysis of unsteady inviscid diffuser flow with a shock wave p 580 A85-34010

Perturbations of a transonic flow with vanishing shock waves p 546 A85-35152

Time dependent computation of the Euler equations for designing 2-D cascades, including the case of transonic shock free design p 727 A85-41814

A numerical method to weaken shock in transonic cascades p 727 A85-41815

**SHOCK WAVE CONTROL**

Control of jet shock associated noise by a reflector
[AIAA PAPER 84-2279] p 59 A85-10839

Selection of air intake parameters for supersonic-flow operation p 527 N85-22837

**SHOCK WAVE INTERACTION**

On the relationship between broadband shock associated noise and screech tones
[AIAA PAPER 84-2276] p 59 A85-10838

Interaction between a weak oblique shock wave and a turbulent boundary layer in purely supersonic flow p 6 A85-12035

A characteristics approach to swept shock-wave/boundary-layer interactions p 73 A85-12717

Surface phenomena in a three-dimensional skewed shock wave/laminar boundary-layer interaction p 80 A85-15336

Supersonic motion of bodies in a gas with shock waves p 140 A85-16183

Oblique shock wave - Turbulent boundary layer interaction with suction p 142 A85-17243

Effects of suction on shock/boundary-layer interaction and shock-induced separation p 143 A85-18510

Structure of the wall pressure fluctuations in a shock-induced separated turbulent flow
[AIAA PAPER 85-0179] p 214 A85-19571

Computation of unsteady shock-induced vortex separation
[AIAA PAPER 85-0183] p 214 A85-19573

Supercritical airfoil drag reduction by passive shock wave/boundary layer control in the Mach number range .75 to .90
[AIAA PAPER 85-0207] p 215 A85-19591

Viscous/inviscid interaction analysis of transonic shock induced separated flow including normal pressure gradients
[AIAA PAPER 85-0371] p 221 A85-19703

Flowfield scaling in sharp fin-induced shock wave/turbulent boundary-layer interaction p 232 A85-21857

Transonic shock wave - Boundary layer interaction at a convex wall p 317 A85-24800

Leading-edge separations and cross-flow shocks on delta wings p 317 A85-25126

The response of normal shocks in diffusers p 318 A85-25150

Control plate for shock-boundary layer interaction
[AIAA PAPER 85-0523] p 387 A85-27877

Modeling of gas flows with shock waves — Russian book p 472 A85-31889

Transonic shock-wave/turbulent boundary-layer interactions in a circular duct p 474 A85-32610

Configuration of a shock wave interacting with a centered compression fan p 544 A85-34379

The effect of freestream turbulence on pressure fluctuations in transonic flow p 545 A85-34998

Upstream influence in conically symmetric flow p 546 A85-35153

Transonic shock interaction with a tangentially injected turbulent boundary layer p 548 A85-35584

Conical similarity of shock/boundary-layer interactions generated by swept and unswept fins p 626 A85-38984

Heat transfer investigation in the junction region of circular cylinder normal to a flat plate at 90 deg location
[ASME PAPER 84-WA/HT-70] p 698 A85-39896

Surface pressure fluctuations in a three-dimensional shock wave/turbulent boundary layer interaction at various shock strengths
[AIAA PAPER 85-1562] p 711 A85-40687

A holographic interferometric study of an axisymmetric shock-wave/boundary-layer strong interaction flow
[AIAA PAPER 85-1564] p 711 A85-40689

Computation of a three dimensional skewed shock wave laminar boundary layer interaction
[AIAA PAPER 85-1565] p 711 A85-40690

An experimental study of three-dimensional shock wave/turbulent boundary layer interactions in a supersonic flow
[AIAA PAPER 85-1566] p 711 A85-40691

Shock/turbulent boundary-layer interaction in a compression corner
[AIAA PAPER 85-1567] p 711 A85-40692

Interaction between shock waves and boundary layers induced by sharp fin p 723 A85-40999

Development of a Navier-Stokes analysis to investigate the mechanism of shock/wave boundary layer interactions p 734 A85-42966

Oscillating oblique shock interaction with a laminar boundary layer p 735 A85-42971

Computation of three-dimensional shock-wave/turbulent boundary-layer interaction flows p 736 A85-42980

Numerical simulation of shock/boundary-layer interaction using a finite-volume Runge-Kutta time-stepping scheme p 736 A85-42982

Theoretical and experimental study of nonadiabatic transonic shock/boundary-layer interaction p 869 A85-48529

Multiple transonic shock-wave/turbulent boundary-layer interaction in a circular duct p 869 A85-48533

Active and passive shock/boundary layer interaction control on supercritical airfoils p 238 N85-16795

An exploratory investigation of sharp fin-induced shock wave/turbulent boundary layer interactions at high shock strengths
[AD-A151571] p 602 N85-25772

A curved test section for research on transonic shock wave-boundary layer interaction
[VTH-LR-414] p 561 N85-26682

Numerical solution of transonic normal shock wave-boundary layer interaction using the Bohning-Zierep model — wind tunnel flow
[VTH-LR-416] p 562 N85-26683

Theoretical investigation of three-dimensional shock wave turbulent boundary layer interactions. Part 3
[AD-A152251] p 607 N85-27177

Shock waves in adjacent engine inlets
[ISL-R-104/84] p 781 N85-31068

**SHOCK WAVE PROFILES**

The parameters of shock waves from bodies of revolution in a homogeneous atmosphere p 142 A85-16919

Flow behind an attached shock wave in a radiating gas p 233 A85-22308

Transonic cascade flow with given shock shapes solved by separate supersonic and subsonic computations p 315 A85-24095

An improved model of shock waves in front of two-dimensional cascades p 318 A85-25213

Experimental and numerical investigation of a shock wave impingement on a cylinder p 545 A85-35130

Configuration of shock waves closing a local supersonic zone p 623 A85-38481

**SHOCK WAVE PROPAGATION**

Forced oscillations of transonic channel and inlet flows with shock waves p 73 A85-12711

Experimental study of Mach reflection of weak shock waves p 124 A85-14888

A random choice method for two-dimensional steady supersonic shock wave diffraction problems p 141 A85-16531

A quasi-conservative lambda formulation — for inviscid transonic flow simulation
[AIAA PAPER 85-0088] p 210 A85-19511

The problem of gradual opening in wave rotor passages p 365 A85-23387

An experimental investigation of the parallel blade-vortex interaction
[NASA-TM-86005] p 146 N85-13777

Supersonic flow around blunt wedge p 636 N85-28158

Shock waves in adjacent engine inlets
[ISL-R-104/84] p 781 N85-31068

**SHOCK WAVES**

Flight tests of a sweptback parabolic tip on a Dauphin 365N
[ONERA, TP NO. 1984-84] p 7 A85-12613

Theoretical study of the transonic flow past wedge profiles with detached shock waves p 74 A85-12870

A study of separated flow behind two- and three-dimensional bodies exposed to a spherical shock wave p 78 A85-14590

Spectral methods for the Euler equations. I - Fourier methods and shock capturing p 185 A85-18684

Surface pressure fluctuations in a three-dimensional shock wave/turbulent boundary layer interaction
[AIAA PAPER 85-0125] p 211 A85-19536

Shock waves in transonic channel flows at moderate Reynolds number
[AIAA PAPER 85-0369] p 221 A85-19702

Shock induced vortices on elliptic cones in supersonic flow
[AIAA PAPER 85-0433] p 223 A85-19746

Modes of shock-wave oscillations on spike-tipped bodies p 232 A85-21855

Shock-fitting solution of the supersonic flowfield in a rounded internal corner p 232 A85-21856

Suppression of shocks on transonic airfoils p 319 A85-25458

On the use of parametric differentiation to predict weak shock waves p 319 A85-25465

The shock wave from a supersonic projectile p 319 A85-25467

Two-dimensional viscous simulation of inlet/diffuser flows with terminal shocks p 386 A85-27091

Mach reflection flowfields associated with strong shocks p 391 A85-29082

A method for computing the drag rise Mach number for any aerofoil section p 472 A85-31781

Acoustic shocks in a variable area duct containing near sonic flows p 474 A85-32632

Observation of wave diagrams for shock tube with the divergent nozzle at diaphragm section p 592 A85-35761

On detached shock wave of sphere moving with transonic velocities p 549 A85-35763

Near-sonic subsonic flow around a profile - In particular: the foot-point structure of a shock and the flow-reverse theorem p 553 A85-36342

Design of a transonic flow with compression shock p 553 A85-36344

A system of shock and rarefaction waves in flows past bodies with complex shapes p 618 A85-37330

The isolated nature of solutions with a strong attached shock wave at the edges of a conical wing and a wedge p 623 A85-38488

A computational study of the unsteady shock-wave structure in a two-dimensional transonic rotor p 629 A85-39578

Accurate and efficient solutions of transonic internal flows
[AIAA PAPER 85-1334] p 631 A85-39729

Evaluation of Euler and Navier-Stokes solutions for leading-edge and shock-induced separations
[AIAA PAPER 85-1563] p 711 A85-40688

A parabolized Navier-Stokes algorithm for separated supersonic internal flows
[AIAA PAPER 85-1411] p 726 A85-41423

Hypersonic flow past a wing at large angles of attack with a detached shock wave p 815 A85-44788

Observations from varying the lift and drag inputs to a noise prediction method for supersonic helical tip speed propellers
[NASA-TM-83797] p 64 N85-10788

Numerical studies of unsteady transonic flow over an oscillating airfoil
[NASA-TM-86011] p 128 N85-12316

Experimental investigation of shock-cell noise reduction for dual-stream nozzles in simulated flight
[NASA-CR-3846] p 135 N85-13549

Pressure oscillations in liquid-fueled ramjet engines p 169 N85-13797

A comparative study of the nonuniqueness problem of the potential equation
[NASA-TP-2385] p 235 N85-15694

Active and passive shock/boundary layer interaction control on supercritical airfoils p 238 N85-16795

Shock waves in transonic flows at moderate Reynolds Number p 238 N85-16823

A numerical study of several supersonic flows p 325 N85-17995

Aerodynamic heating rate distributions induced by trailing edge controls on hypersonic aircraft configurations at Mach 8
[NASA-TM-87453] p 476 N85-22370

Numerical studies of unsteady transonic flow over oscillating airfoil p 554 N85-25174

Investigation to optimize the passive shock wave/boundary layer control for supercritical airfoil drag reduction
[NASA-CR-175788] p 559 N85-26665

Analyses of orderly structures in jets and the relationship with emitted noise
[ISL-R-117/83] p 612 N85-27646

Characteristics of steady-state hypersonic flow about blunted bodies with discontinuities in generators p 636 N85-28155
Floating shock-fitting in transonic potential flow calculations p 742 N85-31007
Development of a temperature-compensated hot-film anemometer system for boundary-layer transition detection on high-performance aircraft [NASA-TM-86732] p 835 N85-33121
Computation of three-dimensional shock wave and boundary-layer interactions [NASA-TM-86780] p 911 N85-35372

**SHORT HAUL AIRCRAFT**
The determination of optimum flight profiles for short haul routes [AIAA PAPER 84-2408] p 89 A85-13515
An advanced short range airliner design project p 496 A85-32842
Short-range antiarmor flight vehicles of the Apache/CWS family [DGLR PAPER 84-125] p 707 A85-40338
The determination of optimum flight profiles for short-haul routes p 758 A85-42930
Manufacture of composite propeller blades for commuter aircraft [SAE PAPER 850875] p 910 A85-50108

**SHORT TAKEOFF AIRCRAFT**
The aerodynamic characteristics of a propulsive wing/canard concept in STOL [AIAA PAPER 84-2396] p 74 A85-13507
Wind tunnel evaluation of advanced exhaust nozzles for STOL tactical aircraft [AIAA PAPER 84-2457] p 106 A85-13545
Future technologies using the Lockheed HTB aircraft — High Technology Test Bed [AIAA PAPER 84-2466] p 70 A85-13552
Future Air Force tactical airlifter considerations [AIAA PAPER 84-2504] p 100 A85-13574
Hot gas ingestion and the speed needed to avoid ingestion for transport type STO/VL and STOL configurations [AIAA PAPER 84-2530] p 101 A85-13589
The X-29 flight-research program p 102 A85-13895
Lockheed pushes Stol technology p 137 A85-17773
Multivariable control system design techniques - An application to a short takeoff and landing aircraft [AIAA PAPER 84-2625] p 171 A85-17822
Aerodynamics of an airfoil in ground effect with a jet issuing from its undersurface [AIAA PAPER 85-0019] p 207 A85-19461
STOL technology for conventional flight enhancement [AIAA PAPER 84-2397] p 250 A85-20875
Design of a STOL aircraft with jet assisted takeoff units p 253 A85-22373
Experimental definition of nonaxisymmetric exhaust nozzle plumes — for aircraft thrust vector control p 385 A85-26752
Approach and landing technologies for STOL fighter configurations p 414 A85-29254
JVX LCC reduction through front-end logistics p 465 A85-31982
Development of a pneumatic thrust deflector [SAE PAPER 841558] p 663 A85-39209
Integration of vectoring nozzles in a STOL transonic tactical aircraft [AIAA PAPER 85-1285] p 667 A85-39699
Aircraft control integration - Methodology and performance impact [AIAA PAPER 85-1424] p 775 A85-40839
On the propulsion system of the quiet STOL research aircraft p 766 A85-41034
Supercruise for a STOL dogfighter p 758 A85-42897
Lockheed's High Tech Test Bed p 825 A85-44746
Reducing landing dispersions through flight control improvements on a turboprop-powered transport aircraft (The Lockheed High Technology Test Bed) [AIAA PAPER 85-1850] p 842 A85-45879
Fuel conservative guidance for shipboard landing of powered-lift STOL aircraft [AIAA PAPER 85-1069] p 827 A85-45911
An investigation of flying qualities requirements for a STOL fighter in approach and landing [AIAA PAPER 85-1807] p 846 A85-47031
Circulation control: A bibliography of DTNSRDC research and selected outside references: Update [AD-A146966] p 201 N85-15661
Low-speed wind tunnel tests of the NAL fan-jet STOL research aircraft model with ground simulation by tangential blowing [NAL-TR-826] p 345 N85-18976
The use of pressure sensing taps on the aircraft wing as sensor for flight control systems p 606 N85-26660
The STOL and maneuver technology program integrated control system p 591 N85-26757
Analysis of control system from a viewpoint of desired pole placement and desired degree of robustness [AD-A152627] p 675 N85-27876
The STOL and maneuver technology program integrated control system development p 680 N85-27910
Discussion of the paper, Some Aspects of Propulsion for the Augmenter-Wing Concept, by D. C. Whittley [NASA-TM-77884] p 818 N85-33108
Presentation of the acoustic and aerodynamic results of the Aladin 2 concept qualification testing [NASA-TM-77883] p 876 N85-35161

**SHOT PEENING**
Development of a mathematical model for predicting the percentage fatigue life increase resulting from shot peened components [AD-A155774] p 912 N85-35425

**SHROUDED TURBINES**
Time resolved measurements of a turbine rotor stationary tip casing pressure and heat transfer field [AIAA PAPER 85-1220] p 666 A85-39663
Shroud segments for unshrouded blade turbines [PNR-90260] p 891 N85-34143

**SHROUDS**
Experimental and analytical study of ceramic-coated turbine-tip shroud seals for small turbine engines [NASA-TM-86881] p 353 N85-18057
Shroud segments for unshrouded blade turbines [PNR-90260] p 891 N85-34143

**SIDE-LOOKING RADAR**
A new digital X-band SLAR p 46 A85-10263
An algorithm for radiometric and geometric correction of digital SLAR data p 56 A85-11216
The main characteristics of a synthetic-aperture radar in the case of arbitrary motion of the flight vehicle p 96 A85-15687
Sinus - An advanced concept for photo-interpretation p 367 A85-24259
Stereo models from synthetic aperture radar p 533 A85-30961
A technique for determining the effects of aircraft components on the pattern of radar antennas before they are built p 833 A85-45018

**SIDEBANDS**
An explanation for the asymmetry of the modulation sidebands about the tooth meshing frequency in epicyclic gear vibration p 441 A85-27480

**SIDES**
Effect of upstream sidewall boundary layer removal on an airfoil test — conducted in Langley 0.3-m transonic cryogenic tunnel p 83 N85-12019

**SIDESLIP**
Flow over double-delta wing and wing body at high alpha p 144 A85-18516
An experimental and numerical study of flow past a wedge of finite width at angles of sideslip p 471 A85-31476
An extension of the generalized vortex-lattice method of supersonic sideslipping wings p 626 A85-38972
Wind tunnel calibration of a hemispherical head angle of attack and angle of sideslip indicator [FFA-TN-1984-11] p 13 N85-10923
Supermaneuverability [AD-P004153] p 342 N85-17938
Aerodynamic characteristics of the standard dynamics model in coning motion at Mach 0.6 [NASA-TM-86717] p 817 N85-32094

**SIDEWINDER MISSILES**
Air force, robotic painting [AD-P004006] p 126 N85-11986

**SIGNAL ANALYSIS**
A robust and efficient technique for dealing with time-varying instrumental bias in linear filtering p 458 A85-29370

**SIGNAL DETECTION**
Microwave responses of the western North Atlantic [NASA-CR-175888] p 699 N85-28191

**SIGNAL DETECTORS**
Time reference errors of angle-measuring signals at the output of an envelope detector under multipath conditions p 488 A85-33045

**SIGNAL MEASUREMENT**
Time reference errors of angle-measuring signals at the output of an envelope detector under multipath conditions p 488 A85-33045

**SIGNAL PROCESSING**
A new digital X-band SLAR p 46 A85-10263
FAA's new terminal radar, the ASR-9 incorporates a separate weather channel p 15 A85-12080
Low cost GPS receiver signal processing p 95 A85-14841
Application of digital signal processing to a low data rate communications receiver [AIAA PAPER 84-2652] p 183 A85-17839
The impact of advanced computational techniques on digital avionics signal processor performance [AIAA PAPER 84-2653] p 194 A85-17840
Enhanced TCAS II signal processor development — Traffic alert and Collision Avoidance System [AIAA PAPER 84-2656] p 150 A85-17843
An adaptive airborne VLF communications array concept [AIAA PAPER 84-2698] p 151 A85-17870
Ramp's new primary surveillance radar — Radar Modernization Project p 153 A85-18145
Signal processing consideration for a millimeter wave seeker p 336 A85-24938
Use of GPS for determining position of drifting buoys p 486 A85-32204
The Geostar position determination and digital message system p 487 A85-32219
Radar signal processing p 599 A85-34443
Extraction of helicopter-radiated noise by frequency domain processing p 805 A85-40572
A signal processor with distributed control and multidimensional scalability p 858 A85-45005
Digital signal processing utilizing a generic instruction set p 854 A85-45006
Development of active microwave ferromagnetic resonance eddy current probes and associated signal processing methods p 906 A85-47473
Condition monitoring of helicopter gearboxes using automatic vibration analysis techniques p 510 N85-23790
The impact of VLSI on guidance and control system design p 595 N85-26654
A phase-locked frequency multiplier for the signal averaging of the vibration of the Wessex helicopter input spiral bevel pinion [AD-A154914] p 829 N85-32113

**SIGNAL RECEPTION**
Detection, classification, and extraction of helicopter-radiated noise [AD-A145993] p 134 N85-12661

**SIGNAL TO NOISE RATIOS**
Measurement of signal separation between radio service and air navigation service [IRT-TB-B-40/82] p 246 N85-16860

**SIGNATURE ANALYSIS**
Field tests and signature analysis of an imaging CO2 laser radar — for cruise missile guidance and targeting sensor p 334 A85-22651

**SIGNS AND SYMPTOMS**
The airline passenger undergoing withdrawal or overdose from narcotics or other drugs p 746 A85-42074

**SIKORSKY AIRCRAFT**
Fatigue substantiation of the SH-60B stabilator by test [AIAA PAPER 84-2452] p 98 A85-13541
Sikorsky composite rotor hub development p 251 A85-21381
Development and qualification testing of S-76 helicopter takeoff and landing procedures for reduced field length p 414 A85-28643
Environmental and structural assessment of four year in-commercial service composite helicopter structures p 493 A85-31958
The Sikorsky dynaflex rotor - An advanced main rotor system for the 1990's p 494 A85-31963
Weight control of composite parts in production [SAWE PAPER 1629] p 866 A85-49927

**SILICIDES**
Orientation relationship between alpha-prime titanium and silicide S2 in alloy Ti-6Al-5Zr-0.5Mo-0.25Si p 434 A85-27814

**SILICON CARBIDES**
Fibers for structurally reliable metal and ceramic composites p 687 A85-37484
Feasibility study of the welding of SiC p 688 A85-39339
Ceramic heat exchangers for gas turbines or turbojets [ONERA, TP NO. 1985-35] p 904 A85-47288
Development and fabrication of refractory bodies for gas turbine engines [BMFT-FB-T-84-180] p 113 N85-12899
Reaction-bonded and fiber-reinforced SiC static and dynamic gas turbine components [BMFT-FB-T-84-302] p 672 N85-27874

**SILICON NITRIDES**
Ionic radii and electronegativities of effective sintering aids for Si3N4 ceramics p 519 A85-32850
The technology of hot isostatic pressing with reference to silicon nitride p 786 A85-43151
Milling of Si3N4 with Si3N4 hardware [NASA-TM-86864] p 43 N85-10191
Development and fabrication of refractory bodies for gas turbine engines [BMFT-FB-T-84-180] p 113 N85-12899
Preparation of sinteractive silicon nitride powders [BMFT-FB-T-84-303] p 691 N85-29086

**SILICON TRANSISTORS**
alpha-Si addressed liquid crystal aircraft display [AIAA PAPER 84-2659] p 165 A85-17846

**SIMILARITY THEOREM**

Analysis of starting performance of the single shaft gas turbines by theory of similarity p 351 A85-25211

Similarity properties in the problem of flow from a supersonic source past a spherical bluntness p 629 A85-39445

**SIMILITUDE LAW**

Evaluation of stochastic similarity criteria for a limited volume of aviation equipment tests p 534 A85-31464

Contribution to theory of similitude of subsonic flow p 868 A85-48189

**SIMULATION**

Summer Computer Simulation Conference, 15th, Vancouver, Canada, July 11-13, 1983, Proceedings. Volumes 1 & 2 p 457 A85-28601

Simulation of wake passing in a stationary turbine rotor cascade p 629 A85-39589

A turbine engine aerodynamic model for in-stall transient simulation [AIAA PAPER 85-1429] p 772 A85-42672

Surge transient simulation in turbo-jet engine p 169 N85-13796

Simulation evaluation of two VTOL control/display systems in IMC approach and shipboard landing [NASA-TM-85996] p 173 N85-14841

Review of requirements and status of simulation and scaling of transonic, viscous flows [AD-A146357] p 189 N85-15137

Air combat simulation: Methods, models, trends p 498 N85-22359

Flight testing and development of the F/A-18A digital flight control system p 590 N85-26743

The evolution of ACS for helicopters: Conceptual simulation studies to preliminary design p 677 N85-27890

Multi-ducted inlet combustor research and development [AD-A153753] p 673 N85-28946

Fault detection and accommodation testing on an F100 engine in an F-15 airplane [NASA-TM-86735] p 773 N85-29962

A study of the application of differential techniques to the global positioning system for a helicopter precision approach [NASA-CR-177326] p 750 N85-31035

Simulation and analysis of airborne antenna radiation patterns p 797 N85-31342

Impulsive noise due to transonic blade-vortex interactions p 806 N85-31913

Effect of interference on the performance of a minimum TCAS 2 [FAA-PM-84-33] p 880 N85-34131

Ultra high energy events in ECHOS series and primary energy spectrum [HE-3.7-9] p 920 N85-35966

**SIMULATORS**

A simulator for studying helicopter weapons systems p 277 N85-16816

Rotorcraft digital advanced avionics system (Rodaas) p 576 N85-26608

The gust simulation apparatus of the 3m x 3m low speed wind tunnel of the DFVLR in Goettingen, West Germany [DFVLR-FB-85-04] p 684 N85-27920

**SINGLE CRYSTALS**

The effect of coatings on the thermomechanical fatigue life of a single crystal turbine blade material [AIAA PAPER 85-1366] p 689 A85-39744

Life prediction and constitutive models for anisotropic materials p 31 N85-10976

Biaxial constitutive equation development for single crystals [NASA-CR-174056] p 65 N85-11862

Cost effective single crystals: The Rolls Royce approach — gas turbine components [PNR-90262] p 919 N85-34717

**SINGULAR INTEGRAL EQUATIONS**

A new singular integral method for compressible potential flow [AIAA PAPER 85-0481] p 225 A85-19776

**SINGULARITY (MATHEMATICS)**

A numerical analysis of unsteady separated flow by the discrete vortex method combined with the singularity method p 81 A85-15684

Exact solutions of singular equations for viscous transonic flows p 142 A85-16939

A comparison of different three-dimensional singularity methods for modelling internal flows [ONERA, TP NO. 1984-150] p 205 A85-19264

Optimized discrete-singularity representation of axisymmetric bodies — for potential flow [AIAA PAPER 85-0284] p 218 A85-19635

A supersonic panel method based on the triplet singularity p 617 A85-37191

An investigation of lift augmentation of tandem cascades [ASME PAPER 84-WA/FM-3] p 633 A85-39875

Implementation of the supersonic triplet singularity into the USTORE computer code [CSIR-NIAST-83/47] p 8 N85-10006

Classical free-streamline flow over a polygonal obstacle [NASA-CR-172448] p 53 N85-10301

Singularity model for the analysis of wall interference in closed wind tunnels according to the wall pressure signature method (blockage and lift) [FW-FO-1612] p 88 N85-12874

Flow calculation on a thin wing, with specific attention to separation point at the trailing edge [FTW-FO-1721] p 146 N85-13787

**SINKS**

Flow past a flat plat with a vortex/sink combination [JIAA-TR-58] p 558 N85-25215

**SINTERED ALUMINUM POWDER**

Engineering property comparisons of PM and IM aluminum alloy forgings [AD-B088146L] p 298 N85-17398

**SINTERING**

Ionic radii and electronegativities of effective sintering aids for Si3N4 ceramics p 519 A85-32850

Reaction-bonded and fiber-reinforced SiC static and dynamic gas turbine components [BMFT-FB-T-84-302] p 672 N85-27874

**SITE SELECTION**

On matching among wind turbines, loads and sites p 374 A85-24090

Airport site selection and design [AD-P004193] p 428 N85-19959

**SIZE (DIMENSIONS)**

Air turbine starter sizing for a proper bleed source match [SAE PAPER 841509] p 661 A85-39153

**SIZE DETERMINATION**

Computer sizing of fighter aircraft [NASA-TM-86351] p 203 N85-16759

**SIZING (SHAPING)**

Application of finite element method to the sizing of mechanical parts — helicopter design [SNIAS-851-210-105] p 798 N85-31515

Preliminary sizing and performance of aircraft [NASA-TM-86357] p 829 N85-32111

**SKIN (STRUCTURAL MEMBER)**

Divergence speed degradation of forward-swept wings with damaged composite skin p 18 A85-11988

A new approach to durability prediction for fuel tank skins [AIAA PAPER 85-0602] p 505 A85-30331

Crack propagation analysis of longitudinal skin cracks in a pressurized cabin p 645 A85-37188

Age forming technology expanded in an autoclave [SAE PAPER 850885] p 910 A85-50113

Low power laminar aircraft structures p 73 N85-12857

Aircraft skin penetrator and agent applicator. Volume 2: Test and evaluation [AD-A151609] p 564 N85-25225

Development of a field repair technique for mini-sandwich Kevlar/epoxy aircraft skin [AD-A151369] p 596 N85-25439

Friction and wear behavior of aluminum and composite I-beam stiffened airplane skins [NASA-TM-86416] p 652 N85-27852

Laminated thermoplastic radome [AD-D011664] p 691 N85-29045

Impact dynamics research on composite transport structures [NASA-TM-86391] p 797 N85-30367

**SKIN FRICTION**

NASA research on viscous drag reduction II p 48 A85-11624

A method for designing three-dimensional configurations with prescribed skin friction p 6 A85-11989

More detailed measurements behind turbulence manipulators including tandem devices using servo-controlled balances [AIAA PAPER 85-0521] p 320 A85-25927

Turbulent boundary layers over rough surfaces hypersonic flow [AD-A145040] p 10 N85-10016

Full scale experiments into the use of large eddy breakup devices for drag reduction on aircraft p 257 N85-16790

**SKIN TEMPERATURE (NON-BIOLOGICAL)**

Turbine heat transfer p 30 N85-10964

**SKIRTS**

Hovercraft skirt design and manufacture p 694 A85-38233

Finger materials for air cushion vehicles. Volume 2: Base fabrics for finger materials [AD-A149701] p 448 N85-21408

Study of NSI and related cable performance during tests performed in the NASA Hot Gas Facility [NASA-CR-170886] p 912 N85-35423

**SKIS**

Determination of parameters of cupped aircraft landing ski p 162 N85-14956

**SLEDS**

Design and testing of an energy-absorbing crewseat for the F/FB-111 aircraft. Volume 2: Data from seat testing [NASA-CR-3917] p 886 N85-35184

**SLENDER BODIES**

Unsteady boundary layers close to the stagnation region of slender bodies p 77 A85-14242

Calculation of streamlines from wall pressures on a fusiform body p 79 A85-14894

Lift hysteresis of an oscillating slender ellipse p 80 A85-15332

Approximate solution of a nonlinear problem of flow past a thin airfoil profile near a support surface p 233 A85-22368

An extremum problem concerning the shape of a body of revolution in supersonic gas flow p 234 A85-22371

Contribution to the linear dynamic analysis of slender bodies in low and medium frequency ranges [ONERA, TP NO. 1985-95] p 525 A85-32345

The effect of winglet on the spatial vortex of slender body at high angle of attack p 551 A85-35788

Aerodynamic hysteresis in stationary separated flow past elongated bodies p 552 A85-35881

Unsteady transonic flow over oscillating slender bodies [AIAA PAPER 85-1709] p 718 A85-40781

High angle-of-attack calculations of the subsonic vortex flow on slender bodies p 730 A85-42353

Nonlinear applications of slender-body theory to missile aerodynamics [AIAA PAPER 85-1775] p 812 A85-43836

Aerodynamic effects of asymmetric vortex shedding from slender bodies [AIAA PAPER 85-1797] p 813 A85-43850

The use of flow visualization for vortex trajectory mapping p 867 A85-47132

Comparison of uniform perturbation solutions and numerical solutions for some potential flows past slender bodies [NASA-CR-172485] p 147 N85-14799

Some important problems in unsteady boundary layers including separation. 2: Unsteady boundary layers close to the stagnation region of slender bodies [AD-A146964] p 294 N85-16069

An experimental and analytical study of the aerodynamic interference effects between two Sears-Haack bodies at Mach 2.7 [NASA-TM-85729] p 560 N85-26673

**SLENDER CONES**

Regarding parametric investigations of slender cone nose bluntness effects [AIAA PAPER 85-0349] p 220 A85-19688

Transition effects of boundary layer on static and dynamic stability of slender cone p 731 A85-42793

**SLENDER WINGS**

Computational simulation of free vortex flows using an Euler code p 76 A85-13951

Hypersonic flow past a wing at large angles of attack p 78 A85-14591

Calculation of the aerodynamic characteristics of a wing p 142 A85-17066

Subsonic wing rock of slender delta wings [AIAA PAPER 85-0198] p 214 A85-19582

Subsonic wing rock of slender delta wings p 385 A85-26760

A calculation of slender delta wing with leading-edge separation by Quasi-Vortex-Lattice method p 550 A85-35768

The numerical calculation of the pressure distribution of sharp edge slender wings with leading or side edge vortex separation p 625 A85-38966

Winglet effects on the flutter of a twin-engine transport-type wing p 650 A85-39217

Vortex panel calculation of wake rollup behind a large aspect ratio wing [AIAA PAPER 85-1561] p 710 A85-40686

The entrainment effect of a leading-edge vortex [AIAA PAPER 85-1584] p 712 A85-40703

The buffeting pressure field of a high-aspect-ratio swept wing [AIAA PAPER 85-1609] p 714 A85-40720

A calculating method of the breakdown feature of the leading-edge separating vortex for slender delta wings p 873 A85-49707

Transonic wing and far field test data on a high aspect ratio transport wing for three dimensional computational method evaluation p 19 N85-10021

Flutter parametric studies of cantilevered twin-engine transport type wing with and without winglet. Volume 2: Transonic and density effect investigations [NASA-CR-172410-VOL-2] p 130 N85-13270

A calculation of slender delta wing with leading-edge separation by quasi-vortex-lattice method p 400 N85-21423
Numerical simulation of transonic flutter of a high-aspect ratio transport wing p 586 N85-26630
Aerodynamic performance of a wing in ground effect using the PANAIR program
[AD-A153303] p 635 N85-27832
Low-speed tests of a high-aspect-ratio, supercritical-wing transport model equipped with a high-lift flap system in the Langley 4- by 7-meter and Ames 12-foot pressure tunnels
[NASA-TP-2097] p 742 N85-31010

**SLIP FLOW**
Effects of slip and chemical reaction models on three-dimensional nonequilibrium viscous shock-layer flows p 80 A85-15506
Slip Factor dependence on flow coefficient in centrifugal compressors p 793 A85-41823

**SLIPSTREAMS**
Characteristics of a two-dimensional turbulent jet in a bounded slipstream p 695 A85-39131
Turbulent jet flow in a channel with a circulation region p 371 N85-18218
An experimental investigation of propfan installations on an upswept supercritical wing at transonic Mach numbers
[NASA-CR-172605] p 742 N85-31013

**SLOPES**
NASA-FAA helicopter Microwave Landing System curved path flight test p 485 A85-31993
Guidelines for the evaluation of visual approach slope indicators
[ARL/SYS-R-32] p 880 N85-34132

**SLOT ANTENNAS**
An analysis of the pattern of longitudinal slot antenna on the metal cylinder covered with a high collision plasma layer p 183 A85-17173
Main stages and problems in the design of low-gain active antennas p 794 A85-42106

**SLOTTED WIND TUNNELS**
A slotted test section numerical model for interference assessment p 426 A85-26759
Computer studies of hybrid slotted working sections with minimum steady interference at subsonic speeds p 628 A85-39241
Interference from slotted walls p 84 N85-12028
An interference assessment approach for a three-dimensional slotted tunnel with sparse wall pressure data p 84 N85-12030
A local slot boundary condition for transonic flow calculations in slotted-wall test sections of wind tunnels
[FFA-TN-1984-34] p 88 N85-12879
Investigation for the improvement of the transonic tunnel working section of the Emmen Federal Aircraft Works (Switzerland)
[FW-FO-1681] p 118 N85-12904
Flow quality of NAL 2-dimensional transonic wind tunnel. Part 2: Extensive and systematic pressure fluctuations study in the settling chamber, test section and second throat of the NAL 2-D transonic wind tunnel
[NAL-TR-836-PT2] p 360 N85-18086
Finite difference computation of the flow around airfoils in two-dimensional transonic slotted wall wind tunnel p 396 N85-20216
Wind tunnel wall interference
[AD-A151212] p 593 N85-25273

**SLURRIES**
Very high speed lap with positive lift effect
[AD-D011710] p 796 N85-30344
Very high speed lap with negative lift effect
[AD-D011711] p 796 N85-30345

**SLURRY PROPELLANTS**
Boron slurry fuel atomization evaluation
[AIAA PAPER 85-1184] p 689 A85-39645

**SMALL PERTURBATION FLOW**
Simplified transonic integral equations for lifting profiles and wings p 6 A85-12034
A characteristics approach to swept shock-wave/boundary-layer interactions p 73 A85-12717
Method of fundamental solutions - A novel theory of lifting surface in a subsonic flow p 79 A85-15077
Computation of unsteady aerodynamic pressure coefficients in a transonic straight cascade. II
[ONERA, TP NO. 1984-118] p 80 A85-15838
Body flow field simulation and force/moment prediction at transonic speeds
[AIAA PAPER 85-0423] p 222 A85-19736
The effects of gusts on the fluctuating airloads of airfoils in transonic flow p 385 A85-26762
Monotone switches in implicit algorithms for potential equations applied to transonic flows p 391 A85-29078
Non-isentropic unsteady transonic small disturbance theory
[AIAA PAPER 85-0600] p 469 A85-30329
Transonic small-disturbance theory for dusty gases p 546 A85-35149
Determination of aerodynamic characteristics of bodies in weakly perturbed gas flows p 619 A85-37341
A second-order approximate method for transonic small-disturbance potential flow and its application to the analysis of flows over airfoils p 625 A85-38922
Unsteady transonic flow over oscillating slender bodies
[AIAA PAPER 85-1709] p 718 A85-40781
Transonic aerodynamic computations for a canard configuration p 731 A85-42931
Effects caused by small discrete two-dimensional roughness elements immersed in turbulent boundary layers p 908 A85-49351
Extension of the small perturbations method in three-dimensional transonic, unsteady flow to the case of real wings
[ONERA-NT-17/3064-RY-070-R] p 743 N85-31017

**SMOKE**
Modeling of turbulent buoyant flows in aircraft cabins p 90 A85-15867
Numerical simulations of the effect of ventilation control on fire and smoke spread in aircraft cabins
[ASME PAPER 84-HT-104] p 149 A85-18843
Analytical fuel property effects: Small combustors, phase 2
[NASA-CR-174848] p 365 N85-19175
Advanced smoke meter development survey and analysis
[NASA-CR-168257] p 604 N85-25792

**SMOKE ABATEMENT**
Laboratory simulation of smoke reduction from aircraft engine test cell exhaust using a fluidized bed filter
[AD-A148600] p 278 N85-16886
Numerical simulations of the effect of floor and ceiling venting on fire and smoke spread in aircraft cabins
[PB85-178333] p 747 N85-29939

**SMOKE TRAILS**
A new single filament smoke tube injection device p 903 A85-47082
Numerical simulations of the effect of floor and ceiling venting on fire and smoke spread in aircraft cabins
[PB85-178333] p 747 N85-29939

**SMOOTHING**
Computer programs for smoothing and scaling airfoil coordinates
[NASA-TM-84666] p 742 N85-31011

**SNOW**
Heliport snow and ice control methods and guidelines
[DOT/FAA/PM-84/22] p 37 N85-10073

**SOCIAL FACTORS**
Disturbance to the population due to flight operations at landing fields. Questionnaire on community reaction to non-commercial and sporting aviation
[NASA-TM-76531] p 534 N85-24537

**SODIUM CHLORIDES**
Reactions of NaCl with gaseous SO3, SO2, and O2 p 42 A85-11897

**SODIUM SULFATES**
Reactions of NaCl with gaseous SO3, SO2, and O2 p 42 A85-11897

**SOFTWARE ENGINEERING**
Modular programming structure applied to the simulation of non-linear aircraft models p 132 A85-15661
Developing safe software for critical airborne applications
[AIAA PAPER 84-2596] p 192 A85-17802
The use of structured methods in the development of large software-based avionics systems
[AIAA PAPER 84-2595] p 192 A85-17803
Integrated tracking software for multimode operation
[AIAA PAPER 84-2614] p 193 A85-17814
Software controlled display/pushbutton — for avionics
[AIAA PAPER 84-2657] p 164 A85-17844
Software design methods — for civil and military aircraft avionics systems p 301 A85-21457
Validation of flight-body system simulations
[MBB-UA-837-84-OE] p 457 A85-27989
Ada - Will DOD's new computer language cut software cost? p 489 A85-29669
The SDF - A radar avionics software development environment p 858 A85-45068
Reinventing the DAIS wheel in Ada — distributed avionics executive p 858 A85-45073
A concept for more test time on flight software p 858 A85-45076
The use of a simulated multifunction keyboard (SMFK) in MFK software development projects p 859 A85-45101
Technical Workshop: Advanced Helicopter Cockpit Design
[NASA-CP-2351] p 154 N85-14806
Ultrasound instrumentation for the 7 inch Mach seven tunnel
[NASA-CR-174277] p 305 N85-16586
Built-in-test for first line testing p 202 N85-16739
Functional built-in-test in a pipelined image processor p 202 N85-16740
Documentation and separate test program development is most important for test/maintenance p 203 N85-16745
Effective life cycle software support: A study in discipline and versatility p 302 N85-16746
Experience in using on-aircraft software for testing integrated systems p 302 N85-16747
Software test handbook: Software test guidebook, volume 2
[AD-A147289] p 303 N85-17578
An experiment in software reliability
[NASA-CR-172553] p 536 N85-24813
IPAD: Integrated Programs for Aerospace-vehicle Design
[NASA-CR-3890] p 610 N85-26221
Diagnosis: Using automatic test equipment and an artificial intelligence expert system
[AD-A151918] p 610 N85-27576

**SOFTWARE TOOLS**
On the development of a data base for the Navstar GPS phase IIB user equipment DT&E (OR) field testing p 95 A85-14839
Development tools - Case study for large systems — of digital avionics
[AIAA PAPER 84-2635] p 193 A85-17826
Automated benchmark generation based upon a specification language
[AIAA PAPER 84-2667] p 194 A85-17849
Writing executable assertions to test flight software
[SU-CRC-TR-84-14] p 301 A85-21973
Automatic ATLAS program generator (AAPG) for the advanced electronic warfare test set p 456 A85-26817
Using flowcharts to map ATLAS route p 456 A85-26831
Software Quality Assurance Program for the AH-64 Advanced Attack Helicopter (AAH) p 466 A85-32010
The software pack GRAD for the analysis of gas-turbine engines p 660 A85-39119
The structure of the application software pack RAFIPKS for the analysis of physical processes in combustion chambers p 661 A85-39122
The employment of 3-D programs in aircraft design
[DGLR PAPER 84-113] p 754 A85-40329
Developing an off-line environment for testing real time aerodynamics simulation
[AIAA PAPER 85-1751] p 803 A85-42666
The SDF - A radar avionics software development environment p 858 A85-45068
A concept for more test time on flight software p 858 A85-45076
The use of a simulated multifunction keyboard (SMFK) in MFK software development projects p 859 A85-45101
Development and validation of a general purpose linearization program for rigid aircraft models
[AIAA PAPER 85-1891] p 846 A85-45976
The interactive generation of specifications for an onboard software series (GISELE) p 679 N85-27906

**SOIL MECHANICS**
A dynamic tire/soil contact surface interacting model for aircraft ground operations
[AIAA PAPER 85-0708] p 482 A85-30358
Development of a preliminary ALRS stabilized material pavement analysis system (SPAS)
[AD-A147116] p 277 N85-15780

**SOILS**
Development of a preliminary ALRS stabilized material pavement analysis system (SPAS)
[AD-A147116] p 277 N85-15780
Prediction accuracy of the torques for rotary tillage by an analog tool
[AD-P004298] p 379 N85-18865
The analysis on the dynamic performance of a single lug
[AD-P004299] p 379 N85-18866

**SOLAR ACTIVITY EFFECTS**
A search for solar neutrons on a long duration balloon flight
[SH-1.4-6] p 920 N85-34765

**SOLAR ARRAYS**
Solar powered actuator with continuously variable auxiliary power control
[NASA-CASE-MFS-25637-1] p 454 N85-21769

**SOLAR COLLECTORS**
Modeling of a second-generation solar-driven Rankine air conditioner
[DE84-015132] p 52 N85-10223

Technical Review of the Solid Particle Receiver Program
[DE84-015181] p 56 N85-10451

**SOLAR ELECTRIC PROPULSION**
Sunrise, the world's first solar-powered airplane
p 865 A85-49127

**SOLAR FLARES**
A search for solar neutrons on a long duration balloon flight
[SH-1.4-8] p 920 N85-34766

**SOLAR POWERED AIRCRAFT**
Starduster - A solar powered high altitude airplane
[AIAA PAPER 85-1449] p 651 A85-39786
To fly on the wings of the sun - A study of solar-powered aircraft p 809 A85-43691
Sunrise, the world's first solar-powered airplane
p 865 A85-49127
Mission analysis of solar powered aircraft
[NASA-CR-172583] p 782 N85-31072

**SOLAR PROPULSION**
Long-endurance drones mature p 157 A85-18116
Mission analysis of solar powered aircraft
[NASA-CR-172583] p 782 N85-31072

**SOLENOIDS**
The generation of rolling moments with the superconducting solenoid model
[NASA-CR-172520] p 360 N85-18068
Effect of superconducting solenoid model cores on spanwise iron magnet roll control
[NASA-TM-86378] p 683 N85-27915

**SOLID LUBRICANTS**
The dynamics of ball separators in ball bearings. II - Results of optimization study
[ASLE PREPRINT 84-AM-6C-3] p 389 A85-25957

**SOLID PROPELLANT COMBUSTION**
SFRJ simulator results - Experiment and analysis in cold flow — Solid Fuel RamJet
[AIAA PAPER 85-0329] p 263 A85-19671
An experimental investigation of combustion pressure oscillations in solid fuel ramjets
[AD-A144870] p 43 N85-10147

**SOLID PROPELLANT ROCKET ENGINES**
Window on science visit to the USA, 21 March - 22 April, 1984 — ramjets and solid propellant rocketry
[VTH-LR-426] p 432 N85-20011

**SOLID ROCKET BINDERS**
Study of HTPB-based SOFRAM fuels
[FOA-C-20583-D3] p 437 N85-20150

**SOLID ROCKET PROPELLANTS**
Combined cycle ramjet engine
[AD-D011247] p 178 N85-14859

**SOLID STATE DEVICES**
Ramp's new primary surveillance radar — Radar Modernization Project p 153 A85-18145

**SOLID STATE LASERS**
Peripheral vision displays: The future
p 24 N85-10058

**SOLID SURFACES**
Investigation to optimize the passive shock wave/boundary layer control for supercritical airfoil drag reduction
[NASA-CR-175788] p 559 N85-26665
Unsteady transonic heat transfer in a transient facility
[NASA-CR-176145] p 910 N85-34354

**SOLID WASTES**
FAA policy regarding solid waste disposal facilities
[AD-P004196] p 428 N85-19963
Airport bird hazards associated with solid waste disposal facilities
[AD-P004197] p 428 N85-19964

**SOLID-SOLID INTERFACES**
Polysulfide-polyurethane interfacial aspects
p 434 A85-27905

**SOLIDIFICATION**
Low-gravity solidification of cast iron and space technology applications p 44 N85-11022
Directional solidification of flake and nodular cast iron during KC-135 low-g maneuvers p 44 N85-11040
Design and implementation of a low-gravity solidification experiment package for the F-104 p 40 N85-11053

**SOLIDS**
USSR report: Engineering and equipment
[JPRS-UEQ-85-001] p 370 N85-18200
USSR report: Engineering and equipment
[JPRS-UEQ-85-003] p 526 N85-22782

**SOLVENTS**
A thermoplastic polyimidesulfone — synthesis of processable and solvent resistant system
p 282 A85-21483

**SONAR**
Detection, classification, and extraction of helicopter-radiated noise
[AD-A145993] p 134 N85-12661

**SONIC BOOMS**
Effect of sonic boom on a cracked plaster-wood wall
p 191 A85-16256
The shock wave from a supersonic projectile
p 319 A85-25467

**SONIC NOZZLES**
Experimental study of forward-located jet-interaction nozzles
[AIAA PAPER 85-0454] p 224 A85-19762

**SONOBUOYS**
Use of GPS for determining position of drifting buoys
p 486 A85-32204

**SOOT**
A standard aircraft diffusion flame: Spectral characteristics and a feasibility study for developing an alternate calibration source for aircraft optical fire detection systems
[AD-A150231] p 520 N85-22768
An investigation into the soot production processes in a gas turbine engine
[AD-A152710] p 690 N85-27992

**SOUND AMPLIFICATION**
Large-scale coherent structure and far-field jet noise
p 78 A85-14390
Far-field noise of a subsonic jet under controlled excitation p 537 A85-30669
Controlled suppression or amplification of turbulent jet noise p 611 A85-35128

**SOUND FIELDS**
Finite element modelling of acoustic singularities with application to near and far field propeller noise
[AIAA PAPER 84-2286] p 59 A85-10842
The inverse problem of azimuthal correlations of an acoustic far field and modeling of sources of jet noise
p 132 A85-12775
The diffraction of sound waves by an elastic half-plane attached to a vertical rigid plane p 182 A85-16266
Flight study of induced turbofan inlet acoustic radiation with theoretical comparisons p 197 A85-18513
Analysis of the surface load and radiated sound of a vibrating airfoil with application to the experiment of Brooks
[NASA-CR-3864] p 305 N85-16590

**SOUND GENERATORS**
Aerodynamic sound generation induced by flow over small, cylindrical cavities
[AIAA PAPER 84-2258] p 58 A85-10827
On the generation of sound by turbulent boundary layer flow over a rough wall p 133 A85-13724
Aerodynamic sound generation caused by viscous processes p 705 A85-38432
An experimental investigation of the generation and consequences of acoustic waves in an axial flow compressor Large axial spacings between blade rows
p 805 A85-42044

**SOUND INTENSITY**
A technique for the evaluation of the magnitude of acoustic power radiated from the duct of a turbojet using a point measurement p 861 A85-44045
Research on the effect of noise at different times of day: Models, methods and findings
[NASA-CR-3888] p 538 N85-23375
A study of interior noise levels, noise sources and transmission paths in light aircraft
[NASA-CR-172152] p 805 N85-30766

**SOUND PRESSURE**
Proposed criteria for sound pressure levels in USAF aircraft
[AIAA PAPER 84-2294] p 60 A85-10849
Influence of viscosity on the vortex sound
[AIAA PAPER 84-2339] p 62 A85-10880
Predicted changes in advanced turboprop noise with shaft angle of attack
[AIAA PAPER 84-2347] p 63 A85-10884
A rivet hole sensor for measuring airplane fuselage acoustic pressures
[AIAA PAPER 84-2350] p 47 A85-10886
The effect of acoustic disturbances on the vibrations of a multilayer plate p 64 A85-11823
An improved source model for aircraft interior noise studies
[AIAA PAPER 85-0787] p 537 A85-30389
Acoustic shocks in a variable area duct containing near sonic flows p 474 A85-32632
Average force acting on a small sphere in a traveling-wave field in a viscous fluid
p 805 A85-41646
Predicted changes in advanced turboprop noise with shaft angle of attack p 836 A85-45861
An improved source model for aircraft interior noise studies
[NASA-CR-172517] p 305 N85-17668
Wind tunnel acoustic study of a propeller installed behind an airplane empennage: Data report
[NASA-CR-177335] p 538 N85-23377

**SOUND PROPAGATION**
The influence of mean flow on the acoustic properties of a tube bank
[AIAA PAPER 84-2312] p 61 A85-10863
Influence of viscosity on aerodynamic sound emission in free space p 132 A85-12880
Analysis of the effect on combustor noise measurements of acoustic waves reflected by the turbine and combustor inlet
[AIAA PAPER 84-2323] p 196 A85-16103
An experimental study of sound attenuation characteristics in circular ducts with lined radial baffles
[AIAA PAPER 85-0079] p 304 A85-19505
Noise measurement flight test: Data/Analyses, hughes 500 D/E helicopter
[AD-A148110] p 501 N85-23758
Fundamental studies of structure borne noise for advanced turboprop applications
[NASA-CR-175737] p 612 N85-26320

**SOUND TRANSMISSION**
Field-incidence noise transmission loss of general aviation aircraft double-wall configurations
p 304 A85-21842
Noise transmission through aircraft panels
p 460 A85-29258
Mechanisms of acoustical energy transfer by a cylindrical shell near the ring frequency p 861 A85-44039
The transmission of acoustic energy by a finite cylindrical shell excited by external plane waves
p 861 A85-44040
Noise transmission characteristics of aircraft-type composite panels
[SAE PAPER 850878] p 919 A85-50110
Mechanisms of transmission and control of low-frequency sound in aircraft interiors
[SAE PAPER 850879] p 885 A85-50111
The susceptibility of aeronautical navigational aids to interference from adjacent-band broadcast transmissions
[BBC-RD-1984/12] p 371 N85-18234

**SOUND WAVES**
Reheat buzz - An acoustically driven combustion instability
[AIAA PAPER 84-2321] p 41 A85-10868
Ground plane microphone installation for measurement of aircraft flyover noise
[AIAA PAPER 84-2353] p 63 A85-10889
Turbulence characteristics of the noise producing region of an excited round jet. I - Time-average flow properties
[AIAA PAPER 84-2343] p 133 A85-13962
Analysis of the effect on combustor noise measurements of acoustic waves reflected by the turbine and combustor inlet
[AIAA PAPER 84-2323] p 196 A85-16103
The sound field in a finite cylindrical shell
p 537 A85-31195
Contributions to the finite element solution of the fan noise radiation problem
[ASME PAPER 84-WA/NCA-1] p 537 A85-32954
A new look at sound generation by blade/vortex interaction
[ASME PAPER 84-WA/NCA-2] p 538 A85-32955
Computation of noise radiation from a free jet perpendicular to its axis via laser anemometry measurements
[ESA-TT-870] p 378 N85-18669

**SOUND-SOUND INTERACTIONS**
Investigation of nonlinear effects in the instabilities and noise radiation of supersonic jets
[AIAA PAPER 85-0081] p 304 A85-19507

**SOUNDING ROCKETS**
Development and testing of the RPS-1000 parachute system for the MMR-06-DART meteorological rocket system p 685 A85-38608
Solution of certain technical problems connected with the development of the MMR-06M meteorological rocket
p 685 A85-38610
A study on a medium-sized rocket with Burnout frame
[NAL-TR-821] p 361 N85-18082

**SOUTH KOREA**
Korea's air transport - Planned expansion
p 681 A85-37949

**SOUTHERN CALIFORNIA**
Visibility monitoring in the southern California desert for the Department of Defense: Research on operations-limiting visual extinction. RESOLVE protocol
[AD-A146617] p 191 N85-15315

**SOYUZ SPACECRAFT**
Effect of aerodynamic moment on the regime of the gravity gradient stabilization of the Salyut-6 - Soyuz orbital system p 432 A85-28488

**SPACE BASED RADAR**
Aircraft track initiation with space based radar
p 93 A85-14440
Development concerns for satellite-based air traffic control surveillance systems p 489 N85-23816

**SPACE COMMERCIALIZATION**
Widespread civil uses envisioned for satellite navigation system p 566 A85-34217

**SPACE ENVIRONMENT SIMULATION**
Parabolic aircraft flights - An effective tool in preparing microgravity experiments p 782 A85-42697
**SPACE EXPLORATION**
Reliable software design for avionics and space applications p 303 N85-16751
The 1985 long-range program plan [NASA-TM-87464] p 612 N85-26440
**SPACE FLIGHT**
Research and technology [NASA-TM-86321] p 67 N85-11973
**SPACE HEATING (BUILDINGS)**
Hangar heating and energy conservation manual [AD-A147893] p 277 N85-15762
**SPACE LAW**
Annals of air and space law. Volume 8 p 378 A85-23799
**SPACE MISSIONS**
An optimization method for the preliminary design of interplanetary aerobraking missions p 238 N85-16822
**SPACE NAVIGATION**
Institute of Navigation, Annual Meeting, 40th, Cambridge, MA, June 25-28, 1984 p 93 A85-14826
The general class of optimal proportional navigation p 153 A85-18346
Technical evaluation report on the 46th Symposium of the Avionics Panel on Space System Applications to Tactical Operations [AGARD-AR-203] p 349 N85-18988
**SPACE PLATFORMS**
The effect of parameter scatter on the quality indices of a flight vehicle platform stabilization system p 177 A85-17052
**SPACE PROGRAMS**
China report: Science and technology [JPRS-CST-84-039] p 446 N85-20206
**SPACE SHUTTLE BOOSTERS**
Karman vortex shedding - Friend or foe of the structural dynamicist? — application to Space Shuttle cable tray flutter [AIAA PAPER 85-0661] p 470 A85-30349
B-52B/DTV (Drop Test Vehicle) flight test results: Drop test missions [NASA-CR-171530] p 741 N85-29934
SRB thermal protection systems materials test results in an arc-heated nitrogen environment [NASA-CR-170881] p 902 N85-35236
Study of NSI and related cable performance during tests performed in the NASA Hot Gas Facility [NASA-CR-170886] p 912 N85-35423
**SPACE SHUTTLE MAIN ENGINE**
Rotordynamic analysis of the SSME turbopumps using reduced models [NASA-CR-171170] p 53 N85-10355
Turbine blade damping study, introduction p 113 N85-12891
Advanced High Pressure O2/H2 Technology [NASA-CP-2372] p 595 N85-26862
SRB thermal protection systems materials test results in an arc-heated nitrogen environment [NASA-CR-170881] p 902 N85-35236
**SPACE SHUTTLE MISSION 31-B**
Determination of rarefied-flow aerodynamics of the Shuttle orbiter from flight measurements on STS-6 and STS-7 [AIAA PAPER 85-0347] p 219 A85-19686
**SPACE SHUTTLE MISSION 31-C**
Determination of rarefied-flow aerodynamics of the Shuttle orbiter from flight measurements on STS-6 and STS-7 [AIAA PAPER 85-0347] p 219 A85-19686
**SPACE SHUTTLE ORBITERS**
Orbiter spacecraft weight and center of gravity determination [SAWE PAPER 1559] p 178 A85-18817
Determination of rarefied-flow aerodynamics of the Shuttle orbiter from flight measurements on STS-6 and STS-7 [AIAA PAPER 85-0347] p 219 A85-19686
Three-dimensional nonequilibrium viscous flow over the Shuttle Orbiter with catalytic surface effects p 392 A85-29301
Microwave Scanning Beam Landing System performance during Shuttle landings p 486 A85-32199
An analysis of the Space Shuttle hypersonic entry trim anomaly [AIAA PAPER 85-1764] p 850 A85-43878
Effect of aerodynamic and angle-of-attack uncertainties on the May 1979 entry flight control system of the Space Shuttle from Mach 8 to 1.5 [NASA-TP-2365] p 280 N85-15778
Use of a hyperbolic grid generation scheme in simulating supersonic viscous flow about three-dimensional winged configuration [NASA-TM-85344] p 874 N85-34116
**SPACE SHUTTLES**
Air breathing space transport vehicles with wings p 280 A85-20909
A high energy stage for the National Space Transportation System [IAF PAPER 84-15] p 361 A85-23200
Some real-time simulation applications to Space Shuttle approach and landing design and test p 899 A85-49016
Active control technology experience with the Space Shuttle in the landing regime [NASA-TM-85910] p 36 N85-10071
Results of tests of advanced flexible insulation vortex and flow environments in the North American Aerodynamics Laboratory lowspeed wind tunnel using 0.0405-scale Space Shuttle Orbiter model 16-0 (test OA-309) [NASA-CR-167692] p 39 N85-10096
Development of computational fluid dynamics at NASA Ames Research Center [NASA-TM-86021] p 87 N85-12866
The Satellite sail p 433 N85-20376
Aerospace Safety Advisory Panel [NASA-TM-87428] p 406 N85-21135
Research Reports: 1984 NASA/ASEE Summer Faculty Fellowship Program [NASA-CR-171317] p 462 N85-22210
Ground and flight testing for aircraft guidance and control [AGARD-AG-262] p 467 N85-22350
Formulation and implementation of nonstationary adaptive estimation algorithm with applications to air-data reconstruction [NASA-TM-86727] p 577 N85-26699
Active control technology experience with the Space Shuttle in the landing regime p 590 N85-26747
Heating parameter estimation using coaxial thermocouple gages in wind tunnel test articles [AD-A153039] p 699 N85-28328
Results of tests of the SRB aft skirt heat shield curtain in the MSFC Hot Gas Facility [NASA-CR-170888] p 899 N85-35223
**SPACE STATIONS**
FRG's DFVLR ready for participation in space station p 433 N85-20176
**SPACE SURVEILLANCE**
Future communications/navigation/surveillance requirements for Department of Defense Air Transport Operations p 407 A85-27533
**SPACE SURVEILLANCE (GROUND BASED)**
Integrated Global Navigation and Surveillance System p 94 A85-14835
**SPACE SURVEILLANCE (SPACEBORNE)**
Aircraft track initiation with space based radar p 93 A85-14440
Integrated Global Navigation and Surveillance System p 94 A85-14835
**SPACE TRANSPORTATION**
Transatmospheric vehicles - A challenge for the next century [AIAA PAPER 84-2414] p 98 A85-13519
Winged first stages of space transport appliances [TUM-RT-TB-84/3] p 40 N85-11125
**SPACE TRANSPORTATION SYSTEM**
A high energy stage for the National Space Transportation System [IAF PAPER 84-15] p 361 A85-23200
Microwave Scanning Beam Landing System performance during Shuttle landings p 486 A85-32199
NASA R and T aerospace plane vehicles: Progress and plans [NASA-TM-86429] p 595 N85-25388
**SPACE TRANSPORTATION SYSTEM FLIGHTS**
Introductory aerothermodynamics of advanced space transportation systems p 231 A85-21827
**SPACE VEHICLE CHECKOUT PROGRAM**
Orbiter spacecraft weight and center of gravity determination [SAWE PAPER 1559] p 178 A85-18817
**SPACEBORNE EXPERIMENTS**
Use of gravitational stabilization in performance of experiments p 40 N85-11084
A method for determining mesoscale dynamic topography [AD-D011412] p 300 N85-17506
NASA Ames Summer High School Apprenticeship Research Program [NASA-TM-86006] p 613 N85-26590
**SPACECRAFT**
An optimization method for the preliminary design of interplanetary aerobraking missions p 238 N85-16822
On the frontier: Flight research at Dryden 1946-1981 [NASA-SP-4303] p 313 N85-17934
**SPACECRAFT ANTENNAS**
Large antenna control methods: Current status and future trends p 518 N85-23845
**SPACECRAFT CHARGING**
Propagation of an ion jet near a dielectric surface p 197 A85-16187
**SPACECRAFT COMMUNICATION**
Time division multiple access differential GPS p 486 A85-32203
Research and technology highlights of the Lewis Research Center [NASA-TM-86899] p 309 N85-17928
Technical evaluation report on the 46th Symposium of the Avionics Panel on Space System Applications to Tactical Operations [AGARD-AR-203] p 349 N85-18988
**SPACECRAFT COMPONENTS**
Technical and economical aspects in manufacturing aviation and space components by using superplastic forming (SPF) and/or superplastic forming/diffusion bonding (SPF/DB) [MBB-BB-572-84-OE] p 181 A85-16087
**SPACECRAFT CONFIGURATIONS**
Air breathing space transport vehicles with wings p 280 A85-20909
A representation of the aerodynamic characteristics of a flight vehicle of varying shape p 815 A85-44850
Constellations p 433 N85-20352
On-orbit systems identification of flexible spacecraft Technol., 1984, Pt. 2 p 465-481 p 518 N85-23841
**SPACECRAFT CONSTRUCTION MATERIALS**
PM aerospace materials; Proceedings of the International Conference, Bern, Switzerland, November 12-14, 1984. Volumes 1 & 2 p 785 A85-43126
R and D activities of the Structural Sciences Division p 799 N85-32026
**SPACECRAFT CONTROL**
New concepts in control theory, 1959-1984 (Dryden Lectureship in Research) — for aerospace flight control p 703 A85-39551
Guidance, Navigation and Control Conference, Snowmass, CO, August 19-21, 1985, Technical Papers p 842 A85-45876
Use of gravitational stabilization in performance of experiments p 40 N85-11084
The Satellite sail p 433 N85-20376
**SPACECRAFT DESIGN**
Optimal simultaneous structural and control design of maneuvering flexible spacecraft p 177 A85-18338
CAD systems for knowledge transfer p 375 A85-24509
Hermes - A cockpit inspired by the Airbus A320 p 782 A85-40914
Geopotential Research Mission - Status report p 800 A85-42469
Design of flight vehicles and their systems p 854 A85-44832
Descent vehicles — Russian book p 899 A85-49435
Aerodynamic characteristics of some lifting reentry concepts applicable to transatmospheric vehicle design studies [NASA-TM-86331] p 138 N85-14787
Constellations p 433 N85-20352
Uses of composite materials p 520 N85-22898
**SPACECRAFT ELECTRONIC EQUIPMENT**
IUS-1 - Redundant inertial measurement unit test plan and results p 899 A85-47057
**SPACECRAFT GUIDANCE**
New analytical results for AOTV guidance [AIAA PAPER 85-1820] p 849 A85-43865
**SPACECRAFT INSTRUMENTS**
IUS-1 - Redundant inertial measurement unit test plan and results p 899 A85-47057
**SPACECRAFT LANDING**
Microwave Scanning Beam Landing System performance during Shuttle landings p 486 A85-32199
Active control technology experience with the Space Shuttle in the landing regime [NASA-TM-85910] p 36 N85-10071
**SPACECRAFT MANEUVERS**
Optimal simultaneous structural and control design of maneuvering flexible spacecraft p 177 A85-18338
Effect of maximum lift to drag ratio on optimal aeroassisted plane change [AIAA PAPER 85-1817] p 849 A85-43863
New analytical results for AOTV guidance [AIAA PAPER 85-1820] p 849 A85-43865
**SPACECRAFT MOTION**
A representation of the aerodynamic characteristics of a flight vehicle of varying shape p 815 A85-44850
Use of gravitational stabilization in performance of experiments p 40 N85-11084
Control of lateral conjectory motion of spacecraft in atmosphere p 40 N85-11085

**SPACECRAFT PERFORMANCE**
An experimental program for the testing and demonstration of GPS/Navstar, taking into account applications in civil aviation
[DGLR PAPER 84-092] p 748 A85-40311
**SPACECRAFT POWER SUPPLIES**
Identification of power analysis models for ETS-III operation p 595 A85-34426
**SPACECRAFT PROPULSION**
Air breathing space transport vehicles with wings p 280 A85-20909
Fiscal year 1986 technical objective document
[AD-A151039] p 539 N85-25000
**SPACECRAFT RADIATORS**
Thermal design of rotatable cryogenic heat pipe joints — for heat exchangers in space applications
[AIAA PAPER 85-0068] p 279 A85-19495
**SPACECRAFT REENTRY**
Three-dimensional nonequilibrium viscous flow over the Shuttle Orbiter with catalytic surface effects p 392 A85-29301
Analytic solution for a cruising plane change maneuver p 432 A85-29306
Numerical computation of extended Kalman filter and its application to aerodynamic parameter identification of reentry satellite p 610 A85-35796
An analysis of the Space Shuttle hypersonic entry trim anomaly
[AIAA PAPER 85-1764] p 850 A85-43878
Minimax optimal control and its application to the reentry of a space glider p 899 A85-47306
Effect of aerodynamic and angle-of-attack uncertainties on the May 1979 entry flight control system of the Space Shuttle from Mach 8 to 1.5
[NASA-TP-2365] p 280 N85-15778
**SPACECRAFT RELIABILITY**
A new approach to durability prediction for fuel tank skins
[AIAA PAPER 85-0602] p 505 A85-30331
**SPACECRAFT STABILITY**
The effect of parameter scatter on the quality indices of a flight vehicle platform stabilization system p 177 A85-17052
Effect of aerodynamic moment on the regime of the gravity gradient stabilization of the Salyut-6 - Soyuz orbital system p 432 A85-28488
**SPACECRAFT STRUCTURES**
Damping of composite materials p 119 A85-15579
Aeronautical applications of adhesive bonding p 384 A85-29854
Introduction to aerospace structural analysis — Book p 446 A85-29974
Review of research on structureborne noise
[AIAA PAPER 85-0786] p 536 A85-30388
New processing techniques for automated chemical removal of surface metal
[DGLR PAPER 84-085] p 789 A85-40305
Probabilistic combination of vehicle dynamic vibration and acoustically induced random accelerations p 855 A85-45847
Aerospace radiography - The last three decades p 908 A85-49100
Measurement of the inertial constants of a rigid or flexible structure of arbitrary share through a vibration test
[NASA-TM-77557] p 55 N85-11381
Elastomer toughened polyimide adhesives — bonding metal and composite material structures for aircraft and spacecraft
[NASA-CASE-LAR-12775-2] p 437 N85-21349
R and D activities of the Structural Sciences Division p 799 N85-32026
**SPACELAB**
FRG's DFVLR ready for participation in space station p 433 N85-20176
**SPACELAB PAYLOADS**
Parabolic aircraft flights - An effective tool in preparing microgravity experiments p 782 A85-42697
**SPACERS**
Spacer structure
[AD-D011641] p 670 N85-27866
**SPANWISE BLOWING**
Approach and landing technologies for STOL fighter configurations p 414 A85-29254
The effect of a small blowing on vortex-breakdown of a swirling flow p 393 A85-29964
The spanwise variation of laminar separation bubbles on finite wings at low Reynolds numbers
[AIAA PAPER 85-1590] p 712 A85-40706
Wind-tunnel experimental investigation on flap spanwise blowing p 738 A85-43226
Low-speed stability and control wind-tunnel investigations of effects of spanwise blowing on fighter flight characteristics at high angles of attack — Langely 12-ft low-speed tunnel and 30- by 60-ft tunnel
[NASA-TP-2431] p 479 N85-23708
**SPARE PARTS**
The relationship between an advanced avionic system architecture and the elimination of the need for an Avionics Intermediate Shop (AIS) p 439 A85-26804
The development of maintenance and supply support of multi-mission helicopters operating from multiple locations p 466 A85-31984
Dyna-METRIC - New capabilities — Dynamic Multi-Echelon Technique for Recoverable Item Control p 859 A85-45148
DYNA-SIM: A nonstationary queuing simulation with application to the automated test equipment problem
[AD-A146364] p 196 N85-15450
Managing recoverable aircraft components in the PPB and related processes: Executive summary
[AD-A146806] p 308 N85-16667
The Air Force can improve its forecasts of aircraft spare parts requirements
[AD-A147911] p 308 N85-16682
Estimating wartime support resource requirements. Statistical and related policy issues
[AD-A147923] p 308 N85-16685
Managing recoverable aircraft components in the PPB (Planning, Programming and Budgeting) and related processes. Technical volume
[AD-A152014] p 542 N85-25169
**SPARK IGNITION**
FRG ceramic engine components (PET) p 297 N85-17193
Radiation/catalytic augmented combustion
[AD-A148758] p 364 N85-18101
**SPATIAL DISTRIBUTION**
Spatial variation of sea surface temperature and flux-related parameters measured from aircraft in the JASIN experiment
[AD-A149321] p 130 A85-15425
**SPATIAL MARCHING**
Noniterative cross-flow integration for the pressure-split analysis of subsonic mixing-layer problems p 145 A85-18697
X-marching methods to solve the Navier-Stokes equations in two- and three-dimensional flows
[ONERA, TP NO. 1985-6] p 387 A85-27886
Computation of three-dimensional viscous flows using a space-marching method p 392 A85-29259
Computation of internal incompressible separated flows using a space-marching technique
[AIAA PAPER 85-1624] p 790 A85-40730
**SPATIAL RESOLUTION**
Electronic displays: Their strengths and weaknesses for advanced high performance aircraft p 349 N85-19664
**SPECIFIC IMPULSE**
Review of empirical and analytical specific impulse methodologies
[AIAA PAPER 85-1434] p 669 A85-39776
**SPECIFICATIONS**
Manufacturing Methods and Technology (MM/T) specifications for miniature cathode ray tube
[AD-A145597] p 54 N85-11298
Mission-oriented requirements for updating MIL-H-8501. Volume 1: STI proposed structure — military rotorcraft
[NASA-CR-177331-VOL-1] p 271 N85-16877
Mission-oriented requirements for updating MIL-H-8501. Volume 2: STI background and rationale — military rotorcraft
[NASA-CR-177331-VOL-2] p 271 N85-16878
Using the control system design environment in the design of a data link receiver unit for the Coast Guard HH-65A helicopter
[AD-A148624] p 271 N85-16880
Avionics data base
[AD-A152415] p 657 N85-27863
The interactive generation of specifications for an onboard software series (GISELE) p 679 N85-27906
**SPECIMEN GEOMETRY**
Blade tip geometry - A factor in abrading sintered seal material p 110 A85-13714
**SPECKLE PATTERNS**
Laser speckle technique for burner liner strain measurements p 29 N85-10960
**SPECTRAL METHODS**
Damage accumulation techniques in damage tolerance analysis p 126 A85-15861
Spectral methods for the Euler equations. I - Fourier methods and shock capturing p 185 A85-18684
Spectral methods for modeling supersonic chemically reacting flow fields
[AIAA PAPER 85-0302] p 219 A85-19651
Spectral characteristics of radar echoes from aircraft-dispensed chaff p 406 A85-26606
Identification of linear dynamic control plants by means of signal expansion on the basis of the Walsh function p 803 A85-42675
**SPECTROMETERS**
Evaluation of the forward scattering spectrometer probe. I - Electronic and optical studies p 291 A85-22168
Condition monitoring of jet engines p 835 A85-43649
**SPECTRUM ANALYSIS**
Aircraft identification based on pattern recognition of FM emission spectra p 15 A85-11078
Power spectral density of subsonic jet noise p 704 A85-37898
Spectral analysis of optimal and suboptimal gyro monitoring filters p 696 A85-39459
Pseudospectral calculations of two-dimensional transonic flow (Task 1). Numerical investigation of VTOL aerodynamics (Task 2)
[AD-A150123] p 399 N85-21126
**SPEECH RECOGNITION**
Speech recognition making progress - Direct voice input is a promising infant p 244 A85-19183
Integration of advanced displays, FMS, speech recognition and data link p 407 A85-27605
Adaptive noise cancellation in a fighter cockpit environment
[AD-A153178] p 749 A85-41321
Literature review of voice recognition and generation technology for Army helicopter applications
[AD-A146878] p 293 N85-15954
A voice-actuated wind tunnel model leak checking system
[NASA-TM-86359] p 313 N85-17936
Evaluating syntactic constraints to speech recognition in a fighter aircraft environment
[AD-A152117] p 607 N85-27119
Study to determine potential flight applications and human factors design guidelines for voice recognition and synthesis systems
[NASA-CR-172590] p 797 N85-31349
**SPEED CONTROL**
Application of model-following control synthesis techniques to design of hydraulic velocity flight simulation table with one axis p 195 A85-18285
Development of a velocity control algorithm for controlling a 6-DOF captive trajectory model support p 427 A85-29567
Use of braking stages for control of turbine speed p 371 N85-18215
Pulsewidth modulated speed control of brushless dc motors
[AD-A151966] p 607 N85-27148
**SPEED INDICATORS**
The design of a fluidic low-airspeed sensor p 888 A85-47791
Airspeed sensing pressure valve system
[AD-D011472] p 348 N85-18987
Miniature electrooptical air flow sensor
[NASA-CASE-LAR-13065-1] p 447 N85-20295
**SPHERES**
An experimental study of pressure fluctuations in flow around a sphere p 460 A85-29005
The motion of a spherical particle suspended in a turbulent flow near a plane wall p 444 A85-29056
Approximate relationships for determining pressure at the surface of a sphere or a cylinder for arbitrary free-stream Mach numbers p 624 A85-38563
Average force acting on a small sphere in a traveling-wave field in a viscous fluid p 805 A85-41646
**SPHERICAL WAVES**
A study of separated flow behind two- and three-dimensional bodies exposed to a spherical shock wave p 78 A85-14590
**SPHEROIDS**
Boundary layers and separation on a spheroid at incidence p 145 A85-18683
**SPIKES (AERODYNAMIC CONFIGURATIONS)**
Modes of shock-wave oscillations on spike-tipped bodies p 232 A85-21855
**SPIN**
A method for estimating the rolling moment due to spin rate for arbitrary planform wings
[NASA-TM-86365] p 357 N85-18990
**SPIN DYNAMICS**
A simplified analysis of aircraft steady spin p 584 A85-36483
Equilibrium conditions for aircraft steady spin p 584 A85-36484
A numerical study of spin effects on axisymmetric flow past a body of revolution
[AIAA PAPER 85-1605] p 724 A85-41402
Flight investigation of stall, spin and recovery characteristics of a low-wing, single-engine, T-tail light airplane
[NASA-TP-2427] p 574 N85-25248
Use of quaternions in flight mechanics
[AD-A152616] p 675 N85-27875

Dual towline spin-recovery device
[NASA-CASE-LAR-13076-1] p 895 N85-35200

SPIN REDUCTION
Measurements of despin and yawing moments produced by a viscous liquid p 423 A85-26447
Discontinuous wing leading edge to enhance spin resistance p 424 A85-29255
Taming the deadly spin p 584 A85-36148

SPIN STABILIZATION
Use of gravitational stabilization in performance of experiments p 40 N85-11084
Hypothetical zero yaw drag trajectory of spinning projectiles between M = 5 and M = 10
[AD-A148899] p 329 N85-18963

SPLINE FUNCTIONS
The use of functional splines for constructing aircraft surfaces p 534 A85-31466
Computer programs for smoothing and scaling airfoil coordinates
[NASA-TM-84666] p 742 N85-31011

SPLINES
Control of rotordynamic instability in a typical gas turbine's power system p 187 N85-14120

SPOILERS
Calculation of unsteady transonic separated flows by viscous-inviscid interaction
[ONERA, TP NO. 1984-100] p 8 A85-12621
The influence of a spoiler on the development of a highly curved turbulent wall jet p 123 A85-14348
Wake flow past a plate with spoiler
p 140 A85-16147
A comparison between theoretical and experimental flow fields of an airfoil with deflected spoiler
[AIAA PAPER 85-0269] p 216 A85-19622
An experimental study of airfoil-spoiler aerodynamics
[NASA-CR-177328] p 147 N85-14796
Repair of composites p 284 N85-17058
Investigation of the turbulent separated flow behind a spoiler
[ISL-CO-240/83] p 481 N85-23726
Calculation of unsteady transonic separated flows by viscous-inviscid interaction p 554 N85-25178
Study of boundary layer separation on a supercritical profile with a spoiler by means of a laser Doppler velocimeter
[ISL-CO-225/84] p 875 N85-34128

SPRAY CHARACTERISTICS
Influence of downstream distance on simplex atomizer spray characteristics
[ASME PAPER 84-WA/HT-25] p 698 A85-39888
Description of a technique to measure spray distribution in an air stream
[AD-A149780] p 398 N85-21122

SPRAYED COATINGS
Plastic flow of plasma sprayed ceramics
p 362 A85-24161
ITSC '83; Proceedings of the Tenth International Thermal Spraying Conference, Essen, West Germany, May 2-6, 1983 p 443 A85-28801
Life modeling of atmospheric and low pressure plasma-sprayed thermal-barrier coating
p 435 A85-29728
Determination of thermal stresses in diffusionless heat-resisting coatings of the Ni(Co)CrAlY system
p 783 A85-40145
Thermal stability of plasma-sprayed zirconia coatings as related to substrate selection p 900 A85-48758
Air force plasma spray at SA-ALC (San Antonio Air Logistics Center)
[AD-P004004] p 72 N85-11984

SPREAD SPECTRUM TRANSMISSION
Maintenance test requirements of spread spectrum CNI systems — Communications-Navigation Identification
p 407 A85-26806
Target super-resolution compensation for spread spectrum radar waveforms p 823 A85-45129

SPRINGS (ELASTIC)
Experimental research on the design bases for aerodynamic spring bearings — German thesis
p 50 A85-11722
An iterative procedure for nonlinear flutter analysis
[AIAA PAPER 85-0688] p 523 A85-30355

SQUEEZE FILMS
Stability of squeeze film damped multi-mass flexible rotor bearing systems
[ASME PAPER 84-TRIB-45] p 289 A85-21296
The performance of a sealed squeeze-film bearing in a flexible support structure p 440 A85-27476
An energy approach to linearizing squeeze-film damper forces p 440 A85-27479

SQUID (DETECTORS)
Superconducting gyroscope research
[NASA-CR-171406] p 604 N85-25795

STABILITY
Effect of combined pressure and temperature distortion orientation on high-bypass-ratio turbofan engine stability
[NASA-TM-83771] p 27 N85-10067
Development and flight evaluation of an augmented stability active controls concept: Executive summary
[NASA-CR-166009] p 37 N85-11006
Rotordynamic Instability Problems in High-Performance Turbomachinery
[NASA-CP-2338] p 186 N85-14116
Full load testing in the platform module prior to tow-out: A case history of subsynchronous instability
p 186 N85-14117
Internal hysteresis experienced on a high pressure syn gas compressor p 187 N85-14122
Integrated Technology Rotor/Flight Research Rotor (ITR/FRR) concept definition
[NASA-CR-166443] p 345 N85-18978
Integrated Technology Rotor/Flight Research Rotor (ITR/FRR) concept definition
[NASA-CR-166445] p 345 N85-18979
Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 2: Statistical analysis of Marshall properties of plant-produced bituminous materials
[FAA-PM-84-12-VOL-2] p 430 N85-21181
Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 4: Computer simulation of multiple acceptance criteria
[FAA-PM-84-12-VOL-4] p 431 N85-21183
Stability of vortex structures during separation flow past array of wings p 481 N85-24110

STABILITY AUGMENTATION
A longitudinal stability augmentation system for a tilt rotor aircraft
[AIAA PAPER 85-0072] p 268 A85-19498
Optical technology for flight control systems
p 776 A85-41019
Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project. ACT/Control/Guidance System study, volume 1
[NASA-CR-165963-VOL-1] p 162 N85-14837
Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project. ACT/Control/Guidance System study. Volume 2: Appendices
[NASA-CR-165963-VOL-2] p 162 N85-14838
Leading edge flap system for aircraft control augmentation
[NASA-CASE-LAR-12787-2] p 424 N85-19985
A perspective on superaugmented flight control advantages and problems p 588 N85-26733
Demonstration of relaxed stability on a commercial transport p 590 N85-26745

STABILITY DERIVATIVES
Estimation of aerodynamic forces and moments on a steadily spinning airplane p 170 A85-16238
Subsonic wing rock of slender delta wings
[AIAA PAPER 85-0198] p 214 A85-19582
Subsonic wing rock of slender delta wings
p 385 A85-26760
A possible causative flow mechanism for body rock — nonlinear pitch-yaw-roll coupling in high-performance aircraft p 512 A85-32593
Dynamic characteristics of the STARS aerostat
[AIAA PAPER 85-0880] p 674 A85-38795
A discussion on lift and moment characteristics of aerofoils in incompressible potential flows
p 730 A85-42441
On-line estimation and identification of aircraft stability derivatives using the modified gain extended Kalman filter
[AIAA PAPER 85-1762] p 837 A85-43827
The development of a dynamic model of a generalised combat aircraft with forward wings for the identification of stability and control characteristics
[CAR-84-33] p 343 N85-18050

STABILITY TESTS
New high temperature and fuel resistant sealants based on Permapol P-3, polythioether polymers
p 178 A85-16052
An improved technique for testing helicopter rotor-pylon aeromechanical stability using measured rotor dynamic impedance characteristics p 826 A85-45794
Recent developments in rotary-balance testing of fighter aircraft configurations at NASA Ames Research Center
[NASA-TM-86714] p 811 N85-32090

STABILIZATION
Oxidation and stabilization of jet fuels — Russian book
p 281 A85-20925

STABILIZED PLATFORMS
Evaluation of nose, roof, and mast mounted sensor platforms for piloting and sighting, integrated in future combat helicopters p 260 N85-16806

STABILIZERS (AGENTS)
Stabilizing T-6 fuel with antioxidant mixtures
p 364 A85-26279

STABILIZERS (FLUID DYNAMICS)
The development of a finite element model of an aircraft vertical stabilizer for vibration analysis
p 290 A85-21683
Advanced composite stabilizer for Boeing 737 aircraft
[NASA-CR-168451] p 21 N85-10934
Advanced manufacturing development of a composite empennage component for L-1011 aircraft
[NASA-CR-165885] p 44 N85-11141
Full-scale testing, production and cost analysis data for the advanced composite stabilizer for Boeing 737 aircraft. Volume 1: Technical summary
[NASA-CR-3649] p 179 N85-13912
Design, ancillary testing, analysis and fabrication data for the advanced composite stabilizer for Boeing 737 aircraft. Volume 1: Technical summary
[NASA-CR-3648] p 179 N85-13913
Design, ancillary testing, analysis and fabrication data for the advanced composite stabilizer for Boeing 737 aircraft, volume 2
[NASA-CR-166011] p 179 N85-13914
Full-scale testing, production and cost analysis data for the advanced composite stabilizer for Boeing 737 aircraft, volume 2
[NASA-CR-166012] p 179 N85-13915
TUTOR (CL-41A) tail flight load survey
p 254 N85-15678
Flutter clearance of the Schweizer 1-36 deep-stall sailplane
[NASA-TM-85917] p 830 N85-33118

STAGNATION FLOW
Unsteady boundary layers close to the stagnation region of slender bodies p 77 A85-14242
Non-equilibrium high enthalpy airflows in a free piston shock tunnel p 320 A85-25484
Physics on aircraft wakes
[NASA-CR-174105] p 67 N85-12871
Some important problems in unsteady boundary layers including separation. 2: Unsteady boundary layers close to the stagnation region of slender bodies
[AD-A146964] p 294 N85-16069

STAGNATION POINT
Effect of variable surface catalysis on heating near the stagnation point of a blunt body
[AIAA PAPER 85-0246] p 323 A85-26386
Stagnation point heat transfer in hypersonic high enthalpy flow
[AIAA PAPER 85-0973] p 620 A85-37623
Conical stagnation points in the flow around an external corner — delta wings
[VTH-LR-396] p 561 N85-26680

STAINLESS STEELS
Improved surface preparation of AM355 for adhesive bonding p 180 A85-15999

STALLING
A study on configurations of casing treatment for axial flow compressors p 26 A85-10974
Modeling post-stall operation of aircraft gas turbine engines
[AIAA PAPER 85-1431] p 669 A85-39775
Preliminary airworthiness evaluation of the Rutan Aircraft Factory (RAF), Inc. LONG-EZ airplane with external sight
[AD-A145381] p 22 N85-10937

STANDARDIZATION
An argument for standardization in modern aircraft crew stations p 657 A85-38961
Air Force standardizing avionics p 831 A85-44074
Development of consensus modular avionics standards p 833 A85-45003
Adaptable air data computer standardization
p 833 A85-45025
Increased joint avionics standardization could result in major economies and operational benefits
[AD-A145730] p 25 N85-10945
Development of NATOPS (Naval Air Training and Operating Procedure Standardization) performance software for the H-46D helicopter
[AD-A156089] p 887 N85-35190

STANDARDS
1984 SAE aerospace handbook: Air transport cabin and flight deck safety provisions p 156 A85-17244
1984 SAE aerospace handbook: Electromagnetic compatibility p 156 A85-17247
A standard computer bus for MIL-STD-1750A avionics computers
[AIAA PAPER 84-2679] p 194 A85-17880
Modular standards for emerging avionics technologies
[AIAA PAPER 84-2747] p 184 A85-17897
FAA policy regarding solid waste disposal facilities
[AD-P004196] p 428 N85-19963

A description of the Langley wireframe geometry standard (LaWGS) format [NASA-TM-85767] p 499 N85-22380

Do new aircraft need new technologies and certification rules? p 503 N85-23795

Establishment and maintenance of certification standards for helicopter and turboprop power transmission systems p 503 N85-23796

**STANDING WAVES**

Flutter and forced response of mistuned rotors using standing wave analysis p 122 A85-12721

Vibration and flutter of mistuned bladed-disk assemblies [AIAA PAPER 84-0991] p 181 A85-16095

**STAR TRACKERS**

An automatic navigation and aspect sensing system for X-ray astronomy p 643 A85-38314

**STARTING**

Control of fuel during starting of a gas turbine [SAE PAPER 841511] p 661 A85-39155

Control system design language implementation of a gas turbine starting controller [AD-A147896] p 286 N85-15732

**STATE ESTIMATION**

Applications of state estimation in aircraft flight-data analysis p 650 A85-39211

A distributed aeroacoustic tracking algorithm p 917 A85-47774

**STATE VECTORS**

Dynamic loads analyses of flexible airplanes - New and existing techniques [AIAA PAPER 85-0808] p 492 A85-30394

A state-space model for an aeroelastic system p 535 A85-33301

Slow and fast state variables for three-dimensional flight dynamics p 675 A85-39567

**STATIC AERODYNAMIC CHARACTERISTICS**

Equations of motion of a quasisteady flight vehicle utilizing restrained static aeroelastic characteristics p 827 A85-45844

Static longitudinal stability and control characteristics of the Fokker F27 Friendship calculated by simple handbook methods [VTH-LR-394] p 588 N85-26728

**STATIC CHARACTERISTICS**

Characteristics of gas-lubricated spherical spiral groove bearings p 365 A85-23628

The static aeroelasticity of the anisotropic wing [DGLR PAPER 84-158] p 752 A85-40287

**STATIC DEFORMATION**

A nonlinear solution for parachute suspension line deformation p 877 A85-49140

The static aeroelasticity of a composite wing p 701 N85-29321

**STATIC ELECTRICITY**

Effect of precipitation static on general aviation digital avionics [AIAA PAPER 84-2641] p 157 A85-17830

**STATIC LOADS**

Investigation to optimize the passive shock wave/boundary layer control for supercritical airfoil drag reduction [NASA-CR-175788] p 559 N85-26665

**STATIC PRESSURE**

Noseboom position error prediction data base update p 418 A85-28650

A numerical calculation of propeller performance at static condition and its comparison with experiment p 724 A85-41012

Effect of combined pressure and temperature distortion orientation on high-bypass-ratio turbofan engine stability [NASA-TM-83771] p 27 N85-10067

High temperature static strain sensor development program p 29 N85-10959

Effects of inlet distortion on a static pressure probe mounted on the engine hub in an F-15 airplane [NASA-TP-2411] p 508 N85-22394

Measurement of turbofan-turbojet thrust from tailpipe static pressure [AD-A154036] p 774 N85-29967

On the evaluation of boundary layer measurements on boattailed bodies of revolution in axisymmetric compressible subsonic flow [ESA-TT-883] p 798 N85-31471

**STATIC STABILITY**

Demonstration of relaxed static stability on a commercial transport p 35 A85-12593

Conical bodies with a star-shaped transverse cross section, having a reserve of static stability p 229 A85-20557

Static strength of carbon-fiber-composite flat bars with unstressed holes p 789 A85-40289

Transition effects of boundary layer on static and dynamic stability of slender cone p 731 A85-42783

Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project-longitudinal handling qualities study of a relaxed-stability airplane [NASA-CR-3660] p 36 N85-11005

Approximate neutral point of a subsonic canard aircraft [NASA-TM-86694] p 557 N85-25205

Realisation of relaxed static stability on a commercial transport p 590 N85-26746

Demonstration of relaxed static stability on a commercial transport p 679 N85-27898

Realisation of relaxed static stability on a commercial transport p 679 N85-27899

**STATIC TESTS**

Development of a pneumatic thrust deflecting nozzle [AIAA PAPER 84-2456] p 108 A85-13544

The use of minicomputers for automating design tasks during the static testing of aircraft structures p 515 A85-31782

A field test program for test and training applications of the NAVSTAR/Global Positioning System p 486 A85-32202

Summary of nonaxisymmetric nozzle internal performance from the NASA Langley Static Test Facility [AIAA PAPER 85-1347] p 668 A85-39739

Static test techniques for composite airframe structures developed on the U.S. Army/Sikorsky ACAP p 759 A85-43222

Initial sailplane project: The RP-1 p 129 N85-12976

Static jet noise test results of four 0.35 scale-model QCGAT mixer nozzles [NASA-TM-86671] p 135 N85-13551

Static internal performance of single-expansion-ramp nozzles with various combinations of internal geometric parameters [NASA-TM-86270] p 147 N85-14797

Static investigation of several yaw vectoring concepts on nonaxisymmetric nozzles [NASA-TP-2432] p 637 N85-28924

**STATISTICAL ANALYSIS**

A statistical analysis of the fatigue strength characteristics of turbomachine blades p 110 A85-14801

Selection of rational models in the optimal planning of aeromechanical experiments p 288 A85-20460

Statistical treatment of multiply censored samples in fatigue testing p 367 A85-25119

Reliability assessment from small sample inspection data for gas turbine engine components [SAE PAPER 841599] p 659 A85-39069

Review of empirical and analytical specific impulse methodologies [AIAA PAPER 85-1434] p 669 A85-39776

Guaranteed reliability estimates for various amounts of information on the primary factors p 854 A85-44860

Annual review of aircraft accident data: US general aviation, calendar year, 1981 [PB84-230960] p 150 N85-14805

FAA (Federal Aviation Administration) statistical handbook of aviation, calendar year 1983 [AD-A148171] p 203 N85-16760

Evaluation of the birdstrike threat to the F-15 present fleet, rapid deployment force, and dual role fighter transparencies [AD-A148954] p 334 N85-18966

Robust Kalman filtering and its applications [AD-A149044] p 376 N85-19775

Worldwide birdstrike statistics of Lufthansa German Airlines [AD-P004183] p 403 N85-19945

Microscopic identification of feathers in order to improve birdstrike statistics [AD-P004187] p 403 N85-19950

General aviation activity and avionics survey [AD-A149572] p 384 N85-21103

Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 1: Correlation analysis of Marshall properties of laboratory-compacted specimens [FAA-PM-84-12-VOL-1] p 430 N85-21180

Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 2: Statistical analysis of Marshall properties of plant-produced bituminous materials [FAA-PM-84-12-VOL-2] p 430 N85-21181

Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 3: Statistical analysis of 3 methods for determining maximum specific gravity of bituminous concrete mixtures [FAA-PM-84-12-VOL-3] p 430 N85-21182

Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 4: Computer simulation of multiple acceptance criteria [FAA-PM-84-12-VOL-4] p 431 N85-21183

Field validation of statistically-based acceptance plan for bituminous airport pavements. Volume 5: Summary of validation studies [FAA-PM-84-12-VOL-5] p 431 N85-21184

Estimate of fatigue stability of gas-turbine engine compressor vanes in probabilistic aspect p 530 N85-24169

Improved statistical analysis method for prediction of maximum inlet distortion [AD-A153767] p 673 N85-28947

**STATOR BLADES**

Noise produced by the interaction of a rotor wake with a swept stator blade [AIAA PAPER 84-2326] p 133 A85-13956

An experimental investigation of stator/rotor interaction influence on multistage compressor rotor flow [AIAA PAPER 85-0009] p 206 A85-19455

A note on blade wake interaction influence on compressor stator row aerodynamic performance p 475 A85-32965

Cantilevered stator vane tip leakage studies [AIAA PAPER 85-1136] p 664 A85-39620

Measurement of 3-D unsteady flow downstream of rotor and stator blades in axial-flow compressors p 729 A85-41828

Study of controlled diffusion stator blading [NASA-CR-167995] p 354 N85-18058

Development of a rotor wake-vortex model, volume 1 [NASA-CR-174849] p 560 N85-26668

**STATORS**

Analysis and testing for rotordynamic coefficients of turbulent annular seals with different, directionally-homogeneous surface-roughness treatment for rotor and stator elements [ASME PAPER 84-TRIB-31] p 289 A85-21293

Transient technique for measuring heat transfer coefficients on stator airfoils in a jet engine environment [AIAA PAPER 85-1471] p 697 A85-39796

Navier-Stokes simulations of rotor-stator interaction using patched and overlaid grids [AIAA PAPER 85-1519] p 721 A85-40952

Energy efficient engine component development and integration program [NASA-CR-170034] p 33 N85-10990

Analysis for leakage and rotordynamic coefficients of surface roughened tapered annular gas seals p 188 N85-14135

Development of a Navier-Stokes rotor and stator analysis [AD-A146967] p 294 N85-16070

Transient technique for measuring heat transfer coefficients on stator airfoils in a jet engine environment [NASA-TM-87005] p 604 N85-25794

Spacer structure [AD-D011641] p 670 N85-27866

**STEADY FLOW**

Higher approximations in the transonic expansion of the solution to the Chaplygin equation p 3 A85-10117

Experimental investigation of the sweep effects on a helicopter blade tip [ONERA, TP NO. 1984-81] p 7 A85-12610

Theoretical study of the transonic flow past wedge profiles with detached shock waves p 74 A85-12870

Steady base flows p 76 A85-14008

Computation of unsteady aerodynamic pressure coefficients in a transonic straight cascade. II [ONERA, TP NO. 1984-118] p 80 A85-15838

A random choice method for two-dimensional steady supersonic shock wave diffraction problems p 141 A85-16531

Potential equation for transonic steady flow with large longitudinal disturbance and line relaxation p 142 A85-18281

Steady and unsteady transonic airloads on a supercritical wing p 143 A85-18509

Comment on 'Prediction of subsonic aerodynamic characteristics - A case for low-order panel methods' p 144 A85-18521

Calculation of steady flow about propellers by means of a surface panel method [AIAA PAPER 85-0283] p 218 A85-19634

The numerical simulation of steady transonic rotational flow using a dual potential formulation [AIAA PAPER 85-0368] p 221 A85-19701

Grid adaptation for the 2-D Euler equations [AIAA PAPER 85-0484] p 225 A85-19781

Determinaiton of the angles of flow incident on the rotating cascade of a reversing device p 366 A85-24002

Analysis of steady, two-dimensional, chemically reacting, nonequilibrium, inviscid flow in nozzles p 317 A85-25129

Cryptosteady modes of energy exchange p 439 A85-26769

Numerical calculation of a laminar two dimensional straight cascade flow p 386 A85-27348

Hybrid approach to steady transonic normal shock-compressible laminar boundary layer interactions over airfoils with suction
[AIAA PAPER 85-0522] p 386 A85-27876

A viscous-inviscid interaction method for computing unsteady transonic separation
[ONERA, TP NO. 1985-5] p 387 A85-27885

Numerical determination of detached internal flow with the example of a radial compression tunnel — German thesis p 443 A85-28796

Transonic flow calculations using triangular finite elements p 391 A85-29088

A type-dependent splitting scheme with variable parameters for the longitudinal large-disturbance potential equation p 393 A85-29693

Condensation phenomena in supersonic nozzles p 393 A85-29989

A new stream function formulation for the steady Euler equations p 474 A85-32609

Computation of steady supersonic flows by a flux-difference/splitting method p 545 A85-34735

An iteration panel method for predicting three dimensional surface pressure distribution of a wing with thickness in the subcritical steady transonic flow p 549 A85-35749

On relaxation of transonic flows around zero-lift airfoil and convergence of self-correcting wind tunnels p 549 A85-35757

The separation criteria and flow behavior for three-dimensional steady separated flow p 551 A85-35783

Accurate and efficient solutions of transonic internal flows
[AIAA PAPER 85-1334] p 631 A85-39729

Refined numerical solution of the transonic flow past a wedge
[AIAA PAPER 85-1593] p 713 A85-40709

New iterative algorithm between stream function and density for transonic cascade flow
[AIAA PAPER 85-1594] p 713 A85-40710

A Navier-Stokes solution procedure for analysis of steady two-dimensional transonic nozzle flows
[AIAA PAPER 85-1597] p 713 A85-40713

A comparison between implicit and hybrid methods for the calculation of steady and unsteady inlet flows
[AIAA PAPER 85-1125] p 725 A85-41417

A new single filament smoke tube injection device p 903 A85-47082

A note on the steady high-Reynolds-number flow about a circular cylinder p 872 A85-49389

Approximate calculation of flow field in an inlet with arbitrary cross sections and curved axis p 872 A85-49652

Research on implicit approximate-factorization finite-difference method for the Euler equation p 873 A85-49706

An experimental study of airfoil-spoiler aerodynamics
[NASA-CR-177328] p 147 N85-14796

Contamination and distortion of steady flow field induced by discrete frequency in aircraft gas turbines
[AD-A147092] p 294 N85-16073

Theoretical investigation of dynamic stall using a momentum integral method
[AD-P004170] p 325 N85-17955

Nonlinear problems in flight dynamics involving aerodynamic bifurcations
[NASA-TM-86706] p 557 N85-25206

Upwind-difference methods for aerodynamic problems governed by the Euler equations
[REPT-84-23] p 635 N85-27834

Method of calculating separation flow of subsonic gas stream around wings p 636 N85-28161

Data set 9: LANN wing. Pitching oscillation p 744 N85-31030

**STEADY STATE**

Implicit Total Variation Diminishing (TVD) schemes for steady-state calculations — in gas dynamics p 388 A85-28209

Three degree of freedom steady state point performance program: Updated version 1
[CSIR-NIAST-83/40] p 8 N85-10005

Effect of steady-state temperature distortion on inlet flow to a high-bypass-ration turbofan engine
[NASA-TM-86896] p 265 N85-15725

A research program in active control/aeroelasticity
[NASA-CR-175674] p 501 N85-23752

Rotor blade flap-lag stability and response in forward flight in turbulent flows p 577 N85-26698

**STEAM**

Open-cycle vapor compression heat pump
[PB85-101475/GAR] p 188 N85-14951

**STEEL STRUCTURES**

Aircraft corrosion and detection methods p 541 A85-36143

**STEELS**

Case depth on flanks of gears for helicopter gearboxes p 528 N85-23780

**STEERABLE ANTENNAS**

Airborne Doppler radar antennas p 335 A85-24832

Multifunction rotating electronically scanned radar (RESR) for air surveillance p 408 A85-27837

Design of a radar guidance mechanism using MECSYN ANIMEC
[ASME PAPER 84-DET-139] p 566 A85-33774

**STEP FUNCTIONS**

Strength analysis of aircraft structures by the step method under conditions of physical nonlinearity p 183 A85-17071

**STEREOSCOPY**

Stereo models from synthetic aperture radar p 533 A85-30961

**STIFFENING**

Dynamic response and acoustic fatigue of stiffened composite structure p 52 A85-12473

Free vibration characteristics of periodically stiffened panels with damped stringers p 182 A85-16763

Experimental investigation on advanced composite stiffened structures under uniaxial compression and bending
[AIAA PAPER 85-0674] p 518 A85-30259

Tension analysis of stiffened aircraft structures
[AIAA PAPER 85-0795] p 523 A85-30298

**STIFFNESS**

Control of the properties of carbon fiber-reinforced plastics p 118 A85-12722

Experimental determination of the effect of nonlinear stiffness on the vibration of elastic structures p 692 A85-37177

Hydrodynamic impeller stiffness, damping, and inertia in the rotordynamics of centrifugal flow pumps p 187 N85-14125

Friction and wear behavior of aluminum and composite I-beam stiffened airplane skins
[NASA-TM-86418] p 652 N85-27852

Design of helicopter rotor blades for optimum dynamic characteristics
[NASA-CR-176076] p 760 N85-31044

**STIFFNESS MATRIX**

Explicit formulation for a high precision triangular laminated anisotropic thin plate finite element p 696 A85-39170

**STIRLING CYCLE**

Stirling engines for Air Force Applications p 855 A85-45470

Introducing engine innovations: An examination of future markets for Brayton and Stirling automotive engines
[DE84-016319] p 448 N85-20382

Magentically actuated compressor
[NASA-CASE-GSC-12799-1] p 448 N85-21404

**STOCHASTIC PROCESSES**

Experimental analysis of an innovations-based detection algorithm for surveillance radar p 336 A85-25102

Information approach to fixed-gain design p 455 A85-26608

Stochastic crack propagation in fastener holes
[AIAA PAPER 85-0668] p 522 A85-30251

Evaluation of stochastic similarity criteria for a limited volume of aviation equipment tests p 534 A85-31464

Optimal control synthesis for stochastic systems with allowance for a delay in the control circuit in the case of incomplete and inaccurate information on the system state p 535 A85-31475

Optimal generalized multistep integration formulae for real-time digital simulation
[AIAA PAPER 85-1740] p 802 A85-40556

Estimation of stochastic gust loads, taking into consideration unsteady air forces p 815 A85-44268

Stochastic crack propagation in fastener holes p 855 A85-45845

Accounting for error stochasticity in terminal homing of aircraft p 97 N85-13115

Graphic simulation of a machine-repairman model
[AD-A151761] p 543 N85-26633

**STORAGE**

Depot modernization at the Defense Logistics Agency
[AD-P004008] p 126 N85-11988

**STORAGE STABILITY**

Oxidation and stabilization of jet fuels — Russian book p 281 A85-20925

Storage stability of jet fuels
[AD-A146360] p 180 N85-14943

**STORAGE TANKS**

Results of variable enthalpy tests of CPR-488 TIP panels in MSFC Hot Gas Facility
[NASA-CR-170889] p 902 N85-35237

**STORMS (METEOROLOGY)**

Scan rates of Next Generation Weather Radar p 191 A85-17486

Radar for storm forecasting and weather hazard warning
[AIAA PAPER 85-0092] p 299 A85-19514

Spring program summary, 1983
[PB84-222223] p 192 N85-15330

**STRAIN ENERGY METHODS**

Modification of titanium powder metallurgy alloy microstructures by strain energizing and rapid omni-directional compaction p 596 A85-35524

**STRAIN GAGE ACCELEROMETERS**

Navy operational loads data sources and systems p 253 N85-15668

**STRAIN GAGE BALANCES**

Design refinements in multi-component strain gage balances p 445 A85-29561

**STRAIN GAGES**

High temperature static strain sensor development program p 29 N85-10959

A preliminary study of using a strain-gauged balance and parameter estimation techniques for the determination of aerodynamic forces on a model in a very short duration wind tunnel
[AD-A146473] p 190 N85-15145

Structural load measurements on a Northrop NF-5A p 253 N85-15667

Tornado: Structural Usage Monitoring System (SUMS) p 292 N85-15680

Evaluation results of the 700 deg C Chinese strain gauges — for gas turbine engine
[NASA-TM-86973] p 450 N85-21605

Root stresses in conformal gears-strain gauge and photoelastic investigations p 528 N85-23787

Effect of drag behind nozzle array on its force and energy characteristics p 481 N85-24107

R and D activities of the Systems Engineering Division p 808 N85-32027

**STRAIN MEASUREMENT**

Techniques for measurement of strain and temperature in advanced engine development p 792 A85-41032

Laser speckle technique for burner liner strain measurements p 29 N85-10960

Device for measuring relative axial expansion of turbine rotor employing space-vector tracking method p 169 N85-14962

Advanced fatigue monitoring on service aircraft p 292 N85-15671

Experiences obtained from service fatigue monitoring exercises p 292 N85-15672

**STRAKES**

Design parameters for flow energizers — highly swept strakes mounted above lifting surfaces
[AIAA PAPER 84-2499] p 74 A85-13570

Some effects of sweep direction and strakes for wings with sharp leading edges p 78 A85-14851

Limited flight investigation of strakes mounted on a helicopter tail boom p 342 A85-26394

Design parameters for flow energizers — of general aviation aircraft p 547 A85-35582

Vortex flow visualization studies of a strake-wing in water tunnel p 904 A85-47131

Flight mechanics analysis of dynamic derivatives of the Dornier variable wind tunnel model
[ESA-TT-854] p 395 N85-19937

**STRAPDOWN INERTIAL GUIDANCE**

Flight trial results of a hybrid strapdown attitude and heading reference system p 91 A85-13446

Flight test configuration for verifying inertial sensor redundancy management techniques
[AIAA PAPER 84-2496] p 92 A85-13568

GPS aided low cost strapdown INS for attitude determination p 92 A85-13684

Suboptimal filtering for aided GPS navigation p 94 A85-14832

Modeling of certain strapdown heading-sensitive errors in INS error models p 153 A85-18345

The enigma of false bias detection in a strapdown system during transfer alignment p 406 A85-26428

Autocalibration of a laser gyro strapdown inertial reference/navigation system p 642 A85-37808

Institute of Navigation, National Technical Meeting, San Diego, CA, January 17-19, 1984, Proceedings p 643 A85-38526

Redundancy management in strapdown navigation systems p 644 A85-38530

Fast reaction and high reliability of strapdown navigation systems using ring laser gyros p 822 A85-45020

Design aspects, performance analysis and test results of a strapdown single gyro attitude and heading reference p 822 A85-45021

GPS/AHRS - A synergistic mix p 822 A85-45023

Kalman filter implementation in the Litton LR-80 AHRS p 823 A85-45032

Interfacing Kalman filters with the standard INS p 823 A85-45033

Flight testing of Litton laser gyro strapdown system LTN-90 for general aviation
[DFVLR-MITT-84-16] p 245 N85-15709
Standard Attitude Heading Reference System (SAHRS) full scale development program p 246 N85-16804
Navigation: Accounting for copy p 568 N85-26641
Autofocus motion compensation for synthetic aperture radar and its compatibility with strapdown inertial navigation sensors on highly maneuverable aircraft
[AD-A151940] p 569 N85-26693
Simulations of strapdown-system errors and error compensation methods — transport aircraft navigation
[DFVLR-MITT-84-22] p 751 N85-31040

**STRATEGIC MATERIALS**
The B2 aluminides as alternative materials
[NASA-TM-86937] p 364 N85-19076

**STRATIFICATION**
Stratified charge rotary aircraft engine technology enablement program
[NASA-CR-174812] p 422 N85-21163

**STRATOSPHERE**
Stratospheric flights with large polyethylene balloons from equatorial latitudes p 639 A85-38304
First results of a stratospheric experiment using a Montgolfiere Infra-Rouge (MIR) — balloon
p 639 A85-38308
The University of Wyoming's small scientific balloon program p 639 A85-38309
A new reeling technique for very long extension scanning in the stratosphere p 640 A85-38312

**STREAK PHOTOGRAPHY**
Reynolds number dependence of vortex patterns in accelerated flow around airfoils p 470 A85-30525
Further experimental evidence of vortex splitting
p 470 A85-30673

**STREAM FUNCTIONS (FLUIDS)**
On the variety of type discrimination criteria of equations on S1 and S2 stream surfaces in turbomachine
p 228 A85-20238
A stream function relaxation method for solving transonic S1 stream surface with respect to non-orthogonal curvilinear coordinates p 228 A85-20240
Numerical solutions for transonic stream equations of flow along S1 relative stream surface employing non-orthogonal curvilinear coordinates and corresponding velocity components p 315 A85-24093
Solution of transonic S1 surface flow by successively reversing the direction of integration of the stream function equation p 315 A85-24094
The solution of variational finite element method for the inverse problem on S2 relative stream surface in turbines p 318 A85-25215
Review - Computational methods for internal flows with emphasis on turbomachinery p 392 A85-29126
A new stream function formulation for the steady Euler equations p 474 A85-32609
Flow-field matrix solution for flow along arbitrarily twisted S1 surface employing non-orthogonal curvilinear coordinates p 622 A85-37927
New iterative algorithm between stream function and density for transonic cascade flow
[AIAA PAPER 85-1594] p 713 A85-40710
Unsteady viscous flow round moving circular cylinders and airfoils
[AIAA PAPER 85-1490] p 720 A85-40930
Numerical solution of unsteady two-dimensional viscous flow around bodies p 734 A85-42970
Finite element simulation of transonic flows by modified potential and stream function methods
p 871 A85-49149
Some numerical analyses of flows with separation
p 605 N85-26616
A stream function approach to solving the conservative Euler equations for transonic flows p 875 N85-35156

**STREAMLINED BODIES**
Flow over surface-mounted semi-bluff bodies
p 735 A85-42977
An experimental and analytical study of the aerodynamic interference effects between two Sears-Haack bodies at Mach 2.7
[NASA-TM-85729] p 560 N85-26673

**STRESS ANALYSIS**
Failure prevention and reliability - 1983; Proceedings of the Fifth Conference, Dearborn, MI, September 11-14, 1983 p 49 A85-11666
Creep life predictions in nickel-based superalloys
p 42 A85-12100
A case study - Integrated design/analysis of an advanced composite fin assembly
[AIAA PAPER 84-2394] p 122 A85-13505
Crack growth of lugs under spectrum loading
[AIAA PAPER 84-2451] p 122 A85-13540
Damage accumulation techniques in damage tolerance analysis p 126 A85-15861
Fracture analysis of stiffened structure
p 126 A85-15864
Determination of stresses in elastic aircraft surfaces during motion in unsteady flow p 183 A85-17056
Strength analysis of aircraft structures using a mixed superelement method p 183 A85-17070
Stress analysis and shaping of the canopy of a square parachute p 242 A85-21668
Universal matrices to obtain thermal load vectors for the family of anisotropic plane triangular finite elements
p 291 A85-22232
A nonlinear analysis of infinitely long graphite-epoxy cylindrical panels loaded with internal pressure
[AIAA PAPER 85-0770] p 522 A85-30291
Determination of thermal stresses in diffusionless heat-resisting coatings of the Ni(Co)CrAlY system
p 783 A85-40145
The Bristol wire strike protection system — helicopter wire cutter p 754 A85-40462
Stress analysis of a SPF/DB composite sandwich panel p 792 A85-41121
Vibration characteristics and dynamic stresses in hollow turbine blades p 770 A85-41851
The dynamics of a parachute panel during opening
p 819 A85-44173
An analogue method for crack propagation life prediction p 856 A85-46825
The 3-D inelastic analysis methods for hot section components: Brief description p 31 N85-10972
A theoretical view on the stress analysis of fully inflated parachute canopies
[AD-A148387] p 239 N85-16835
Advanced stress analysis methods applicable to turbine engine structures
[NASA-CR-175573] p 422 N85-21165
Finite element analysis of problems associated with life enhancement techniques
[ARL/STRUC-R-404] p 451 N85-21676
Root stresses in conformal gears-strain gauge and photoelastic investigations p 528 N85-23787

**STRESS CONCENTRATION**
The dynamic stressed state of the cantilever turbocompressor blades of gas-turbine engines
p 421 A85-29686
The effect of stress raisers on the load-bearing capacity of titanium-alloy compressor blades p 658 A85-37575
High performance PM alloys - The price of allowing for high stresses in components p 787 A85-43161
Distributions of fatigue life and fatigue strength in notched specimens of a carbon 8-harness-satin laminate
[NAL-TR-809T] p 54 N85-10407
Benchmark notch test for life prediction
p 28 N85-10953
Effect of stress concentrations in composite structures
[NASA-CR-173976] p 44 N85-11140
Disc fatigue life predictions for gas turbine engines
p 267 N85-15743
Influence of setting angle of jet cooling nozzles on temperature and stress state of a turbine wheel
p 355 N85-18208
Integrated Technology Rotor/Flight Research Rotor (ITR/FRR) concept definition
[NASA-CR-166443] p 345 N85-18978

**STRESS CORROSION CRACKING**
Application of laboratory test data to engineering design — stress corrosion threshold data applied to structural failure p 599 A85-33630
Advanced life analysis methods. Volume 1: Cracking data survey and NDI (nondestructive inspection) assessment for attachment lugs
[AD-A150419] p 528 N85-23108

**STRESS CYCLES**
Fatigue crack growth behavior of 7XXX aluminum alloys under simple variable amplitude loading
p 280 A85-20759
Distributions of fatigue life and fatigue strength in notched specimens of a carbon 8-harness-satin laminate
[NAL-TR-809T] p 54 N85-10407

**STRESS INTENSITY FACTORS**
Crack growth of lugs under spectrum loading
[AIAA PAPER 84-2451] p 122 A85-13540
The influence of an inclusion or a hole on the bending of a cracked beam p 123 A85-13703
Stress intensity factors for cracks at a double row of holes p 125 A85-15584
Stress intensity factors for an arc crack in a rotating disc p 599 A85-34974
Crack growth analysis in multiple load path structure
p 693 A85-37186
The effect of stress raisers on the load-bearing capacity of titanium-alloy compressor blades p 658 A85-37575
Fatigue crack growth due to periodic underloads and overloads p 784 A85-41464
Stress-derivative control of keystoning deformation in finite element codes p 54 N85-10385

**STRESS MEASUREMENT**
Development of a noninterference technique for measuring turbine engine rotor blade stresses
[AIAA PAPER 85-1472] p 697 A85-39797
Stress measuring equipments for aircraft
p 762 A85-40978

**STRESS RATIO**
Development of a fatigue crack propagation model of Incoloy 901 p 280 A85-20758
Interpretation of fatigue crack growth in aluminium alloys under programmed block loading p 281 A85-20790

**STRESS RELIEVING**
External caps - An approach to stress reduction in balloons p 647 A85-38306

**STRESS-STRAIN DIAGRAMS**
Tension analysis of stiffened aircraft structures
[AIAA PAPER 85-0795] p 523 A85-30298

**STRESS-STRAIN RELATIONSHIPS**
The flange elevation angle during the drawing of axisymmetric parts p 183 A85-17053
An optimality criterion method for structures with stress, displacement and frequency constraints
p 290 A85-21985
Design of an adhesive lap joint p 444 A85-29142
Determination of loads on a thin-walled structure from parameters of its stress-strain state p 492 A85-31461
The development of efficient models of the deformation of thin-wall structures p 789 A85-40589
Benchmark notch test for life prediction
p 28 N85-10953
Strength analysis of fan-shaped wing considering temperature deformation and creep deformations
p 163 N85-14983
Analysis of thin-walled airframe members in geometrically nonlinear statement p 163 N85-14985
On solving nonlinear problems of aircraft structural mechanical design p 344 N85-18223
On thermomechanical testing in support of constitutive equation development for high temperature alloys
[NASA-CR-174879] p 605 N85-25894
Finite element analysis of notch behavior using a state variable constitutive equation p 799 N85-31548
Component-specific modeling
[NASA-CR-174925] p 836 N85-32119

**STRESSED-SKIN STRUCTURES**
Sonic fatigue design method for the response of CFRP stiffened-skin panels p 52 A85-12474

**STRESSES**
Equivalent damage: A critical assessment
p 28 N85-10952

**STRIATION**
Application of optical and electron microscopic techniques in the fractographic determination of fatigue crack growth rates p 532 N85-24334

**STRINGERS**
Modern forming procedures for integral structural components which are strengthened by stringers or ribs
[DGLR PAPER 84-086] p 789 A85-40306

**STRUCTURAL ANALYSIS**
A methodology for analyzing laser induced structural damage
[AIAA PAPER 84-2521] p 122 A85-13584
Considerations for damage analysis of gas turbine hot section components
[ASME PAPER 84-PVP-77] p 169 A85-18792
Algorithmic mass-factoring of finite elment model analyses An update: Grid-density sensitivity
[SAWE PAPER 1524] p 186 A85-18810
Current problems in the theory of plates and shells in aircraft p 287 A85-20459
Universal matrices to obtain thermal load vectors for the family of anisotropic plane triangular finite elements
p 291 A85-22232
The role of computers in aerodynamic and structural research and development at Avions Marcel Dassault-Breguet Aviation p 341 A85-26015
Introduction to aerospace structural analysis — Book
p 446 A85-29974
Structures, Structural Dynamics, and Materials Conference, 26th, Orlando, FL, April 15-17, 1985, Technical Papers. Parts 1 & 2 p 522 A85-30226
Finite element analysis of an ultralight aircraft
[AIAA PAPER 85-0616] p 490 A85-30234
Tension analysis of stiffened aircraft structures
[AIAA PAPER 85-0795] p 523 A85-30298
Using the force method for joining substructures with various kinematic hypotheses p 524 A85-31459
Structural optimization — in aircraft design
p 694 A85-38352
A data-processing procedural chain in structural mechanics
[DGLR PAPER 84-115] p 801 A85-40331
Structural analysis of aircraft gas turbine engines
p 766 A85-41029
Turbine Engine Hot Section Technology (HOST)
[NASA-TM-83022] p 28 N85-10951

Nonlinear structural and life analyses of a turbine blade p 29 N85-10954

Nonlinear structural and life analyses of a combustor liner p 29 N85-10955

Component-specific modeling p 31 N85-10971

The 3-D inelastic analysis methods for hot section components: Brief description p 31 N85-10972

Constitutive model development for isotropic materials p 31 N85-10975

Validation of structural analysis methods using the in-house liner cyclic rigs p 33 N85-10987

Biaxial constitutive equation development for single crystals [NASA-CR-174056] p 65 N85-11862

Design, ancillary testing, analysis and fabrication data for the advanced composite stabilizer for Boeing 737 aircraft, volume 2 [NASA-CR-166011] p 179 N85-13914

USSR report: Engineering and equipment [JPRS-UEQ-84-007] p 188 N85-14954

Iterative method of calculating strength of airframe members using finite element method p 162 N85-14955

Keeping up with operational loads in the French Air Force: Defining new equipment p 292 N85-15681

USAF approach to airborne structural data recording: Airborne Data Acquisition Multifunction System (ADAMS) p 292 N85-15683

Engine cyclic durability by analysis and material testing p 267 N85-15744

Flutter control with unsteady aerodynamic models [AD-A147858] p 270 N85-15753

Advances in composites technology [NASA-TM-86353] p 284 N85-17048

NASA Lewis Research Center/University Graduate Research Program on Engine Structures [NASA-TM-86916] p 372 N85-18375

Nonlinear analysis for high-temperature multilayered fiber composite structures — turbine blades [NASA-TM-83754] p 437 N85-21273

Simple theoretical models for composite rotor blades [NASA-CR-175620] p 499 N85-22382

Operational loads measurement: A philosophy and its implementation — aircraft structures [AD-A149445] p 536 N85-23306

**STRUCTURAL DESIGN CRITERIA**

Development of the aerospace structures technology damping design guide p 39 A85-12477

Air force damage tolerance design philosophy p 126 A85-15866

Optimal simultaneous structural and control design of maneuvering flexible spacecraft p 177 A85-18338

Design of load-bearing aircraft structures p 288 A85-20463

An optimality criterion method for structures with stress, displacement and frequency constraints p 290 A85-21985

A method of forecasting active constraint with the applications to structural optimization p 291 A85-22445

A description of Helix and Felix, standard fatigue loading sequences for helicopters, and of related fatigue tests used to assess them p 570 A85-33470

Application of laboratory test data to engineering design — stress corrosion threshold data applied to structural failure p 599 A85-33630

Structural optimization — in aircraft design p 694 A85-38352

Nonstationary deformation of structural elements and their optimization p 696 A85-39450

On a generalized optimality criteria method p 795 A85-43232

Using the Rice distribution in evaluating the reliability of structures p 854 A85-44861

Energy efficient engine combustor test hardware detailed design report [NASA-CR-167945] p 28 N85-10950

Structural analysis p 30 N85-10969

Technical Workshop: Advanced Helicopter Cockpit Design [NASA-CP-2351] p 154 N85-14806

Superaugmented rotorcraft program p 139 N85-14807

Evaluation of operational loads to verify structural design p 254 N85-15677

Over the wing propeller [NASA-CASE-LAR-13134-1] p 415 N85-19980

Study for the optimization of a transport aircraft wing for maximum fuel efficiency. Volume 1: Methodology, criteria, aeroelastic model definition and results [NASA-CR-172551] p 499 N85-22378

Synthesis study: Validation of a gust generator in the presence of a model in a wind tunnel [ONERA-RT-16/5108-RY-051] p 561 N85-26676

Frangibility of obstacles at airports [NLR-MP-84002-U] p 700 N85-28431

Analysis of rotorcraft crash dynamics for development of improved crashworthiness design criteria [FAA-CT-85-11] p 747 N85-31031

**STRUCTURAL ENGINEERING**

Theory and practice of lubrication for engineers (2nd revised and enlarged edition) — Book p 124 A85-15521

A data-processing procedural chain in structural mechanics [DGLR PAPER 84-115] p 801 A85-40331

Activities report of the Department of Engineering p 127 N85-12202

On solving nonlinear problems of aircraft structural mechanical design p 344 N85-18223

FRG firms jump into market for auto, aircraft ceramics p 364 N85-18225

Automatic Dynamic Aircraft Modeler (ADAM) for the computer program NASTRAN p 604 N85-25875

Research on structural analysis at the DFVLR, Brunswick p 701 N85-29314

**STRUCTURAL FAILURE**

Failure prevention and reliability - 1983; Proceedings of the Fifth Conference, Dearborn, MI, September 11-14, 1983 p 49 A85-11666

Structural failure, product liability and technical insurance; Proceedings of the First International Conference, Technische Universitaet Wien, Vienna, Austria, September 26-29, 1983 p 181 A85-16251

Utilization of analytical equipment in design and process problems solution and failure analysis of composites p 281 A85-21390

Low temperature creep and fracture of near alpha titanium alloys p 687 A85-38748

Structures in service - An airline point of view p 708 A85-40461

Structural integrity of helicopters in relation to their airworthiness p 757 A85-41730

TUTOR (CL-41A) tail flight load survey p 254 N85-15678

**STRUCTURAL MEMBERS**

Fracture mechanics methodology: Evaluation of structural components integrity p 50 A85-11751

Crash energy absorption properties of composite structural elements p 362 A85-24615

Report of the Department of Aerospace Engineering p 71 N85-11977

Analysis of thin-walled airframe members in geometrically nonlinear statement p 163 N85-14985

An overview of the MIL-HDBK-5 program [AD-A147788] p 521 N85-23970

**STRUCTURAL RELIABILITY**

The damage tolerance design philosophy p 46 A85-10543

The effect of acoustic disturbances on the vibrations of a multilayer plate p 64 A85-11823

Using the Rice distribution in evaluating the reliability of structures p 854 A85-44861

Stochastic crack propagation in fastener holes p 855 A85-45845

Aspects of certification of civil aircraft structures in composite materials p 865 A85-48570

USAF damage tolerance methods applied to general aviation aircraft design and analysis [SAE PAPER 850915] p 885 A85-50126

Assuring structural integrity in Army systems [NASA-CR-175492] p 448 N85-20398

**STRUCTURAL STABILITY**

Structural crashworthiness; International Symposium, 1st, University of Liverpool, Liverpool, England, September 14-16, 1983, Invited Lectures p 47 A85-10624

Helicopter stability — Russian book p 18 A85-11249

Helicopter ground resonance - A spatial model analysis p 18 A85-11473

Bending effects on structural dynamic instabilities of transonic wings p 51 A85-11987

Sonic fatigue design method for the response of CFRP stiffened-skin panels p 52 A85-12474

Strength analysis of aircraft structures by the step method under conditions of physical nonlinearity p 183 A85-17071

Coupled helicopter rotor/body aeromechanical stability comparison of theoretical and experimental results p 252 A85-21847

Aeroelastic stability analysis of a composite rotor blade p 498 A85-32847

The effect of stress raisers on the load-bearing capacity of titanium-alloy compressor blades p 658 A85-37575

Nonstationary deformation of structural elements and their optimization p 696 A85-39450

Strength analysis of aircraft — Russian book p 757 A85-42124

**STRUCTURAL STRAIN**

Advanced fatigue monitoring on service aircraft p 292 N85-15671

Experiences obtained from service fatigue monitoring exercises p 292 N85-15672

Tornado: Structural Usage Monitoring System (SUMS) p 292 N85-15680

Flight parameters recording for structure fatigue life monitoring p 292 N85-15682

A literature survey of ground load statistics for landing gear fatigue design purposes [FFA-TN-1984-39] p 344 N85-18054

**STRUCTURAL VIBRATION**

Optimal frequency response shaping by appendant structures — for helicopter model p 46 A85-10403

Vibration response and sound radiation from beams, plates, and cylinders excited by nonhomogeneous random pressure fields [AIAA PAPER 84-2327] p 61 A85-10871

Higher harmonic control for rotary wing aircraft [AIAA PAPER 84-2484] p 100 A85-13559

Helicopter vibrations - A technological perspective p 103 A85-14046

Vibration and flutter of mistuned bladed-disk assemblies [AIAA PAPER 84-0991] p 181 A85-16095

Experimental methods for the analysis of dynamic phenomena found in helicopters p 155 A85-16199

Environmental engineering at Saab-Scania Aircraft Division p 157 A85-18149

Theory of vibration conduction as a method for calculating the vibration of complex structures p 287 A85-20454

Aeroelastic stability and vibration of layered plates and cylindrical shells p 288 A85-20472

On the excitations due to the periodic structure of turbomachines p 288 A85-20800

Vibration tailoring of advanced composite lifting surfaces p 290 A85-21846

Vibrations of a plate induced by an aerodynamic turbulent boundary layer p 377 A85-22575

Characteristics of gas-lubricated spherical spiral groove bearings p 365 A85-23628

Active control of helicopter vibrations through multicyclic controls p 356 A85-26018

Importance of phase measurements in mechanical fault diagnosis of rotating machinery p 442 A85-27980

The evolution of flutter excitation at McDonnell Aircraft p 414 A85-28648

Vibration analysis of a rotating blade using dynamic discretization p 446 A85-29968

Review of research on structureborne noise [AIAA PAPER 85-0786] p 536 A85-30388

Rotorcraft air resonance in forward flight with various dynamic inflow models and aeroelastic couplings p 492 A85-30943

The sound field in a finite cylindrical shell p 537 A85-31195

Acoustic vibration characteristics of high contact ratio planetary gears p 524 A85-31954

Blade design parameters which affect helicopter vibrations p 494 A85-31969

Development and evaluation of a generic active helicopter vibration controller p 496 A85-32004

Aspects of a see-saw tail rotor balancing [MBB-UD-423-84-OE] p 572 A85-35251

Flutter analysis of cantilevered quadrilateral plates p 600 A85-35296

The effect of the force structure on motion stability p 611 A85-35870

Experimental determination of the effect of nonlinear stiffness on the vibration of elastic structures p 692 A85-37177

Pretwist and shear flexibility in the vibrations of turbine blades p 657 A85-37233

Dissipative properties of inhomogeneous materials and systems — Russian book p 687 A85-38874

Unsteady blade row interactions in a multi-stage compressor [AIAA PAPER 85-1134] p 630 A85-39618

A discrete model for the analysis of natural vibrations of a deformable aeroplane p 757 A85-41605

Vibration characteristics and dynamic stresses in hollow turbine blades p 770 A85-41851

Noncontact measurement of rotating blade vibrations p 770 A85-41853

Blade vibration on radial impellers excited by rotating stall-cells and during surge p 771 A85-41854

A parametric study of the unbalance vibration of the rotor supported in a light, flexible casing p 771 A85-41855

Monitoring and diagnosing the technical condition of gas-turbine engines from vibration parameters — Russian book p 771 A85-42275

Holographic-interferometric vibration analysis for fast-rotating constructional units p 794 A85-42659

Probabilistic combination of vehicle dynamic vibration and acoustically induced random accelerations p 855 A85-45847

Vibration and flutter of mistuned bladed-disk assemblies p 836 A85-45854

Structural mode real-time simulation p 881 A85-49007

Analysis of natural vibrations of a deformable aeroplane with fixed control systems p 883 A85-49673

Applications of the conformal mapping method to the solution of mechanical vibrations problems p 528 N85-23103

La Recherche Aerospatiale Bimonthly Bulletin Number 1984-3, 220/May-June [ESA-TT-882] p 543 N85-26636

Fixed gain and adaptive techniques for rotorcraft vibration control [NASA-CR-177344] p 819 N85-33111

Flutter clearance of the Schweizer 1-36 deep-stall sailplane [NASA-TM-85917] p 830 N85-33118

**STRUCTURAL WEIGHT**

Wing design for minimum drag with practical constraints p 18 A85-11983

Control of the properties of carbon fiber-reinforced plastics p 118 A85-12722

Large aircraft, requirements and capabilities [AIAA PAPER 84-2505] p 101 A85-13575

Weight-aspects of the advanced composite airframe program (ACAP) [SAWE PAPER 1517] p 159 A85-18808

Unique weight and balance aspects of V/STOL airplane design [SAWE PAPER 1518] p 159 A85-18809

Algorithmic mass-factoring of finite elment model analyses An update: Grid-density sensitivity [SAWE PAPER 1524] p 186 A85-18810

A survey of reported weight and cost savings for composite vs. metal airframes [SAWE PAPER 1547] p 160 A85-18814

Boeing 757-200 development and the contribution of weight and balance control [SAWE PAPER 1570] p 160 A85-18822

Permanent fasteners for light-weight structures — Book p 443 A85-28479

Estimating the weight of generally configured dual wing systems [AIAA PAPER 85-0641] p 490 A85-30244

Integrating new technology into weight methodology p 494 A85-31972

An assessment of the impact of technology on VTOL weight prediction p 495 A85-31974

Some weight aspects of Soviet helicopters p 495 A85-31975

MBB studies variable camber wings to improve lift, expand fleet uniformity p 474 A85-32799

Summary of nonaxisymmetric nozzle internal performance from the NASA Langley Static Test Facility [AIAA PAPER 85-1347] p 668 A85-39739

Weight design and efficiency of passenger aircraft. Handbook (2nd revised and enlarged edition) — in Russian p 828 A85-46564

Applying shear beam load measuring techniques to portable platform scales for aircraft weighing [SAWE PAPER 1581] p 898 A85-49906

The role of load-cell rotation in airplane-weight determination [SAWE PAPER 1583] p 898 A85-49908

How much does it cost/how much does it weigh? [SAWE PAPER 1593] p 919 A85-49913

In-production aircraft weight control [SAWE PAPER 1597] p 883 A85-49915

An evaluation of improved analytically based weight estimation methodologies [SAWE PAPER 1616] p 883 A85-49920

A glance at Soviet helicopter weight trends and a weight-prediction method [SAWE PAPER 1627] p 883 A85-49925

Computer aided determination of rotor blade mass properties [SAWE PAPER 1628] p 884 A85-49926

Weight control of composite parts in production [SAWE PAPER 1629] p 866 A85-49927

**STRUTS**

Stall elimination and restart enhancement device [AD-D011217] p 27 N85-10062

**STUDENTS**

NASA Ames Summer High School Apprenticeship Research Program [NASA-TM-86006] p 613 N85-26590

**SUBCRITICAL FLOW**

Flutter and divergence boundary prediction from nonstationary random responses at increasing flow speeds [AIAA PAPER 85-0691] p 523 A85-30357

An iteration panel method for predicting three dimensional surface pressure distribution of a wing with thickness in the subcritical steady transonic flow p 549 A85-35749

Performance of two transonic airfoil wind tunnels utilizing limited ventilation p 83 N85-12020

**SUBROUTINES**

A FORTRAN subroutine for the solution of periodic block-tridiagonal systems p 457 A85-27506

**SUBSONIC AIRCRAFT**

Comparison of model and full scale inlet distortions for subsonic commercial transport inlets [AIAA PAPER 84-2487] p 74 A85-13562

Computational design and validation tests of advanced concept subsonic inlets p 386 A85-27090

Is the unducted fan tomorrow's subsonic engine? p 507 A85-32945

Reynolds number and fan/inlet coupling effects on subsonic transport inlet distortion p 544 A85-34011

Parametric analysis of the acoustic power emitted by coaxial jets p 918 A85-48179

Energy efficient engine component development and integration program [NASA-CR-170034] p 33 N85-10990

Technology developments for laminar boundary layer control on subsonic transport aircraft p 237 N85-16787

**SUBSONIC FLOW**

Propulsive efficiency of vibrating bodies in a subsonic gas flow p 2 A85-10111

Method for calculating separated subsonic gas flow past wings p 2 A85-10114

Analytical study of blowing boundary layer control for subsonic V/STOL inlets p 5 A85-11646

Induced drag and lift of wing by the piecewise continuous kernel function method p 6 A85-11976

Lifting rotor analysis at subsonic and transonic flow p 75 A85-13689

Noise generated by a subsonic jet p 134 A85-14895

Method of fundamental solutions - A novel theory of lifting surface in a subsonic flow p 79 A85-15077

The circular cylinder in subsonic and transonic flow p 79 A85-15329

A finite element penalty algorithm for the parabolic Navier-Stokes equations for turbulent three-dimensional flow p 182 A85-16286

The hopscotch finite volume method for solving the Euler equations p 143 A85-18282

Comment on 'Prediction of subsonic aerodynamic characteristics - A case for low-order panel methods' p 144 A85-18521

Exact solution of compressible potential flow past a body of revolution at zero incidence - Especially for high subsonic flow p 144 A85-18528

Viscous/inviscid analysis of curved sub- or supersonic wall jets p 145 A85-18677

Noniterative cross-flow integration for the pressure-split analysis of subsonic mixing-layer problems p 145 A85-18697

Comparative study of various quadratures for subsonic lifting surface chordwise integrals p 205 A85-19404

Calculation of compressible potential flow about multielement airfoils using a finite field-panel approach [AIAA PAPER 85-0038] p 207 A85-19473

On boundary layer transition in high-subsonic and transonic flow under the influence of acoustic disturbances and free-stream turbulence [AIAA PAPER 85-0082] p 210 A85-19508

Prediction of subsonic/transonic separated flow about airfoils [AIAA PAPER 85-0205] p 215 A85-19589

Subsonic pressure distributions near a wing-fin juncture on a supersonic arrow-wing configuration with wing-mounted vertical fins [AIAA PAPER 85-0276] p 217 A85-19628

Linearized potential flow analysis of complex aircraft configurations by HISSS, a higher order panel method
[AIAA PAPER 85-0281] p 217 A85-19632

Passive control effects on flow separation around a protuberance at high subsonic speed --- for optical propagation quality enhancement to and from airborne platforms
[AIAA PAPER 85-0351] p 220 A85-19690

Effect of inlet and outlet flow conditions on the flow and performance of subsonic two-dimensional diffuser
p 228 A85-20241

Ground interference effects on subsonic dynamic stall in pitch and plunge p 231 A85-21841

Shaped optimization of the subsonic profiles of axial-flow turbine cascades p 315 A85-24028

Flow fields near bodies placed in rarefied subsonic and supersonic jets p 322 A85-26016

The effect of quality of gas jet mixing in the mixing chamber of a subsonic jet pump on the diffuser performance p 442 A85-28374

Aerodynamic characteristics and flow patterns for a number of bluff bodies in subsonic gas flow
p 389 A85-28389

The theory of oscillating thick wings in subsonic flow Lifting line theory p 393 A85-29992

Calculation of nonlinear subsonic characteristics of wings with thickness and camber at high incidence
p 545 A85-35126

A method for the estimation of jet interferences
p 549 A85-35751

A locally linearized panel method for transubsonic flow past an oscillating wing p 549 A85-35755

Interaction between acoustics and subsonic ducted flow in a ramjet configuration p 704 A85-37209

Subsonic multiple-jet aerodynamic window
p 693 A85-37216

Power spectral density of subsonic jet noise
p 704 A85-37898

Quasi-three-dimensional blade design code
p 622 A85-37928

A study on the method for solving the equation of subsonic oscillatory lifting-surface theory. IV - Computer program SOLST 1 p 622 A85-38355

Investigation of transonic inlet drag characteristics
[SAE PAPER 841539] p 627 A85-39063

Numerical and experimental determination of secondary separation on delta wings in subsonic flow
p 628 A85-39219

Substantiation of the applicability of VSAERO panel method to subsonic inlet design
[AIAA PAPER 85-1119] p 629 A85-39615

Flexible, adaptive walls for transonic wind tunnels in the subsonic and supersonic regions
[DGLR PAPER 84-108A] p 777 A85-40325

Aerodynamics of two-dimensional blade-vortex interaction
[AIAA PAPER 85-1560] p 710 A85-40885

A numerical method for duct flow with boundary layer separation
[AIAA PAPER 85-1410] p 726 A85-41422

An improved kernel function computation in subsonic unsteady lifting surface theory p 726 A85-41739

High angle-of-attack calculations of the subsonic vortex flow on slender bodies p 730 A85-42353

Flow characteristics of a body of revolution at incidence p 737 A85-42986

The roll motion of a wraparound fin configuration at subsonic and transonic Mach numbers
[AIAA PAPER 85-1777] p 837 A85-43838

The propagation of a subsonic turbulent jet in a closed plane container of varying length p 816 A85-44851

On the accuracy of boundary layer measurements in cascades at high subsonic speeds p 867 A85-47163

Contribution to theory of similitude of subsonic flow
p 868 A85-48189

Experimental results on edge-tone oscillations in high-speed subsonic jets p 918 A85-48527

Calculation of three-dimensional flowfields by the unsteady method of characteristics p 869 A85-48532

The subsonic near-wake of an axisymmetric semielliptical afterbody p 869 A85-48534

PAN AIR: A computer program for predicting subsonic or supersonic linear potential flows about arbitrary configurations using a higher order panel method. Volume 3: Case manual (version 1.0)
[NASA-CR-3253] p 13 N85-10922

Further development of a transonic cascade analysis
[AD-A145410] p 54 N85-11319

Flow calculation on a thin wing, with specific attention to separation point at the trailing edge
[FTW-FO-1721] p 146 N85-13787

PROGRAM VSAERO: A computer program for calculating the non-linear aerodynamic characteristics of arbitrary configurations: User's manual
[NASA-CR-166476] p 148 N85-14802

Calculations for aerodynamic characteristics on a 3-D lifting body in a subsonic flow using boundary element method
[NAL-TR-835] p 326 N85-17995

A locally linearized panel method for tran-/subsonic flow past an oscillating wing p 396 N85-20212

Aerodynamic behavior of ventilated wind tunnel walls
p 476 N85-22363

Approximate neutral point of a subsonic canard aircraft
[NASA-TM-86694] p 557 N85-25205

Static and dynamic pressure measurements on a NACA 0012 airfoil in the Ames High Reynolds Number Facility
[NASA-TP-2485] p 634 N85-27823

Propulsion efficiency of vibrating bodies in subsonic gas stream p 699 N85-28159

Method of calculating seperation flow of subsonic gas stream around wings p 636 N85-28161

On the evaluation of boundary layer measurements on boattailed bodies of revolution in axisymmetric compressible subsonic flow
[ESA-TT-883] p 798 N85-31471

A comparison of laser Doppler anemometry and probe measurements within the boundary layer of an airfoil at subsonic flow
[ISL-CO-219/84] p 875 N85-34127

**SUBSONIC FLUTTER**

Flutter of turbofan rotors with mistuned blades
p 122 A85-12716

Subsonic wing rock of slender delta wings
[AIAA PAPER 85-0198] p 214 A85-19582

Subsonic wing rock of slender delta wings
p 385 A85-26760

Effects of mistuning on the forced vibration of bladed disks in subsonic flow
[AIAA PAPER 85-0760] p 505 A85-30377

Numerical simulation of the subsonic wing-rock phenomenon p 116 N85-12064

**SUBSONIC SPEED**

Phase averaged acoustic measurements for a Mach number 0.6 jet
[AIAA PAPER 84-2320] p 61 A85-10867

Far-field noise of a subsonic jet under controlled excitation p 537 A85-30869

Computer studies of hybrid slotted working sections with minimum steady interference at subsonic speeds
p 628 A85-39241

Effect of initial condition on subsonic jet noise
p 862 A85-45710

Numerical optimization of circulation control airfoil at high subsonic speed p 871 A85-49131

Aileron effectiveness for a subsonic transport model with a high-aspect-ratio supercritical wing
[NASA-TM-85674] p 235 N85-15695

A computer program for the drag prediction of subsonic, turbine powered aircraft in the en-route configuration
[VTH-LR-412] p 561 N85-26681

Analysis of unsteady pressure measurements on a supercritical airfoil with a harmonically oscillating trailing edge flap at subsonic and transonic speeds
[DFVLR-FB-84-49] p 636 N85-27837

Subsonic and transonic aerodynamics of a wraparound fin configuration
[AD-A153646] p 637 N85-28927

**SUBSONIC WIND TUNNELS**

An experimental investigation of an airfoil undergoing large amplitude pitching motions
[AIAA PAPER 85-0039] p 207 A85-19474

The use of panel methods for the development of low-subsonic wall interference and blockage corrections
[AIAA PAPER 85-0159] p 212 A85-19556

The Altitude Wind Tunnel (AWT) - A unique facility for propulsion system and adverse weather testing
[AIAA PAPER 85-0314] p 275 A85-19661

Analytical modeling of circuit aerodynamics in the new NASA Lewis Altitude Wind Tunnel
[AIAA PAPER 85-0380] p 323 A85-26389

Sidewall boundary-layer corrections in subsonic, two-dimensional airfoil/hydrofoil testing
p 439 A85-26761

Investigation of the induction of subsonic wind tunnels with an axisymmetric working part p 389 A85-28443

Flow separation from the leading edge of an airfoil and the effect of acoustic perturbations on the separated flow p 694 A85-38510

An experimental investigation of an airfoil undergoing large-amplitude pitching motions p 730 A85-42351

Effect of boundary layers on solid walls in three-dimensional subsonic wind tunnels
p 84 N85-12023

Analytical modeling of circuit aerodynamics in the new NASA Lewis wind tunnel
[NASA-TM-86912] p 234 N85-15688

Aeronautical facilities catalogue. Volume 1: Wind tunnels
[NASA-RP-1132] p 361 N85-18991

Wall interference estimation of the NAL's two-dimensional wind tunnel
[NAL-TR-829] p 361 N85-18992

Harbin's subsonic, transonic wind tunnel detailed
p 517 N85-24143

**SUBSTITUTES**

An overview of potential for the substitution of ceramic materials for vulnerable materials and the implications of national materials policy p 179 A85-19099

The B2 aluminides as alternative materials
[NASA-TM-86937] p 364 N85-19076

**SUBSTRATES**

Thermal stability of plasma-sprayed zirconia coatings as related to substrate selection p 900 A85-48758

Effects of MAR-M247 substrate (modified) composition on coating oxidation coating/substrate interdiffusion -- protective coatings for hot section components of gas turbine engines
[NASA-CR-174851] p 364 N85-19073

Thermal barrier coating system
[NASA-CASE-LEW-14057-1] p 902 N85-35233

**SUBSTRUCTURES**

The treatment art of rigid-substructures in modal synthesis methods p 183 A85-17169

Full-scale crash-test evaluation of two load-limiting subfloors for general aviation airframes
[NASA-TP-2380] p 129 N85-13267

**SUCTION**

Oblique shock wave - Turbulent boundary layer interaction with suction p 142 A85-17243

Effects of suction on shock/boundary-layer interaction and shock-induced separation p 143 A85-18510

Computational study of circulation control with suction
[AIAA PAPER 85-0042] p 208 A85-19477

Trapping of free vortex by airfoils with surface suction
[AIAA PAPER 85-0446] p 224 A85-19755

Tests of wall suction and blowing in highly offset diffusers p 385 A85-26751

Hybrid approach to steady transonic normal shock-compressible laminar boundary layer interactions over airfoils with suction
[AIAA PAPER 85-0522] p 386 A85-27876

Boundary layer flow over long cylinders with suction
p 444 A85-29140

Transition control by periodic suction-blowing
[AIAA PAPER 85-1700] p 725 A85-41411

Structure of a laminar boundary layer with distributed suction p 815 A85-44133

Hybrid laminar flow control study
[NASA-CR-165930] p 21 N85-10933

Drag reduction due to boundary-layer control by combined blowing and suction p 237 N85-16785

Design studies of thick laminar flow airfoils for low speed flight employing turbulent boundary layer suction over the rear part p 257 N85-16786

Turbulent drag reduction research
p 237 N85-16788

Active and passive shock/boundary layer interaction control on supercritical airfoils p 238 N85-16795

Air intake efficiency at zero speed and lip suction -- jet engines
[BAE-KRS-N-GEN-303] p 326 N85-17996

**SULFONES**

A thermoplastic polyimidesulfone --- synthesis of processable and solvent resistant system
p 282 A85-21483

**SULFUR**

Trends of petroleum fuels
[DE85-000116] p 522 N85-24023

**SUMMARIES**

A research program to reduce the interior noise in general aviation aircraft, index and summary
[NASA-CR-176178] p 919 N85-35695

**SUPERCHARGERS**

Two-dimensional unsteady flow in Comprex rotor
p 728 A85-41819

The influence of aircraft turbomachine technology on vehicular turbocharger design p 793 A85-41830

Development of high specific speed centrifugal compressors for turbochargers p 793 A85-41831

Development of a high specific speed radial-inflow turbine for turbochargers p 793 A85-41832

Influence of heat transfer between turbine and compressor on the performance of small turbochargers
p 793 A85-41833

Ceramic turbochargers: A case study of a near-term application of high-strength ceramics
[DE85-008495] p 700 N85-28379

Future of ceramic turbochargers: Promises and pitfalls
[DE85-006209] p 700 N85-28380

**SUPERCOMPUTERS**

NAS - Supercomputing master tool for aeronautics -- Numerical Aerodynamic Simulation p 195 A85-18442

ONERA - The aeronautics supercomputer is put into service p 302 A85-22274

Modelling vortex flowfields by supercomputers with super-size memory p 628 A85-39242

Computer-system structure for solving flow problems - A complex approach to design p 724 A85-41228

Putting the 'super' in supercomputers p 804 A85-42894

The impact of supercomputers on experimentation: A view from a national laboratory [NASA-TM-86822] p 918 N85-34510

**SUPERCONDUCTING MAGNETS**

Effect of superconducting solenoid model cores on spanwise iron magnet roll control [NASA-TM-86378] p 683 N85-27915

**SUPERCONDUCTIVITY**

The generation of rolling moments with the superconducting solenoid model [NASA-CR-172520] p 360 N85-18068

**SUPERCONDUCTORS**

Report of the Technology and Test Panel p 448 N85-20370

Superconducting gyroscope research [NASA-CR-171406] p 504 N85-25795

**SUPERCRITICAL AIRFOILS**

Measurements of separating boundary layer and wake of an airfoil using laser Doppler velocimetry [AIAA PAPER 85-0181] p 214 A85-19572

Supercritical airfoil drag reduction by passive shock wave/boundary layer control in the Mach number range .75 to .90 [AIAA PAPER 85-0207] p 215 A85-19591

A comparative study between an implicit and explicit algorithm for transonic airfoils [AIAA PAPER 85-0480] p 225 A85-19777

Design of lifting symmetric supercritical airfoils p 233 A85-22228

Transonic time responses of the MBB A-3 supercritical airfoil including active controls p 512 A85-32586

Optical interferometry in fluid dynamics research p 599 A85-35203

Computation of unsteady transonic aerodynamics with steady state fixed by truncation error injection [AIAA PAPER 85-1644] p 715 A85-40744

Fan and compressor technology p 724 A85-41026

Computed static stall of a supercritical airfoil p 867 A85-47103

Effect of upstream sidewall boundary layer removal on an airfoil test — conducted in Langley 0.3-m transonic cryogenic tunnel p 83 N85-12019

Investigation to optimize the passive shock wave/boundary layer control for supercritical airfoil drag reduction [NASA-CR-175788] p 559 N85-26665

High Reynolds number tests of a NASA SC(3)-0712(B) airfoil in the Langley 0.3-meter transonic cryogenic tunnel [NASA-TM-86371] p 740 N85-29926

Pressure distribution from high Reynolds number tests of a NASA SC(3)-0712(B) airfoil in the Langley 0.3-meter transonic cryogenic tunnel [NASA-TM-86370] p 740 N85-29927

Data set 9: LANN wing. Pitching oscillation p 744 N85-31030

**SUPERCRITICAL FLOW**

Application of the Godunov method and its second-order extension to cascade flow modeling [AIAA PAPER 83-1941] p 73 A85-12714

Lifting rotor analysis at subsonic and transonic flow p 75 A85-13689

Numerical simulation of a supercritical inlet flow [AIAA PAPER 85-1214] p 630 A85-39658

Computation of flow around a circular cylinder in a supercritical regime [AIAA PAPER 85-1660] p 715 A85-40756

The supercritical regime of hypersonic flow past a delta wing p 815 A85-44152

Performance of two transonic airfoil wind tunnels utilizing limited ventilation p 83 N85-12020

Joined wing transonic design and test validation [AD-A148355] p 239 N85-16834

Static and dynamic pressure measurements on a NACA 0012 airfoil in the Ames High Reynolds Number Facility [NASA-TP-2485] p 634 N85-27823

Methods for design aerodynamics of modern transport aircraft [DFVLR-FB-85-05] p 636 N85-27838

**SUPERCRITICAL PRESSURES**

Comparison of analytical and experimental steadyand unsteady-pressure distributions at Mach number 0.78 for a high-aspect-ratio supercritical wing model with oscillating control surfaces [NASA-TM-84589] p 235 N85-15697

**SUPERCRITICAL WINGS**

Euler equation simulation of propeller-wing interaction in transonic flow p 6 A85-11977

Measurement of transonic dips in the flutter boundaries of a supercritical wing in a wind tunnel p 18 A85-11986

Steady and unsteady transonic airloads on a supercritical wing p 143 A85-18509

A special boundary element technique in transonic flow p 385 A85-26690

Measured and calculated airloads on a transport wing model p 392 A85-29263

Measured unsteady transonic aerodynamic characteristics of an elastic supercritical wing with an oscillating control surface [AIAA PAPER 85-0598] p 469 A85-30327

Transonic calculations for a flexible supercritical wing and comparison with experiment [AIAA PAPER 85-0665] p 470 A85-30407

Comparison of advanced turboprop installation on swept and unswept supercritical wings at transonic speeds [AIAA PAPER 85-1264] p 630 A85-39686

Comparison of supercritical airfoil flow calculations with wind tunnel results p 816 A85-45701

Extension and use of numerical procedure for the three dimensional unsteady transonic flows [ONERA, TP NO. 1985-67] p 868 A85-47269

Transonic wing and far field test data on a high aspect ratio transport wing for three dimensional computational method evaluation p 19 N85-10021

Experimental trim drag values and flow-field measurements for a wide-body transport model with conventional and supercritical wings [NASA-TP-2071] p 12 N85-10920

Aileron effectiveness for a subsonic transport model with a high-aspect-ratio supercritical wing [NASA-TM-85674] p 235 N85-15695

Comparison of analytical and experimental steadyand unsteady-pressure distributions at Mach number 0.78 for a high-aspect-ratio supercritical wing model with oscillating control surfaces [NASA-TM-84589] p 235 N85-15697

Installed nacelle drag-improvement tests of an M = 0.8 turboprop transport configuration [NASA-TM-84302] p 255 N85-15716

Active and passive shock/boundary layer interaction control on supercritical airfoils p 238 N85-16795

Transonic steady- and unsteady-pressure measurements on a high-aspect-ratio supercritical-wing model with oscillating control surfaces [NASA-TM-81888] p 327 N85-18003

Subsonic and transonic pressure measurements on a high-aspect-ratio supercritical-wing model with oscillating control surfaces [NASA-TM-83201] p 327 N85-18004

Measured unsteady transonic aerodynamic characteristics of an elastic supercritical wing with an oscillating control surface [NASA-TM-86376] p 398 N85-21116

Unsteady transonic pressure measurements on a semi-span wind-tunnel model of a transport-type supercritical wing (Lann model). Part 2: Pressure distributions (plotted) and plots of the vibration modes [AD-A130488] p 449 N85-21579

Preliminary development of an approximation procedure for supercritical wing design optimization applications [AD-A150177] p 500 N85-22383

Transonic pressure distributions on a two-dimensional 0012 and supercritical MBB-A3 profile oscillating in heave and pitch p 554 N85-25173

Analysis of transonic aerodynamic characteristics for a supercritical airfoil oscillating in heave, pitch and with oscillating flap p 554 N85-25175

Experience with transonic unsteady aerodynamic calculations p 554 N85-25176

The development of unsteady transonic 3-D full potential code and its aeroelastic applications p 555 N85-25187

Aerodynamic research in preparation for a new Dutch transport aircraft with supercritical wings [B8580077] p 636 N85-27836

Analysis of unsteady pressure measurements on a supercritical airfoil with a harmonically oscillating trailing edge flap at subsonic and transonic speeds [DFVLR-FB-84-49] p 636 N85-27837

Pressure distribution data from tests of 2.29 M (7.5 feet) span EET high-lift transport aircraft model in the Ames 12-foot pressure tunnel [NASA-TM-84517] p 709 N85-29912

Low-speed tests of a high-aspect-ratio, supercritical-wing transport model equipped with a high-lift flap system in the Langley 4- by 7-meter and Ames 12-foot pressure tunnels [NASA-TP-2097] p 742 N85-31010

Transonic calculations for a flexible supercritical wing and comparison with experiment [NASA-TM-86439] p 742 N85-31012

An experimental investigation of propfan installations on an upswept supercritical wing at transonic Mach numbers [NASA-CR-172605] p 742 N85-31013

Extension of the small perturbations method in three-dimensional transonic, unsteady flow to the case of real wings [ONERA-NT-17/3064-RY-070-R] p 743 N85-31017

Verification of calculation methods for unsteady airloads in the precipitation of transonic flutter [NLR-MP-84016-U] p 744 N85-31027

Study of boundary layer separation on a supercritical profile with a spoiler by means of a laser Doppler velocimeter [ISL-CO-225/84] p 875 N85-34128

**SUPERHETERODYNE RECEIVERS**

Microwave receivers enter a new era p 821 A85-44070

**SUPERHIGH FREQUENCIES**

A wideband X100 low noise microwave frequency multiplier p 903 A85-47060

Development and flight test of a helicopter, X-band, portable precision landing system concept [NASA-TM-86710] p 586 N85-26721

**SUPERHYBRID MATERIALS**

Fabrication and quality assurance processes for superhybrid composite fan blades [NASA-TM-83354] p 180 N85-14882

**SUPERPLASTICITY**

Technical and economical aspects in manufacturing aviation and space components by using superplastic forming (SPF) and/or superplastic forming/diffusion bonding (SPF/DB) [MBB-BB-572-84-OE] p 181 A85-16087

Experiments in superplastic forming of helicopter components p 598 A85-33474

Pilot production of superplastically formed/diffusion bonded T-38 main landing gear doors [AIAA PAPER 84-0933] p 616 A85-39214

Stress analysis of a SPF/DB composite sandwich panel p 792 A85-41121

Preliminary investigation of the strength and durability of superplastic formed aluminum p 785 A85-42934

MBB uses superplastic forming, diffusion bonding for alloys p 446 N85-20177

Precision die forging of blades or gas turbines p 672 N85-28148

**SUPERPOSITION (MATHEMATICS)**

Normal mode calculations for fuselage type intricate structures by regarding them as systems with superposed constraints p 500 N85-22817

**SUPERSONIC AIRCRAFT**

Weakly nonlinear theory of supersonic turbopropeller noise [AIAA PAPER 84-2302] p 60 A85-10853

Modular potential flow computation including fuselage and wing tip effects p 75 A85-13677

Supersonic jet shock noise reduction [AIAA PAPER 84-2278] p 196 A85-16099

The discussion of the position of conical shock of axisymmetric air intake of supersonic aircraft relative to the leading edge of the cowl lip p 316 A85-24096

Impact of fuselage incidence on the supersonic aerodynamics of two fighter configurations p 473 A85-32590

Wing optimization and fuselage integration for future generation of supersonic aircraft p 615 A85-37212

V/STOL: An update and overview; Proceedings of the Aerospace Congress and Exposition, Long Beach, CA, October 15-18, 1984 [SAE SP-591] p 616 A85-39201

Advanced tactical fighter - Holding for launch p 752 A85-40069

The modern fighter aircraft - Comparative configurational considerations [DGLR PAPER 84-110] p 753 A85-40327

Chinese design supersonic bomber, plan joint efforts to build momentum p 708 A85-40902

Supercruise for a STOL dogfighter p 758 A85-42897

Supersonic jump jets p 825 A85-43941

Handling qualities related to stall/spin accidents of supersonic fighter aircraft p 894 A85-49132

An engine trade study for a supersonic STOVL fighter-attack aircraft, volume 1 [NASA-CR-166304] p 2 N85-10910

F-7 supersonic day fighter viewed --- Jian-7 aircraft p 139 N85-14791

A-5 supersonic attack aircraft described --- Qiang-5 aircraft p 139 N85-14792

Details of export A-5 close-support aircraft given --- Qiang-5 aircraft p 139 N85-14793

Preliminary performance of a vertical-attitude takeoff and landing, supersonic cruise aircraft concept having thrust vectoring integrated into the flight control system [NASA-CR-172530] p 345 N85-18977

Details of export A-5 close-support aircraft given
p 346 N85-18983
Some aspects of the design of a fly-by-wire flying control system for a supersonic V/STOL fighter aircraft
[COLL-AERON-8413] p 425 N85-21175
Study of an efficient long-range Mach 2.7 supersonic transport configuration concept
[NASA-TM-86414] p 829 N85-32110

**SUPERSONIC AIRFOILS**
The rule of forbidden signals and apparent Mach number in transonic compressor cascades p 5 A85-11632
Projected advantage of an oblique wing design on a fighter mission
[AIAA PAPER 84-2474] p 102 A85-13965
Subsonic pressure distributions near a wing-fin juncture on a supersonic arrow-wing configuration with wing-mounted vertical fins
[AIAA PAPER 85-0276] p 217 A85-19628
The numerical analysis of transonic flow around a circular airfoil using hybrid difference scheme
p 386 A85-27825
MBB studies variable camber wings to improve lift, expand fleet uniformity p 474 A85-32799
Diffraction of a single plane wave by a conical wing
p 623 A85-38483
An extension of the generalized vortex-lattice method of supersonic sideslipping wings p 626 A85-38972
Improvements in transonic airfoil potential flow calculations
[AIAA PAPER 85-1642] p 715 A85-40743
Project advantage of an oblique wing design on a fleet air defense mission p 881 A85-49135
Experimental and theoretical study of the longitudinal aerodynamic characteristics of delta and double-delta wings at Mach numbers of 1.60, 1.90, and 2.16
[NASA-TP-2433] p 739 N85-29922
Effect of leading-edge load constraints on the design and performance of supersonic wings
[NASA-TP-2446] p 739 N85-29923
A theory of quasi-conical solutions of noninteger degree — flow fields on supersonic wings
[UTH-LR-420] p 744 N85-31024

**SUPERSONIC BOUNDARY LAYERS**
Instability and transition in supersonic boundary layers
p 5 A85-11625
The effect of cooling on supersonic boundary-layer stability p 77 A85-14239
Surface phenomena in a three-dimensional skewed shock wave/laminar boundary-layer interaction
p 80 A85-15336
Development of artificially induced perturbations in a supersonic boundary layer p 140 A85-16177
Experimental and numerical investigation of a shock wave impingement on a cylinder p 545 A85-35130
The separation of a turbulent boundary layer within a two-face angle before an obstruction
p 619 A85-37340
An experimental study of three-dimensional shock wave/turbulent boundary layer interactions in a supersonic flow
[AIAA PAPER 85-1566] p 711 A85-40691
Measurements of turbulent correlations in supersonic flows with longitudinal surface curvature
[AIAA PAPER 85-1656] p 715 A85-40754
Stability characteristics of a supersonic boundary layer and their relation to the position of the laminar-turbulent transition point p 730 A85-42123

**SUPERSONIC COMBUSTION RAMJET ENGINES**
Spectral methods for modeling supersonic chemically reacting flow fields
[AIAA PAPER 85-0302] p 219 A85-19651
A comparison of scramjet integral analysis techniques
p 420 A85-27099
Shock tunnel measurements of heat transfer in a model scramjet
[AIAA PAPER 85-0908] p 658 A85-37582
Numerical investigation of internal high-speed viscous flows using a parabolic technique
[AIAA PAPER 85-1409] p 632 A85-39768
Numerical simulation of flow through scramjet inlets using a three-dimensional Navier-Stokes code
[AIAA PAPER 85-1664] p 716 A85-40760
Langley Mach 4 scramjet test facility
[NASA-TM-86277] p 278 N85-16883

**SUPERSONIC COMPRESSORS**
Numerical simulation of unsteady flow in a compressor rotor cascade
[AIAA PAPER 85-0133] p 323 A85-26383

**SUPERSONIC CRUISE AIRCRAFT RESEARCH**
Supersonic cruise technology
[NASA-SP-472] p 617 N85-28912
Application of an aerodynamic analysis method including attainable thrust estimates to low speed leading-edge flap design for supersonic cruise vehicles
[NASA-CR-165843] p 739 N85-29918

**SUPERSONIC DIFFUSERS**
Simplified implicit block-bidiagonal finite difference method for solving the Navier-Stokes equations
p 695 A85-39003
Research on supersonic diffusers of centrifugal compressor by means of swirl flow. I - Flow in a diffuser at various Mach numbers p 728 A85-41624
The role of convective perturbations in supercritical inlet oscillations p 526 N85-22563

**SUPERSONIC DRAG**
The influence of leading-edge load alleviation on supersonic wing design p 144 A85-18515

**SUPERSONIC FLIGHT**
Aerodynamic configured missiles - Promise and future
[AIAA PAPER 85-0345] p 248 A85-19684
The representation of aircraft-external store-interferences under supersonic conditions
[DGLR PAPER 84-112] p 709 A85-40328
Supercruise for a STOL dogfighter
p 758 A85-42897
Supersonic aerodynamic characteristics of some reentry concepts for angles of attack up to 90 deg
[AIAA PAPER 85-1795] p 812 A85-43849
Selection of air intake parameters for supersonic-flow operation p 527 N85-22837
Supersonic cruise technology
[NASA-SP-472] p 617 N85-28912
China has developed a new version of fighter aircraft
[AD-A155293] p 830 N85-32118

**SUPERSONIC FLOW**
Supersonic flow past a blunt wedge p 2 A85-10113
The conditions of physical validity for a supersonic flow around a conical obstacle with a small aperture
p 3 A85-10413
Supersonic flow over a cone with power-law injection through the cone surface p 3 A85-10465
Spontaneous vapor condensation in nonequilibrium supersonic monodisperse flow p 47 A85-10550
The unified acoustic and aerodynamic prediction theory of advanced propellers in the time domain
[AIAA PAPER 84-2303] p 60 A85-10654
Interaction between a weak oblique shock wave and a turbulent boundary layer in purely supersonic flow
p 6 A85-12035
Metric-discontinuous zonal grid calculations using the Osher scheme p 6 A85-12151
Mass flux boundary conditions in linear theory
p 73 A85-12726
A numerical study of gas-particle supersonic flow past blunt bodies - The case of axisymmetric flow
p 74 A85-12771
Propulsive efficiency of an oscillating cylinder in supersonic flow p 140 A85-16181
Optimization of the aerodynamic characteristics of caret wings at supersonic flight speeds p 140 A85-16182
Supersonic motion of bodies in a gas with shock waves p 140 A85-16183
A random choice method for two-dimensional steady supersonic shock wave diffraction problems
p 141 A85-16531
An integral aproach to the determination of the asymptotic behavior of supersonic flow
p 141 A85-16918
The parameters of shock waves from bodies of revolution in a homogeneous atmosphere
p 142 A85-16919
Conical flow near external axial corners as a bifurcation problem p 145 A85-18676
Approximate factorization schemes for three-dimensional nonlinear supersonic potential flow
p 145 A85-18678
Treatment of supersonic flows with embedded subsonic regions p 145 A85-18681
A comparison of Euler and Navier-Stokes solutions for supersonic flow over a conical delta wing
[AIAA PAPER 85-0111] p 210 A85-19526
A procedure for the calculation of supersonic flows with strong viscous-inviscid interaction
[AIAA PAPER 85-0166] p 213 A85-19562
A study of compressible turbulent free shear layers using laser Doppler velocimetry
[AIAA PAPER 85-0177] p 213 A85-19569
Linearized potential flow analysis of complex aircraft configurations by HISSS, a higher order panel method
[AIAA PAPER 85-0281] p 217 A85-19632
The distortion of a supersonic turbulent boundary layer by bulk compression and surface curvature
[AIAA PAPER 85-0299] p 218 A85-19648
A study of the effects of numerical dissipation on the calculation of supersonic separated flows
[AIAA PAPER 85-0301] p 219 A85-19650
Spectral methods for modeling supersonic chemically reacting flow fields
[AIAA PAPER 85-0302] p 219 A85-19651
Shock induced vortices on elliptic cones in supersonic flow
[AIAA PAPER 85-0433] p 223 A85-19746
A three-dimensional adaptive grid method — for computational fluid dynamics
[AIAA PAPER 85-0486] p 225 A85-19783
Real-gas flowfields about three-dimensional configurations p 231 A85-21830
Shock-fitting solution of the supersonic flowfield in a rounded internal corner p 232 A85-21856
Computation of choked and supersonic turbomachinery flows by a modified potential method
p 232 A85-21859
Shock-free turbomachinery blade design
p 232 A85-21864
Flow behind an attached shock wave in a radiating gas p 233 A85-22308
An extremum problem concerning the shape of a body of revolution in supersonic gas flow p 234 A85-22371
A lower bound for three-dimensional turbulent separation in supersonic flow p 318 A85-25149
An improved model of shock waves in front of two-dimensional cascades p 318 A85-25213
General characteristic theory of aerodynamics with oblique curvilinear coordinate system
p 318 A85-25217
Experimental and theoretical investigations of the supersonic flow field on a two-dimensional step — German thesis p 318 A85-25448
Compressor cascades research using a helium-driven shock tube p 318 A85-25457
The shock wave from a supersonic projectile
p 319 A85-25467
Finite difference computations of flow about supersonic lifting bodies p 319 A85-25479
General features characterizing separated flows arising in supersonic and hypersonic flows past blunt bodies
p 388 A85-28380
Variational problems of gas dynamics - Formulations, methods of solution, and the relationship between exact and approximate approaches p 388 A85-28382
Supersonic flow past blunt porous screens
p 389 A85-28442
Euler and Navier-Stokes solutions for supersonic shear flow past a circular cylinder p 391 A85-29090
Flowfield investigation of a supercruise fighter model
p 392 A85-29256
A new approach to apply the potential gradient method for supersonic unsteady airloads
[AIAA PAPER 85-0596] p 469 A85-30325
The effect of the Mach number on the aerodynamic characteristics of a deformable body during its nonstationary motion p 472 A85-31491
A harmonic gradient method for unsteady supersonic flow calculations p 473 A85-32583
Design and testing of axisymmetric nozzles for ion-molecule reaction studies between 20 K and 160 K
p 596 A85-33537
Computation of steady supersonic flows by a flux-difference/splitting method p 545 A85-34735
Assessment of preliminary prediction techniques for wing leading-edge vortex flows at supersonic speeds
p 547 A85-35580
The split-coefficient matrix method for supersonic three dimensional flow p 550 A85-35771
Viscous influence in axisymmetric laminar supersonic flow over blunt bodies p 552 A85-36339
Validity of solution of three-dimensional linearised boundary value problem for axial disturbance velocity u in transonic-supersonic flow p 553 A85-36341
A supersonic panel method based on the triplet singularity p 617 A85-37191
Nonequilibrium supersonic flows past oscillating 2-D lifting surfaces and thin elastic bodies
p 618 A85-37197
Lift and drag of airfoils in nonuniform supersonic stream p 618 A85-37200
A system of shock and rarefaction waves in flows past bodies with complex shapes p 618 A85-37330
A supersonic inhomogeneous flow of an ideal gas around blunted bodies p 619 A85-37335
Investigation of three-dimensional separated flows
p 619 A85-37338
Determination of aerodynamic characteristics of bodies in weakly perturbed gas flows p 619 A85-37341
Numerical simulation of hypersonic viscous fore- and afterbody flows over capsule-type vehicles at angles of attack
[AIAA PAPER 85-0924] p 620 A85-37593
Experimental research on the effect of separation flow on ablation in supersonic turbulent flow
[AIAA PAPER 85-0975] p 694 A85-37625
Transition measurements via heat-transfer instrumentation on a 0.5 bluntness 9.75-deg cone at Mach 7 with and without mass addition
[AIAA PAPER 85-1004] p 621 A85-37645

Configuration of shock waves closing a local supersonic zone p 623 A85-38481
The isolated nature of solutions with a strong attached shock wave at the edges of a conical wing and a wedge p 623 A85-38486
Instability of plane-parallel supersonic gas flows in the linear approximation p 623 A85-38551
An extension of the generalized vortex-lattice method of supersonic sideslipping wings p 626 A85-38972
The free interaction in a supersonic flow over a porous wall p 626 A85-39021
Similarity properties in the problem of flow from a supersonic source past a spherical bluntness p 629 A85-39445
Numerical simulation of a supercritical inlet flow [AIAA PAPER 85-1214] p 630 A85-39658
PNS predicted shock location and jump conditions at supersonic and hypersonic speeds — Parabolized Navier-Stokes [AIAA PAPER 85-1407] p 632 A85-39766
Numerical investigation of internal high-speed viscous flows using a parabolic technique [AIAA PAPER 85-1409] p 632 A85-39768
Numerical calculation of subsonic jets in crossflow with reduced numerical diffusion [AIAA PAPER 85-1441] p 697 A85-39780
Flexible, adaptive walls for transonic wind tunnels in the subsonic and supersonic regions [DGLR PAPER 84-108A] p 777 A85-40325
Comparison of experiment and computation for a missile base region flowfield with a centered propulsive jet [AIAA PAPER 85-1618] p 714 A85-40725
Experimental and numerical investigation of supersonic flow through a square duct [AIAA PAPER 85-1622] p 714 A85-40728
Adaptive mesh solution for supersonic conical flow in a rectilinear inlet [AIAA PAPER 85-1626] p 714 A85-40732
Overlaid approach for base flow analysis at supersonic velocities. I - Basic model description. II - Applications including base combustion and multi-phase exhaust effects [AIAA PAPER 85-1673] p 716 A85-40762
Implicit/explicit analysis of interactive phenomena in: supersonic, chemically-reacting, mixing and boundary layer problems [AIAA PAPER 85-1717] p 790 A85-40785
A Mach 2.0 plus supersonic inlet study using the Navier-Stokes equations [AIAA PAPER 85-1211] p 720 A85-40820
An efficient iteration strategy for the solution of the Euler equations [AIAA PAPER 85-1529] p 803 A85-40961
External compression inlet predictions using an implicit, upwind, multiple zone approach [AIAA PAPER 85-1521] p 722 A85-40966
Studies on the flow in supersonic axial-flow compressor rotor. VI - A possibility of two-dimensional supersonic section having quasi-axisymmetric flows which satisfy simplified radial equilibrium p 723 A85-41007
A parabolized Navier-Stokes algorithm for separated supersonic internal flows [AIAA PAPER 85-1411] p 726 A85-41423
Implicit flux-split schemes for the Euler equations [AIAA PAPER 85-1680] p 803 A85-41743
Large-angle cone-shaped bodies in supersonic three-dimensional stream p 730 A85-42040
Estimation of the wave resistance of bodies of revolution with a front separation zone in supersonic flow p 730 A85-42119
The ideal-liquid concept in calculations on the detached flow around blunt objects with a turbulent shear layer at the boundary of the detachment region p 730 A85-42267
Flow structure capturing on overset patched meshes [AIAA PAPER 85-1690] p 731 A85-42690
Nonaxisymmetric, discontinuous body, second-order, linear, supersonic flow prediction [AIAA PAPER 85-1810] p 813 A85-43858
Full potential solutions of three-dimensional supersonic flows p 871 A85-49133
The rolling vortex-damping of supersonic wing p 872 A85-49705
Analytical solutions for unsteady Prandtl-Meyer flow p 873 A85-49710
Implementation of the supersonic triplet singularity into the USTORE computer code [CSIR-NIAST-83/47] p 8 N85-10006
PAN AIR: A computer program for predicting subsonic or supersonic linear potential flows about arbitrary configurations using a higher order panel method. Volume 3: Case manual (version 1.0) [NASA-CR-3253] p 13 N85-10922
An investigation of vortex-induced aerodynamic characteristics of supersonic cruise configurations [NASA-CR-174299] p 234 N85-15690
Recent advances in computational methods to solve the high-lift multi-component airfoil problem p 236 N85-16774
A numerical study of several supersonic flows p 325 N85-17995
A first-order Green's function approach to supersonic oscillatory flow: A mixed analytic and numeric treatment [NASA-CR-172207] p 327 N85-18002
LOVEL-84: A LOw-VELocity aerodynamic heating code for flat plates, wedges, and cones [DE85-002604] p 395 N85-19933
Determination of the drag of free flying particles in supersonic flow with a pulsed laser p 400 N85-21129
A semi-empirical unsteady transonic method with supersonic free stream p 555 N85-25179
Numerical calculation of subsonic jets in crossflow with reduced numerical diffusion [NASA-TM-87003] p 581 N85-25263
An experimental and analytical study of the aerodynamic interference effects between two Sears-Haack bodies at Mach 2.7 [NASA-TM-85729] p 560 N85-26673
Measurements of the symmetric aerodynamic coefficients for flat faced cylinders in the angle of attack regime 0 to 90 deg for transonic and supersonic speeds [FFA-TN-1984-04] p 561 N85-26675
Supersonic flow around blunt wedge p 636 N85-28158
Experimental and theoretical study of the longitudinal aerodynamic characteristics of delta and double-delta wings at Mach numbers of 1.60, 1.90, and 2.16 [NASA-TP-2433] p 739 N85-29922
Effect of leading-edge load constraints on the design and performance of supersonic wings [NASA-TP-2446] p 739 N85-29923
A first-order time-domain Green's function approach to supersonic unsteady flow [NASA-CR-172208] p 741 N85-29930
A theory of quasi-conical solutions of noninteger degree — flow fields on supersonic wings [UTH-LR-420] p 744 N85-31024
A supersonic potential gradient method for the calculation of unsteady aerodynamic pressures on harmonically oscillating wings [DFVLR-FB-85-11] p 744 N85-31026
Use of a hyperbolic grid generation scheme in simulating supersonic viscous flow about three-dimensional winged configuration [NASA-TM-85344] p 874 N85-34116

**SUPERSONIC FLUTTER**
A straight cascade wind-tunnel study of fan blade flutter in started supersonic flow [ONERA, TP NO. 1984-117] p 125 A85-15837
The effect of aerodynamic and structural detuning on turbomachine supersonic unstalled torsional flutter [AIAA PAPER 85-0761] p 506 A85-30378
On the theory of oscillating airfoils in supersonic and sonic flow p 814 A85-43925
The role of damping on supersonic panel flutter p 907 A85-48557

**SUPERSONIC HEAT TRANSFER**
Investigation of drag and heat transfer for nonuniform supersonic flow past a body in the cases of laminar and turbulent regimes p 388 A85-28387

**SUPERSONIC INLETS**
Improved supersonic performance for the F-16 inlet modified for the J79 engine p 314 A85-23391
Response of a supersonic inlet to downstream perturbations p 386 A85-27093
Control plate for shock-boundary layer interaction [AIAA PAPER 85-0523] p 387 A85-27877
Grid generation for inlet configurations using conformal mapping p 474 A85-32633
External compression supersonic inlet analysis using a finite difference two-dimensional Navier-Stokes code p 629 A85-39581
An inviscid computational method for supersonic inlets [AD-A145097] p 86 N85-12042
A mixed finite difference analysis of the internal and external transonic flow fields of inlets with centerbody p 446 N85-20192

**SUPERSONIC JET FLOW**
On the relationship between broadband shock associated noise and screech tones [AIAA PAPER 84-2276] p 59 A85-10838
Control of jet shock associated noise by a reflector [AIAA PAPER 84-2279] p 59 A85-10839
Viscous/inviscid analysis of curved sub- or supersonic wall jets p 145 A85-18677
Theoretical study on supersonic jet plumes p 206 A85-19439
Investigation of nonlinear effects in the instabilities and noise radiation of supersonic jets [AIAA PAPER 85-0081] p 304 A85-19507
Flow fields near bodies placed in rarefied subsonic and supersonic jets p 322 A85-26016
Gasdynamic model and similarity relations for the starting process in supersonic nozzles and jets p 384 A85-26494
Conical flows near edge breaks of surfaces dividing the supersonic wake flows of an ideal gas p 389 A85-28441
Self-oscillations in a jet impinging on a barrier p 394 A85-30109
Calculation of flow in the main part of a supersonic jet with allowance for the influence of the nozzle exit section p 815 A85-44131

**SUPERSONIC NOZZLES**
Design of asymmetric nozzles of maximum moment under additional conditions on geometric and force characteristics p 140 A85-16184
Effect of the arrangement of apertures on the gain coefficient during asymmetric gas injection into a Laval nozzle p 229 A85-20562
Condensation phenomena in supersonic nozzles p 393 A85-29989
Transonic flow in the throat region of radial or nearly radial supersonic nozzles p 626 A85-39001
Instabilities and transition in the wall boundary layers of low-disturbence supersonic nozzles [AIAA PAPER 85-1573] p 712 A85-40697

**SUPERSONIC SPEEDS**
Advances in high speed jet aeroacoustics [AIAA PAPER 84-2275] p 133 A85-13959
Analysis of counter-rotating propeller performance [AIAA PAPER 85-0005] p 282 A85-19453
Motion of a flexible wing at supersonic velocity under the effect of a random gust p 393 A85-30108
Observations from varying the lift and drag inputs to a noise prediction method for supersonic helical tip speed propellers [NASA-TM-83797] p 64 N85-10788
Supersonic aerodynamic characteristics of canard, tailless, and aft-tail configurations for 2 wing planforms [NASA-TP-2434] p 634 N85-27822
Supersonic cruise technology [NASA-SP-472] p 617 N85-28912
Lee-side flow over delta wings at supersonic speeds [NASA-TP-2430] p 739 N85-29921
Two approaches for the prediction of plume-induced separation [AD-A154098] p 741 N85-29935

**SUPERSONIC TRANSPORTS**
A comparative evaluation of certain promising gas-turbine engines of foreign manufacturers in terms of their thrust characteristics and fuel efficiency p 660 A85-39106
Readying technology for a super SST p 755 A85-41054
Effects of leading-edge devices on the low-speed aerodynamic characteristics of a highly-swept arrow-wing [NASA-CR-172531] p 478 N85-22365
Supersonic cruise technology [NASA-SP-472] p 617 N85-28912
Study of an efficient long-range Mach 2.7 supersonic transport configuration concept [NASA-TM-86414] p 829 N85-32110

**SUPERSONIC TURBINES**
The addition of quasi-three-dimensional terms into a finite element method for transonic turbomachinery blade-to-blade flows p 386 A85-26920

**SUPERSONIC WAKES**
The computational treatment of supersonic wake flows in INCOREL [AIAA PAPER 85-0304] p 219 A85-19653
Vortex path in the supersonic wake of a rough even plate — German thesis p 226 A85-19821
Conical flows near edge breaks of surfaces dividing the supersonic wake flows of an ideal gas p 389 A85-28441

**SUPERSONIC WIND TUNNELS**
Developments in aerothermal test techniques at the AEDC supersonic-hypersonic wind tunnels [AIAA PAPER 85-1003] p 681 A85-37644
Surface pressure fluctuations in a three-dimensional shock wave/turbulent boundary layer interaction at various shock strengths [AIAA PAPER 85-1562] p 711 A85-40687
Supersonic aerodynamic characteristics of elliptic cross section bodies [AIAA PAPER 85-1607] p 713 A85-40719
Interaction between shock waves and boundary layers induced by sharp fin p 723 A85-40999
Investigation of light source and scattering medium related to vapor-screen flow visualization in a supersonic wind tunnel [NASA-TM-86290] p 190 N85-15144
The S2MA wind tunnel at the Modane-Avrieux aerodynamic test center [ESA-TT-862] p 361 N85-18071

Aeronautical facilities catalogue. Volume 1: Wind tunnels
[NASA-RP-1132] p 361 N85-18991

Transonic and supersonic wind tunnel tests on control effectiveness on schematic missile configurations
[FFA-TN-1983-20] p 743 N85-31020

Transonic and supersonic wind tunnel tests on control effectiveness on schematic missile configurations: Supplement
[FFA-TN-1983-20-SUPPL] p 743 N85-31021

**SUPERSONICS**

Supersonic cruise technology
[NASA-SP-472] p 617 N85-28912

**SUPPLYING**

Chronic fuel shortages in Volga civil aviation administration p 596 N85-25198

**SUPPORT SYSTEMS**

A cost-effective integrated diagnostics support system
p 439 A85-26797

Automating the decision support for ATE operations management p 456 A85-26836

Supportability engineering why, how, when, who
p 381 A85-26850

Fabrication and testing of a brazed multipiece beryllium support structure for tactical sensors
[AIAA PAPER 85-0679] p 522 A85-30260

Army aviation maintenance data and supportability interface p 485 A85-31980

The development of maintenance and supply support of multi-mission helicopters operating from multiple locations p 486 A85-31984

Supportability considerations for advanced engine development
[AIAA PAPER 85-1205] p 665 A85-39655

UH-60A external stores support system fixed provision fairings drag determination
[AD-A147188] p 256 N85-15719

**SUPPORTS**

Remote pivot decoupler pylon: Wing/store suppression
[NASA-CASE-LAR-13173-1] p 416 N85-19981

Low-profile fastener
[AD-D011667] p 796 N85-30343

**SURFACE COOLING**

The effect of cooling on supersonic boundary-layer stability p 77 A85-14239

Cooling of a turbine profile in the case of air injection through porous areas p 352 A85-25822

Acquisition of detailed heat transfer behavior in complex internal flow passages
[SAE PAPER 841503] p 695 A85-39081

Unsteady heat transfer due to time-dependent free stream velocity p 699 N85-27947

**SURFACE CRACKS**

Bonded repairs to surface flaws — by adhesive BFRP patching p 137 A85-16245

Crack propagation analysis of longitudinal skin cracks in a pressurized cabin p 645 A85-37188

Concepts and application of aircraft damage tolerance analysis p 645 A85-37206

Laboratory studies related to in-flight acoustic emission monitoring p 905 A85-47428

Modifications of flight by flight load sequences to provide for good fracture surface readability p 532 N85-24330

**SURFACE DEFECTS**

The effects of surface discontinuities on convective hear transfer in hypersonic flow
[AIAA PAPER 85-0971] p 620 A85-37621

Electric Current Perturbation inspection of selected retirement-for-cause turbine engine components
p 906 A85-47474

Manufacturing tolerances for natural laminar flow airframe surfaces
[SAE PAPER 850863] p 884 A85-50103

Exploratory development of advanced surface flaw detection methods
[AD-A148757] p 354 N85-18060

**SURFACE DISTORTION**

The measurements of drag resulting from small surface irregularities immersed in turbulent boundary layers
p 126 A85-15937

**SURFACE EFFECT SHIPS**

Development of asymptotic algorithms in the Polet package of applications programs — for sea surface effect vehicle design p 233 A85-22366

Detection, classification, and extraction of helicopter-radiated noise
[AD-A145993] p 134 N85-12661

**SURFACE FINISHING**

Improved surface preparation of AM355 for adhesive bonding p 180 A85-15899

The discrete nature of the motion of a system during surface working p 524 A85-31473

New processing techniques for automated chemical removal of surface metal
[DGLR PAPER 84-085] p 789 A85-40305

DoD Robotics Application Workshop Proceedings
[AD-A145867] p 71 N85-11978

Air force, robotic painting
[AD-P004006] p 126 N85-11986

Initial investigation of cryogenic wind tunnel model filler materials
[NASA-TM-86363] p 380 N85-18069

Performance improvements from surfacing in aero engine components
[PNR-90257] p 891 N85-34142

Results of tests of weathered K5NA closeout material in the MSFC Hot Gas Facility
[NASA-CR-170893] p 902 N85-35239

**SURFACE GEOMETRY**

Conical bodies with a star-shaped transverse cross section, having a reserve of static stability
p 229 A85-20557

The use of functional splines for constructing aircraft surfaces p 534 A85-31486

Measurements of turbulent correlations in supersonic flows with longitudinal surface curvature
[AIAA PAPER 85-1656] p 715 A85-40754

Quick geometry generation and surface mesh partition for arbitrary 3-D bodies p 759 A85-43242

Semianalytic modeling of aerodynamic shapes
[NASA-TP-2413] p 398 N85-21120

**SURFACE LAYERS**

Aeroproyekt develops improved runway surfacing
p 277 N85-16770

A survey of the turbulence in the marine surface layer for the operation of low-Reynolds number aircraft
[AD-A154133] p 800 N85-30558

**SURFACE NAVIGATION**

Institute of Navigation, Annual Meeting, 39th, Houston, TX, June 20-23, 1983, Proceedings p 91 A85-13442

Equipment for a maritime user of the Global Positioning System (GPS) p 337 A85-25820

Satellite navigation systems for the USSR merchant marine p 408 A85-27807

Design aspects, performance analysis and test results of a strapdown single gyro attitude and heading reference p 822 A85-45021

**SURFACE PROPERTIES**

Measurements of water film characteristics on airfoil surfaces from wind-tunnel tests with simulated heavy rain
[AIAA PAPER 85-0259] p 274 A85-19818

Scale-model tests of airfoils in simulated heavy rain
p 548 A85-35590

Approximate relationships for determining pressure at the surface of a sphere or a cylinder for arbitrary free-stream Mach numbers p 624 A85-38563

Scattering from a periodic array of conducting bars of finite surface resistance p 794 A85-42015

Variational principle for two dimensional flows of the compressible ideal fluid with incontinuous surfaces
p 909 A85-49704

Flow separation induced by periodic aerodynamic interference
[AD-P004174] p 325 N85-17959

Calculating heat transfer coefficients for turbine profiles taking surface curvature and elevated flow turbulence into account p 371 N85-18212

Runway rubber removal specification development field evaluation procedures development
[FAA-PM-84-27] p 430 N85-21179

**SURFACE REACTIONS**

Effect of variable surface catalysis on heating near the stagnation point of a blunt body
[AIAA PAPER 85-0248] p 323 A85-28386

Three-dimensional nonequilibrium viscous flow over the Shuttle Orbiter with catalytic surface effects
p 362 A85-29301

The problems arising in testing of carbon-based materials for structural components of airframes
p 686 A85-37339

Effects of surface chemistry on hot corrosion life
[NASA-CR-174915] p 582 N85-26711

The role of surface generated radicals in catalytic combustion p 671 N85-27869

**SURFACE ROUGHNESS**

A combined visualization-anemometry study of the turbulent drag reducing mechanisms of triangular micro-groove surface modifications
[AIAA PAPER 85-0548] p 369 A85-25941

Developments in aerothermal test techniques at the AEDC supersonic-hypersonic wind tunnels
[AIAA PAPER 85-1003] p 681 A85-37644

Turbulent boundary layers over rough surfaces hypersonic flow
[AD-A145040] p 10 N85-10016

Analysis for leakage and rotordynamic coefficients of surface roughened tapered annular gas seals
p 186 N85-14135

Investigation of the conditions for tripping transition with roughness elements and their influence on boundary layer development p 480 N85-23720

Generation of marker lines on fatigue fracture surfaces p 532 N85-24328

Proceedings of the 9th US Air Force and the Federal Republic of Germany Data Exchange Agreement Meeting. Viscous and Interacting Flow Field Effects
[AD-A153020] p 699 N85-28286

**SURFACE ROUGHNESS EFFECTS**

Drag and aeroacoustic noise characteristics generated by surfaces featuring coupled roughness and blowing
p 48 A85-11620

On the generation of sound by turbulent boundary layer flow over a rough wall p 133 A85-13724

A simple and safe takeoff or landing procedure with wing surface contaminations p 155 A85-16239

Turbulent roughness drag due to surface waviness at low roughness Reynolds numbers p 161 A85-16243

Vortex path in the supersonic wake of a rough even plate — German thesis p 226 A85-19621

The performance of smooth-wall drag reducing outer-layer devices in rough-wall boundary layers
[AIAA PAPER 85-0556] p 369 A85-25947

Effects caused by small discrete two-dimensional roughness elements immersed in turbulent boundary layers p 908 A85-49351

**SURFACE STABILITY**

Development of a preliminary ALRS stabilized material pavement analysis system (SPAS)
[AD-A147116] p 277 N85-15760

**SURFACE TEMPERATURE**

Analytical fuel property effects: Small combustors, phase 2
[NASA-CR-174848] p 365 N85-19175

Fabrication of ceramic substrate-reinforced and free forms
[NASA-TM-86994] p 518 N85-23926

**SURFACE VEHICLES**

Structural crashworthiness; International Symposium, 1st, University of Liverpool, Liverpool, England, September 14-16, 1983, Invited Lectures p 47 A85-10824

The influence of aircraft turbomachine technology on vehicular turbocharger design p 793 A85-41830

Automatic land vehicle navigation using road map data
[DE84-017176] p 338 N85-18043

Planning of air cushion transport vehicles
p 530 N85-24160

**SURFACES**

Incompressible lifting-surface aerodynamics for a rotor-stator combination
[NASA-TM-83767] p 86 N85-12039

Unsteady transonic flow calculations for interfering lifting surface configurations
[NASA-TM-86432] p 741 N85-29931

Removable cleanable antireflection shield
[AD-D011735] p 863 N85-33910

**SURGES**

Turbofan-engine nonrecoverable stall computer-simulation development and validation
[AIAA PAPER 85-1432] p 765 A85-40840

A consideration concerning stall and surge limitations within centrifugal compressors. II p 793 A85-41821

A study of the physical mechanisms and the perturbations created by the attachment of an arc to a conducting cylinder
[ONERA, TP NO. 1985-47] p 904 A85-47258

Surge transient simulation in turbo-jet engine
p 169 N85-13795

On one design principle of surge protector for gas turbine engine compressor p 370 N85-18206

A theory of post-stall transients in multistage axial compression systems
[NASA-CR-3878] p 398 N85-21117

**SURVEILLANCE**

An approach to the multi-sensor integration problem — for aerial surveillance p 93 A85-14440

Multi-sensor surveillance performance evaluation tool — using computerized simulation
[AIAA PAPER 84-2631] p 193 A85-17627

TCAS II: Design and validation of the high-traffic-density surveillance subsystem
[DOT/FAA/PM-84/5] p 489 N85-22375

**SURVEILLANCE RADAR**

FAA's new terminal radar, the ASR-9 incorporates a separate weather channel p 15 A85-12080

Using satellites to improve civilian aircraft surveillance coverage
[AIAA PAPER 84-2405] p 91 A85-13812

Aircraft track initiation with space based radar
p 93 A85-14440

Secondary surveillance radar mode S potential applications and future requirements in Europe
[AIAA PAPER 84-2735] p 153 A85-17882

Ramp's new primary surveillance radar --- Radar Modernization Project p 153 A85-18145

Experimental analysis of an innovations-based detection algorithm for surveillance radar p 336 A85-25102

The plan for an integrated FAA surveillance and weather system p 407 A85-27526

Design of a new airport surveillance radar (ASR-9) p 408 A85-27832

Airport surface detection equipment p 408 A85-27833

Multifunction rotating electronically scanned radar (RESR) for air surveillance p 408 A85-27837

The interceptor radar evolves as a sensor p 409 A85-27847

Tethered aerostat operations in the marine environment
[AIAA PAPER 85-0860] p 640 A85-38778

Design and realization of a multiradar tracking system for air traffic control
[ENST-84E010] p 338 N85-18044

The use of small mobile radars to detect, monitor, and quantify bird movements
[AD-P004188] p 403 N85-19951

On the altitudinal distribution of birds and bird strikes in the Netherlands
[AD-P004189] p 404 N85-19952

Development concerns for satellite-based air traffic control surveillance systems p 489 N85-23816

**SURVEYS**

General aviation activity and avionics survey
[AD-A148572] p 384 N85-21103

A community survey of helicopter noise annoyance conducted under controlled noise exposure conditions
[NASA-TM-86400] p 538 N85-23374

Research on the effect of noise at different times of day: Models, methods and findings
[NASA-CR-3888] p 539 N85-23375

**SURVIVAL**

Advanced escape systems p 877 A85-49625

Aviation safety (aircraft passenger survivability and cabin safety)
[GPO-39-847] p 878 N85-34130

**SURVIVAL EQUIPMENT**

Development and testing of the Martin-Baker crashworthy seat p 340 A85-22753

**SUSPENDING (HANGING)**

A Lagrange-D'Alembert formulation of the equations of motion of a helicopter carrying an externally suspended load
[NASA-TM-85864] p 416 N85-21149

**SUSPENDING (MIXING)**

The motion of a spherical particle suspended in a turbulent flow near a plane wall p 444 A85-29056

**SUSPENSION SYSTEMS (VEHICLES)**

Low-profile fastener
[AD-D011667] p 796 N85-30343

**SWEAT COOLING**

Advanced liner-cooling techniques for gas turbine combustors
[AIAA PAPER 85-1290] p 667 A85-39703

Advanced liner-cooling techniques for gas turbine combustors
[NASA-TM-86952] p 397 N85-21115

**SWEDEN**

Finnair, LOT, SAS reps in USSR on present operations, plans p 333 N85-18035

**SWEEP EFFECT**

Experimental investigation of the sweep effects on a helicopter blade tip
[ONERA, TP NO. 1984-81] p 7 A85-12610

Some effects of sweep direction and strakes for wings with sharp leading edges p 78 A85-14851

Flutter of swept fan blades
[ASME PAPER 84-GT-138] p 526 A85-32962

Benefits of blade sweep for advanced turboprops
[AIAA PAPER 85-1290] p 787 A85-41420

Design of a basic profile for a low sweep airfoil. Part 2: Experimental investigation on the DFVLR-W1 airfoil profile in the Brunswick transonic wind tunnel
[DFVLR-FB-85-01-PT-2] p 635 N85-27833

**SWEPT FORWARD WINGS**

The forward swept wing and the Grumman X-29A p 4 A85-10546

Divergence speed degradation of forward-swept wings with damaged composite skin p 18 A85-11988

The X-29 flight-research program p 102 A85-13895

Some engineering aspects of the X-29 airplane p 155 A85-16064

Applicability of a panel method, which includes nonlinear effects, to a forward-swept-wing aircraft
[AIAA PAPER 84-2402] p 139 A85-16105

Forward sweep - The pros and cons p 250 A85-20146

Design verification testing of the X-29 graphite/epoxy wing covers p 415 A85-30163

Transonic test of a forward swept wing configuration exhibiting Body Freedom Flutter
[AIAA PAPER 85-0689] p 491 A85-30356

The X-29 - Is it coming or going? p 572 A85-34699

On the effect of wing taper and sweep direction on leading edge transition p 545 A85-35000

Investigation on configurations in longitudinal direction wind-tunnel testing of forward swept wings p 625 A85-38969

Experimental aeroelastic behavior of unswept and forward-swept cantilever graphite/epoxy wings p 758 A85-42932

Quantitative synthesis of highly uncertain, multiple input-output, flight control system for the forward swept wing X-29 aircraft p 841 A85-45055

Forward-Swept Wing control system development p 894 A85-49011

The development of a dynamic model of a generalised combat aircraft with forward wings for the identification of stability and control characteristics
[CAR-84-33] p 343 N85-18050

Active control of forward swept wings with divergence and flutter aeroelastic instabilities p 356 N85-18063

Multivariable control law design for the X-29 aircraft
[AD-A151828] p 576 N85-25259

Active control of forward swept wings with divergence and flutter aeroelastic instabilities
[AD-A151837] p 585 N85-25270

Some effects of sweep direction and strakes for wings with sharp leading edges
[CA-8421] p 634 N85-27826

X-29 digital flight control system design p 677 N85-27889

The static aeroelasticity of a composite wing p 701 N85-29321

**SWEPT WINGS**

Induced drag and lift of wing by the piecewise continuous kernel function method p 6 A85-11976

A method for designing three-dimensional configurations with prescribed skin friction p 6 A85-11989

On the stability of an infinite swept attachment line boundary layer p 75 A85-13723

Calculation of streamlines from wall pressures on a fusiform body p 79 A85-14894

The aerodynamic behavior of infinite swept wings - Another point of view p 144 A85-18517

Three-dimensional effects on a pitching lifting surface
[AIAA PAPER 85-0041] p 208 A85-19476

Disturbance-wave interactions in flows with crossflow
[AIAA PAPER 85-0494] p 226 A85-19788

Experiments on the stability of crossflow vortices in swept-wing flows
[AIAA PAPER 85-0493] p 231 A85-20873

Experimental and theoretical study of transition phenomena on an infinite swept wing p 317 A85-24804

Unsteady transonic phenomena around highly swept wings p 322 A85-26025

Computation of three-dimensional viscous flows using a space-marching method p 392 A85-29259

Calculation of aerodynamic characteristics of winglets and experimental verification p 393 A85-29692

An integral method for calculating the effects on turbulent boundary-layer development of sweep and taper p 470 A85-30994

Aerodynamics of swept wings of medium and small aspect ratios. I p 473 A85-32517

Conical similarity of shock/boundary-layer interactions generated by swept and unswept fins p 626 A85-38984

Comparison of advanced turboprop installation on swept and unswept supercritical wings at transonic speeds
[AIAA PAPER 85-1264] p 630 A85-39686

The static aeroelasticity of the anisotropic wing
[DGLR PAPER 84-158] p 752 A85-40267

The buffeting pressure field of a high-aspect-ratio swept wing
[AIAA PAPER 85-1609] p 714 A85-40720

Analysis of transitional separation bubbles on infinite swept wings
[AIAA PAPER 85-1685] p 717 A85-40770

Aerodynamic characteristics of swept propellers p 723 A85-40981

Computation of turbulent separated flows over wings p 737 A85-42991

An examination of turbulence models for a separating three-dimensional turbulent boundary layer
[ONERA, TP NO. 1985-74] p 904 A85-47273

Experiments suitable for wind tunnel wall interference assessment/correction p 83 N85-12021

Design of a basic airfoil for a slightly swept wing. Part 1: Theoretical transonic airfoil design
[DFVLR-FB-84-19-PT-1] p 86 N85-12043

Experimental study on transonic flutter characteristics of sweptback wing with core composite plates having different fiber orientations
[NAL-TR-827] p 173 N85-14842

Application of two and three-dimensional criteria for calculating transitions and boundary layers over swept wings p 237 N85-16783

Full scale experiments into the use of large eddy breakup devices for drag reduction on aircraft p 257 N85-16790

Joined wing transonic design and test validation
[AD-A148355] p 239 N85-16834

Unsteady stall penetration of an oscillating swept wing
[AD-P004156] p 323 N85-17941

Effects of leading-edge devices on the low-speed aerodynamic characteristics of a highly-swept arrow-wing
[NASA-CR-172531] p 476 N85-22365

Calculation of vortex-flap aerodynamic characteristics
[NASA-CR-175624] p 476 N85-22367

Calculation of unsteady transonic flow around a high swept wing p 555 N85-25184

La Recherche Aerospatiale Bimonthly Bulletin, Number 1984-4, 221/July-August
[ESA-TT-884] p 543 N85-26637

On the effect of wing taper and sweep direction on leading edge transition
[CA-8435] p 634 N85-27827

Effect of leading-edge load constraints on the design and performance of supersonic wings
[NASA-TP-2446] p 739 N85-29923

Selecting step sizes in sensitivity analysis by finite differences
[NASA-TM-86382] p 856 N85-33538

**SWEPTBACK WINGS**

On the effect of wing taper and sweep direction on leading edge transition p 545 A85-35000

Effects of viscosity and modes on transonic aerodynamic and aeroelastic characteristics of wings p 817 A85-45837

Experience with transonic unsteady aerodynamic calculations p 554 N85-25176

Some effects of sweep direction and strakes for wings with sharp leading edges
[CA-8421] p 634 N85-27826

Experimental and theoretical study of the longitudinal aerodynamic characteristics of delta and double-delta wings at Mach numbers of 1.60, 1.90, and 2.16
[NASA-TP-2433] p 739 N85-29922

Design of a basic airfoil for a slightly swept wing. Part 1: Theoretical transonic airfoil design
[ESA-TT-892] p 761 N85-31054

**SWIRLING**

Flow visualization of lateral jet injection into swirling crossflow
[AIAA PAPER 85-0059] p 209 A85-19490

Calculation of confined swirling flows
[AIAA PAPER 85-0060] p 285 A85-19491

An experimental investigation of the mixing of co-annular swirling flows
[AIAA PAPER 85-0186] p 230 A85-20862

Swirling flow in a research combustor p 283 A85-21863

Effects of an S-inlet on the flow in a dump combustor p 392 A85-29323

The effect of a small blowing on vortex-breakdown of a swirling flow p 393 A85-29964

Influence of the blockage ratio on the efficiency of swirl generation with vane swirlers
[AIAA PAPER 85-1103] p 696 A85-39605

Circular-to-rectangular transition ducts for high-aspect ratio nonaxisymmetric nozzles
[AIAA PAPER 85-1346] p 632 A85-39738

Research on supersonic diffusers of centrifugal compressor by means of swirl flow. I - Flow in a diffuser at various Mach numbers p 728 A85-41824

The propagation of acoustic modes in the annular circular duct of turbomachinery in the presence of swirling mean flow p 861 A85 44041

Flow modifying device
[NASA-CASE-LEW-13562-2] p 892 N85-35195

**SWITCHES**

LED multifunction keyboard engineering study
[AD-A145199] p 24 N85-10061

High-temperature optically activated GaAs power switching for aircraft digital electronic control
[NASA-CR-174711] p 116 N85-12901

**SWITCHING CIRCUITS**

The switched network approach to high speed communications p 822 A85-44994

**SYMMETRY**

Downwash in the plane of symmetry of an elliptically loaded wing
[NASA-TP-2414] p 235 N85-15693

**SYNCHRONISM**
A validation methodology for fault-tolerant clock synchronization
[AIAA PAPER 84-2648] p 193 A85-17835
Experiences with nonsynchronous forced vibration in centrifugal compressors p 187 N85-14119
**SYNCHRONIZERS**
Hydraulic forces on a centrifugal impeller undergoing synchronous whirl p 187 N85-14124
**SYNCHRONOUS MOTORS**
Lift and thrust of a linear synchronous engine with a solid-conductor stator winding p 658 A85-37550
**SYNCHRONOUS PLATFORMS**
Full load testing in the platform module prior to tow-out: A case history of subsynchronous instability
p 186 N85-14117
**SYNCHRONOUS SATELLITES**
Orbit control of a synchronous satellite — Russian book p 899 A85-49448
**SYNCHROPHASING**
Noise control characteristics of synchrophasing - An analytical investigation — of turboprop aircraft noise
[AIAA PAPER 84-2369] p 17 A85-10898
Noise control characteristics of synchrophasing - An experimental investigation — on aircraft fuselage model
[AIAA PAPER 84-2370] p 17 A85-10899
An improved source model for aircraft interior noise studies
[AIAA PAPER 85-0787] p 537 A85-30389
An improved source model for aircraft interior noise studies
[NASA-CR-172517] p 305 N85-17668
**SYNOPTIC METEOROLOGY**
On the state of knowledge on meteorologically caused icing of aircraft in clouds
[ESA-TT-861] p 801 N85-31736
**SYNTAX**
Evaluating syntactic constraints to speech recognition in a fighter aircraft environment
[AD-A152117] p 607 N85-27119
**SYNTHESIS (CHEMISTRY)**
Fire-resistant phosphorus containing polyimides and copolyimides
[NASA-CASE-ARC-11522-2] p 901 N85-34280
**SYNTHETIC APERTURE RADAR**
Depth of field for SAR with aircraft acceleration
p 91 A85-12664
The main characteristics of a synthetic-aperture radar in the case of arbitrary motion of the flight vehicle
p 96 A85-15687
A multipurpose synthetic aperture radar
p 335 A85-24887
Advanced SAR system maps Arctic regions
p 441 A85-27841
Stereo models from synthetic aperture radar
p 533 A85-30961
Construction of a special computer for image production using synthetic aperture radar — German thesis
p 834 A85-45550
The use of synthetic aperture radar imagery to detect hazards to navigation
[AD-A149324] p 339 N85-18971
Autofocus motion compensation for synthetic aperture radar and its compatibility with strapdown inertial navigation sensors on highly maneuverable aircraft
[AD-A151940] p 569 N85-26693
**SYNTHETIC FUELS**
A comparison of two bench scale tests of fuel low temperature flow properties
[AD-A154477] p 788 N85-31311
Aspects of high-resolution gas chromatography as applied to the analysis of hydrocarbon fuels and other complex organic mixtures. Volume 1
[AD-A156154] p 902 N85-35257
**SYSTEM EFFECTIVENESS**
An approach to automatic FLIR video assessment
p 182 A85-16650
U.S. Navy experience with side-by-side unsequenced escape in A-6 series aircraft lessons to be learned (1 January 1969 through 31 December 1979)
p 331 A85-22768
The RS-700 series of infrared line scanners
p 347 A85-24254
MSG-3 as viewed by the manufacturer (was it effective?) — Maintenance Steering Group
[SAE PAPER 841482] p 312 A85-25989
An evaluation of the exhaust system configuration from the cruise efficiency criteria of an engine in an aircraft system p 660 A85-39121
Maintenance Management Information and Control System (MMICS): Administrative boon or burden
[AD-A145762] p 136 N85-12790
Effectiveness of agricultural aviation
p 106 N85-13460
Operation of aviation support bases
p 118 N85-13461
Flying qualities and control system characteristics for superaugmented aircraft
[NASA-CR-170419] p 173 N85-13800
Army aviation today and tomorrow
p 139 N85-14610
S-3A ballast block final design and engineering tests
[AD-A147685] p 243 N85-16842
Transmission efficiency measurements and correlations with physical characteristics of the lubricant
p 521 N85-23781
Combinatorial performance/cost analysis of an autonomous navigation system for aircraft
p 568 N85-26640
**SYSTEM FAILURES**
Electronic control and monitoring of aircraft secondary flying controls p 156 A85-17324
A minimum interruption ac electric power generating system for avionics
[AIAA PAPER 84-2742] p 168 A85-17895
Use of the pseudo-inverse for design of a reconfigurable flight control system
[AIAA PAPER 85-1900] p 844 A85-45915
The application of the detection filter to aircraft control surface and actuator failure detection and isolation
[AIAA PAPER 85-1973] p 845 A85-45954
Generic faults - The first word — flight control system errors
[AIAA PAPER 85-1979] p 856 A85-45957
A real-time FORTRAN implementation of a sensor failure detection, isolation and accommodation algorithm
p 917 A85-47704
Squadron Maintenance and Repair Techniques (SMART) validation test report p 866 A85-49584
How to handle failures in advanced flight control systems of future transport aircraft p 679 N85-27905
**SYSTEM IDENTIFICATION**
The need for system identification in flight mechanics, taking into account the benefits of such an identification
p 175 A85-18714
PADDS - A Portable Airborne Digital Data System
p 418 A85-28652
On the identification of a highly augmented airplane
p 584 A85-35979
Application of system identification techniques to poststall combustor dynamics
[AIAA PAPER 85-1353] p 669 A85-39743
Identification of quasi-steady in-stall compressor maps from transient data
[AIAA PAPER 85-1351] p 765 A85-40837
Identification of linear dynamic control plants by means of signal expansion on the basis of the Walsh function
p 803 A85-42675
Technology considerations of Integrated Communication Navigation Identification Avionics (ICNIA) p 823 A85-45131
Nonlinear system identification methodology development based on F-4S flight test data analysis
[AD-A146289] p 105 N85-12053
Identification of gust input and gust response characteristics from Do 28 TNT flight test data
[DFVLR-FB-84-48] p 676 N85-27881
**SYSTEMS ANALYSIS**
Multidisciplinary analysis and synthesis - Needs and opportunities — for aerospace design
[AIAA PAPER 85-0584] p 534 A85-30227
Optimization of queuing disciplines in multiphase closed queuing systems p 534 A85-31463
Iterative queueing network techniques for the analysis of large maintenance facilities p 535 A85-33299
Energy efficient engine. Volume 1: Component development and integration program
[NASA-CR-173084] p 34 N85-10992
Aeroelastic stability analysis with interacting structural nonlinearities p 55 N85-11364
Operational requirements - system concepts
p 161 N85-14823
**SYSTEMS ENGINEERING**
The approach to optical system designs for aircraft head up displays p 22 A85-10628
Volume phase holograms and their application to avionic displays p 47 A85-10634
A system approach for designing a crashworthy helicopter using program KRASH
[AIAA PAPER 84-2448] p 98 A85-13538
The role of modern control theory in the design of controls for aircraft turbine engines p 109 A85-13627
Nonlinear model simplification in flight control system design p 114 A85-13631
The Geostar Satellite Navigation and Communications System p 94 A85-14829
Digital Avionics Systems Conference, 6th, Baltimore, MD, December 3-6, 1984, Proceedings
p 137 A85-17801
IDAS - An Interactive Design and Analysis System — for aircraft
[SAWE PAPER 1515] p 195 A85-18807
Friendly ejection seat trajectory computer program
p 330 A85-22754
Operational benefits and design approaches for combining JTIDS and GPS navigation
p 336 A85-25195
Environmental control systems (ECS) - Compromise and trade-off p 342 A85-26309
System concepts/real-time parameters for a MIL-STD-1553B intermediate level tester
p 456 A85-26790
Supportability engineering why, how, when, who
p 381 A85-26850
Design of a new airport surveillance radar (ASR-9)
p 408 A85-27832
Lear Fan Model 2100 emergency Egress System
p 401 A85-28640
High dynamic, low volume GPS receiver
p 487 A85-32206
Systems for the Airbus A320 - Innovation in all directions p 571 A85-33869
Commercial aviation GPS Navigation Set architecture
p 644 A85-38538
System engineering takes the byte out of MIL-STD-1553 — avionics data bus p 832 A85-44999
Flow Cones for airplane flight test flow visualization
p 903 A85-47085
Adaptive operation of escape systems - A look at design requirements p 884 A85-49945
A production peripheral vision display system
p 24 N85-10059
System engineering and integration contract for implementation of the National Airspace System Plan. Volume 2: Section 5.0
[AD-A145710] p 16 N85-10929
Avionics Integrity Program (Avip). Volume 2: Hardware case studies
[AD-A145689] p 25 N85-10944
Combustion system for radiation investigations
p 33 N85-10986
Characteristics of systems engineering in aviation science research
[AD-A145602] p 67 N85-11899
Activities report of the Department of Engineering
p 127 N85-12202
System status display information
[NASA-CR-172347] p 107 N85-12889
Attack helicopter (AH-1T) cockpit systems integration
p 161 N85-14826
United States Air force aircraft modification process: A system dynamics analysis
[AD-A148954] p 200 N85-15659
Automatic briefing and mission management systems for battlefield support p 259 N85-16799
Development and flight test of a helicopter compact, portable, precision landing system concept
p 261 N85-16821
Open-cycle centrifugal vapor-compression heat pump
[PB85-113405/GAR] p 372 N85-18348
Integrated control system engineering support
[AD-A149742] p 426 N85-21177
Advanced life analysis methods. Volume 5: Executive summary and damage tolerance criteria recommendations for attachment lugs
[AD-A151017] p 502 N85-23761
Design adequacy: An effectiveness factor
p 606 N85-26642
Simulation: A tool for cost-effective systems design and live test reduction p 613 N85-26657
Technical evaluation report on the Flight Mechanics Symposium on Active Control Systems: Review, Evaluation and Projections
[AGARD-AR-220] p 588 N85-26730
X-29A digital flight control system design
p 589 N85-26736
ACT flight research experience p 589 N85-26741
Operational and developmental experience with the F/A-18A digital flight control system
p 589 N85-26742
Flight testing and development of the F/A-18A digital flight control system p 590 N85-26743
Analysis of control system from a viewpoint of desired pole placement and desired degree of robustness
[AD-A152627] p 675 N85-27876
The gust simulation apparatus of the 3m x 3m low speed wind tunnel of the DFVLR in Goettingen, West Germany
[DFVLR-FB-85-04] p 684 N85-27920
Evaluation of a fault tolerant system for an integrated avionics sensor configuration with TSRV flight data
[NASA-CR-172589] p 657 N85-28941
The development of complex systems
p 807 N85-32021
R and D programmes at the National Aeronautical Laboratory
[AR-22] p 807 N85-32022
R and D activities of the Systems Engineering Division
p 808 N85-32027

**SYSTEMS INTEGRATION**

An effective interface between computer-stored design descriptions and analysis tools p 58 A85-11661

Integrated technologies and the transport aircraft of the future [AIAA PAPER 84-2447] p 98 A85-13537

Impact of flight systems integration on future aircraft design [AIAA PAPER 84-2459] p 99 A85-13547

Integrated modular flight control - Costs and benefits [AIAA PAPER 84-2490] p 114 A85-13564

Integrated flight/fire/propulsion controls [AIAA PAPER 84-2493] p 114 A85-13566

Future requirements for integrated flight controls [AIAA PAPER 84-2494] p 114 A85-13567

Integrated Global Navigation and Surveillance System p 94 A85-14835

Integrated flight control/navigation sensors [AIAA PAPER 84-2623] p 171 A85-17820

Integrated on-board monitoring and test concepts [AIAA PAPER 84-2709] p 166 A85-17875

The de-ja vu of all electric/all digital aircraft — future integrated system technology of commercial and military aircraft [AIAA PAPER 84-2739] p 157 A85-17893

CAD/CAM integration - The imperatives p 185 A85-18439

Military avionics - Increasing integration at all levels p 244 A85-20221

Design and advanced concepts of avionics/weapons system integration; Proceedings of the Symposium, London, England, April 3, 4, 1984 p 200 A85-21456

Software design methods — for civil and military aircraft avionics systems p 301 A85-21457

A design methodology for integrated avionic systems p 301 A85-21458

Hardware design techniques — systems integration for civil and military aircraft avionics p 244 A85-21459

Packaging and interconnection for avionics p 290 A85-21460

Integrated navigation p 245 A85-21461

Integrated communications - A designers view — for civil and military aircraft avionics p 245 A85-21462

Trends in digital flight control systems p 269 A85-21465

Trends in digital engine control - Integration of propulsion control with flight control and avionic systems in future military and commercial aircraft p 264 A85-21466

The impact of integrated systems - The helicopter designer's viewpoint p 252 A85-21467

The Cockpit Display of Traffic Information and the Threat Alert and Collision Avoidance System Integration - A review p 259 A85-21559

Flight test techniques for the advanced fighter technology integration (AFTI) F-15 p 340 A85-24230

Phase III GPS integration options for aircraft platforms p 337 A85-25196

Design decisions guide airborne radar p 409 A85-27848

Aircraft control systems - A projection to the year 2000 p 424 A85-29125

Multidisciplinary analysis and synthesis - Needs and opportunities — for aerospace design [AIAA PAPER 85-0584] p 534 A85-30227

Development of a generic architecture — in computers p 535 A85-31991

Flight management systems - Their role is steadily increasing p 512 A85-32487

Development of the F/A-18A automatic carrier landing system p 512 A85-32777

Integrated CADCAM - An approach for advanced composite primary aircraft structure p 703 A85-37211

Wing optimization and fuselage integration for future generation of supersonic aircraft p 618 A85-37212

Integrated Inertial Sensor Assembly program status p 642 A85-37810

Integration of the B-52G Offensive Avionics System (OAS) with the Global Positioning System (GPS) p 685 A85-38545

Integration of sensor and display subsystems p 656 A85-38955

Development and evaluation of an integrated flight and propulsion control system [AIAA PAPER 85-1423] p 669 A85-39771

Simulating the works - From crew input to system response — integrated airborne weapon systems [AIAA PAPER 85-1738] p 779 A85-40555

Optimal generalized multistep integration formulae for real-time digital simulation [AIAA PAPER 85-1740] p 802 A85-40556

Aircraft control integration - Methodology and performance impact [AIAA PAPER 85-1424] p 775 A85-40839

Pave Pillar avionics - An architecture for the future p 832 A85-45000

Interfacing Kalman filters with the standard INS p 823 A85-45033

Technology considerations of Integrated Communication Navigation Identification Avionics (ICNIA) p 823 A85-45131

A reliability and survivability assessment tool for fault-tolerant integrated radio systems p 824 A85-45143

Digital flight control and avionics integration techniques p 834 A85-45156

Qualification needs for advanced integrated aircraft [AIAA PAPER 85-1865] p 827 A85-45894

Integration of digital aircraft controls - Benefits and dangers [AIAA PAPER 85-1951] p 851 A85-45937

R&M analysis techniques for fault-tolerant systems p 909 A85-49568

Avionics Integrity Program (Avip). Volume 2: Hardware case studies [AD-A145689] p 25 N85-10944

Superaugmented rotorcraft program p 139 N85-14807

HH-65A Dolphin digital integrated avionics p 166 N85-14815

Integrated cockpit design for the Army helicopter improvement program p 161 N85-14816

The design and development of an integrated core system for battlefield helicopters p 260 N85-16811

Evolution toward a multi-bus architecture for Army helicopter avionic systems p 260 N85-16812

Integration of sensor fusion in advanced helicopter cockpit design p 260 N85-16813

Development, production and testing of central control and display unit for helicopters [BMFT-FB-W-84-039] p 261 N85-16871

Integrated technology rotor/flight research rotor hub concept definition [NASA-CR-166447] p 344 N85-18051

A safety evaluation of the relocation of the ACM (Air Combat Maneuver) panel in the F-14 ( )/AIP (Avionics Integration Program) [AD-A149596] p 419 N85-21158

The STOL and maneuver technology program integrated control system development p 680 N85-27910

Performance improvements of a highly integrated digital electronic control system for an F-15 airplane [NASA-TM-86748] p 837 N85-32120

Qualification needs for advanced integrated aircraft [NASA-TM-86731] p 831 N85-33119

The integrated manual and automatic control of complex flight systems [NASA-CR-176166] p 896 N85-35201

**SYSTEMS MANAGEMENT**

Program Manager: The journal of the defense systems management college, volume 14, number 2, March-April 1985 [AD-A154219] p 808 N85-32031

**SYSTEMS SIMULATION**

Analysis and synthesis of radio-electronic complexes — Russian book p 124 A85-14631

Simulation in engineering sciences: Applications to the automatic control of mechanical and energy systems; Proceedings of the International Symposium, Nantes, France, May 9-11, 1983 p 131 A85-15651

Controllability and observability of linear time delay systems p 132 A85-15654

Multi-sensor surveillance performance evaluation tool — using computerized simulation [AIAA PAPER 84-2631] p 193 A85-17827

The Mission Oriented Terminal Area Simulation (MOTAS) [AIAA PAPER 85-0308] p 274 A85-19655

SFRJ simulator results - Experiment and analysis in cold flow — Solid Fuel RamJet [AIAA PAPER 85-0329] p 263 A85-19671

Analysis and testing of the Diamond One wing anti-icing system [AIAA PAPER 85-0414] p 286 A85-19735

An empirical study of the methodology for real-time air traffic control system simulation testing p 375 A85-24085

Considerations in level of fidelity in real-time avionic system simulations [AIAA PAPER 84-2437] p 338 A85-26322

Validation of flight-body system simulations [MBB-UA-837-84-OE] p 457 A85-27989

Summer Computer Simulation Conference, 15th, Vancouver, Canada, July 11-13, 1983, Proceedings. Volumes 1 & 2 p 457 A85-28601

Digital simulation of adaptive guidance and control system of a homing missile p 409 A85-28604

Data flow methods for dynamic system simulation - A CSSL-IV microcomputer network interface p 458 A85-28614

The application of the optimal model-following method to the design of elevator controllers p 511 A85-31342

Moving target, distributed, real-time simulation using Ada p 609 A85-34131

Real time simulation of airborne radar systems p 849 A85-45124

Design for an Ada-based architecture for critical flight controls [AIAA PAPER 85-1954] p 859 A85-45940

Generalized Escape System Simulation - Its purpose, recent modifications, and potential p 884 A85-49946

A digital piloting system for the combat helicopter p 260 N85-16806

A simulator for studying helicopter weapons systems p 277 N85-16816

Transition fixing and simulation of high Reynolds number flow at transonic velocities p 480 N85-23721

Simulation: A tool for cost-effective systems design and live test reduction p 613 N85-26657

Simulations of strapdown-system errors and error compensation methods — transport aircraft navigation [DFVLR-MITT-84-22] p 751 N85-31040

**SYSTEMS STABILITY**

Determination of the limits of the stability region of a parachute system with a low-permeability canopy p 142 A85-17075

A generalized stability criterion for nonlinear dynamic systems — modeling aircraft roll maneuvers [AIAA PAPER 85-0202] p 300 A85-19586

Stability of squeeze film damped multi-mass flexible rotor bearing systems [ASME PAPER 84-TRIB-45] p 289 A85-21296

The discrete nature of the motion of a system during surface working p 524 A85-31473

Analysis of missile control system stability with Monte Carlo method p 776 A85-42438

Aeroelastic stability analysis with interacting structural nonlinearities p 55 N85-11364

## T

**T TAIL SURFACES**

Design of a pitch orientation control system for aircraft control in stall region p 893 A85-47701

**T-33 AIRCRAFT**

A preliminary flight evaluation of the peripheral vision display using the NT-33A aircraft [AD-A145123] p 24 N85-10060

**T-38 AIRCRAFT**

MAGNA analysis of the T-38 aircraft student canopy - Response to in-flight aerodynamic pressure loads [AIAA PAPER 84-2390] p 97 A85-13503

Development of a 3-D interactive graphics flight path analysis program for the T-38 aircraft [AIAA PAPER 84-2439] p 113 A85-13533

Three dimensional nonlinear dynamic finite element analysis for the response of a thick laminated shell to impact loads [AIAA PAPER 85-0713] p 491 A85-30361

Pilot production of superplastically formed/diffusion bonded T-38 main landing gear doors [AIAA PAPER 84-0933] p 616 A85-39214

**T-56 ENGINE**

Derivative T56 engine development experience [AIAA PAPER 85-1459] p 670 A85-39790

**TABLES (DATA)**

Experimental study of main rotor tip geometry and tail rotor interactions in hover. Volume 2: Run log and tabulated data [NASA-CR-177336-VOL-2] p 466 N85-22345

Compendium of unsteady aerodynamic measurements, addendum 1 [AGARD-R-702-ADD-1] p 744 N85-31028

**TABS (CONTROL SURFACES)**

An investigation of the tabbed vortex flap p 547 A85-35583

Aircraft rotor blade with passive tuned tab [NASA-CASE-ARC-11444-1] p 759 N85-29947

**TACAN**

Computer optimized TACAN navigation for high performance aircraft [AIAA PAPER 84-2436] p 92 A85-13531

A TACAN-based approach and landing aid p 821 A85-43564

Technology considerations of Integrated Communication Navigation Identification Avionics (ICNIA) p 823 A85-45131

**TACHISTOSCOPES**

Tachistoscopic studies of powerplant instruments p 504 A85-31779

**TACTICS**

Supernormal flight may change battle flight concepts into the indefinite future p 424 A85-29195

Design considerations for helicopter effectiveness in air-to-air combat p 482 A85-31995

Increased joint avionics standardization could result in major economies and operational benefits
[AD-A145730] p 25 N85-10945
**TAIL ASSEMBLIES**
Canard/tail comparison for an advanced variable-sweep-wing fighter
[AIAA PAPER 84-2401] p 97 A85-13510
The aerodynamic drag characteristics of the Lochkegelleitwerk p 75 A85-13698
Environmental effects and durability evaluation of advanced composite fuselage structures
p 251 A85-21388
Limited flight investigation of strakes mounted on a helicopter tail boom p 342 A85-26394
Characteristics of the oscillations of a tail unit in a flow of an incompressible gas p 649 A85-39125
The Airbus A 310-300 as an example of the construction of an FRP vertical tail fin
[MBB-UT-52-85-OE] p 758 A85-42677
An experimental study on the induced normal force on tail-fins due to wing-tail interference
[NAL-TR-814] p 104 N85-12051
Experiences obtained from service fatigue monitoring exercises p 292 N85-15672
TUTOR (CL-41A) tail flight load survey
p 254 N85-15678
All-composite Airbus empennage p 284 N85-15931
Wind tunnel acoustic study of a propeller installed behind an airplane empennage: Data report
[NASA-CR-177335] p 538 N85-23377
Description of a computer program treating transonic steady state aeroelastic effects for a canard or tail airplane
[FFA-TN-1983-23] p 561 N85-26674
The influence of helicopter tail shape on drag: An aerodynamic study using a low speed wind tunnel
[AD-A156304] p 876 N85-35174
**TAIL ROTORS**
Aeroelastic characteristics of the AH-64 bearingless tail rotor p 250 A85-20142
Aircraft accident report, Western Helicopters, Inc., Bell UH-1B, N87701, Valencia, California, July 23, 1982
[PB84-910414] p 149 N85-13789
An experimental investigation of the chopping of helicopter main rotor tip vortices by the tail rotor
[NASA-CR-177338] p 538 N85-23376
**TAIL SURFACES**
Thrust reverser effects on fighter aircraft aerodynamics p 547 A85-35577
**TAILLESS AIRCRAFT**
Low-speed experimental study of the vortex flow effects of a fighter forebody having unconventional cross-section
[AIAA PAPER 85-1798] p 813 A85-43851
**TAKEOFF**
The dynamics of takeoff and landing of aircraft — Russian book p 115 A85-14636
A simple and safe takeoff or landing procedure with wing surface contaminations p 155 A85-16239
Application of scaling laws for the flyover jet noise to three departure procedures for the Boeing 727-200 advanced
[AIAA PAPER 84-2359] p 377 A85-26319
Takeoff performance data using onboard instrumentation p 418 A85-28651
Tensile ski-jump ramp for aircraft takeoff
[AIAA PAPER 85-0802] p 491 A85-30302
Thrust vectored take-off, landing and ground handling of an airship
[AIAA PAPER 85-0877] p 641 A85-38792
Simulator evaluation of F/A-18 ski jump
[AIAA PAPER 85-1730] p 754 A85-40553
New ICAO procedures on instrument departures and noise abatement p 746 A85-41733
Optimization of ski-jump take-off performance
[AIAA PAPER 85-1962] p 827 A85-45946
Wind tunnel results of advanced high speed propellers in the takeoff, climb, and landing operating regimes
[AIAA PAPER 85-1259] p 817 A85-47025
Preliminary airworthiness evaluation of the Rutan Aircraft Factory (RAF), Inc. LONG-EZ airplane with external sight
[AD-A145381] p 22 N85-10937
Performance capabilities of the C-5 and C-17 cargo aircraft
[AD-A145518] p 22 N85-10939
Insight. Background information for multipurpose pilots: Flight phenomena p 22 N85-10940
To take off and to land safely. Hoechst 1678 for ice and snow free runways p 149 N85-13791
Airport activity statistics of certificated route air carriers
[AD-A148472] p 243 N85-16846
Optimum performance parameters for ski-jump operations of USAF fighter aircraft
[AD-A148532] p 258 N85-16867
Boundary layer transition control for takeoff and landing configurations p 480 N85-23714
Trajectory measurements for take-off and landing tests and other short-range applications, volume 16
[AGARD-AG-160-VOL-16] p 604 N85-25801
The use of pressure sensing taps on the aircraft wing as sensor for flight control systems p 606 N85-26660
Probabilistic computer model of optimal runway turnoffs
[NASA-CR-172549] p 594 N85-26760
A system for take-off and landing measurements (STALINS)
[B8560072] p 645 N85-27849
Addition of flexible body option to the TOLA computer program, part 1
[NASA-CR-132732-1] p 652 N85-27855
Addition of flexible body option to the TOLA computer program. Part 2: User and programmer documentation
[NASA-CR-132732-2] p 652 N85-27856
Wind tunnel results of advanced high speed propellers in the takeoff, climb and landing operating regimes
[NASA-TM-87054] p 740 N85-29925
**TAKEOFF RUNS**
Critical speed testing of the Grumman X-29A power take-off shaft subsystem
[SAE PAPER 841603] p 662 A85-39163
Probabilistic computer model of optimal runway turnoffs
[NASA-CR-172549] p 594 N85-26760
**TANDEM WING AIRCRAFT**
The joined wing - An overview — aircraft tandem wings in diamond configurations
[AIAA PAPER 85-0274] p 247 A85-19626
Avtek 400 - What is it? p 415 A85-29800
Parametric study of a canard-configured transport using conceptual design optimization
[NASA-TP-2400] p 415 N85-19979
**TANKS (COMBAT VEHICLES)**
Assuring structural integrity in Army systems
[NASA-CR-175492] p 448 N85-20398
Ground evaluation of helicopter air-to-air warfare
p 499 N85-22360
**TANKS (CONTAINERS)**
Elastomers used in aeronautics industry
[SNIAS-851-551-103] p 788 N85-31304
**TANTALUM ALLOYS**
Effects of MAR-M247 substrate (modified) composition on coating oxidation coating/substrate interdiffusion — protective coatings for hot section components of gas turbine engines
[NASA-CR-174851] p 384 N85-19073
**TAPE RECORDERS**
Recent advances in airborne video/data recording
p 347 A85-24263
**TAPERING**
Investigations of the influence of taper on the characteristic values of rotating annular turbine cascades in the transonic flow regime p 394 A85-30170
**TAPES**
The use of carbon weaves and tapes - Technical and economic surveys p 520 A85-33242
**TAR SANDS**
Aviation turbine fuels from tar sands bitumen and heavy oils. Part 1: Process analysis
[AD-A151319] p 597 N85-25539
**TARGET ACQUISITION**
Conformal EO sensor development for the AFTI/F-16 — Advance Fighter Technology Integrator
[AIAA PAPER 84-2478] p 92 A85-13556
TADS/PNVS - The keen eyes of the hunter — Target Acquisition Designation Sight/Pilot Night Vision Sensor
p 107 A85-15594
Infrared Search and Track system development
[AIAA PAPER 84-2610] p 150 A85-17812
Integrated tracking software for multimode operation
[AIAA PAPER 84-2614] p 193 A85-17814
Range ambiguity resolution in an airborne medium PRF pulse Doppler radar p 335 A85-24911
Modeling and simulation in missile target tracking
p 409 A85-28607
Army aviation today and tomorrow
p 139 N85-14810
Binocular overlap in a fiber optic helmet mounted display
[AD-P004331] p 348 N85-17985
**TARGET DRONE AIRCRAFT**
NATCS - Navigation Aided Target Control System for multiple drone applications p 642 A85-37803
**TARGET RECOGNITION**
Imaging Sensor Autoprocessor — for automatic target recognition
[AIAA PAPER 84-2613] p 164 A85-17811
Contrast sensitivity performance assessment of HUD display systems p 259 A85-21593
A real time (on line) adaptive target detection techniqu for an airborne millimeter wave seeker design
p 347 A85-24267
Signal processing consideration for a millimeter wave seeker p 336 A85-2493
Dual control guidance for simultaneous identification and interception
[AD-A154607] p 407 A85-27510
Argus - Standoff-reconnaissance with unmanned roto platform
[DGLR PAPER 84-126] p 754 A85-4033
Content, variety, and augmentation of simulated visua scenes for teaching air-to-ground attack
[AD-A145216] p 36 N85-1008
Visual simulation requirements for aircraft aspec recognition at real world distances
[AD-A151040] p 517 N85-23810
Low-resolution target classification from a staring infrared sensor
[AD-A151690] p 612 N85-2635
Design adequacy: An effectiveness factor
p 606 N85-26842
**TARGET SIMULATORS**
Moving target, distributed, real-time simulation using Ada p 609 A85-34131
**TARGETS**
Nose and inlet duct radomes for the firebolt aeria target
[AD-P004375] p 449 N85-2146
**TASKS**
Multiple resources and display formatting: The implications of task integration in a simulated air trafic control task
[AD-A150713] p 530 N85-24205
**TAXIING**
The automatic SSR taxiway test facility
p 15 A85-12081
New airport ground traffic control system planned
p 96 N85-12006
**TAYLOR SERIES**
On a generalized optimality criteria method
p 795 A85-43232
Stress-derivative control of keystoning deformation i finite element codes p 54 N85-10385
Efficiency of algorithms for gas-air channel diagnostics in gas turbine engines based on gas thermodynamic parameters p 508 N85-22823
**TEA LASERS**
Field measurements with a coherent transversely excited atmospheric CO2 laser radar
p 357 A85-22652
**TEARING**
Impact dynamics research on composite transpor structures
[NASA-TM-86391] p 797 N85-30387
**TECHNOLOGICAL FORECASTING**
Transatmospheric vehicles - A challenge for the next century
[AIAA PAPER 84-2414] p 98 A85-13519
Future transport aircraft design challenges
[AIAA PAPER 84-2416] p 98 A85-13521
Rotorcraft effectiveness and survival in the 1990's and beyond
[AIAA PAPER 84-2417] p 69 A85-13522
Ultralight aircraft - Do they have a future?
[AIAA PAPER 84-2434] p 69 A85-13529
Integrated technologies and the transport aircraft of the future
[AIAA PAPER 84-2447] p 98 A85-13537
Impact of flight systems integration on future aircraf design
[AIAA PAPER 84-2459] p 99 A85-13547
Aeronautical technology 2000 - A projection of advanced vehicle concepts
[AIAA PAPER 84-2501] p 100 A85-13572
Future Air Force tactical airlifter considerations
[AIAA PAPER 84-2504] p 100 A85-13574
Light Helicopter Family (LHX) - The U.S. Army's future light rotorcraft fleet p 71 A85-15591
Role of research aircraft in technology developmen
[AIAA PAPER 84-2473] p 155 A85-1610
The de-ja vu of all electric/all digital aircraft — future integrated system technology of commercial and military aircraft
[AIAA PAPER 84-2739] p 157 A85-1788
Long-term perspectives for aviation research of the DFVLR p 138 A85-18712
Forward sweep - The pros and cons
p 250 A85-2014
Trends in civil aircraft design p 200 A85-2222
Future helicopter developments p 311 A85-24512
International perspective on ceramic heat engines
[ACS PAPER 1-J111-84] p 363 A85-2526
Propellers for the future p 353 A85-262
Tomorrow's air cargo - Combis, convertibles, o all-freighters? p 411 A85-2648

What will aircraft capabilities and needs really be in 2005? p 382 A85-27534
MiG-2000 p 412 A85-27839
Aircraft control systems - A projection to the year 2000 p 424 A85-29125
Impact of emerging technology on the weight of future rotorcraft p 494 A85-31970
Structures for 21st century aircraft examined
p 498 A85-32947
LHX - Not just another helicopter p 572 A85-35351
X-Wing Harrier speed and helicopter hovering
p 572 A85-35352
Aerospace technology - Projections to the year 2000
p 573 A85-36725
Cockpit of the future? p 655 A85-37925
Who needs advanced-technology airliners?
p 647 A85-38434
Something old, something new p 648 A85-38440
Variable cycle turboshaft technology for rotor-craft of the 90's
[AIAA PAPER 85-1278] p 666 A85-39695
Combustion technology - A Navy perspective
[AIAA PAPER 85-1400] p 690 A85-39763
Are propellers coming back - and when?
p 764 A85-40070
New configurations and their contribution to the reduction of commercial-aircraft operating costs
[DGLR PAPER 84-081] p 707 A85-40301
The history and future of the centrifugal compressor in aviation gas turbines
[SAE PAPER 841635] p 764 A85-40538
Electronic warfare - The next 15 years
p 792 A85-41547
The trend of future gas turbine technology
p 767 A85-41778
Advanced propulsion through the 1990s - An airframer's view
[AIAA PAPER 85-1192] p 758 A85-42670
Computer and information technology in the year 2000 - A projection p 917 A85-48024
Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project. ACT/Control/Guidance System study, volume 1
[NASA-CR-165963-VOL-1] p 162 N85-14837
The application of a technology index to aircraft turbine engine cost estimating relationships
[AD-A147701] p 268 N85-16874
The aircraft engine of the future
[PNR-90226] p 268 N85-16875
Fiscal year 1986 technical objective document
[AD-A151039] p 539 N85-25000
Towards the year 2000: Developments in inspection and product assurance to be anticipated during the next 15 years — aircraft engines
[PNR-90258] p 911 N85-3442

**TECHNOLOGIES**
China report: Science and technology
[JPRS-CST-84-042] p 138 N85-14789
China report: Science and technology
[JPRS-CST-84-037] p 346 N85-18982
China report: Science and technology
[JPRS-CST-84-026] p 446 N85-20189
USSR report: Engineering and equipment
[JPRS-UEQ-84-005] p 530 N85-24157

**TECHNOLOGY ASSESSMENT**
Wright Brothers Lectureship in Aeronautics - Handling qualities and pilot evaluation
[AIAA PAPER 84-2442] p 113 A85-13534
The revolutionary impact of evolving aeronautical technologies
[AIAA PAPER 84-2445] p 69 A85-13535
Propulsion technology projections for commercial aircraft
[AIAA PAPER 84-2446] p 108 A85-13536
Flight control technology for current/future transport aircraft
[AIAA PAPER 84-2491] p 114 A85-13565
Some fighter aircraft trends
[AIAA PAPER 84-2503] p 100 A85-13573
An overview of the digital avionics assessment activities being conducted by the Federal Aviation Administration at NASA-Ames Research Center
[AIAA PAPER 84-2605] p 163 A85-17808
An assessment of the 1990 digital/electric airplane
[AIAA PAPER 84-2740] p 157 A85-17894
Modular standards for emerging avionics technologies
[AIAA PAPER 84-2747] p 184 A85-17897
Circulation control airfoils - Past, present, future
[AIAA PAPER 85-0204] p 215 A85-19588
Advanced helicopter technology - Industry girds for challenges of evolving operational needs
p 199 A85-20057
Technology gains expected to yield LHX size, weight, cost reductions p 249 A85-20058
Computers and progress in aviation
p 199 A85-20453
Review of the origin of Japanese Industrial Standard
p 280 A85-20545
Modern military engines. II p 264 A85-20822
Advanced technology - The key to European competitiveness — in Airbus industry
p 200 A85-21680
ACES II R&D upgrade program p 330 A85-22757
A brief review of the performance of the Canadian aircrew life preservers over the last twenty years
p 330 A85-22760
U.S. Navy aircrew automated escape systems (AAES) and aircrew life support systems (ALSS) in-service usage data analysis program - A progress report and report of longer term plans p 331 A85-22767
Evolution in the U.S. of ceramic technology for turbine engines
[ACS PAPER 3-JIII-84] p 363 A85-25269
Avionics systems for helicopters of the next generation p 338 A85-25851
An introduction to MSG-3 — Maintenance Steering Group
[SAE PAPER 841481] p 311 A85-25977
Technology and the market place - A changing air transport equation
[SAE PAPER 841545] p 312 A85-25983
Design methods and technology of transport aircraft of today and tomorrow p 312 A85-26014
The evolution of high-thrust turbojet engine technology
p 353 A85-26017
Aeronautical technology in airborne systems
p 338 A85-26020
New technology in the A320
[AIAA PAPER 84-2444] p 342 A85-26324
A review of complete weapon vibration testing techniques p 426 A85-26555
Intercompany technology task forces promote cooperation at Lockheed p 381 A85-26847
Aluminum-lithium alloys for aircraft structure - An overview p 434 A85-27119
CRC handbook of space technology: Status and Projections p 431 A85-28275
F-16 - Into the 1990s p 414 A85-29799
Soviet Doctrine and Aviation Technology Study Seminar, Washington, DC, April 12, 13, 1985, Proceedings
p 463 A85-29949
The search for fuel efficiency p 492 A85-31225
Advance technology impacts on rotorcraft weight
p 494 A85-31973
Advanced technology impact on LHX helicopter preliminary design p 496 A85-31996
Constraints on the unlimited applications of the NAVSTAR Global Positioning System
p 487 A85-32233
Aviation of the present and future — Russian book
p 541 A85-33396
Man-powered aircraft — review p 615 A85-38353
Research trend in advanced technology helicopter
p 647 A85-38360
Lighter-Than-Air Systems Conference, 6th, Norfolk, VA, June 26-28, 1985, Technical Papers
p 616 A85-38776
North warning system airship feasibility study
[AIAA PAPER 85-0858] p 640 A85-38777
The need to return to hydrogen in airships
[AIAA PAPER 85-0873] p 648 A85-38788
A comparative evaluation of certain promising gas-turbine engines of foreign manufacturers in terms of their thrust characteristics and fuel efficiency
p 660 A85-39106
Material evaluation of second-generation composites for transport wing application
[SAE PAPER 841520] p 688 A85-39291
A review of some recent U.K. propeller developments
[AIAA PAPER 85-1261] p 666 A85-39684
Technology for the design of high temperature rise combustors
[AIAA PAPER 85-1292] p 668 A85-39705
Advanced composites - Present status and future trend p 784 A85-41005
Optical technology for flight control systems

Protective coatings for aircraft structures: A review
[VTH-LR-413] p 577 N85-26704
The state-of-the-art and future of flight control systems p 588 N85-26732
Flight test support aircraft Advanced Technologies Testing Aircraft System (ATTAS) for the DFVLR
[MBB-FE-732/S/PUB/154] p 578 N85-27730
Controller requirements for uncoupled aircraft motion, volume 1
[AD-A153173] p 675 N85-27878
Analysis of incompressible cascade flows using state-of-the-art computer programs
[AD-A155850] p 876 N85-35173
Energy Efficient Engine Program technology benefit/cost study, volume 2
[NASA-CR-174766-VOL-2] p 892 N85-35198

**TECHNOLOGY TRANSFER**
The influence of aircraft turbomachine technology on vehicular turbocharger design p 793 A85-41830
Onboard simulation - A newly emerging technology and the potential of the helmet mounted display as an embedded training device
[AIAA PAPER 85-1737] p 757 A85-42664
Energy efficient engine. Volume 2. Appendix A: Component development and integration program
[NASA-CR-173085] p 34 N85-10991
AGARD Highlights
[AGARD-HIGHLIGHTS-84/2] p 67 N85-11972
West Europe report: Science and technology
[JPRS-WST-85-020] p 797 N85-31333

**TECHNOLOGY UTILIZATION**
Air cargo support technology - Economic realities
[AIAA PAPER 84-2514] p 136 A85-13580
The application of endless-fiber reinforced polymers
p 119 A85-15580
Aero engine components in composite materials - 20 years' experience p 111 A85-15958
An overview of potential for the substitution of ceramic materials for vulnerable materials and the implications of national materials policy p 179 A85-19099
Applications of FM-CW CO2 waveguide laser radar
p 334 A85-22650

High performance composite materials: New applications and industrial production; Proceedings of the Fourth International Conference and Exhibition, Bordeaux, France, October 17-20, 1983 p 362 A85-24809
Use of high performance composite materials in modern aircraft structures p 341 A85-24818
Applied composites - Aircraft structural applications; Proceedings of the Aerospace Engineering Conference and Show, Los Angeles, CA, February 12-14, 1985
[AIAA PAPER 85-0846] p 312 A85-26301
Composite airframe production implementation p 312 A85-26302
A 73-ft cross parachute for cargo delivery p 402 A85-29264
Widespread civil uses envisioned for satellite navigation system p 566 A85-34217
Application of technology to achieve value - Added in-service support — of jet engines
[SAE PAPER 841566] p 659 A85-39067
Progress in the utilization of an oxide-dispersion-strengthened alloy for small engine turbine blades
[SAE PAPER 841512] p 688 A85-39284
Aircraft preliminary design comparison of advanced compound engines with advanced turbine engines for helicopter applications
[AIAA PAPER 85-1276] p 666 A85-39693
Application possibilities for transport helicopters p 707 A85-40290
New possibilities for future amphibian aircraft
[DGLR PAPER 84-084] p 753 A85-40304
Putting the 'super' in supercomputers p 804 A85-42694
Powder materials and ceramics in aerospace applications - A European perspective p 787 A85-43153
Modernization in aerospace — productivity and quality improvement p 709 A85-43190
Digital signal processing utilizing a generic instruction set p 854 A85-45006
Stirling engines for Air Force Applications p 855 A85-45470
AFTI MAW - Wing of the future — Advanced Fighter Technology Integrator flight test program for Mission Adaptive Wing concept
[SAWE PAPER 1617] p 883 A85-49921
The applications of fibre optics in gas turbine engine instrumentation
[PNR-90209] p 135 N85-12687
Integrated technology wing study (oral presentation)
[NASA-CR-169497] p 256 N85-15718
Impressions from a study tour in Finland concerning fiber reinforced plastics, June 1984
[FOA-C-20552-D2(E4,F9)] p 283 N85-15831
Riga Institute seeking faster introduction of new technology p 468 N85-23698
Possible technological answers to new design requirements for power transmission systems p 510 N85-23779
Roundtable on effective use of flight simulators p 593 N85-25190
Aspects of application of ACT systems for pilot workload alleviation p 588 N85-26734
New materials and techniques for aircraft structures
[B8580074] p 653 N85-27861
Energy Efficient Engine Program technology benefit/cost study, volume 1
[NASA-CR-174766-VOL-1] p 892 N85-35197
Motor glider meteorology p 914 N85-35543
TELECOMMUNICATION
Implications of Joint Tactical Information Distribution System/Tactical Digital Information Link J on Navy aircraft weapons systems
[AIAA PAPER 84-2719] p 152 A85-17883
TELESCOPES
Evaluation of nose, roof, and mast mounted sensor platforms for piloting and sighting, integrated in future combat helicopters p 260 N85-16808
TELEVISION SYSTEMS
Television systems for flight simulators p 427 A85-29862
TELEVISION TRANSMISSION
Anomalous clutter interference in radar ranging p 335 A85-24912
TEMPERATURE COMPENSATION
Design refinements in multi-component strain gage balances p 445 A85-29561
Development of a temperature-compensated hot-film anemometer system for boundary-layer transition detection on high-performance aircraft
[NASA-TM-86732] p 835 N85-33121
TEMPERATURE CONTROL
The control of annular combustor exit temperature profiles p 421 A85-29346
Algorithms for diagnosing thermal loads of flight vehicles — Russian book p 517 A85-31574
Electronic Equipment Thermal Management p 906 A85-49530
ITAD - A CAD system for environmental reliability design — Intregrated Thermal Avionic Design p 918 A85-49531
Heat management system for aircraft
[AD-D011658] p 654 N85-28936
TEMPERATURE DEPENDENCE
The influence of microstructure on the temperature-dependent flow properties of Ti-6Al-4V p 687 A85-38749
Thermal fatigue of gas turbine engine blades made of material based on silicon nitride and silicon carbide p 43 N85-10115
TEMPERATURE DISTRIBUTION
The effect of the operating parameters on the temperature field of gas flow behind a system of radial stabilizers p 350 A85-23995
Heat generation in aircraft tires p 756 A85-41133
Unsteady temperature analysis of air-cooled turbine vanes p 787 A85-41783
Influence of setting angle of jet cooling nozzles on temperature and stress state of a turbine wheel p 355 N85-18206
Effects of temperature variation among droplets in an evaporating fuel spray p 520 N85-22562
Development of a temperature measurement system with application to a jet in a cross flow experiment
[NASA-CR-174896] p 581 N85-25262
TEMPERATURE EFFECTS
Unsteady response of an axial flow compressor to planar temperature transients p 143 A85-18507
Thermoluminescence studies on Jilin meteorite p 463 A85-26043
Experimental study of temperature effect on turbine vane cooling performance with multi-row ejection p 768 A85-41788
Effects of temperature variation among droplets in an evaporating fuel spray p 520 N85-22562
TEMPERATURE GRADIENTS
Temperature distortion generator for turboshaft engine testing
[SAE PAPER 841541] p 659 A85-39065
Selecting the proper ceramic material for a regenerator experiencing large temperature gradients
[AD-A144796] p 43 N85-10199
Temperature distortion generator for turboshaft engine testing
[NASA-TM-83748] p 200 N85-15658
Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 4
[NASA-CR-167865] p 913 N85-35537
TEMPERATURE INVERSIONS
Effect of steady-state temperature distortion on inlet flow to a high-bypass-ration turbofan engine
[NASA-TM-86896] p 265 N85-15725
TEMPERATURE MEASUREMENT
A comparison of triple-moment temperature-velocity correlations in the asymmetric heated jet with alternative closure models p 124 A85-14378
Shock tunnel measurements of heat transfer in a model scramjet
[AIAA PAPER 85-0908] p 658 A85-37582
Dynamic gas temperature measurement system p 594 A85-37706
Techniques for measurement of strain and temperature in advanced engine development p 792 A85-41032
A proposed method for remote thermomatry in turbine engines
[AIAA PAPER 85-1468] p 792 A85-41425
Effect of combined pressure and temperature distortion orientation on high-bypass-ratio turbofan engine stability
[NASA-TM-83771] p 27 N85-10067
Dynamic gas temperature measurement system p 29 N85-10958
Investigation of surface tension phenomena using the KC-135 aircraft
[NASA-TM-82508] p 362 N85-18995
Development of a temperature measurement system with application to a jet in a cross flow experiment
[NASA-CR-174896] p 581 N85-25262
Measurement and correlation of jet fuel viscosities at low temperatures
[NASA-CR-174911] p 901 N85-34295
TEMPERATURE MEASURING INSTRUMENTS
Refinement of an 'alternate' method for measuring heating rates in hypersonic wind tunnels p 516 A85-32625
TEMPERATURE PROFILES
An investigation into the soot production processes in a gas turbine engine
[AD-A152710] p 690 N85-27992
TEMPERATURE SCALES
A comparison of two bench scale tests of fuel low temperature flow properties
[AD-A154477] p 788 N85-31311
TEMPERATURE SENSORS
Monitoring tyre health p 825 A85-44748
TEMPERING
Fatigue crack growth behavior of 7XXX aluminum alloys under simple variable amplitude loading p 280 A85-20759
Impact fracture of thermally tempered glass helicopter windshields
[ACS PAPER 41-G-83F] p 363 A85-25084
TEMPORAL DISTRIBUTION
Isochrones for maximum endurance horizontal gliding flight p 158 A85-18348
TENSILE DEFORMATION
Strength analysis of fan-shaped wing considering temperature deformation and creep deformations p 163 N85-14983
TENSILE PROPERTIES
Effects of moisture on high performance laminates p 435 A85-29929
TENSILE STRENGTH
Tension analysis of stiffened aircraft structures
[AIAA PAPER 85-0795] p 523 A85-30296
Tensile and fracture toughness properties of Mirage III spars
[AR-003-019] p 605 N85-25899
TENSILE STRESS
Crack growth retardation and acceleration models p 126 A85-15862
Hygrothermally curvature stable laminates with tension-torsion coupling p 787 A85-43224
TENSILE TESTS
Filament winding of aircraft engine nacelle components p 178 A85-16050
Crash energy absorption properties of composite structural elements p 362 A85-24815
Effect of inclusions on tensile ductility of a nickel-base oxide dispersion strengthened superalloy p 785 A85-42753
Preliminary investigation of the strength and durability of superplastic formed aluminum p 785 A85-42934
TENSOR ANALYSIS
Alternatives for jet engine control
[NASA-CR-175831] p 583 N85-26713
Alternatives for jet engine control
[NASA-CR-175832] p 583 N85-26714
Alternatives for jet engine control
[NASA-CR-175833] p 583 N85-26715
TERCOM
A comparison of several digital map-aided navigation techniques p 642 A85-37829
TERMINAL FACILITIES
Penetration of aircraft noise into an open configuration airport terminal building p 37 A85-10408
FAA's new terminal radar, the ASR-9 incorporates a separate weather channel p 15 A85-12080
Advanced baggage/cargo handling
[SAE PAPER 840711] p 332 A85-26315
Principles of the design of ground support facilities for air transport p 426 A85-27723
Automatic monitoring of aviation terminal forecasts p 532 A85-30600
TERMINAL GUIDANCE
Some concepts for improving non-precision approach guidance through use of on-board data bases p 95 A85-14837
Application of differential GPS to civil helicopter terminal guidance
[AIAA PAPER 84-2676] p 151 A85-17858
Multistep terminal guidance of linear systems under conditions of parametric and constant perturbations p 534 A85-31453
Mixing four-dimensional equipped and unequipped aircraft in the terminal area p 488 A85-32778
Ground based concept for time control of aircraft entering the terminal area
[AIAA PAPER 85-1888] p 824 A85-45910
TERMINAL VELOCITY
Least acceleration motion for given terminal conditions p 459 A85-26443
TERMINALS
Aircraft delay impact on a central terminal hall - A simulation model p 174 A85-16289
TERRAIN
Airborne Electronic Terrain Map System - Conclusions p 834 A85-45152
Control of mammals at airports
[AD-P004192] p 404 N85-19957
Landscape management on airports for reduction of bird populations
[AD-P004194] p 428 N85-19960
Inexpensive multipurpose landscaping p 428 N85-19961

The AFTI/F16 terrain-aided navigation system
[DE85-008411] p 645 N85-28935

**TERRAIN ANALYSIS**

Advanced SAR system maps Arctic regions
p 441 A85-27841

Automated and interactive data base generation
[AD-P004316] p 374 N85-17970

CIG (Computer image generation) data bases in an instance: Bits and pieces
[AD-P004318] p 375 N85-17972

The generation of three-dimensional data bases using a building block approach
[AD-P004319] p 379 N85-17973

**TERRAIN FOLLOWING AIRCRAFT**

Future requirements for integrated flight controls
[AIAA PAPER 84-2494] p 114 A85-13567

A minimum-exposure, minimum-elevation military aircraft heuristic route selection model p 482 A85-31774

An evading path against 3 D obstacles
p 674 A85-38357

Enhanced terrain masked penetration program
p 832 A85-44991

Integrated Terrain Access/Retrieval System
p 832 A85-44992

Digital flight control and avionics integration techniques p 834 A85-45156

Flight test evaluation of active ride control system for tactical aircraft
[AIAA PAPER 85-1860] p 843 A85-45889

Further application of output predictive algorithmic control to terrain following p 894 A85-47734

**TEST EQUIPMENT**

Swirling flow in a research combustor
p 283 A85-21863

The development and use of free piston wind tunnels
p 368 A85-25455

A cost-effective integrated diagnostics support system
p 439 A85-26797

The DFVLR flight-test vehicle ATTAS
[DGLR PAPER 84-093] p 753 A85-40312

Heater block assembly for use in thermal oxidation testing of jet fuel
[AD-D011430] p 285 N85-17077

**TEST FACILITIES**

The automatic SSR taxiway test facility
p 15 A85-12081

Vortex research facility improvements and preliminary density stratification effects on vortex wakes
[AIAA PAPER 85-0050] p 209 A85-19482

Environmental test capabilities of the Air Force McKinley Climatic Laboratory
[AIAA PAPER 85-0089] p 273 A85-19512

Big wind at Tullahoma — USAF's new aeropropulsion test facility p 275 A85-20122

Development and performance of the NASA Langley Research Center expansion tube/tunnel, a hypersonic-hypervelocity real-gas facility
p 368 A85-25482

USAF doubles engine-test capability - $625 million boost for Arnold facility p 357 A85-25920

EMV assessment methodology for Navy guided weapons p 407 A85-26679

A test system for determining the strength of structural elements exposed to a high-temperature gas stream and vibrational loads p 426 A85-27768

Instrumenting a very large scale R&D facility
p 426 A85-28117

Ground support facilities - The way to effective avionics flight testing p 427 A85-28639

High speed compressor rig as a stall recovery research tool
[AIAA PAPER 85-1428] p 662 A85-39773

Aeronautical systems technology needs: Escape, rescue and survival, test facilities and test equipment and training-simulation equipment
[AD-A145059] p 1 N85-10002

Characteristics of controlled-oscillating annular cascade test facility with Freon gas
[NAL-TR-812] p 10 N85-10014

HOST liner cyclic facilities: Facility description
p 33 N85-10988

Heat transfer results and operational characteristics of the NASA Lewis Research Center Hot Section Cascade Test Facility
[NASA-TM-86890] p 189 N85-15133

Visibility monitoring in the southern California desert for the Department of Defense: Research on operations-limiting visual extinction, RESOLVE protocol
[AD-A146617] p 191 N85-15315

Equipment for preflight test of an Electronic Countermeasures (ECM) avionic system
p 293 N85-15949

Langley Mach 4 scramjet test facility
[NASA-TM-86277] p 278 N85-16883

On the frontier: Flight research at Dryden 1946-1981
[NASA-SP-4303] p 313 N85-17934

Activities at Mil Experimental Design Bureau
p 343 N85-18036

High pressure combustion test facility for gas turbine research
[NAL-TR-801] p 360 N85-18065

Theory versus experiment for the rotordynamic coefficients of annular gas seals. Part 1: Test facility and apparatus
[NASA-CR-174409] p 374 N85-19417

New air supply-prime mover facility for engine tests detailed p 446 N85-20204

A history of full-scale testing of aircraft structures at the National Aeronautical Establishment
[NAE-AN-24] p 417 N85-21153

AIRLAB: A laboratory for flight-crucial-electronics system research p 499 N85-22362

Welcome to the Saclay Propeller Testing Center
[NASA-TM-77648] p 511 N85-23799

Influence of surface roughness on compressor blades at high reynolds number in a two-dimensional cascade
[AD-A151855] p 603 N85-25777

An assessment of the suitability of the BHGA structural test rig for aerodynamic testing of hang gliders
[CA-8505] p 652 N85-27853

Rotorcraft research testing in the National Full-Scale Aerodynamics Complex at NASA Ames Research Center
[NASA-TM-86687] p 652 N85-27854

Research test facility for evaporation and combustion of alternative jet fuels at high air temperatures
[AD-A153830] p 691 N85-29073

Opacity control technique for jet engine test cells
[AD-D011668] p 774 N85-29968

Air Force bid sample testing p 807 N85-31323

Design and testing of an energy-absorbing crewseat for the F/FB-111 aircraft. Volume 2: Data from seat testing
[NASA-CR-3917] p 886 N85-35184

A study of the control of particulate emissions from turbine engine test cells p 898 N85-35205

**TEST RANGES**

Some thoughts on the range/tunnel transition controversy
[AIAA PAPER 85-0127] p 211 A85-19538

The Western Aeronautical Test Range of NASA Ames Research Center
[AIAA PAPER 85-0316] p 275 A85-19678

Time-space position information at Edwards Air Force Base, California p 427 A85-26657

GPS equipments for test range applications
p 486 A85-32201

**TEST STANDS**

A universal turboshaft engine test cell - Design considerations and model test results
[AIAA PAPER 85-0382] p 275 A85-19711

Investigation of the dynamics of the limit maneuvers of a helicopter by means of a flight simulator
p 781 A85-43051

DFVLR rotorcraft: Construction and engineering
[NASA-TM-77740] p 19 N85-10035

HOST liner cyclic facilities: Facility description
p 33 N85-10988

Test devices for aeronautical research and technology
[NASA-TM-77651] p 683 N85-27914

Data processing on the rotor test stand at DFVLR in Brunswick. Microprogrammable interfaces and array processor as key components in a PDP 11 real time data acquisition and processing system
[DFVLR-MITT-85-03] p 684 N85-27921

**TEST VEHICLES**

Trajectory estimation using translated GPS signals
p 487 A85-32207

Energy efficient engine ICLS Nacelle detail design report
[NASA-CR-167870] p 34 N85-10993

**TESTING TIME**

Statistical treatment of multiply censored samples in fatigue testing p 367 A85-25119

Automated testing speeds EW receiver evaluation
p 408 A85-27845

**TETHERED SATELLITES**

Technology and test p 447 N85-20353

Report of the Technology and Test Panel
p 448 N85-20370

Instrumentation for Application Number 1: Mass spectrometric analysis of the boundary layer associated with the tethered satellite p 433 N85-20372

Transport processes in the upper atmosphere
p 454 N85-20375

**TETHERING**

Stability and control of the twin lift helicopter system
p 513 A85-32846

Tethered aerostat operations in the marine environment
[AIAA PAPER 85-0860] p 640 A85-38778

The Tethered Aerostat Antenna Program (TAAP) demonstration phase
[AIAA PAPER 85-0883] p 616 A85-38797

Constellations p 433 N85-20352

The Satellite sail p 433 N85-20376

**TETHERLINES**

A new reeling technique for very long extension scanning in the stratosphere p 640 A85-38312

The Tethered Aerostat Antenna Program (TAAP) demonstration phase
[AIAA PAPER 85-0883] p 616 A85-38797

**TETRACHLORIDES**

Use of titanium tetrachloride for visualization of accelerating flow around airfoils p 903 A85-47090

**TF-30 ENGINE**

Fuel effects on the TF30 engine (Alternate Test Procedure)
[ASME PAPER 84-JPGC-GT-1] p 349 A85-23191

**TF-34 ENGINE**

TF34 convertible engine control system design
p 506 A85-32006

Nonlinear global stability analysis of compressor stall phenomena
[NASA-CR-174908] p 773 N85-29960

**THERMAL ANALYSIS**

A methodology for analyzing laser induced structural damage
[AIAA PAPER 84-2521] p 122 A85-13584

The thermal response of aircraft cabin ceiling materials during a post-crash, external fuel-spill, fire scenario
[AIAA PAPER 85-0395] p 241 A85-19721

Thermal analysis techniques for design of VSTOL aircraft rotor ice protection
[AIAA PAPER 85-0340] p 332 A85-26387

A synthesizing procedure for transient temperatures in composed structures
[AIAA PAPER 85-0830] p 523 A85-30319

Thermal test and analysis of SEM Format B integrated rack and application to SEM Format C — Standard Electronic Modules for aircraft avionics
[SAE PAPER 840944] p 566 A85-33755

Thermal design criteria for standardized avionic modules as applied to system design p 826 A85-45137

Energy efficient engine combustor test hardware detailed design report
[NASA-CR-167945] p 28 N85-10950

Applications of high pressure differential scanning calorimetry to aviation fuel thermal stability research
[NASA-TM-87002] p 521 N85-23941

**THERMAL BOUNDARY LAYER**

Advances in heat transfer. Volume 16
p 288 A85-20501

Factors influencing heat transfer to the pressure surfaces of gas turbine blades p 421 A85-29345

**THERMAL BUCKLING**

Snap-through of initially buckled beams under uniform random pressure p 51 A85-12450

**THERMAL CONDUCTIVITY**

Theory of vibration conduction as a method for calculating the vibration of complex structures
p 287 A85-20454

**THERMAL CONTROL COATINGS**

Oxidation-based model for thermal barrier coating life
p 41 A85-10310

ITSC '83; Proceedings of the Tenth International Thermal Spraying Conference, Essen, West Germany, May 2-6, 1983 p 443 A85-28801

Life modeling of atmospheric and low pressure plasma-sprayed thermal-barrier coating
p 435 A85-29726

Determination of thermal stresses in diffusionless heat-resisting coatings of the Ni(Co)CrAlY system
p 783 A85-40145

Performance of thermal barrier coating for gas turbine airfoil in engine test p 785 A85-41841

Energy efficient engine, high pressure turbine thermal barrier coating. Support technology report
[NASA-CR-168037] p 892 N85-35199

**THERMAL CYCLING TESTS**

HOST instrumentation R and D program overview
p 29 N85-10957

Validation of structural analysis methods using the in-house liner cyclic rigs p 33 N85-10987

HOST liner cyclic facilities: Facility description
p 33 N85-10988

**THERMAL DEGRADATION**

Liquid phase products and solid deposit formation from thermally stressed model jet fuels
[NASA-TM-86874] p 121 N85-13066

**THERMAL DISSOCIATION**

Jet fuel property changes and their effect on producibility and cost in the U.S., Canada, and Europe
[NASA-CR-174840] p 598 N85-27012

THERMAL EXPANSION
Acquisition of detailed heat transfer behavior in complex internal flow passages
[SAE PAPER 841503] p 695 A85-39061
THERMAL FATIGUE
Statistical fatigue crack propagation of IN100 at elevated temperatures p 41 A85-11614
A study of fatigue damage mechanisms in Waspaloy from 25 to 800 C p 42 A85-12098
Considerations for damage analysis of gas turbine hot section components
[ASME PAPER 84-PVP-77] p 169 A85-18792
The effect of acoustic/thermal environments on advanced composite fuselage panels
p 445 A85-29251
Advanced Floatwall combustor liner technology eliminates TF30-P-100 transition duct fatigue cracking
[AIAA PAPER 85-1288] p 667 A85-39701
Life prediction and constitutive models for engine hot section anisotropic materials
[AIAA PAPER 85-1421] p 852 A85-43980
Cumulative damage modeling of fatigue crack growth
p 267 N85-15741
Engine cyclic durability by analysis and material testing p 267 N85-15744
Gas turbines: Operating conditions, material selection and development
[NLR-MP-83046-U] p 774 N85-31062
THERMAL INSULATION
An external insulation system for a cryogenic wind tunnel p 780 A85-41340
Description of the insulation system for the Langley 0.3-Meter Transonic Cryogenic Tunnel
[NASA-TM-86274] p 276 N85-15755
FRG ceramic engine components (PET)
p 297 N85-17193
Ceramic coatings for heat engine materials: Status and future needs
[DE85-008759] p 691 N85-29053
Ceramic coatings for heat engine materials
[DE85-005238] p 691 N85-29054
Study of NSI and related cable performance during tests performed in the NASA Hot Gas Facility
[NASA-CR-170886] p 912 N85-35423
THERMAL MAPPING
Detection of moving vehicles in thermal imagery obtained from a moving platform p 367 A85-24284
THERMAL PROTECTION
Stagnation point heat transfer in hypersonic high enthalpy flow
[AIAA PAPER 85-0973] p 620 A85-37623
Rolls-Royce experience with thermal barrier coatings — in aircraft engines
[PNR-90222] p 285 N85-17152
Process for preparing essentially colorless polyimide film containing phenoxy-linked diamines
[NASA-CASE-LAR-13353-1] p 436 N85-20128
Artificial and natural icing tests YEH-60A quick fix helicopter
[AD-A155147] p 830 N85-32116
Investigation of experimental lightweight firewall materials for A/C engine bay applications
[AD-A155765] p 878 N85-35175
Results of tests of the SRB aft skirt heat shield curtain in the MSFC Hot Gas Facility
[NASA-CR-170888] p 899 N85-35223
Results of tests of MTA-2 TPS on the SRB hold-down bolt blast container
[NASA-CR-170891] p 899 N85-35224
SRB thermal protection systems materials test results in an arc-heated nitrogen environment
[NASA-CR-170881] p 902 N85-35236
Results of tests of weathered K5NA closeout material in the MSFC Hot Gas Facility
[NASA-CR-170893] p 902 N85-35239
THERMAL RESISTANCE
An experimental investigation and numerical prediction of thermomechanical phenomena in high speed rotor tip rubbing p 351 A85-25442
Thermal characteristics of gas turbine combustor in high temperature operation p 792 A85-41793
Heat resistant Carbon Fiber Reinforced Plastics (CFRP) hardening equipment
[MBB/LFA33/CFK/PUB/007] p 690 N85-27976
Investigation of experimental lightweight firewall materials for A/C engine bay applications
[AD-A155765] p 878 N85-35175
THERMAL STABILITY
An overview of potential for the substitution of ceramic materials for vulnerable materials and the implications of national materials policy p 179 A85-19099
V-378A, a new modified bismaleimide matrix resin for high modulus graphite p 282 A85-21482
A study of the thermal inertia of a thermocouple exposed to short temperature pulses at high Reynolds numbers
p 695 A85-39117
Thermal stability of plasma-sprayed zirconia coatings as related to substrate selection p 900 A85-48758
External fuel vaporization study, phase 2
[NASA-CR-174079] p 45 N85-11252
Heater block assembly for use in thermal oxidation testing of jet fuel
[AD-D011430] p 285 N85-17077
Study of advanced fuel system concepts for commercial aircraft and engines
[NASA-CR-174752] p 365 N85-19176
Applications of high pressure differential scanning calorimetry to aviation fuel thermal stability research
[NASA-TM-87002] p 521 N85-23941
THERMAL STRESSES
The buckling of a stiffened cylindrical shell heated by an internal gas flow with varying thermodynamic parameters p 166 A85-16916
Development of a fatigue crack propagation model of Incoloy 901 p 280 A85-20758
Universal matrices to obtain thermal load vectors for the family of anisotropic plane triangular finite elements
p 291 A85-22232
Multilevel methods in the dynamics of the rotors of aircraft engines p 351 A85-24020
Algorithms for diagnosing thermal loads of flight vehicles — Russian book p 517 A85-31574
Advanced Floatwall combustor liner technology eliminates TF30-P-100 transition duct fatigue cracking
[AIAA PAPER 85-1288] p 667 A85-39701
Determination of thermal stresses in diffusionless heat-resisting coatings of the Ni(Co)CrAlY system
p 783 A85-40145
Burner liner thermal/structural load modelling
p 30 N85-10970
Liquid phase products and solid deposit formation from thermally stressed model jet fuels
[NASA-TM-86874] p 121 N85-13086
Monitoring engine thermal stresses
p 266 N85-15735
Gas turbines: Operating conditions, material selection and development
[NLR-MP-83046-U] p 774 N85-31062
Mach 14 flow restrictor thermal stress analysis
[AD-A156215] p 898 N85-35209
THERMIONIC CONVERTERS
China report: Science and technology
[JPRS-CST-84-039] p 446 N85-20206
THERMOCHEMISTRY
Laminar heat-transfer distributions on biconics at incidence in hypersonic-hypervelocity flows
[NASA-TP-2213] p 293 N85-16065
THERMOCOUPLES
A study of the thermal inertia of a thermocouple exposed to short temperature pulses at high Reynolds numbers
p 695 A85-39117
Dynamic gas temperature measurement system
p 29 N85-10958
High temperature thermocouple and heat flux gauge using a unique thin film-hardware hot juncture
[NASA-TM-86898] p 295 N85-16096
Advanced thin film thermocouples
[NASA-CR-175541] p 450 N85-21607
Development of a temperature measurement system with application to a jet in a cross flow experiment
[NASA-CR-174896] p 581 N85-25262
Heating parameter estimation using coaxial thermocouple gages in wind tunnel test articles
[AD-A153039] p 600 N85-26328
THERMODYNAMIC CYCLES
Off-design point characteristics of the precooled gas turbine cycle with liquefied hydrogen as fuel
p 289 A85-20884
International perspective on ceramic heat engines
[ACS PAPER 1-J111-84] p 363 A85-25268
THERMODYNAMIC EFFICIENCY
Analysis of the transient and steady-state heat transfer in rotary regenerative heat exchanger
p 386 A85-24098
Influence of fuel properties on gas turbine combustion performance
[AD-A151464] p 596 N85-25448
THERMODYNAMIC PROPERTIES
delta function and generalized tables of thermodynamic properties for CnHm-air system combustion products
p 43 A85-12358
Handbook of aviation fuel properties
[CRC-530] p 43 A85-12651
The buckling of a stiffened cylindrical shell heated by an internal gas flow with varying thermodynamic parameters p 166 A85-16916
Solving the inverse problem of determining the thermodynamic properties of the working medium of gas turbine engines p 168 A85-17077
*Real gas effects in advanced technology engines*
[AIAA PAPER 85-0252] p 262 A85-19615
Combustion gas properties I-ASTM jet A fuel and dry air
[NASA-TP-2359] p 27 N85-10084
Dynamic gas temperature measurement system
p 29 N85-10958
Laser speckle technique for burner liner strain measurements p 29 N85-10960
Aerodynamic and thermal characteristics of stellate bodies in hypersonic flow of rarefied gas at angle of attack p 148 N85-14974
Report of the Technology and Test Panel
p 448 N85-20370
Efficiency of algorithms for gas-air channel diagnostics in gas turbine engines based on gas thermodynamic parameters p 508 N85-22923
Thermal response of aircraft cabin ceiling materials during a post-crash, external fuel-spill, fire scenario
[PB85-145647] p 502 N85-23784
On thermomechanical testing in support of constitutive equation development for high temperature alloys
[NASA-CR-174879] p 605 N85-25894
Investigation of heat transfer to a turbine blade cascade using a shock tube
[AD-A153090] p 671 N85-27871
Preparation of sinteractive silicon nitride powders
[BMFT-FB-T-84-303] p 691 N85-29066
THERMODYNAMICS
Review - Computational methods for internal flows with emphasis on turbomachinery p 392 A85-29126
Analytical fuel property effects--small combustors
[NASA-CR-174738] p 582 N85-26709
THERMOGRAPHY
Comparison of advanced cooling concepts using color thermography — for high temperature-rise gas combustors
[AIAA PAPER 85-1289] p 667 A85-39702
THERMOGRAVIMETRY
Applications of high pressure differential scanning calorimetry to aviation fuel thermal stability research
[NASA-TM-87002] p 521 N85-23941
THERMOLUMINESCENCE
Thermoluminescence studies on Jilin meteorite
p 463 A85-28043
THERMOMECHANICAL TREATMENT
The effect of coatings on the thermomechanical fatigue life of a single crystal turbine blade material
[AIAA PAPER 85-1366] p 689 A85-39744
Multiaxial and thermomechanical fatigue considerations in damage tolerant design
[NASA-TM-87022] p 597 N85-26984
THERMOPHYSICAL PROPERTIES
Critical assessment of thermophysical properties data of combustion gases for calculating the performance of gas turbine p 805 A85-41803
THERMOPLASTIC RESINS
New nonmetallic structural composites for military-aircraft construction
[DGLR PAPER 84-102] p 783 A85-40320
Application of carbon fibre reinforced thermoplastic (PEEK) composite to aero engine component manufacture p 900 A85-48568
Continuous fibre reinforced thermoplastics in new generation radomes p 900 A85-48572
Solvent resistant thermoplastic composite matrices
p 120 N85-12960
Laminated thermoplastic radome
[AD-D011664] p 691 N85-29045
THERMOPLASTICITY
A thermoplastic polyimidesulfone — synthesis of processable and solvent resistant system
p 282 A85-21483
Nonlinear structural and life analyses of a combustor liner p 29 N85-10955
THERMOSETTING RESINS
NASA/aircraft industry standard specification for graphite fiber toughened thermoset resin composite material
[NASA-RP-1142] p 597 N85-26923
THICKNESS RATIO
Lift due to thickness for low aspect ratio wings in incompressible flow
[AIAA PAPER 85-1588] p 712 A85-40705
THIN AIRFOILS
Approximate solution of a nonlinear problem of flow past a thin airfoil profile near a support surface
p 233 A85-22368
The effects of gusts on the fluctuating airloads of airfoils in transonic flow p 385 A85-26762
Lift and drag of airfoils in nonuniform supersonic stream p 618 A85-37200
A study of the critical flow rate through cascades of thin slightly bent airfoils using the large-particle method
p 624 A85-38562
*Stability of the thin-jet model of the unsteady jet flap*
p 626 A85-38997

Laminar separation studied as an airfoil problem
p 732 A85-42955
A numerical method for second order thin airfoil theory
p 815 A85-44626
Aerodynamics of airfoils subject to 3-dimensional periodic gusts
[AD-A145149] p 10 N85-10018

**THIN BODIES**
Nonequilibrium supersonic flows past oscillating 2-D lifting surfaces and thin elastic bodies
p 618 A85-37197

**THIN FILMS**
alpha-Si addressed liquid crystal aircraft display
[AIAA PAPER 84-2659] p 165 A85-17846
Refinement of an 'alternate' method for measuring heating rates in hypersonic wind tunnels
p 516 A85-32625
Measurement of wing-leading-edge heating rates on wind tunnel models using the thin-film technique
[AIAA PAPER 85-0972] p 681 A85-37622
High temperature thermocouple and heat flux gauge using a unique thin film-hardware hot juncture
[NASA-TM-86898] p 295 N85-16096
Advanced thin film thermocouples
[NASA-CR-175541] p 450 N85-21607

**THIN PLATES**
Explicit formulation for a high precision triangular laminated anisotropic thin plate finite element
p 696 A85-39170

**THIN WALLED SHELLS**
A test system for determining the strength of structural elements exposed to a high-temperature gas stream and vibrational loads p 426 A85-27768
Determination of loads on a thin-walled structure from parameters of its stress-strain state p 492 A85-31461
Crack propagation analysis of longitudinal skin cracks in a pressurized cabin p 645 A85-37188
A surface finite element method for elasto-acoustic coupling p 861 A85-44038
The transmission of acoustic energy by a finite cylindrical shell excited by external plane waves
p 861 A85-44040
Fabrication of ceramic substrate-reinforced and free forms
[NASA-TM-86904] p 518 N85-23926

**THIN WALLS**
The development of efficient models of the deformation of thin-wall structures p 789 A85-40589
Analysis of thin-walled airframe members in geometrically nonlinear statement p 163 N85-14965

**THIN WINGS**
Simplified transonic integral equations for lifting profiles and wings p 6 A85-12034
Nonstationary aerodynamic characteristics of a profile in separated flow near an undulated wall
p 730 A85-42120
Prediction of leading-edge vortex behaviour to supplement the suction analogy p 815 A85-44525
ESP (External-Stores Program): A pilot computer program for determining flutter-critical external-store configurations. Volume 2: Final report on program enhancement and delivery
[AD-A152269] p 587 N85-26726
A computational method for wings of arbitrary planform
[AD-A153788] p 638 N85-28929
A supersonic potential gradient method for the calculation of unsteady aerodynamic pressures on harmonically oscillating wings
[DFVLR-FB-85-11] p 744 N85-31026

**THREAT EVALUATION**
The Cockpit Display of Traffic Information and the Threat Alert and Collision Avoidance System Integration - A review p 259 A85-21559
Generation of flight paths using heuristic search
[AD-A151949] p 569 N85-26894

**THREE DIMENSIONAL BODIES**
An evading path against 3 D obstacles
p 674 A85-38357
The employment of 3-D programs in aircraft design
[DGLR PAPER 84-113] p 754 A85-40329
Numerical calculation of unsteady transonic potential flow over three-dimensional wings p 723 A85-40988
Quick geometry generation and surface mesh partition for arbitrary 3-D bodies p 759 A85-43242
The theoretical minimum induced drag of three-surface airplanes in trim p 894 A85-49128

**THREE DIMENSIONAL BOUNDARY LAYER**
A method for designing three-dimensional configurations with prescribed skin friction p 6 A85-11969
A characteristics approach to swept shock-wave/boundary-layer interactions
p 73 A85-12717
Surface phenomena in a three-dimensional skewed shock wave/laminar boundary-layer interaction
p 80 A85-15338
Boundary layers and separation on a spheroid at incidence p 145 A85-18683
Surface pressure fluctuations in a three-dimensional shock wave/turbulent boundary layer interaction
[AIAA PAPER 85-0125] p 211 A85-19536
An integral method for calculating the effects on turbulent boundary-layer development of sweep and taper p 470 A85-30994
An experimental study of the behavior of 3D-turbulent boundary layer in and out of the separation region at wing-plate junction p 551 A85-35787
Surface pressure fluctuations in a three-dimensional shock wave/turbulent boundary layer interaction at various shock strengths
[AIAA PAPER 85-1562] p 711 A85-40687
Computation of a three dimensional skewed shock wave laminar boundary layer interaction
[AIAA PAPER 85-1565] p 711 A85-40690
Categories and calculations of three-dimensional boundary-layer-separation p 791 A85-40991
Flow characteristics of a body of revolution at incidence p 737 A85-42986
3-D separation on bodies with elliptic cross-section and near root-section of wing-body combination
p 737 A85-42987
A three-dimensional boundary-layer analysis including heat-transfer and blade-rotation effects
p 737 A85-42988
Experimental study on the behavior of three-dimensional turbulent boundary layer induced by a straight wing erected on a flat plate p 738 A85-43227
An examination of turbulence models for a separating three-dimensional turbulent boundary layer
[ONERA, TP NO. 1985-74] p 904 A85-47273
Theoretical contributions to transonic flow analysis for transport aircraft
[BMFT-FB-W-84-036] p 239 N85-16838
A finite difference method for inverse mode calculations of a three-dimensional boundary layer
[ESA-TT-863] p 327 N85-18007
An exploratory investigation of sharp fin-induced shock wave/turbulent boundary layer interactions at high shock strengths
[AD-A151571] p 602 N85-25772
Three-Dimensional Boundary Layers
[AGARD-R-719] p 603 N85-25784
Three-dimensional boundary layers and shear flows activities at ONERA/CERT p 597 N85-25785
Three-dimensional boundary layer research at NLR
p 603 N85-25787
Brief review of current work in the UK on three dimensional boundary layers p 603 N85-25788
Three-dimensional wing boundary layer analysis program BLAY and its application p 559 N85-26632

**THREE DIMENSIONAL FLOW**
Flow stability in the wake of a three-dimensional body
p 2 A85-10116
A note on the instability of columnar vortices
p 46 A85-10360
Internal flows of relevance to gas-turbines
p 49 A85-11635
Theoretical study of two-dimensional and three-dimensional potential flows with rotational source terms - Application to turbomachines — French thesis
p 50 A85-11729
Euler equation simulation of propeller-wing interaction in transonic flow p 6 A85-11977
A kernel function method for computing unsteady load on three-dimensional wings in transonic flow
p 7 A85-12355
Finite element calculation of potential flow around wings
[ONERA, TP NO. 1984-68] p 7 A85-12603
Improvement and extension of a computational method for three-dimensional transonic flows
[ONERA, TP NO. 1984-99] p 8 A85-12620
A time-split finite-volume algorithm for three-dimensional flowfield simulation p 73 A85-12708
Numerical solutions of the Euler equations for complex three-dimensional aerodynamic configurations
[AIAA PAPER 84-2399] p 74 A85-13509
On the stability of an infinite swept attachment line boundary layer p 75 A85-13723
Certain features characterizing the development of coherent flow structures in the initial region of three-dimensional turbulent jets p 76 A85-13795
Computational simulation of free vortex flows using an Euler code p 76 A85-13951
Hypersonic flow past a wing at large angles of attack
p 76 A85-14591
A method for calculating turbulent 3-D flows in diffusers p 79 A85-14889
Effects of slip and chemical reaction models on three-dimensional nonequilibrium viscous shock-layer flows p 80 A85-15506
Aerodynamic methods used in France for the study of propellers for high-speed aircraft
[ONERA, TP NO. 1984-120] p 81 A85-15840
A theory for a three-dimensional hypersonic viscous shock layer in the vicinity of a plane of symmetry
p 141 A85-16217
A finite element penalty algorithm for the parabolic Navier-Stokes equations for turbulent three-dimensional flow p 162 A85-16286
A vortex-lattice method for general, unsteady aerodynamics p 144 A85-18511
Study of delta wing characteristics as a fan blade model. I - Visualization of three-dimensional flow by smoke wire method p 144 A85-18527
An analysis of unsteady torque on a quasi-three-dimensional centrifugal impeller
p 165 A85-18531
Computation of three-dimensional flows for application to transonic compressors
[ONERA, TP NO. 1984-146] p 204 A85-19260
A comparison of different three-dimensional singularity methods for modelling internal flows
[ONERA, TP NO. 1984-150] p 205 A85-19264
Three-dimensional effects on a pitching lifting surface
[AIAA PAPER 85-0041] p 208 A85-19476
Turbulence structure of a three dimensional impinging jet in a cross stream
[AIAA PAPER 85-0044] p 208 A85-19478
Three-dimensional inviscid flow analysis of turbofan forced mixers
[AIAA PAPER 85-0086] p 210 A85-19510
A theory for the core of a three-dimensional leading-edge vortex
[AIAA PAPER 85-0108] p 210 A85-19524
Three-dimensional Euler solutions with grid embedding
[AIAA PAPER 85-0121] p 211 A85-19532
Numerical solution of the Euler equations for high-speed, blended wing-body configurations
[AIAA PAPER 85-0123] p 211 A85-19534
Three-dimensionality in unsteady flow about a wing
[AIAA PAPER 85-0132] p 212 A85-19543
A new iterative matrix solution procedure for three-dimensional panel methods
[AIAA PAPER 85-0176] p 213 A85-19568
Application of axisymmetric analogue for calculating heating in three-dimensional flows
[AIAA PAPER 85-0245] p 216 A85-19611
Aerodynamics of an aspect ratio 8 wing at low Reynolds numbers
[AIAA PAPER 85-0278] p 217 A85-19630
A three-dimensional Navier-Stokes/Euler code for blunt-body flow computations
[AIAA PAPER 85-0361] p 220 A85-19696
A Navier-Stokes calculation of 3-D, turbulent flow near a propeller in a shear flow
[AIAA PAPER 85-0365] p 220 A85-19698
Computational particle trajectory analysis on a 3-dimensional engine inlet
[AIAA PAPER 85-0411] p 222 A85-19732
Three-dimensional airflow and hydrometeor trajectory calculation with applications
[AIAA PAPER 85-0412] p 222 A85-19733
Split-flux-vector solutions of the Euler equations for three-dimensional configurations
[AIAA PAPER 85-0434] p 223 A85-19747
Tomographic reconstruction of three-dimensional flow over airfoils
[AIAA PAPER 85-0479] p 225 A85-19776
Noniterative three-dimensional grid generation using parabolic partial differential equations
[AIAA PAPER 85-0485] p 300 A85-19782
A three-dimensional adaptive grid method — for computational fluid dynamics
[AIAA PAPER 85-0486] p 225 A85-19783
Simulation of transonic three-dimensional nacelle/inlet flowfields using an Euler/Navier-Stokes algorithm
[AIAA PAPER 85-0084] p 226 A85-19798
A new approach to some hybrid aerodynamic problems of airfoil cascades on a general streamsheet of revolution
I p 228 A85-20229
Complete three-dimensional flow solution of a cascade incorporating splitter vanes of arbitrary geometry
p 228 A85-20230
Calculation and analysis of the three-dimensional flow in centrifugal compressor impellers p 228 A85-20231
The fundamental equations of 3-dimensional two-phase particulate gas flow and a twofold stream surfaces model of solution for particulate gas flow in turbomachines
p 228 A85-20233
Application of digital interferogram evaluation techniques to the measurement of three-dimensional flow fields
[AIAA PAPER 85-0037] p 288 A85-20852
Experiments on the stability of crossflow vortices in swept-wing flows
[AIAA PAPER 85-0493] p 231 A85-20873

Real-gas flowfields about three-dimensional configurations p 231 A85-21830

Flowfield analysis of low bypass ratio test cells p 265 A85-21839

Calculation of three-dimensional unsteady incompressible flows by a vortex method p 291 A85-22240

Unsteady flow at the outlet of the high specific speed centrifugal compressor impeller
[ASME PAPER 84-JPGC-GT-10] p 365 A85-23194

Three-dimensional unsteady flow in an axial flow turbine p 314 A85-23388

Approximate factorization algorithm for three-dimensional transonic nacelle/inlet flowfield computations p 314 A85-23392

Experimental and theoretical study of transition phenomena on an infinite swept wing p 317 A85-24804

A lower bound for three-dimensional turbulent separation in supersonic flow p 318 A85-25149

The solution of variational finite element method for the inverse problem on S2 relative stream surface in turbines p 318 A85-25215

Some analytical solutions applicable to verify 3-D numerical methods in turbomachines p 318 A85-25216

General characteristic theory of aerodynamics with oblique curvilinear coordinate system p 318 A85-25217

A special boundary element technique in transonic flow p 385 A85-26690

X-marching methods to solve the Navier-Stokes equations in two- and three-dimensional flows
[ONERA, TP NO. 1985-6] p 387 A85-27886

Transition calculations in three-dimensional flows
[ONERA, TP NO. 1985-7] p 387 A85-27887

A field panel/finite difference method for potential unsteady transonic flow p 391 A85-29084

Computation of three-dimensional viscous flows using a space-marching method p 392 A85-29259

Three-dimensional nonequilibrium viscous flow over the Shuttle Orbiter with catalytic surface effects p 392 A85-29301

Experimental investigation of losses and secondary flow in an axial compressor stage p 524 A85-31007

A harmonic gradient method for unsteady supersonic flow calculations p 473 A85-32583

Computation of three-dimensional turbulent shear flows in corners p 474 A85-32607

Mean velocity and static pressure distributions in a three-dimensional turbulent free jet p 546 A85-35155

The split-coefficient matrix method for supersonic three dimensional flow p 550 A85-35771

The separation criteria and flow behavior for three-dimensional steady seperated flow p 551 A85-35783

Numerical analysis of a 3-D separated flow p 552 A85-35792

Separated flows p 600 A85-36302

Investigation of three-dimensional separated flows p 619 A85-37338

Quasi-three-dimensional blade design code p 622 A85-37928

The solution of transonic flow through three-dimensional turbine blade p 622 A85-37929

A general theory of hybrid problems of fully 3-D compressible potential flow in turbo-rotors. I - Axial flow, stream function formulation p 622 A85-37931

Numerical simulation of three-dimensional transonic flow in a turbomachinery p 625 A85-38965

Numerical solution of two- and three-dimensional rotor tip leakage models p 626 A85-38969

Computation of three-dimensional flow using the Euler equations and a multiple-grid scheme p 627 A85-39200

Multigrid calculation of transonic flow past wing-tail-fuselage combinations p 628 A85-39216

Aerodynamics of an aspect ratio 8 wing at low Reynolds numbers p 628 A85-39223

Application of 3-D flow computations to gas turbine aerodynamic design
[AIAA PAPER 85-1216] p 630 A85-39659

Calculation of three-dimensional, viscous flow through turbomachinery blade passages by parabolic marching
[AIAA PAPER 85-1408] p 632 A85-39767

Vortex panel calculation of wake rollup behind a large aspect ratio wing
[AIAA PAPER 85-1561] p 710 A85-40686

An experimental study of three-dimensional shock wave/turbulent boundary layer interactions in a supersonic flow
[AIAA PAPER 85-1566] p 711 A85-40691

Computation of three-dimensional transonic viscous flowfields using unsteady parabolized Navier-Stokes equations
[AIAA PAPER 85-1595] p 713 A85-40711

Numerical simulation of flow through scramjet inlets using a three-dimensional Navier-Stokes code
[AIAA PAPER 85-1664] p 716 A85-40760

On the accuracy of the pseudocompressibility method in solving the incompressible Navier-Stokes equations
[AIAA PAPER 85-1689] p 717 A85-40772

Simulation of wing, fuselage, and wing/fuselage flowfields using a three-dimensional Euler/Navier-Stokes algorithm
[AIAA PAPER 85-1693] p 718 A85-40775

Three-dimensional unsteady Euler equations solutions on dynamic grids
[AIAA PAPER 85-1704] p 790 A85-40776

2-D and 3-D Euler flow calculations with a second-order accurate Galerkin finite element method
[AIAA PAPER 85-1706] p 718 A85-40779

Calculation of compressible flow about three-dimensional inlets with auxiliary inlets, slats and vanes by means of a panel method
[AIAA PAPER 85-1196] p 719 A85-40817

Convergence acceleration for a three-dimensional Euler/Navier-Stokes zonal approach
[AIAA PAPER 85-1495] p 720 A85-40934

Analysis of three-dimensional separated flow with the boundary-layer equations
[AIAA PAPER 85-1499] p 791 A85-40936

Computation of three-dimensional viscous transonic flows with the LU factored scheme
[AIAA PAPER 85-1510] p 721 A85-40945

A fast, time-accurate unsteady full potential scheme
[AIAA PAPER 85-1512] p 802 A85-40947

A 3-D chimera grid embedding technique
[AIAA PAPER 85-1523] p 802 A85-40955

Two- and three-dimensional grid generation for internal flow applications of computational fluid dynamics
[AIAA PAPER 85-1526] p 803 A85-40958

3-D finite element solution of steady Euler transonic flow by stream vector correction
[AIAA PAPER 85-1532] p 722 A85-40967

Unsteady, separated flow p 791 A85-40989

Recent tendency of flow field calculations with three-dimensional separation around high velocity vehicle p 723 A85-40992

Computational study of three-dimensional wake structure
[AIAA PAPER 85-1617] p 725 A85-41404

Three dimensional CSCM method for the compressible Navier-Stokes equations with application to a multi-nozzle exhaust flowfield
[AIAA PAPER 85-1193] p 726 A85-41419

Fully-three dimensional flow field analysis through turbine stages - Comparison between computation and experiments p 727 A85-41805

A comparison of the Streamline Curvature Method with the Matrix Method used for turbo-machinery design in non-orthogonal curvilinear coordinate system p 728 A85-41816

Purely three-dimensional analysis of a flow in an axial rotor by panel method p 728 A85-41817

Finite element analysis for 3-D compressible potential flow in turbomachinery p 728 A85-41818

The three-dimensional compressible flow in a radial inflow turbine scroll p 729 A85-41826

Measurement of the three-dimensional unsteady flow inside a rotor blade passage of an axial-flow fan p 729 A85-41827

Measurement of 3-D unsteady flow downstream of rotor and stator blades in axial-flow compressors p 729 A85-41828

Large-angle cone-shaped bodies in supersonic three-dimensional stream p 730 A85-42040

Flow structure capturing on overset patched meshes
[AIAA PAPER 85-1690] p 731 A85-42690

Iterative three-dimensional transonic wing design using integral equations p 731 A85-42928

Finite analytic prediction of turbulent flow past an inclined cylinder p 733 A85-42963

Flow over surface-mounted semi-bluff bodies p 735 A85-42977

Computation of three-dimensional shock-wave/turbulent boundary-layer interaction flows p 736 A85-42980

Flow characteristics of a body of revolution at incidence p 737 A85-42986

An interactive scheme for three-dimensional transonic flows p 737 A85-42992

Inviscid analysis of advanced turboprop propeller flow fields
[AIAA PAPER 85-1263] p 814 A85-43977

Computational technique for compressible vortex flows past wings at large incidence p 816 A85-45836

Three-dimensional tomographic reconstruction of the flow around a revolving helicopter rotorblade - A numerical simulation p 903 A85-47106

Extension and use of numerical procedure for the three dimensional unsteady transonic flows
[ONERA, TP NO. 1985-67] p 868 A85-47269

Aerodynamic models for propellers for fast aircraft
[ONERA, TP NO. 1985-55] p 868 A85-47301

Contribution to theory of similitude of subsonic flow p 868 A85-48189

A computational study of complex three-dimensional compressible turbulent flowfields p 869 A85-48526

A three-dimensional, block-structured finite element grid generation scheme — for flow around aircraft modeling p 869 A85-48530

Calculation of three-dimensional flowfields by the unsteady method of characteristics p 869 A85-48532

Full potential solutions of three-dimensional supersonic flows p 871 A85-49133

Aerodynamics of airfoils subject to 3-dimensional periodic gusts
[AD-A145149] p 10 N85-10018

Transonic wing and far field test data on a high aspect ratio transport wing for three dimensional computational method evaluation p 19 N85-10021

Characteristic boundary conditions for three-dimensional transonic unsteady aerodynamics
[NASA-TM-86292] p 12 N85-10915

Two- and three-dimensional model and wall data from a flexible-walled transonic test section p 82 N85-12015

A data base for three-dimensional all-interference code evaluation p 83 N85-12017

Flow calculation on a thin wing, with specific attention to separation point at the trailing edge
[FTW-FO-1721] p 146 N85-13787

Turbulent bubbles behind airfoils and wings at high angle of attack p 296 N85-16779

Aerodynamic issues in the design of high-lift systems for transport aircraft p 256 N85-16780

Application of two and three-dimensional criteria for calculating transitions and boundary layers over swept wings p 237 N85-16783

Three-dimensional unsteady lifting surface theory in the subsonic range
[NASA-TM-77812] p 397 N85-21111

Experimental studies of Quasi-Two-Dimensional and three-dimensional viscous interaction regions induced by skewed-shock and swept-shock boundary layer interactions
[AD-A150060] p 449 N85-21587

On the solution of the three-dimensional flowfield about a flow-through nacelle
[NASA-TM-87448] p 477 N85-22371

Preliminary development of an approximation procedure for supercritical wing design optimization applications
[AD-A150177] p 500 N85-22383

The generation of three-dimensional body-fitted coordinate systems for viscous flow problems
[AD-A150861] p 536 N85-24848

Unsteady transonic aerodynamic and aeroelastic calculations about airfoils and wings p 555 N85-25185

Numerical example of three-dimensional flying object in shockless transonic flow p 558 N85-26623

Study of the primary zone of gas turbine hearths
[ONERA-RTS-22/3256-EY] p 583 N85-26719

A method for computing the core flow in three-dimensional leading-edge vortices
[NASA-TM-87469] p 741 N85-29932

Extension of the small perturbations method in three-dimensional transonic, unsteady flow to the case of real wings
[ONERA-NT-17/3064-RY-070-R] p 743 N85-31017

A new finite element approach: Progress in inviscid flow computations
[NASA-TM-86434] p 798 N85-31450

A three-dimensional viscous flow analysis for the helicopter tip vortex generation problem
[NASA-CR-3906] p 874 N85-34114

**THREE DIMENSIONAL MOTION**

Dynamics of spatial motion of an aeroplane with deformable controls p 115 A85-15716

A solution to the problem of the stability analysis of the three-dimensional motions of flight vehicles p 170 A85-17067

Interception in three dimensions - An energy formulation p 158 A85-18329

Computation of three-dimensional shock wave and boundary-layer interactions
[NASA-TM-86780] p 911 N85-35372

**THRESHOLD LOGIC**

Estimation of the threshold in fatigue crack initiation models: A Bayesian approach
[AD-A144847] p 54 N85-10410

**THROATS**

Transonic flow in the throat region of radial or nearly radial supersonic nozzles p 626 A85-39001

**THROTTLING**
Analysis of aircraft control strategies for microburst encounter — low altitude wind shear p 846 A85-46327
**THRUST**
Computation of the thrust performance of axisymmetric nozzles p 622 A85-37932
A comparative evaluation of certain promising gas-turbine engines of foreign manufacturers in terms of their thrust characteristics and fuel efficiency p 660 A85-39106
Three degree of freedom steady state point performance program: Updated version 1 [CSIR-NIAST-83/48] p 8 N85-10005
Energy efficient engine ICLS engine bearings, drives and configuration: Detail design report [NASA-CR-167871] p 34 N85-10097
On selecting bypass mixers for turbofan engines p 354 N85-18207
Application of an aerodynamic analysis method including attainable thrust estimates to low speed leading-edge flap design for supersonic cruise vehicles [NASA-CR-165843] p 739 N85-29918
Measurement of turbofan-turbojet thrust from tailpipe static pressure [AD-A154036] p 774 N85-29967
**THRUST AUGMENTATION**
Advances in ejector thrust augmentation [AIAA PAPER 84-2425] p 107 A85-13526
A zonal computational approach to thrust augmentor optimization [AIAA PAPER 85-0110] p 262 A85-19525
Cryptosteady modes of energy exchange p 439 A85-26769
Recent developments in ejector design for V/STOL aircraft [SAE PAPER 841498] p 663 A85-39206
Performance characteristics of rectangular and circular thrust augmenting ejectors [AIAA PAPER 85-1344] p 631 A85-39736
Combustion technology - A Navy perspective [AIAA PAPER 85-1400] p 690 A85-39763
An investigation of high performance, short thrust augmenting ejectors [ASME PAPER 84-WA/FE-10] p 697 A85-39873
An engine trade study for a supersonic STOVL fighter-attack aircraft, volume 1 [NASA-CR-166304] p 2 N85-10910
Discussion of the paper, Some Aspects of Propulsion for the Augmenter-Wing Concept, by D. C. Whittley [NASA-TM-77884] p 818 N85-33108
**THRUST CONTROL**
Development of a pneumatic thrust deflecting nozzle [AIAA PAPER 84-2456] p 108 A85-13544
Circulation control technology applied to propulsive high lift systems [SAE PAPER 841497] p 627 A85-39205
Aircraft thrust control scheme for terrain following system [AD-D011387] p 255 N85-15711
**THRUST DISTRIBUTION**
Wing design with attainable leading-edge thrust considerations p 411 A85-26763
Application of a turbulence distortion theory to predict helicopter rotor broadband noise due to inflow turbulence as a function of rotor thrust p 493 A85-31952
Development of a pneumatic thrust deflector [SAE PAPER 841558] p 663 A85-39209
**THRUST LOADS**
Lift and thrust of a linear synchronous engine with a solid-conductor stator winding p 658 A85-37550
**THRUST MEASUREMENT**
From measurement uncertainty to measurement communications, credibility, and cost control in propulsion ground test facilities p 682 A85-39243
Engine thrust measurement uncertainty [AIAA PAPER 85-1404] p 669 A85-39765
Thrust changes induced by ground and ceiling planes on a rotor in hover p 759 A85-43223
The MCA method of determining thrust of jet aircraft in flight — Mass Consumption-Acceleration p 881 A85-49134
Measurement of turbofan-turbojet thrust from tailpipe static pressure [AD-A154036] p 774 N85-29967
Two-plane balance and slip-ring design p 856 N85-33536
**THRUST REVERSAL**
Thrust reversing too complex for computers p 110 A85-14010
Approach and landing technologies for STOL fighter configurations p 414 A85-29254
Thrust reverser effects on fighter aircraft aerodynamics p 547 A85-35577
Axisymmetric thrust reversing thrust vectoring exhaust system for maneuver and balanced field length aircraft [AIAA PAPER 85-1466] p 670 A85-39794
Experimental study of aerodynamic shielding of turbojet engine air intake against exhaust gases p 355 N85-18210
**THRUST VECTOR CONTROL**
Single expansion ramp nozzle development status [AIAA PAPER 84-2455] p 108 A85-13543
Modified F-15 will investigate advanced control concepts p 340 A85-24725
Altitude testing of a flight weight, self-cooled, 2D thrust vectoring exhaust nozzle [SAE PAPER 841557] p 352 A85-25984
Experimental definition of nonaxisymmetric exhaust nozzle plumes — for aircraft thrust vector control p 385 A85-26752
Thrust vectored take-off, landing and ground handling of an airship [AIAA PAPER 85-0877] p 641 A85-38792
Study of an asymmetric flap nozzle as a thrust-vectoring device p 629 A85-39582
Integration of vectoring nozzles in a STOL transonic tactical aircraft [AIAA PAPER 85-1285] p 667 A85-39699
Axisymmetric thrust reversing thrust vectoring exhaust system for maneuver and balanced field length aircraft [AIAA PAPER 85-1466] p 670 A85-39794
Optimization of ski-jump take-off performance [AIAA PAPER 85-1962] p 827 A85-45946
Static internal performance of a two-dimensional convergent nozzle with thrust-vectoring capability up to 60 deg [NASA-TP-2391] p 328 N85-16951
Preliminary performance of a vertical-attitude takeoff and landing, supersonic cruise aircraft concept having thrust vectoring integrated into the flight control system [NASA-CR-172530] p 345 N85-18977
Relative control effectiveness technique with application to airplane control coordination [NASA-TP-2416] p 501 N85-23753
Minimum time turns using vectored thrust [AD-A151693] p 575 N85-25256
Static investigation of several yaw vectoring concepts on nonaxisymmetric nozzles [NASA-TP-2432] p 637 N85-28924
**THUNDERSTORMS**
Charge separation in a Florida thunderstorm p 130 A85-15072
Optimizing the use of surface sensors for wind shear detection p 181 A85-16242
Use of Doppler radar to detect weather hazards such as turbulence, wind shear, and gust fronts p 191 A85-17485
Further observations of X-rays inside thunderstorms p 701 A85-37720
Model of the wind field in a downburst p 701 A85-39218
Nighttime observations of thunderstorm electrical activity from a high altitude airplane p 702 A85-39526
The microburst as a hazard to aviation: Structure, mechanisms, and nowcasting p 56 N85-10491
NASA thunderstorm overflight program: Atmospheric electricity research. An overview report on the optical lightning detection experiment for spring and summer 1983 [NASA-TM-86468] p 128 N85-12330
Aircraft accident report Air Canada, Lockheed L-1011, C-FTNJ, near Charleston, South Carolina, November 24, 1983 [PB84-910413] p 149 N85-13790
Direct-strike lightning photographs, swept-flash attachment patterns, and flight conditions for storm hazards 1982 [NASA-TM-86347] p 454 N85-21877
Comparison of wind velocity in thunderstorms determined from measurements by a ground-based Doppler radar and an F-106B airplane [NASA-TM-86348] p 565 N85-26687
Fluid-dynamic model of a downburst [UTIAS-271] p 609 N85-27441
**THYRISTORS**
Very-short-pulse modulator using asymmetric thyristors p 185 A85-18466
**TILT ROTOR AIRCRAFT**
Joint services vertical lift development (JVX) program - Looking to the future p 71 A85-15592
A longitudinal stability augmentation system for a tilt rotor aircraft [AIAA PAPER 85-0072] p 268 A85-19498
Structural components, design of tilt-rotor JVX near completion p 249 A85-20059
Technology impact on helicopter, tilt rotor, and tilt fold rotor concepts p 494 A85-31971
JVX LCC reduction through front-end logistics p 465 A85-31982
JVX design update p 496 A85-31999
Advanced AFCS developments on the XV-15 tilt rotor research aircraft — Automatic Flight Control System p 512 A85-32013
Airloads on bluff bodies, with application to the rotor-induced downloads on tilt-rotor aircraft p 544 A85-33469
The V-22 Osprey p 755 A85-41068
Speed benefits of tilt-rotor designs for LHX [NASA-CR-166437] p 255 N85-15717
Helicopter aeromechanics: Introduction and historical review p 653 N85-28914
**TILT ROTOR RESEARCH AIRCRAFT PROGRAM**
Simulation validation of the XV-15 tilt-rotor research aircraft p 497 A85-32016
**TILT WING AIRCRAFT**
Future Air Force tactical airlifter considerations [AIAA PAPER 84-2504] p 100 A85-13574
**TILTING ROTORS**
Speed benefits of tilt-rotor designs for LHX [NASA-CR-166437] p 255 N85-15717
**TIME**
Piloted simulation of an algorithm for onboard control of time-optimal intercept [NASA-TP-2445] p 681 N85-28949
**TIME CONSTANT**
Control of lateral conjectory motion of spacecraft in atmosphere p 40 N85-11085
Development of a temperature measurement system with application to a jet in a cross flow experiment [NASA-CR-174896] p 581 N85-25262
**TIME DEPENDENCE**
Evidence of large scale time dependent flow in the wing-wall interaction wake p 49 A85-11629
The computation of transonic nozzle flow-field by a time-dependent method p 625 A85-38963
Can the singularity be removed in time-dependent flows? [AD-P004165] p 324 N85-17950
Influence of normalized frequency on time-dependent aerodynamic characteristics of vane blading profiles p 370 N85-18204
Unsteady flows around 3-dimensional wings [AD-A149993] p 399 N85-21124
A first-order time-domain Green's function approach to supersonic unsteady flow [NASA-CR-172208] p 741 N85-29930
Calculation of steady and unsteady airfoil flow fields via the Navier-Stokes equations [NASA-CR-3899] p 818 N85-33105
**TIME DIVISION MULTIPLE ACCESS**
Time division multiple access differential GPS p 486 A85-32203
'Fancy radio' develops split personality p 749 A85-41057
Feasibility of a UHF/TDM communications link for the worldwide airborne command post (WWABNCP) system p 823 A85-45133
Analytical modeling of a polling protocol — airline information network [ENST-84H001] p 333 N85-18029
**TIME DIVISION MULTIPLEXING**
Multiplexed data bus for aircraft and its role p 763 A85-41018
Applications of wavelength division multiplexing (WDM) and time division multiplexing (TDM) to aircraft data links p 853 A85-44365
**TIME LAG**
Controllability and observability of linear time delay systems p 132 A85-15654
In-flight investigation of the effects of time delay in control system on flying qualities in landing approach [DFVLR-FB-84-35] p 425 N85-19989
On the application of compatibility checking techniques to dynamic flight test data [ARL/AERO-R-161] p 416 N85-21151
In-flight evaluation of pure time delays in pitch and roll [NASA-TM-86744] p 847 N85-32123
**TIME MARCHING**
Conversational time domain analysis for structural dynamics and control interaction problems [AIAA PAPER 84-1871] p 57 A85-10562
On the use of inverse modes of calculation in 2D cascades and ducts [ONERA, TP NO. 1984-132] p 81 A85-15848
A multistage time-stepping scheme for the Navier-Stokes equations [AIAA PAPER 85-0035] p 207 A85-19472
Computation of the thrust performance of axisymmetric nozzles p 622 A85-37932
Numerical simulation of three-dimensional transonic flow in a turbomachinery p 625 A85-38965
The characteristics compatibility conditions on the boundary points are applied to time-marching methods for transonic flow past plane cascades p 625 A85-38967

Application of Runge Kutta time marching scheme for the computation of transonic flows in turbomachines
[AIAA PAPER 85-1332] p 631 A85-39728
An implicit time-marching method for studying unsteady flow with massive separation
[AIAA PAPER 85-1489] p 790 A85-40929
Fully-three dimensional flow field analysis through turbine stages - Comparison between computation and experiments p 727 A85-41805
Prediction of dynamic separation characteristics using a time-stepping viscid/inviscid approach
p 737 A85-42990

**TIME MEASUREMENT**
An aspect of the role of the clock in a GPS receiver
p 485 A85-31745
Effects of aircraft and flight parameters on energy-efficient profile descents in time-based metered traffic
[NASA-CR-172338-ADD] p 245 N85-15706

**TIME OPTIMAL CONTROL**
Time-optimal deceleration of the rotation of an axisymmetric rigid body near the center of mass
p 432 A85-28455
Optimal control synthesis for stochastic systems with allowance for a delay in the control circuit in the case of incomplete and inaccurate information on the system state p 535 A85-31475
Ground based concept for time control of aircraft entering the terminal area
[AIAA PAPER 85-1888] p 824 A85-45910
Optimal fuselage aiming — of fighter aircraft-mounted guns
[AIAA PAPER 85-1961] p 811 A85-45945
Improved feedback algorithms for optimal maneuvers in vertical plane
[AIAA PAPER 85-1976] p 845 A85-45956
Simulation of time-control procedures for the advanced air traffic control system p 878 A85-47686
Minimum time turns using vectored thrust
[AD-A151693] p 575 N85-25256
High specific power aircraft turn maneuvers: Tradeoff of time-to-turn versus change in specific energy
[AD-A151701] p 575 N85-25257

**TIME RESPONSE**
Application of frequency domain and time domain analysis tools to the analysis of nonrecoverable stall
[AIAA PAPER 85-1350] p 765 A85-40836

**TIME SERIES ANALYSIS**
Identification of multivariable high-performance turbofan engine dynamics from closed-loop data
p 109 A85-13630
Time series approximation of unsteady aerodynamics including pole locations as free parameters
[AIAA PAPER 85-0663] p 491 A85-30350
Composite statistical method for modeling wind gusts for aircraft simulation
[AIAA PAPER 85-1750] p 799 A85-40562
Time series analysis of closed-loop pilot vehicle dynamics p 271 N85-16876
Study of longitudinal landing flying qualities evaluation using pilot model theory
[AD-A152194] p 577 N85-26702

**TIME SHARING**
Development and evaluation of a Fault-Tolerant Multiprocessor (FTMP) computer. Volume 2: FTMP software
[NASA-CR-166072] p 804 N85-30706

**TIME SIGNALS**
The technical evolution of on-board clocks
p 853 A85-44053

**TIP DRIVEN ROTORS**
Experimental study of main rotor tip geometry and tail rotor interactions in hover. Volume 1. Text and figures
[NASA-CR-177336-VOL-1] p 466 N85-22344
Experimental study of main rotor tip geometry and tail rotor interactions in hover. Volume 2: Run log and tabulated data
[NASA-CR-177336-VOL-2] p 466 N85-22345
Application of two-dimensional unsteady aerodynamic to a free-tip rotor response analysis
[NASA-CR-177348] p 741 N85-29933

**TIP SPEED**
Experimental investigation of backswept centrifugal compressor impeller. I p 264 A85-20243
Study of controlled diffusion stator blading
[NASA-CR-167995] p 354 N85-18058
Further comparison of wind tunnel and airplane acoustic data for advanced design high speed propeller models
[NASA-TM-86935] p 460 N85-22108
Energy efficient engine. Fan and quarter-stage component performance report
[NASA-CR-168070] p 891 N85-34141

**TIRES**
Techniques to analyze vehicle coastdown data
[DE85-005159] p 399 N85-21127

**TITANIUM**
Mechanical properties of advanced titanium powder metallurgy compacts p 783 A85-40250

**TITANIUM ALLOYS**
Partial alpha-colony fractures and their protrusions during cyclic loading of a titanium alloy
p 42 A85-11907
Introduction of titanium powder metallurgy components to aircraft series production
[MBB-BB-569-84-OE] p 178 A85-16085
Metallurgical and mechanical phenomena due to rubbing of titanium against sintered powder Nichrome
p 291 A85-22281
Aluminum and titanium compared p 433 A85-26481
Orientation relationship between alpha-prime titanium and silicide S2 in alloy Ti-6Al-5Zr-0.5Mo-0.25Si
p 434 A85-27814
The uses of titanium p 519 A85-32023
Modification of titanium powder metallurgy alloy microstructures by strain energizing and rapid omni-directional compaction p 596 A85-35524
The effect of stress raisers on the load-bearing capacity of titanium-alloy compressor blades p 658 A85-37575
Low temperature creep and fracture of near alpha titanium alloys p 687 A85-38748
The influence of microstructure on the temperature-dependent flow properties of Ti-6Al-4V
p 687 A85-38749
Titanium alloys for high temperature applications - A review p 783 A85-40922
Titanium and its alloys for aerospace
p 784 A85-41003
Beta titanium alloys in the 80's; Proceedings of the Symposium, Atlanta, GA, March 8, 1983
p 851 A85-43651
Beta titanium on the SR-71 - Historical note I
p 851 A85-43652
Development and properties of Ti-15V-3Cr-3Sn-3Al (Ti-15-3) p 851 A85-43662
Processing and properties of the Ti-17 alloy for aircraft gas turbine applications p 851 A85-43663
Ti-17 properties — titanium alloy p 851 A85-43671
Development of a quantitative flaw characterization module - A status report p 905 A85-47402
The TA6Zr5D (IMI 685) characterization in strain controlled tests. (Specimens obtained from a forged spinning wheel) no. M4-45870
[M4-45870] p 128 N85-12384
Disc fatigue life predictions for gas turbine engines
p 267 N85-15743
Study of residual stresses introduced into TA6ZrD (685) cylinders by quenching — compressor disk alloy
[PNR-90240] p 372 N85-18435
MBB uses superplastic forming, diffusion bonding for alloys p 446 N85-20177
West Europe report: Science and technology
[JPRS-WST-84-012] p 601 N85-25552
MBB uses new CFC form tool for titanium alloy air intake p 601 N85-25553

**TITANIUM CHLORIDES**
Use of titanium tetrachloride for visualization of accelerating flow around airfoils p 903 A85-47090

**TOLERANCES (MECHANICS)**
The damage tolerance design philosophy
p 46 A85-10543
Metallurgical aspects of metallic materials and damage tolerance in accessory gearboxes p 46 A85-10544
Damage tolerance of metallic structures: Analysis methods and applications p 125 A85-15859
Damage accumulation techniques in damage tolerance analysis p 126 A85-15861
Air force damage tolerance design philosophy
p 126 A85-15866
Concepts and application of aircraft damage tolerance analysis p 645 A85-37206
Manufacturing tolerances for natural laminar flow airframe surfaces
[SAE PAPER 850863] p 884 A85-50103
Development of powder metallurgy 2XXX series Al alloys for high temperature aircraft structural applications
[NASA-CR-172408] p 44 N85-11220
Advances in composites technology
[NASA-TM-86353] p 284 N85-17048
Advanced life analysis methods. Volume 1: Cracking data survey and NDI (nondestructive inspection) assessment for attachment lugs
[AD-A150419] p 528 N85-23108
Advanced life analysis methods. Volume 4: Tabulated test data for attachment lugs
[AD-A151016] p 502 N85-23760
Advanced life analysis methods. Volume 5: Executive summary and damage tolerance criteria recommendations for attachment lugs
[AD-A151017] p 502 N85-23761
Multiaxial and thermomechanical fatigue considerations in damage tolerant design
[NASA-TM-87022] p 597 N85-26964

**TOLLMEIN-SCHLICHTING WAVES**
Disturbance-wave interactions in flows with crossflow
[AIAA PAPER 85-0494] p 226 A85-19788
Instabilities and transition in the wall boundary layers of low-disturbance supersonic nozzles
[AIAA PAPER 85-1573] p 712 A85-40697

**TOMAHAWK MISSILES**
Designing a cruise missile - General Dynamics' BGM-109 Tomahawk p 158 A85-18441

**TOMOGRAPHY**
Optical tomography for flow visualization of the density field around a revolving helicopter rotor blade
p 48 A85-11264
Tomographic reconstruction of three-dimensional flow over airfoils
[AIAA PAPER 85-0479] p 225 A85-19776
Applications of a photomultiplier to visualization of aerodynamic flows by laser tomography
[ONERA, TP NO. 1985-11] p 442 A85-27890
Three-dimensional tomographic reconstruction of the flow around a revolving helicopter rotorblade - A numerical simulation p 903 A85-47106
Reconstruction of a 3-dimensional transonic rotor flow field from holographic interferogram data
[NASA-TM-86690] p 397 N85-21112

**TOOLING**
Tooling problems in the manufacture of AH-64 Composites Flexbeam Tail Rotor p 200 A85-21382

**TOOLS**
Prediction accuracy of the torques for rotary tillage by an analog tool
[AD-P004288] p 379 N85-18865
Aircraft skin penetrator and agent applicator. Volume 2: Test and evaluation
[AD-A151609] p 564 N85-25225

**TOPEX**
TOPEX ground data system p 517 A85-32192

**TOPOGRAPHY**
TOPEX ground data system p 517 A85-32192
Evaluation of Defense Mapping Agency Level V high resolution data for training simulator applications
p 849 A85-45119
A Computer-generated topographic display system for navigation and mission planning in helicopters
p 259 N85-16800
A method for determining mesoscale dynamic topography
[AD-D011412] p 300 N85-17506
Fatigue Crack Topography
[AGARD-CP-376] p 531 N85-24321

**TOPOLOGY**
A generalized algorithm for the topological optimization of the secondary electric power distribution systems of aircraft p 506 A85-31458
Advances in the study of separated flows
p 550 A85-35765
Some developments in vortex motion research
p 738 A85-43239
Shielded enclosures for experimental studies of shielding topology
[AD-A149292] p 447 N85-20227

**TORQUE**
An analysis of unsteady torque on a quasi-three-dimensional centrifugal impeller
p 185 A85-18531
A 2400 kW lightweight helicopter transmission with split-torque gear trains
[ASME PAPER 84-DET-91] p 580 A85-33773
The in-flight estimation and indication of cumulative fatigue damage to helicopter gears
[ARL/AERO-R-164] p 104 N85-12050
Prediction accuracy of the torques for rotary tillage by an analog tool
[AD-P004288] p 379 N85-18865
Advanced gearbox technology in small turbo propeller engines p 510 N85-23771
Superconducting gyroscope research
[NASA-CR-171406] p 604 N85-25795
Estimation of dynamic rotor loads for the rotor systems research aircraft: Methodology development and validation
[NASA-CR-177362] p 760 N85-31045
Two-plane balance and slip-ring design
p 856 N85-33536
Dual towline spin-recovery device
[NASA-CASE-LAR-13076-1] p 895 N85-35200

**TORQUEMETERS**
Tachistoscopic studies of powerplant instruments
p 504 A85-31779
Two-plane balance and slip-ring design
p 856 N85-33536

TORSION
Hygrothermally curvature stable laminates with tension-torsion coupling p 787 A85-43224
Initial sailplane project: The RP-1 p 129 N85-12976

TORSIONAL STRESS
Further investigation of the coupled flapping and torsion dynamics of helicopter rotor blades p 102 A85-13880

TORSIONAL VIBRATION
Flutter of turbofan rotors with mistuned blades p 122 A85-12716
Effects of mistuning on the forced vibration of bladed disks in subsonic flow [AIAA PAPER 85-0760] p 505 A85-30377
The effect of aerodynamic and structural detuning on turbomachine supersonic unstalled torsional flutter [AIAA PAPER 85-0761] p 506 A85-30378
Measurement of unsteady pressure distribution on oscillating airfoils in a turbine annular cascade p 769 A85-41829
Optimization of cascade blade mistuning. I - Equations of motion and basic inherent properties p 771 A85-42365

TORSO
Torso restraint system [AD-D011609] p 584 N85-26684

TOWED BODIES
A Lagrange-D'Alembert formulation of the equations of motion of a helicopter carrying an externally suspended load [NASA-TM-85864] p 416 N85-21148

TOWERS
Some considerations on Aeroelastic instabilities caused by coupling between propeller-type rotor and its supporting structure [NAL-TR-804] p 9 N85-10013

TOXIC HAZARDS
Evaluation of aircraft interior panels under full-scale cabin fire test conditions [AIAA PAPER 85-0393] p 240 A85-19719
The pyrolysis toxic gas analysis of aircraft interior materials [AD-A146285] p 119 N85-12115
Strategies for preparing and submitting a part B application for a DoD facility [AD-P004139] p 375 N85-18475

TRACKING (POSITION)
Real time translator design considerations — for Global Positioning System p 487 A85-32208
Device for measuring relative axial expansion of turbine rotor employing space-vector tracking method p 169 N85-14962
Stereo Electro-optical Tracking System (SETS) [NASA-CR-172471] p 295 N85-16096
Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 1 [NASA-CR-167862] p 913 N85-35534
Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 2 [NASA-CR-167863] p 913 N85-35535

TRACKING FILTERS
A three-dimensional Kalman filter for short observation times to extrapolate flight trajectories — German thesis p 301 A85-19835
An investigation of association region in maneuvering multi-target tracking p 410 A85-29697
Nonlinear and adaptive filters for aircraft tracking — German thesis p 485 A85-31848
Algorithms for improved, heading assisted, maneuver tracking p 644 A85-39458
A distributed aeroacoustic tracking algorithm p 917 A85-47774
Algorithm for tracking manuevering object with ambiguous measurements p 189 N85-15057

TRACKING NETWORKS
A balloon tracking system that uses the VHF omidirectional range (VOR) network p 643 A85-38313
A distributed aeroacoustic tracking algorithm p 917 A85-47774

TRACKING PROBLEM
Integrated tracking software for multimode operation [AIAA PAPER 84-2614] p 193 A85-17814
Decoupling of high-gain multivariable tracking systems p 172 A85-18332
An Optimal, Proportional-plus-integral/Tracking control law for aircraft applications p 513 A85-33282
A plane-tracking method p 750 A85-43236
Identification of pilot dynamics from in-flight tracking data [AIAA PAPER 85-1945] p 845 A85-45935
A likelihood function method for multiple aircraft maneuver tracking p 868 A85-47699
A new approach to the maneuvering target tracking problem p 917 A85-47769

TRACKING RADAR
Design decisions guide airborne radar p 409 A85-27846
A proof-of-principle getaway special free-flying satellite demonstration p 40 N85-11051
Avionics Flight Evaluation System (AFES) p 505 N85-22357

TRACKING STATIONS
Translated GPS real-time tracking p 487 A85-32209

TRACTORS
The analysis on the dynamic performance of a single lug [AD-P004289] p 379 N85-18866

TRADEOFFS
High specific power aircraft turn maneuvers: Tradeoff of time-to-turn versus change in specific energy [AD-A151701] p 575 N85-25257

TRAILING EDGE FLAPS
MBB studies variable camber wings to improve lift, expand fleet uniformity p 474 A85-32799
Pressure distribution data from tests of 2.29 M (7.5 feet) span EET high-lift transport aircraft model in the Ames 12-foot pressure tunnel [NASA-TM-84517] p 709 N85-29912
Low-speed tests of a high-aspect-ratio, supercritical-wing transport model equipped with a high-lift flap system in the Langley 4- by 7-meter and Ames 12-foot pressure tunnels [NASA-TP-2097] p 742 N85-31010

TRAILING EDGES
Airfoil trailing edge flow measurements and comparison with theory, incorporating open wind tunnel corrections [AIAA PAPER 84-2266] p 4 A85-10831
Reynolds-stress measurements in a turbulent trailing vortex p 77 A85-14244
Dynamic edge effects during the aeroelastic vibration of plates p 124 A85-15248
Effect of angle of attack on rotor trailing-edge noise p 134 A85-15346
Roll up of strake leading/trailing-edge vortex sheets for double-delta wings p 144 A85-18519
A class of airfoils having finite trailing edge pressure gradients [AIAA PAPER 85-0206] p 215 A85-19590
Free surface scars and striations due to trailing vortices generated by a submerged lifting surface [AIAA PAPER 85-0445] p 286 A85-19754
Experimental results for Reynolds number effects on trailing vortices p 232 A85-21849
Scaling of airfoil self-noise using measured flow parameters p 304 A85-21856
Viscid/inviscid interaction analysis of separated trailing-edge flows p 390 A85-29076
The Kutta condition in unsteady flow p 471 A85-31183
Experimental investigation of a simulated compressor airfoil trailing-edge flowfield p 474 A85-32618
Diffraction of a baffled dipole - Frequency dependence p 611 A85-33915
Massive separation and dynamic stall on a cusped trailing-edge airfoil p 735 A85-42974
Wing span loads of complex high-lift systems from wake measurements p 817 A85-45850
Characteristics of a trailing-edge flow with turbulent boundary-layer separation p 872 A85-49368
Experimental studies of transonic airfoil trailing edge and wake flowfield properties p 146 N85-13773
Simultaneous flow visualization and unsteady lift measurement on an oscillating lifting surface [AD-P004157] p 323 N85-17942
Current status of trailing edge loss calculation for a turbine blade [PNR-90244] p 354 N85-18061
Aerodynamic heating rate distributions induced by trailing edge controls on hypersonic aircraft configurations at Mach 8 [NASA-TM-87453] p 476 N85-22370
Low-speed characteristics of a circulation control airfoil with AFT camber and a spiral trailing edge [AD-A150851] p 481 N85-23725
A design procedure to modify the trailing edge upper surface pressure gradient of a given aerofoil [GU-AERO-8408] p 874 N85-34120
Reflection plane tests of a wind turbine blade tip section with ailerons [NASA-TM-87018] p 912 N85-34444

TRAINING AIRCRAFT
25,000 flight hours in the Alpha jet by the 8th chase squadron. I p 159 A85-18725
Japanese aerospace advances with XT-4 military trainer p 571 A85-33871
Tweety-bird replacement — from T-37B to Fairchild T-46A trainer aircraft p 646 A85-37945
Realism provided in a procedural trainer — for F-15 aircraft p 848 A85-45117
Pegasus - An intermediate/advanced Navy jet trainer aircraft p 829 A85-46997
Analysis of the flow field about a T-45 using PANAIR [AD-A146811] p 238 N85-15899
Collision avoidance for Naval training aircraft [FAA-PM-84-4] p 410 N85-21136
Aircraft structure for application to training aircraft [CH-635286-A5] p 574 N85-25244
RAFTS: A T-38 replacement for the 21st century [AD-A156103] p 887 N85-35191

TRAINING ANALYSIS
Pilot education and safety awareness programs p 333 N85-18026

TRAINING DEVICES
Meeting tomorrow's standards with yesterday's simulators - The problems of upgrading p 174 A85-17228
Simulators/training devices for commuter airlines p 174 A85-17232
Onboard simulation - A newly emerging technology and the potential of the helmet mounted display as an embedded training device [AIAA PAPER 85-1737] p 757 A85-42864
Realism provided in a procedural trainer — for F-15 aircraft p 848 A85-45117
Aeronautical systems technology needs: Escape, rescue and survival, test facilities and test equipment and training-simulation equipment [AD-A145069] p 1 N85-10002
Training effectiveness evaluation and utilization demonstration of a low cost cockpit procedures trainer [AD-A145179] p 38 N85-10078
Simulating speed and height cues in the C-130 weapon system trainer [AD-P004313] p 358 N85-17967
Cockpit resources management and the theory of the situation p 333 N85-18022
Cockpit resource management training p 333 N85-18023
Pilot education and safety awareness programs p 333 N85-18026
Initiative uses of aircraft for flight training p 333 N85-18027
New flight simulators at Vnukovo permit less in-flight training p 429 N85-21107

TRAINING EVALUATION
Training effectiveness evaluation and utilization demonstration of a low cost cockpit procedures trainer [AD-A145179] p 38 N85-10078
NASA Ames Summer High School Apprenticeship Research Program [NASA-TM-86006] p 613 N85-26590
The use of flight simulators in measuring and improving training effectiveness [AD-A153817] p 684 N85-28954

TRAINING SIMULATORS
Visual simulation takes flight — Computer-generated imagery for improving realism of aircraft landing p 116 A85-15581
Modular simulators, their feasibility, design, and procurement [AIAA PAPER 85-0312] p 274 A85-19659
History of the development and manufacture of flight simulators in Czechoslovakia and the rest of the world p 275 A85-19878
Television systems for flight simulators p 427 A85-29862
Simulators for training aircraft maintenance personnel p 427 A85-29863
Current trends in the development of flight simulators p 427 A85-29866
Prospects for the development of flight simulation equipment p 427 A85-29867
AV-8B Harrier II training capabilities [AIAA PAPER 85-1734] p 779 A85-40554
Cost effectiveness of simulated aircraft maintenance training systems p 848 A85-45118
Evaluation of Defense Mapping Agency Level V high resolution data for training simulator applications p 849 A85-45119
CAUTRA ATC simulator strives for realism p 897 A85-48857
Advances in flight simulators p 898 A85-49019
The use of flight simulators in measuring and improving training effectiveness [AD-A153817] p 684 N85-28954

TRAJECTORIES
Numerical calculation of subsonic jets in crossflow with reduced numerical diffusion [AIAA PAPER 85-1441] p 697 A85-39780
The development of the generalized escape system simulation program [ASME PAPER 84-WA/DSC-20] p 651 A85-39869

A Generalized Escape System Simulation (GESS) computer program. Volume 2: GESS programmer's manual, version 2
[AD-A148363] p 243 N85-16845

A user's manual for AMEER flight path trajectory simulation code
[DE85-006580] p 578 N85-25280

Numerical calculation of subsonic jets in crossflow with reduced numerical diffusion
[NASA-TM-87003] p 581 N85-25283

**TRAJECTORY ANALYSIS**

Root locus method and automatic identification of modes in flutter analysis p 35 A85-12356

Development of a 3-D interactive graphics flight path analysis program for the T-38 aircraft
[AIAA PAPER 84-2439] p 113 A85-13533

A new technique to determine inflight store separation trajectories p 70 A85-13886

The dynamics of takeoff and landing of aircraft — Russian book p 115 A85-14836

Second-order p-iterative solution of the Lambert/Gauss problem — algorithm for efficient orbit determination p 177 A85-18674

A three-dimensional Kalman filter for short observation times to extrapolate flight trajectories — German thesis p 301 A85-19835

Development of a velocity control algorithm for controlling a 6-DOF captive trajectory model support p 427 A85-29587

Energy-modelled climb and climb-dash - The Kaiser technique — reviewed for Me 262 jet fighter aircraft trajectories p 572 A85-35350

Algorithm for tracking manuevering object with ambiguous measurements p 189 N85-15057

**TRAJECTORY CONTROL**

Sensitivity reduction and robust tracking with application to aircraft control p 513 A85-33283

New analytical results for AOTV guidance
[AIAA PAPER 85-1820] p 849 A85-43866

Heuristically-guided planning for mission control/decision support
[AIAA PAPER 85-1909] p 850 A85-45819

Further application of output predictive algorithmic control to terrain following p 894 A85-47734

**TRAJECTORY MEASUREMENT**

Estimating the trajectory of an accelerationless aircraft by means of a stationary acoustic sensor p 64 A85-12300

Friendly ejection seat trajectory computer program p 330 A85-22754

Selectable thrust rocket motor for crew escape systems p 340 A85-22758

Investigation of the use of radar data for the measurement of parachute rate of descent and glide ratio p 331 A85-22764

A method for determining the flight trajectory of an ejection seat p 493 A85-31778

Trajectory estimation using translated GPS signals p 487 A85-32207

Trajectory measurements for take-off and landing tests and other short-range applications, volume 16
[AGARD-AG-160-VOL-16] p 604 N85-25801

**TRAJECTORY OPTIMIZATION**

Interception in three dimensions - An energy formulation p 158 A85-18329

Periodic optical cruise of an atmospheric vehicle p 158 A85-18330

Isochrones for maximum endurance horizontal gliding flight p 158 A85-18348

Maximum final energy chandelle
[AIAA PAPER 85-0200] p 247 A85-19584

A parallel quasi-linearization algorithm for air vehicle trajectory optimization
[AIAA PAPER 85-0498] p 279 A85-19792

Calculation of the minimum-time loop maneuver for jet aircraft p 269 A85-19876

Least acceleration motion for given terminal conditions p 459 A85-26443

Separation of time scales in aircraft trajectory optimization p 411 A85-26444

Vector optimization of aircraft deceleration in air p 423 A85-27795

Time-optimal deceleration of the rotation of an axisymmetric rigid body near the center of mass p 432 A85-28455

Onboard near-optimal climb-dash energy management p 497 A85-32781

Instationary dolphin flight - The optimal energy exchange between a sailplane and vertical currents in the atmosphere p 646 A85-37488

Aircraft intercept vectoring in a known wind field
[AIAA PAPER 85-1782] p 824 A85-43842

Effect of maximum lift to drag ratio on optimal aeroassisted plane change
[AIAA PAPER 85-1817] p 849 A85-43863

Optimal flight paths through microburst wind profiles
[AIAA PAPER 85-1833] p 839 A85-43872

Improved feedback algorithms for optimal maneuvers in vertical plane
[AIAA PAPER 85-1976] p 845 A85-45956

Minimax optimal control and its application to the reentry of a space glider p 899 A85-47306

Minimum time turns using vectored thrust
[AD-A151683] p 575 N85-25256

Piloted simulation of an algorithm for onboard control of time-optimal intercept
[NASA-TP-2445] p 681 N85-28949

**TRANSATMOSPHERIC VEHICLES**

Transatmospheric vehicles - A challenge for the next century
[AIAA PAPER 84-2414] p 98 A85-12619

NASA R and T aerospace plane vehicles: Progress and plans
[NASA-TM-86429] p 595 N85-25366

**TRANSCONTINENTAL SYSTEMS**

Airlines reach out for longer range - Twins cross the Atlantic; long-haul flights get longer p 752 A85-40071

**TRANSDUCERS**

Innovative eddy current probe coupling method p 906 A85-47472

Unsteady pressure measurements on a biconvex airfoil in a transonic oscillating cascade
[NASA-TM-86914] p 234 N85-15889

R and D activities of the Systems Engineering Division p 808 N85-32027

**TRANSEQUATORIAL PROPAGATION**

Anomalous interference in Omega VLF wave propagation on east-to-west equatorial paths p 14 A85-11024

**TRANSFER FUNCTIONS**

Time series approximation of unsteady aerodynamics including pole locations as free parameters
[AIAA PAPER 85-0663] p 481 A85-30350

Definition of acceptable levels of mismatch for equivalent systems of augmented CTOL (Conventional Take-Off and Landing) aircraft
[AD-A148619] p 37 N85-11007

Model synthesis of multidimensional PI-regulators for objects with inertial sections p 529 N85-24064

A study of interior noise levels, noise sources and transmission paths in light aircraft
[NASA-CR-172152] p 805 N85-30766

**TRANSFER ORBITS**

Orbit control of a synchronous satellite — Russian book p 886 A85-49448

**TRANSFERRING**

Chemical and photographic evaluation of rigid explosive transfer lines
[AD-A149303] p 437 N85-20145

**TRANSFORMATIONS (MATHEMATICS)**

The determination of load and slope transformation matrices for aeroelastic analysis p 794 A85-42940

A conformal mapping suitable for problems involving interaction between given geometries and known far fields
[AD-A149050] p 376 N85-19744

Application of Floquet theory to helicopter blade flapping stability
[AD-A154480] p 760 N85-29952

**TRANSIENT HEATING**

A synthesizing procedure for transient temperatures in composed structures
[AIAA PAPER 85-0830] p 523 A85-30319

Quantitative evaluation of transient heat transfer on axial flow compressor stability
[AIAA PAPER 85-1352] p 687 A85-39742

**TRANSIENT LOADS**

Unsteady loading of leading-edges in unstable flows - An overview
[AIAA PAPER 84-2306] p 4 A85-10857

Crack growth geometry in aluminum alloy sheet material under flight simulation loading. 1: A comparison between TWIST and miniTWIST FALSTAFF and short FALSTAFF. 2: Effect of truncating high loads
[VTH-LR-441] p 436 N85-20119

**TRANSIENT PRESSURES**

Surge transient simulation in turbo-jet engine p 169 N85-13796

**TRANSIENT RESPONSE**

A new approach to applying electromagnetic transient protection requirements to avionic and electronic equipment p 439 A85-26684

Transient aerodynamic characteristics of a two-dimensional airfoil during stepwise incidence variation p 731 A85-42929

Hydrodynamic simulation of transient processes in injection system of aircraft engines during pump unseating p 509 N85-22829

**TRANSITION FLOW**

Experimental and theoretical study of transition phenomena on an infinite swept wing p 317 A85-24604

Active transition fixing and control of the boundary layer in air
[AIAA PAPER 85-0564] p 389 A85-25930

Transition calculations in three-dimensional flows
[ONERA, TP NO. 1985-7] p 387 A85-27867

Stability experiments in the flow over a rotating disk p 444 A85-29081

A nonstationary transition process caused by injection of a gas into the near wake of a body in a supersonic flow p 619 A85-37336

Stability characteristics of a supersonic boundary layer and their relation to the position of the laminar-turbulent transition point p 730 A85-42123

Boundary layer control by transition fixing — conference
[DFVLR-MITT-84-17] p 479 N85-23712

Investigation of the conditions for tripping transition with roughness elements and their influence on boundary layer development p 480 N85-23720

Transition fixing and simulation of high Reynolds number flow at transonic velocities p 480 N85-23721

Development of a temperature-compensated hot-film anemometer system for boundary-layer transition detection on high-performance aircraft
[NASA-TM-86732] p 835 N85-33121

Nozzle wall roughness effects on free-stream noise and transition in the pilot low-disturbance tunnel
[NASA-TM-86389] p 910 N85-34355

**TRANSLATIONAL MOTION**

The unsteady boundary layer on an elliptic cylinder following the impulsive onset of translational and rotational motion — dynamic stall p 477 N85-23699

**TRANSMISSION EFFICIENCY**

Problems of radome design for modern airborne radar. II p 599 A85-34661

Correlation of rheological characteristics of lubricants with transmission efficiency measurements
[NASA-TM-86968] p 796 N85-30342

**TRANSMISSION LOSS**

Atmospheric propagation losses for long-range airborne radar systems analysis
[AIAA PAPER 85-0287] p 244 A85-19620

Field-incidence noise transmission loss of general aviation aircraft double-wall configurations p 304 A85-21842

Mechanisms of acoustical energy transfer by a cylindrical shell near the ring frequency p 861 A85-44039

Noise transmission loss of a rectangular plate in an infinite baffle
[NASA-TP-2398] p 461 N85-22109

**TRANSMISSIONS (MACHINE ELEMENTS)**

Metallurgical aspects of metallic materials and damage tolerance in accessory gearboxes p 46 A85-10544

Development of a graphite/polyimide composite transmission housing p 281 A85-21380

An engine for a light helicopter p 353 A85-26024

Acoustic vibration characteristics of high contact ratio planetary gears p 524 A85-31954

Will propfans require gearboxes? p 507 A85-32946

A 2400 kW lightweight helicopter transmission with split-torque gear trains
[ASME PAPER 84-DET-91] p 580 A85-33773

Advanced techniques for health and usage monitoring of helicopter transmissions
[AIAA PAPER-85-1142] p 617 A85-39621

The in-flight estimation and indication of cumulative fatigue damage to helicopter gears
[ARL/AERO-R-164] p 104 N85-12050

Investigation on experimental techniques to detect, locate and quantify gear noise in helicopter transmissions
[NASA-CR-3847] p 305 N85-17887

Gears and Power Transmission Systems for Helicopters and Turboprops
[AGARD-CP-369] p 502 N85-23765

Summary of drive-train component technology in helicopters p 509 N85-23766

Current transmission systems p 510 N85-23767

Helicopter transmission lubricants p 520 N85-23768

Special power train requirements for the next generation of rotary-wing aircraft p 510 N85-23769

A state of the art assessment of turboprop transmission technology and projected needs for the next generation p 510 N85-23770

The helicopter transmission design process p 510 N85-23772

Fine filtration: An attractive route towards lower helicopter operating costs p 503 N85-23774

Possible technological answers to new design requirements for power transmission systems p 510 N85-23779

Transmission efficiency measurements and correlations with physical characteristics of the lubricant p 521 N85-23781

Problems of elastic hydrodynamic lubrication of helicopter transmission gears p 521 N85-23784

Evolution of the design techniques for helicopter main transmission gearboxes p 510 N85-23789

Do new aircraft need new technologies and certification rules? p 503 N85-23795

Establishment and maintenance of certification standards for helicopter and turboprop power transmission systems p 503 N85-23796

Correlation of rheological characteristics of lubricants with transmission efficiency measurements [NASA-TM-86986] p 796 N85-30342

Estimation of dynamic rotor loads for the rotor systems research aircraft: Methodology development and validation [NASA-CR-177362] p 760 N85-31045

**TRANSOCEANIC FLIGHT**

Extended range operation of twin-engined transport aircraft (ETOPS) [AIAA PAPER 84-2512] p 69 A85-13578

Aeronautical satellite data link study p 855 A85-45340

**TRANSONIC COMPRESSORS**

Computation of three-dimensional flows for application to transonic compressors [ONERA, TP NO. 1984-146] p 204 A85-19260

Computation of potential flow on S2 stream surface for a transonic axial-flow compressor rotor p 315 A85-24091

Investigations on transonic double circular arc (DCA)profiles of axial flow compressor - Calculations of profile design p 318 A85-25214

Simplified implicit block-bidiagonal finite difference method for solving the Navier-Stokes equations p 695 A85-39003

A technique for the evaluation of the magnitude of acoustic power radiated from the duct of a turbojet using a point measurement p 861 A85-44045

A finite element method for the solution of two-dimensional transonic flows in cascades [PNR-90216] p 56 N85-12045

Study of controlled diffusion stator blading [NASA-CR-167965] p 354 N85-18058

**TRANSONIC FLIGHT**

TRO-2D - A code for rational transonic aerodynamic optimization [AIAA PAPER 85-0425] p 223 A85-19740

Modeling techniques for transonic airfoils p 871 A85-49014

Joined wing transonic design and test validation [AD-A148355] p 239 N85-16834

Experiences with transition fixation in the high-speed regime at NLR p 480 N85-23715

Design of a basic airfoil for a slightly swept wing. Part 1: Theoretical transonic airfoil design [ESA-TT-892] p 761 N85-31054

**TRANSONIC FLOW**

Higher approximations in the transonic expansion of the solution to the Chaplygin equation p 3 A85-10117

Flow field and acoustics of two-dimensional transonic blade-vortex interactions [AIAA PAPER 84-2309] p 61 A85-10860

The rule of forbidden signals and apparent Mach number in transonic compressor cascades p 5 A85-11632

Euler equation simulation of propeller-wing interaction in transonic flow p 6 A85-11977

Computational transonic analyses of canted winglets p 6 A85-11982

Measurement of transonic dips in the flutter boundaries of a supercritical wing in a wind tunnel p 18 A85-11986

Simplified transonic integral equations for lifting profiles and wings p 6 A85-12034

A kernel function method for computing unsteady load on three-dimensional wings in transonic flow p 7 A85-12355

Experimental investigation of the sweep effects on a helicopter blade tip [ONERA, TP NO. 1984-61] p 7 A85-12610

Study of the unsteady transonic flow on rotor blade with different tip shapes [ONERA, TP NO. 1984-62] p 7 A85-12611

Improvement and extension of a computational method for three-dimensional transonic flows [ONERA, TP NO. 1984-99] p 8 A85-12620

Calculation of unsteady transonic separated flows by viscous-inviscid interaction [ONERA, TP NO. 1984-100] p 8 A85-12621

Forced oscillations of transonic channel and inlet flows with shock waves p 73 A85-12711

Application of the Godunov method and its second-order extension to cascade flow modeling [AIAA PAPER 83-1941] p 73 A85-12714

Theoretical study of the transonic flow past wedge profiles with detached shock waves p 74 A85-12870

Lifting rotor analysis at subsonic and transonic flow p 75 A85-13689

A multigrid method for computing the transonic flow over two closely-coupled airfoil components p 76 A85-13952

Numerical simulation of the transonic flowfield for wing/nacelle configurations [AIAA PAPER 84-2430] p 76 A85-13964

Computation of unsteady aerodynamic pressure coefficients in a transonic straight cascade p 79 A85-14893

The circular cylinder in subsonic and transonic flow p 79 A85-15329

Role of constraints in inverse design for transonic airfoils p 80 A85-15337

Computation of unsteady aerodynamic pressure coefficients in a transonic straight cascade. II [ONERA, TP NO. 1984-118] p 80 A85-15838

Aerodynamic methods used in France for the study of propellers for high-speed aircraft [ONERA, TP NO. 1984-120] p 81 A85-15840

Exact solutions of singular equations for viscous transonic flows p 142 A85-16939

Computation of flow around wings based on the Euler equations p 142 A85-18066

Potential equation for transonic steady flow with large longitudinal disturbance and line relaxation p 142 A85-18281

The hopscotch finite volume method for solving the Euler equations p 143 A85-18282

Transonic solutions for a multielement airfoil using the full-potential equations p 144 A85-18512

An improved version of the LTRAN2 for high frequency domain p 205 A85-19401

Numerical solutions of viscous transonic flow in turbomachinery cascades [AIAA PAPER 85-0007] p 206 A85-19454

On boundary layer transition in high-subsonic and transonic flow under the influence of acoustic disturbances and free-stream turbulence [AIAA PAPER 85-0082] p 210 A85-19508

A quasi-conservative lambda formulation — for inviscid transonic flow simulation [AIAA PAPER 85-0088] p 210 A85-19511

Analysis of circulation control airfoils using an implicit Navier-Stokes solver [AIAA PAPER 85-0171] p 213 A85-19565

Computation of unsteady shock-induced vortex separation [AIAA PAPER 85-0183] p 214 A85-19573

Prediction of subsonic/transonic separated flow about airfoils [AIAA PAPER 85-0205] p 215 A85-19589

Prediction of HiMAT RPRV component interference effects at transonic speeds [AIAA PAPER 85-0213] p 215 A85-19593

Multigrid solution of the Euler equations using implicit schemes [AIAA PAPER 85-0293] p 218 A85-19643

Recent advances in computational transonic aerodynamics [AIAA PAPER 85-0366] p 221 A85-19699

Breakdown of the conservative potential equation — for study of transonic flow [AIAA PAPER 85-0367] p 221 A85-19700

The numerical simulation of steady transonic rotational flow using a dual potential formulation [AIAA PAPER 85-0368] p 221 A85-19701

Shock waves in transonic channel flows at moderate Reynolds number [AIAA PAPER 85-0369] p 221 A85-19702

Viscous/inviscid interaction analysis of transonic shock induced separated flow including normal pressure gradients [AIAA PAPER 85-0371] p 221 A85-19703

Navier-Stokes computations of axisymmetric transonic flows with a two-equation model of turbulence [AIAA PAPER 85-0373] p 221 A85-19705

Numerical optimization design of advanced transonic wing configurations [AIAA PAPER 85-0424] p 248 A85-19739

Finite volume solution of the two-dimensional Euler equations on a regular triangular mesh [AIAA PAPER 85-0435] p 223 A85-19748

A comparative study between an implicit and explicit algorithm for transonic airfoils [AIAA PAPER 85-0480] p 225 A85-19777

Efficient self-consistent viscous-inviscid solutions for unsteady transonic flow [AIAA PAPER 85-0482] p 225 A85-19779

Simulation of transonic three-dimensional nacelle/inlet flowfields using an Euler/Navier-Stokes algorithm [AIAA PAPER 85-0084] p 226 A85-19798

Computation of transonic inlet flows — German thesis p 227 A85-19844

A subdomain finite element method for solving the conservative full potential equation for transonic profile flows — German thesis p 227 A85-19854

A fast algorithm for solving the conservative transonic S1 full potential equation employing non-orthogonal curvilinear coordinates and non-orthogonal velocity components p 228 A85-20239

A stream function relaxation method for solving transonic S1 stream surface with respect to non-orthogonal curvilinear coordinates p 228 A85-20240

A linearized unsteady aerodynamic analysis for transonic cascades p 229 A85-20744

Finite element solutions of Euler equations for lifting airfoils [AIAA PAPER 85-0294] p 230 A85-20864

Shock-free turbomachinery blade design p 232 A85-21864

Nonreflecting boundary conditions for the complete unsteady transonic small-disturbance equation p 290 A85-21875

Design of lifting symmetric supercritical airfoils p 233 A85-22228

The full-approximation method in the theory of transonic flows p 233 A85-22367

Approximate factorization algorithm for three-dimensional transonic nacelle/inlet flowfield computations p 314 A85-23392

A multigrid method for calculating transonic flows in cascades p 315 A85-24092

Numerical solutions for transonic stream equations of flow along S1 relative stream surface employing non-orthogonal curvilinear coordinates and corresponding velocity components p 315 A85-24093

Solution of transonic S1 surface flow by successively reversing the direction of integration of the stream function equation p 315 A85-24094

Transonic cascade flow with given shock shapes solved by separate supersonic and subsonic computations p 315 A85-24095

Spectral multigrid methods with applications to transonic potential flow p 316 A85-24448

Transonic shock wave - Boundary layer interaction at a convex wall p 317 A85-24800

Base pressure of a projectile within the transonic flight regime p 317 A85-25136

Suppression of shocks on transonic airfoils p 319 A85-25458

On the use of parametric differentiation to predict weak shock waves p 319 A85-25465

Unsteady transonic phenomena around highly swept wings p 322 A85-26025

Aerodynamic effects of probe-induced flow separation of bluff bodies at transonic Mach numbers [AIAA PAPER 85-0103] p 322 A85-26382

A special boundary element technique in transonic flow p 385 A85-26690

Efficient algorithm for unsteady transonic aerodynamics of low-aspect-ratio wings p 385 A85-26756

The effects of gusts on the fluctuating airloads of airfoils in transonic flow p 385 A85-26762

Entropy condition satisfying approximations for the full potential equation of transonic flow p 385 A85-26916

The addition of quasi-three-dimensional terms into a finite element method for transonic turbomachinery blade-to-blade flows p 386 A85-26920

A finite element method for the solution of two-dimensional transonic flows in cascades p 386 A85-26921

The numerical analysis of transonic flow around a circular airfoil using hybrid difference scheme p 386 A85-27825

Hybrid approach to steady transonic normal shock-compressible laminar boundary layer interactions over airfoils with suction [AIAA PAPER 85-0522] p 386 A85-27876

A viscous-inviscid interaction method for computing unsteady transonic separation [ONERA, TP NO. 1985-5] p 387 A85-27885

Monotone switches in implicit algorithms for potential equations applied to transonic flows p 391 A85-29078

Newton-like minimal residual methods applied to transonic flow calculations p 458 A85-29081

A field panel/finite difference method for potential unsteady transonic flow p 391 A85-29084

Relative effects of Reynolds number and freestream turbulence in transonic flow p 391 A85-29085

Automatic adaptive grid refinement for the Euler equations p 391 A85-29087

Transonic flow calculations using triangular finite elements p 391 A85-29088

Euler solutions of transonic vortex flows around the Dillner wing p 392 A85-29261

A type-dependent splitting scheme with variable parameters for the longitudinal large-disturbance potential equation p 393 A85-29693

Design and experimental investigation of a high-loaded transonic axial model turbine p 421 A85-29695

The theory of oscillating thick wings in subsonic flow Lifting line theory p 393 A85-29992

Investigations of the influence of taper on the characteristic values of rotating annular turbine cascades in the transonic flow regime p 394 A85-30170

Unsteady transonic flow calculations for two-dimensional canard-wing configurations with aeroelastic applications
[AIAA PAPER 85-0585] p 468 A85-30320

Viscous effects on transonic airfoil stability and response
[AIAA PAPER 85-0586] p 469 A85-30321

Measured unsteady transonic aerodynamic characteristics of an elastic supercritical wing with an oscillating control surface
[AIAA PAPER 85-0598] p 469 A85-30327

Coupling linearized far-field boundary conditions with non-linear near-field solutions in transonic flow
[AIAA PAPER 85-0599] p 469 A85-30328

Non-isentropic unsteady transonic small disturbance theory
[AIAA PAPER 85-0600] p 469 A85-30329

Transonic calculations for a flexible supercritical wing and comparison with experiment
[AIAA PAPER 85-0665] p 470 A85-30407

The prediction of transonic flows on advancing rotors
p 472 A85-31988

Transonic time responses of the MBB A-3 supercritical airfoil including active controls p 512 A85-32586

A new stream function formulation for the steady Euler equations p 474 A85-32609

Transonic shock-wave/turbulent boundary-layer interactions in a circular duct p 474 A85-32610

Some iterative schemes for transonic potential flows
p 474 A85-32624

Acoustic shocks in a variable area duct containing near sonic flows p 474 A85-32632

Investigation of flow phenomena in a transonic fan rotor using laser anemometry
[ASME PAPER 84-GT-199] p 475 A85-32963

Numerical optimization method for airfoil design
p 475 A85-33014

The effect of freestream turbulence on pressure fluctuations in transonic flow p 545 A85-34996

Comparison of inviscid and viscous computations with an interferometrically measured transonic flow
p 545 A85-35129

Transonic small-disturbance theory for dusty gases
p 546 A85-35149

Perturbations of a transonic flow with vanishing shock waves p 546 A85-35152

Transonic shock interaction with a tangentially injected turbulent boundary layer p 548 A85-35584

Application of the single-cycle optimization approach to aerodynamic design p 548 A85-35586

A fast algorithm of the finite difference method for computation of the transonic flow past an arbitrary airfoil with the conservative full-potential equation
p 548 A85-35742

A mixed finite difference analysis of the internal and external transonic flow fields of inlets with centerbody
p 548 A85-35743

An iteration panel method for predicting three dimensional surface pressure distribution of a wing with thickness in the subcritical steady transonic flow
p 549 A85-35749

A locally linearized panel method for transubsonic flow past an oscillating wing p 549 A85-35755

Transonic pressure distribution computations of a flexible wing p 549 A85-35756

On relaxation of transonic flows around zero-lift airfoil and convergence of self-correcting wind tunnels
p 549 A85-35757

On detached shock wave of sphere moving with transonic velocities p 549 A85-35763

Finite difference computation of the flow around airfoils in two-dimensional transonic slotted wall wind tunnel
p 549 A85-35764

Fundamentals of transonic flow — Book
p 552 A85-35810

Validity of solution of three-dimensional linearised boundary value problem for axial disturbance velocity u, in transonic-supersonic flow p 553 A85-36341

Design of a transonic flow with compression shock
p 553 A85-36344

Multigrid acceleration of an iterative method with application to transonic potential flow
p 553 A85-36404

Triangular finite element methods for the Euler equations p 601 A85-36414

The solution of transonic flow through three-dimensional turbine blade p 622 A85-37929

Configuration of shock waves closing a local supersonic zone p 623 A85-38481

A second-order approximate method for transonic small-disturbance potential flow and its application to the analysis of flows over airfoils p 625 A85-38922

The computation of transonic nozzle flow-field by a time-dependent method p 625 A85-38963

Numerical simulation of three-dimensional transonic flow in a turbomachinery p 625 A85-38965

The characteristics compatibility conditions on the boundary points are applied to time-marching methods for transonic flow past plane cascades p 625 A85-38967

Computations of projectile Magnus effect at transonic velocities p 626 A85-38981

Transonic flow in the throat region of radial or nearly radial supersonic nozzles p 626 A85-39001

Investigation of transonic inlet drag characteristics
[SAE PAPER 841539] p 627 A85-39063

Multigrid calculation of transonic flow past wing-tail-fuselage combinations p 628 A85-39216

A computational study of the unsteady shock-wave structure in a two-dimensional transonic rotor
p 629 A85-39578

Application of Runge Kutta time marching scheme for the computation of transonic flows in turbomachines
[AIAA PAPER 85-1332] p 631 A85-39728

Accurate and efficient solutions of transonic internal flows
[AIAA PAPER 85-1334] p 631 A85-39729

A simulation technique for jet temperature effects on nozzle-afterbody drag at transonic Mach numbers
[AIAA PAPER 85-1463] p 633 A85-39792

Measurement and prediction of model-rotor flow fields
[AIAA PAPER 85-1558] p 710 A85-40683

Aerodynamics of two-dimensional blade-vortex interaction
[AIAA PAPER 85-1560] p 710 A85-40685

Transonic airfoil design based on Navier-Stokes equation to attain arbitrarily specified pressure distribution - An iterative procedure
[AIAA PAPER 85-1592] p 712 A85-40708

Refined numerical solution of the transonic flow past a wedge
[AIAA PAPER 85-1593] p 713 A85-40709

New iterative algorithm between stream function and density for transonic cascade flow
[AIAA PAPER 85-1594] p 713 A85-40710

Computation of three-dimensional transonic viscous flowfields using unsteady parabolized Navier-Stokes equations
[AIAA PAPER 85-1595] p 713 A85-40711

Transonic flow calculations around isolated inlet configurations
[AIAA PAPER 85-1596] p 713 A85-40712

A Navier-Stokes solution procedure for analysis of steady two-dimensional transonic nozzle flows
[AIAA PAPER 85-1597] p 713 A85-40713

The buffeting pressure field of a high-aspect-ratio swept wing
[AIAA PAPER 85-1609] p 714 A85-40720

Transonic turbulent flow computations for axisymmetric afterbodies
[AIAA PAPER 85-1639] p 715 A85-40741

Numerical solution of transonic wing flows using an Euler/Navier-Stokes zonal approach
[AIAA PAPER 85-1640] p 715 A85-40742

Improvements in transonic airfoil potential flow calculations
[AIAA PAPER 85-1642] p 715 A85-40743

Computation of unsteady transonic aerodynamics with steady state fixed by truncation error injection
[AIAA PAPER 85-1644] p 715 A85-40744

Predictions of transonic separated flow with an eddy-viscosity/Reynolds-shear-stress closure model
[AIAA PAPER 85-1683] p 717 A85-40768

Unsteady transonic flow over oscillating slender bodies
[AIAA PAPER 85-1709] p 718 A85-40781

Unsteady transonic full potential solutions for airfoils encountering vortices and gusts
[AIAA PAPER 85-1710] p 719 A85-40782

Unsteady transonic flow calculations for interfering lifting surface configurations
[AIAA PAPER 85-1711] p 719 A85-40783

Computation of three-dimensional viscous transonic flows with the LU factored scheme
[AIAA PAPER 85-1510] p 721 A85-40945

Transonic flows about oscillating airfoils using the Euler equations
[AIAA PAPER 85-1514] p 721 A85-40949

A 3-D chimera grid embedding technique
[AIAA PAPER 85-1523] p 802 A85-40955

Overset grids in compressible flow
[AIAA PAPER 85-1524] p 803 A85-40956

A self-adaptive-grid method with application to airfoil flow
[AIAA PAPER 85-1525] p 722 A85-40957

Newton solution of direct and inverse transonic Euler equations
[AIAA PAPER 85-1530] p 722 A85-40962

3-D finite element solution of steady Euler transonic flow by stream vector correction
[AIAA PAPER 85-1532] p 722 A85-40967

Computation of transonic vortex flows past delta wings Integral equation approach
[AIAA PAPER 85-1582] p 725 A85-41415

A comparison between implicit and hybrid methods for the calculation of steady and unsteady inlet flows
[AIAA PAPER 85-1125] p 725 A85-41417

Implicit flux-split schemes for the Euler equations
[AIAA PAPER 85-1680] p 803 A85-41743

Time dependent computation of the Euler equations for designing 2-D cascades, including the case of transonic shock free design p 727 A85-41814

A numerical method to weaken shock in transonic cascades p 727 A85-41815

Computation of the tip vortex off a low-aspect-ratio wing p 730 A85-42352

Iterative three-dimensional transonic wing design using integral equations p 731 A85-42928

Transonic aerodynamic computations for a canard configuration p 731 A85-42931

Application of a viscous-inviscid interaction method to predict transonic separated flows p 732 A85-42957

Development of a Navier-Stokes analysis to investigate the mechanism of shock/wave boundary layer interactions p 734 A85-42966

Finite-volume scheme for transonic potential flow about airfoils and bodies in an arbitrarily-shaped channel
p 734 A85-42967

Assessment of wind tunnel corrections for multielement airfoils at transonic speeds p 734 A85-42968

Transonic interactions of unsteady vortical flows
p 734 A85-42969

The effect of boattailing of a projectile in transonic flow
[AD-A157758] p 736 A85-42983

An interactive scheme for three-dimensional transonic flows p 737 A85-42992

The roll motion of a wraparound fin configuration at subsonic and transonic Mach numbers
[AIAA PAPER 85-1777] p 837 A85-43838

Projectile aerodynamics prediction with CSCM-S upwind implicit relaxation algorithm
[AIAA PAPER 85-1836] p 814 A85-43874

Example of transonic gas flow past an asymmetric profile p 814 A85-44130

Transonic panel method for the full potential equation applied to multicomponent airfoils
[AIAA PAPER 83-1855] p 816 A85-45704

Effects of viscosity and modes on transonic aerodynamic and aeroelastic characteristics of wings
p 817 A85-45837

Subcritical damping ratios of a two-dimensional airfoil in transonic flow p 817 A85-45849

Comparison of a computed transonic flow and interferometric measurements around the leading edge of a two dimensional aerofoil asymmetrically mounted in a wind tunnel p 868 A85-47164

Extension and use of numerical procedure for the three dimensional unsteady transonic flows
[ONERA, TP NO. 1985-67] p 868 A85-47269

Some contributions to the modelling of discontinuous flows p 907 A85-48224

Digital fringe reduction techniques applied to the measurement of three-dimensional transonic flow fields
p 907 A85-48521

Theoretical and experimental study of nonadiabatic transonic shock/boundary-layer interaction
p 869 A85-48529

Calculation of three-dimensional flowfields by the unsteady method of characteristics p 869 A85-48532

Numerical analysis of transonic flow around a two-dimensional airfoil by solving full Navier-Stokes equations p 869 A85-48875

Finite element simulation of transonic flows by modified potential and stream function methods
p 871 A85-49149

An experimental study of the transonic equivalence rule with lift, part 2
[AR-LR-614-PT-2] p 8 N85-10004

Development and applications of algorithms for calculating the transonic flow about harmonically oscillating wings
[NASA-CR-172376] p 9 N85-10007

Computational methods for complex flowfields
[AD-A145219] p 11 N85-10019

Transonic flow analysis for rotors. Part 1: Three-dimensional quasi-steady, full-potential calculation
[NASA-TP-2375-PT-1] p 11 N85-10914

Further development of a transonic cascade analysis
[AD-A145410] p 54 N85-11319

Inverse design technique for cascades
[NASA-CR-3836] p 81 N85-12008

Performance of two transonic airfoil wind tunnels utilizing limited ventilation p 83 N85-12020

Experiments suitable for wind tunnel wall interference assessment/correction p 83 N85-12021

Design of a basic airfoil for a slightly swept wing. Part 1: Theoretical transonic airfoil design
[DFVLR-FB-84-19-PT-1] p 86 N85-12043

A finite element method for the solution of two-dimensional transonic flows in cascades
[PNR-90216] p 86 N85-12045

Investigations of boundary layers in the Emmen Federal Aircraft works transonic tunnel, Switzerland
[FW-FO-1641] p 88 N85-12877

Comparative flow calculation on transonic cone/cylinder standard models in connection with the wall interference problem
[FW-FO-1689] p 88 N85-12878

A local slot boundary condition for transonic flow calculations in slotted-wall test sections of wind tunnels
[FFA-TN-1984-34] p 88 N85-12879

Investigation for the improvement of the transonic tunnel working section of the Emmen Federal Aircraft Works (Switzerland)
[FW-FO-1681] p 118 N85-12904

Simulation of separated transonic airfoil flow by finite-difference viscous-inviscid interaction
p 146 N85-13768

The numerical simulation of steady transonic rotational flow using a dual potential formulation
p 146 N85-13770

Experimental studies of transonic airfoil trailing edge and wake flowfield properties p 146 N85-13773

Development of the code NSFOIL for analyzing high Reynolds number transonic flow around an airfoil
[NAL-TR-816] p 147 N85-14801

A theoretical design method for 3-dimensional transonic wings
[NAL-TR-830] p 161 N85-14834

Review of requirements and status of simulation and scaling of transonic, viscous flows
[AD-A146357] p 189 N85-15137

A comparative study of the nonuniqueness problem of the potential equation
[NASA-TP-2385] p 235 N85-15694

An exploratory study of finite difference grids for transonic unsteady aerodynamics
[NASA-TM-84583] p 235 N85-15696

Shock waves in transonic flows at moderate Reynolds Number p 238 N85-16823

Theoretical contributions to transonic flow analysis for transport aircraft
[BMFT-FB-W-84-036] p 239 N85-16838

Analysis of inviscid transonic flow around an airfoil by diagonal form of IAF scheme
[NAL-TR-831] p 328 N85-18955

Effects of airfoil shape, thickness, camber, and angle of attack on calculated transonic unsteady airloads
[NASA-TM-86320] p 328 N85-18957

Efficient self-consistent viscous-inviscid solutions for unsteady transonic flow
[NASA-TM-86335] p 329 N85-18959

Unsteady transonic flow calculations for two-dimensional canard-wing configurations with aeroelastic applications
[NASA-TM-86375] p 329 N85-18960

Viscous effects on transonic airfoil stability and response
[NASA-TM-86374] p 329 N85-18961

Unsteady transonic pressure measurements on a semispan wind-tunnel model of a transport-type supercritical wing (Lann model). Part 2: Pressure distributions (plotted) and plots of the vibration modes
[AD-A130488] p 330 N85-18965

A fast algorithm of the finite difference method for computation of the transonic flow past an arbitrary airfoil with the conservative full-potential equation
p 395 N85-20191

A mixed finite difference analysis of the internal and external transonic flow fields of inlets with centerbody
p 446 N85-20192

A locally linearized panel method for tran-/subsonic flow past an oscillating wing p 396 N85-20212

Transonic pressure distribution computations of a flexible wing p 396 N85-20213

On relaxation of transonic flows around zero-lift airfoils and convergence of self-correcting wing tunnels
p 396 N85-20214

Finite difference computation of the flow around airfoils in two-dimensional transonic slotted wall wind tunnel
p 396 N85-20216

Reconstruction of a 3-dimensional transonic rotor flow field from holographic interferogram data
[NASA-TM-86690] p 397 N85-21112

Transonic interactions of unsteady vortical flows
[NASA-TM-86658] p 397 N85-21113

Measured unsteady transonic aerodynamic characteristics of an elastic supercritical wing with an oscillating control surface
[NASA-TM-86376] p 398 N85-21116

Pseudospectral calculations of two-dimensional transonic flow (Task 1). Numerical investigation of VTOL aerodynamics (Task 2)
[AD-A150123] p 399 N85-21126

Unsteady transonic pressure measurements on a semi-span wind-tunnel model of a transport-type supercritical wing (Lann model). Part 2: Pressure distributions (plotted) and plots of the vibration modes
[AD-A130488] p 449 N85-21579

Preliminary development of an approximation procedure for supercritical wing design optimization applications
[AD-A150177] p 500 N85-22383

F-14A aircraft high-speed flow simulations
[NASA-CR-172559] p 479 N85-23702

Recent transonic unsteady pressure measurements at the NASA Langley Research Center
[NASA-TM-86408] p 479 N85-23710

The influence of transition strips on the pressure distribution on transonic profiles p 480 N85-23718

Transition fixing and simulation of high Reynolds number flow at transonic velocities p 480 N85-23721

Transonic Unsteady Aerodynamics and its Aeroelastic Applications
[AGARD-CP-374] p 542 N85-25171

Transonic pressure distributions on a two-dimensional 0012 and supercritical MBB-A3 profile oscillating in heave and pitch p 554 N85-25173

Numerical studies of unsteady transonic flow over oscillating airfoil p 554 N85-25174

Analysis of transonic aerodynamic characteristics for a supercritical airfoil oscillating in heave, pitch and with oscillating flap p 554 N85-25175

Calculation of harmonic aerodynamic forces of aerofoils and wings from the Euler equations p 554 N85-25177

Calculation of unsteady transonic separated flows by viscous-inviscid interaction p 554 N85-25178

A semi-empirical unsteady transonic method with supersonic free stream p 555 N85-25179

Improvement and extension of a numerical procedure for the three dimensional unsteady transonic flows
p 555 N85-25181

Application of time-linearized methods to oscillating wings in transonic flow and flutter p 585 N85-25182

Computation of unsteady transonic flows about two-dimensional and three-dimensional AGARD standard configurations p 555 N85-25183

Calculation of unsteady transonic flow around a high swept wing p 555 N85-25184

Unsteady transonic aerodynamic and aeroelastic calculations about airfoils and wings
p 555 N85-25185

The development of unsteady transonic 3-D full potential code and its aeroelastic applications
p 555 N85-25187

A new implicit plus minus splitting method for the solution of the Euler equations in the transonic flow regime
p 556 N85-25200

Transonic aerodynamic and aeroelastic characteristics of a variable sweep wing
[NASA-TM-86677] p 556 N85-25203

Numerical analyses in aerodynamic design of aero-engine fan p 582 N85-26618

Numerical example of three-dimensional flying object in shockless transonic flow p 558 N85-26623

A numerical design method for three-dimensional transonic wings p 577 N85-26631

Description of a computer program treating transonic steady state aeroelastic effects for a canard or tail airplane
[FFA-TN-1983-23] p 561 N85-26674

Measurements of the symmetric aerodynamic coefficients for flat faced cylinders in the angle of attack regime 0 to 90 deg for transonic and supersonic speeds
[FFA-TN-1984-04] p 561 N85-26675

Numerical solution of transonic normal shock wave-boundary layer interaction using the Bohning-Zierop model — wind tunnel flow
[VTH-LR-416] p 562 N85-26683

Numerical study of porous airfoils in transonic flow
[NASA-TM-86713] p 635 N85-27828

Transonic Mach number determination in a blow-down wind tunnel with solid walls and a downstream throat
[VTH-LR-402] p 636 N85-27835

Proceedings of the 9th US Air Force and the Federal Republic of Germany Data Exchange Agreement Meeting. Viscous and Interacting Flow Field Effects
[AD-A153020] p 699 N85-28266

Subsonic and transonic aerodynamics of a wraparound fin configuration
[AD-A153646] p 637 N85-28927

Flow quality of National Aerospace Laboratory two-dimensional transonic wind tunnel. Part 3: Flow turbulence level and measuring method

Mathematical modeling of the AEDC (Arnold Engineering Development Center) propulsion wind tunnel (16T)
[AD-A151293] p 593 N85-25275
Investigation to optimize the passive shock wave/boundary layer control for supercritical airfoil drag reduction
[NASA-CR-175788] p 559 N85-26665
A curved test section for research on transonic shock wave-boundary layer interaction
[VTH-LR-414] p 561 N85-26682
Study on needs for a magnetic suspension system operating with a transonic wind tunnel
[NASA-CR-3900] p 593 N85-26759
Design of a basic profile for a low sweep airfoil. Part 2: Experimental investigation on the DFVLR-W1 airfoil profile in the Brunswick transonic wind tunnel
[DFVLR-FB-85-01-PT-2] p 635 N85-27833
Transonic Mach number determination in a blow-down wind tunnel with solid walls and a downstream throat
[VTH-LR-402] p 636 N85-27835
Flow quality of National Aerospace Laboratory two-dimensional transonic wind tunnel. Part 3: Flow turbulence level and measuring method
[NAL-TR-842-PT-3] p 684 N85-28952
On power effecient operation of the 2m x 2m transonic wind tunnel at the National Aerospace Laboratory
[NAL-TR-847] p 684 N85-28953
High Reynolds number tests of a NASA SC(3)-0712(B) airfoil in the Langley 0.3-meter transonic cryogenic tunnel
[NASA-TM-86371] p 740 N85-29926
Transonic and supersonic wind tunnel tests on control effectiveness on schematic missile configurations
[FFA-TN-1983-20] p 743 N85-31020
Transonic and supersonic wind tunnel tests on control effectiveness on schematic missile configurations: Supplement
[FFA-TN-1983-20-SUPPL] p 743 N85-31021
Sidewall boundary-layer effects in two-dimensional airfoil testing
[NASA-CR-176034] p 781 N85-31065

**TRANSPARENCE**
Method for measuring haze in transparencies
[AD-D011233] p 65 N85-10623
Process for preparing essentially colorless polyimide film containing phenoxy-linked diamines
[NASA-CASE-LAR-13353-1] p 436 N85-20128
The measurement of aircraft windscreen haze and its effect on visual performance
[AD-A154949] p 829 N85-32114

**TRANSPIRATION**
Small gas turbine combustor study - Fuel injector performance in a transpiration-cooled liner
[AIAA PAPER 85-1312] p 668 A85-39717
The transpired turbulent boundary layer in various pressure gradients and the blow-off condition
[ASME PAPER 84-WA/HT-71] p 698 A85-39899
Study of deposition control using transpiration
[DE85-002339] p 373 N85-19378
Pressure drop and coefficients of internal heat transfer necessary for transpiration cooling p 527 N85-22831

**TRANSPORT AIRCRAFT**
Demonstration of relaxed static stability on a commercial transport p 35 A85-12593
Recent data from the airlines lightning strike reporting project
[AIAA PAPER 84-2406] p 89 A85-13513
Future transport aircraft design challenges
[AIAA PAPER 84-2416] p 98 A85-13521
The revolutionary impact of evolving aeronautical technologies
[AIAA PAPER 84-2445] p 69 A85-13535
Integrated technologies and the transport aircraft of the future
[AIAA PAPER 84-2447] p 98 A85-13537
Flight control technology for current/future transport aircraft
[AIAA PAPER 84-2491] p 114 A85-13565
Future Air Force tactical airlifter considerations
[AIAA PAPER 84-2504] p 100 A85-13574
Near-term application of modern propulsion technology to a tactical transport
[AIAA PAPER 84-2506] p 109 A85-13576
Extended range operation of twin-engined transport aircraft (ETOPS)
[AIAA PAPER 84-2512] p 89 A85-13578
Looking around at visuals --- for flight simulation
p 123 A85-13898
Active control of buffeting on a modern transport-aircraft wing configuration in a wind tunnel
[ONERA, TP NO. 1984-131] p 116 A85-15847
Optimization of the parameters of transport aircraft with a lift-generating fuselage p 155 A85-17069
1984 SAE aerospace handbook: Air transport cabin and flight deck safety provisions p 156 A85-17244
An advanced media interface for control of modern transport aircraft navigational systems
[AIAA PAPER 84-2686] p 165 A85-17865

A simulator application of a 'hands-on throttle and stick' concept to a transport pilot/autopilot interface
[AIAA PAPER 84-2687] p 165 A85-17866
Cost and weight estimating considerations for transport aircraft system installations
[SAWE PAPER 1548] p 160 A85-18815
The influence of camber variation on the aerodynamics of civil transport aircraft
[AIAA PAPER 85-0353] p 220 A85-19691
Measurements of the response of transport aircraft ceiling panels to fuel pool fires
[AIAA PAPER 85-0394] p 240 A85-19720
The development of a finite element model of an aircraft vertical stabilizer for vibration analysis
p 290 A85-21683
Application of computer graphics to the preliminary design of aircraft p 340 A85-24250
Fire safety in transport category aircraft - Litigating a post-crash or in-flight aircraft fire p 378 A85-24710
Cockpit technology in a modern commercial aircraft
p 341 A85-25510
Design methods and technology of transport aircraft of today and tomorrow p 312 A85-26014
A new era in commercial aircraft flight management
p 382 A85-27448
The evolution of Shorts range of light transport aircraft
p 412 A85-27450
Criteria for low-speed longitudinal handling qualities of transport aircraft with closed-loop flight control systems — Thesis p 423 A85-28477
Recent data from the airlines lightning strike reporting project p 482 A85-32591
MBB studies variable camber wings to improve lift, expand fleet uniformity p 474 A85-32799
An advanced short range airliner design project
p 498 A85-32842
Cockpit of the future? p 655 A85-37925
Soviets tailor cargo transport for remote-site operations p 646 A85-38244
Who needs advanced-technology airliners?
p 647 A85-38434
North warning system airship feasibility study
[AIAA PAPER 85-0858] p 640 A85-38777
Stability and control results for advanced turboprop aft-mount installations
[SAE PAPER 841479] p 675 A85-39059
Winglet effects on the flutter of a twin-engine transport-type wing p 650 A85-39217
Material evaluation of second-generation composites for transport wing application
[SAE PAPER 841520] p 688 A85-39291
Airlines reach out for longer range - Twins cross the Atlantic; long-haul flights get longer p 752 A85-40071
Application possibilities for transport helicopters
p 707 A85-40290
Design considerations for transport aircraft with modern propeller propulsion
[DGLR PAPER 84-083] p 753 A85-40303
Flight control system technology in the civil transport aircraft (Airbus-Program) - Status and key points of new development requirements
[DGLR PAPER 84-089] p 775 A85-40308
Cockpit layout by cooperation between aircraft manufacturer and airline companies
[DGLR PAPER 84-098] p 753 A85-40317
Wind-tunnel technology for the development of future commercial aircraft
[DGLR PAPER 84-127] p 778 A85-40340
Use of programmable calculators onboard commercial aircraft p 763 A85-41397
Obtaining title and financing transport category aircraft National and international implications
p 863 A85-44097
Turboprop battle hots up p 825 A85-44745
Two federal agencies support hypersonic transport research p 810 A85-44974
Wing span loads of complex high-lift systems from wake measurements p 817 A85-45850
Application of frequency domain handling qualities criteria to the longitudinal landing task
[AIAA PAPER 85-1848] p 842 A85-45877
Generic errors in airborne safety-critical systems from an FAA perspective
[AIAA PAPER 85-1983] p 820 A85-45969
Minimum-fuel, three-dimensional flight paths for jet transports p 826 A85-46341
Active control of the buffeting response on a large modern civil airplane configuration in wind tunnel
[ONERA, TP NO. 1985-26] p 893 A85-47253
Feedback control for fuel-optimal descents using singular perturbation techniques p 893 A85-47688
A fault and damage tolerant network for an advanced transport aircraft p 888 A85-47760
The Delco Performance Management System
p 895 A85-49172
The extended range operation of twin-engined public transport aircraft. I p 881 A85-49173
The extended range operation of twin-engined public transport aircraft. II p 881 A85-49174
Fokker improves transport design based on launch customer demand p 882 A85-49199
Design of a digital ride quality augmentation system for commuter aircraft
[NASA-CR-172419] p 20 N85-10037
Analysis of a transport fuselage section drop test
p 21 N85-10400
Experimental trim drag values and flow-field measurements for a wide-body transport model with conventional and supercritical wings
[NASA-TP-2071] p 12 N85-10920
Advanced composite stabilizer for Boeing 737 aircraft
[NASA-CR-168451] p 21 N85-10934
Aircraft surface coatings
[NASA-CR-3661] p 21 N85-10935
Simulator study of flight characteristics of several large, dissimilar, cargo transport airplanes during approach and landing
[NASA-TP-2357] p 36 N85-11002
Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project-longitudinal handling qualities study of a relaxed-stability airplane
[NASA-CR-3660] p 36 N85-11005
Design of a basic airfoil for a slightly swept wing. Part 1: Theoretical transonic airfoil design
[DFVLR-FB-84-19-PT-1] p 66 N85-12043
Flutter parametric studies of cantilevered twin-engine-transport type wing with and without winglet. Volume 1: Low-speed investigations
[NASA-CR-172410-VOL-1] p 129 N85-13269
Flight test results on stall characteristics of a large jet transport
[NAL-TR-817] p 162 N85-14835
Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project. ACT/Control/Guidance System study, volume 1
[NASA-CR-165963-VOL-1] p 162 N85-14837
Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project. ACT/Control/Guidance System study. Volume 2: Appendices
[NASA-CR-165963-VOL-2] p 162 N85-14838
Ground-effect analysis of a jet transport airplane
[NASA-TM-85920] p 234 N85-15687
Integrated technology wing study (oral presentation)
[NASA-CR-169497] p 256 N85-15718
Design and test requirements for development of today's engines p 266 N85-15737
Documentation and separate test program development is most important for test/maintenance
p 203 N85-16745
Aerodynamic issues in the design of high-lift systems for transport aircraft p 256 N85-16750
Technology developments for laminar boundary layer control on subsonic transport aircraft
p 237 N85-16787
Theoretical contributions to transonic flow analysis for transport aircraft
[BMFT-FB-W-84-036] p 239 N85-16838
The visibility climatology of McMurdo Sound-Williams Field, Antarctica
[AD-A148106] p 300 N85-17492
Initiative uses of aircraft for flight training
p 333 N85-18027
Review of engine ingestions to wide body transport aircraft
[AD-P004185] p 403 N85-19947
New runway enables IL-76 flights to Tenkeli in far north p 430 N85-21106
Integrated paratroop door
[AD-D011507] p 416 N85-21148
Analytically redundant output feedback scheme for reduction of structural loads of a flexible transport aircraft
[TT-8303] p 417 N85-21154
Guidance and control research flight testing with HFB 320 test aircraft p 514 N85-22355
Study for the optimization of a transport aircraft wing for maximum fuel efficiency. Volume 1: Methodology, criteria, aeroelastic model definition and results
[NASA-CR-172551] p 499 N85-22378
China report: Science and technology
[JPRS-CST-84-008] p 500 N85-22384
Improved Y-11 general-purpose transport designated Y-12 p 500 N85-22385
Experiences with transition fixation in the high-speed regime at NLR p 480 N85-23715
Demonstration of relaxed stability on a commercial transport p 590 N85-26745
Realisation of relaxed static stability on a commercial transport p 590 N85-26746
Wing buffeting active control testing on a transport aircraft configuration in a large sonic tunnel
p 590 N85-26750
How to handle failures in advanced flight control systems of future transport aircraft p 591 N85-26752
Methods for design aerodynamics of modern transport aircraft
[DFVLR-FB-85-05] p 636 N85-27838
Friction and wear behavior of aluminum and composite I-beam stiffened airplane skins
[NASA-TM-86418] p 652 N85-27852
Demonstration of relaxed static stability on a commercial transport p 679 N85-27898
Realisation of relaxed static stability on a commercial transport p 679 N85-27899
Wing buffeting active control testing on a transport aircraft configuration in a large sonic windtunnel
p 679 N85-27903
How to handle failures in advanced flight control systems of future transport aircraft p 679 N85-27905
Advanced secondary power system for transport aircraft
[NASA-TP-2463] p 673 N85-28944
Pressure distribution data from tests of 2.29 M (7.5 feet) span EET high-lift transport aircraft model in the Ames 12-foot pressure tunnel
[NASA-TM-84517] p 709 N85-29912
Nacelle/pylon/wing integration on a transport model with a natural laminar flow nacelle
[NASA-TP-2439] p 740 N85-29924
Crew systems and flight station concepts for a 1995 transport aircraft
[NASA-CR-166068] p 781 N85-29973
Low-speed tests of a high-aspect-ratio, supercritical-wing transport model equipped with a high-lift flap system in the Langley 4- by 7-meter and Ames 12-foot pressure tunnels
[NASA-TP-2097] p 742 N85-31010
Seat experiments for the full-scale transport aircraft controlled impact demonstration
[AD-A155024] p 820 N85-32106
Energy efficient transport technology: Program summary and bibliography
[NASA-RP-1135] p 830 N85-33116
Application of frequency domain handling qualities criteria to the longitudinal landing task
[NASA-TM-86728] p 847 N85-33124
Guidelines for the evaluation of visual approach slope indicators
[ARL/SYS-R-32] p 880 N85-34132
Ground-based and in-flight simulator studies of flight characteristics of a twin-fuselage passenger transport airplane during approach and landing
[NASA-TP-2451] p 895 N85-34144

**TRANSPORT PROPERTIES**
Transport processes in the upper atmosphere
p 454 N85-20375

**TRANSPORT THEORY**
Numerical solutions of ramjet nozzle flows
[AIAA PAPER 85-1270] p 631 A85-39689

**TRANSPORT VEHICLES**
Initial experience with a three plenum cell air cushion equipment transporter p 198 A85-17231

**TRANSPORTATION**
USSR report: Transportation
[JPRS-UTR-84-028] p 72 N85-12002
USSR report: Transportation
[JPRS-UTR-85-001] p 204 N85-16763
USSR report: Transportation
[JPRS-UTR-85-003] p 333 N85-18032
Transportation
[JPRS-UTR-85-004] p 384 N85-21105
Current development, applications of airships in USSR
p 396 N85-21109
USSR report: Transportation
[JPRS-UTR-84-015] p 542 N85-25192
Structures and Dynamics Division research and technology plans for FY 1985 and accomplishments for FY 1984
[NASA-TM-86417] p 605 N85-25895
USSR report: Transportation
[JPRS-UTR-84-025] p 641 N85-27841
Test devices for aeronautical research and technology
[NASA-TM-77651] p 683 N85-27914

**TRAPPED VORTEXES**
Trapping of free vortex by airfoils with surface suction
[AIAA PAPER 85-0446] p 224 A85-19755

**TRAVELING WAVE TUBES**
Power traveling-wave tubes for modern airborne radars p 335 A85-24845

**TRAVELING WAVES**
Vibration and flutter of mistuned bladed-disk assemblies
[AIAA PAPER 84-0991] p 181 A85-16095

Average force acting on a small sphere in a traveling-wave field in a viscous fluid
p 805 A85-41646

**TRENDS**

Avionics and civil aircraft systems: The present and the future
[SNIAS-851-111-104] p 751 N85-31038

**TRIBOLOGY**

Chemical nature of wear debris — in lubricating oils used in gas turbine engines
[ASLE PREPRINT 84-LC-3A-1] p 363 A85-25964

Tribological systems as applied to aircraft engines
[NASA-TM-86965] p 450 N85-21657

Gears and Power Transmission Systems for Helicopters and Turboprops
[AGARD-CP-369] p 502 N85-23765

**TRISONIC WIND TUNNELS**

Investigation on reducing the flow noise of the 0.6 m x 0.6 m trisonic wind tunnel p 682 A85-38968

**TRUNCATION ERRORS**

Crack growth geometry in aluminum alloy sheet material under flight simulation loading. 1: A comparison between TWIST and miniTWIST FALSTAFF and short FALSTAFF. 2: Effect of truncating high loads
[VTH-LR-441] p 436 N85-20119

**TRUSSES**

A method of forecasting active constraint with the applications to structural optimization
p 291 A85-22445

**TU-134 AIRCRAFT**

The importance of aircraft center-of-gravity position for flight control p 356 A85-25521

**TU-154 AIRCRAFT**

The aerodynamics of the Tu-154B aircraft — Russian book p 649 A85-38850

**TUBE HEAT EXCHANGERS**

The influence of mean flow on the acoustic properties of a tube bank
[AIAA PAPER 84-2312] p 61 A85-10863

**TUBES**

Flame radiation and linear heat transfer in a tubular-can combustor p 663 A85-39580

**TUMBLING MOTION**

Analysis of the reported incidence of tumble, flail and windblast by ejectees p 331 A85-22774

Shading and interference effects during the rotation of a plate — in aerodynamics p 624 A85-38559

**TUNING**

Vibration and flutter of mistuned bladed-disk assemblies
[AIAA PAPER 84-0991] p 161 A85-16095

Effects of mistuning on the forced vibration of bladed disks in subsonic flow
[AIAA PAPER 85-0760] p 505 A85-30377

The effect of aerodynamic and structural detuning on turbomachine supersonic unstalled torsional flutter
[AIAA PAPER 85-0761] p 506 A85-30378

Optimization of cascade blade mistuning. I - Equations of motion and basic inherent properties
p 771 A85-42365

Aircraft rotor blade with passive tuned tab
[NASA-CASE-ARC-11444-1] p 759 N85-29947

**TURBINE BLADES**

Design method for highly-loaded blades with blockage in cascade p 5 A85-11644

Resonance vibrations of skeleton models of turbine blades with a composite fir-tree root p 26 A85-11821

A statistical analysis of the fatigue strength characteristics of turbomachine blades
p 110 A85-14801

Development of a procedure for calculating two-dimensional boundary layers at gas turbine blades — German thesis p 81 A85-15873

The effect of vibration on film cooling over a gas turbine blade p 168 A85-16576

An engineering method for evaluating unsteady aerodynamic effects on cascade blades during flexural vibrations p 182 A85-16915

Matrix solution of compressible flow on S(1) surface through a turbomachine blade row with splitter vanes or tandem blades p 227 A85-20228

A new approach to some hybrid aerodynamic problems of airfoil cascades on a general streamsheet of revolution. I
p 228 A85-20229

Complete three-dimensional flow solution of a cascade incorporating splitter vanes of arbitrary geometry
p 228 A85-20230

The fundamental equations of 3-dimensional two-phase particulate gas flow and a twofold stream surfaces model of solution for particulate gas flow in turbomachines
p 228 A85-20233

Influence of blowing rate and injection angle on the performance of a film-cooled blade p 265 A85-22231

The effectiveness of the initial twist of the air in the blade cooling systems of gas turbines
p 349 A85-23979

A study of heat transfer during the injection of water into the cooling air of a turbine blade
p 349 A85-23984

Elements of the functional decomposition of aircraft turbomachines during their synthesis using a computer-aided blade design system
p 350 A85-23993

Determinaiton of the angles of flow incident on the rotating cascade of a reversing device
p 366 A85-24002

A multigrid method for calculating transonic flows in cascades p 315 A85-24092

Transonic cascade flow with given shock shapes solved by separate supersonic and subsonic computations
p 315 A85-24095

Fully-automatic flexible manufacturing cell for turbine blades p 367 A85-24647

An improved model of shock waves in front of two-dimensional cascades p 318 A85-25213

The addition of quasi-three-dimensional terms into a finite element method for transonic turbomachinery blade-to-blade flows p 386 A85-26920

A finite element method for the solution of two-dimensional transonic flows in cascades
p 386 A85-26921

Natural mode analysis of N blades disc coupled system - Modal synthesis of symmetric structure with Cnv group
p 445 A85-29147

Factors influencing heat transfer to the pressure surfaces of gas turbine blades p 421 A85-29345

Inspection of gas-turbine engine blades under operating conditions p 421 A85-29775

The dynamic stressed state of the cantilever turbocompressor blades of gas-turbine engines
p 421 A85-29886

Effects of mistuning on the forced vibration of bladed disks in subsonic flow
[AIAA PAPER 85-0760] p 505 A85-30377

The effect of aerodynamic and structural detuning on turbomachine supersonic unstalled torsional flutter
[AIAA PAPER 85-0761] p 506 A85-30378

A note on tower wake/blade interaction noise of a wind turbine p 470 A85-30773

Development of coatings for the protection of gas turbine blades against high temperature oxidation and corrosion
p 519 A85-32433

Computation of hydraulic losses in a plane profile cascade p 525 A85-32503

A note on blade wake interaction influence on compressor stator row aerodynamic performance
p 475 A85-32965

Performance assessment of exothermic compounds for directional solidification p 596 A85-34201

A compatible mixed design and analysis finite element method for the design of turbomachinery blades
p 599 A85-34706

Pretwist and shear flexibility in the vibrations of turbine blades p 657 A85-37233

The solution of transonic flow through three-dimensional turbine blade p 622 A85-37929

Explosive forming of low carboon steel sheet into a stepped disc shape p 694 A85-38169

Determination of the blade height of the last compressor stage for a refined thermodynamic design analysis of turbofan engines p 661 A85-39126

Progress in the utilization of an oxide-dispersion-strengthened alloy for small engine turbine blades
[SAE PAPER 841512] p 688 A85-39284

Simulation of wake passing in a stationary turbine rotor cascade p 629 A85-39589

Time resolved measurements of a turbine rotor stationary tip casing pressure and heat transfer field
[AIAA PAPER 85-1220] p 666 A85-39663

The effect of coatings on the thermomechanical fatigue life of a single crystal turbine blade material
[AIAA PAPER 85-1366] p 689 A85-39744

Noncontact engine blade vibration measurements and analysis
[AIAA PAPER 85-1473] p 670 A85-39798

Application of boundary element method to heat transfer coefficient measurements around a gas turbine blade
[ASME PAPER 84-WA/HT-69] p 698 A85-39897

Heat transfer investigation in the junction region of circular cylinder normal to a flat plate at 90 deg location
[ASME PAPER 84-WA/HT-70] p 698 A85-39898

Turbine component technology p 766 A85-41028

Cooling characteristics of air cooled radial turbine blades p 792 A85-41784

Inpingement cooling of turbine airfoils by multiple two-dimensional jets p 768 A85-41786

Experimental study of temperature effect on turbine vane cooling performance with multi-row ejection
p 768 A85-41788

Control of secondary flow in a turbine stage - Experimental and theoretical study p 727 A85-41804

Fully-three dimensional flow field analysis through turbine stages - Comparison between computation and experiments p 727 A85-41805

Development of computational flow analysis for blade rows p 727 A85-41813

A comparison of the Streamline Curvature Method with the Matrix Method used for turbo-machinery design in non-orthogonal curvilinear coordinate system
p 728 A85-41816

Measurement of unsteady pressure distribution on oscillating airfoils in a turbine annular cascade
p 769 A85-41829

Application of aircraft integrated data system on jet engine module performance monitoring and turbine blade life accounting p 770 A85-41840

Vibration characteristics and dynamic stresses in hollow turbine blades p 770 A85-41851

Slipping behavior and fretting fatigue in the disk/blade dovetail region p 770 A85-41852

Life prediction and constitutive models for engine hot section anisotropic materials
[AIAA PAPER 85-1421] p 852 A85-43980

Performance prediction of the Wells self-rectifying air turbine p 857 A85-45352

Refurbishing superalloy components for gas turbines
p 855 A85-45802

Improving reliability and lifetime of rejuvenated turbine blades p 855 A85-45803

Prediction of the inception of cavitation on blade profiles of hydraulic turbomachines p 906 A85-47849

The effect of channel convergence on heat transfer in a passage with short pin fins
[NASA-TM-83801] p 53 N85-10303

Nonlinear structural and life analyses of a turbine blade p 29 N85-10954

Studies on the hot corrosion of a nickel-base superalloy, Udimet 700
[NASA-TM-86882] p 45 N85-11224

A finite element method for the solution of two-dimensional transonic flows in cascades
[PNR-90216] p 86 N85-12045

Materials for advanced turbine engines. Project 2: Rene 150 directionally solidified superalloy turbine blades, volume 2
[NASA-CR-167993] p 112 N85-12059

Cyclic endurance testing of the RB211-22B cast HP turbine blade — high pressure (HP)
[PNR-90210] p 113 N85-12063

Turbine blade damping study, introduction
p 113 N85-12891

Random vibrations of aircraft engine blades
p 170 N85-14967

Problems and possibilities for life extension in gas turbine components p 267 N85-15742

Experiences with the material bevaviour and high temperature low cycle fatigue life prediction of the IN 738 blading alloy p 292 N85-15746

Verification of life prediction through component testing p 292 N85-15748

Current status of trailing edge loss calculation for a turbine blade
[PNR-90244] p 354 N85-18061

USSR report: Engineering and equipment
[JPRS-UEQ-85-001] p 370 N85-18200

Calculating heat transfer coefficients for turbine profiles taking surface curvature and elevated flow turbulence into account p 371 N85-18212

Correction of engraving stamp for forming blanks of gas turbine engine blades p 371 N85-18213

One-piece HPTR blade squealer tip
[AD-D011452] p 355 N85-18969

Nonlinear analysis for high-temperature multilayered fiber composite structures — turbine blades
[NASA-TM-83754] p 437 N85-21273

Energy losses at leading edge of turbine blade during multirow jet cooling p 508 N85-22826

effect of gas stream sweeping past the effluent of a perforated plate on heat transfer inside the perforations
p 527 N85-22836

Construction of profiles of intermediate blade sections from master profiles given on conical surfaces
p 529 N85-24075

Automating the study of error in discrete aerodynamic fairing design p 504 N85-24176

Advanced High Pressure O2/H2 Technology
[NASA-CP-2372] p 595 N85-26862

Investigation of heat transfer to a turbine blade cascade using a shock tube
[AD-A153090] p 671 N85-27871

Testing of materials and coatings for jet engine components under simulated operational conditions
[B8580073] p 672 N85-27873

Turbine blade-tip clearance excitation forces
[NASA-CR-171534] p 773 N85-29963

R and D activities of the Propulsion Division
p 799 N85-32025

Component-specific modeling
[NASA-CR-174925] p 836 N85-32119

**TURBINE ENGINES**

Extended range operations with two-engine airplanes - A regulatory view
[AIAA PAPER 84-2513] p 89 A85-13579

The role of modern control theory in the design of controls for aircraft turbine engines p 109 A85-13627

The dynamics of ball separators in ball bearings. II - Results of optimization study

Design description of a microprocessor based Engine Monitoring and Control unit (EMAC) for small turboshaft
[NASA-TM-86860] p 313 N85-17935

Experimental and analytical study of ceramic-coated turbine-tip shroud seals for small turbine engines
[NASA-TM-86881] p 353 N85-18057

An analytic model of gas turbine engine installations
[AD-A148708] p 354 N85-18059

USSR report: Engineering and equipment
[JPRS-UEQ-85-001] p 370 N85-18200

Use of braking stages for control of turbine speed
p 371 N85-18215

Advanced stress analysis methods applicable to turbine engine structures
[NASA-CR-175573] p 422 N85-21165

Pressure drop and coefficients of internal heat transfer necessary for transpiration cooling p 527 N85-22831

Composition and photochemical reactivity of turbine engine exhaust
[AD-A150559] p 533 N85-23256

Design of piping for oil drain from turbine bearings
p 529 N85-24073

Flow characteristics of a partially submerged liquid pickup
[DE85-008744] p 699 N85-28276

Improved statistical analysis method for prediction of maximum inlet distortion
[AD-A153767] p 673 N85-28947

Ceramic Technology for Advanced Heat Engines Project
[DE85-008755] p 691 N85-29052

Ceramic coatings for heat engine materials: Status and future needs
[DE85-008759] p 691 N85-29053

Ceramic coatings for heat engine materials
[DE85-005238] p 691 N85-29054

Component-specific modeling
[NASA-CR-174925] p 836 N85-32119

Energy efficient engine, high pressure turbine thermal barrier coating. Support technology report
[NASA-CR-168037] p 892 N85-35199

A study of the control of particulate emissions from turbine engine test cells p 898 N85-35205

**TURBINE EXHAUST NOZZLES**

Single expansion ramp nozzle development status
[AIAA PAPER 84-2455] p 108 A85-13543

**TURBINE INSTRUMENTS**

A real-time FORTRAN implementation of a sensor failure detection, isolation and accommodation algorithm
p 917 A85-47704

**TURBINE PUMPS**

Rotordynamic analysis of the SSME turbopumps using reduced models
[NASA-CR-171170] p 53 N85-10355

Advanced High Pressure O2/H2 Technology
[NASA-CP-2372] p 595 N85-26862

**TURBINE WHEELS**

Streamtube expansion effects on the Darreus wind turbine p 451 A85-27096

The properties of isolated and coupled Savonius rotors p 451 A85-27346

Polycrystalline grain controlled castings for rotating compressor and turbine components
p 519 A85-32380

A general theory of hybrid problems of fully 3-D compressible potential flow in turbo-rotors. I - Axial flow, stream function formulation p 622 A85-37931

Air turbine starter turbine wheel containment
[SAE PAPER 841546] p 661 A85-39156

Screw press forging of powder HIP billet to critical gas turbine discs and wheels p 795 A85-43158

Crack characterisation in turbine disks
p 905 A85-47396

Unsteady aerodynamic response of cascades and turborotors p 112 N85-12058

Comparison between the properties of conventional wrought and powder metallurgical alloys for turbine disc applications p 283 N85-15739

Problems and possibilities for life extension in gas turbine components p 287 N85-15742

Clearance flow-generated transverse forces at the rotors of thermal turbomachines
[NASA-TM-77292] p 295 N85-16160

Influence of setting angle of jet cooling nozzles on temperature and stress state of a turbine wheel
p 355 N85-18208

Aerodynamic forces developing in channels between vases in turbine drive wheels p 606 N85-27062

Unsteady heat transfer due to time-dependent free stream velocity p 699 N85-27947

**TURBINES**

Tests, in the transonic regime, of a model motorized by a blowing turbine 23 cm in diameter (9 inches) in the S1MA wind tunnel
[ONERA, TP NO. 1984-158] p 272 A85-19272

Cooling of a turbine profile in the case of air injection through porous areas p 352 A85-25622

Investigations of the influence of taper on the characteristic values of rotating annular turbine cascades in the transonic flow regime p 394 A85-30170

Assessment of three-dimensional inviscid codes and loss calculations for turbine aerodynamic computations
[ASME PAPER 84-GT-187] p 475 A85-32961

The three-dimensional compressible flow in a radial inflow turbine scroll p 729 A85-41826

A measuring and computing off-line and on-line system for a turbine laboratory p 795 A85-43052

Characteristics of controlled-oscillating annular cascade test facility with Freon gas
[NAL-TR-812] p 10 N85-10014

Further development of a transonic cascade analysis
[AD-A145410] p 54 N85-11319

Device for measuring relative axial expansion of turbine rotor employing space-vector tracking method
p 169 N85-14962

Unsteady gas dynamics problems related to flight vehicles
[AD-A151187] p 558 N85-25218

Aviation turbine fuels from tar sands bitumen and heavy oils. Part 1: Process analysis
[AD-A151319] p 597 N85-25539

Exploratory wind-tunnel investigation of a wingtip-mounted vortex turbine for vortex energy recovery
[NASA-TP-2468] p 560 N85-26667

Ceramic turbochargers: A case study of a near-term application of high-strength ceramics
[DE85-006495] p 700 N85-28379

Variable cycle engine for high altitude aircraft
[AD-D011705] p 774 N85-29969

Heat transfer in aeropropulsion systems
[NASA-TM-87066] p 798 N85-31444

Observations of the use of the setapoint detector
[AD-A154533] p 853 N85-32208

**TURBOCOMPRESSORS**

A study on configurations of casing treatment for axial flow compressors p 26 A85-10974

Unsteady response of an axial flow compressor to planar temperature transients p 143 A85-18507

Computation of three-dimensional flows for application to transonic compressors
[ONERA, TP NO. 1984-146] p 204 A85-19260

An experimental investigation of stator/rotor interaction influence on multistage compressor rotor flow
[AIAA PAPER 85-0009] p 208 A85-19455

Is the free flight/wind tunnel equivalence concept valid for unsteady viscous flow?
[AIAA PAPER 85-0378] p 222 A85-19708

Precalculation of rotating stall in multistage axial compressors — German thesis p 287 A85-19832

A procedure for the optimization of the aerothermodynamic design of multistage axial compressors — German thesis p 227 A85-19851

Determination of surging line of two-spool axial flow compressor with cropped fan stages at low speed by use of parallel compressor theory p 264 A85-20242

An experimental study of the rotating stall structure in an axial-flow compressor p 350 A85-23987

The use of grooves in the housings of axial-flow compressors with increased radial clearances
p 350 A85-23999

Computation of potential flow on S2 stream surface for a transonic axial-flow compressor rotor
p 315 A85-24091

A prediction research of rotating stall in axial compressors p 316 A85-24097

Investigations on transonic double circular arc (DCA)profiles of axial flow compressor - Calculations of profile design p 318 A85-25214

Rotating stall cells in a low-speed axial flow compressor p 385 A85-26753

The behavior of turbocompressors and turbocompressor installations during the pumping of the compressor — German thesis p 443 A85-28792

Experimental investigation of losses and secondary flow in an axial compressor stage p 524 A85-31007

The nonlinear model for predicting rotating stall in multistage axial-flow compressors p 471 A85-31339

Probabilistic characteristics of the frequency spectrum of the natural vibrations of turbocompressor blades
p 526 A85-32759

The effect of stress raisers on the load-bearing capacity of titanium-alloy compressor blades p 658 A85-37575

A generalization of experimental data on heat transfer from the working medium to the housing components of the compressor of a gas-turbine engine
p 660 A85-39112

Determination of the blade height of the last compressor stage for a refined thermodynamic design analysis of turbofan engines p 661 A85-39126

Correlation and prediction of rotating stall inception by divergence method p 629 A85-39245

Effects of inlet pressure fluctuations on axial flow compressors - Some experimental and theoretical results
[AIAA PAPER 85-1135] p 696 A85-39619

Cantilevered stator vane tip leakage studies
[AIAA PAPER 85-1136] p 664 A85-39620

Stall transients of axial compression systems with inlet distortion
[AIAA PAPER 85-1348] p 632 A85-39740

Axial-flow compressor stage post-stall analysis
[AIAA PAPER 85-1349] p 632 A85-39741

Quantitative evaluation of transient heat transfer on axial flow compressor stability
[AIAA PAPER 85-1352] p 697 A85-39742

High speed compressor rig as a stall recovery research tool
[AIAA PAPER 85-1426] p 682 A85-39773

An investigation of lift augmentation of tandem cascades
[ASME PAPER 84-WA/FM-3] p 633 A85-39875

Identification of quasi-steady in-stall compressor maps from transient data
[AIAA PAPER 85-1351] p 765 A85-40837

Studies on the flow in supersonic axial-flow compressor rotor. VI - A possibility of two-dimensional supersonic section having quasi-axisymmetric flows which satisfy simplified radial equilibrium p 723 A85-41007

Fan and compressor technology p 724 A85-41026

Measurement of 3-D unsteady flow downstream of rotor and stator blades in axial-flow compressors
p 729 A85-41828

The influence of aircraft turbomachine technology on vehicular turbocharger design p 793 A85-41830

Development of high specific speed centrifugal compressors for turbochargers p 793 A85-41831

Development of a high specific speed radial-inflow turbine for turbochargers p 793 A85-41832

Influence of heat transfer between turbine and compressor on the performance of small turbochargers
p 793 A85-41833

An experimental investigation of the generation and consequences of acoustic waves in an axial flow compressor Large axial spacings between blade rows
p 805 A85-42044

Is any free flight/wind tunnel equivalence concept valid for unsteady viscous flow? p 871 A85-49138

Energy efficient engine component development and integration program
[NASA-CR-170034] p 33 N85-10990

Full load testing in the platform module prior to tow-out: A case history of subsynchronous instability
p 186 N85-14117

Current problems in turbomachinery fluid dynamics
[AD-A147127] p 294 N85-16074

Study of residual stresses introduced into TA6ZrD (685) cylinders by quenching — compressor disk alloy
[PNR-90240] p 372 N85-18435

A theory of post-stall transients in multistage axial compression systems
[NASA-CR-3878] p 398 N85-21117

Some unique features in operation of two-stage turbojet engine with afterburner p 509 N85-22828

T700 cutter life improvement program
[AD-A150450] p 528 N85-23089

Unsteady flow in multistage turbines
p 698 N85-27946

Precision die forging of blades or gas turbines
p 672 N85-28148

Ceramic turbochargers: A case study of a near-term application of high-strength ceramics
[DE85-006495] p 700 N85-28379

Future of ceramic turbochargers: Promises and pitfalls
[DE85-006209] p 700 N85-28380

**TURBOFAN AIRCRAFT**

Tweety-bird replacement — from T-37B to Fairchild T-46A trainer aircraft p 646 A85-37945

Twin tilt nacelle V/STOL aircraft
[SAE PAPER 841556] p 650 A85-39206

MU-300 flight test data system p 762 A85-40977

Aerodynamic detuning analysis of an unstalled supersonic turbofan cascade
[NASA-TM-87001] p 560 N85-26670

A computer program for the drag prediction of subsonic, turbine powered aircraft in the en-route configuration
[VTH-LR-412] p 561 N85-26681

**TURBOFAN ENGINES**

Applications of finite element and wave envelope element approximations to turbofan engine noise radiation including flight effects
[AIAA PAPER 84-2333] p 62 A85-10877

An acoustic mode measurement technique
[AIAA PAPER 84-2337] p 62 A85-10879

Design development and optimization criteria considerations for a tandem fan medium speed V/STOL propulsion concept

Energy efficient engine. Volume 1: Component development and integration program
[NASA-CR-173084] p 34 N85-10992

Energy efficient engine ICLS engine bearings, drives and configuration: Detail design report
[NASA-CR-167871] p 34 N85-10997

Turbofan noise generation. Volume 2: Computer programs
[NASA-CR-167952] p 65 N85-11791

Static jet noise test results of four 0.35 scale-model QCGAT mixer nozzles
[NASA-TM-86871] p 135 N85-13551

Applications of finite and wave envelope element approximations to acoustic radiation from turbofan engine inlets in flight p 197 N85-14684

Effect of steady-state temperature distortion on inlet flow to a high-bypass-ration turbofan engine
[NASA-TM-86896] p 265 N85-15725

Flow measurement device
[AD-D011432] p 298 N85-17369

Research and development for semi-spherical inflow control device
[NAL-TR-833] p 353 N85-18056

On selecting bypass mixers for turbofan engines
p 354 N85-18207

Preliminary performance of a vertical-attitude takeoff and landing, supersonic cruise aircraft concept having thrust vectoring integrated into the flight control system
[NASA-CR-172530] p 345 N85-18977

Fluctuating pressures on fan blades of a turbofan engine, flight test investigation
[NASA-TP-2381] p 378 N85-19790

Review of engine ingestions to wide body transport aircraft
[AD-P004185] p 403 N85-19947

On the solution of the three-dimensional flowfield about a flow-through nacelle
[NASA-TM-87448] p 477 N85-22371

Effects of inlet distortion on a static pressure probe mounted on the engine hub in an F-15 airplane
[NASA-TP-2411] p 508 N85-22394

Hover test results of a small-scale twin-tilt nacelle model
[NASA-TM-86665] p 478 N85-23706

Performance and surge limits of a TF30-P-3 turbofan engine/axisymmetric mixed-compression inlet propulsion system at Mach 2.5
[NASA-TP-2461] p 581 N85-25261

Transient technique for measuring heat transfer coefficients on stator airfoils in a jet engine environment
[NASA-TM-87005] p 604 N85-25794

Spacer structure
[AD-D011641] p 670 N85-27866

Fan noise suppression in turbofan engines
[B8580076] p 671 N85-27872

DEAN: A program for dynamic engine analysis
[NASA-TM-87033] p 673 N85-28945

Energy efficient engine component development and integration program
[NASA-CR-172846] p 772 N85-29958

Fault detection and accommodation testing on an F100 engine in an F-15 airplane
[NASA-TM-86735] p 773 N85-29962

Measurement of turbofan-turbojet thrust from tailpipe static pressure
[AD-A154036] p 774 N85-29967

Energy Efficient Engine Program technology benefit/cost study, volume 1
[NASA-CR-174766-VOL-1] p 892 N85-35197

Energy Efficient Engine Program technology benefit/cost study, volume 2
[NASA-CR-174766-VOL-2] p 892 N85-35198

**TURBOFANS**

Far-field measurement and mode analysis of the effects of vane/blade ratio on fan noise
[AIAA PAPER 84-2280] p 25 A85-10840

Vibration and flutter of mistuned bladed-disk assemblies
[AIAA PAPER 84-0991] p 181 A85-16095

Contributions to the finite element solution of the fan noise radiation problem
[ASME PAPER 84-WA/NCA-1] p 537 A85-32954

Electro-impulse de-icing of a turbofan engine inlet
[AIAA PAPER 85-1118] p 754 A85-40811

Energy efficient engine component development and integration program
[NASA-CR-170034] p 33 N85-10990
Turbofan noise generation. Volume 2: Computer programs
[NASA-CR-167952] p 65 N85-11791
Structural response of a rotating bladed disk to rotor whirl
[NASA-CR-175605] p 507 N85-22391
Energy efficient engine. Fan and quarter-stage component performance report
[NASA-CR-168070] p 891 N85-34141

TURBOGENERATORS
Development of a filament wound composite shaft for an aircraft generator p 128 A85-15962

TURBOJET ENGINE CONTROL
Introduction into commercial service for electronic controls used on large turbofan engines
[SAE PAPER 841507] p 352 A85-25962
Stall recovery control strategy methodology and results
[AIAA PAPER 85-1433] p 765 A85-40641
New functional requirement to aero-engine control system p 766 A85-41030
Man-vehicle systems research facility advanced aircraft flight simulator throttle mechanism p 856 N85-33527

TURBOJET ENGINES
A biaxial fatigue test for dovetail joints — turbojet engines p 26 A85-11617
Comment on 'PAN AIR applications to aero-propulsion integration' p 6 A85-11990
An experimental investigation on response of turbojet engine to the turbulence-type of dynamic inlet distortion p 27 A85-12365
Development of a pneumatic thrust deflecting nozzle
[AIAA PAPER 84-2456] p 108 A85-13544
Data acquisition and processing for steady-state inlet pressure distortion at a turbojet engine face p 143 A85-18286
Aircraft turbojet engine modeling using artificial intelligence techniques
[AIAA PAPER 85-0253] p 263 A85-19616
Some improvements on an annular combustor of AI type turbojet engine p 264 A85-20235
Prediction of performance of aircraft gas turbines p 264 A85-21682
A simplified model for external loading on an engine nacelle enclosing an engine. I - For the nacelle at a steady incidence p 340 A85-24201
Turbulent vortices and bionics in turbojet p 393 A85-29700
Transient technique for measuring heat transfer coefficients on stator airfoils in a jet engine environment
[AIAA PAPER 85-1471] p 687 A85-39796
An analytical investigation of the ground and ambient head flow influence on the free inlet flow into a turbojet engine p 726 A85-41608
The trend of future gas turbine technology p 767 A85-41778
Ceramic heat exchangers for gas turbines or turbojets
[ONERA, TP NO. 1985-35] p 904 A85-47288
Unsteady aerodynamic forces induced by aeroelastic vibrations of a turbojet engine in a nacelle
[ONERA, TP NO. 1985-56] p 880 A85-47302
Surge transient simulation in turbo-jet engine p 169 N85-13796
Exploratory development of advanced surface flow detection methods
[AD-A148757] p 354 N85-18060
Experimental study of aerodynamic shielding of turbojet engine air intake against exhaust gases p 355 N85-18210
Experimental study of ceramic coated tip seals for turbojet engines
[NASA-TM-86939] p 373 N85-19363
Propagation of three-dimensional turbulent jet from lobar nozzle through surrounding stream p 527 N85-22785
Exergetical analysis of turbojet engine cycle p 508 N85-22825
Some unique features in operation of two-stage turbojet engine with afterburner p 509 N85-22828
Influence of fuel properties on gas turbine combustion performance
[AD-A151464] p 596 N85-25448
Transient technique for measuring heat transfer coefficients on stator airfoils in a jet engine environment
[NASA-TM-87005] p 604 N85-25794
Preliminary wind tunnel study of the influence of a jet on the unsteady aerodynamics of a turbojet engine
[ONERA-RT-12/5115-RY-230-R-] p 561 N85-26679
Measurement of turbofan-turbojet thrust from tailpipe static pressure
[AD-A154038] p 774 N85-29967
Variable cycle engine for high altitude aircraft
[AD-D011705] p 774 N85-29969
China has developed a new version of fighter aircraft
[AD-A155293] p 830 N85-32118

TURBOMACHINE BLADES
Flutter of turbofan rotors with mistuned blades p 122 A85-12716
Transformation of acoustic disturbances into coherent structures in the turbulent wake of an airfoil p 75 A85-13794
Vibration and flutter of mistuned bladed-disk assemblies
[AIAA PAPER 84-0991] p 181 A85-16095
Three dimensional aerodynamics of an annular cascade in a non-uniform inlet flow
[AIAA PAPER 85-0174] p 213 A85-19567
A relaxation approach to patched-grid calculations with the Euler equations
[AIAA PAPER 85-0295] p 218 A85-19644
Shock-free turbomachinery blade design p 232 A85-21864
Thin turbomachinery blade design using a finite-volume method p 314 A85-23957
The influence of blade wakes on the performance of outwardly curved combustor pre-diffusers
[AIAA PAPER 85-1291] p 667 A85-39704
Aerodynamic characteristics of an airfoil oscillating in transonic flow between parallel walls p 729 A85-41837
Vibration and flutter of mistuned bladed-disk assemblies p 838 A85-45854
Characteristics of controlled-oscillating annular cascade test facility with Freon gas
[NAL-TR-812] p 10 N85-10014
Performance deterioration of cascades exposed to solid particles p 112 N85-12057
Unsteady aerodynamic response of cascades and turborotors p 112 N85-12058
An improved computer model for prediction of axial gas turbine performance losses
[NASA-CR-174246] p 285 N85-15724
Tailored airfoils for vertical axis wind turbines
[DE85-004626] p 399 N85-21129
Current problems in turbomachinery fluid dynamics
[AD-A150533] p 508 N85-22397
Experimental and analytical investigation of fan flow interaction with downstream struts
[NASA-CR-175756] p 556 N85-25201
A study of internal and distributed damping for vibrating turbomachiner blades
[NASA-CR-175901] p 671 N85-27868
Unsteady heat transfer due to time-dependent free stream velocity p 699 N85-27947
Directionally solidified gas turbine alloys
[PNR-90264] p 901 N85-34279

TURBOMACHINERY
Reliability improvement of aerothermal analysis of high speed rotating machinery p 50 A85-11674
Experimental research on the design bases for aerodynamic spring bearings — German thesis p 50 A85-11722
Theoretical study of two-dimensional and three-dimensional potential flows with rotational source terms - Application to turbomachines — French thesis p 50 A85-11729
Numerical solutions of viscous transonic flow in turbomachinery cascades
[AIAA PAPER 85-0007] p 206 A85-19454
On the variety of type discrimination criteria of equations on S1 and S2 stream surfaces in turbomachine p 226 A85-20238
On the excitations due to the periodic structure of turbomachines p 288 A85-20800
Some analytical solutions applicable to verify 3-D numerical methods in turbomachines p 318 A85-25216
Conference on Fluid Machinery, 7th, Budapest, Hungary, September 13-16, 1983, Proceedings. Volumes 1 & 2 p 524 A85-30775
Families of variational principles for the semi-inverse and type-A hybrid problems on a S2-streamsheet in mixed-flow turbomachines p 622 A85-37930
Numerical simulation of three-dimensional transonic flow in a turbomachinery p 625 A85-38965
Application of Runge Kutta time marching scheme for the computation of transonic flows in turbomachines
[AIAA PAPER 85-1332] p 631 A85-39728
Two-dimensional turbulent flow analysis in turbomachinery by the finite element method
[ASME PAPER 84-WA/FM-2] p 633 A85-39874
Inviscid modeling of turbomachinery wake transport
[AIAA PAPER 85-1132] p 719 A85-40812
Environmental problems in turbomachinery p 769 A85-41811
Mathematical modelling of performance characteristics and optimization of turbomachine stages p 769 A85-41812
A comparison of the Streamline Curvature Method with the Matrix Method used for turbo-machinery design in non-orthogonal curvilinear coordinate system p 728 A85-41816
Finite element analysis for 3-D compressible potential flow in turbomachinery p 728 A85-41818
The propagation of acoustic modes in the annular circular duct of turbomachinery in the presence of swirling mean flow p 861 A85-44041
Inviscid and viscous flows in cascades with an explicit multiple-grid algorithm p 869 A85-46539
Performance deterioration of cascades exposed to solid particles p 112 N85-12057
Unsteady aerodynamic response of cascades and turborotors p 112 N85-12058
Rotordynamic Instability Problems in High-Performance Turbomachinery
[NASA-CP-2338] p 186 N85-14116
Preliminary investigation of labyrinth packing pressure drops at onset of swirl-induced rotor instability p 187 N85-14132
USSR report: Engineering and equipment
[JPRS-UEQ-84-007] p 188 N85-14954
The use of an optical data acquisition system for bladed disk vibration analysis
[NASA-TM-86891] p 190 N85-15184
Development of a Navier-Stokes rotor and stator analysis
[AD-A146967] p 294 N85-16070
Clearance flow-generated transverse forces at the rotors of thermal turbomachines
[NASA-TM-77292] p 295 N85-16180
Turbo fluid machinery and diffusers
[NASA-TM-77467] p 298 N85-17363
Current problems in turbomachinery fluid dynamics
[AD-A150533] p 508 N85-22397
Future directions in aeropropulsion technology
[NASA-TM-87010] p 467 N85-23685
Experimental and analytical investigation of fan flow interaction with downstream struts
[NASA-CR-175756] p 556 N85-25201
Vibrations of rotors connected through couplings with backlash p 672 N85-28147

TURBOPROP AIRCRAFT
The effects of installation on single- and counter-rotation propeller noise
[AIAA PAPER 84-2263] p 58 A85-10830
Quantification of advanced turboprop aircraft flyover noise annoyance
[AIAA PAPER 84-2293] p 56 A85-10848
Weakly nonlinear theory of supersonic turbopropeller noise
[AIAA PAPER 84-2302] p 60 A85-10853
Effects of acoustic treatment on the interior noise levels of a twin-engine propeller aircraft - Experimental flight results and theoretical predictions
[AIAA PAPER 84-2331] p 17 A85-10875
Predicted changes in advanced turboprop noise with shaft angle of attack
[AIAA PAPER 84-2347] p 63 A85-10884
Review of recent research of interior noise of propeller aircraft
[AIAA PAPER 84-2349] p 17 A85-10885
Noise control characteristics of synchrophasing - An analytical investigation — of turboprop aircraft noise
[AIAA PAPER 84-2369] p 17 A85-10898
Noise control characteristics of synchrophasing - An experimental investigation — on aircraft fuselage model
[AIAA PAPER 84-2370] p 17 A85-10899
SAAB-Fairchild 340 - Operator's analysis p 102 A85-13899
Advanced turboprop noise - A historical review
[AIAA PAPER 84-2261] p 133 A85-13958
R&D in the evolution of the DASH 8 p 155 A85-17226
Propagation of propeller tone noise through a fuselage boundary layer p 197 A85-18514
Avtek 400 - What is it? p 415 A85-29800
ATR42 achieves flight-test goals p 492 A85-31000
Stability and control results for advanced turboprop aft-mount installations
[SAE PAPER 841479] p 675 A85-39059
Aerodynamic test results for a wing-mounted turboprop propulsion installation
[SAE PAPER 841480] p 627 A85-39060
Comparison of advanced turboprop installation on swept and unswept supercritical wings at transonic speeds
[AIAA PAPER 85-1264] p 630 A85-39686
Effect of a wing-tip mounted pusher turboprop on the aerodynamic characteristics of a semi-span wing
[AIAA PAPER 85-1286] p 631 A85-39700
GP 180 - Reaching for an ideal p 752 A85-40072
ATR 42 - The definitive configuration certification program begun p 755 A85-40911
Benefits of blade sweep for advanced turboprops
[AIAA PAPER 85-1260] p 767 A85-41420

Dash 8 - Made for the new commuter market
p 756 A85-41531
Avtek 400 - Light is right p 758 A85-42895
Inviscid analysis of advanced turboprop propeller flow fields
[AIAA PAPER 85-1263] p 814 A85-43977
Turboprop battle hots up p 825 A85-44745
Noise radiation patterns of counter-rotation and unsteadily loaded single-rotation propellers
p 862 A85-45840
Effects of acoustic treatment on the interior noise of a twin-engine propeller airplane p 827 A85-45841
Predicted changes in advanced turboprop noise with shaft angle of attack p 836 A85-45861
Reducing landing dispersions through flight control improvements on a turboprop-powered transport aircraft (The Lockheed High Technology Test Bed)
[AIAA PAPER 85-1850] p 842 A85-45879
Flight investigation of cabin noise control treatments for a light turboprop aircraft
[SAE PAPER 850876] p 885 A85-50109
Garrett TPE331-12 engine provides improved altitude performance for high-speed executive turboprop aircraft
[SAE PAPER 850908] p 890 A85-50121
Observations from varying the lift and drag inputs to a noise prediction method for supersonic helical tip speed propellers
[NASA-TM-83797] p 64 N85-10788
Installed nacelle drag-improvement tests of an M = 0.8 turboprop transport configuration
[NASA-TM-84302] p 255 N85-15716
Transmission error measurements in gearbox development p 529 N85-23794
Establishment and maintenance of certification standards for helicopter and turboprop power transmission systems p 503 N85-23796
Fundamental studies of structure borne noise for advanced turboprop applications
[NASA-CR-175737] p 612 N85-26320
A computer program for the drag prediction of subsonic, turbine powered aircraft in the en-route configuration
[VTH-LR-412] p 561 N85-26681
Effects of propeller rotation direction on airplane interior noise levels
[NASA-TP-2444] p 805 N85-30767

TURBOPROP ENGINES
Reliable turboprop engines p 111 A85-14855
Development of the PW100 turboprop engines
p 168 A85-17229
Microprocessor control of turboprop engines
p 263 A85-19877
An improved source model for aircraft interior noise studies
[AIAA PAPER 85-0787] p 537 A85-30389
Load sharing in a planetary gear stage in the presence of gear errors and misalignment
[ASME PAPER 84-DET-54] p 580 A85-33768
Advanced single-rotation propfan drive system
p 663 A85-39577
Large-scale advanced propfan (LAP) program progress report
[AIAA PAPER 85-1187] p 836 A85-47021
Wind tunnel results of advanced high speed propellers in the takeoff, climb, and landing operating regimes
[AIAA PAPER 85-1259] p 817 A85-47025
Prop jet singles have arrived
[SAE PAPER 850882] p 890 A85-50112
Conversion of small aircraft to Allison turbine power
[SAE PAPER 850906] p 890 A85-50120
Garrett TPE331-12 engine provides improved altitude performance for high-speed executive turboprop aircraft
[SAE PAPER 850908] p 890 A85-50121
An electronic limiter for aircraft engines
[SAE PAPER 850910] p 890 A85-50122
An improved source model for aircraft interior noise studies
[NASA-CR-172517] p 305 N85-17668
Analytical fuel property effects: Small combustors, phase 2
[NASA-CR-174848] p 385 N85-19175
Gears and Power Transmission Systems for Helicopters and Turboprops
[AGARD-CP-369] p 502 N85-23765
A state of the art assessment of turboprop transmission technology and projected needs for the next generation
p 510 N85-23770
Advanced gearbox technology in small turbo propeller engines p 510 N85-23771
Fatigue life analysis of a turboprop reduction gearbox
[NASA-TM-87014] p 608 N85-27228
Wind tunnel results of advanced high speed propellers in the takeoff, climb and landing operating regimes
[NASA-TM-87054] p 740 N85-29925
Low-speed wind-tunnel tests of an advanced eight-bladed propeller
[NASA-TM-86364] p 740 N85-29928
Large-scale Advanced Propfan (LAP) program
[NASA-TM-87067] p 774 N85-29964
Two-plane balance and slip-ring design
p 856 N85-33536

TURBOSHAFTS
Development of a filament wound composite shaft for an aircraft generator p 126 A85-15962
A universal turboshaft engine test cell - Design considerations and model test results
[AIAA PAPER 85-0382] p 275 A85-19711
Studies of convertible turboshaft/turbofan engines for high-speed rotorcraft p 432 A85-29257
TF34 convertible engine control system design
p 506 A85-32006
Designing reliability into derivative engines
p 506 A85-32007
Turboshaft truce in Europe p 658 A85-38436
Temperature distortion generator for turboshaft engine testing
[SAE PAPER 841541] p 659 A85-39065
Engine design for maintenance and support
[AIAA PAPER 85-1204] p 665 A85-39654
Variable cycle turboshaft technology for rotor-craft of the 90's
[AIAA PAPER 85-1278] p 666 A85-39695
Prop jet singles have arrived
[SAE PAPER 850882] p 890 A85-50112
Temperature distortion generator for turboshaft engine testing
[NASA-TM-83748] p 200 N85-15658
Variable cycle engine for high altitude aircraft
[AD-D011705] p 774 N85-29969

TURBULENCE
Heat transfer and pressure drop in blade cooling channels with turbulence promoters
[NASA-CR-3837] p 126 N85-12315
Numerical studies of unsteady transonic flow over an oscillating airfoil
[NASA-TM-86011] p 126 N85-12316
A spatial model of wind shear and turbulence for flight simulation p 130 N85-12518
The role of freestream turbulence scale in subsonic flow separation
[NASA-CR-174172] p 87 N85-12870
Laminar separation bubble with transition: Prediction test with local interaction
[BLL-PNR-90231-(8019.3153)] p 189 N85-15132
Turbulence measurement interferometer apparatus
[AD-D011377] p 295 N85-16156
Recent advances in computational methods to solve the high-lift multi-component airfoil problem
p 236 N85-16774
Analysis of pressure gradient-velocity correlation in turbulent, premixed flames p 325 N85-17994
Skin friction measurements for 2 relatively thick airfoil sections at high Reynolds number
[AD-A150021] p 399 N85-21125
Estimating unsteady aerodynamic forces on a cascade in a three-dimensional turbulence field
[NASA-TM-86701] p 478 N85-23704
Numerical studies of unsteady transonic flow over oscillating airfoil p 554 N85-25174
Studies on the interference of wings and propeller slipstreams
[NASA-CR-175753] p 557 N85-25210
Observations, theoretical ideas and modeling of turbulent flows: Past, present and future
[NASA-TM-86679] p 607 N85-27167
Flat-plate transition p 798 N85-31438
R and D activities of the Propulsion Division
p 799 N85-32025

TURBULENCE EFFECTS
An experimental investigation on response of turbojet engine to the turbulence-type of dynamic inlet distortion
p 27 A85-12365
Rotor blade flap-lag stability and response in forward flight in turbulent flows p 115 A85-14050
Comment on 'Effects of atmospheric turbulence on a quadrotor heavy-lift airship' p 144 A85-18522
On boundary layer transition in high-subsonic and transonic flow under the influence of acoustic disturbances and free-stream turbulence
[AIAA PAPER 85-0082] p 210 A85-19508
Effects of turbulence and viscosity variation on the dynamic coefficients of fluid film journal bearings
[ASME PAPER 84-TRIB-8] p 289 A85-21283
The effects of non-coherence on energy extraction from a turbulent wind p 451 A85-27344
The effect of freestream turbulence on pressure fluctuations in transonic flow p 545 A85-34998
Noise bands associated with the turbulence-rotor interaction p 862 A85-44046
Application of two and three-dimensional criteria for calculating transitions and boundary layers over swept wings p 237 N85-16783
The effects of atmospheric turbulence on an air-to-air optical communication link
[AD-A151840] p 602 N85-25700
The physical and empirical basis for a specific clear-air turbulence risk index
[NASA-CR-178522] p 914 N85-35540

TURBULENT BOUNDARY LAYER
Laminar turbulent boundary layers; Proceedings of the Energy Sources Technology Conference, New Orleans, LA, February 12-16, 1984 p 48 A85-11619
Drag and aeroacoustic noise characteristics generated by surfaces featuring coupled roughness and blowing
p 48 A85-11620
Unsteady turbulent boundary layers and friction; Proceedings of the Energy Sources Technology Conference, New Orleans, LA, February 12-15, 1984
p 48 A85-11626
Evidence of large scale time dependent flow in the wing-wall interaction wake p 49 A85-11629
Interaction between a weak oblique shock wave and a turbulent boundary layer in purely supersonic flow
p 6 A85-12035
On the generation of sound by turbulent boundary layer flow over a rough wall p 133 A85-13724
Turbulent boundary layer-wake interaction
p 77 A85-14345
The measurements of drag resulting from small surface irregularities immersed in turbulent boundary layers
p 126 A85-15937
Turbulent roughness drag due to surface waviness at low roughness Reynolds numbers p 181 A85-16243
Oblique shock wave - Turbulent boundary layer interaction with suction p 142 A85-17243

Development of a rotor wake-vortex model, volume 1
[NASA-CR-174849] p 560 N85-26668

Acrosswind response of towers and stacks of circular cross-section p 796 N85-30354

**TURNING FLIGHT**

An experimental investigation of the aerodynamic effects on a body of revolution in turning flight
[AIAA PAPER 85-0866] p 624 A85-38782

Minimum time turning — of fighter aircraft
[AIAA PAPER 85-1780] p 837 A85-43840

High specific power aircraft turn maneuvers: Tradeoff of time-to-turn versus change in specific energy
[AD-A151701] p 575 N85-25257

**TWISTED WINGS**

Calculation of the aerodynamic characteristics of a wing p 142 A85-17066

Effect of a variable camber and twist wing at transonic Mach numbers
[NASA-TM-86281] p 87 N85-12869

Detailed pressure distribution measurements obtained on several configurations of an aspect-ratio-7 variable twist wing
[NASA-TM-86308] p 314 N85-18950

**TWISTING**

Pretwist and shear flexibility in the vibrations of turbine blades p 657 A85-37233

**TWO DIMENSIONAL BODIES**

Drag of the fundamental shapes of parachutes p 231 A85-20998

A method for predicting unsteady potential flow about an aerofoil p 545 A85-34707

The drag of simple shaped bodies in the rarefied hypersonic flow regime
[AIAA PAPER 85-0998] p 621 A85-37642

The theoretical minimum induced drag of three-surface airplanes in trim p 894 A85-49128

**TWO DIMENSIONAL BOUNDARY LAYER**

Turbulent boundary layer-wake interaction p 77 A85-14345

Development of a procedure for calculating two-dimensional boundary layers at gas turbine blades — German thesis p 81 A85-15873

The measurements of drag resulting from small surface irregularities immersed in turbulent boundary layers p 126 A85-15937

Efficient self-consistent viscous-inviscid solutions for unsteady transonic flow
[AIAA PAPER 85-0482] p 225 A85-19779

**TWO DIMENSIONAL FLOW**

Resonance in flows with vortex sheets and edges p 3 A85-10357

Two dimensional blade-vortex interaction flow visualization study
[AIAA PAPER 84-2307] p 4 A85-10858

Design method for highly-loaded blades with blockage in cascade p 5 A85-11644

Theoretical study of two-dimensional and three-dimensional potential flows with rotational source terms - Application to turbomachines — French thesis
p 50 A85-11729

Theoretical study of two dimensional stall in an incompressible flow
[ONERA, TP NO. 1984-83] p 7 A85-12812

Application of the Godunov method and its second-order extension to cascade flow modeling
[AIAA PAPER 83-1941] p 73 A85-12714

Theoretical study of the transonic flow past wedge profiles with detached shock waves p 74 A85-12870

Two-dimensional unsteady flow in Comprex rotor
p 123 A85-13995

Hypersonic large-deflection similitude for oscillating delta wings p 78 A85-14853

A random choice method for two-dimensional steady supersonic shock wave diffraction problems
p 141 A85-16531

Theoretical study of blockage effect of wind-tunnel wall on wake of two-dimensional flat plate normal to plane wall p 272 A85-19402

An incremental block-line-Gauss-Seidel method for the Navier-Stokes equations
[AIAA PAPER 85-0033] p 207 A85-19470

Computational study of circulation control with suction
[AIAA PAPER 85-0042] p 208 A85-19477

Calculation of viscous nozzle flows by the unsteady method of characteristics
[AIAA PAPER 85-0131] p 212 A85-19542

Analysis of circulation control airfoils using an implicit Navier-Stokes solver
[AIAA PAPER 85-0171] p 213 A85-19565

Some features of two-dimensional turbulent separated flows
[AIAA PAPER 85-0178] p 214 A85-19570

Application of continuous vorticity panels to general unsteady two-dimensional lifting flows
[AIAA PAPER 85-0282] p 217 A85-19633

Numerical solution of the two-dimensional Euler equations by second-order upwind difference schemes
[AIAA PAPER 85-0292] p 218 A85-19642

Finite volume solution of the two-dimensional Euler equations on a regular triangular mesh
[AIAA PAPER 85-0435] p 223 A85-19748

Grid adaptation for the 2-D Euler equations
[AIAA PAPER 85-0484] p 225 A85-19761

On the variety of type discrimination criteria of equations on S1 and S2 stream surfaces in turbomachine
p 228 A85-20238

Effect of inlet and outlet flow conditions on the flow and performance of subsonic two-dimensional diffuser
p 228 A85-20241

Analysis of steady, two-dimensional, chemically reacting, nonequilibrium, inviscid flow in nozzles
p 317 A85-25129

Experimental and theoretical investigations of the supersonic flow field on a two-dimensional step — German thesis p 318 A85-25448

Sidewall boundary-layer corrections in subsonic, two-dimensional airfoil/hydrofoil testing
p 439 A85-26761

The effects of gusts on the fluctuating airloads of airfoils in transonic flow p 385 A85-26762

A finite element method for the solution of two-dimensional transonic flows in cascades
p 386 A85-26921

Experimental study of flows in a two-dimensional inlet model p 386 A85-27092

Numerical calculation of a laminar two dimensional straight cascade flow p 386 A85-27348

X-marching methods to solve the Navier-Stokes equations in two- and three-dimensional flows
[ONERA, TP NO. 1985-6] p 387 A85-27886

Vortex induced lift on a flat plate with a curved forward-facing flap p 394 A85-30175

Exact solution for wind tunnel interference using the panel method p 591 A85-34734

Computation of steady supersonic flows by a flux-difference/splitting method p 545 A85-34735

An experimental investigation of the aerodynamics of nozzle flow in a rectangular passage
p 547 A85-35500

An experiment research of boundary layer control technique for multi-component airfoils
p 550 A85-35775

Separated flows p 600 A85-36302

Dynamic ground effects on a two-dimensional flat plate p 626 A85-39226

A computational study of the unsteady shock-wave structure in a two-dimensional transonic rotor
p 629 A85-39578

Accurate and efficient solutions of transonic internal flows
[AIAA PAPER 85-1334] p 631 A85-39729

Two-dimensional turbulent flow analysis in turbomachinery by the finite element method
[ASME PAPER 84-WA/FM-2] p 633 A85-39874

A Navier-Stokes solution procedure for analysis of steady two-dimensional transonic nozzle flows
[AIAA PAPER 85-1597] p 713 A85-40713

2-D and 3-D Euler flow calculations with a second-order accurate Galerkin finite element method
[AIAA PAPER 85-1706] p 716 A85-40779

A self-adaptive-grid method with application to airfoil flow
[AIAA PAPER 85-1525] p 722 A85-40957

Two- and three-dimensional grid generation for internal flow applications of computational fluid dynamics
[AIAA PAPER 85-1526] p 803 A85-40958

An implicit algorithm for solving 2D rotational flow in an aircraft engine fan frame
[AIAA PAPER 85-1534] p 722 A85-40965

Time dependent computation of the Euler equations for designing 2-D cascades, including the case of transonic shock free design p 727 A85-41814

Two-dimensional unsteady flow in Comprex rotor
p 728 A85-41819

Flow structure capturing on overset patched meshes
[AIAA PAPER 85-1690] p 731 A85-42690

Transonic interactions of unsteady vortical flows
p 734 A85-42969

Numerical solution of unsteady two-dimensional viscous flow around bodies p 734 A85-42970

Analysis of two-dimensional incompressible flow past airfoils using unsteady Navier-Stokes equations
p 735 A85-42975

An interactive scheme for three-dimensional transonic flows p 737 A85-42992

Example of transonic gas flow past an asymmetric profile p 814 A85-44130

Contribution to theory of similitude of subsonic flow
p 868 A85-48189

Flow instabilities in transonic small-disturbance theory
p 869 A85-48531

Variational principle for two dimensional flows of the compressible ideal fluid with incontinuous surfaces
p 909 A85-49704

Research on implicit approximate-factorization finite-difference method for the Euler equation
p 873 A85-49706

Analytical solutions for unsteady Prandtl-Meyer flow
p 873 A85-49710

Flow instabilities in transonic small disturbance theory
[NASA-TM-86251] p 326 N85-18000

Analysis of sudden expansion flow in a two-dimensional duct with and without side-wall injection using the k-epsilon turbulence model p 371 N85-18282

Transonic interactions of unsteady vortical flows
[NASA-TM-86658] p 397 N85-21113

Pseudospectral calculations of two-dimensional transonic flow (Task 1). Numerical investigation of VTOL aerodynamics (Task 2)
[AD-A150123] p 399 N85-21126

Numerical integration of the unsteady full-potential equation with applications to transonic flow about a two-dimensional airfoil
[NLR-MP-84022-U] p 400 N85-21130

Experimental studies of Quasi-Two-Dimensional and three-dimensional viscous interaction regions induced by skewed-shock and swept-shock boundary layer interactions
[AD-A150080] p 449 N85-21587

Propagation of three-dimensional turbulent jet from lobar nozzle through surrounding stream p 527 N85-22785

Unsteady transonic aerodynamic and aeroelastic calculations about airfoils and wings
p 555 N85-25185

Influence of surface roughness on compressor blades at high reynolds number in a two-dimensional cascade
[AD-A151855] p 603 N85-25777

Flow quality of National Aerospace Laboratory two-dimensional transonic wind tunnel. Part 3: Flow turbulence level and measuring method
[NAL-TR-842-PT-3] p 684 N85-28952

An evaluation of four methods of numerical analysis for two-dimensional airfoil flows
[AD-A155202] p 818 N85-32098

**TWO DIMENSIONAL JETS**

A comparison of triple-moment temperature-velocity correlations in the asymmetric heated jet with alternative closure models p 124 A85-14378

Approximate determination of the boundaries of an ideal gas jet issuing under conditions of pressure difference from a nozzle with the formation of a free vortex flow
p 315 A85-23982

Measurements of a zero-pressure-gradient boundary layer blown by an asymmetric jet p 390 A85-29077

Characteristics of a two-dimensional turbulent jet in a bounded slipstream p 695 A85-39131

Vector control of two-dimensional turbulent free jet by both-side flaps p 789 A85-40358

Impingement cooling of turbine airfoils by multiple two-dimensional jets p 768 A85-41786

Large amplitude forcing of a high speed 2-dimensional jet
[NASA-CR-175646] p 507 N85-22393

**TWO PHASE FLOW**

Spontaneous vapor condensation in nonequilibrium supersonic monodisperse flow p 47 A85-10550

A numerical study of gas-particle supersonic flow past blunt bodies - The case of axisymmetric flow
p 74 A85-12771

The fundamental equations of 3-dimensional two-phase particulate gas flow and a twofold stream surfaces model of solution for particulate gas flow in turbomachines
p 228 A85-20233

The motion of a spherical particle suspended in a turbulent flow near a plane wall p 444 A85-29056

Transonic small-disturbance theory for dusty gases
p 548 A85-35149

Environmental problems in turbomachinery
p 769 A85-41811

Flow of nitrogen-pressurized Halon 1301 in fire extinguishing systems
[NASA-CR-174271] p 242 N85-15701

Flow characteristics of a partially submerged liquid pickup
[DE85-008744] p 699 N85-28276

**TWO STAGE TURBINES**

Precalculation of rotating stall in multistage axial compressors — German thesis p 287 A85-19832

Procedure for the calculation of the characteristics of axial, respectively radial, one or multistage thermal flow machines, taking into consideration also the effect of adjustable guide devices — German thesis
p 598 A85-33402

The effect of opposing unsteady vorticity on turbulent wall flow
[AIAA PAPER 85-0590] p 321 A85-25943

Unsteady transonic phenomena around highly swept wings p 322 A85-26025

Numerical simulation of unsteady flow in a compressor rotor cascade
[AIAA PAPER 85-0133] p 323 A85-26383

Efficient algorithm for unsteady transonic aerodynamics of low-aspect-ratio wings p 335 A85-26756

Nonplanar doublet lattices — for lifting surfaces
p 335 A85-26765

Unsteady surface pressure measurements on a pitching airfoil
[AIAA PAPER 85-0532] p 337 A85-27878

Numerical calculation of rotor performances in real flight configurations
[ONERA, TP NO. 1985-13] p 338 A85-27882

A computer simulation of separated flow past a rotating cylinder and the Magnus force reversal
p 360 A85-28465

A field panel/finite difference method for potential unsteady transonic flow p 361 A85-29084

Unsteady laminar boundary-layer separation on oscillating configurations p 361 A85-29089

A new approach to apply the potential gradient method for supersonic unsteady airloads
[AIAA PAPER 85-0596] p 469 A85-30325

The computation of second-order accurate unsteady aerodynamic generalized forces
[AIAA PAPER 85-0597] p 469 A85-30326

Non-isentropic unsteady transonic small disturbance theory
[AIAA PAPER 85-0600] p 469 A85-30329

The Kutta condition in unsteady flow
p 471 A85-31183

The prediction of transonic flows on advancing rotors
p 472 A85-31988

A harmonic gradient method for unsteady supersonic flow calculations p 473 A85-32583

Unsteady flow about a Joukowski airfoil in the presence of moving vortices p 473 A85-32603

Observations of tip vortex cavitation inception from a model marine propeller p 526 A85-33220

Analyses of unsteady inviscid diffuser flow with a shock wave p 580 A85-34010

A method for predicting unsteady potential flow about an aerofoil p 545 A85-34707

Some problems in discrete vortex numerical modelling on vortex motion behind a circular cylinder
p 550 A85-35766

A new unsteady prescribed wake model of the aerodynamic behavior of a rotor in forward flight
p 617 A85-37178

Aerodynamic characteristics of the Weis-Fogh mechanism p 623 A85-38370

Stability of the thin-jet model of the unsteady jet flap
p 626 A85-38997

A computational study of the unsteady shock-wave structure in a two-dimensional transonic rotor
p 629 A85-39578

Unsteady blade row interactions in a multi-stage compressor
[AIAA PAPER 85-1134] p 630 A85-39618

Effects of inlet pressure fluctuations on axial flow compressors - Some experimental and theoretical results
[AIAA PAPER 85-1135] p 686 A85-39619

Combustion instability sustained by unsteady vortex combustion
[AIAA PAPER 85-1248] p 689 A85-39676

Unsteady aerodynamics on the ZKP large-scale model as a result of rapid control-surface motion
[DGLR PAPER 84-130] p 710 A85-40342

Computation of unsteady transonic aerodynamics with steady state fixed by truncation error injection
[AIAA PAPER 85-1644] p 715 A85-40744

Computational study of unsteady compressible flow around an airfoil by a block pentadiagnoal matrix scheme
[AIAA PAPER 85-1662] p 716 A85-40774

Three-dimensional unsteady Euler equations solutions on dynamic grids
[AIAA PAPER 85-1704] p 790 A85-40778

Unsteady characteristics of an airfoil interacting with a vortical wake
[AIAA PAPER 85-1707] p 718 A85-40780

Unsteady transonic flow over oscillating slender bodies
[AIAA PAPER 85-1709] p 718 A85-40781

Unsteady transonic full potential solutions for airfoils encountering vortices and gusts
[AIAA PAPER 85-1710] p 719 A85-40782

Unsteady transonic flow calculations for interfering lifting surface configurations
[AIAA PAPER 85-1711] p 719 A85-40783

A Mach 2.0 plus supersonic inlet study using the Navier-Stokes equations
[AIAA PAPER 85-1211] p 720 A85-40820

An implicit time-marching method for studying unsteady flow with massive separation
[AIAA PAPER 85-1489] p 790 A85-40929

Unsteady viscous flow round moving circular cylinders and airfoils
[AIAA PAPER 85-1490] p 720 A85-40930

A fast, time-accurate unsteady full potential scheme
[AIAA PAPER 85-1512] p 802 A85-40947

Navier-Stokes simulations of rotor-stator interaction using patched and overlaid grids
[AIAA PAPER 85-1519] p 721 A85-40952

Numerical calculation of unsteady transonic potential flow over three-dimensional wings p 723 A85-40988

Unsteady, separated flow p 791 A85-40989

A comparison between implicit and hybrid methods for the calculation of steady and unsteady inlet flows
[AIAA PAPER 85-1125] p 725 A85-41417

An improved kernel function computation in subsonic unsteady lifting surface theory p 726 A85-41739

Unsteady heat transfer of oscillating wake flows
p 726 A85-41781

Unsteady temperature analysis of air-cooled turbine vanes p 787 A85-41783

Two-dimensional unsteady flow in Comprex rotor
p 728 A85-41819

Measurement of the three-dimensional unsteady flow inside a rotor blade passage of an axial-flow fan
p 729 A85-41827

Measurement of 3-D unsteady flow downstream of rotor and stator blades in axial-flow compressors
p 729 A85-41828

Aerodynamic responses of turbine rotor blade to sinusoidal gust of large vorticity p 729 A85-41835

An experimental investigation of an airfoil undergoing large-amplitude pitching motions p 730 A85-42351

Transonic interactions of unsteady vortical flows
p 734 A85-42969

Numerical solution of unsteady two-dimensional viscous flow around bodies p 734 A85-42970

Unsteady airfoil boundary layers - Experiment and computation p 735 A85-42972

Analysis of two-dimensional incompressible flow past airfoils using unsteady Navier-Stokes equations
p 735 A85-42975

An inviscid model of unsteady aerofoil flow with fixed upper surface separation p 816 A85-45166

Computed static stall of a supercritical airfoil
p 867 A85-47103

Extension and use of numerical procedure for the three dimensional unsteady transonic flows
[ONERA, TP NO. 1985-67] p 868 A85-47269

Calculation of three-dimensional flowfields by the unsteady method of characteristics p 869 A85-48532

The unsteady properties of a flow within a schematic air intake
[AAAF PAPER NT 84-09] p 870 A85-48989

The characteristics of unsteady flow in air intakes
[AAAF PAPER NT 84-13] p 870 A85-48993

Verification of calculation methods for unsteady airloads in the prediction of transonic flutter
[AIAA PAPER 84-0871] p 871 A85-49126

Is any free flight/wind tunnel equivalence concept valid for unsteady viscous flow? p 871 A85-49138

Unsteady lifting-line theory as a singular-perturbation problem p 871 A85-49353

Analytical solutions for unsteady Prandtl-Meyer flow
p 873 A85-49710

Development and applications of algorithms for calculating the transonic flow about harmonically oscillating wings
[NASA-CR-172376] p 9 N85-10007

Experiences with nonsynchronous forced vibration in centrifugal compressors p 187 N85-14119

An experimental study of airfoil-spoiler aerodynamics
[NASA-CR-177328] p 147 N85-14796

Comparison of analytical and experimental steady and unsteady-pressure distributions at Mach number 0.78 for a high-aspect-ratio supercritical wing model with oscillating control surfaces
[NASA-TM-84589] p 235 N85-15697

Some important problems in unsteady boundary layers including separation. 2: Unsteady boundary layers close to the stagnation region of slender bodies
[AD-A146964] p 294 N85-16069

Proceedings of the workshop on unsteady separated flow held at the United States Air Force Academy on August 10-11, 1983
[AD-A148249] p 313 N85-17937

Wing rock flow phenomena
[AD-P004154] p 323 N85-17939

Unsteady aerodynamic loading of an airfoil due to vortices released intermittently from its upper surface
[AD-P004162] p 324 N85-17947

Can the singularity be removed in time-dependent flows?
[AD-P004165] p 324 N85-17950

Unsteady seperated flow: Forced and common vorticity about oscillating airfoils
[AD-P004167] p 324 N85-17952

Unsteady separated flows: Generation and use by insects
[AD-P004168] p 324 N85-17953

Theoretical study of non-linear unsteady aerodynamics of a non-rigid lifting body
[AD-P004169] p 325 N85-17954

Theoretical investigation of dynamic stall using a momentum integral method
[AD-P004170] p 325 N85-17955

Preliminary results from the unsteady airfoil model USTAR2
[AD-P004171] p 325 N85-17956

Flow separation induced by periodic aerodynamic interference
[AD-P004174] p 325 N85-17959

On the flow processes in sharply inclined and stalled airfoils in parallel movement and rotation
[NASA-TM-77509] p 328 N85-18952

Unsteady transonic flow calculations for two-dimensional canard-wing configurations with aeroelastic applications
[NASA-TM-86375] p 329 N85-18960

Parachute inflation dynamics p 396 N85-20792

Unsteady aerodynamic characterization of a military aircraft in vertical gusts
[NASA-TM-77810] p 396 N85-21110

Three-dimensional unsteady lifting surface theory in the subsonic range
[NASA-TM-77812] p 397 N85-21111

Transonic interactions of unsteady vortical flows
[NASA-TM-86658] p 397 N85-21113

Unsteady flows around 3-dimensional wings
[AD-A149993] p 399 N85-21124

Numerical integration of the unsteady full-potential equation with applications to transonic flow about a two-dimensional airfoil
[NLR-MP-84022-U] p 400 N85-21130

Estimating unsteady aerodynamic forces on a cascade in a three-dimensional turbulence field
[NASA-TM-86701] p 478 N85-23704

Recent transonic unsteady pressure measurements at the NASA Langley Research Center
[NASA-TM-86408] p 479 N85-23710

Transonic Unsteady Aerodynamics and its Aeroelastic Applications
[AGARD-CP 374] p 542 N85-25171

Trends in computational capabilities for fluid dynamics
p 601 N85-25172

Transonic pressure distributions on a two-dimensional 0012 and supercritical MBB-A3 profile oscillating in heave and pitch p 554 N85-25173

Analysis of transonic aerodynamic characteristics for a supercritical airfoil oscillating in heave, pitch and with oscillating flap p 554 N85-25175

Experience with transonic unsteady aerodynamic calculations p 554 N85-25176

Calculation of unsteady transonic separated flows by viscous-inviscid interaction p 554 N85-25178

A semi-empirical unsteady transonic method with supersonic free stream p 555 N85-25179

Improvement and extension of a numerical procedure for the three dimensional unsteady transonic flows
p 555 N85-25181

Computation of unsteady transonic flows about two-dimensional and three-dimensional AGARD standard configurations p 555 N85-25183

Calculation of unsteady transonic flow around a high swept wing p 555 N85-25184

The development of unsteady transonic 3-D full potential code and its aeroelastic applications
p 555 N85-25187

Unsteady analysis of rotor blade tip flow
[NASA-CR-3868] p 556 N85-25202

Transonic aerodynamic and aeroelastic characteristics of a variable sweep wing
[NASA-TM-86677] p 556 N85-25203

Recent progress in computational aerodynamics
p 558 N85-26626

Background noise measurements from jet exit vanes designed to reduced flow pulsations in an open-jet wind tunnel
[NASA-TM-86383] p 683 N85-27916

Unsteady flow in multistage turbines
p 698 N85-27946

A first-order time-domain Green's function approach to supersonic unsteady flow
[NASA-CR-172208] p 741 N85-29930

Unsteady transonic flow calculations for interfering lifting surface configurations
[NASA-TM-86432] p 741 N85-29931

Verification of calculation methods for unsteady airloads in the precipitation of transonic flutter
[NLR-MP-84016-U] p 744 N85-31027

Compendium of unsteady aerodynamic measurements, addendum 1
[AGARD-R-702-ADD-1] p 744 N85-31028

Data set 9: LANN wing. Pitching oscillation
p 744 N85-31030

Modelling of unsteady, incompressible separation on an aerofoil using an inviscid flow algorithm
[GU-AERO-8412] p 874 N85-34122

Unsteady transonic heat transfer in a transient facility
[NASA-CR-176145] p 910 N85-34354

**UNSTEADY STATE**

Full load testing in the platform module prior to tow-out: A case history of subsynchronous instability
p 186 N85-14117

Subsynchronous vibrations in a high pressure centrifugal compressor: A case history p 186 N85-14118

Control of rotordynamic instability in a typical gas turbine's power system p 187 N85-14120

Experimental on-stream elimination of resonant whirl in a large centrifugal compressor p 187 N85-14121

**UNSWEPT WINGS**
Wing tip sails which give lower drag at all normal flight speeds p 79 A85-14854
Cl Beta of unswept flat wings in sideslip. II p 623 A85-38371
Conical similarity of shock/boundary-layer interactions generated by swept and unswept fins p 626 A85-38984
Turbulent bubbles behind airfoils and wings at high angle of attack p 296 N85-16779

**UPPER ATMOSPHERE**
Aerodynamics for an entry research vehicle [AIAA PAPER 85-1793] p 814 A85-43879
MERIT: A man/computer data management and enhancement system for upper air nowcasting/forecasting in the United States — Minimum Energy Routes using Interactive Techniques (MERIT) p 58 N85-10558
Transport processes in the upper atmosphere p 454 N85-20375

**UPPER SURFACE BLOWING**
Development of a pneumatic thrust deflector [SAE PAPER 841558] p 663 A85-39209
A study of lift characteristics of an upper surface blown jetwing with a rectangular nozzle p 145 N85-13767
Low-speed wind tunnel tests of the NAL fan-jet STOL research aircraft model with ground simulation by tangential blowing [NAL-TR-828] p 345 N85-18976

**UPSTREAM**
Upstream influence in conically symmetric flow p 546 A85-35153
Effect of upstream sidewall boundary layer removal on an airfoil test — conducted in Langley 0.3-m transonic cryogenic tunnel p 83 N85-12019

**UPWASH**
Effects of a central fence on upwash flows p 817 A85-45839
Integral equation of lifting surfaces in Laplace domain and analytic continuation of its pressure kernel [NAL-TR-795T] p 9 N85-10009
An investigation of turbulence mechanisms in V/STOL upwash flow fields [AD-A149786] p 399 N85-21123
Fuselage upwash effects on RSRA rotor systems [NASA-CR-177349] p 743 N85-31015

**UREAS**
Long term durability of urea formaldehyde glued joints removed from Vampire aircraft [AD-A149053] p 346 N85-18985

**USER MANUALS (COMPUTER PROGRAMS)**
Computer programs to predict induced effects of jets exhausting into a crossflow [NASA-CR-166591] p 146 N85-13776
PROGRAM VSAERO: A computer program for calculating the non-linear aerodynamic characteristics of arbitrary configurations: User's manual [NASA-CR-166476] p 148 N85-14802
NOISEMAP 4.4 computer program update, operator's manual, addendum 1 [AD-A147091] p 302 N85-16503
Automatic Dynamic Aircraft Modeler (ADAM), volume 1 [AD-A151410] p 575 N85-25252
A user's manual for AMEER flight path trajectory simulation code [DE85-006580] p 576 N85-25260
ESP (External-Stores Program): A pilot computer program for determining flutter-critical external-store configurations. Volume 1: User's manual [AD-A152288] p 587 N85-26725
Users manual for coordinate generation code CRDSRA [NASA-CR-172584] p 634 N85-27824
User's manual for airfoil flow field computer code SRAIR [NASA-CR-172585] p 634 N85-27825
Airport and airway system cost allocation model. Volume 7: User's manual [AD-A152877] p 683 N85-27917
Development of NATOPS performance software for the SH-3D and SH-3H helicopters [AD-A156140] p 887 N85-35192

**USER REQUIREMENTS**
Operational air traffic control requirements for the new Voice Switching and Control System [AIAA PAPER 84-2435] p 92 A85-13530
On the development of a data base for the Navstar GPS phase IIB user equipment DT&E (OR) field testing p 95 A85-14839
Future communications/navigation/surveillance requirements for Department of Defense Air Transport Operations p 407 A85-27533
New model introduction - The operators' perspective — in helicopter industry p 482 A85-31981
A mission oriented approach to cockpit design as applied to observation and attack helicopters p 497 A85-32011
Maintainability aspects in maintenance management p 909 A85-49536
Civil law enforcement missions p 139 N85-14812
ATE user's view on design for maintainability p 202 N85-16737
Study on needs for a magnetic suspension system operating with a transonic wind tunnel [NASA-CR-3900] p 593 N85-26759

**UTILITY AIRCRAFT**
LHX - Not just another helicopter p 572 A85-35351
Application possibilities for transport helicopters p 707 A85-40290

**V/STOL AIRCRAFT**
Analytical study of blowing boundary layer control for subsonic V/STOL inlets p 5 A85-11646
Design development and optimization criteria considerations for a tandem fan medium speed V/STOL propulsion concept [AIAA PAPER 84-2395] p 107 A85-13500
Techniques to reduce exhaust gas ingestion for vectored-thrust V/STOVL aircraft [AIAA PAPER 84-2398] p 97 A85-13508
Advances in ejector thrust augmentation [AIAA PAPER 84-2425] p 107 A85-13526
Single expansion ramp nozzle development status [AIAA PAPER 84-2455] p 108 A85-13543
Unique weight and balance aspects of V/STOL airplane design [SAWE PAPER 1518] p 159 A85-18809
From AV-8B to the ASTOVL p 246 A85-19184
Thermal analysis techniques for design of VSTOL aircraft rotor ice protection [AIAA PAPER 85-0340] p 332 A85-26367
Designing a V/STOL fighter - McDonnell's AV-8B Harrier II p 570 A85-33437
Harrier GR5, second-generation jump jet - Easier ride, greater punch p 571 A85-33870
Research trend in advanced technology helicopter p 647 A85-38360
AV-8B-mean Marine V/STOL machine p 648 A85-38437
V/STOL: An update and overview; Proceedings of the Aerospace Congress and Exposition, Long Beach, CA, October 15-18, 1984 [SAE SP-591] p 616 A85-39201
Computer study of a jet flap ASTVOL 'Harrier' [SAE PAPER 841457] p 650 A85-39202
Model test results of the split-fan cross-ducted propulsion system concept for medium speed V/STOL aircraft [SAE PAPER 841495] p 663 A85-39203
Series flow tandem fan - A high-speed V/STOL propulsion concept [SAE PAPER 841496] p 650 A85-39204
Circulation control technology applied to propulsive high lift systems [SAE PAPER 841497] p 627 A85-39205
Recent developments in ejector design for V/STOL aircraft [SAE PAPER 841498] p 663 A85-39206
Twin tilt nacelle V/STOL aircraft [SAE PAPER 841556] p 650 A85-39208
Study of an asymmetric flap nozzle as a thrust-vectoring device p 629 A85-39582
Investigation of outside visual cues required for low speed and hover [AIAA PAPER 85-1808] p 857 A85-43857
Effects of a central fence on upwash flows p 817 A85-45839
Inlet and airframe compatibility for a V/STOL fighter/attack aircraft with top-mounted inlets [NASA-TM-84252] p 10 N85-10015
Computer programs to predict induced effects of jets exhausting into a crossflow [NASA-CR-166591] p 146 N85-13776
An investigation of turbulence mechanisms in V/STOL upwash flow fields [AD-A149786] p 399 N85-21123
Some aspects of the design of a fly-by-wire flying control system for a supersonic V/STOL fighter aircraft [COLL-AERON-8413] p 425 N85-21175
Special course on V/STOL aerodynamics: An assessment of European jet lift aircraft [AGARD-R-710-ADDENDUM] p 542 N85-25188
Future of V/STOL aircraft systems: A survey of opinions [NASA-TM-86689] p 654 N85-28937

**VALUE ENGINEERING**
New materials needs in aeronautics [SNIAS-851-502-101] p 831 N85-33120
DOD Value Engineering Conference report. Value Engineering (VE): A tool that benefits line management held at Leesburg, Virginia on 1-2 November 1984. Part 2. Plenary session [AD-A156068] p 919 N85-35811

**VALVES**
Airspeed sensing pressure valve system [AD-D011472] p 348 N85-18987

**VANADIUM ALLOYS**
The influence of microstructure on the temperature-dependent flow properties of Ti-6Al-4V p 687 A85-38749
Development and properties of Ti-15V-3Cr-3Sn-3Al (Ti-15-3) p 851 A85-43662

**VANELESS DIFFUSERS**
Development of an advanced vaneless inlet particle separator for helicopter engines [AIAA PAPER 85-1277] p 666 A85-39694
Slip Factor dependence on flow coefficient in centrifugal compressors p 793 A85-41823
Lateral fluid forces acting on a whirling centrifugal impeller in vaneless and vaned diffuser p 187 N85-14123
A three-dimensional axisymmetric calculation procedure for turbulent flows in a radial vaneless diffuser [NASA-TM-86903] p 147 N85-14798

**VANES**
Matrix solution of compressible flow on S(1) surface through a turbomachine blade row with splitter vanes or tandem blades p 227 A85-20228
Complete three-dimensional flow solution of a cascade incorporating splitter vanes of arbitrary geometry p 228 A85-20230
Influence of the blockage ratio on the efficiency of swirl generation with vane swirlers [AIAA PAPER 85-1103] p 696 A85-39805
Unsteady temperature analysis of air-cooled turbine vanes p 767 A85-41783
Studies on the hot corrosion of a nickel-base superalloy, Udimet 700 [NASA-TM-86882] p 45 N85-11224
Comparison of options for reduction of noise in the test section of the NASA Langley 4x7m wind tunnel, including reduction of nozzle area [NASA-CR-172446-VOL-2] p 197 N85-14667
Prediction of vortex-induced loads on wind-tunnel turning vanes [NASA-TM-86678] p 556 N85-25204
Aerodynamic forces developing in channels between vases in turbine drive wheels p 606 N85-27062

**VAPOR PHASES**
Helicopter cooling, air cycle/vapor cycle trade-offs [SAE PAPER A840942] p 570 A85-33753
Environmental control systems for helicopters compared p 756 A85-41070

**VAPOR PRESSURE**
Trends of petroleum fuels [DE85-000116] p 522 N85-24023

**VAPORIZERS**
Recent advances in vaporiser fuel injection technology p 768 A85-41794

**VAPORIZING**
Transverse jet breakup and atomization with rapid vaporization along the trajectory p 444 A85-29092

**VAPORS**
Vapor-screen technique for flow visualization in the Langley Unitary Plan Wind Tunnel [NASA-TM-86384] p 740 N85-29929

**VARIABILITY**
Variability of major organic components in aircraft fuels. Volume 3: Sample data package for the reference JP-4 fuel [AD-A145483] p 45 N85-11254

**VARIABLE CYCLE ENGINES**
Variable cycle turboshaft technology for rotor-craft of the 90's [AIAA PAPER 85-1278] p 666 A85-39695
Supersonic cruise technology [NASA-SP-472] p 617 N85-28912
Variable cycle engine for high altitude aircraft [AD-D011705] p 774 N85-29969

**VARIABLE GEOMETRY STRUCTURES**
Design and performance evaluation of a two-position variable geometry turbofan combustor p 580 A85-34005
New adaptive test section for the high-speed wind tunnel of the DFVLR Goettingen [DGLR PAPER 84-1068] p 778 A85-40326
A representation of the aerodynamic characteristics of a flight vehicle of varying shape p 815 A85-44850
The propagation of a subsonic turbulent jet in a closed plane container of varying length p 816 A85-44851

**VARIABLE PITCH PROPELLERS**

Design of compensation schemes for a nonminimum-phase multivariable plant p 458 A85-28810

Circulation control propellers for general aviation, including a BASIC computer program [NASA-CR-165968] p 773 N85-29959

**VARIABLE SWEEP WINGS**

Canard/tail comparison for an advanced variable-sweep-wing fighter [AIAA PAPER 84-2401] p 97 A85-13510

Projected advantage of an oblique wing design on a fighter mission [AIAA PAPER 84-2474] p 102 A85-13965

Potential flow calculations and preliminary wing design in support of an NLF variable sweep transition flight experiment [AIAA PAPER 85-0426] p 248 A85-19741

Discussions on the regular behavior of the longitudinal dynamic response of aircraft during variable sweep flights p 674 A85-38974

Mission adaptive wing p 828 A85-46499

Project advantage of an oblique wing design on a fleet air defense mission p 881 A85-49135

AFTI MAW - Wing of the future — Advanced Fighter Technology Integrator flight test program for Mission Adaptive Wing concept [SAWE PAPER 1617] p 863 A85-49921

Transonic aerodynamic and aeroelastic characteristics of a variable sweep wing [NASA-TM-85677] p 556 N85-25203

**VARIATIONAL PRINCIPLES**

Application of a variational method for generating adaptive grids — for gas dynamics past airfoils [AIAA PAPER 85-0487] p 226 A85-19784

The solution of variational finite element method for the inverse problem on S2 relative stream surface in turbines p 318 A85-25215

Variational problems of gas dynamics - Formulations, methods of solution, and the relationship between exact and approximate approaches p 388 A85-28382

The computation of second-order accurate unsteady aerodynamic generalized forces [AIAA PAPER 85-0597] p 488 A85-30326

Families of variational principles for the semi-inverse and type-A hybrid problems on a S2-streamsheet in mixed-flow turbomachines p 622 A85-37930

Implicit TVD schemes for hyperbolic conservation laws in curvilinear coordinates [AIAA PAPER 85-1513] p 721 A85-40948

Variational principle families for hybrid problems of blade-to-blade flow along axisymmetric stream-sheet - A unified variable-domain approach p 872 A85-49703

Variational principle for two dimensional flows of the compressible ideal fluid with incontinuous surfaces p 909 A85-49704

**VARIATIONS**

The effects of parameter variation on helicopter performance [AD-A156027] p 887 N85-35189

**VATOL AIRCRAFT**

Preliminary performance of a vertical-attitude takeoff and landing, supersonic cruise aircraft concept having thrust vectoring integrated into the flight control system [NASA-CR-172530] p 345 N85-18977

Ground effect on helicopter aerodynamics and stability p 776 N85-31063

**VECTOR ANALYSIS**

Wind shear measuring on board an airliner [NASA-TM-77463] p 131 N85-12521

**VECTOR SPACES**

An algebraic solution of the GPS equations p 406 A85-26609

**VECTORS (MATHEMATICS)**

Determination of the discrepancy vector components using nonlinear functions in solving certain boundary value elasticity problems p 600 A85-35900

**VEHICLE WHEELS**

The analysis on the dynamic performance of a single lug [AD-P004289] p 379 N85-18866

**VELOCITY**

Speed benefits of tilt-rotor designs for LHX [NASA-CR-166437] p 255 N85-15717

**VELOCITY DISTRIBUTION**

A Fourier Transform method for calculating velocity profiles on airfoils [AIAA PAPER 85-0208] p 215 A85-19592

Unsteady flow at the outlet of the high specific speed centrifugal compressor impeller [ASME PAPER 84-JPGC-GT-10] p 385 A85-28194

Incompressible flow round an airfoil in a straight-line cascade and between parallel walls, with some phenomena in the boundary layer taken into consideration p 386 A85-28373

A theorem on swirl loss in propeller wakes p 392 A85-29265

The preliminary design of aerodynamic profiles p 475 A85-33350

Mean velocity and static pressure distributions in a three-dimensional turbulent free jet p 546 A85-35155

LDA measurements for leading edge vortex core of a strake-wing p 550 A85-35774

Power spectral density of subsonic jet noise p 704 A85-37896

Computations of projectile Magnus effect at transonic velocities p 626 A85-38981

Effects of non-uniform velocity profiles on dual jets in a crossflow [AIAA PAPER 85-1674] p 716 A85-40763

Computation of velocity and pressure variation across thick turbulent stern flows p 736 A85-42985

Laser anemometer study of separated flow on wing profiles [ISL-CO-214/83] p 88 N85-12872

Laminar separation bubble with transition: Prediction test with local interaction [BLL-PNR-90231-(8019.3153)] p 169 N85-15132

Calculation of the velocity field generated by a helicopter main and tail rotors in hover [AD-A147731] p 239 N85-16833

Effect of drag behind nozzle array on its force and energy characteristics p 481 N85-24107

Investigation of potential and viscous flow effects contributing to dynamic stall [AD-A151696] p 602 N85-25773

A comparison of laser Doppler anemometry and probe measurements within the boundary layer of an airfoil at subsonic flow [ISL-CO-219/84] p 875 N85-34127

**VELOCITY MEASUREMENT**

Laser-three-slice (L3S) velocimeter and applications in aerodynamics flow field measurements p 366 A85-25224

Laser anemometry - Beyond laboratory techniques p 369 A85-26019

Photographic surveying of flow speed and direction adjacent to a surface p 441 A85-27646

Velocity characteristics of the wakes of in-cylinder projectiles [AIAA PAPER 85-1676] p 716 A85-40764

Velocity measurements in the near wake of a hovering rotor [AIAA PAPER 85-1675] p 725 A85-41406

Measurements of flow field within an axial flow fan rotor using a Laser Two Focus velocimeter p 727 A85-41809

The design of a fluidic low-airspeed sensor p 888 A85-47791

Laser velocimeter measurements of the flow fields around single- and counter-rotation propeller models [SAE PAPER 850870] p 873 A85-50105

Hot section laser anemometry p 30 N85-10962

Laser anemometer optimization p 30 N85-10963

Analysis of pressure gradient-velocity correlation in turbulent, premixed flames p 325 N85-17994

Method of calculating separation flow of subsonic gas stream around wings p 636 N85-28161

Geomagnetic velocimeter [AD-D011672] p 764 N85-29953

Determination of vertical air velocity using measurements of the aircraft motion p 914 N85-35545

**VENTILATION**

Numerical simulations of the effect of ventilation control on fire and smoke spread in aircraft cabins [ASME PAPER 84-HT-104] p 149 A85-18843

Hangar destratification investigation [AD-A145049] p 38 N85-10076

Performance of two transonic airfoil wind tunnels utilizing limited ventilation p 83 N85-12020

Active and passive shock/boundary layer interaction control on supercritical airfoils p 238 N85-16795

Theoretical and experimental investigations of dust loaded flow fields in industrial halls [BMFT-FB-HA-84-044] p 449 N85-21411

**VENTILATION FANS**

Theoretical and experimental research to determine load limits for highly loaded axial flow fans — German thesis p 81 A85-15872

The effect of the fan characteristic on the dynamics of a stand supported by excess pressure — for air cushion devices p 315 A85-23996

**VENTING**

Opacity control technique for jet engine test cells [AD-D011668] p 774 N85-29968

**VENTS**

Numerical simulations of the effect of floor and ceiling venting on fire and smoke spread in aircraft cabins [PB85-178333] p 747 N85-29939

**VERTICAL AIR CURRENTS**

Aerodynamic characteristics of an airfoil in a nonuniform wind profile p 143 A85-18506

Aircraft performance in a JAWS microburst p 453 A85-28776

Instationary dolphin flight - The optimal energy exchange between a sailplane and vertical currents in the atmosphere p 646 A85-37488

Numerical solution of the minimum-time flight of a glider through a thermal by use of multiple shooting methods p 638 A85-37489

Aircraft performance in a JAWS microburst p 701 A85-39213

Model of the wind field in a downburst p 701 A85-39218

Electra vertical air motions in summer MONEX - Using the aircraft as an air motion sensor and notification of a data labeling error p 800 A85-42173

Optimal flight paths through microburst wind profiles [AIAA PAPER 85-1833] p 839 A85-43872

Analysis of aircraft control strategies for microburst encounter — low altitude wind shear p 846 A85-46327

Determination of vertical air velocity using measurements of the aircraft motion p 914 N85-35545

Measurements for the determination of the vertical structure of the convective boundary layer — atmospheric boundary layer p 915 N85-35550

**VERTICAL DISTRIBUTION**

Partitioning of the vertical turbulent energy transport into positive and negative contributions — meteorology p 915 N85-35551

Aircraft measurements during the Bonn Experiment (BONEX 1) — meteorology p 915 N85-35552

**VERTICAL FLIGHT**

Optimal symmetric flight with an intermediate vehicle model p 497 A85-32780

Improved feedback algorithms for optimal maneuvers in vertical plane [AIAA PAPER 85-1976] p 845 A85-45956

**VERTICAL LANDING**

Joint services vertical lift development (JVX) program - Looking to the future p 71 A85-15592

Evaluation of a real-time predictive guidance law for landing VTOL aircraft at sea [AIAA PAPER 84-2873] p 151 A85-17856

Loading characteristics of VTOL aircraft and their effect on the remaining life of the aircraft p 250 A85-20469

Visualization studies of jet impingement flows at McDonnell Douglas Research Laboratories p 867 A85-47144

Why vertical landing — aircraft [BAE-KRS-N-GEN-301] p 343 N85-18048

**VERTICAL ORIENTATION**

Lateral fluid forces acting on a whirling centrifugal impeller in vaneless and vaned diffuser p 187 N85-14123

**VERTICAL TAKEOFF**

Development and qualification testing of S-76 helicopter takeoff and landing procedures for reduced field length p 414 A85-28643

Visualization studies of jet impingement flows at McDonnell Douglas Research Laboratories p 867 A85-47144

**VERTICAL TAKEOFF AIRCRAFT**

A novel experimental facility for conducting jet impingement studies related to VTOL aircraft [AIAA PAPER 85-0052] p 209 A85-19484

Structural components, design of tilt-rotor JVX near completion p 249 A85-20059

Loading characteristics of VTOL aircraft and their effect on the remaining life of the aircraft p 250 A85-20469

Comparison of noise prediction for the X-wing system and a conventional rotor in hover p 493 A85-31953

An assessment of the impact of technology on VTOL weight prediction p 495 A85-31974

JVX design update p 496 A85-31999

TF34 convertible engine control system design p 506 A85-32006

A nonlinear pilot model for hover p 513 A85-32783

Sensitivity reduction and robust tracking with application to aircraft control p 513 A85-33283

V-22 Osprey development contract tests new procurement policy p 541 A85-36421

Estimation of hot gas reingestion for a VTOL aircraft at the conceptual design stage [SAE PAPER 841555] p 663 A85-39207

The integration of a new concept in VTOL aircraft propulsion [AIAA PAPER 85-1448] p 651 A85-39785

Argus - Standoff-reconnaissance with unmanned rotor platform [DGLR PAPER 84-126] p 754 A85-40339

Extension of CFD technology used to design the JVX inlet
[AIAA PAPER 85-1215] p 720 A85-40822
The V-22 Osprey p 755 A85-41066
Snatching Harrier from the air with Skyhook p 781 A85-42890
Supersonic jump jets p 825 A85-43941
Reduced conservatism in time domain stability robustness bounds by state transformation - Application to aircraft control
[AIAA PAPER 85-1926] p 859 A85-45927
Multivariable control of VTOL aircraft for shipboard landing
[AIAA PAPER 85-1928] p 844 A85-45928
Optimization of ski-jump take-off performance
[AIAA PAPER 85-1962] p 827 A85-45946
JVX design to cost methodology — Joint Services Advanced Vertical Lift Aircraft Program
[SAWE PAPER 1591] p 863 A85-49912
An engine trade study for a supersonic STOVL fighter-attack aircraft, volume 1
[NASA-CR-166304] p 2 N85-10910
Simulation evaluation of two VTOL control/display systems in IMC approach and shipboard landing
[NASA-TM-85996] p 173 N85-14841
Circulation control: A bibliography of DTNSRDC research and selected outside references: Update
[AD-A146966] p 201 N85-15661
International aviation (selected articles)
[AD-A148704] p 204 N85-16762
Pseudospectral calculations of two-dimensional transonic flow (Task 1). Numerical investigation of VTOL aerodynamics (Task 2)
[AD-A150123] p 309 N85-21126
Analysis of control system from a viewpoint of desired pole placement and desired degree of robustness
[AD-A152627] p 675 N85-27876

**VERY LARGE SCALE INTEGRATION**
Gate array, standard cell, and fully custom - Building blocks for the digital avionics designer
[AIAA PAPER 84-2711] p 184 A85-17880
VLSI chip set for high-performance avionic computers
[AIAA PAPER 84-2730] p 184 A85-17887
Development of consensus modular avionics standards p 833 A85-45003

**VERY LOW FREQUENCIES**
Anomalous interference in Omega VLF wave propagation on east-to-west equatorial paths p 14 A85-11024
A feasibility study of a VLF radio compass for Arctic navigation p 94 A85-14833

**VHF OMNIRANGE NAVIGATION**
Some concepts for improving non-precision approach guidance through use of on-board data bases p 95 A85-14837
Automated VOR ground check techniques p 485 A85-31273
Effect of counterpoise on VOR antenna radiation patterns p 566 A85-33999
A balloon tracking system that uses the VHF omidirectional range (VOR) network p 643 A85-38313
Use of microprocessor techniques and new antenna systems to improve the navigation aids very high frequency omnidirectional radar (VOR), Doppler VOR and Instrument Landing System (ILS)
[BMFT-FB-W-84-026] p 16 N85-10930
Evaluation of radio navigation systems and their configuration with respect to minimum cost
[ESA-TT-847] p 751 N85-31043

**VHSIC (CIRCUITS)**
Life cycle cost model for very high speed integrated circuits
[AD-A147798] p 297 N85-17298

**VIBRATION**
Helicopter rotor blade design for minimum vibration
[NASA-CR-3825] p 19 N85-10032
Rotordynamic analysis of the SSME turbopumps using reduced models
[NASA-CR-171170] p 53 N85-10355
Subsynchronous vibrations in a high pressure centrifugal compressor: A case history p 186 N85-14118
Experiences with nonsynchronous forced vibration in centrifugal compressors p 187 N85-14119
Internal hysteresis experienced on a high pressure syn gas compressor p 187 N85-14122
Propulsive efficiency of vibrating wing in supersonic flow p 146 N85-14656
F-8 refueling boom ground vibration test
[NASA-TM-84914] p 255 N85-15713
Analysis of the surface load and radiated sound of a vibrating airfoil with application to the experiment of Brooks
[NASA-CR-3884] p 305 N85-16590
Integrated Technology Rotor/Flight Research Rotor (ITR/FRR) concept definition study
[NASA-CR-166444] p 345 N85-18981
Acta Aeronautica et Astronautic Sinica (selected articles)
[AD-A148830] p 384 N85-19922
Normal mode calculations for fuselage type intricate structures by regarding them as systems with superposed constraints p 500 N85-22817
Condition monitoring of helicopter gearboxes using automatic vibration analysis techniques p 510 N85-23790
Transmission error measurements in gearbox development p 529 N85-23794
Oscillations of gas turbine installation rotors under operating conditions p 530 N85-24077
Recent developments in the dynamics of advanced rotor systems
[NASA-TM-86669] p 531 N85-24320
Turbine blade-tip clearance excitation forces
[NASA-CR-171534] p 773 N85-29963
A phase-locked frequency multiplier for the signal averaging of the vibration of the Wessex helicopter input spiral bevel pinion
[AD-A154814] p 829 N85-32113
Proposal for modifications to the Wessex helicopter main rotor gearbox vibration monitoring program
[AD-A155196] p 830 N85-32117
Development of a temperature-compensated hot-film anemometer system for boundary-layer transition detection on high-performance aircraft
[NASA-TM-86732] p 835 N85-33121
Laboratory vibration schedules
[AD-A155856] p 887 N85-35186

**VIBRATION DAMPING**
Optimal frequency response shaping by appendant structures — for helicopter model p 46 A85-10403
The prediction of buffeting response in flight from wind-tunnel measurements on models of conventional construction p 18 A85-11475
Resonance vibrations of skeleton models of turbine blades with a composite fir-tree root p 26 A85-11621
Root locus method and automatic identification of modes in flutter analyses p 35 A85-12356
Higher harmonic control for rotary wing aircraft
[AIAA PAPER 84-2484] p 100 A85-13559
Damping of composite materials p 119 A85-15579
A digital simulation study of 2-dimensional flutter active suppression system p 172 A85-18280
Determination of subcritical damping in CF-5 flight flutter tests p 158 A85-18520
Active control of helicopter vibrations through multicyclic controls p 356 A85-26018
Computer-aided frequency domain synthesis of a robust active flutter suppression control law
[AIAA PAPER 85-0754] p 511 A85-30373
Development and evaluation of a generic active helicopter vibration controller p 496 A85-32004
Active vibration suppression of a cantilever wing p 497 A85-32344
Design of a flutter suppression system for an experimental drone aircraft p 497 A85-32584
Active flutter suppression using eigenspace and linear quadratic design techniques p 512 A85-32779
The status of flutter suppression technology using active controls p 775 A85-40995
Rotor system design - An adventure in compromise p 756 A85-41069
Analyses of cascade flutter as a multi-eigenvalue problem (on cascade composed of two groups of blades having different natural frequencies) p 769 A85-41836
Subcritical damping ratios of a two-dimensional airfoil in transonic flow p 817 A85-45849
A second order adaptive controller for wing flutter control
[AIAA PAPER 85-1965] p 828 A85-45949
Basic study of bladed disk structural response
[AD-A146228] p 112 N85-12061
Turbine blade damping study, introduction p 113 N85-12891
F-8 refueling boom ground vibration test
[NASA-TM-84914] p 255 N85-15713
Study to eliminate ground resonance using active controls
[NASA-CR-166609] p 255 N85-15715
A study of internal and distributed damping for vibrating turbomachiner blades
[NASA-CR-175801] p 671 N85-27868
Stressed-strained state of tightening buckles in sectional runners of gas turbines p 672 N85-28149
Fixed gain and adaptive techniques for rotorcraft vibration control
[NASA-CR-177344] p 819 N85-33111
Flutter clearance of the Schweizer 1-36 deep-stall sailplane
[NASA-TM-85917] p 830 N85-33118

**VIBRATION EFFECTS**
The effect of vibration on film cooling over a gas turbine blade p 168 A85-16576
Load sharing in a planetary gear stage in the presence of gear errors and misalignment
[ASME PAPER 84-DET-54] p 580 A85-33768
Singular asymptotic expansions in nonlinear rotordynamics
[NASA-CR-174012] p 39 N85-10100
Propeller propulsion system integration: State of technology survey
[NASA-CR-3882] p 396 N85-21119
Singular asymptotic expansions in nonlinear rotordynamics p 451 N85-22218
Vibrations of rotors connected through couplings with backlash p 672 N85-28147
Stressed-strained state of tightening buckles in sectional runners of gas turbines p 672 N85-28149

**VIBRATION ISOLATORS**
Helicopter airframe variable tune vibration absorber
[AIAA PAPER 84-2531] p 101 A85-13590
Stability of squeeze film damped multi-mass flexible rotor bearing systems
[ASME PAPER 84-TRIB-45] p 289 A85-21296
Extended aeroelastic analysis for helicopter rotors with prescribed hub motion and blade appended pendulum vibration absorbers
[NASA-CR-172455] p 85 N85-12038
Vibration isolated cold plate assembly
[AD-D011444] p 373 N85-19388
Helicopter rotor
[CH-637890-A5] p 574 N85-25245
Aircraft rotor blade with passive tuned tab
[NASA-CASE-ARC-11444-1] p 759 N85-29947

**VIBRATION MEASUREMENT**
Experimental methods for the analysis of dynamic phenomena found in helicopters p 155 A85-16199
Development of a noninterference technique for measuring turbine engine rotor blade stresses
[AIAA PAPER 85-1472] p 697 A85-39797
Noncontact engine blade vibration measurements and analysis
[AIAA PAPER 85-1473] p 670 A85-39796
Noncontact measurement of rotating blade vibrations p 770 A85-41853
Blade vibration on radial impellers excited by rotating stall-cells and during surge p 771 A85-41854
Monitoring and diagnosing the technical condition of gas-turbine engines from vibration parameters — Russian book p 771 A85-42275

**VIBRATION MODE**
Experimental methods for the analysis of dynamic phenomena found in helicopters p 155 A85-16199
Modes of shock-wave oscillations on spike-tipped bodies p 232 A85-21855
The evolution of flutter excitation at McDonnell Aircraft p 414 A85-28648
Natural mode analysis of N blades disc coupled system - Modal synthesis of symmetric structure with Cnv group p 445 A85-29147
Multimode instability prediction method
[AIAA PAPER 85-0737] p 523 A85-30370
Contribution to the linear dynamic analysis of slender bodies in low and medium frequency ranges
[ONERA, TP NO. 1985-95] p 525 A85-32345
Experimental determination of the effect of nonlinear stiffness on the vibration of elastic structures p 692 A85-37177
Analysis of asymmetric natural vibrations of an aeroplane with moving deformable control surfaces p 883 A85-49672
Analysis of natural vibrations of a deformable aeroplane with fixed control systems p 883 A85-49673
Helicopter rotor blade design for minimum vibration
[NASA-CR-3825] p 19 N85-10032
The use of an optical data acquisition system for bladed disk vibration analysis
[NASA-TM-86891] p 190 N85-1518
Unsteady transonic pressure measurements on a semi-span wind-tunnel model of a transport-type supercritical wing (Lann model). Part 2: Pressure distributions (plotted) and plots of the vibration mode
[AD-A130488] p 449 N85-2157

**VIBRATION TESTS**
Dynamic characteristics of an unloading device — fo flight vehicle vibration tests p 155 A85-1708
Determination of subcritical damping in CF-5 flight flutter tests p 158 A85-1852
The development of a finite element model of an aircraf vertical stabilizer for vibration analysis p 290 A85-2108
A review of complete weapon vibration testing techniques p 426 A85-2655
A test system for determining the strength of structura elements exposed to a high-temperature gas stream and vibrational loads p 426 A85-2776

The evolution of flutter excitation at McDonnell Aircraft
p 414 A85-28648

Exploratory flutter test in a cryogenic wind tunnel
[AIAA PAPER 85-0736] p 515 A85-30389

Evaluation of interior noise control treatments for advanced turboprop aircraft p 573 A85-35588

Efficiencies of multiple-input techniques for aircraft ground vibration testing
[SAE PAPER 841575] p 682 A85-39274

F-8 refueling boom ground vibration test
[NASA-TM-84914] p 255 N85-15713

Investigation of gas-turbine engine blower impeller vibrations with change in engine intake conditions
p 530 N85-24170

Vibrations of rotors connected through couplings with backlash p 672 N85-28147

**VIBRATIONAL SPECTRA**

An explanation for the asymmetry of the modulation sidebands about the tooth meshing frequency in epicyclic gear vibration p 441 A85-27480

Investigation on experimental techniques to detect, locate and quantify gear noise in helicopter transmissions
[NASA-CR-3847] p 305 N85-17667

**VIBRATIONAL STRESS**

The dynamic stressed state of the cantilever turbocompressor blades of gas-turbine engines
p 421 A85-29886

Investigation of gas-turbine engine blower impeller vibrations with change in engine intake conditions
p 530 N85-24170

**VIDEO DATA**

Producing high scene content with perspective validity
[AD-P004314] p 358 N85-17968

Automated and interactive data base generation
[AD-P004316] p 374 N85-17970

Geographic subdivision and top level data structures, Columbus, Magellan, and expanding CIG (Computer Image Generation) horizons
[AD-P004317] p 374 N85-17971

CIG (Computer image generation) data bases in an instance: Bits and pieces
[AD-P004318] p 375 N85-17972

**VIDEO DISKS**

Low altitude high speed flight simulation using video disc technology
[AD-P004312] p 358 N85-17966

**VIDEO EQUIPMENT**

Recent advances in airborne video/data recording
p 347 A85-24263

**VIRUSES**

Molecular interactions of high energy fuels and jet fuels with oncogenic viruses and endogenous viruses
[AD-A145484] p 45 N85-11255

**VISCOELASTIC DAMPING**

Development of the aerospace structures technology damping design guide p 39 A85-12477

Free vibration characteristics of periodically stiffened panels with damped stringers p 182 A85-16763

The role of damping on supersonic panel flutter
p 907 A85-48557

**VISCOELASTICITY**

A theoretical study of stability of a rigid rotor under the influence of dilute viscoelastic lubricants
[ASME PAPER 84-TRIB-17] p 289 A85-21278

Skirt material effects on air cushion dynamic heave stability p 307 A85-21840

Hyperbolic phenomena in the flow of viscoelastic fluids
[AD-A153533] p 700 N85-29186

**VISCOPLASTICITY**

Life prediction at high temperature under multiaxial loading p 267 N85-15745

On thermomechanical testing in support of constitutive equation development for high temperature alloys
[NASA-CR-174879] p 605 N85-25894

**VISCOSITY**

Choking phenomena in multiflow nozzles with and without viscosity effects p 3 A85-10540

Influence of viscosity on the vortex sound
[AIAA PAPER 84-2339] p 62 A85-10880

Influence of viscosity on aerodynamic sound emission in free space p 132 A85-12880

Effects of turbulence and viscosity variation on the dynamic coefficients of fluid film journal bearings
[ASME PAPER 84-TRIB-8] p 289 A85-21283

Estimation of structural transformations in jet fuels from electrical conductivity and viscosity p 518 A85-31572

Aerodynamic sound generation caused by viscous processes p 705 A85-38432

Effects of viscosity and modes on transonic aerodynamic and aeroelastic characteristics of wings
p 817 A85-45837

Laminar flow heat exchangers. Viscosity induced non-uniform flow
[AD-A144777] p 53 N85-10307

External fuel vaporization study, phase 2
[NASA-CR-174079] p 45 N85-11252

New discovery in supersonic flight research
p 314 N85-18041

Trends of petroleum fuels
[DE85-000116] p 522 N85-24023

Aerodynamic performance of a wing in ground effect using the PANAIR program
[AD-A153303] p 635 N85-27832

Floating shock-fitting in transonic potential flow calculations p 742 N85-31007

Measurement and correlation of jet fuel viscosities at low temperatures
[NASA-CR-174911] p 901 N85-34295

**VISCOUS DAMPING**

Effects of friction dampers on aerodynamically unstable rotor stages p 265 A85-21866

**VISCOUS DRAG**

NASA research on viscous drag reduction II
p 48 A85-11624

Aircraft drag reduction technology
p 257 N85-16782

**VISCOUS FLOW**

Effects of slip and chemical reaction models on three-dimensional nonequilibrium viscous shock-layer flows p 80 A85-15506

A theory for a three-dimensional hypersonic viscous shock layer in the vicinity of a plane of symmetry
p 141 A85-16217

Exact solutions of singular equations for viscous transonic flows p 142 A85-16939

Viscous/inviscid analysis of curved sub- or supersonic wall jets p 145 A85-18677

Numerical solutions of viscous transonic flow in turbomachinery cascades
[AIAA PAPER 85-0007] p 206 A85-19454

Numerical solution of unsteady viscous flow past rotor sections
[AIAA PAPER 85-0129] p 212 A85-19540

Calculation of viscous nozzle flows by the unsteady method of characteristics
[AIAA PAPER 85-0131] p 212 A85-19542

Numerical computation of viscous flowfields about multiple component airfoils
[AIAA PAPER 85-0167] p 213 A85-19563

Computation of unsteady shock-induced vortex separation
[AIAA PAPER 85-0183] p 214 A85-19573

Recent advances in computational transonic aerodynamics
[AIAA PAPER 85-0366] p 221 A85-19699

Viscous/inviscid interaction analysis of transonic shock induced separated flow including normal pressure gradients
[AIAA PAPER 85-0371] p 221 A85-19703

Efficient self-consistent viscous-inviscid solutions for unsteady transonic flow
[AIAA PAPER 85-0482] p 225 A85-19779

Hypersonic chemically nonequilibrium viscous shock layer on wings with a catalytic surface
p 229 A85-20561

Optimal control of flow of a viscous incompressible fluid p 290 A85-22105

Analytical modeling of circuit aerodynamics in the new NASA Lewis Altitude Wind Tunnel
[AIAA PAPER 85-0380] p 323 A85-26389

A full Navier-Stokes solution of viscous gas flow through profile cascade on S1 stream surface of revolution employing nonorthogonal curvilinear coordinate system
p 385 A85-26699

Numerical calculation of a laminar two dimensional straight cascade flow p 386 A85-27348

A viscous-inviscid interaction method for computing unsteady transonic separation
[ONERA, TP NO. 1985-5] p 387 A85-27885

Viscid/inviscid interaction analysis of separated trailing-edge flows p 390 A85-29076

Review - Computational methods for internal flows with emphasis on turbomachinery p 392 A85-29126

Computation of three-dimensional viscous flows using a space-marching method p 392 A85-29259

Three-dimensional nonequilibrium viscous flow over the Shuttle Orbiter with catalytic surface effects
p 392 A85-29301

Viscous effects on transonic airfoil stability and response
[AIAA PAPER 85-0586] p 469 A85-30321

Viscous shock-layer flowfield analysis by an explicit-implicit method p 474 A85-32612

A note on blade wake interaction influence on compressor stator row aerodynamic performance
p 475 A85-32965

Numerical optimization method for airfoil design
p 475 A85-33014

Numerical calculation of separation flow over severely indented blunt body p 551 A85-35777

A numerical study of the separation flow by Navier-Stokes equation past a circular cylinder and sphere p 551 A85-35782

Viscous influence in axisymmetric laminar supersonic flow over blunt bodies p 552 A85-36339

Large CYBER 205 model of the Euler equations for vortex-stretched turbulent flow around delta wings
p 553 A85-36675

A numerical investigation of a viscous hypersonic air flow around elongated blunted bodies at large angles of attack p 619 A85-37333

European transonic wind tunnel p 681 A85-37491

Numerical simulation of hypersonic viscous fore- and afterbody flows over capsule-type vehicles at angles of attack
[AIAA PAPER 85-0924] p 620 A85-37593

Computational methods for hypersonic viscous flow over finite ellipsoid-cones at incidence
[AIAA PAPER 85-0925] p 620 A85-37594

Numerical solution of two- and three-dimensional rotor tip leakage models p 626 A85-38989

Calculation of three-dimensional, viscous flow through turbomachinery blade passages by parabolic marching
[AIAA PAPER 85-1408] p 632 A85-39767

Numerical investigation of internal high-speed viscous flows using a parabolic technique
[AIAA PAPER 85-1409] p 632 A85-39768

Numerical calculation of subsonic jets in crossflow with reduced numerical diffusion
[AIAA PAPER 85-1441] p 697 A85-39780

Computation of three-dimensional transonic viscous flowfields using unsteady parabolized Navier-Stokes equations
[AIAA PAPER 85-1595] p 713 A85-40711

Boundary layer effects on the flowfield about flow-through nacelles
[AIAA PAPER 85-1623] p 714 A85-40729

Unsteady viscous flow round moving circular cylinders and airfoils
[AIAA PAPER 85-1490] p 720 A85-40930

Computation of three-dimensional viscous transonic flows with the LU factored scheme
[AIAA PAPER 85-1510] p 721 A85-40945

Finite element methods for high speed flows
[AIAA PAPER 85-1533] p 791 A85-40963

Recent tendency of flow field calculations with three-dimensional separation around high velocity vehicle p 723 A85-40992

A numerical method for duct flow with boundary layer separation
[AIAA PAPER 85-1410] p 726 A85-41422

Developments in the simulation of separated flows using finite difference methods p 732 A85-42953

Application of a viscous-inviscid interaction method to predict transonic separated flows p 732 A85-42957

Newton solution of coupled Euler and boundary layer equations p 733 A85-42958

Airfoils with separation and the resulting wakes
p 733 A85-42959

Vorticity dynamics - A viscous point of view over aerodynamics p 733 A85-42961

Viscous-inviscid interaction computations using a pseudo Navier-Stokes approach p 733 A85-42964

Numerical solution of unsteady two-dimensional viscous flow around bodies p 734 A85-42970

A three-dimensional boundary-layer analysis including heat-transfer and blade-rotation effects
p 737 A85-42988

Inviscid and viscous flows in cascades with an explicit multiple-grid algorithm p 869 A85-48539

Numerical simulations of viscous fluid flows in air intakes at high angles of attack
[AAAF PAPER NT 84-12] p 907 A85-48992

Prediction of aerodynamic characteristics of fighter wings at high angles of attack
[AD-A145107] p 10 N85-10017

Review of requirements and status of simulation and scaling of transonic, viscous flows
[AD-A146357] p 189 N85-15137

Analytical modeling of circuit aerodynamics in the new NASA Lewis wind tunnel
[NASA-TM-86912] p 234 N85-15688

Recent advances in computational methods to solve the high-lift multi-component airfoil problem
p 236 N85-16774

Aerodynamic issues in the design of high-lift systems for transport aircraft p 256 N85-16780

Theoretical study of non-linear unsteady aerodynamics of a non-rigid lifting body
[AD-P004169] p 325 N85-17954

Numerical approach for the aerodynamic analysis of airfoils with laminar separation
[NASA-CR-172496] p 326 N85-18001

Viscous effects on transonic airfoil stability and response
[NASA-TM-86374] p 329 N85-18961

**VISCOUS FLUIDS**

A multistage time-stepping scheme for the Navier-Stokes equations
[NASA-CR-172527] p 373 N85-19365

The generation of three-dimensional body-fitted coordinate systems for viscous flow problems
[AD-A150861] p 536 N85-24848

Numerical calculation of subsonic jets in crossflow with reduced numerical diffusion
[NASA-TM-87003] p 581 N85-25263

Investigation of potential and viscous flow effects contributing to dynamic stall
[AD-A151696] p 602 N85-25773

Computational aerodynamics in designing aircraft p 576 N85-26622

Recent progress in computational aerodynamics p 558 N85-26626

The role of computational fluid dynamics in aeronautical engineering p 605 N85-26629

Proceedings of the 9th US Air Force and the Federal Republic of Germany Data Exchange Agreement Meeting. Viscous and Interacting Flow Field Effects
[AD-A153020] p 699 N85-28266

A new finite element approach: Progress in inviscid flow computations
[NASA-TM-86434] p 798 N85-31450

A three-dimensional viscous flow analysis for the helicopter tip vortex generation problem
[NASA-CR-3906] p 874 N85-34114

**VISCOUS FLUIDS**

Unsteady forces on a body immersed in viscous fluids. I - For a uniformly accelerated elliptic cylinder p 47 A85-10971

Measurements of despin and yawing moments produced by a viscous liquid p 423 A85-26447

Cavitation models of separated flow of a low-viscosity fluid past wing profiles p 390 A85-29004

Average force acting on a small sphere in a traveling-wave field in a viscous fluid p 805 A85-41646

Analysis of the surface load and radiated sound of a vibrating airfoil with application to the experiment of Brooks
[NASA-CR-3864] p 305 N85-16590

**VISIBILITY**

Automated visibility measurements for airports
[AIAA PAPER 85-0191] p 274 A85-19577

Shipboard measurement of cloud bases and average surface visibility with an eye-safe lidar
[AD-A144889] p 53 N85-10345

Evaluation of nose, roof, and mast mounted sensor platforms for piloting and sighting, integrated in future combat helicopters p 260 N85-16808

The visibility climatology of McMurdo Sound-Williams Field, Antarctica
[AD-A148108] p 300 N85-17492

The measurement of aircraft windscreen haze and its effect on visual performance
[AD-A154949] p 629 N85-32114

**VISION**

The development and evaluation of color display systems for airborne applications. Phase 1: Fundamental visual, perceptual, and display system considerations
[FAA/PM-85-19] p 857 N85-33700

**VISUAL AIDS**

Among the weeds at night - Transition to night NOE flying p 783 A85-41532

**VISUAL CONTROL**

Guidelines for the evaluation of visual approach slope indicators
[ARL/SYS-FI-32] p 880 N85-34132

**VISUAL FIELDS**

Investigation of outside visual cues required for low speed and hover
[AIAA PAPER 85-1806] p 857 A85-43857

**VISUAL FLIGHT**

Looking around at visuals — for flight simulation p 123 A85-13898

Automated visibility measurements for airports
[AIAA PAPER 85-0191] p 274 A85-19577

Glideslope descent-rate cuing to aid carrier landings p 409 A85-29124

A modern air combat dome visual system
[AIAA PAPER 85-1747] p 780 A85-42665

**VISUAL FLIGHT RULES**

National airspace review: Airport radar service area operational confirmation report
[DOT/FAA/AT-84/2] p 245 N85-15707

Analysis of estimation algorithms for CDTI and CAS applications
[NASA-CR-172444] p 505 N85-22387

**VISUAL OBSERVATION**

Effects of an S-inlet on the flow in a dump combustor p 392 A85-29323

Observation of birds in the flight path of aircraft - An important stage in the prevention of bird strikes p 639 A85-37544

**VISUAL PERCEPTION**

Visual simulation takes flight — Computer-generated imagery for improving realism of aircraft landing p 116 A85-15581

The Malcolm horizon: History and future p 23 N85-10046

Peripheral vision displays: The future p 24 N85-10058

The IMAGE 3 Conference Proceedings
[AD-A148636] p 313 N85-17962

Altitude control using action-demanding interactive displays: Toward an active psychophysics
[AD-P004311] p 356 N85-17965

Considerations in an optical variable acuity display system
[AD-P004323] p 377 N85-17977

Progress report on an eye-slaved area-of-interest visual display
[AD-P004326] p 359 N85-17980

Baffled eye and confounded brain or using visual illusions to train blind pilots
[AD-P004332] p 359 N85-17986

Global optical metrics for self-motion perception
[AD-P004333] p 377 N85-17987

AVTS (Advanced Visual Technology System): A high fidelity visual simulator
[AD-P004338] p 359 N85-17992

Visual simulation requirements for aircraft aspect recognition at real world distances
[AD-A151040] p 517 N85-23810

The measurement of aircraft windscreen haze and its effect on visual performance
[AD-A154949] p 629 N85-32114

**VISUAL STIMULI**

An in-flight investigation of a twin fuselage configuration in approach and landing
[NASA-CR-172366] p 173 N85-13801

Visual simulation requirements for aircraft aspect recognition at real world distances
[AD-A151040] p 517 N85-23810

**VISUAL TASKS**

Simulators - How real does the visual system need to be? p 898 A85-49948

**VOCODERS**

Literature review of voice recognition and generation technology for Army helicopter applications
[AD-A146878] p 293 N85-15954

Survey of narrow band vocoder technology
[AD-A151919] p 606 N85-27114

**VOICE COMMUNICATION**

Operational air traffic control requirements for the new Voice Switching and Control System
[AIAA PAPER 84-2435] p 92 A85-13530

Implications of Joint Tactical Information Distribution System/Tactical Digital Information Link J on Navy aircraft weapons systems
[AIAA PAPER 84-2719] p 152 A85-17883

Feasibility of a UHF/TDM communications link for the worldwide airborne command post (WWABNCP) system p 823 A85-45133

New AWOS provides synthesized-voice weather information p 907 A85-48853

Literature review of voice recognition and generation technology for Army helicopter applications
[AD-A146878] p 293 N85-15954

A voice-actuated wind tunnel model leak checking system
[NASA-TM-86359] p 313 N85-17936

EHF air-to-air communications p 373 N85-19273

**VOICE CONTROL**

Speech recognition making progress - Direct voice input is a promising infant p 244 A85-19183

Voice command weapons launching system
[AD-D011378] p 293 N85-15940

Study to determine potential flight applications and human factors design guidelines for voice recognition and synthesis systems
[NASA-CR-172590] p 797 N85-31349

**VOIDS**

Development of a quantitative flaw characterization module - A status report p 905 A85-47402

**VOLUMETRIC EFFICIENCY**

Analytical method for determining the volumetric efficiency and power losses resulting from resistance in the inlet and exhaust systems of a piston engine p 167 A85-16231

**VORTEX ALLEVIATION**

On the wake hazard alleviation associated with roll oscillations of wake-generating aircraft
[AIAA PAPER 85-1774] p 812 A85-43835

Wake effects on the aerodynamic performance of horizontal axis wind turbines
[NASA-CR-174920] p 702 N85-29364

**VORTEX BREAKDOWN**

A note on the instability of columnar vortices p 46 A85-10360

Flow visualization of high angle of attack vortex wake structures
[AIAA PAPER 85-0102] p 286 A85-19520

A theory for the core of a three-dimensional leading-edge vortex
[AIAA PAPER 85-0108] p 210 A85-19524

Airfoil large-eddy breakup devices for turbulent drag reduction
[AIAA PAPER 85-0520] p 320 A85-25926

The effect of a small blowing on vortex-breakdown of a swirling flow p 393 A85-29964

LDA measurements for leading edge vortex core of a strake-wing p 550 A85-35774

The study on the wing leading edge vortex breakdown p 551 A85-35791

Vortex trajectories and breakdown on wing-canard configurations p 731 A85-42926

Some developments in vortex motion research p 738 A85-43239

The use of flow visualization for vortex trajectory mapping p 867 A85-47132

A calculating method of the breakdown feature of the leading-edge separating vortex for slender delta wings p 873 A85-49707

Turbulent drag reduction research p 237 N85-16788

Full scale experiments into the use of large eddy breakup devices for drag reduction on aircraft p 257 N85-16790

Experimental investigation of a breakdown criterion for a vortex in an incompressible flow — delta wing
[ONERA-RT-27/1147-AY] p 395 N85-19935

La Recherche Aerospatiale Bimonthly Bulletin, Number 1984-4, 221/July-August
[ESA-TT-884] p 543 N85-26637

An introduction to vortex breakdown and vortex core bursting
[NAE-AN-28] p 635 N85-27829

**VORTEX FILAMENTS**

Two dimensional blade-vortex interaction flow visualization study
[AIAA PAPER 84-2307] p 4 A85-10858

A new look at sound generation by blade/vortex interaction
[ASME PAPER 84-WA/NCA-2] p 538 A85-32955

**VORTEX FLAPS**

An investigation of the tabbed vortex flap p 547 A85-35583

The lateral-directional characteristics of a 74-degree Delta wing employing gothic planform vortex flaps
[NASA-CR-3848] p 82 N85-12009

Calculation of vortex-flap aerodynamic characteristics
[NASA-CR-175624] p 476 N85-22367

Investigation of the Vortex Tab
[NASA-CR-172586] p 557 N85-25209

**VORTEX GENERATORS**

Unsteady loading of leading-edges in unstable flows - An overview
[AIAA PAPER 84-2306] p 4 A85-10857

Afterbody drag reduction by vortex generators
[AIAA PAPER 85-0354] p 220 A85-19692

Identification of vortex-induced clear air turbulence using airline flight records p 299 A85-21843

Flow control in a diffusing S-Duct
[AIAA PAPER 85-0524] p 321 A85-25928

Experimental study on air jet vortex generator p 738 A85-43234

An experimental investigation of the parallel blade-vortex interaction
[NASA-TM-86005] p 146 N85-13777

Wingtip vortex propeller
[NASA-CASE-LAR-13019-1] p 892 N85-35194

Vortex boundary-layer interactions
[NASA-CR-176192] p 911 N85-35373

**VORTEX RINGS**

A ring-vortex downburst model for real-time flight simulation of severe wind shears
[AIAA PAPER 85-1749] p 799 A85-40581

**VORTEX SHEDDING**

Computation of vortex flow around a canard/delta combination p 6 A85-11980

Organized structures in wakes and jets - An aerodynamic resonance phenomenon p 77 A85-14344

An analysis of the flow past an S-shaped rotor by discrete vortex model p 206 A85-19405

Vortices in wakes induced by shock waves p 319 A85-25474

Karman vortex shedding - Friend or foe of the structur dynamicist? — application to Space Shuttle cable tra flutter
[AIAA PAPER 85-0661] p 470 A85-30349

Local instability characteristics and frequency determination of self-excited wake flows p 623 A85-38430

Dynamic ground effects on a two-dimensional fla plate p 628 A85-3922

Unsteady characteristics of an airfoil interacting with a vortical wake
[AIAA PAPER 85-1707] p 718 A85-40760
An experimental investigation of the generation and consequences of acoustic waves in an axial flow compressor Large axial spacings between blade rows
p 805 A85-42044
Aerodynamic effects of asymmetric vortex shedding from slender bodies
[AIAA PAPER 85-1797] p 813 A85-43850
Computational technique for compressible vortex flows past wings at large incidence p 816 A85-45836
An experimental study of airfoil-spoiler aerodynamics
[NASA-CR-177328] p 147 N85-14796
Wing rock flow phenomena
[AD-P004154] p 323 N85-17939
Unsteady aerodynamic loading of an airfoil due to vortices released intermittently from its upper surface
[AD-P004162] p 324 N85-17947
A Navier-Stokes calculation of the airfoil dynamic stall process
[AD-P004163] p 324 N85-17948

**VORTEX SHEETS**
Resonance in flows with vortex sheets and edges
p 3 A85-10357
Roll up of strake leading/trailing-edge vortex sheets for double-delta wings p 144 A85-18519
A generalized discrete-vortex method for sharp-edged cylinders p 546 A85-35132
The position of laminar separation lines on smooth inclined bodies p 546 A85-35148
Stability of the thin-jet model of the unsteady jet flap
p 626 A85-38997
Vortex panel calculation of wake rollup behind a large aspect ratio wing
[AIAA PAPER 85-1561] p 710 A85-40686
Computation of inviscid incompressible flow with rotation p 871 A85-49356
Physics on aircraft wakes
[NASA-CR-174105] p 87 N85-12871
Unsteady flows around 3-dimensional wings
[AD-A149993] p 399 N85-21124
A study of aerodynamic control in stalled flight leading-edge vortex formation analysis
[AD-A153758] p 638 N85-28928
A method for computing the core flow in three-dimensional leading-edge vortices
[NASA-TM-87489] p 741 N85-29932
Vortex sheet modeling with higher order curved panels
p 797 N85-31428

**VORTEX STREETS**
Vortex path in the supersonic wake of a rough even plate — German thesis p 226 A85-19821

**VORTICES**
Aeroacoustic interaction of a distributed vortex with a lifting Joukowski airfoil
[AIAA PAPER 84-2287] p 59 A85-10843
Flow field and acoustics of two-dimensional transonic blade-vortex interactions
[AIAA PAPER 84-2309] p 61 A85-10860
Influence of viscosity on the vortex sound
[AIAA PAPER 84-2339] p 62 A85-10880
Wavelength selection and growth of Goertler vortices
p 73 A85-12703
Influence of viscosity on aerodynamic sound emission in free space p 132 A85-12880
Investigation of the axial velocities induced along rotating blades by trailing helical vortices p 75 A85-13678
Transformation of acoustic disturbances into coherent structures in the turbulent wake of an airfoil
p 75 A85-13794
Certain features characterizing the development of coherent flow structures in the initial region of three-dimensional turbulent jets p 76 A85-13795
Computational simulation of free vortex flows using an Euler code p 76 A85-13951
Reynolds-stress measurements in a turbulent trailing vortex p 77 A85-14244
A numerical analysis of unsteady separated flow by the discrete vortex method combined with the singularity method p 81 A85-15884
A vortex-lattice method for general, unsteady aerodynamics p 144 A85-18511
Emmons spot forcing for turbulent drag reduction
p 145 A85-18696
Heat transfer effects of longitudinal vortices embedded in a turbulent boundary layer
[ASME PAPER 84-HT-21] p 186 A85-18827
An experimental investigation of blade-vortex interaction at normal incidence
[AIAA PAPER 85-0003] p 206 A85-19451
The interaction and merging of two turbulent line vortices
[AIAA PAPER 85-0046] p 208 A85-19480
Vortex research facility improvements and preliminary density stratification effects on vortex wakes
[AIAA PAPER 85-0050] p 209 A85-19482
Interrelated effects of pitch rate and pivot point on airfoil dynamic stall
[AIAA PAPER 85-0130] p 212 A85-19541
Computation of unsteady shock-induced vortex separation
[AIAA PAPER 85-0183] p 214 A85-19573
Unsteady aerodynamics of an airfoil encountering a passing vortex
[AIAA PAPER 85-0203] p 214 A85-19587
Calculation of steady flow about propellers by means of a surface panel method
[AIAA PAPER 85-0283] p 218 A85-19634
The numerical simulation of steady transonic rotational flow using a dual potential formulation
[AIAA PAPER 85-0368] p 221 A85-19701
Shock induced vortices on elliptic cones in supersonic flow
[AIAA PAPER 85-0433] p 223 A85-19746
Free surface scars and striations due to trailing vortices generated by a submerged lifting surface
[AIAA PAPER 85-0445] p 286 A85-19754
Visualization of the spanwise vortex structure in the starting flow behind an airfoil
[AIAA PAPER 85-0447] p 224 A85-19756
Evaluation of vortex wake predictions in the SWINT code
[AIAA PAPER 85-0450] p 224 A85-19759
Experiments on the stability of crossflow vortices in swept-wing flows
[AIAA PAPER 85-0493] p 231 A85-20873
Harmonic oscillations of a rectangular wing with a circulation variable over the span p 231 A85-21656
Experimental results for Reynolds number effects on trailing vortices p 232 A85-21849
Calculation of three-dimensional unsteady incompressible flows by a vortex method
p 291 A85-22240
Approximate determination of the boundaries of an ideal gas jet issuing under conditions of pressure difference from a nozzle with the formation of a free vortex flow
p 315 A85-23982
Transformation of acoustic oscillations into the eddy ones in turbulent flows p 367 A85-24963
Vorticity growth and decay in the jet in cross flow
p 317 A85-25148
Effect of a longitudinal vortex on a separated turbulent boundary layer
[AIAA PAPER 85-0530] p 321 A85-25930
Modification of vortex interactions in a reattaching separated flow
[AIAA PAPER 85-0555] p 321 A85-25946
Unsteady surface pressure measurements on a pitching airfoil
[AIAA PAPER 85-0532] p 387 A85-27878
Stability experiments in the flow over a rotating disk
p 444 A85-29091
Euler solutions of transonic vortex flows around the Dillner wing p 392 A85-29261
Dynamics of forebody flow separation and associated vortices p 392 A85-29262
Turbulent vortices and bionics in turbojet
p 393 A85-29700
Vortex induced lift on a flat plate with a curved forward-facing flap p 394 A85-30175
Reynolds number dependence of vortex patterns in accelerated flow around airfoils p 470 A85-30525
Further experimental evidence of vortex splitting
p 470 A85-30673
Study of flow field in the near wake of delta wings
p 472 A85-31753
Simulation of initially forced mixing layers

Wing span loads of complex high-lift systems from wake measurements p 817 A85-45850
A flow visualization study of the effect of wing-tip jets on wake vortex development p 867 A85-47129

Vortex flow visualization studies of a strake-wing in water tunnel p 904 A85-47131

Quantification of downwash and ground vortex of a lifting rotor model by flow visualization technique
p 867 A85-47134

Visualization of the vortex flow over delta and double-delta wings p 867 A85-47149

Determination of leading-edge vortex trajectories by schlieren photography p 904 A85-47150

Supplements to 'Theory of secondary flow in cascades' p 869 A85-48874

The rolling vortex-damping of supersonic wing
p 872 A85-49705

On vortex bursting
[NASA-TM-77587] p 9 N85-10008

Results of tests of advanced flexible insulation vortex and flow environments in the North American Aerodynamics Laboratory lowspeed wind tunnel using 0.0405-scale Space Shuttle Orbiter model 16-0 (test OA-309)
[NASA-CR-167692] p 39 N85-10096

Force and moment measurements on a 74 deg delta wing with an apex flap
[NASA-CR-166081] p 12 N85-10918

VORCOR: A computer program for calculating characteristics of wings with edge vortex separation by using a vortex-filament and-core model
[NASA-CR-165902] p 13 N85-10921

Flow visualization study of a vortex-wing interaction
[NASA-TM-86656] p 86 N85-12040

Interaction between an airfoil and a streamwise vortex
[AD-A145823] p 86 N85-12041

Vortex-generating coolant-flow-passage design for increased film-cooling effectiveness and surface coverage
[NASA-TP-2388] p 127 N85-12314

The numerical simulation of steady transonic rotational flow using a dual potential formulation
p 146 N85-13770

An experimental investigation of the parallel blade-vortex interaction
[NASA-TM-86005] p 146 N85-13777

Aircraft accident report Air Canada, Lockheed L-1011, C-FTNJ, near Charleston, South Carolina, November 24, 1983
[PB84-910413] p 149 N85-13790

A collection of flow visualization techniques used in the Aerodynamic Research Branch
[NASA-TM-85998] p 189 N85-15135

An investigation of vortex-induced aerodynamic characteristics of supersonic cruise configurations
[NASA-CR-174299] p 234 N85-15880

Current problems in turbomachinery fluid dynamics
[AD-A147127] p 294 N85-16074

Full scale experiments into the use of large eddy breakup devices for drag reduction on aircraft
p 257 N85-16790

Helicopter model rotor-blade vortex interaction impulsive noise: Scalability and parametric variations
[NASA-TM-86007] p 238 N85-16826

Prediction of dynamic stall characteristics using advanced non-linear panel methods
[AD-A148453] p 239 N85-16836

Unsteady aerodynamic loading of an airfoil due to vortices released intermittently from its upper surface
[AD-P004162] p 324 N85-17947

Unsteady separated flow: Forced and common vorticity about oscillating airfoils
[AD-P004167] p 324 N85-17952

New discovery in supersonic flight research
p 314 N85-18041

A study for calculating rotor loads using free vortex concept p 395 N85-20194

Transonic interactions of unsteady vortical flows
[NASA-TM-86658] p 397 N85-21113

A calculation of slender delta wing with leading-edge separation by quasi-vortex-lattice method
p 400 N85-21423

Calculation of the flow around thick wings with separation vortices p 400 N85-21424

Study for prediction of rotor/wake/fuselage interference, part 1
[NASA-CR-177340-VOL-1] p 466 N85-22346

Study for prediction of rotor/wake/fuselage interference. Part 2: Program users guide
[NASA-CR-177340-VOL-2] p 467 N85-22347

Method for the prediction of the installation aerodynamics of a propfan at subsonic speeds
[NASA-CR-3887] p 476 N85-22369

Propagation of three-dimensional turbulent jet from lobar nozzle through surrounding stream p 527 N85-22785

An experimental investigation of the chopping of helicopter main rotor tip vortices by the tail rotor
[NASA-CR-177338] p 538 N85-23376

Computations of two-dimensional airfoil-vortex interactions — helicopter rotor flowfields
[NASA-CR-3885] p 479 N85-23709

Stability of vortex structures during separation flow past array of wings p 481 N85-24110

Prediction of vortex-induced loads on wind-tunnel turning vanes
[NASA-TM-86678] p 556 N85-25204

An exploratory study of apex fence flaps on a 74 deg delta wing
[NASA-CR-172463] p 557 N85-25208

Analysis of selected problems involving vortical flows
[NASA-CR-177347] p 557 N85-25212

On the structure of the turbulent vortex
p 557 N85-25213

Flow past a flat plat with a vortex/sink combination
[JIAA-TR-58] p 558 N85-25215

Exploratory wind-tunnel investigation of a wingtip-mounted vortex turbine for vortex energy recovery
[NASA-TP-2468] p 560 N85-26667

Development of a rotor wake-vortex model, volume 1
[NASA-CR-174849] p 560 N85-26668

Lee-side flow over delta wings at supersonic speeds
[NASA-TP-2430] p 739 N85-29921

A method for computing the core flow in three-dimensional leading-edge vortices
[NASA-TM-87489] p 741 N85-29932

Shock waves in adjacent engine inlets
[ISL-R-104/84] p 781 N85-31068

A three-dimensional viscous flow analysis for the helicopter tip vortex generation problem
[NASA-CR-3906] p 874 N85-34114

Comments on the prediction of dynamic stall
[GU-AERO-8501] p 875 N85-34125

**VORTICITY**

Comment on 'PAN AIR applications to aero-propulsion integration' p 6 A85-11990

Application of continuous vorticity panels to general unsteady two-dimensional lifting flows
[AIAA PAPER 85-0282] p 217 A85-19633

The effect of opposing unsteady vorticity on turbulent wall flow
[AIAA PAPER 85-0550] p 321 A85-25943

Vorticity dynamics - A viscous point of view over aerodynamics p 733 A85-42961

**VORTICITY EQUATIONS**

Using the discrete vortex method for calculating potential flow past a high-lift wing in the presence of a screen
p 471 A85-31456

Cl Beta of unswept flat wings in sideslip. II
p 623 A85-38371

A numerical calculation of propeller performance at static condition and its comparison with experiment
p 724 A85-41012

Hyperbolic phenomena in the flow of viscoelastic fluids
[AD-A153533] p 700 N85-29186

**VULNERABILITY**

Overview of weapon assessments in an electromagnetic environment p 406 A85-28678

A methodology for the determination of rotary wing aircraft vulnerabilities in air-to-air combat simulation
[AD-A148984] p 346 N85-18884

A note on blade wake interaction influence on compressor stator row aerodynamic performance
p 475 A85-32065

The stability of symmetrical vortices in the wake of elliptical cylinders in confined flow p 618 A85-37194

Local instability characteristics and frequency determination of self-excited wake flows
p 623 A85-38430

Simulation of wake passing in a stationary turbine rotor cascade p 629 A85-39589

Velocity characteristics of the wakes of in-cylinder projectiles
[AIAA PAPER 85-1676] p 716 A85-40784

Unsteady characteristics of an airfoil interacting with a vortical wake
[AIAA PAPER 85-1707] p 718 A85-40780

Inviscid modeling of turbomachinery wake transport
[AIAA PAPER 85-1132] p 719 A85-40812

Computational study of three-dimensional wake structure
[AIAA PAPER 85-1617] p 725 A85-41404

Prediction of dynamic separation characteristics using a time-stepping viscid/inviscid approach
p 737 A85-42990

Turbofan noise generation. Volume 2: Computer programs
[NASA-CR-167952] p 66 N85-11791

Preliminary results from the unsteady airfoil model USTAR2
[AD-P004171] p 325 N85-17956

A study for calculating rotor loads using free vortex concept p 395 N85-20194

Unsteady flows around 3-dimensional wings
[AD-A149993] p 399 N85-21124

Oscillating airfoils and their wake
[NASA-TM-77831] p 478 N85-23701

Prediction of vortex-induced loads on wind-tunnel turning vanes
[NASA-TM-86678] p 556 N85-25204

Analysis of selected problems involving vortical flows
[NASA-CR-177347] p 557 N85-25212

On the structure of the turbulent vortex
p 557 N85-25213

A study of aerodynamic control in stalled flight leading-edge vortex formation analysis
[AD-A153756] p 636 N85-28928

Wake effects on the aerodynamic performance of horizontal axis wind turbines
[NASA-CR-174920] p 702 N85-29364

**WALL FLOW**

Aerodynamics of premixed flames in flat plate boundary layers p 41 A85-10374

NASA research on viscous drag reduction II
p 48 A85-11624

On the generation of sound by turbulent boundary layer flow over a rough wall p 133 A85-13724

T2 wind tunnel adaptive walls - Design, construction and some typical results p 175 A85-18501

Structure of the wall pressure fluctuations in a shock-induced separated turbulent flow
[AIAA PAPER 85-0179] p 214 A85-19571

Transonic shock wave - Boundary layer interaction at a convex wall p 317 A85-24800

The effect of opposing unsteady vorticity on turbulent wall flow
[AIAA PAPER 85-0550] p 321 A85-25943

The performance of smooth-wall drag reducing outer-layer devices in rough-wall boundary layers
[AIAA PAPER 85-0558] p 369 A85-25947

A slotted test section numerical model for interference assessment p 426 A85-26759

The motion of a spherical particle suspended in a turbulent flow near a plane wall p 444 A85-29056

Wall-interference calculation of wind tunnel with octagonal sections using conformal mapping method
p 592 A85-35750

Near-sonic subsonic flow around a profile - In particular: the foot-point structure of a shock and the flow-reverse theorem p 553 A85-36342

An integral method of wall interference correction for low speed wind tunnel p 682 A85-38962

The free interaction in a supersonic flow over a porous wall p 626 A85-39021

Investigation of the effect of two endwall contours on the performance of an annular nozzle cascade
[AIAA PAPER 85-1218] p 630 A85-39661

Nonstationary aerodynamic characteristics of a profile in separated flow near an undulated wall
p 730 A85-42120

A three-dimensional boundary-layer analysis including heat-transfer and blade-rotation effects
p 737 A85-42986

Prediction of the inception of cavitation on blade profiles of hydraulic turbomachines p 906 A85-47849

Theoretical and experimental study of nonadiabatic transonic shock/boundary-layer interaction
p 869 A85-48529

Progress in wind tunnel wall interference assessment/correction procedures at the NAE
p 84 N85-12025

Tunnel constraint for a jet in crossflow
p 84 N85-12027

Interference from slotted walls p 84 N85-12028

Wind tunnel wall interference correction for aircraft models p 84 N85-12029
Determination of equivalent model geometry for tunnel wall interference assessment/correction p 85 N85-12031
Wall influence corrections in wind tunnels: Blockage correction according to the wall pressure signature method
[FW-FO-1613] p 86 N85-12875
Parametric determination of blockage interference of 3-dimensional models in the Emmen Federal Aircraft works transonic tunnel (Switzerland)
[FW-FO-1636] p 88 N85-12876
A local slot boundary condition for transonic flow calculations in slotted-wall test sections of wind tunnels
[FFA-TN-1984-34] p 89 N85-12879
Investigation for the improvement of the transonic tunnel working section of the Emmen Federal Aircraft Works (Switzerland)
[FW-FO-1681] p 118 N85-12904
Corrections for attached sidewall boundary-layer effects in 2-dimensional airfoil testing
[NASA-CR-3873] p 326 N85-17997
An investigation of turbulence mechanisms in V/STOL upwash flow fields
[AD-A149786] p 399 N85-21123
Adaptive wall wind tunnels and wall interference correction methods
[DFVLR-IB-222-84-A-37] p 683 N85-27912

**WALL JETS**
The influence of a spoiler on the development of a highly curved turbulent wall jet p 123 A85-14348
Viscous/inviscid analysis of curved sub- or supersonic wall jets p 145 A85-18677
Noniterative cross-flow integration for the pressure-split analysis of subsonic mixing-layer problems p 145 A85-18697
Measurements of a zero-pressure-gradient boundary layer blown by an asymmetric jet p 390 A85-29077
Effects of a central fence on upwash flows p 817 A85-45839

**WALL PRESSURE**
Calculation of streamlines from wall pressures on a fusiform body p 79 A85-14894
Experimental investigation of blockage effect of upper wall of wind-tunnel of wake of two-dimensional flat plate normal to plane boundary p 272 A85-19403
Surface pressure fluctuations in a three-dimensional shock wave/turbulent boundary layer interaction
[AIAA PAPER 85-0125] p 211 A85-19536
Structure of the wall pressure fluctuations in a shock-induced separated turbulent flow
[AIAA PAPER 85-0179] p 214 A85-19571
Wind tunnel wall interference in closed, ventilated and adaptive test sections p 82 N85-12014
Experiments suitable for wind tunnel wall interference assessment/correction p 83 N85-12021
Tunnel constraint for a jet in crossflow p 84 N85-12027
An interference assessment approach for a three-dimensional slotted tunnel with sparse wall pressure data p 84 N85-12030
Review of the advanced technology airfoil test program in the 0.3-meter transonic cryogenic tunnel p 85 N85-12033
Singularity model for the analysis of wall interference in closed wind tunnels according to the wall pressure signature method (blockage and lift)
[FW-FO-1612] p 86 N85-12874
Comparative flow calculation on transonic cone/cylinder standard models in connection with the wall interference problem
[FW-FO-1689] p 86 N85-12878
Sidewall boundary-layer effects in two-dimensional airfoil testing
[NASA-CR-176034] p 781 N85-31065

**WALL TEMPERATURE**
Calculation of the disturbance to combustion chamber film cooling due to air injection through a row of jets p 420 A85-29046
Comparison of advanced cooling concepts using color thermography — for high temperature-rise gas combustors
[AIAA PAPER 85-1289] p 667 A85-39702
Impingement cooling of gas turbine components p 767 A85-41785
Laminar flow heat exchangers. Viscosity induced non-uniform flow
[AD-A144777] p 53 N85-10307
High temperature thermocouple and heat flux gauge using a unique thin film-hardware hot juncture
[NASA-TM-86806] p 295 N85-16096

**WALLS**
Performance of two transonic airfoil wind tunnels utilizing limited ventilation p 83 N85-12020
Modeling of propulsive jet plumes--extension of modeling capabilities by utilizing wall curvature effects
[AD-A146262] p 128 N85-12324

**WALSH FUNCTION**
Identification of linear dynamic control plants by means of signal expansion on the basis of the Walsh function p 803 A85-42675

**WAR GAMES**
Eccentric two-target model for qualitative air combat game analysis
[AIAA PAPER 83-2122] p 535 A85-32782

**WARFARE**
Materials for emergency repair of runways
[AD-A146139] p 117 N85-12068
A methodology for the determination of rotary wing aircraft vulnerabilities in air-to-air combat simulation
[AD-A148984] p 346 N85-18984
Ground evaluation of helicopter air-to-air warfare p 499 N85-22360
Visual simulation requirements for aircraft aspect recognition at real world distances
[AD-A151040] p 517 N85-23810

**WARNING SYSTEMS**
Operational evaluation of an experimental TCAS — Traffic Alert and Collision Avoidance System
[AIAA PAPER 84-2407] p 69 A85-13514
Optimizing the use of surface sensors for wind shear detection p 181 A85-16242
The Cockpit Display of Traffic Information and the Threat Alert and Collision Avoidance System integration - A review p 259 A85-21559
Solving the pilot's wind-shear problem p 400 A85-27366
Airborne early warning radar p 408 A85-27835
Enhanced collision avoidance system cuts unneeded alerts p 578 A85-35450
Stall warning - Catching it early p 578 A85-36144
North warning system airship feasibility study
[AIAA PAPER 85-0858] p 640 A85-38777
Windshear escape p 776 A85-41530
Flight phase status monitor study. Phase 1: Systems concepts
[DOT/FAA/PM-84/18] p 90 N85-12046
LPI-radar for helicopter obstacle warning p 297 N85-16810
The use of synthetic aperture radar imagery to detect hazards to navigation
[AD-A149324] p 339 N85-18971
Helicopter user survey: Traffic alert and collision avoidance system (TCAS)
[FAA-PM-85-6] p 567 N85-25236
Preliminary airworthiness evaluation of a National Aeronautics and Space Administration automated stall warning system for an OV-1 aircraft
[AD-A152010] p 579 N85-26706

**WARPAGE**
Influence of warpage on composite aeroelastic theories
[AIAA PAPER 85-0710] p 491 A85-30359

**WASPALOY**
A study of fatigue damage mechanisms in Waspaloy from 25 to 800 C p 42 A85-12096

**WASTE DISPOSAL**
Depot modernization at the Defense Logistics Agency
[AD-P004008] p 126 N85-11986
Strategies for preparing and submitting a part B application for a DoD facility
[AD-P004139] p 375 N85-18475
FAA policy regarding solid waste disposal facilities
[AD-P004196] p 428 N85-19963
Airport bird hazards associated with solid waste disposal facilities
[AD-P004197] p 428 N85-19964
Effectiveness of an overhead wire barrier in deterring gulls from feeding at a sanitary landfill
[AD-P004199] p 453 N85-19966
Effectiveness of an overhead wire barrier system in reducing gull use at the BFI Jedburg sanitary landfill, Berkeley and Dorchester counties, South Carolina
[AD-P004200] p 454 N85-19967

**WASTE HEAT**
Open-cycle vapor compression heat pump
[PB85-101475/GAR] p 188 N85-14951

**WASTE TREATMENT**
Strategies for preparing and submitting a part B application for a DoD facility
[AD-P004139] p 375 N85-18475

**WASTES**
Strategies for preparing and submitting a part B application for a DoD facility
[AD-P004139] p 375 N85-18475

**WATER FLOW**
A study of heat transfer during the injection of water into the cooling air of a turbine blade p 349 A85-23984

**WATER INJECTION**
Description of a technique to measure spray distribution in an air stream
[AD-A149780] p 398 N85-21122
Estimation of gas turbine engine boost provided by injecting water behind compressor p 509 N85-22838

**WATER LANDING**
Air carrier overwater emergency equipment and procedures
[PB85-917006] p 820 N85-32105

**WATER TEMPERATURE**
Variable-temperature water tunnel for high Reynolds numbers
[AIAA PAPER 85-0051] p 273 A85-19483

**WATER TUNNEL TESTS**
Vortex research facility improvements and preliminary density stratification effects on vortex wakes
[AIAA PAPER 85-0050] p 209 A85-19482
Variable-temperature water tunnel for high Reynolds numbers
[AIAA PAPER 85-0051] p 273 A85-19483
Quantitative exploitation of tracer visualization obtained in the hydrodynamic tunnels of ONERA
[ONERA, TP NO. 1985-10] p 442 A85-27889
LDA measurements for leading edge vortex core of a strake-wing p 560 A85-35774
Flow visualization in water channels by means of a procedure for the generation of very small air bubbles p 853 A85-44270
Vortex flow visualization studies of a strake-wing in water tunnel p 904 A85-47131
Multi-ducted inlet combustor research and development
[AD-A153753] p 673 N85-28946
Circulation control lift generation experiment: Hardware development p 856 N85-33535

**WAVE AMPLIFICATION**
Mechanism of broadband jet noise amplification and suppression under controlled excitation
[AIAA PAPER 84-2319] p 61 A85-10866

**WAVE DIFFRACTION**
The diffraction of sound waves by an elastic half-plane attached to a vertical rigid plane p 182 A85-16266
A random choice method for two-dimensional steady supersonic shock wave diffraction problems p 141 A85-16531
Diffraction of a baffled dipole - Frequency dependence p 611 A85-33915
Diffraction of a single plane wave by a conical wing p 623 A85-38483

**WAVE DRAG**
Arrays for minimum wave drag of bodies of revolution
[AIAA PAPER 85-0449] p 249 A85-19758
An extremum problem concerning the shape of a body of revolution in supersonic gas flow p 234 A85-22371
Optimal aerodynamic configurations in a twisted hypersonic gas flow p 389 A85-28390
Arrays of bodies of revolution for minimum wave drag p 881 A85-49136
An investigation of vortex-induced aerodynamic characteristics of supersonic cruise configurations
[NASA-CR-174299] p 234 N85-15690

**WAVE FRONT RECONSTRUCTION**
Methods for design aerodynamics of modern transport aircraft
[DFVLR-FB-85-05] p 636 N85-27838

**WAVE INTERACTION**
Disturbance-wave interactions in flows with crossflow
[AIAA PAPER 85-0494] p 226 A85-19788
Computation of three-dimensional shock wave and boundary-layer interactions
[NASA-TM-86780] p 911 N85-35372

**WAVE PROPAGATION**
Generation of instability waves in flows separating from smooth surfaces p 3 A85-10352
On the stability of an infinite swept attachment line boundary layer p 75 A85-13723
Feedback in separated flows over symmetric airfoils
[AIAA PAPER 84-2297] p 390 A85-28899
Computation of steady supersonic flows by a flux-difference/splitting method p 545 A85-34735
Nonlinear waves theories in vortex flow p 550 A85-35767
Implementation of the supersonic triplet singularity into the USTORE computer code
[CSIR-NIAST-83/47] p 8 N85-10006
Propagation Influences on Digital Transmission Systems: Problems and Solutions
[AGARD-CP-363] p 373 N85-19269
Applications of the conformal mapping method to the solution of mechanical vibrations problems p 528 N85-23103
Hyperbolic phenomena in the flow of viscoelastic fluids
[AD-A153533] p 700 N85-29186

**WAVE RESISTANCE**
Estimation of the wave resistance of bodies of revolution with a front separation zone in supersonic flow
p 730 A85-42119
**WAVEFORMS**
Target super-resolution compensaton for spread spectrum radar waveforms p 823 A85-45129
Electromagnetic resonances of cylinders and aircraft model with resistive wires
[NASA-CR-174203] p 192 N85-15319
Theoretical and experimental analyses of laser altimeters for barometric measurements over the ocean
p 298 N85-17351
**WAVEGUIDE LASERS**
Applications of FM-CW CO2 waveguide laser radar
p 334 A85-22650
**WAVEGUIDES**
Scattering from a periodic array of conducting bars of finite surface resistance p 794 A85-42015
**WAVELENGTH DIVISION MULTIPLEXING**
Applications of wavelength division multiplexing (WDM) and time division multiplexing (TDM) to aircraft data links
p 853 A85-44365
**WEAPON SYSTEM MANAGEMENT**
Pave Pillar avionics - An architecture for the future
p 832 A85-45000
Error corrective coding for MIL-STD-1553B aircraft stores management systems p 823 A85-45127
**WEAPON SYSTEMS**
Minimization of the maintenance impact associated with the introduction of high technology electronics to rotary wing aircraft
[AIAA PAPER 84-2413] p 92 A85-13518
Advanced concepts in combat automation
[AIAA PAPER 84-2458] p 99 A85-13546
A system approach to flight control reliability and maintainability
[AIAA PAPER 84-2463] p 114 A85-13549
Implications of Joint Tactical Information Distribution System/Tactical Digital Information Link J on Navy aircraft weapons systems
[AIAA PAPER 84-2719] p 152 A85-17883
Military electronics - Why so unreliable?
p 185 A85-18440
Design and advanced concepts of avionics/weapons system integration; Proceedings of the Symposium, London, England, April 3, 4, 1984 p 200 A85-21456
Packaging and interconnection for avionics
p 290 A85-21460
The impact of integrated systems - The helicopter designer's viewpoint p 252 A85-21467
The AFA computerized mission planning system
p 347 A85-25853
A review of complete weapon vibration testing techniques p 426 A85-26555
Overview of weapon assessments in an electromagnetic environment p 406 A85-26678
The F-16 A/C-ATE centralized data system
p 418 A85-26839
Importance of test and evaluation in Navy's LAMPS MK III program p 382 A85-27471
Army aviation maintenance data and supportability interface p 465 A85-31980
Fault Detection/Location System (FD/LS) - How much, how little and how to implement p 466 A85-31992
Simulating the works - From crew input to system response — integrated airborne weapon systems
[AIAA PAPER 85-1738] p 779 A85-40555
F-14D - Tomorrow's tougher tomcat
p 755 A85-41067
Advanced avionics for the next generation military helicopters p 886 A85-48072
Establishing realistic requirements for reliability, maintainability, and built-in-test p 909 A85-49539
An M principle - Pay me now or spend more later
p 909 A85-49581
F/A-18 supportability assurance readiness program
p 866 A85-49585
Analysis of on-board CIG (Computer Image Generator) applications for aircrew training
[AD-A145214] p 38 N85-10079
Avionics/crew station integration p 166 N85-14818
Attack helicopter (AH-1T) cockpit systems integration
p 161 N85-14826
Estimating wartime support resource requirements. Statistical and related policy issues
[AD-A147923] p 308 N85-16685
Effective life cycle software support: A study in discipline and versatility p 302 N85-16746
A weapon system design approach to diagnostics
p 203 N85-16752
A simulator for studying helicopter weapons systems
p 277 N85-16816
Simulating speed and height cues in the C-130 weapon system trainer
[AD-P004313] p 358 N85-17[illegible]7
Assuring structural integrity in Army systems
[NASA-CR-175492] p 448 N85-20398
Air combat simulation: Methods, models, trends
p 498 N85-22359
Design adequacy: An effectiveness factor
p 606 N85-26642
Design-To-Cost (DTC) methodology to achieve affordable avionics p 578 N85-26645
Cost and schedule implications of multinational coproduction
[AD-A154358] p 807 N85-30969
Next generation gunship
[AD-A156361] p 887 N85-35193
**WEAPONS DELIVERY**
Bomb rack technology - Keeping up with advanced weapons p 246 A85-19274
Flight test techniques for the advanced fighter technology integration (AFTI) F-16 p 340 A85-24230
Uses of a digital electronic theodolite system in a weapon separation program p 418 A85-28655
Short-range antiarmor flight vehicles of the Apache/CWS family
[DGLR PAPER 84-125] p 707 A85-40338
Optimal fuselage aiming — of fighter aircraft-mounted guns
[AIAA PAPER 85-1961] p 811 A85-45945
Content, variety, and augmentation of simulated visual scenes for teaching air-to-ground attack
[AD-A145218] p 38 N85-10080
**WEAR**
Chemical nature of wear debris — in lubricating oils used in gas turbine engines
[ASLE PREPRINT 84-LC-3A-1] p 363 A85-25964
Condition monitoring of jet engines
p 835 A85-43649
Lubricity of well-characterized jet and broad-cut fuels by ball-on-cylinder machine
[NASA-TM-83807] p 120 N85-12183
Wear and corrosion of components under stress and subjected to motion
[AD-A145781] p 128 N85-12372
Tribological systems as applied to aircraft engines
[NASA-TM-86965] p 450 N85-21657
Friction and wear behavior of aluminum and composite I-beam stiffened airplane skins
[NASA-TM-86418] p 662 N85-27852
**WEAR INHIBITORS**
The effect of esters on 'antiwear' properties of jet engine fuel obtained by hydrofining p 179 A85-16950
Corrosion-inhibiting gas-turbine engine lubricant. II - Fluid formulation and evaluation
[ASLE PREPRINT 84-AM-5D-4] p 363 A85-25962
**WEAR TESTS**
Blade tip geometry - A factor in abrading sintered seal material p 110 A85-13714
Evaluation of abradable turbine seal by friction-wear test and engine performance test p 770 A85-41842
**WEATHER**
Safety - Meteorological data vital for simulator training
[AIAA PAPER 85-0091] p 240 A85-19513
Denver ARTCC (Air Route Traffic Control Center) evaluation of PROFS (Program for Regional Observing and Forecasting Services) mesoscale weather products
[PB85-120301/GAR] p 338 N85-18045
The impact of weather on aviation safety
[GPO-35-520] p 565 N85-26685
Flying in spite of the weather
[NLR-MP-84021-U] p 644 N85-27847
**WEATHER DATA RECORDERS**
New AWOS provides synthesized-voice weather information p 907 A85-48853
**WEATHER FORECASTING**
Use of Doppler radar to detect weather hazards such as turbulence, wind shear, and gust fronts
p 191 A85-17485
Seventh Annual Workshop on Meteorological and Environmental Inputs to Aviation Systems 26-28 October 1983, Tullahoma, Tennessee p 191 A85-18324
Clear turbulence forecasting - Towards a union of art and science
[AIAA PAPER 85-0014] p 298 A85-19458
Radar for storm forecasting and weather hazard warning
[AIAA PAPER 85-0092] p 299 A85-19514
Optimization of averaging intervals of wind velocity for meteorological services to aviation p 453 A85-28956
Automatic monitoring of aviation terminal forecasts
p 532 A85-30600
Forecasting dry microburst activity over the high plains
p 857 A85-44109
Automated aircraft icing forecast technique
[AD-A144853] p 57 N85-10571
The visibility climatology of McMurdo Sound-Williams Field, Antarctica
[AD-A148108] p 300 N85-17492
Denver ARTCC (Air Route Traffic Control Center) evaluation of PROFS (Program for Regional Observing and Forecasting Services) mesoscale weather products
[PB85-120301/GAR] p 338 N85-18045
FTASUM: Aviation forecast summaries
[PB85-112977] p 455 N85-21908
Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 1
[NASA-CR-167862] p 913 N85-35534
Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 2
[NASA-CR-167863] p 913 N85-35535
Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 3
[NASA-CR-167864] p 913 N85-35536
Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 4
[NASA-CR-167865] p 913 N85-35537
Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning: Summary report
[NASA-CR-167866] p 913 N85-35538
A preliminary intercomparison between numerical upper wind forecasts and research aircraft measurements of jet streams
[NASA-CR-167884] p 914 N85-35539
The physical and empirical basis for a specific clear-air turbulence risk index
[NASA-CR-178522] p 914 N85-35540
**WEAVING**
Magnaweave shapes for aircraft - Integrally woven wing sections, stiffened shear panels, and others
p 71 A85-15959
The use of carbon weaves and tapes - Technical and economic surveys p 520 A85-33242
**WEBS**
Ultrasonic detection of cracks in web geometries
p 905 A85-47380
**WEBS (SHEETS)**
Aircraft barricade
[AD-D011316] p 277 N85-15761
**WEDGE FLOW**
Supersonic flow past a blunt wedge p 2 A85-10113
Theoretical study of the transonic flow past wedge profiles with detached shock waves p 74 A85-12670
Transient motion of hypersonic vehicles including time history effects
[AIAA PAPER 85-0201] p 268 A85-19585
Flow behind an attached shock wave in a radiating gas p 233 A85-22308
Mach reflection flowfields associated with strong shocks p 391 A85-29082
An experimental and numerical study of flow past a wedge of finite width at angles of sideslip
p 471 A85-31476
Comparison of inviscid and viscous computations with an interferometrically measured transonic flow
p 545 A85-35129
The isolated nature of solutions with a strong attached shock wave at the edges of a conical wing and a wedge
p 623 A85-38488
Refined numerical solution of the transonic flow past a wedge
[AIAA PAPER 85-1593] p 713 A85-40709
Adaptive mesh solution for supersonic conical flow in a rectilinear inlet
[AIAA PAPER 85-1626] p 714 A85-40732
**WEDGES**
Aircraft chocks
[AD-A145135] p 38 N85-10077
**WEIBULL DENSITY FUNCTIONS**
Probabilistic characteristics of the frequency spectrum of the natural vibrations of turbocompressor blades
p 526 A85-32759
Engine system field experience simulation program
[SAE PAPER 841601] p 659 A85-39071
**WEIGHT (MASS)**
Handheld computer weight and balance computations for military aircraft
[SAWE PAPER 1582] p 877 A85-49907
Advances in composites technology
[NASA-TM-86353] p 284 N85-17048
Integrated Technology Rotor/Flight Research Rotor (ITR/FRR) concept definition study
[NASA-CR-166444] p 345 N85-18981
Gears and Power Transmission Systems for Helicopters and Turboprops
[AGARD-CP-369] p 502 N85-23765
Advanced gearbox technology in small turbo propeller engines p 510 N85-23771
Some aspects of how to design cost-effective flight control systems p 586 N85-26639

Preliminary sizing and performance of aircraft
[NASA-TM-86357] p 829 N85-32111

**WEIGHT ANALYSIS**

Cost and weight estimating considerations for transport aircraft system installations
[SAWE PAPER 1548] p 160 A85-18815

Orbiter spacecraft weight and center of gravity determination
[SAWE PAPER 1559] p 178 A85-18817

Minimum and maximum cargo tables for aircraft with three cargo compartments
[SAWE PAPER 1568] p 160 A85-18820

Estimating the weight of generally configured dual wing systems
[AIAA PAPER 85-0641] p 490 A85-30244

Impact of emerging technology on the weight of future rotorcraft p 494 A85-31970

Some weight aspects of Soviet helicopters
p 495 A85-31975

The role of load-cell rotation in airplane-weight determination
[SAWE PAPER 1583] p 898 A85-49908

An evaluation of improved analytically based weight estimation methodologies
[SAWE PAPER 1616] p 883 A85-49920

**WEIGHT INDICATORS**

Recent advances in aircraft on-board weight and balance systems
[AIAA PAPER 84-2606] p 164 A85-17809

Progress toward magnetic suspension and balance systems for large wind tunnels p 427 A85-29252

Effect of superconducting solenoid model cores on spanwise iron magnet roll control
[NASA-TM-86378] p 683 N85-27915

**WEIGHT MEASUREMENT**

Orbiter spacecraft weight and center of gravity determination
[SAWE PAPER 1559] p 178 A85-18817

Integrating new technology into weight methodology
p 494 A85-31972

Applying shear beam load measuring techniques to portable platform scales for aircraft weighing
[SAWE PAPER 1581] p 898 A85-49906

**WEIGHT REDUCTION**

Propulsion technology projections for commercial aircraft
[AIAA PAPER 84-2448] p 108 A85-13536

Weight-aspects of the advanced composite airframe program (ACAP)
[SAWE PAPER 1517] p 159 A85-18808

A survey of reported weight and cost savings for composite vs. metal airframes
[SAWE PAPER 1547] p 160 A85-18814

757 payloads weight optimization
[SAWE PAPER 1571] p 160 A85-18823

Determination of the optimal parameters of aircraft structural elements in the form of sandwich plates and shallow shells with a honeycomb filler
p 287 A85-20452

An optimality criterion method for structures with stress, displacement and frequency constraints
p 290 A85-21985

Advance technology impacts on rotorcraft weight
p 494 A85-31973

An assessment of the impact of technology on VTOL weight prediction p 495 A85-31974

Radial tires undergo operational tests on military, civil aircraft p 498 A85-32800

Structural optimization — in aircraft design
p 694 A85-38352

Aluminum-lithium based alloys for aerospace applications p 785 A85-41624

Application of computer-aided structural optimization in the design of aircraft components
[MBB-UT-21-84-OE] p 758 A85-42685

Weight design and efficiency of passenger aircraft. Handbook (2nd revised and enlarged edition) — in Russian p 828 A85-46564

The weight reduction potential of advanced composites
[SAWE PAPER 1579] p 901 A85-49905

Weight control - A procurement agency perspective
[SAWE PAPER 1594] p 919 A85-49914

In-production aircraft weight control
[SAWE PAPER 1597] p 883 A85-49915

A glance at Soviet helicopter weight trends and a weight-prediction method
[SAWE PAPER 1627] p 883 A85-49925

Flight simulation fatigue crack propagation in metal/carbon-epoxy laminates
[NLR-TR-83006-U] p 54 N85-10416

Modern structural materials. Present situation and evolution prospects — aircraft materials
[SNIAS-842-551-101] p 105 N85-12886

Aeroelastic constraints for a wing weight minimization procedure
[FFA-TN-1985-4] p 875 N85-34126

**WEIGHTING FUNCTIONS**

Definition of acceptable levels of mismatch for equivalent systems of augmented CTOL (Conventional Take-Off and Landing) aircraft
[AD-A145619] p 37 N85-11007

**WEIGHTLESSNESS SIMULATION**

Parabolic aircraft flights - An effective tool in preparing microgravity experiments p 782 A85-42697

**WELD TESTS**

Aircraft service testing of ultrasonically welded panels
p 646 A85-37408

**WELDED JOINTS**

Feasibility study of the welding of SiC
p 688 A85-39339

**WELDED STRUCTURES**

Aircraft service testing of ultrasonically welded panels
p 646 A85-37408

**WELDING**

Future robotics program at San Antonio ALC (Air Logistics Center)
[AD-P004011] p 127 N85-11991

**WENTZEL-KRAMER-BRILLOUIN METHOD**

Contribution to the linear dynamic analysis of slender bodies in low and medium frequency ranges
[ONERA, TP NO. 1985-95] p 525 A85-32345

**WEST GERMANY**

DFVLR, annual report 1983 p 311 A85-25450

German domestic scheduled air transport in the year 2000
[ESA-TT-828] p 149 N85-13792

Activities report on West German civil airports. Part 1: Text
[ISBN-3-87977-055-7-PT-1] p 279 N85-16887

Activities report for the West German Civil Airports. Part 2: Tables
[ISBN-3-87977-055-7-PT-2] p 279 N85-16888

The Prandtl Hergesell project of a national research establishment for aeronautics
[ESA-TT-835] p 313 N85-17993

Activities report in aerospace in West Germany
[ISSN-0070-3966] p 379 N85-18947

FRG's DFVLR ready for participation in space station
p 433 N85-20176

Proceedings of the 9th US Air Force and the Federal Republic of Germany Data Exchange Agreement Meeting. Viscous and Interacting Flow Field Effects
[AD-A153020] p 699 N85-28266

Investigation of air pollution impact in Eastern Bavaria: Measurement results from August and September, 1984
[DFVLR-FB-85-03] p 702 N85-28471

**WETTING**

The aerodynamic effect of surface wetting characteristics on a laminar flow airfoil in simulated heavy rain
[AIAA PAPER 85-0260] p 247 A85-19619

Improved resins for wet layup repair of advanced composite structure p 686 A85-37331

Investigation of surface tension phenomena using the KC-135 aircraft
[NASA-TM-82508] p 362 N85-18995

**WHITE NOISE**

Experimental analysis of an innovations-based detection algorithm for surveillance radar p 336 A85-25102

Flight test technique for evaluation of gust load alleviation analysis methodology
[NASA-TM-86344] p 161 N85-14833

**WIDE ANGLE LENSES**

A second generation WAVIDS (Wide Angle Virtual Image Display System)
[AD-P004328] p 359 N85-17982

**WIENER HOPF EQUATIONS**

Random equations in aerodynamics
[NASA-CR-174279] p 238 N85-16825

**WILDLIFE**

Control of mammals at airports
[AD-P004192] p 404 N85-19957

Airport site selection and design
[AD-P004193] p 428 N85-19959

**WINCHES**

Development of balloon-borne reel-down and-up winch system p 640 A85-38311

A new reeling technique for very long extension scanning in the stratosphere p 640 A85-38312

**WIND (METEOROLOGY)**

Microburst wind structure and evaluation of Doppler radar for wind shear detection
[DOT/FAA/PM-84/29] p 57 N85-11501

Wind shear measuring on board an airliner
[NASA-TM-77463] p 131 N85-12521

Wind modelling for increased aircraft operational efficiency p 559 N85-26652

A survey of the turbulence in the marine surface layer for the operation of low-Reynolds number aircraft
[AD-A154133] p 800 N85-30558

**WIND DIRECTION**

The structure of a microburst - As observed by ground-based and airborne Doppler radar
p 452 A85-28772

Aircraft performance in a JAWS microburst
p 453 A85-28776

Aircraft performance in a JAWS microburst
p 701 A85-39213

Model of the wind field in a downburst
p 701 A85-39218

Acrosswind response of towers and stacks of circular cross-section p 796 N85-30354

**WIND EFFECTS**

Wind shear terms in the equations of aircraft motion
p 35 A85-11981

Four-dimensional fuel-optimal guidance in the presence of winds p 158 A85-16328

Nonlinear simulation of flight along wind compensating curved glidepaths p 245 A85-21838

Aircraft and Doppler air motion comparisons in a JAWS microburst p 453 A85-28775

Minimum-time path through wind fields
p 647 A85-38358

Aircraft intercept vectoring in a known wind field
[AIAA PAPER 85-1782] p 624 A85-43842

Algorithms for automatic four-dimensional aircraft guidance, considering the momentary wind situation
[DFVLR-FB-84-40] p 410 N85-21146

Evaluating wind flow around buildings on heliport placement
[FAA-PM-84-25] p 455 N85-21881

Dynamic and aeroelastic action of guy cables
[VTT-18] p 608 N85-27276

Experimental and theoretical determination of the wing-induced lateral wind on the tail surfaces in oscillating rolling motion. Part 2: Theoretical investigations for calculation of the lateral wind
[IFD-1/84-PT-2] p 654 N85-28940

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 4
[NASA-CR-167865] p 913 N85-35537

**WIND MEASUREMENT**

Optimizing the use of surface sensors for wind shear detection p 181 A85-16242

Identification of vortex-induced clear air turbulence using airline flight records p 299 A85-21843

Evaluation of Doppler radar for airport wind shear detection p 452 A85-28774

Microbursts in JAWS depicted by Doppler radars, PAM, and aerial photographs p 453 A85-28777

Characteristics of gust front and downdrafts from single Doppler radar data p 453 A85-28779

Wind shear measuring on board an airliner
[NASA-TM-77463] p 131 N85-12521

Application of infrared radiometers for airborne detection of clear air turbulence and low level wind shear, airborne infrared low level wind shear detection test
[NASA-CR-175725] p 609 N85-25965

Wind modelling for increased aircraft operational efficiency p 559 N85-26652

Using regression analysis for determining air data sensor errors by means of an inertial navigation system
[ESA-TT-886] p 751 N85-31041

**WIND PROFILES**

Aerodynamic characteristics of an airfoil in a nonuniform wind profile p 143 A85-18506

Aerodynamics of an aspect ratio 8 wing at low Reynolds numbers
[AIAA PAPER 85-0278] p 217 A85-19630

The structure of a microburst - As observed by ground-based and airborne Doppler radar
p 452 A85-28772

Cavitation models of separated flow of a low-viscosity fluid past wing profiles p 390 A85-29004

Aerodynamics of an aspect ratio 8 wing at low Reynolds numbers p 628 A85-39223

Structural design guidelines for heliports
[FAA-PM-84-23] p 39 N85-11010

Determination of vertical air velocity using measurements of the aircraft motion
p 914 N85-35545

Control variables in vertical wind determination using simple flight-mechanical equations p 914 N85-35546

**WIND SHEAR**

Wind shear terms in the equations of aircraft motion
p 35 A85-11981

Microburst explored p 56 A85-12174

A spatial model of wind shear and turbulence
[AIAA PAPER 84-0277] p 190 A85-16236

Optimizing the use of surface sensors for wind shear detection p 181 A85-16242

Aerodynamic characteristics of an airfoil in a nonuniform wind profile p 143 A85-18506
Wind shear - Taming the killer p 241 A85-20148
Pulsed Doppler radars for weather observation and flight safety enhancement p 374 A85-24903
Solving the pilot's wind-shear problem
p 400 A85-27386
JAWS data collection, analysis highlights, and microburst statistics p 452 A85-28771
Evaluation of Doppler radar for airport wind shear detection p 452 A85-28774
Aircraft performance in a JAWS microburst
p 453 A85-28776
Aircraft performance in a JAWS microburst
p 701 A85-39213
A ring-vortex downburst model for real-time flight simulation of severe wind shears
[AIAA PAPER 85-1749] p 799 A85-40561
Composite statistical method for modeling wind gusts for aircraft simulation
[AIAA PAPER 85-1750] p 799 A85-40562
Windshear escape p 776 A85-41530
Optimal flight paths through microburst wind profiles
[AIAA PAPER 85-1833] p 839 A85-43872
Forecasting dry microburst activity over the high plains
p 857 A85-44109
Optimal disturbance suppression with application to wind shear — for digital flight control of small commercial jet
[AIAA PAPER 85-1886] p 844 A85-45909
Analysis of aircraft control strategies for microburst encounter — low altitude wind shear
p 846 A85-46327
The microburst as a hazard to aviation: Structure, mechanisms, and nowcasting p 56 N85-10491
Microburst wind structure and evaluation of Doppler radar for wind shear detection
[DOT/FAA/PM-84/29] p 57 N85-11501
A spatial model of wind shear and turbulence for flight simulation p 130 N85-12518
Wind shear measuring on board an airliner
[NASA-TM-77463] p 131 N85-12521
Critical conditions for the automatic control of landing from decision height in variable winds
[UTIAS-284] p 154 N85-14830
Wind shear detection technology
[GPO-38-920] p 455 N85-21879
Total energy-rate feedback for automatic glide-slope tracking during wind-shear penetration
[NASA-TP-2412] p 515 N85-23801
Application of infrared radiometers for airborne detection of clear air turbulence and low level wind shear, airborne infrared low level wind shear detection test
[NASA-CR-175725] p 609 N85-25985
The use of pressure sensing taps on the aircraft wing as sensor for flight control systems p 606 N85-26660
Contributions on the subject of longitudinal movements of aircraft in wind shears
[NASA-TM-77837] p 702 N85-29432

**WIND TUNNEL APPARATUS**
A sensor for detection of unsteady distortion maxima in air intakes
[ONERA, TP NO. 1984-148] p 205 A85-19262
The NASA altitude wind tunnel - its role in advanced icing research and development
[AIAA PAPER 85-0090] p 357 A85-26381
Applications of a photomultiplier to visualization of aerodynamic flows by laser tomography
[ONERA, TP NO. 1985-11] p 442 A85-27890
Progress toward magnetic suspension and balance systems for large wind tunnels p 427 A85-29252
Investigation on reducing the flow noise of the 0.6 m x 0.6 m trisonic wind tunnel p 682 A85-38968
The Kryo-Kanal Koeln (KKK) as an example of a higher-Reynolds-number wind tunnel
[DGLR PAPER 84-095] p 777 A85-40314
The transonic wind tunnel of the Munich Institute for Air Transport Technology and Light Construction of HSBw
[DGLR PAPER 84-107] p 777 A85-40324
An external insulation system for a cryogenic wind tunnel p 780 A85-41340
Use of a radiance amplifier for visualizing seeded aerodynamic flows p 855 A85-45671
European Workshop on Probe Calibrations
p 896 A85-48523
Preliminary results using a rapid photographic wake traverse system — in a wind tunnel
[RAE-TM-AERO-1987] p 55 N85-11332
Procedural aspects of testing aerodynamic models with combustion in high-enthalpy transient-mode installations
p 188 N85-14658
Analytical and physical modeling program for the NASA Lewis Research Center's Altitude Wind Tunnel (AWT)
[NASA-TM-86919] p 276 N85-15757
The NASA Altitude Wind Tunnel (AWT): Its role in advanced icing research and development
[NASA-TM-86920] p 276 N85-15758
The S2MA wind tunnel at the Modane-Avrieux aerodynamic test center
[ESA-TT-862] p 361 N85-18071
Investigation of the conditions for tripping transition with roughness elements and their influence on boundary layer development p 480 N85-23720
Prediction of vortex-induced loads on wind-tunnel turning vanes
[NASA-TM-86678] p 556 N85-25204
The ONERA establishment at Cannes in the service of aeronautical research
[ESA-TT-875] p 593 N85-25276
Study on needs for a magnetic suspension system operating with a transonic wind tunnel
[NASA-CR-3900] p 593 N85-26759
Construction 1976-1980: Design, manufacturing, calibration of the German-Dutch wind tunnel (DNW)
p 683 N85-27913
Effect of superconducting solenoid model cores on spanwise iron magnet roll control
[NASA-TM-86378] p 683 N85-27915
Cryogenic test technology, 1984
[AGARD-AR-212] p 700 N85-29116

**WIND TUNNEL CALIBRATION**
National transonic facility shakedown test results and calibration plans
[AIAA PAPER 84-0584] p 174 A85-16101
Tests, in the transonic regime, of a model motorized by a blowing turbine 23 cm in diameter (9 inches) in the S1MA wind tunnel
[ONERA, TP NO. 1984-158] p 272 A85-19272
Stages in the development of the external wind-tunnel balance
[DGLR PAPER 84-096] p 777 A85-40315
Modernization of the Braunschweig low-speed wind tunnel p 779 A85-41066
Assessment of wind tunnel corrections for multielement airfoils at transonic speeds p 734 A85-42968
European Workshop on Probe Calibrations
p 896 A85-48523
Wind tunnel calibration of a hemispherical head angle of attack and angle of sideslip indicator
[FFA-TN-1984-11] p 13 N85-10923
Langley Mach 4 scramjet test facility
[NASA-TM-86277] p 278 N85-16883
Calibration of wind tunnel flow quality
p 516 N85-22399
A preliminary investigation of the dynamic force-calibration of a magnetic suspension and balance system
[NASA-CR-172580] p 517 N85-23808

**WIND TUNNEL MODELS**
Experimental aerodynamics at high speeds
p 3 A85-10321
Modal test and parameter identification of a flutter wing model with external missiles p 51 A85-12363
Active control of buffeting on a modern transport-aircraft wing configuration in a wind tunnel
[ONERA, TP NO. 1984-131] p 116 A85-15847
The accuracy of trials with powered 1/2 models in the S2MA wind tunnel
[ONERA, TP NO. 1984-156] p 272 A85-19270
Analytical and physical modeling program for the NASA Lewis Research Center's Altitude Wind Tunnel (AWT)
[AIAA PAPER 85-0379] p 275 A85-19709
In-flight flow visualization - A fluid approach
p 414 A85-28644
Flowfield investigation of a supercruise fighter model
p 392 A85-29256
European transonic wind tunnel p 681 A85-37491
Computer studies of hybrid slotted working sections with minimum steady interference at subsonic speeds
p 628 A85-39241
Unsteady aerodynamics on the ZKP large-scale model as a result of rapid control-surface motion
[DGLR PAPER 84-130] p 710 A85-40342
Wind-tunnel investigation of the aerodynamic characteristics of the Standard Dynamics Model in coning motion at Mach 0.6
[AIAA PAPER 85-1828] p 814 A85-43869
Comparison of a computed transonic flow and interferometric measurements around the leading edge of a two dimensional aerofoil asymmetrically mounted in a wind tunnel p 868 A85-47164
Pressure distributions measured on research wing M100 mounted on an axisymmetric body p 11 N85-10023
Problem of reduction to ideal wind tunnel in experimental aerodynamics p 13 N85-11702
Singularity model for the analysis of wall interference in closed wind tunnels according to the wall pressure signature method (blockage and lift)
[FW-FO-1612] p 88 N85-12874
Comparative flow calculation on transonic cone/cylinder standard models in connection with the wall interference problem
[FW-FO-1689] p 88 N85-12878
Manufacturing report of an augmented lift, variable deflection half wing
[ONERA-RT-25/1736-AY-108-A] p 138 N85-13766
Procedural aspects of testing aerodynamic models with combustion in high-enthalpy transient-mode installations
p 188 N85-14658
A preliminary study of using a strain-gauged balance and parameter estimation techniques for the determination of aerodynamic forces on a model in a very short duration wind tunnel
[AD-A146473] p 190 N85-15145
Analysis of the flow field about a T-45 using PANAIR
[AD-A146811] p 236 N85-15699
Experiences with the use of a side-strut model support system for high angles of attack in the Trisonik wind tunnel TMK
[DFVLR-MITT-84-09] p 277 N85-15763
Joined wing transonic design and test validation
[AD-A148355] p 239 N85-16834
A voice-actuated wind tunnel model leak checking system
[NASA-TM-86359] p 313 N85-17936
The generation of rolling moments with the superconducting solenoid model
[NASA-CR-172520] p 360 N85-18068
Initial investigation of cryogenic wind tunnel model filler materials
[NASA-TM-86363] p 360 N85-18069
Unsteady transonic pressure measurements on a semispan wind-tunnel model of a transport-type supercritical wing (Lann model). Part 2: Pressure distributions (plotted) and plots of the vibration modes
[AD-A130488] p 330 N85-18965
Wall interference estimation of the NAL's two-dimensional wind tunnel
[NAL-TR-829] p 361 N85-18992
Flight mechanics analysis of dynamic derivatives of the Dornier variable wind tunnel model
[ESA-TT-854] p 395 N85-19937
An exploratory study of apex fence flaps on a 74 deg delta wing
[NASA-CR-172463] p 557 N85-25208
Synthesis study: Validation of a gust generator in the presence of a model in a wind tunnel
[ONERA-RT-16/5108-RY-051] p 561 N85-26678
The application of numerical control (NC) in manufacturing wind tunnel models
[B8580078] p 699 N85-28140
Heating parameter estimation using coaxial thermocouple gages in wind tunnel test articles
[AD-A153039] p 699 N85-28328
Experiences with the use of a side-strut model support system for high angles for attack in the TMK Trisonik Wind Tunnel
[ESA-TT-895] p 781 N85-31069
Two-plane balance and slip-ring design
p 856 N85-33536

**WIND TUNNEL STABILITY TESTS**
Experimental and theoretical determination of the wing-induced lateral wind on the tail surfaces in oscillating rolling motion. Part 1: Application of the Mobile Oscillating Derivatives (MOD) on an experimental part
[IFD-1/84-PT-1] p 654 N85-28939

**WIND TUNNEL TESTS**
The effects of installation on single- and counter-rotation propeller noise
[AIAA PAPER 84-2263] p 58 A85-10830
Airfoil trailing edge flow measurements and comparison with theory, incorporating open wind tunnel corrections
[AIAA PAPER 84-2266] p 4 A85-10831
Propeller noise measurements in DNW on the fuselage of a twin engine aircraft model — German-Dutch wind tunnel
[AIAA PAPER 84-2367] p 17 A85-10897
The prediction of buffeting response in flight from wind-tunnel measurements on models of conventional construction p 18 A85-11475
Evidence of large scale time dependent flow in the wing-wall interaction wake p 49 A85-11629
Measurement of transonic dips in the flutter boundaries of a supercritical wing in a wind tunnel
p 18 A85-11986
Modal test and parameter identification of a flutter wing model with external missiles p 51 A85-12363
Wind tunnel evaluation of advanced exhaust nozzles for STOL tactical aircraft
[AIAA PAPER 84-2457] p 108 A85-13545
Design parameters for flow energizers — highly swept strakes mounted above lifting surfaces
[AIAA PAPER 84-2499] p 74 A85-13570

The value of wind tunnel tests in student design projects
[AIAA PAPER 84-2529] p 101 A85-13588

Wing tip sails which give lower drag at all normal flight speeds p 79 A85-14854

Ultra light wall wind tunnel
[ONERA, TP NO. 1984-129] p 117 A85-15846

Modelling of wind tunnel wall effects on the radiation characteristics of acoustic sources
[AIAA PAPER 84-2364] p 197 A85-16104

Applicability of a panel method, which includes nonlinear effects, to a forward-swept-wing aircraft
[AIAA PAPER 84-2402] p 139 A85-16105

T2 wind tunnel adaptive walls - Design, construction and some typical results p 175 A85-18501

Aerodynamic characteristics of an airfoil in a nonuniform wind profile p 143 A85-18506

Heat transfer effects of longitudinal vortices embedded in a turbulent boundary layer
[ASME PAPER 84-HT-21] p 186 A85-18827

A sensor for detection of unsteady distortion maxima in air intakes
[ONERA, TP NO. 1984-148] p 205 A85-19262

Noise of an airfoil in a flow
[ONERA, TP NO. 1984-155] p 303 A85-19269

The accuracy of trials with powered 1/2 models in the S2MA wind tunnel
[ONERA, TP NO. 1984-156] p 272 A85-19270

Tests of air inlets on civil aircraft
[ONERA, TP NO. 1984-157] p 272 A85-19271

Tests, in the transonic regime, of a model motorized by a blowing turbine 23 cm in diameter (9 inches) in the S1MA wind tunnel
[ONERA, TP NO. 1984-158] p 272 A85-19272

Analysis of counter-rotating propeller performance
[AIAA PAPER 85-0005] p 262 A85-19453

Variable-temperature water tunnel for high Reynolds numbers
[AIAA PAPER 85-0051] p 273 A85-19483

Mach-10 high Reynolds number development in the NSWC hypervelocity facility
[AIAA PAPER 85-0054] p 273 A85-19486

Some thoughts on the range/tunnel transition controversy
[AIAA PAPER 85-0127] p 211 A85-19538

Structure of the wall pressure fluctuations in a shock-induced separated turbulent flow
[AIAA PAPER 85-0179] p 214 A85-19571

Measurements of seperating boundary layer and wake of an airfoil using laser Doppler velocimetry
[AIAA PAPER 85-0181] p 214 A85-19572

Improvements in low Reynolds number testing in the NSWC hypervelocity wind tunnel No. 9
[AIAA PAPER 85-0226] p 274 A85-19602

Studies of condensation effects on airfoil testing in a transonic cryogenic tunnel
[AIAA PAPER 85-0229] p 274 A85-19603

The aerodynamic effect of surface wetting characteristics on a laminar flow airfoil in simulated heavy rain
[AIAA PAPER 85-0260] p 247 A85-19619

A comparison between theoretical and experimental flow fields of an airfoil with deflected spoiler
[AIAA PAPER 85-0269] p 216 A85-19622

The design and testing of several joined wing RPV's
[AIAA PAPER 85-0275] p 248 A85-19627

Effects of covering configurations on ultralight wing aerodynamics
[AIAA PAPER 85-0277] p 217 A85-19629

Aerodynamics of an aspect ratio 8 wing at low Reynolds numbers
[AIAA PAPER 85-0278] p 217 A85-19630

The distortion of a supersonic turbulent boundary layer by bulk compression and surface curvature
[AIAA PAPER 85-0299] p 218 A85-19648

The Altitude Wind Tunnel (AWT) - A unique facility for propulsion system and adverse weather testing
[AIAA PAPER 85-0314] p 275 A85-19661

Ground-effect analysis of a jet transport airplane
[AIAA PAPER 85-0307] p 248 A85-19677

Correlation of airfoil icing relationships with two-dimensional model and full scale rotorcraft icing test data
[AIAA PAPER 85-0337] p 240 A85-19680

Hypersonic characteristics of an advanced aerospace plane
[AIAA PAPER 85-0346] p 269 A85-19685

Afterbody drag reduction by vortex generators
[AIAA PAPER 85-0354] p 220 A85-19692

Recent advances in computational transonic aerodynamics
[AIAA PAPER 85-0366] p 221 A85-19699

Is the free flight/wind tunnel equivalence concept valid for unsteady viscous flow?
[AIAA PAPER 85-0378] p 222 A85-19708

Benefits and costs of powered engine simulation at low speeds
[AIAA PAPER 85-0381] p 263 A85-19710

Detailed measurements of the flowfield in the vicinity of an airfoil with glaze ice
[AIAA PAPER 85-0409] p 222 A85-19730

Experimental study of forward-located jet-interaction nozzles
[AIAA PAPER 85-0454] p 224 A85-19762

Experimental methods for wind-tunnel flight-mechanics investigations using dynamically similar aircraft models — German thesis p 249 A85-19836

Aeroelastic characteristics of the AH-64 bearingless tail rotor p 250 A85-20142

The most spectacular equipment - ETW
p 276 A85-21422

Experimental results for Reynolds number effects on trailing vortices p 232 A85-21849

Future helicopter developments p 311 A85-24512

Experimental study of the unsteady flow around a buffeting wing p 317 A85-24605

Experimental and theoretical investigations of the supersonic flow field on a two-dimensional step — German thesis p 318 A85-25448

Effect of a longitudinal vortex on a separated turbulent boundary layer
[AIAA PAPER 85-0530] p 321 A85-25930

Modification of vortex interactions in a reattaching separated flow
[AIAA PAPER 85-0555] p 321 A85-25946

Design and experimental evaluation of propfan inlets
[SAE PAPER 841477] p 352 A85-25976

Flow fields near bodies placed in rarefied subsonic and supersonic jets p 322 A85-26016

The NASA altitude wind tunnel - Its role in advanced icing research and development
[AIAA PAPER 85-0090] p 357 A85-26381

Analytical modeling of circuit aerodynamics in the new NASA Lewis Altitude Wind Tunnel
[AIAA PAPER 85-0380] p 323 A85-26389

Computation of wind tunnel wall effects in ducted rotor experiments p 419 A85-26755

Overview of icing research at ONERA
[AIAA PAPER 85-0335] p 401 A85-28028

Aerodynamic characteristics and flow patterns for a number of bluff bodies in subsonic gas flow
p 389 A85-28389

Aerodynamic characteristics of delta planes
p 389 A85-28396

The UH-1H helicopter icing flight test program - An overview
[AIAA PAPER 85-0338] p 401 A85-28898

An experimental study of pressure fluctuations in flow around a sphere p 460 A85-29005

Flowfield investigation of a supercruise fighter model
p 392 A85-29256

Measured and calculated airloads on a transport wing model p 392 A85-29263

Surface pressure measurements on a transonic spinning projectile p 392 A85-29303

Design refinements in multi-component strain gage balances p 445 A85-29561

Measured unsteady transonic aerodynamic characteristics of an elastic supercritical wing with an oscillating control surface
[AIAA PAPER 85-0598] p 469 A85-30327

Exploratory flutter test in a cryogenic wind tunnel
[AIAA PAPER 85-0736] p 515 A85-30369

Impact of fuselage incidence on the supersonic aerodynamics of two fighter configurations
p 473 A85-32590

Experimental investigation of a simulated compressor airfoil trailing-edge flowfield p 474 A85-32618

Refinement of an 'alternate' method for measuring heating rates in hypersonic wind tunnels
p 516 A85-32625

Design and performance of a fixed, nonaccelerating guide vane cascade that operates over an inlet flow angle range of 60 deg
[ASME PAPER 84-GT-75] p 475 A85-32964

Airloads on bluff bodies, with application to the rotor-induced downloads on tilt-rotor aircraft
p 544 A85-33469

Rotor/body aerodynamic interactions
p 544 A85-33473

Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurised low-speed wind tunnel p 592 A85-34999

On the effect of wing taper and sweep direction on leading edge transition p 545 A85-35000

Comparison of inviscid and viscous computations with an interferometrically measured transonic flow
p 545 A85-35129

Optical interferometry in fluid dynamics research
p 599 A85-35203

Design parameters for flow energizers — of general aviation aircraft p 547 A85-35582

An investigation of the tabbed vortex flap
p 547 A85-35583

Axisymmetric bluff-body drag reduction through geometrical modification p 548 A85-35587

The perfection and application of the flutter subcritical response analytical method p 573 A85-35748

Wall-interference calculation of wind tunnel with octagonal sections using conformal mapping method
p 592 A85-35750

A cryogenic high-Reynolds number transonic wind tunnel with pre-cooled and restricted flow p 592 A85-35752

On relaxation of transonic flows around zero-lift airfoil and convergence of self-correcting wind tunnels
p 549 A85-35757

Low-speed wind tunnel testing /2nd edition/ — Book
p 592 A85-35804

An improved procedure for calculating the aerothermodynamic properties of a vitiated air test medium
[AIAA PAPER 85-0913] p 704 A85-37583

Developments in aerothermal test techniques at the AEDC supersonic-hypersonic wind tunnels
[AIAA PAPER 85-1003] p 681 A85-37644

Transition measurements via heat-transfer instrumentation on a 0.5 bluntness 9.75-deg cone at Mach 7 with and without mass addition
[AIAA PAPER 85-1004] p 621 A85-37645

Measured and predicted vortex-induced leeward heating on a biconic at Mach 6 and 10
[AIAA PAPER 85-1061] p 621 A85-37675

Wind tunnel experiments of the high-performance rotor blades p 622 A85-38362

Wind tunnel investigation of the interaction of an airship configuration with lifting rotors
[AIAA PAPER 85-0875] p 625 A85-38790

Investigation on configurations in longitudinal direction wind-tunnel testing of forward swept wings
p 625 A85-38969

The wind tunnel investigation for obtaining rolling moment with small asymmetry p 674 A85-38970

Stability and control results for advanced turboprop aft-mount installations
[SAE PAPER 841479] p 675 A85-39059

Dynamic pressure fluctuations in the internozzle region of a twin-jet nacelle
[SAE PAPER 841540] p 627 A85-39064

A study of the thermal inertia of a thermocouple exposed to short temperature pulses at high Reynolds numbers
p 695 A85-39117

Circulation control technology applied to propulsive high lift systems
[SAE PAPER 841497] p 627 A85-39205

Aerodynamics of an aspect ratio 8 wing at low Reynolds numbers p 628 A85-39223

Experiments in dilution jet mixing - Effects of multiple rows and non-circular orifices
[AIAA PAPER 85-1104] p 664 A85-39606

Comparison of advanced turboprop installation on swept and unswept supercritical wings at transonic speeds
[AIAA PAPER 85-1264] p 630 A85-39686

The investigation of inlet/nozzle flowfield coupling using compact propulsion simulators
[AIAA PAPER 85-1284] p 651 A85-39698

Supersonic aerodynamic characteristics of elliptic cross section bodies
[AIAA PAPER 85-1607] p 713 A85-40719

Comparison of experiment and computation for a missile base region flowfield with a centered propulsive jet
[AIAA PAPER 85-1618] p 714 A85-40725

Flow simulations using Euler equations for nacelle-propeller configurations in a wind tunnel environment
[AIAA PAPER 85-1678] p 716 A85-40765

The Dynamic Data Analyzer (DDA), an aircraft aero-propulsion digital analysis tool
[AIAA PAPER 85-1212] p 779 A85-40821

A summary of an AGARD assessment of testing techniques for aircraft afterbody flows
[AIAA PAPER 85-1465] p 779 A85-40844

Ariane 4 has already 'flown' in wind-tunnels and off a simulated launch pad p 782 A85-40913

The application of cryogenics to high Reynolds number testing in wind tunnels. I - Evolution, theory, and advantages p 780 A85-41328

Flow around a circular cylinder in the first subregion of the critical range
[AIAA PAPER 85-1715] p 725 A85-41413

Transient aerodynamic characteristics of a two-dimensional airfoil during stepwise incidence variation p 731 A85-42929

Aerofoils at low Reynolds numbers - Prediction and experiment p 736 A85-42979

Thrust changes induced by ground and ceiling planes on a rotor in hover p 759 A85-43223

Wind-tunnel experimental investigation on flap spanwise blowing p 738 A85-43226

An experimental investigation on location of boundary layer transition on the NACA 0012 using surface hot film gages p 738 A85-43231

Low-speed experimental study of the vortex flow effects of a fighter forebody having unconventional cross-section
[AIAA PAPER 85-1798] p 813 A85-43851

Wind-tunnel investigation of the aerodynamic characteristics of the Standard Dynamics Model in coning motion at Mach 0.6
[AIAA PAPER 85-1828] p 814 A85-43869

Rotary-balance experiments on a modern fighter aircraft configuration at high Reynolds numbers
[AIAA PAPER 85-1829] p 848 A85-43870

Capabilities of the high speed anechoic wind tunnel at Lyon University p 848 A85-44049

Comparison of supercritical airfoil flow calculations with wind tunnel results p 816 A85-45701

Noise radiation patterns of counter-rotation and unsteadily loaded single-rotation propellers
p 882 A85-45840

An aeroelastic testing technique in a straight cascade wind-tunnel p 896 A85-47161

Active control of the buffeting response on a large modern civil airplane configuration in wind tunnel
[ONERA, TP NO. 1985-26] p 893 A85-47253

Is any free flight/wind tunnel equivalence concept valid for unsteady viscous flow? p 871 A85-49136

Effects caused by small discrete two-dimensional roughness elements immersed in turbulent boundary layers p 908 A85-49351

The aerodynamic characteristics of a GU25-5(11)8 aerofoil for low Reynolds numbers p 873 A85-49874

Transonic wing and far field test data on a high aspect ratio transport wing for three dimensional computational method evaluation p 19 N85-10021

Pressure distributions measured on research wing M100 mounted on an axisymmetric body p 11 N85-10023

Pressure distributions measured on research wing M86 mounted on an axisymmetric body p 11 N85-10024

DFVLR rotorcraft: Construction and engineering
[NASA-TM-77740] p 19 N85-10035

Results of tests of advanced flexible insulation vortex and flow environments in the North American Aerodynamics Laboratory lowspeed wind tunnel using 0.0405-scale Space Shuttle Orbiter model 16-0 (test OA-309)
[NASA-CR-167692] p 39 N85-10096

Data input, processing and presentation — helicopter rotor balance measurement
[NASA-TM-77739] p 96 N85-10856

Design and wind tunnel evaluation of a symmetric airfoil series for large wind turbine applications
[NASA-CR-174764] p 12 N85-10919

Results of winglet development studies for DC-10 derivatives
[NASA-CR-3677] p 22 N85-10936

Analysis of noise measured from a propeller in a wake
[NASA-TP-2358] p 65 N85-11788

Wall interference measurements for three-dimensional models in transonic wind tunnels: Experimental difficulties p 82 N85-12012

Survey of ONERA activities on adaptive-wall applications and computation of residual corrections
p 82 N85-12013

Assessment of lift- and blockage-induced wall interference in a three-dimensional adaptive-wall tunnel
p 83 N85-12016

Wind tunnel wall interference correction for aircraft models p 84 N85-12029

Determination of equivalent model geometry for tunnel wall interference assessment/correction
p 85 N85-12031

Laser anemometer study of separated flow on wing profiles
[ISL-CO-214/83] p 88 N85-12872

Singularity model for the analysis of wall interference in closed wind tunnels according to the wall pressure signature method (blockage and lift)
[FW-FO-1612] p 88 N85-12874

Wall influence corrections in wind tunnels: Blockage correction according to the wall pressure signature method
[FW-FO-1613] p 88 N85-12875

Parametric determination of blockage interference of 3-dimensional models in the Emmen Federal Aircraft works transonic tunnel (Switzerland)
[FW-FO-1636] p 88 N85-12876

Investigations of boundary layers in the Emmen Federal Aircraft works transonic tunnel, Switzerland
[FW-FO-1641] p 88 N85-12877

Comparative flow calculation on transonic cone/cylinder standard models in connection with the wall interference problem
[FW-FO-1689] p 88 N85-12878

Flight and wind-tunnel comparisons of the inlet-airframe interaction of the F-15 airplane
[NASA-TP-2374] p 105 N85-12884

Evaluation of the Langley 4- by 7-meter tunnel for propeller noise measurements
[NASA-TM-85721] p 136 N85-13553

Static internal performance of single-expansion-ramp nozzles with various combinations of internal geometric parameters
[NASA-TM-86270] p 147 N85-14797

A preliminary study of using a strain-gauged balance and parameter estimation techniques for the determination of aerodynamic forces on a model in a very short duration wind tunnel
[AD-A146473] p 190 N85-15145

Analytical modeling of circuit aerodynamics in the new NASA Lewis wind tunnel
[NASA-TM-86912] p 234 N85-15688

Aileron effectiveness for a subsonic transport model with a high-aspect-ratio supercritical wing
[NASA-TM-85674] p 235 N85-15695

The UH-1H helicopter icing flight test program: An overview
[NASA-TM-86925] p 242 N85-15702

Installed nacelle drag-improvement tests of an M = 0.8 turboprop transport configuration
[NASA-TM-84302] p 255 N85-15716

Analytical and physical modeling program for the NASA Lewis Research Center's Altitude Wind Tunnel (AWT)
[NASA-TM-86919] p 276 N85-15757

The NASA Altitude Wind Tunnel (AWT): Its role in advanced icing research and development
[NASA-TM-86920] p 276 N85-15758

Stereo Electro-optical Tracking System (SETS)
[NASA-CR-172471] p 295 N85-16098

Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurized low-speed wind tunnel p 236 N85-16773

Results of S5 CH tests with an ARL (Aerospace Research Laboratory) cascade
[NASA-TM-77510] p 278 N85-16882

Corrections for attached sidewall boundary-layer effects in 2-dimensional airfoil testing
[NASA-CR-3873] p 326 N85-17997

Effect of jet exit vanes on flow pulsations in an open-jet wind tunnel
[NASA-TM-86299] p 329 N85-17999

Subsonic and transonic pressure measurements on a high-aspect-ratio supercritical-wing model with oscillating control surfaces
[NASA-TM-83201] p 327 N85-18004

The Altitude Wind Tunnel (AWT): A unique facility for propulsion system and adverse weather testing
[NASA-TM-86921] p 380 N85-18067

Static internal performance of a two-dimensional convergent nozzle with thrust-vectoring capability up to 60 deg
[NASA-TP-2391] p 328 N85-18951

Unsteady transonic pressure measurements on a semispan wind-tunnel model of a transport-type supercritical wing (Lann model). Part 2: Pressure distributions (plotted) and plots of the vibration modes
[AD-A130488] p 330 N85-18965

Low-speed wind tunnel tests of the NAL fan-jet STOL research aircraft model with ground simulation by tangential blowing
[NAL-TR-828] p 345 N85-18876

Fluctuating pressures on fan blades of a turbofan engine, flight test investigation
[NASA-TP-2381] p 378 N85-19790

Wind-tunnel investigation of a full-scale canard-configured general aviation airplane
[NASA-TP-2382] p 395 N85-19925

Flight mechanics analysis of dynamic derivatives of the Dornier variable wind tunnel model
[ESA-TT-854] p 395 N85-19937

Unsteady aerodynamic characterization of a military aircraft in vertical gusts
[NASA-TM-77810] p 396 N85-21110

Measured unsteady transonic aerodynamic characteristics of an elastic supercritical wing with an oscillating control surface
[NASA-TM-86376] p 398 N85-21116

Unsteady transonic pressure measurements on a semi-span wind-tunnel model of a transport-type supercritical wing (Lann model). Part 2: Pressure distributions (plotted) and plots of the vibration modes
[AD-A130488] p 449 N85-21579

Exploratory flutter test in a cryogenic wind tunnel
[NASA-TM-86380] p 451 N85-21689

Further comparison of wind tunnel and airplane acoustic data for advanced design high speed propeller models
[NASA-TM-86935] p 460 N85-22108

Dynamic wind tunnel testing for active control research p 514 N85-22352

Dynamic wind-tunnel testing of active controls by the NASA Langley Research Center p 514 N85-22353

Effects of leading-edge devices on the low-speed aerodynamic characteristics of a highly-swept arrow-wing
[NASA-CR-172531] p 476 N85-22365

Investigations into the effects of scale and compressibility on lift and drag in the RAE 5m pressurized low-speed wind tunnel
[RAE-TM-AERO-2006] p 477 N85-22372

Cryogenic wind tunnels: A selected annotated bibliography
[NASA-TM-86346] p 516 N85-22401

CARD's low-speed wind tunnel described

Experiments suitable for wind tunnel wall interference assessment/correction p 83 N85-12021

Asymptotic methods for wind tunnel wall corrections at transonic speed p 84 N85-12022

Effect of boundary layers on solid walls in three-dimensional subsonic wind tunnels
p 84 N85-12023

Progress in wind tunnel wall interference assessment/correction procedures at the NAE
p 84 N85-12025

Tunnel constraint for a jet in crossflow
p 84 N85-12027

Interference from slotted walls p 84 N85-12028

Adaptation of a four-wall interference assessment/correction procedure for airfoil tests in the 0.3-m TCT p 85 N85-12035

Singularity model for the analysis of wall interference in closed wind tunnels according to the wall pressure signature method (blockage and lift)
[FW-FO-1612] p 88 N85-12874

Wall influence corrections in wind tunnels: Blockage correction according to the wall pressure signature method
[FW-FO-1613] p 88 N85-12875

Parametric determination of blockage interference of 3-dimensional models in the Emmen Federal Aircraft works transonic tunnel (Switzerland)
[FW-FO-1636] p 88 N85-12876

A local slot boundary condition for transonic flow calculations in slotted-wall test sections of wind tunnels
[FFA-TN-1984-34] p 88 N85-12879

Wall interference estimation of the NAL's two-dimensional wind tunnel
[NAL-TR-829] p 361 N85-18992

Aerodynamic behavior of ventilated wind tunnel walls
p 476 N85-22363

Unsteady gas dynamics problems related to flight vehicles
[AD-A151187] p 558 N85-25218

Wind tunnel wall interference
[AD-A151212] p 593 N85-25273

A curved test section for research on transonic shock wave-boundary layer interaction
[VTH-LR-414] p 561 N85-26682

Adaptive wall wind tunnels and wall interference correction methods
[DFVLR-IB-222-84-A-37] p 683 N85-27912

Effect of ground and/or ceiling planes on thrust of rotors in hover
[NASA-TM-86754] p 743 N85-31014

**WIND TUNNELS**

Analytical and physical modeling program for the NASA Lewis Research Center's Altitude Wind Tunnel (AWT)
[AIAA PAPER 85-0379] p 275 A85-19709

The development and use of free piston wind tunnels
p 368 A85-25455

Impact of computational fluid dynamics on development test facilities p 439 A85-26754

Wind-tunnel technology for the development of future commercial aircraft
[DGLR PAPER 84-127] p 778 A85-40340

Capabilities of the high speed anechoic wind tunnel at Lyon University p 848 A85-44049

Investigations of boundary layers in the Emmen Federal Aircraft works transonic tunnel, Switzerland
[FW-FO-1641] p 88 N85-12877

Evaluation of the Langley 4- by 7-meter tunnel for propeller noise measurements
[NASA-TM-85721] p 136 N85-13553

Sources, paths, and concepts for reduction of noise in the test section of the NASA Langley 4x7m wind tunnel
[NASA-CR-172446-VOL-1] p 197 N55-14666

Comparison of options for reduction of noise in the test section of the NASA Langley 4x7m wind tunnel, including reduction of nozzle area
[NASA-CR-172446-VOL-2] p 197 N85-14667

Ultrasound instrumentation for the 7 inch Mach seven tunnel
[NASA-CR-174277] p 305 N85-16586

On relaxation of transonic flows around zero-lift airfoils and convergence of self-correcting wing tunnels
p 396 N85-20214

The ONERA establishment at Cannes in the service of aeronautical research
[ESA-TT-875] p 593 N85-25276

Vapor-screen technique for flow visualization in the Langley Unitary Plan Wind Tunnel
[NASA-TM-86384] p 740 N85-29929

Practical aspects of laser holographic interferometry in wind tunnels
[NASA-TM-86788] p 911 N85-34378

Langley aeronautics and space test highlights, 1984
[NASA-TM-87565] p 920 N85-35151

**WIND TURBINES**

Design and development of a pultruded FRP laminate to replace aluminum shape in a high stress high fatigue application p 119 A85-15629

On matching among wind turbines, loads and sites
p 374 A85-24090

Streamtube expansion effects on the Darreus wind turbine p 451 A85-27098

The effects of non-coherence on energy extraction from a turbulent wind p 451 A85-27344

A note on tower wake/blade interaction noise of a wind turbine p 470 A85-30773

Some considerations on Aeroelastic instabilities caused by coupling between propeller-type rotor and its supporting structure
[NAL-TR-804] p 9 N85-10013

Design and wind tunnel evaluation of a symmetric airfoil series for large wind turbine applications
[NASA-CR-174764] p 12 N85-10919

Tailored airfoils for vertical axis wind turbines
[DE85-004628] p 399 N85-21128

NASTRAN-based software for the structural dynamic analysis of vertical and horizontal axis wind turbines
[DE85-001712] p 605 N85-25911

Field test report of the Department of Energy's 100-kW vertical axis wind turbine
[DE85-008475] p 702 N85-28458

A 5-year research plan, 1985-1990. Wind energy technology: Generating power from the wind
[DE85-008427] p 702 N85-28463

Wake effects on the aerodynamic performance of horizontal axis wind turbines
[NASA-CR-174920] p 702 N85-29364

Reflection plane tests of a wind turbine blade tip section with ailerons
[NASA-TM-87018] p 912 N85-34444

**WIND VANES**

R and D activities of the Systems Engineering Division p 808 N85-32027

**WIND VELOCITY**

On matching among wind turbines, loads and sites p 374 A85-24090

Aircraft and Doppler air motion comparisons in a JAWS microburst p 453 A85-28775

Optimization of averaging intervals of wind velocity for meteorological services to aviation p 453 A85-28956

Design considerations for high-altitude, long-endurance, microwave-powered aircraft
[NASA-TM-86403] p 501 N85-23751

Comparison of wind velocity in thunderstorms determined from measurements by a ground-based Doppler radar and an F-106B airplane
[NASA-TM-86346] p 565 N85-26687

Formulation and implementation of nonstationary adaptive estimation algorithm with applications to air-data reconstruction
[NASA-TM-86727] p 577 N85-26899

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 1
[NASA-CR-167862] p 913 N85-35534

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 2
[NASA-CR-167863] p 913 N85-35535

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 3
[NASA-CR-167864] p 913 N85-35536

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning, volume 4
[NASA-CR-167865] p 913 N85-35537

Comparative analysis of operational forecasts versus actual weather conditions in airline flight planning: Summary report
[NASA-CR-167866] p 913 N85-35538

**WIND VELOCITY MEASUREMENT**

Comparisons of lidar and radar wind measurements made during the JAWS experiment — Joint Airport Weather Study p 452 A85-28770

Electra vertical air motions in summer MONEX - Using the aircraft as an air motion sensor and notification of a data labeling error p 800 A85-42173

Recent methods for calibrating the anemometry of helicopters at low speeds p 260 N85-16609

The use of pressure sensing taps on the aircraft wing as sensor for flight control systems p 606 N85-26680

Aerodynamic measurement of the wind flow in the number two section of the SIMA wind tunnel
[ONERA-PV-1/8135-GY] p 743 N85-31019

Control variables in vertical wind determination using simple flight-mechanical equations p 914 N85-35546

The principles of wind measurement with the help of aircraft p 916 N85-35558

**WINDOWS (APERTURES)**

Redesign of airplane windows due to environmental crazing of acrylic p 341 A85-26306

**WINDPOWER UTILIZATION**

On matching among wind turbines, loads and sites p 374 A85-24090

The effects of non-coherence on energy extraction from a turbulent wind p 451 A85-27344

The properties of isolated and coupled Savonius rotors p 451 A85-27346

Field test report of the Department of Energy's 100-kW vertical axis wind turbine
[DE85-008475] p 702 N85-28458

A 5-year research plan, 1985-1990. Wind energy technology: Generating power from the wind
[DE85-008427] p 702 N85-28463

R and D programmes at the National Aeronautical Laboratory
[AR-22] p 807 N85-32022

**WINDPOWERED GENERATORS**

Field test report of the Department of Energy's 100-kW vertical axis wind turbine
[DE85-008475] p 702 N85-28458

**WINDSHIELDS**

Impact fracture of thermally tempered glass helicopter windshields
[ACS PAPER 41-G-83F] p 363 A85-25084

Three dimensional nonlinear dynamic finite element analysis for the response of a thick laminated shell to impact loads
[AIAA PAPER 85-0713] p 491 A85-30361

Method for measuring haze in transparencies
[AD-D011233] p 65 N85-10823

Evaluation of the birdstrike threat to the F-15 present fleet, rapid deployment force, and dual role fighter transparencies
[AD-A148954] p 334 N85-18966

Avoiding serious bird strike incidents
[AD-P004178] p 402 N85-19940

1983 Air Force bird strikes
[AD-P004182] p 403 N85-19944

Bird impact evaluation of the F/RF-4 transparency system p 403 N85-19949

The measurement of aircraft windscreen haze and its effect on visual performance
[AD-A154949] p 829 N85-32114

**WING CAMBER**

The influence of camber variation on the aerodynamics of civil transport aircraft
[AIAA PAPER 85-0353] p 220 A85-19691

MBB studies variable camber wings to improve lift, expand fleet uniformity p 474 A85-32799

AFTI MAW - Wing of the future — Advanced Fighter Technology Integrator flight test program for Mission Adaptive Wing concept
[SAWE PAPER 1617] p 883 A85-49921

Automatic flight control modes for the AFTI/F-111 mission adaptive wing aircraft p 680 N85-27909

**WING FLAPS**

Jet and wing/flap interaction noise
[AIAA PAPER 84-2362] p 64 A85-10896

Electronic control and monitoring of aircraft secondary flying controls p 156 A85-17324

An investigation of the tabbed vortex flap p 547 A85-35583

Force and moment measurements on a 74 deg delta wing with an apex flap
[NASA-CR-166081] p 12 N85-10918

Recent progress of development and understanding of high lift systems p 236 N85-16772

Analysis of transonic aerodynamic characteristics for a supercritical airfoil oscillating in heave, pitch and with oscillating flap p 554 N85-25175

Airfoil wing with flap
[CH-634787-A5] p 574 N85-25243

Simulator study of the stall departure characteristics of a light general aviation airplane with and without a wing-leading-edge modification
[NASA-TM-86309] p 574 N85-25250

**WING FLOW METHOD TESTS**

Airfoil trailing edge flow measurements and comparison with theory, incorporating open wind tunnel corrections
[AIAA PAPER 84-2266] p 4 A85-10831

Study of delta wing characteristics as a fan blade model. I - Visualization of three-dimensional flow by smoke wire method p 144 A85-18527

Three-dimensional effects on a pitching lifting surface
[AIAA PAPER 85-0041] p 208 A85-19476

Vortex research facility improvements and preliminary density stratification effects on vortex wakes
[AIAA PAPER 85-0050] p 209 A85-19482

Free surface scars and striations due to trailing vortices generated by a submerged lifting surface
[AIAA PAPER 85-0445] p 286 A85-19754

Visualization of the spanwise vortex structure in the starting flow behind an airfoil
[AIAA PAPER 85-0447] p 224 A85-19756

Flight testing of a wing section with laminar flow control p 233 A85-22227

Wing-in-ground effect aerodynamic predictions using PANAIR
[AIAA PAPER 84-2429] p 322 A85-26321

Euler solutions of transonic vortex flows around the Dillner wing p 392 A85-29261

Transonic calculations for a flexible supercritical wing and comparison with experiment
[AIAA PAPER 85-0665] p 470 A85-30407

Study of flow field in the near wake of delta wings p 472 A85-31753

Determination of forward edge eddies in delta wings p 547 A85-35260

Aerodynamic characteristics of the Weis-Fogh mechanism p 623 A85-38370

Vortex flow visualization studies of a strake-wing in water tunnel p 904 A85-47131

Flow visualization study of a vortex-wing interaction
[NASA-TM-86656] p 86 N85-12040

Transition fixing on wings in industrial wind tunnels and associated problems p 480 N85-23717

Transonic calculations for a flexible supercritical wing and comparison with experiment
[NASA-TM-86439] p 742 N85-31012

**WING LOADING**

A kernel function method for computing unsteady load on three-dimensional wings in transonic flow p 7 A85-12355

The influence of leading-edge load alleviation on supersonic wing design p 144 A85-18515

Optimization of airplane wing structures under landing loads p 252 A85-22005

Nonplanar doublet lattices — for lifting surfaces p 385 A85-26765

Estimating the weight of generally configured dual wing systems
[AIAA PAPER 85-0641] p 490 A85-30244

A description of Helix and Felix, standard fatigue loading sequences for helicopters, and of related fatigue tests used to assess them p 570 A85-33470

Calculation of the flow around thick wings with separation vortices p 550 A85-35769

Strength analysis of aircraft — Russian book p 757 A85-42124

Design and microprocessor implementation of an integrated load alleviation-pitch manoeuvre flight controller for relaxed stability aircraft p 840 A85-45052

Wing span loads of complex high-lift systems from wake measurements p 817 A85-45850

Design of a digital ride quality augmentation system for commuter aircraft
[NASA-CR-172419] p 20 N85-10037

Numerical simulation of the subsonic wing-rock phenomenon p 116 N85-12064

Crack resistance of pressed and rolled semifinished goods of aluminum alloys used in load-bearing aircraft wing structures p 120 N85-12245

Flight test technique for evaluation of gust load alleviation analysis methodology
[NASA-TM-86344] p 161 N85-14833

Structural load measurements on a Northrop NF-5A p 253 N85-15667

Downwash in the plane of symmetry of an elliptically loaded wing
[NASA-TP-2414] p 235 N85-15693

**WING NACELLE CONFIGURATIONS**

Numerical simulation of the transonic flowfield for wing/nacelle configurations
[AIAA PAPER 84-2430] p 76 A85-13964

The accuracy of trials with powered 1/2 models in the S2MA wind tunnel
[ONERA, TP NO. 1984-156] p 272 A85-19270

Aerodynamic test results for a wing-mounted turboprop propulsion installation
[SAE PAPER 841480] p 627 A85-39060

Unsteady aerodynamic forces induced by aeroelastic vibrations of a turbojet engine in a nacelle
[ONERA, TP NO. 1985-58] p 880 A85-47302

Installed nacelle drag-improvement tests of an M = 0.8 turboprop transport configuration
[NASA-TM-84302] p 255 N85-15716

Nacelle/pylon/wing integration on a transport model with a natural laminar flow nacelle
[NASA-TP-2439] p 740 N85-29924

**WING OSCILLATIONS**

Propulsive efficiency of vibrating bodies in a subsonic gas flow p 2 A85-10111

Two dimensional blade-vortex interaction flow visualization study
[AIAA PAPER 84-2307] p 4 A85-10858

Pressure distributions around an airfoil placed in a periodically fluctuating air flow. I - A flat plate approximation p 5 A85-10970

Bending effects on structural dynamic instabilities of transonic wings p 51 A85-11967

Model test and parameter identification of a flutter wing model with external missiles p 51 A85-12363

High frequency properties in the unsteady linearised potential flow of a compressible fluid p 78 A85-14852

Hypersonic large-deflection similitude for oscillating delta wings p 78 A85-14853

Dynamic edge effects during the aeroelastic vibration of plates p 124 A85-15248

Lift hysteresis of an oscillating slender ellipse p 80 A85-15332

Active control of buffeting on a modern transport-aircraft wing configuration in a wind tunnel
[ONERA, TP NO. 1984-131] p 116 A85-15847

Propulsive efficiency of an oscillating cylinder in supersonic flow p 140 A85-16181

Numerical study on the dynamic stall process of a NACA 0012 airfoil
[AIAA PAPER 85-0128] p 212 A85-19539

Interrelated effects of pitch rate and pivot point on airfoil dynamic stall
[AIAA PAPER 85-0130] p 212 A85-19541

Three-dimensionality in unsteady flow about a wing
[AIAA PAPER 85-0132] p 212 A85-19543

Subsonic wing rock of slender delta wings
[AIAA PAPER 85-0198] p 214 A85-19582

Theory of wing rock
[AIAA PAPER 85-0199] p 268 A85-19583

Harmonic oscillations of a rectangular wing with a circulation variable over the span p 231 A85-21656

Vibration tailoring of advanced composite lifting surfaces p 290 A85-21846

Calculation of the hydrodynamic characteristics of polyplanes p 290 A85-22113

Unsteady aerodynamics of oscillating airfoils with inplane motions p 314 A85-23148

Subsonic wing rock of slender delta wings p 385 A85-26760

Unsteady laminar boundary-layer separation on oscillating configurations p 391 A85-29089

The theory of oscillating thick wings in subsonic flow Lifting line theory p 393 A85-29992

Lifting surface approach of oscillating wings in weak shear flow p 394 A85-30201

Flutter and divergence boundary prediction from nonstationary random responses at increasing flow speeds
[AIAA PAPER 85-0691] p 523 A85-30357

Active vibration suppression of a cantilever wing p 497 A85-32344

A locally linearized panel method for transubsonic flow past an oscillating wing p 549 A85-35755

Nonequilibrium supersonic flows past oscillating 2-D lifting surfaces and thin elastic bodies p 618 A85-37197

A study on the method for solving the equation of subsonic oscillatory lifting-surface theory. IV - Computer program SOLST 1 p 622 A85-38355

Stability of the thin-jet model of the unsteady jet flap p 626 A85-38997

Numerical calculation of unsteady transonic potential flow over three-dimensional wings p 723 A85-40988

Unsteady, separated flow p 791 A85-40989

The status of flutter suppression technology using active controls p 775 A85-40995

Measurements of canard-induced roll oscillations
[AIAA PAPER 85-1830] p 839 A85-43871

Active aeroelastic oscillation control on the F/A-18 aircraft
[AIAA PAPER 85-1858] p 843 A85-45887

A second order adaptive controller for wing flutter control
[AIAA PAPER 85-1965] p 828 A85-45949

Some results of experimental and analytical buffeting investigations on a delta wing
[ONERA, TP NO. 1985-59] p 868 A85-47262

Theory of wing rock p 895 A85-49139

Unsteady lifting-line theory as a singular-perturbation problem p 871 A85-49353

Analysis of asymmetric natural vibrations of an aeroplane with moving deformable control surfaces p 883 A85-49672

Graphics software for the display of body deformation motion
[FW-FO-1640] p 106 N85-12888

Propulsive efficiency of vibrating wing in supersonic flow p 146 N85-14656

Wing rock flow phenomena
[AD-P004154] p 323 N85-17939

Transonic steady- and unsteady-pressure measurements on a high-aspect-ratio supercritical-wing model with oscillating control surfaces
[NASA-TM-81888] p 327 N85-18003

A locally linearized panel method for tran-/subsonic flow past an oscillating wing p 396 N85-20212

Oscillating airfoils and their wake
[NASA-TM-77831] p 478 N85-23701

Transonic Unsteady Aerodynamics and its Aeroelastic Applications
[AGARD-CP-374] p 542 N85-25171

Analysis of transonic aerodynamic characteristics for a supercritical airfoil oscillating in heave, pitch and with oscillating flap p 554 N85-25175

Calculation of harmonic aerodynamic forces of aerofoils and wings from the Euler equations p 554 N85-25177

A semi-empirical unsteady transonic method with supersonic free stream p 555 N85-25179

Application of time-linearized methods to oscillating wings in transonic flow and flutter p 585 N85-25182

The development of unsteady transonic 3-D full potential code and its aeroelastic applications p 555 N85-25187

Propulsion efficiency of vibrating bodies in subsonic gas stream p 699 N85-28159

Data set 9: LANN wing. Pitching oscillation p 744 N85-31030

**WING PANELS**

Magnaweave shapes for aircraft - Integrally woven wing sections, stiffened shear panels, and others p 71 A85-15959

A summary of NASA's research on the fluid ice protection system
[AIAA PAPER 85-0467] p 241 A85-19768

Experimental investigation on advanced composite stiffened structures under uniaxial compression and bending
[AIAA PAPER 85-0674] p 518 A85-30259

Design of a CFRP-wing for the alpha-jet major panel tests
[AIAA PAPER 85-0725] p 490 A85-30278

Flutter analysis of cantilevered quadrilateral plates p 600 A85-35296

A program for computerized structural resizing of aircraft structure subject to strength and local panel buckling criteria under multiple loading p 693 A85-37187

Contour assessment of formed wing panels
[SAE PAPER 850884] p 886 A85-50131

**WING PLANFORMS**

Method for calculating separated subsonic gas flow past wings p 2 A85-10114

Improvement and extension of a computational method for three-dimensional transonic flows
[ONERA, TP NO. 1984-99] p 8 A85-12620

Some effects of sweep direction and strakes for wings with sharp leading edges p 78 A85-14851

The joined wing - An overview — aircraft tandem wings in diamond configurations
[AIAA PAPER 85-0274] p 247 A85-19626

An attached flow design of a noninterfering leading edge extension to a thick delta wing
[AIAA PAPER 85-0350] p 220 A85-19689

Effect of wing nose shape on the flow in a wing/body junction p 316 A85-24203

'Phoenix' - A polyester-film inflatable man-powered aircraft
[SAE PAPER 840028] p 342 A85-26312

Impact of fuselage incidence on the supersonic aerodynamics of two fighter configurations p 473 A85-32590

Calculation of nonlinear subsonic characteristics of wings with thickness and camber at high incidence p 545 A85-35126

Theoretical considerations in the aerodynamic effectiveness of winglets p 628 A85-39224

A method for estimating the rolling moment due to spin rate for arbitrary planform wings
[NASA-TM-86365] p 357 N85-18990

Calculation of the flow around thick wings with separation vortices p 400 N85-21424

Supersonic aerodynamic characteristics of canard, tailless, and aft-tail configurations for 2 wing planforms
[NASA-TP-2434] p 634 N85-27822

Some effects of sweep direction and strakes for wings with sharp leading edges
[CA-8421] p 634 N85-27826

A method to calculate the parameters of wings of arbitrary planform
[AD-A152689] p 635 N85-27831

**WING PROFILES**

Wing design for minimum drag with practical constraints p 18 A85-11983

Finite element calculation of potential flow around wings
[ONERA, TP NO. 1984-68] p 7 A85-12603

Measurements of water film characteristics on airfoil surfaces from wind-tunnel tests with simulated heavy rain
[AIAA PAPER 85-0259] p 274 A85-19618

Effects of covering configurations on ultralight wing aerodynamics
[AIAA PAPER 85-0277] p 217 A85-19629

Body flow field simulation and force/moment prediction at transonic speeds
[AIAA PAPER 85-0423] p 222 A85-19738

Numerical optimization design of advanced transonic wing configurations
[AIAA PAPER 85-0424] p 248 A85-19739

Computational aerodynamic design of the Gulfstream IV wing
[AIAA PAPER 85-0427] p 223 A85-19742

Split-flux-vector solutions of the Euler equations for three-dimensional configurations
[AIAA PAPER 85-0434] p 223 A85-19747

Extremum problem concerning a wing with a maximum gradient of lift force p 234 A85-22370

A special boundary element technique in transonic flow p 385 A85-26690

Using the discrete vortex method for calculating potential flow past a high-lift wing in the presence of a screen p 471 A85-31456

A numerical analysis of the aerodynamic properties of wings using a minicomputer p 472 A85-31777

Aerodynamic properties of some flexible profiles p 473 A85-32506

Aerodynamic canard/wing parametric analysis for general-aviation applications p 473 A85-32587

MBB studies variable camber wings to improve lift, expand fleet uniformity p 474 A85-32799

Scale-model tests of airfoils in simulated heavy rain p 548 A85-35590

Calculation of the flow around thick wings with separation vortices p 550 A85-35769

The aerodynamical calculation of the wing section with separation p 551 A85-35784

Development in UK rotor blade technology p 615 A85-38236

Diffraction of a single plane wave by a conical wing p 623 A85-38483

The isolated nature of solutions with a strong attached shock wave at the edges of a conical wing and a wedge p 623 A85-38488

Numerical solution of transonic wing flows using an Euler/Navier-Stokes zonal approach
[AIAA PAPER 85-1640] p 715 A85-40742

Simulation of wing, fuselage, and wing/fuselage flowfields using a three-dimensional Euler/Navier-Stokes algorithm
[AIAA PAPER 85-1693] p 718 A85-40775

Vortex trajectories and breakdown on wing-canard configurations p 731 A85-42926

Iterative three-dimensional transonic wing design using integral equations p 731 A85-42928

Transient aerodynamic characteristics of a two-dimensional airfoil during stepwise incidence variation p 731 A85-42929

Application of the method of quasi-continuous vorticity distribution over the skeleton surface for aeroplane wing design p 738 A85-43053

Computational aerodynamic design of the Gulfstream IV wing p 817 A85-45843

Analytical solutions for unsteady Prandtl-Meyer flow p 873 A85-49710

AFTI MAW - Wing of the future — Advanced Fighter Technology Integrator flight test program for Mission Adaptive Wing concept
[SAWE PAPER 1617] p 883 A85-49921

Laser anemometer study of separated flow on wing profiles
[ISL-CO-214/83] p 88 N85-12872

Manufacturing report of an augmented lift, variable deflection half wing
[ONERA-RT-25/1736-AY-108-A] p 138 N85-13766

Integrated technology wing study (oral presentation)
[NASA-CR-169497] p 256 N85-15718

Transition fixing in the high speed range for the development of civil aircraft wings p 480 N85-23716

The influence of transition strips on the pressure distribution on transonic profiles p 480 N85-23718

Investigation of the conditions for tripping transition with roughness elements and their influence on boundary layer development p 480 N85-23720

Studies on the interference of wings and propeller slipstreams
[NASA-CR-175753] p 557 N85-25210

Unsteady transonic flow calculations for interfering lifting surface configurations
[NASA-TM-86432] p 741 N85-29931

Low-speed tests of a high-aspect-ratio, supercritical-wing transport model equipped with a high-lift flap system in the Langley 4- by 7-meter and Ames 12-foot pressure tunnels
[NASA-TP-2097] p 742 N85-31010

Design of a basic airfoil for a slightly swept wing. Part 1: Theoretical transonic airfoil design
[ESA-TT-892] p 761 N85-31054

**WING ROOTS**

Optimum design of nonplanar wings: Minimum induced drag for a given lift and wing root bending moment
[NAL-TR-797] p 9 N85-10011

**WING SPAN**

New tricks for cutting drag p 143 A85-18434

Effect of a wing-tip mounted pusher turboprop on the aerodynamic characteristics of a semi-span wing
[AIAA PAPER 85-1286] p 631 A85-39700

Integrated technology wing study (oral presentation)
[NASA-CR-169497] p 256 N85-15718

**WING TANKS**

Fuel containment and damage tolerance in large composite primary aircraft structures
[NASA-CR-166083] p 787 N85-30032

**WING TIP VORTICES**

Comparison of experimental and analytical predictions of rotor blade-vortex interactions using model scale acoustic data
[AIAA PAPER 84-2269] p 58 A85-10833

Airfoil tip vortex formation noise
[AIAA PAPER 84-2308] p 60 A85-10859

New tricks for cutting drag p 143 A85-18434

Interaction of a turbulent vortex with a lifting surface
[AIAA PAPER 85-0004] p 206 A85-19452

Numerical study on the dynamic stall process of a NACA 0012 airfoil
[AIAA PAPER 85-0126] p 212 A85-19539

Circulation around thick wings with free vortices -- German thesis p 227 A85-19648

Generalized wake geometry for a helicopter in forward flight and effect of wake deformation on airloads
p 472 A85-31986

Large CYBER 205 model of the Euler equations for vortex-stretched turbulent flow around delta wings
p 553 A85-36675

Effect of a wing-tip mounted pusher turboprop on the aerodynamic characteristics of a semi-span wing
[AIAA PAPER 85-1286] p 631 A85-39700

Wide-field shadowgraph flow visualization of tip vortices generated by a helicopter rotor
[AIAA PAPER 85-1557] p 710 A85-40682

Computation of the tip vortex off a low-aspect-ratio wing p 730 A85-42352

Prediction of aerodynamic characteristics of fighter wings at high angles of attack
[AD-A145107] p 10 N85-10017

Aerodynamic improvements by discrete wing tip jets
[AD-A148981] p 330 N85-18964

Investigation of the Vortex Tab
[NASA-CR-172586] p 557 N85-25209

Interaction of a turbulent vortex with a lifting surface
p 557 N85-25214

**WING TIPS**

Modular potential flow computation including fuselage and wing tip effects p 75 A85-13677

Wing tip sails which give lower drag at all normal flight speeds p 79 A85-14854

Analysis of counter-rotating propeller performance
[AIAA PAPER 85-0005] p 262 A85-19453

Development in UK rotor blade technology
p 615 A85-38236

A flow visualization study of the effect of wing-tip jets on wake vortex development p 867 A85-47129

Integrated technology wing study (oral presentation)
[NASA-CR-169497] p 256 N85-15718

Determination of corrections to flow direction measurements obtained with a wing-tip mounted sensor
[NASA-CR-174412] p 329 N85-18962

Exploratory wind-tunnel investigation of a wingtip-mounted vortex turbine for vortex energy recovery
[NASA-TP-2468] p 560 N85-26667

Wingtip vortex propeller
[NASA-CASE-LAR-13019-1] p 892 N85-35194

**WINGED VEHICLES**

Crossflow drag of finite-length rectangular wing-bodies
[AIAA PAPER 85-0451] p 224 A85-19760

Waveriders p 595 A85-34193

An overview of some monoplanar missile programs
[NASA-TM-86330] p 138 N85-14786

**WINGLETS**

Computational transonic analysis of canted winglets
p 6 A85-11982

Study of winglets applied to biplanes
[AIAA PAPER 85-0279] p 217 A85-19631

Calculation of aerodynamic characteristics of winglets and experimental verification p 393 A85-29692

The effect of winglet on the spatial vortex of slender body at high angle of attack p 551 A85-35788

Winglet effects on the flutter of a twin-engine transport-type wing p 650 A85-39217

Theoretical considerations in the aerodynamic effectiveness of winglets p 628 A85-39224

Optimum design of nonplanar wings: Minimum induced drag for a given lift and wing root bending moment
[NAL-TR-797] p 9 N85-10011

Natural laminar flow airfoil design considerations for winglets on low-speed airplanes
[NASA-CR-3853] p 87 N85-12863

Flutter parametric studies of cantilevered twin-engine-transport type wing with and without winglet. Volume 1: Low-speed investigations
[NASA-CR-172410-VOL-1] p 129 N85-13269

Flutter parametric studies of cantilevered twin-engine transport type wing with and without winglet. Volume 2: Transonic and density effect investigations
[NASA-CR-172410-VOL-2] p 130 N85-13270

Study of winglets applied to biplanes
[NASA-TM-86350] p 258 N85-16862

DC-10 winglet flight evaluation
[NASA-CR-3704] p 760 N85-29949

**WINGS**

Computation of flow around wings based on the Euler equations p 142 A85-18066

Icing tunnel tests of Electro-Impulse De-Icing of an engine inlet and high-speed wings
[AIAA PAPER 85-0466] p 241 A85-20872

Wing design with attainable leading-edge thrust considerations p 411 A85-26763

Mode test of a wing pair of the HARM missile
p 415 A85-30162

Unsteady transonic flow calculations for two-dimensional canard-wing configurations with aeroelastic applications
[AIAA PAPER 85-0585] p 468 A85-30320

Influence of warpage on composite aeroelastic theories
[AIAA PAPER 85-0710] p 491 A85-30359

The contribution of Elie Carafoli to the development of the theory of wings with lateral jets p 473 A85-32501

An iteration panel method for predicting three dimensional surface pressure distribution of a wing with thickness in the subcritical steady transonic flow
p 549 A85-35749

The study on the wing leading edge vortex breakdown
p 551 A85-35791

Measurement of wing-leading-edge heating rates on wind tunnel models using the thin-film technique
[AIAA PAPER 85-0972] p 681 A85-37622

Something old, something new p 648 A85-38440

Material evaluation of second-generation composites for transport wing application
[SAE PAPER 841520] p 686 A85-39291

Giant surveillance radar squeezed into wing
p 763 A85-41052

Experimental study on the behavior of three-dimensional turbulent boundary layer induced by a straight wing erected on a flat plate p 738 A85-43227

Structure of a laminar boundary layer with distributed suction p 815 A85-44133

Acoustic emission monitoring of flaw growth in a graphite-epoxy experimental wing segment
p 907 A85-48084

Integral equation of lifting surfaces in Laplace domain and analytic continuation of its pressure kernel
[NAL-TR-795T] p 9 N85-10009

Optimum design of nonplanar wings: Minimum induced drag for a given lift and wing root bending moment
[NAL-TR-797] p 9 N85-10011

A study of lift characteristics of an upper surface blown jetwing with a rectangular nozzle p 145 N85-13767

Recent progress of development and understanding of high lift systems p 236 N85-16772

Design of an airfoil leading edge slat using an inverse aerodynamic calculation method p 256 N85-16777

Aerodynamic issues in the design of high-lift systems for transport aircraft p 256 N85-16780

An update of the Canada/USA augmentor-wing project p 257 N85-16781

Aerodynamic-structural study of canard wing, dual wing, and conventional wing systems for general aviation applications
[NASA-CR-172529] p 238 N85-16829

Theory of wing rock p 357 N85-18064

Unsteady transonic flow calculations for two-dimensional canard-wing configurations with aeroelastic applications
[NASA-TM-86375] p 329 N85-18960

Remote pivot decoupler pylon: Wing/store suppression
[NASA-CASE-LAR-13173-1] p 416 N85-19981

A locally linearized panel method for tran-/subsonic flow past an oscillating wing p 396 N85-20212

Fatigue crack propagation in mirage 1110 wing main spar specimens and the effects of spectrum truncation on life
[ARL/STRUC-R-405] p 417 N85-21152

Study for the optimization of a transport aircraft wing for maximum fuel efficiency. Volume 1: Methodology, criteria, aeroelastic model definition and results
[NASA-CR-172551] p 499 N85-22378

Some optimization problems in static aeroelasticity for wings made of composite materials p 503 N85-24104

Computation of unsteady transonic flows about two-dimensional and three-dimensional AGARD standard configurations p 555 N85-25183

The application of transonic unsteady methods for calculation of flutter airloads p 585 N85-25186

Studies on the interference of wings and propeller slipstreams
[NASA-CR-175753] p 557 N85-25210

Aircraft structure for application to training aircraft
[CH-635286-A5] p 574 N85-25244

Learjet Model 55 wing analysis with landing loads
p 604 N85-25883

Computational aerodynamics for aircraft wing design
p 578 N85-26627

A numerical design method for three-dimensional transonic wings p 577 N85-26631

Hypersonic nonequilibrium gas flow past zero-aspect wing p 562 N85-27083

Wing buffeting active control testing on a transport aircraft configuration in a large sonic windtunnel
p 679 N85-27903

Method of calculating separation flow of subsonic gas stream around wings p 636 N85-28181

Further investigations to improve the fatigue life of the Mirage 1110 wing main spar
[ARL/STRUC-TM-397] p 654 N85-28938

Gust load alleviation of a cantilevered rectangular elastic wing. Wind tunnel experiment and analysis
[NAK-TR-86] p 681 N85-28950

Application of an aerodynamic analysis method including attainable thrust estimates to low speed leading-edge flap design for supersonic cruise vehicles
[NASA-CR-165843] p 739 N85-29918

Data set 8: ZKP wing, oscillating aileron
p 744 N85-31029

Data set 9: LANN wing. Pitching oscillation
p 744 N85-31030

Vortex sheet modeling with higher order curved panels
p 797 N85-31428

R and D activities of the Structural Sciences Division
p 799 N85-32026

Aerodynamic characteristics of a distinct wing-body configuration at Mach 6: Experiment, theory, and the hypersonic isolation principle
[NASA-TP-2467] p 818 N85-33107

Aeroelastic constraints for a wing weight minimization procedure
[FFA-TN-1985-4] p 875 N85-34126

Fuel containment and damage tolerance for large composite primary aircraft structures. Phase 1: Testing
[NASA-CR-166091] p 902 N85-35241

**WIRE**

Dynamic behaviour of cold wires in heated airflows (T in the range from 300 to 600 K) p 694 A85-38069

The Bristol wire strike protection system -- helicopter wire cutter p 754 A85-40462

Electromagnetic resonances of cylinders and aircraft model with resistive wires
[NASA-CR-174203] p 192 N85-15319

Effectiveness of an overhead wire barrier in deterring gulls from feeding at a sanitary landfill
[AD-P004199] p 453 N85-19966

Investigation of the conditions for tripping transition with roughness elements and their influence on boundary layer development p 480 N85-23720

**WIRE CLOTH**

Flow around rotating and nonmoving circular cylinder near flat screen. Report 1: Aerodynamic forces in cylinder p 562 N85-27059

**WIRING**

General aviation data bus update
[AIAA PAPER 84-2637] p 164 A85-17628

Field and laboratory investigation of Kapton insulated aircraft wiring p 852 A85-45136

Reducing gull use of some attractions near airports
[AD-P004195] p 428 N85-19962

**WORK CAPACITY**

Time scheduling of a mix of 4D equipped and unequipped aircraft p 483 A85-33278

On the controllability limit of a human operator when using a Bang-Bang type controller p 804 A85-42699

**WORKING FLUIDS**

Solving the inverse problem of determining the thermodynamic properties of the working medium of gas turbine engines p 168 A85-17077

Technical Review of the Solid Particle Receiver Program
[DE84-015181] p 56 N85-10451

**WORKLOADS (PSYCHOPHYSIOLOGY)**

Contemporary problems in airborne displays
p 346 A85-22593

Research at automated ATC Scientific-Experimental Center p 313 N85-18037

Operations concept for the advanced automation system man-machine interface
[AD-A149797] p 410 N85-21139

A comparison of pictorial and speech warning messages in the modern cockpit
[AD-A151917] p 579 N85-26706

Aspects of application of ACT systems for pilot workload alleviation p 588 N85-26734

Aspects of application of ACT systems for pilot workload alleviation p 677 N85-27387

X

X RAY ANALYSIS
La Recherche Aerospatiale Bimonthly Bulletin Number 1984-3, 220/May-June
[ESA-TT-882] p 543 N85-26636
X RAY APPARATUS
DoD Robotics Application Workshop Proceedings
[AD-A145867] p 71 N85-11976
Robotics in nondestructive inspection at Sacramento Air Logistics Center
[AD-P004012] p 127 N85-11992
X RAY ASTRONOMY
An automatic navigation and aspect sensing system for X-ray astronomy p 643 A85-38314
X RAYS
Further observations of X-rays inside thunderstorms p 701 A85-37720
Ultra high energy events in ECHOS series and primary energy spectrum
[HE-3.7-9] p 920 N85-35966
X WING ROTORS
Comparison of noise prediction for the X-wing system and a conventional rotor in hover p 493 A85-31953
Evaluation of a ten-foot diameter X-wing rotor p 495 A85-31987
X-Wing Harrier speed and helicopter hovering p 572 A85-35352
X-29 AIRCRAFT
The X-29 flight-research program p 102 A85-13895
Some engineering aspects of the X-29 airplane p 155 A85-16064
Design verification testing of the X-29 graphite/epoxy wing covers p 415 A85-30163
The X-29 - Is it coming or going? p 572 A85-34699
Multivariable digital flight control design of the X-29A using output feedback p 840 A85-45053
Quantitative synthesis of highly uncertain, multiple input-output, flight control system for the forward swept wing X-29 aircraft p 841 A85-45055
Forward-Swept Wing control system development p 894 A85-49011
Multivariable control law design for the X-29 aircraft
[AD-A151828] p 576 N85-25259
X-29 digital flight control system design p 677 N85-27889
XV-15 AIRCRAFT
Advanced AFCS developments on the XV-15 tilt rotor research aircraft — Automatic Flight Control System p 512 A85-32013
Simulation validation of the XV-15 tilt-rotor research aircraft p 497 A85-32016

Y

YAG LASERS
Laser drilling of aeroengine components p 531 N85-24290
YAW
Limited flight investigation of strakes mounted on a helicopter tail boom p 342 A85-26394
Heat transfer from rectangular plates inclined at different angles of attack and yaw to an air stream p 600 A85-35593
A full-time yaw damper for the Starship flying scale prototype
[SAE PAPER 850912] p 895 A85-50123
Hypothetical zero yaw drag trajectory of spinning projectiles between M = 5 and M = 10
[AD-A148899] p 329 N85-18963
Static investigation of several yaw vectoring concepts on nonaxisymmetric nozzles
[NASA-TP-2432] p 637 N85-28924
YAWING MOMENTS
Measurements of despin and yawing moments produced by a viscous liquid p 423 A85-26447
YF-16 AIRCRAFT
Real-time analysis of a digital multiloop flight control system p 840 A85-45050
YIELD POINT
Fatigue life evaluation program for the Kfir aircraft p 645 A85-37182
Fuel containment and damage tolerance in large composite primary aircraft structures
[NASA-CR-166083] p 787 N85-30032
Fuel containment and damage tolerance for large composite primary aircraft structures. Phase 1: Testing
[NASA-CR-166091] p 902 N85-35241
YTTERBIUM
Thermal barrier coating system
[NASA-CASE-LEW-14057-1] p 902 N85-35233
YTTRIUM
High-temperature erosion of plasma-sprayed, yttria-stabilized zirconia in a simulated turbine environment
[AIAA PAPER 85-1219] p 689 A85-39662
High-temperature erosion of plasma-sprayed, yttria-stabilized zirconia in a simulated turbine environment
[NASA-TP-2406] p 121 N85-13045
YTTRIUM OXIDES
Progress in the utilization of an oxide-dispersion-strengthened alloy for small engine turbine blades
[SAE PAPER 841512] p 688 A85-39284

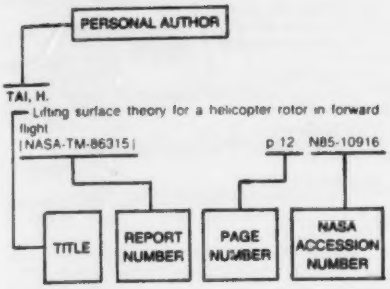
Z

ZERO LIFT
On relaxation of transonic flows around zero-lift airfoils and convergence of self-correcting wing tunnels p 396 N85-20214
ZIRCONIUM
High-temperature erosion of plasma-sprayed, yttria-stabilized zirconia in a simulated turbine environment
[AIAA PAPER 85-1219] p 689 A85-39662
High-temperature erosion of plasma-sprayed, yttria-stabilized zirconia in a simulated turbine environment
[NASA-TP-2406] p 121 N85-13045
Thermal barrier coating system
[NASA-CASE-LEW-14057-1] p 902 N85-35233
ZIRCONIUM OXIDES
Thermal stability of plasma-sprayed zirconia coatings as related to substrate selection p 900 A85-48758

# PERSONAL AUTHOR INDEX

**AERONAUTICAL ENGINEERING** / *A Continuing Bibliography* JANUARY 1986
1985 Cumulative Index

### Typical Personal Author Index Listing



Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g., NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the title. Under any one author's name the accession numbers are arranged in sequence with the AIAA accession numbers appearing first.

## A

**AABEYOUNIS, W. K.**
Nacelle/pylon/wing integration on a transport model with a natural laminar flow nacelle
[NASA-TP-2439] p 740 N85-29924

**ABAM, D. P. S.**
Computation of the aerothermodynamic field of laminar diffusion flames p 41 A85-10557

**ABBINK, F. J.**
Flying in spite of the weather
[NLR-MP-84021-U] p 644 N85-27847

**ABBOT, K. H.**
Reference energy-altitude descent guidance: Simulator evaluation
[NASA-TP-2383] p 261 N85-16868

**ABBOTT, J. M.**
Analytical and physical modeling program for the NASA Lewis Research Center's Altitude Wind Tunnel (AWT)
[AIAA PAPER 85-0379] p 275 A85-19709
Analytical and physical modeling program for the NASA Lewis Research Center's Altitude Wind Tunnel (AWT)
[NASA-TM-86919] p 276 N85-15757

**ABBOTT, L. W.**
Test experience on an ultrareliable computer communication network
[AIAA PAPER 84-2649] p 194 A85-17836

**ABBOTT, T. S.**
A cockpit-display concept for executing a multiple glide-slope approach for wake-vortex avoidance
[NASA-TP-2386] p 261 N85-16869

**ABBOTT, W. Y.**
UH-60A external stores support system fixed provision fairings drag determination
[AD-A147188] p 256 N85-15719

**ABBOUD, M.**
Theoretical study of the transonic flow past wedge profiles with detached shock waves p 74 A85-12870

**ABDULRAHMAN, S. H.**
Vibration characteristics and dynamic stresses in hollow turbine blades p 770 A85-41851

**ABEL, I.**
Design of a flutter suppression system for an experimental drone aircraft p 497 A85-32584
Dynamic wind-tunnel testing of active controls by the NASA Langley Research Center p 514 N85-22353

**ABELKIS, P. R.**
Low temperature and loading frequency effects on crack growth and fracture toughness of 2024 and 7475 aluminum p 900 A85-47974

**ABID, R.**
An examination of turbulence models for a separating three-dimensional turbulent boundary layer
[ONERA, TP NO. 1985-74] p 904 A85-47273

**ABOU EL LEIL, M. M.**
Impact fracture of thermally tempered glass helicopter windshields
[ACS PAPER 41-G-83F] p 363 A85-25084

**ABRAHAM, R.**
Requirements for future aircraft programs from the perspective of an airline company in international competition p 706 A85-40346

**ABRAHAM, S. J.**
The relationship between an advanced avionic system architecture and the elimination of the need for an Avionics Intermediate Shop (AIS) p 439 A85-26804

**ABRAMOWITZ, A.**
Model tests of aircraft interior panel flammability p 852 A85-44125
Preliminary evaluation of an improved flammability test method for aircraft materials
[FAA-CT-84-22] p 242 N85-16840

**ABRAMS, C. R.**
Flight test of a helicopter fly-by-wire/light actuation control system p 842 A85-45155

**ABRAMSON, J.**
Low-speed characteristics of a circulation control airfoil with AFT camber and a spiral trailing edge
[AD-A150851] p 481 N85-23725

**ABRAMSON, M. R.**
A comparison of several digital map-aided navigation techniques p 642 A85-37829

**ABRAMSON, P. D.**
Program to support the approval of supplemental navigation aids in the National Airspace System p 644 A85-38541

**ABRON-ROBINSON, L. A.**
Wildlife Hazards to Aircraft Conference and Training Workshop: Proceedings
[AD-A148330] p 402 N85-19938

**ABTAHI, A. A.**
Aerodynamics of an aspect ratio 8 wing at low Reynolds numbers
[AIAA PAPER 85-0278] p 217 A85-19630
Aerodynamics of an aspect ratio 8 wing at low Reynolds numbers p 628 A85-39223
Effects of aspect ratio on stall hysteresis for the Wortmann airfoil
[AIAA PAPER 85-1770] p 812 A85-43832

**ABU-MOSTAFA, A. S.**
Calibration of wind tunnel flow quality p 516 N85-22399

**ABUELFOUTOUH, N.**
